Coal is now liquified by first turning it into water gas and then into synthetic wood alcohol.

Son Murders to Avenge Mother

Kills Brother's Wife While She Is Sitting in Barber's Chair.

Lincoln, Neb.—The day before Fame Mason was shot by her brother-in-law as she sat in a barber's chair at Lodge Pole, Neb., she had gone with Frank Mason to Fremont, Neb., to decorate the graves of relatives. They had spent pleasantly cautious among the gypsy tribes and, in accordance with one of them, a lighted Chrismas tree was placed by Fame Mason and her father-in-law, Frank, over the grave of his grandchild. Frank Mason's wife was buried nearby about a year ago.

The gypsy graves are well kept, some of them so beautifully, indeed, that people often drive out to the Ridge cemetery to view them.

There apparently was nothing overt in this visit of the gypsy chief, Frank Mason, and his daughter-in-law to inspire the wrath of his two sons, Duffy and Ted. It probably did, however, fan their growing anger into a blaze. They resented the fondness of their sixty-one-year-old father and chief for his eighteen-year-old daughter-in-law.

Fame Schafer Mason was not gypsy-born. She was married to Duffy Mason, April 17, 1920, at Pierre, Neb. She had spent the greater part of her life on the road, for her parents are horse traders but not gypsies. Her husband left her a day after the marriage and they had lived together only at intervals since. Duffy Mason says he did not "like her long."

Resented Intimacy.

For all that it is certain he resented the growing intimacy between his father and the girl. They had been in Omaha together some days before the shooting and the chief had bought her some fineries that young girls love. A lot of money he paid for them, too, as much as $100. That means the pootits of quite a bit of horse trading.

Chief Mason allowed he had a right to buy some things for his own daughter-in-law and he had a right to be in Omaha at the same time as Fame. That didn't square things with his sons, however. They put a different interpretation on his gifts to Fame.

So the night after Fame and Frank had placed the little lighted Christmas tree over the body of the gypsy child Fame Mason returned to the camp at Leigh. Ted, the favorite son of Mason, said to her, according to the testimony, "Fame, I want you to go home. I don't want to live with you."

But Fame, didn't go home. She started to prepare supper over the camp-fire. The Masons had been living in a covered wagon despite the zero weather.

Right here the ghost of the gypsy woman buried near the child out at Ridge cemetery enters the story. Ted Mason, who shot his wife a short time later, explains it that way:

"She comes back to camp all dolled up in some new clothes and starts to get supper. She used a skillet and some things my mother owned, which we couldn't stand to see that girl touch the things my mother used to touch. And I told her so. And I told her what I thought about her and father.

"She threw the things down on the ground, and ordered me out of the wagon."

Ted Mason went up to the town. Duffy Mason joined him there. Some time later they heard that Fame had come up to town, and was in the barber shop. Also, that their father was with her.

Ready for Hair Cut.

When the brothers entered the shop Fame Mason was seated in a chair ready for a hair cut. Frank Mason stood beside her. The tragedy moved quickly. Holding a revolver about six inches from the back of the girl's head, Ted Mason fired.

As she slumped in the chair Frank Mason caught her in his arms and kissed her. She died in his arms.

The brothers gave themselves up, and their father followed them to the town hall. They were his sons and he was ready to employ a lawyer to defend them. They were of his tribe. He was their father and their chief.

They hurried back at him their accusations, their threats. He did not flinch. Turning to the officer who was guarding them he said: "Marshal, give Ted the gun, and see if he's got nerve enough to finish me."

"I don't want to shoot you," replied his son. "If I had wanted to kill you I could have done it long ago."

Frank Mason was deeply concerned with the funeral arrangements. He asked the undertaker to have a woman assist in the preparing of the body and asked the undertaker sat up all night with it. "This is the code and ethics of our family," Mason explained.

As Fame's body was being prepared for removal to Schuyler, Neb., the home of her family, Frank Mason stood beside it and wept. He bent and kissed the lips of the dead woman. He urged that the remains be placed in a vault, saying that gypsies never bury their dead except in vaults. The request was not granted, her own people taking the body and interring it in their own churchyard.

At the preliminary hearing the facts of the horrible tragedy of events leading to the quarrel. He said he had happened to meet Fame in Omaha and that they registered at a hotel there, but in separate rooms. He spent $100 on clothes for her. His sons threatened to cut her new coat off her back if they should catch her wearing it.

From their cell in the dungeon of Schuyler jail, Ted and Duffy Mason talk freely of the quarrel and the crime. They received word that their father would not speak from whom for any show of emotion. "I did not love my wife," says Duffy. "I was forced to marry her. I left her the next day and stayed away."

Duffy said he had not seen the girl again until about a month before the shooting. He was requested by his brother to come home, as he rejoined the family wagon. He and his wife had quarreled for several days and he decided to ask for a divorce. His father resolved him that gypsies do not seek recourse to courts, but settle their own affairs, he said.

"I would have nothing to do with my wife," Duffy continued. "We talked it over with the county attorney and he advised us to get along if we could. Then I began to notice that my dad was 'sweet' on her. He would give her money and they were always together. I didn't care. She was a bad woman, but I wouldn't have my father arrested, because we're pitched by these tinhorn prostitutes."

Peter insisted upon our repeating the tale with all details, and I believe he would have required a third account had it not been for the interruption which came during the afternoon.

We were sitting in the commandant's quarters on the upper floor of the blockhouse when the sentries on the stockade announced a large fleet of canoes approaching from the west. The lieutenant promptly issued orders to get out the trade goods, and prepared for an impressive reception of the savages, deeming them emissaries of some tribe come to exchange their fur catch of the winter.

But the leading canoes held on past the fort, and none of those which followed gave indication of intent to steer inshore.

"Hafe you a canoe?" asked Coriace of the bewildered lieutenant. "Ja? Well, my friends and I will go and ask what this means."

We launched the canoe from the water-gate, and with Peter and Ta-wan-ne-ars at the paddles, sped out into the lake. Some distance from shore we overhauled the rear squad of the fleet, every canoe loaded deep with packages of furs.

"Ho, brothers," called Ta-wan-ne-ars. "The chief of the English fort, who remains here in the land, Ka-Ga-en-gwa-ra-go, invites you to come ashore and trade with him."

Up stood a large, stout man with lanky black hair, dressed in the uniform of the French marine troops, who had been ensconced behind a bale of furs.

"Ha, 'tis my friend from Arles," he shouted, "and his companion, the noble war chief! So the Keepers did not keep you?"

"No, Monsieur de Joncaire," I replied. "We are still alive to plague you."

"Ventre St. Remi, 'tis not sorry I am! Try it again, my lad. Only try it again!"

"And what are you doing with these people?"

He roared with laughter.

"No more than shepherding them past the temptations of the English."

Ta-wan-ne-ars called again to the Indians in the canoes.

"Come ashore, brothers. We have rich goods to trade with you."

"We do not need to trade with the English," a voice replied. "We are glad we can trade with our fathers, the French. They have plenty of goods to offer us. Onontio has sent word he will pay better than the English now."

"Ha, ha, ha!" exploded Joncaire. "Ho, ho, ho! Mort de ma vie! Tonerre-re-re de Dieu! 'Tis an old world! An revoir—and avoid the Keepers. Avoid the Keepers by all means. I am told they keep a strict watch upon the Doom Trail these days."

His paddlers dipped their blades, and his bellows of laughter were wafted back to us as his canoe followed the far argosy down the lake toward the French posts on the St. Lawrence—posts whose magazines were already beginning to swell with the life-blood of English trade which was pouring over the Doom Trail.

CHAPTER XI

We Meet Red Death and Black Death

"We must count the Doom Trail," I said as we carried the canoe through the water-gate and deposited it within the stockade. "I will write my professor at once of affairs at Jagara, and ask Ta-Werge du Bois, that this fine business makes it necessary he should have sure intelligence of what passes to Oswego."

"Ja," agreed Coriace slowly. "Hafe I safe messenger, he might get there and back again?"

He surveyed the scores of dwindling canoes, their silvery birches aglean in the sunlight, their dripping paddles flashing in the ripples as they drove them along.

"They will make camp by sunset at der point of der three rocks. That is eight—ten—miles from here. Ja, we can make it."

"Make what?" I asked impatiently. "Der distance. And my plan."

"What plan, man?"

"To put der grin or der other side of Joncaire's face, by —! Now you listen."

And he outlined an undertaking which seemed absurdly simple until I chanced to look up and see that fleet of canoes clouding the eastern horizon of the lake.

"They are too many for us," I objected.

"Ja, if they know we come," he admitted. "Hafe they do not."

"It is well worth trying," said Ta-wan-ne-ars deliberately. "If it succeeds it will set back the plans of Onontio and Murray."

"Aunt If it does not, then you tell der goferner Peter Corlaer tried once tos often to get der joke back on Joncaire."

With which sage comment Peter took himself off to arrange with the post commandant for drawing certain supplies we should require for this new expedition.

Two hours later an express left Oswego with dispatches for Governor Burnet, describing the situation at Jagara and our experiences at La Vierge du Bois, as well as the passage of Joncaire's argosy of furs, the greatest haul which had so far been made by either country that year on the frontier. Before the gate was slammed shut again we three slipped out and waved good-by to the garrison on the walls.

Our advance was cautious, and we parted company with Corriner in some bushes, whence we could distinguish figures dancing around the flames and hear the distant yells of the guests of Joncaire as they caroused on his brandy. The Dutchman stripped to his belt. Ta-wan-ne-ars relieved him of his musket, powder horn and bullet pouch, and I shouldered his clothes and pack.

"By der blasted pine—a goodt mile beyondt der other pine," whispered Peter as he waded into the water.

"You are sure you can stay afloat so long?" I asked with some misgiving.

"Ja," he said scornfully. "When you hear a noise like a fish rising three times, that is Peter."

He gripped knife and tomahawk against either thigh, slung a spare flask of powder beside them, struck forward to his chin and began to cleave the water with powerful, overhand strokes.

"We must hurry, brother," admonished Ta-wan-ne-ars.

He started off at right angles with the path we had been following, and I decided I could detect the glow of fires, coming ultimately to a high point above the shore half a mile beyond them. Here we rested, both because our weariness was very great and because we desired to witness Peter's exploit, and, if need be, be prepared to aid him.

It was past midnight, and the fires had burned low and the brandy drinkers were soaked to the stupid. No sound came to us, except for the calling of a wolf from the lonely timber inshore and the croaking of waterbirds.

Twas Ta-wan-ne-ars' eagle vision which saw the danger signal. He gripped my arm.

"Look, brother," he hissed.

I looked, and a flame spurted upward between the fires and the water. There was a sharp explosion. A long bluish cataract, and then a chorus of excited yells rose, dropped and was sustained.

We listened for ten minutes, and while the yelling continued, with intermittent shooting, there was nothing to indicate triumph or satisfaction. In the meantime the flames which Peter had kindled after bursting out gradually, gradually died out as the assailants removed those canoes which had not caught fire and threw water on such as were only smoldering.

Half an hour passed uneventfully. Then the steady lapping of the water against the beach was disturbed by the splash of fish snakes in flight. It was repeated twice. Ta-wan-ne-ars leaned over and splashed the water thrice with his hand. A grunt boomed out of the darkness. Ripples spread in a widening circle, and a huge form stepped noiselessly ashore, ignoring our helping hands.

"Ugh, that was a goodt joke on Joncaire," muttered Peter. "Some canoes I smash with der ax and some I blow up with der powder and more are burned. Where are they? Ach, here is an soaked like der muskrat."

"You were long in coming," said Ta-wan-ne-ars. "My brother is not hurt?"

"Nein, nein. Ooof, what a swim! I tell you I hafe bubbles under my skin! Ja!"

"Did you damage them much?" I asked eagerly.

Peter answered the operation of struggling into his shirt and chuckled shrilly.

"I would gife much to see der face of that Joncaire when he counts his canoes unt der furs packs he has left. Twice now we get der joke on him."

Wet as he was, with the water dripping from his tank hair, he lunged upon quitting that dangerous locality at once. We trimmed across country until the sun was high, and we stumbled upon an isolated family of Onondagas, who made us free of their game-store.

(TO BE CONTINUED.)

Evidences of Mourd Builders Far South

Smithsonian ethnologists are always on the trail of the ancient civilizations of America. Now they have enlarged the territory known to have been held by the Mound Builders, by discovering on Pecan Island, in the southwest corner of, Vermilion parish, in Louisiana, 22 of the curious earthworks with which the Ohio and Mississippi valleys are dotted. This extends the field of the Mound Builders far south, says the Philadelphia Bulletin.

Preliminary excavations have turned up characteristic copper ornaments, presumably made from copper taken from the outcroppings worked by the Mound Builders in the Lake Superior district, and ornaments carved from light-colored stone of a geological nature not to be found in Louisiana.

Among the early historic occupants of the territory were the Atakapas, dwelling in Texas and western Louisiana, who are known to have been cannibals, while east of them were the lands of the Chitimachas. The expedition sent into the territory by the Smithsonian institution expected to find nothing more than supplementary evidences of the low state of culture of these tribes and their primitive fashion of living. But instead it found that a superior culture antedated the occupancy of the Indians. There are stone and wooden carvings and bread ornaments, others of galena and beautite, bone awls and fragments of pottery, indistinctly of Mound Builders origin.

It Never Fails

I was about to start out on my first day of hiking at Glacier park when Bert stopped me. Bert is one of those fancy cowboys who escort "dudes" over the Glacier trails, and he appears to enjoy it.

"You gotta a snap an' compass?" he asked, and I assured him I had.

"Well, bet you gotta deck of playin' keerds?" he persisted.

"Why a deck of playing cards?" I asked.

"Always carry a deck with you, son, and whenever you get lost an' find yerself all alone in the wilderness set down an' start a game of solitaire. There's jest sure to be some darn fool pop up an' look over your shoulder an' tell you what to do next."—Chicago Tribune.

The Lady Erred

If she had read Blank's book on etiquette, Mrs. Newrich would never have brought on the pruning knives when she served stewed prunes.—Cincinnati Times-Star.

Workers Find Strange Bird in Old Structure

New York.—Wreckers demolishing the building on the site for the new building of the New York Athletic club came upon a strange crippled bird recently which defied identification even by that man of diversified knowledge, the foreman. The bird, perched on a rafter, resembled a pigeon, but had a comb somewhat like a rooster.

The bird was taken to the West Forty-seventh police station. A claw and a wing had been injured, the latter having been bound with a strip of adhesive tape.

The bird has a dark gray breast, brown feathers at the neck and white specks around the tail.

Around the Orchard

SAY ORCHARDISTS PRUNE TOO MUCH

Horticulturists at the experiment station at Geneva, N. Y., assert that many orchardists prune too much, without regard to the real need of the tree and that there is more danger of injuring the tree with too much pruning than with too little.

Trees which are carefully selected when the orchard is set out require only the removal of an occasional branch or two, start out in the wrong place and the cutting out of dead, injured, and crossed limbs, say the horticulturists.

If the trees are producing undersized fruits, if the tops contain many dead branches, or if the seasonal growth is short and scant, judicious pruning is recommended as a means of rejuvenation. "This usually consists in cutting back many branches and in entirely removing others," say the station authorities, who lay down the following general rules applicable under such conditions. "Prune weak-growing varieties heavily; strong-growing kinds lightly. Varieties which branch freely need little pruning; those having a somewhat unbranched habit, much pruning. Prune trees in rich, deep soils lightly; in poor, shallow soils, heavily."

The cutting back of all the branches of a tree is practiced regularly only with peaches and some plums, it is said. "This is attributed to the fact that with these fruits, the wood of the past season, and therefore the buds, bear the progressively farther away from the trunk, so that it is necessary to head-in these fruits by cutting back the branches in order to keep the bearing wood near the trunk. On the other hand, apples, pears, cherries and most plums are borne on spurs from wood two or more years old and with these handling-in is not so desirable. Experimental evidence obtained in tests on the station's experimental farm with winter pruning has no special advantage over summer pruning, except that the pressure of other work is less during the winter months."

Geranol, New Attractor for Japanese Beetle

The new attractive agent, geranol, which the bureau of entomology of the United States Department of Agriculture as an aid in its control work against the Japanese beetle, has been found very successful. Methods have been worked out whereby this material may be used to concentrate the beetles in a relatively small area, so that they may be destroyed by the material may be used to concentrate the beetles in a relatively small area, so that they may be destroyed by the use of poisoned sprays. The beetles squeak the higher the price.

The idea of wearing leather soles which make their presence known, with every step of the wearer originated by a Japanese some time ago in the state of Junagadh.

One of the chiefs of the Chuasamin tribe had purchased a new pair of shoes, and they creaked everlastingly as he sat around among the guests at festival gatherings. His subjects were more humble than ever. Some of the rajahs, ruling princes and the chiefs of numerous principalities have since taken to squeaking shoes, which are worn only upon ceremonial occasions.

Indian Princes Prefer Their Shoes Squeaky

Bombay, India.—Squeaky shoes are a great favorite with the ruling Indian princes and chiefs, who have hit upon this as a means of impressing their subordinates with the power and importance of their position.

The idea of wearing leather soles which make their presence known, with every step of the wearer originated by a Japanese some time ago in the state of Junagadh.

One of the chiefs of the Chuasamin tribe had purchased a new pair of shoes, and they creaked everlastingly as he sat around among the guests at festival gatherings. His subjects were more humble than ever. Some of the rajahs, ruling princes and the chiefs of numerous principalities have since taken to squeaking shoes, which are worn only upon ceremonial occasions.

Shanghai Concession Made Ready for Defense

Great British has been hurrying troops to Shanghai and making other preparations for the defense of the international settlement there. In the illustration are seen the trenches being dug through the city after landing, and, below, workmen completing the barbed-wire entanglements around the foreign concession.

Engines Answer 8 False Alarms to Same House

Minneapolis, Minn.—Hooting through the streets of Minneapolis on a fire truck in 21 degree below weather is no joke. And making eight trips to the same house in one night, only to find each time that there isn't any fire there at all—that's worse yet, firemen testified.

Eight telephone calls spreading the alarm that a partially constructed house at 15 West Elm street was on fire, came into Arthur Driscoll, fire department alarm operator. Eight times fire trucks went whizzing to the house.

Each time they found the same thing. Workmen had been plastering the house. When they left at night they started a fire in a stove termed a salamander, inside the house to dry out the plaster and keep it from freezing.

Reflection of flames from the salamander and steam from the drying plaster caused eight persons to send in fire alarms.

SIX IN CANOE IN THE BERING SEA SURVIVE AN ARCTIC GALE

Walrus Hunters Recount Thrilling Tale of Hardship, Peril and Suffering.

Sevoungo, St. Lawrence Island, Alaska.—Swept in an open skin canoe for 300 miles across the Bering sea from Siberia to this island, six survivors of a party of eight walrus hunters recently recounted a story of hardship, peril, suffering and tragic disaster.

Their arms and legs frozen, their eyes distended and swollen and their scanty clothing in tatters, the six men finally reached the Eskimo village of Gambell, on the northern part of the island, from where the story of their ill-fated battle with the elements has reached Sevoungo by radio.

Driven by approaching starvation to seek food, the eight men left a village on Little Max bay, Siberia, on February 2 to hunt walrus. Venturing farther out on the icy sea after they had failed to find walrus near shore, the party in the frail kayak was caught by the full fury of an arctic gale.

After being lashed about on the waters for several days, the hunters pulled their canoe onto a floating ice pack. There, suffering, cold and without food and fire, the little band passed the night in the snow. The next morning two of the party went foraging for food and failed to return. They have not since been seen.

Five of the starving group finally straggled into Gambell, where the United States bureau of education maintains a school for the Eskimos. After a search, headed by Samuel P. Thornton, government teacher at Gambell, the sixth member of the party was found, nearly dead.

New Red Gravenstein

A new Gravenstein apple with a solid, dark red color has originated as a bud sport of the parent variety, according to officials of the New York Agricultural Experiment station. It is like the parent variety except as to color. It is of a deeper red than the Banks Gravenstein, another sport of the Gravenstein.

The station will in the future recommend the Red Gravenstein as the most desirable of the three to plant, according to Prof. U. P. Hedrick.

New Fruit Varieties Are Described in a Bulletin

Thirty-two new horticultural fruits produced by horticulturists of the University of Minnesota at the state fruit breeding farm are described and most of them pictured in Bulletin 220 prepared by W. H. Alderman, chief of the division of horticulture, and issued by the Minnesota experiment station. Those varieties which have been given names and introduced among fruit growers, include 14 kinds of plums, three blueberry hybrids, four apples, seven strawberries, one red raspberry, one gooseberry, and two ornamentals.

"Many of these varieties are rapidly becoming accepted as standards in this and adjoining states, and the plums are being planted on a commercial scale," says the bulletin. "The wealth accruing to the state each year from the products of these 82 varieties far exceeds the total cost of all the state-supported fruit breeding experiments since the establishment of the first fruit breeding farm in 1878."

This bulletin is for free distribution and copies can be obtained by writing the Office of Publications at University Farm, St. Paul.

Keep an Account

Every progressive farmer should keep an account of his farm business so he is to know at the end of the year whether he has made a profit or loss. The college of agriculture advises also to help him study his business and make such changes in his organization and operation which are important from the standpoint of increasing his profits. Farmers interested in keeping such a record this coming year, can get both information and help from his agricultural college.

Keep Out Weeds

Weeds are a menace to the farmer. Keep them out of the garden, out of the fields, out of the pastures, and out of the meadows. Weeds are a menace to the farmer. Keep them out of the garden, out of the fields, out of the pastures, and out of the meadows.

Representative J. Charles Linthicum Is Dead

Representative J. Charles Linthicum, democrat of Maryland, has been elected to lead the vast bloc in the house of representatives during the Seventieth congress.

Moses' Long Fast

In the Book of Exodus it is recorded that Moses during his interview with God on Mount Sinai, where he recorded the Ten Commandments on tables of stone, fasted 40 days and nights. His abstention, however, was from both food and drink.

Extend Pity to Fool

You pity a man who is lame or blind, but you never pity him for being a fool, which is often a much greater misfortune.—Sydney Smith.

The DOOM TRAIL

—By—

Arthur D. Howden Smith

Author of PORTO BELLO GOLD, Etc.

(© by Bleasdale's.) WNU Service.

CHAPTER X—Continued

—21—

The yelling in the wood increased in volume as the False Faces followed the course we had taken by broken branches and footprints in the pine-mold. A misshapen figure with the head of some fabled lemur sputtered into the trail and galloped around, nose to ground like a hound seeking a lost scent. In a moment the ugly head was lifted, and a howl of satisfaction greeted the other monstrous shapes which joined in. The whole pack gave tongue and vanished up the trail after Marjery.

Ta-wan-ne-ars waited to give the struggling time to sipper, then rose and led the way through the bed of the stream westward.

We waited in the water for more than a mile, when the streams turned to the north and we stepped out upon a rock and dressed. Afterward we caught the overhanging bough of a tree and swung ourselves onto dry ground above the bank, never leaving a trace of our course up to that time. From this point we traveled on through the forest, pursuing no settled path, but holding to the northward in the direction of Oswego on the shore of the Ontarakal lake.

We did not stop until after midday. Ta-wan-ne-ars knocked over a wild turkey with his tomahawk, kindled a fire of dry sticks and broiled the juicy bird before the coals. He insisted that I, should sleep first, promising to arouse me at the end of two hours—he reckoned those fruits, the word of the declension of the sun. But when he finally did arouse me the sun was close to setting, and I saw by the sunken look of his eyes that he had not slept during the two hours.

"Why did you not wake me?" I asked angrily.

"Ta-wan-ne-ars had no wish for sleep," he returned.

"Nonsense," I retorted. "You cannot go indefinitely without rest."

"I had my thoughts for company," he said simply. "And they are not happy thoughts, brother. They would not let me sleep. Your search is ended, brother," he added.

"What do you mean?"

"The man you spoke of has been found. It is no longer sick."

"Mayhap," I replied, but none the less 'tis out of reach and in great danger."

"We shall save it," he encouraged me. "Ta-wan-ne-ars knows. We must wait. The time will not be long."

He refused again to sleep, and we ate the remainder of the turkey—our hunger was positive—and gathered our things, my mind full of the Keepers, and Indian war parties, and Ta-wan-ne-ars said that we were on the marches of the hunting grounds of the Mohawks.

In the late morning we killed a rabbit, broiled and ate it and traced the virgin forest until long past sundown, when the following afternoon we caught our first view of the inland sea from a height of land, and the next morning we sighted the stockade of Oswego, the fort which Governor Burnet had established on the shores of the lake in the effort to divert the fur-western fur trade from the French posts.

The gate was closed, but as we approached it opened, and an enormous, pot-bellied figure in backskin and fur cap sauntered out to meet us.

"Ja, it is you," the caller hailed us. "What has happened? I hafe come here to scout der Doom Trail and learn how you died—until you are alife."

So we told him, while the lieutenant in command of the post and his partner of twenty busy frontiersmen gathered in a knot to listen over each other's shoulders.

"Dudt—huh," expostulated Peter. "You hafe been in La Vierge du Bois?"

"True."

"Unt you nobody has efer been in La Vierge du Bois—"

"And none out alive," I amended. "I fear many poor souls have been sacrificed by these heathen priests."

Peter insisted upon our repeating the tale with all details, and I believe he would have required a third account had it not been for the interruption which came during the afternoon.

We were sitting in the commandant's quarters on the upper floor of the blockhouse when the sentries on the stockade announced a large fleet of canoes approaching from the west. The lieutenant promptly issued orders to get out the trade goods, and prepared for an impressive reception of the savages, deeming them emissaries of some tribe come to exchange their fur catch of the winter.

But the leading canoes held on past the fort, and none of those which followed gave indication of intent to steer inshore.

"Hafe you a canoe?" asked Coriace of the bewildered lieutenant. "Ja? Well, my friends and I will go and ask what this means."

We launched the canoe from the water-gate, and with Peter and Ta-wan-ne-ars at the paddles, sped out into the lake. Some distance from shore we overhauled the rear squad of the fleet, every canoe loaded deep with packages of furs.

"Ho, brothers," called Ta-wan-ne-ars. "The chief of the English fort, who remains here in the land, Ka-Ga-en-gwa-ra-go, invites you to come ashore and trade with him."

Up stood a large, stout man with lanky black hair, dressed in the uniform of the French marine troops, who had been ensconced behind a bale of furs.

"Ha, 'tis my friend from Arles," he shouted, "and his companion, the noble war chief! So the Keepers did not keep you?"

"No, Monsieur de Joncaire," I replied. "We are still alive to plague you."

"Ventre St. Remi, 'tis not sorry I am! Try it again, my lad. Only try it again!"

"And what are you doing with these people?"

He roared with laughter.

"No more than shepherding them past the temptations of the English."

Ta-wan-ne-ars called again to the Indians in the canoes.

"Come ashore, brothers. We have rich goods to trade with you."

"We do not need to trade with the English," a voice replied. "We are glad we can trade with our fathers, the French. They have plenty of goods to offer us. Onontio has sent word he will pay better than the English now."

"Ha, ha, ha!" exploded Joncaire. "Ho, ho, ho! Mort de ma vie! Tonerre-re-re de Dieu! 'Tis an old world! An revoir—and avoid the Keepers. Avoid the Keepers by all means. I am told they keep a strict watch upon the Doom Trail these days."

His paddlers dipped their blades, and his bellows of laughter were wafted back to us as his canoe followed the far argosy down the lake toward the French posts on the St. Lawrence—posts whose magazines were already beginning to swell with the life-blood of English trade which was pouring over the Doom Trail.

CHAPTER XI

We Meet Red Death and Black Death

"We must count the Doom Trail," I said as we carried the canoe through the water-gate and deposited it within the stockade. "I will write my professor at once of affairs at Jagara, and ask Ta-Werge du Bois, that this fine business makes it necessary he should have sure intelligence of what passes to Oswego."

"Ja," agreed Coriace slowly. "Hafe I safe messenger, he might get there and back again?"

He surveyed the scores of dwindling canoes, their silvery birches aglean in the sunlight, their dripping paddles flashing in the ripples as they drove them along.

"They will make camp by sunset at der point of der three rocks. That is eight—ten—miles from here. Ja, we can make it."

"Make what?" I asked impatiently. "Der distance. And my plan."

"What plan, man?"

"To put der grin or der other side of Joncaire's face, by —! Now you listen."

And he outlined an undertaking which seemed absurdly simple until I chanced to look up and see that fleet of canoes clouding the eastern horizon of the lake.

"They are too many for us," I objected.

"Ja, if they know we come," he admitted. "Hafe they do not."

"It is well worth trying," said Ta-wan-ne-ars deliberately. "If it succeeds it will set back the plans of Onontio and Murray."

"Aunt If it does not, then you tell der goferner Peter Corlaer tried once tos often to get der joke back on Joncaire."

With which sage comment Peter took himself off to arrange with the post commandant for drawing certain supplies we should require for this new expedition.

Two hours later an express left Oswego with dispatches for Governor Burnet, describing the situation at Jagara and our experiences at La Vierge du Bois, as well as the passage of Joncaire's argosy of furs, the greatest haul which had so far been made by either country that year on the frontier. Before the gate was slammed shut again we three slipped out and waved good-by to the garrison on the walls.

Our advance was cautious, and we parted company with Corriner in some bushes, whence we could distinguish figures dancing around the flames and hear the distant yells of the guests of Joncaire as they caroused on his brandy. The Dutchman stripped to his belt. Ta-wan-ne-ars relieved him of his musket, powder horn and bullet pouch, and I shouldered his clothes and pack.

"By der blasted pine—a goodt mile beyondt der other pine," whispered Peter as he waded into the water.

"You are sure you can stay afloat so long?" I asked with some misgiving.

"Ja," he said scornfully. "When you hear a noise like a fish rising three times, that is Peter."

He gripped knife and tomahawk against either thigh, slung a spare flask of powder beside them, struck forward to his chin and began to cleave the water with powerful, overhand strokes.

"We must hurry, brother," admonished Ta-wan-ne-ars.

He started off at right angles with the path we had been following, and I decided I could detect the glow of fires, coming ultimately to a high point above the shore half a mile beyond them. Here we rested, both because our weariness was very great and because we desired to witness Peter's exploit, and, if need be, be prepared to aid him.

It was past midnight, and the fires had burned low and the brandy drinkers were soaked to the stupid. No sound came to us, except for the calling of a wolf from the lonely timber inshore and the croaking of waterbirds.

'Twas Ta-wan-ne-ars' eagle vision which saw the danger signal. He gripped my arm.

"Look, brother," he hissed.

I looked, and a flame spurted upward between the fires and the water. There was a sharp explosion. A long bluish cataract, and then a chorus of excited yells rose, dropped and was sustained.

We listened for ten minutes, and while the yelling continued, with intermittent shooting, there was nothing to indicate triumph or satisfaction. In the meantime the flames which Peter had kindled after bursting out gradually, gradually died out as the assailants removed those canoes which had not caught fire and threw water on such as were only smoldering.

Half an hour passed uneventfully. Then the steady lapping of the water against the beach was disturbed by the splash of fish snakes in flight. It was repeated twice. Ta-wan-ne-ars leaned over and splashed the water thrice with his hand. A grunt boomed out of the darkness. Ripples spread in a widening circle, and a huge form stepped noiselessly ashore, ignoring our helping hands.

"Ugh, that was a goodt joke on Joncaire," muttered Peter. "Some canoes I smash with der ax and some I blow up with der powder and more are burned. Where are they? Ach, here is an soaked like der muskrat."

"You were long in coming," said Ta-wan-ne-ars. "My brother is not hurt?"

"Nein, nein. Ooof, what a swim! I tell you I hafe bubbles under my skin! Ja!"

"Did you damage them much?" I asked eagerly.

Peter answered the operation of struggling into his shirt and chuckled shrilly.

"I would gife much to see der face of that Joncaire when he counts his canoes unt der furs packs he has left. Twice now we get der joke on him."

Wet as he was, with the water dripping from his tank hair, he lunged upon quitting that dangerous locality at once. We trimmed across country until the sun was high, and we stumbled upon an isolated family of Onondagas, who made us free of their game-store.

(TO BE CONTINUED.)

Evidences of Mourd Builders Far South

Smithsonian ethnologists are always on the trail of the ancient civilizations of America. Now they have enlarged the territory known to have been held by the Mound Builders, by discovering on Pecan Island, in the southwest corner of, Vermilion parish, in Louisiana, 22 of the curious earthworks with which the Ohio and Mississippi valleys are dotted. This extends the field of the Mound Builders far south, says the Philadelphia Bulletin.

Preliminary excavations have turned up characteristic copper ornaments, presumably made from copper taken from the outcroppings worked by the Mound Builders in the Lake Superior district, and ornaments carved from light-colored stone of a geological nature not to be found in Louisiana.

Among the early historic occupants of the territory were the Atakapas, dwelling in Texas and western Louisiana, who are known to have been cannibals, while east of them were the lands of the Chitimachas. The expedition sent into the territory by the Smithsonian institution expected to find nothing more than supplementary evidences of the low state of culture of these tribes and their primitive fashion of living. But instead it found that a superior culture antedated the occupancy of the Indians. There are stone and wooden carvings and bread ornaments, others of galena and beautite, bone awls and fragments of pottery, indistinctly of Mound Builders origin.

It Never Fails

I was about to start out on my first day of hiking at Glacier park when Bert stopped me. Bert is one of those fancy cowboys who escort "dudes" over the Glacier trails, and he appears to enjoy it.

"You gotta a snap an' compass?" he asked, and I assured him I had.

"Well, bet you gotta deck of playin' keerds?" he persisted.

"Why a deck of playing cards?" I asked.

"Always carry a deck with you, son, and whenever you get lost an' find yerself all alone in the wilderness set down an' start a game of solitaire. There's jest sure to be some darn fool pop up an' look over your shoulder an' tell you what to do next."—Chicago Tribune.

The Lady Erred

If she had read Blank's book on etiquette, Mrs. Newrich would never have brought on the pruning knives when she served stewed prunes.—Cincinnati Times-Star.

Columbia Oarsmen Work in Tank

The photograph shows the Columbia university varsity crew working out on the machines in the great tank at the university where the oarsmen are swinging into action for a strenuous campaign on the water. The men are seated from left to right as follows: Coach Dick Glendon with megaphone; Stroke Lambert; Sweeney, 7; Piercy, 6; McBain, 5; Leighbauer, 4; Douglas, 3; Erickson, 2, and Walker, bow.

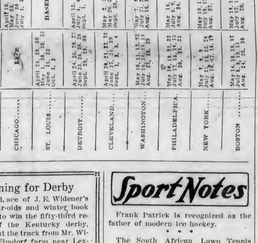
Training for Derby

Osmond, son of J. E. Widener's three-year-olds and winter book favorite to win the fifty-third renewal of the Kentucky derby, arrived at the track from Mr. Widener's Elmdorf farm near Lexington, to enter training for the classic.

Mr. Widener also has named Chance Shot and Kate Flat for the derby, but Osmond, a gelding, is considered his best bet.

Peter Conroy, recently signed by Mr. Widener to train his horses, will have charge of Osmond during his preparation for the $50,000 added race to be run at Churchill Downs May 14.

Braves' Best Hitter



Big Eddie Brown, shown in the photograph, the Boston Braves' best hitter. Last year he batted for an average of .328 and was the only man in the National league to make more than 200 safe hits, his total being 201.

Record for Geraghty

Agnes Geraghty, New York mermaid, hung up a world's record in the women's national senior swimming championships. Swimming against Mathilde Schoerich, a teammate of the Women's Swimming association of New York city, and Marie Hillegas, of the Philadelphia Turngemeinde, Miss Geraghty led by 20 feet at the finish of 220 yards. The old mark of 3:21-3-5 was clipped to 3:20. Miss Geraghty is expected to set more records this year.

DON'T FORGET MARINE.

In the closing days of Congress when there were so many pressing questions in the public mind, it is good to know that the American merchant marine has not been forgotten. Two bills looking to the development and maintenance of the merchant marine have recently been introduced in the Senate and are sponsored by Chairman Jones of the Commerce committee. One of the proposals provides for government ownership and operation and the other for private ownership and operation under federal subsidy.

If congress will not provide a substitute for the operation of the merchant marine by private owners under the American flag, Sen. Jones declared it to be his conviction that the development and operation of the marine should then be carried on by the government itself. In the tense comment he said:

"The government must furnish the money, build the ships and directly or indirectly operate them. That being the only way open to us I am in favor of adopting it. We can do it. Once we decide to do a thing complete and other contingents will know that it will be done. Then will uncertainty give way to certainty. Then will our competitors know that they have a rival that they cannot defeat or destroy."

The American people may disagree as to what is the best method of maintaining our marine, but they are unanimous in wanting it maintained. Both patriotic and economic motives. It is up to Congress to find the best method possible. When this is adopted the people will be satisfied. But they will severely resent any opposition to let the question go by default, with danger that the marine itself may get lost in the shuffle. The marine problem is no longer a sectional one. The people inland are for it as those living near the coast; it will benefit the American farmer as well as the man who lives in the port city.

DISARMAMENT?

The reason given by the French government for refusing to agree to the Coolidge proposal for a naval armament reduction conference was that it might interfere with the plans of the League of Nations for reducing armament and promoting world peace. Yet it is evident that France does not rely very much on any early tangible results from what the league may be able to do along this line. For the government, acc ording to press dispatches, has recently adopted a scheme for increasing greatly the fortifications on the Italian and German frontiers. In addition to this the French Chamber of Deputies is perfecting a plan for the mobilization of all French citizens, men and women alike, and French resources in case of war. The first article of this plan reads:

"In time of war all French nationals without distinction of age or sex, and all legally constituted groups are engaged to participate, under the conditions fixed hereafter, in defense of the country, either as combatants in defense of the country, or as non-combatants for the upkeep of the material and moral life of the country."

This article passed the Chamber of Deputies by a vote of 300 to 30, only the communists voting against it, and the communists, of course, are against any militarism outside of Russia. It is not up to us, of course, to criticise any military preparations which the French may deem necessary for the defense of their country. That is their business and not ours. But the action taken shows conclusively that the French do not put any faith in any immediate results from a disarmament conference even though it has the backing of the league.

The French are evidently suspicious of the Germans and Italians and the other European nations are suspicions of one another. That is why it will be almost impossible to get through any effective, all embracing disarmament program. The only plan which could possibly succeed is one which would attack the phases of disarmament one at a time as in the Coolidge proposal. In the meantime France is getting ready to protect herself in case of trouble. That is France's business. It is the duty of us Americans to see that Uncle Sam keeps in first class physical condition.

EFFICIENT-RADICALISM

This is the day of efficiency in propaganda as well as in business. And it is a noteworthy fact that the one-time illogical, impratical socialist who dreamed of Utopia has been displaced by the radical who often shows a political effectiveness far more deadly than that of his conservative adversary. This is one menace of communism which is often overlooked by the average observer. Attention to this fact was recently called by O. L. Smith, former Attorney General of Michigan, who prosecuted the famous case against Charles E. Ruthenburg and other radicals a few years ago. In addressing a meeting of a branch of the National Metal Trades Association of Cincinnati, he said:

"Communism and socialism have reached into a stratum of society where the bleary-eyed idle dreamer is not to be found. In his place is a clear-minded, calculating individual, many trained and educated in our best universities, who have taken this insidious movement to heart and are propagating its growth. Every communist is a pacifist because he hopes that through his pernicious propaganda he can get others to join him to bring about a condition for the outlawing of policing organizations. By this condition the communists then hope to take command by bringing about a state of rebellion and establishing their own form of government."

Here are some thoughts worth considering. The Red of today even in America is no longer a Utopian dreamer. He has a keen political sense, is well financed and knows the value of organization and publicity. He uses the printing press and the political machine instead of the soap box and finds his modern methods a thousand times more effective.

STANDARD INCREASING

Some interesting figures on the purchasing power of the dollar of today were given out recently by the National Industrial Conference B'd. The figures show, among other things, that the present value of the dollar in purchasing power is sixty cents, when compared with the dollar of 1914. During the past five years the purchasing power has varied little more than five cents, fluctuating back and forth within that margin of difference so that it can be safely said that the dollar has been practically stabilized on the sixty cent basis when compared with 1914.

Average living costs as computed by the board were 1.8 per cent lower in 1926 than in 1925, but were 66 per cent higher than in 1914. But it is significant that the average weekly wage earnings at the beginning of the year were 116 per cent higher than in 1914, leaving the wage earner a great deal better off than he was in 1914 when his pay increase is compared with the higher cost of living.

So when you feel ipclined to mourn for the good old days when things were cheap don't fail to remember that in those good old days wages were even cheaper by comparison, and the average American can buy approximately a third more goods on his wages than he could with the lower prices of 1914.

It is small wonder then that our workers are gradually increasing their bank accounts and their standards of living. It is the modern American theory that the way to bring prosperity and to raise the standard of living is to pay high wages and so increase consumption and the demand for additional products which comes with a higher standard of living.

NO ALLIANCES

Sir Esme Howard, British ambassador to the United States, in a recent address to the Twentieth Century Club in New York very sensibly stated that what was needed between English speaking countries was not a hard and fast alliance, as has been recently suggested in various quarters, but a spirit of cooperation brought about by friendly attitude of mind and not by entangling alliances. Any Anglo-Saxon alliance, he declared, with the suspicion that it was formed for "bossing the world" would simply make enemies for the English speaking countries in the rest of the world.

"The kind of unity I would like to see between us, is a fraternal attitude toward each other—a sense of confidence in each other's determination to prevent anything in the wide world rousing us to the pitch of fratricidal conflict."

To use a common American expression it might be stated that Sir Esme has the right idea. No real American would view with anything but dismay the thought of conflict with Great Britain. Such an unforseen calamity might, it would seem, almost presage the end of our civilization. Of course we don't want war with any nation and we are willing to extend the fraternal idea to all peoples who are willing to reciprocate.

But there have been recent suggestions that an Anglo-Saxon world alliance for preserving the peace, might be an excellent thing. The British ambassador very wisely voiced some of the objections to any such scheme. We want friendship with all nations and entangling alliances with none. We have had more than a hundred years of peace with Great Britain and we will hope that it continues for additional centuries. Certainly our relations with the British Empire are vastly improved over what they were a hundred years ago.

This improvement has been brought about without any alliance. Instead of continuing it an alliance might have the opposite effect. At any rate the situation would seem to justify the old slogan of letting well enough alone. There are many reasons aside from those quoted by Sir Esme Howard against any such alliance, reasons which are valid from the American viewpoint at least. It is quite comfortable to know that so eminent a Britain appreciates the American viewpoint and adopts it as his own.

PRESS COMMENT

Beer People Do Not Drink—True to its educational purpose, the Woman's Christian Temperance Union has started a movement to put social drinking out of date because it is bad form. With its fifty-four years of experience and present membership of 600,000 virtuous mothers and home women, it maintains that drinking as a part of home entertainment is obsolete an un American. Society leaders ought to be American leaders. They ought to make the American standards of society conform to those of patriotic law observance. It should be bad form to flout the Constitution.

The best people in America do not drink. The President does not drink nor the First Lady of the land; they serve no liquor in the White House nor does society drink or serve in their presence. It is further noticeable that the best element of America, in general, not only are ob-

Anna Lebrun, a nun of the Gray nunnery in Montreal, whom Pope Pius released from her vows so that she could marry Sergt. Frank Levesque of the United States army, stationed at Fort Humphrey, Va. She had been a nun for 25 years.

Portrait of General Heye, the new commander in chief of the German army.

GENERAL HEYE

and seventy-five measures passed by the Fifty-ninth Congress, which sat during part of the Roosevelt administration, constitute the record number of bills enacted during any one session. The present congress is well on its way to breaking that record. Up to January 21, the Sixty Ninth Congress had passed 636 bills and joint resolutions. This is considerably in excess of all other competitors, however.

In all, some 50,000 acts and joint resolutions have been passed by congress since its organization. Of these about two-thirds constitute private measures, and of the 20,000 remaining a considerable number are purely local. The library believes that about 5,000 Federal laws have been enacted which at all effect the general public. Probably no one could be found who has even an academic knowledge of each of these measures. How many of them are actually necessary is a debatable question. The sentiment of the country is for fewer and better laws. In this connection the record of the present session is not an enviable one, and it is to be hoped that it will stand for some time to come.—Washington Post.

The Protean Maniac—The many-faced Momus of the Nations is Soviet Russia. So steeped in sophistry are the rulers of Moscow that they have lost all decent sense of proportion. They appear to be unable to realize that honesty and sincerity are to be numbered among national virtues. They play for recognition at the hands of fourth rate sovereignties while at the same time indulging in every form of arrogation and duplicity that may be calculated to work injury to other governments. They are ceaseless in their promulgations of insidious, sinister propaganda, denying with brazen assurance that they are employing it. Caught redhanded in India and China, they protest they are quite innocent.

The Coolidge administration has not been deceived by Moscow, tho it has been compelled to meet categorical denial that this government last summer made secret overtures to the soviet government for establishing diplomatic relations, which statement was industriously disseminated throughout the world by Moscow.—Cincinnati Enquirer.

THE THEATRE

The Kid Brother—Remember when Rattlesnake Johnny Allen, or others of his ilk, used to come to town, and you marvelled at the wonderful things his medicine did for the strong man, and the other he cured with his magic? Recall how the strong man, who daily used a bottle of this elixir of life could bend an iron bar around his neck, and crush a silver dollar with one hand?

If you do, you'll have your memory pleasantly refreshed on Saturday and Sunday when Harold Lloyd's new Paramount release arrives at the Palace theatre for a considerable portion of "The Kid Brother" is devoted to an old fashioned medicine show, with its dancing girl, strong man, etc. If you've never seen one of these performances, or never fallen for the colored water and alcohol these artists of the realm hand used to dispense, you still have a treat in store, for this faction is one of the funniest, it is claimed, ever appearing in a Harold Lloyd comedy.

Surely it should be, for never have Lloyd and his troupe put in more trying hours developing any single episode of a comedy. For more than two weeks they worked from early until dawn, through the damp hours of the night at the Lasko Ranch in Dark Canyon, only to be at the studio early the next day to look over the results of their accomplishments. It was trying, tedious work, but the results are more than worth the efforts, for they bring to the screen such a medicine show as used to be common 20 years ago.

Mantrap—Percy Marmont has always wanted to go canoeing in the Canadian woods. Marmont is English, and ever since having been in America, he has heard of the glories of summer camping. But he has never managed to do it. "The first autumn I planned to go," says Marmont, "I was suddenly in the position of finding my vacation cancelled.

"Then late one February, my boss told me I was at last going to realize my ambition—he was sending me to the Canadian woods. But it was for a snow picture! Everything was white and the thermometer stood at about fifteen below while I was there. The next summer I didn't get a vacation."

At last, however, Marmont has gone canoeing. He is featured in "Mantrap," the picturization by Director Victor Fleming of Sinclair Lewis' latest novel, which comes to the Palace theatre on Wednesday.

The location where "Mantrap" was actually taken was at Little Bear Lake in the San Bernardino mountains, a lake-and-woods country, teeming with rivulets and fish. And Marmont's role made him spend most of his time in a canoe. In fact, even when not acting, he was generally to be seen on the water.

Sight of Animals

The biological survey says that the crystalline lens varies somewhat in the eyes of different mammals. Magnification of the object may sometimes result, but it is impossible to tell the comparative impression on the retina and the optic nerve. Should man appear three times his normal size to animals, all other objects would also be magnified three times.

Unique American Woman

I have made the admission more than once that of all the women in the world the women of American always appeal most strongly to my attention. I have, I believe, for many years valued myself upon the ability to get into the minds of my countrymen the idea that the American woman is a unique specimen of the sex, standing in temperament, in conditions, in outlook, apart from her sister in other nations.—T. P. O'Connor.

New Palace Theatre
ATTRACTIONS FOR THE WEEK

Saturday-Sunday, Mar. 26-27

Harold Lloyd in "The Kid Brother." The big comedy of 1927. Comedy gems from this comedy genius have become a habit. "Safety Last, Grandma's Boy, The Freshman, For Heaven's Sake,"—all done in true roadshow fashion. And now with "The Kid Brother" Lloyd leads the laughter for 1927. Lloyd, more so than any other screen comedian, gives you a real run for your money. Every picture tried and proved by pre-view audiences, absolutely insuring your evenings entertainment. "Make them funny, but keep them human," is Lloyd's motto. And here's one reminiscent in theme, wholesomeness and heart appeal, of Grandma's boy, with twice the laughs. Oh, mummy, how "It's Kid Brother" does cut up. Also a comedy, "Midnight Follies."
Prices: Adults 40c, children 20c.

Wednesday Only, Mar. 30

"Mantrap," with Ernest Torrence, Clara Bow, Percy Marmont. A drama of the Northland; of two men, and a girl who vamps wise and foolish alike and then hurls them at each other's throats. Unforgetable. Also Felix the Cat and Fox News.
Coming—"Cohen's and Kelly's."

Concerning New School Building

The Charlevoix Board of Education called a mass meeting last Friday evening and presented to those present the question of remodeling the matter of constructing a new school building under the unit system, the construction to include a grade school and gymnasium. After the program was generally presented by H. A. Craig and other members of the School Board and Citizens' Committee, a general discussion was entered into by a great many of citizens present.

Mr. Holmes, of the Warren Holmes, Powers Company, of Lansing, was present at the meeting to inform the people of the methods used in school construction and school furnishings.

It was the desire of the School Board and the Citizens' Committee to lay before the people their proposition without reservation and the vote taken near the close of the meeting showed conclusively that the matter was at this time acceptable to the great majority of those present.

The proposition as presented was a bond issue of $125,000 to be paid serially over a period of fifteen years, and it appears quite probable that this issue can be carried out without a raise over the 1926 taxes. That is, it is the opinion of the Board and Committee that the surplus will be sufficient to pay the said bond issue of $125,000 will construct and maintain the new unit as well as to meet the ordinary cost of repairing the High School and Central building.

The gymnasium, which is included in this program, will be 60x122 feet over all, giving us a stage with a depth of twenty feet at the west end and ticket office and entrance lobby at the east end of 12 feet. The inside measurement of the gymnasium will be 60x90 feet which will seat approximately twelve hundred people for basket ball play and eighteen hundred for conventions. The stage will be utilized for games by constructing bleachers and a three row balcony all around.

The program as outlined contemplates the use of the new grade unit as a consolidated school. We feel that this consolidation together with the saving of monies now being paid out for the present gym will aid us materially in the maintenance of the new unit.

Many residents of both the north and south sides have expressed themselves as being in favor of the consolidation because of the advantages the new grade unit will have over the ward schools, such as each teacher having a single grade to teach, modern equipment, heating and ventulating as well as improved sanitary conditions. Access to the new gym for gymnastics, dramatics and physical training will also be a feature.

The committe have received opinions and have heard discussions in favor of a larger gymnasium than has been recommended by the Board and Committee, but the matter will be submitted as presented by the Board and Committee at the meeting last Friday night, and as outlined in this article, believing that the program as recommended provides sufficient room for every school need as well as practically every civic need that may arise.

The new grade unit will include 12 grade rooms and a kindergarten. This unit will represent every modern idea of education used in primary schools such as proper lighting, heating and ventilation. The class rooms will be large and well equipped with modern school furniture such as display cabinets, well ventilated cloak rooms, lavitin boards, recessed book cases and supply cabinets.

The kindergarten room will be extra large and warm for floor games and will be so constructed as to represent a large home living room with fire place, window seats and special play and study equipment. Separate toilets adjacent to the room will be provided for these little tots.

The School Board will present this problem to the taxpayers as soon as necessary legal steps can be taken; the date to be early in April.

The construction program has been discussed and thoroughly investigated by the School Board and Citizens' Committee and believe that it represents the best interests of the entire district. Charlevoix's need of a new fireproof school building—Member Citizens Committee.

That Experience Social

The Methodist Ladies Aid have unusual success with a novel money raising and social venture. For some time the Methodist ladies have been getting ready for an "Experience Social." The following lines, written and read at the social as one of the stunts tells in part the story of the preparations for the event:

We had to earn a dollar in some unusual way.
And how to go about it, not one of us could say.
To go down in our pocket and bring up a dollar bill
Would be an easy job, but take no special skill.
So we racked and searched our brains for something we could do,
To get that dollar in from a source entirely new.
At last a lady shouted to a most astonished group,
I'll start right out for my coin by selling vegetable soup.
They all looked up surprised as she set forth her plans
But some took up the cry with the din of pots and pans,
"I'll tell you what to do" said one—somebody's mother—
Well bake a lot of goodies, you'll see we'll make one dollar.
And sure enough one Saturday morn', in Henry Jacobs' store,
The cookies, bread and pies created a furor.
The soup boiled, bubbled and steamed, and sold while getting hotter,
"You bet they can't beat me when it comes to minting a dollar."
The baked goods laughed for joy as the money came rolling in,
For they felt better by far than when under a rolling pin.
The ladies showed the path glee as someone answered the phone,
"Give me a dozen cookies in a sack and send them right out home."
So "nip and tuck" they worked and vied one with the other,
In "commissioned" efforts to help the ladies earn their dollar.
You see it's not what you do so much as it's how it's done,
For the dollar came from the soup, as well as the cake and buns.
The social was held in the M.B. Hooker home on Antrim-st, and was largely attended. A brief address was also given by the pastor, on "Service", a business meeting was followed by the fun of the "Experience" and a fine supper was served the public. More than seventy dollars was realized from the event.

"Hump" of European Origin

Records show that hump railroad yards were maintained at Speldorf, Germany, in 1876, and also on the Paris, Lyon and Mediterranean in 1880. The first summit yard in America, so far as can be learned, was constructed by the Pennsylvania railroad in 1882 at Hoffs station, two miles south of Greensburg, Va.

Telephone on Organ

The organ of the Liverpool (England) cathedral is equipped with a complete telephone system. The instrument is so vast that, when the tuners are at work, 15 telephones are required in order that those engaged on outlying parts of the organ may communicate with the man manipulating the keyboard.

Carved Out by the Sea

The Dollar, an arm of the North sea at the mouth of the Ems, was formed by inundation in 1277 and subsequent dates. It lies between the provinces of Hanover, Germany, and that of Groningen, Holland.

Order for Publication—Determination of Heirs

STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the City of Charlevoix in said county, on the 23rd day of March, A. D. 1927

Present: Honorable Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of Sarah A. Williams, deceased.

Wilcox Loan & Investment Corporation of Delaware, having filed in said court a petition praying that said court adjudicate and determine who were at the time of her death the legal heirs of said deceased and entitled to inherit the real estate of which said deceased died seized.

It is Ordered, That the 8th day of April, A.D. 1927, at ten o'clock in the forenoon, at said probate office, be and is hereby appointed for hearing said petition;

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, once each week for three successive weeks previous to said day of hearing, in the Charlevoix Sentinel a newspaper printed and circulated in said county.
SERVETUS A. CORRELL,
48-3t Judge of Probate.

—) PERSONALS (—

The Busy Bees will meet with Mrs. Raymond Nowland Friday afternoon.

Dr. J. Leahy, the optometrist will be at the Hotel Charlevoix Monday, April 4th.

The next regular meeting of Pythian Sisters is scheduled for Monday evening, March 28th.

L. C. Hannah, for some days confined to the house with a severe cold, is again at his place of business.

Mr. and Mrs. Murray Plumm were called to Elk Rapids Tuesday on account of the death of Mrs. Plumm's aunt.

Charles Hyrne and family are once more residents on Park-av., occupying one of the cottages near the Hotel Hartlett.

Rev. C. E. Pollock spoke at the public schools, to the seventh grade, Wednesday morning, on "Springtime and Youthtime."

Frank Poole and Leo Powers, for some months paste visitors in Florida, and other southern states, returned to Charlevoix last Tuesday.

Mr. and Mrs. R. W. Paddock came in from their farm a few days ago and will occupy their home, 308 Dixon-av, for the next few weeks.

The Min-Eva lunch room has been greatly improved in appearance during the past few days and looks "spick and span" in its newly decorated condition.

Mr. and Mrs. James B. Parsons are again at their home, 206 Belvedere-av, after the enjoyment of several weeks spent in Detroit and other southern points.

Mrs. Irving Leventon, with a couple of friends, motored to Chicago last Saturday where they will spend a few days with friends before making the return trip.

Captain and Mrs. M. J. Bonner, who spent the winter months in Grand Rapids, returned to Charlevoix last Tuesday and are again at home in their Michigan-ave. residence.

Mrs. Leolard Van Mate, of Grand Rapids, has for some days past been a guest of her aunt Mrs. Anna Partridge. Mrs. Van Mate returns to Grand Rapids some time this week.

An association meeting will be held at the council rooms on Friday evening, March 25th, at eight o'clock and it is urged that members of the Commercial organization be present.

Captains Harold and Ulysses McCann entered this port with their ship, the Sea Hawk, from Manitowoc last Friday and soon thereafter were out on Lake Miching placing nets for spring fishing.

Messrs. George and Harold Herrick, of Muskegon, were week-end guests of Mrs. Viola Ward. They made the round trip by automobile, arriving here Saturday and returning to Muskegon Monday.

The members of the W. C. T. U. will meet at the M. E. church next Tuesday at 6:30 p.m. for a potluck fellowship supper with inspirational program following. Dr. B. G. Matteon will be the speaker.

Frank A. Kenyon, of Mackinac Island, spent Monday evening with Charlevoix friends, leaving for Lansing Tuesday on business connected with his duties as superintendent of Mackinac Island State Park.

Captain John Keen, accompanied by Henry Isaacson and Alfred Ward, left for Newport last Monday for the purpose of outfitting a new steamship, a recent purchase from the government by Captain Keen.

Mr. and Mrs. Robert R. Bonthron were visitors in Traverse City last Thursday, making the trip by motor and finding the highways in one or two localities in bad condition and difficult for some machines to negotiate.

Maple sugar making season is on with a few persons in this region manufacturing both sugar and syrup in moderate quantities but splendid in quality. The season from present indications will be of short duration for making this class of sweets.

Outfitting of the Str. Marquis Roen is now under way at her winter quarters in the Charlevoix harbor. The Marquis Roen will go out under command of Captain Arthur LaBlanc for the 1927 season as soon as navigation opens up.

Raking up leaves and a line of general work on lawns and residence grounds is being carried on throughout the city generally at present with general and thorough cleanup going on, preparatory work that will add to the attractiveness of homes and the entire city.

Work of overhauling, outfitting and painting of the steamship J. B. Ober preparatory for entering the season of navigation in her usual carrying capacity is well under way and a few more days will find the ship in readiness for her season's work on the great lakes.

A musical program will be given by members of the Dickens Club Monday, March 28th, at 2:30 p. m. in the Congregational church to which the public is extended an invitation. This entertainment will be of interest to lovers of music and no doubt will be liberally patronized.

Quality in what we recommend. You will find this in Heath & Milligan's paints. The best since 1851. STALEY BROTHERS. 48-tf

Co-eds at Western State Normal at Kalamazoo are playing an interclass volley ball series for the campus championship under supervision of the women's physical education faculty. Among the students taking part are Misses Margaret Fitch and Joyce Mayne of Charlevoix.

Captain Joseph Smith was the first of our local commercial fishermen to commence fishing operations for the season in Lake Michigan waters, and in this he established a new record in this region for net fishermen by planting his nets Thursday, Mar. 17th, the earliest date in local history for operations of this character.

A letter from Mr. and Mrs. Frank M. Glassford recently received here, states he is soon leaving Florida, where his family spent the winter, for the north and that he expects to arrive in Charlevoix about the 20th of April. The trip north is being made by automobile, with several points of interest to be visited during the homeward trip.

The first mail of the season over the regular water route between Charlevoix and St. James was delivered last Friday, the tug Venus, Captain John McCann. Following the delivery of the mail at St. James Captain McCann proceeded to the fishing grounds in the region of the straits, returning to Charlevoix Sunday afternoon, bringing with him several passengers from Beaver Island.

The banquet served by the ladies of St. Mary's church last Thursday night, March 17th, at the Hotel Charlevoix, proved to be a most pleasant satisfactory and profitable enterprise. Nearly two hundred persons attended the banquet and through the efforts of those in charge the church fund netted a tidy sum for which the church ladies express their appreciation.

Automobile dealers of Charlevoix and Emmet counties held a good fellowship and general get-together meeting at the Hotel Charlevoix last night with twenty dealers in attendance. The business topic of interest to dealers was largely along the line of turn-ins of second-hand cars as part purchase price on new jobs, a matter of financial concern as most dealers in the past have taken heavy loses on their second-hand car dealings. A banquet was served by the hotel management which was an added feature enjoyed by visitors and local men. Wednesday evening, March 30th, the dealers will hold a like meeting at the Cushman House, Petoskey.

CONSTANTINOPLE MAY CHANGE NAME

City by the Bosporus Known by Many Titles.

Washington.—The suggestion has been made in Turkey that Constantinople be renamed for Kemal Pasha, president of the republic.

Constantinople has had many names in its long history. Kemal Pasha, however, is not the first to have his name given to a city. Alexandria, Egypt, was named after Alexander the Great, and Seleucia, Syria, after Seleucus Nicator, one of his generals.

Constantinople has had many names at various times, says a bulletin of the National Geographic society from its Washington headquarters.

"Not for 600 years has Constantinople been Constantinople to the Turks. It is Stamboul to them. Some geographical title experts hold that Stamboul has been abbreviated by the Turks from Constantinople just as they abbreviated Thessalonica (Salonica) to Selanik. There are two other contentions. One is that Stamboul is a corruption of a phrase which the Turkish invaders heard the Greeks say, 'ces teen poleen,' literally 'to the city.' Another supposition is that 'Islum,' meaning 'true believing,' and 'bul,' meaning 'copious,' have been put together by the Turks into Stamboul, 'abounding in the true Moslem faith.'

"Emperor Constantine, for whom Constantinople is named, did not himself give it that name. On May 11, 330 A. D., Constantine called together a mass meeting in the newly completed hippodrome. It was a ceremony of rejoicing. A new city had been built, destined to succeed Rome as capital of the Roman empire for 11 centuries. At the high point of the hippodrome pageant Constantine dedicated the city to Christianity and named it Nova Roma.

"It was the Greeks who called it Constantinoupolis and finally it became Constantinople. The patriarch of the Greek church still signs his title 'Bishop of Constantinople, New Rome, but Nova Roma was forgotten. So was the original name, Byzantium for King Byzas, a local ruler, who first built a town on the Golden Horn peninsula.

"Turks have had other affectionate names for Constantinople just as Americans call New York, Father Knickerbocker. Sometimes the Turks call it Oumsoundjuk, 'the Mother of the World,' and sometimes Islambol, 'the City of Islam.' Another name is Der el Saadet, 'the City of Felicity.' Arabs call it by a name which is significant, El Farruch, 'the Earth Dividers.'"

Few Actresses Rich

Although many actresses make huge salaries during their careers, most of them do not have the necessary foresight to lay any of it away for the inevitable "rainy day," points out Billie Burke, the well-known former actress. In an interview with Miss Burke in Liberty Sidney Sutherland reports her as saying:

"Many actresses have made enormous sums and died penniless. They play the stock market," she explains, "usually on a tip whispered by some friend in Wall street; they invest foolishly in real estate; they purchase wildcat stocks in mines and oil fields; they spend huge sums on jewels and clothing and travel. And some have a boy friend. This last investment is a costly one—and you can't go to a bank and borrow very much on great memories, which are about all this investment brings."

ANCIENT TOMB NEAR ALGIERS AWES ARABS

Antedates Christianity by at Least Two Centuries.

Paris.—A mysterious tomb, regarded with awe by the lowly Arabs of the region, stands on the crest of a lofty hill, about fifty miles from Algiers. It is known as Le Tombeau de la Chretienne, the tomb of the Christian woman, although French scholars regard it, without proof, as a Punic structure antedating the Christian era by at least two centuries.

So little is actually known of this mausoleum that small wonder is occasioned by the fantastic legend handed down about it in truly Oriental style throughout the countryside. The Arabs themselves call it Khaur Er-Roumia, which means European or Christian tomb, the use of the plural suggesting that they regarded it as a multiple tomb. Even their legend throws little light on the origin of the strange edifice.

The mystery that hangs about it is deepened by current Arab legends, which imply the fixed belief that unreclaimed treasure lies buried in its side.

At the top of the hill which rises a thousand feet above the Mediterranean, this extraordinary relic of antiquity forms itself an unlikely sky line. The structure is a circular mass of dressed stone, at least 200 feet in diameter.

Sculptured Columns.

Sixty engaged columns, sculptured in relief and resembling the Ionic in style, decorate the lower circumference of the tumulus, a drum-like edifice, originally surmounted by a lofty cone of rock. At the four cardinal points of the compass huge false portals are sculptured. A design on each of these, resembling a great cross, is responsible for the present French name of the ruin.

In an effort to discover the treasure two small tunnels were long ago dug through the center. On rising near the summit is a considerable depression made by Hadj Mohammed Ben Othman, pasha of Algeria, in 1779, when he used cannon to demolish the tomb. The French government has now put a stop to the work of treasure hunters and other vandals, and some years ago restored one of the original facades.

Entrance is possible through a low and very narrow passage which earlier excavations revealed in the substructure beneath one of the false portals that facing the east. This entrance leads to a fairly spacious central chamber whose solid stone mansoleum walls had apparently never borne decorations. But the eight small niches, each a small relief sculptures of a lion and lioness.

Directly underneath these basrelief another short, constricted passage, which has to be traversed on hands and knees, leads to seven ascending steps and then into a spacious and beautifully vaulted gallery built of large blocks of neatly dressed stone. The gallery, spiral in form, is more than 400 feet long. At the end a third passage leads first into a small chamber and then into a larger one. This was supposed until recently to be the exact center of the monument, but it is now known that it is somewhat off center, whether through accident or design has not been determined.

Place for Cinerary Urns.

The purpose of the chambers is also in doubt. Nothing has been found in them or in the spiral gallery. It may be supposed that the first was a vestibule to the second, in which their niches are sunk in the bare walls. It is a further guess that the niches were intended to hold cinerary urns. It is possible that these supposed mortuary chambers are blinds, like the four portals, and that the real vaults are deep in the foundations, approached by vertical shafts with horizontal passages at the bottom.

This manner of entombing the dead filling up and disguising the shafts after each interment, corresponds with the Phoenician and Punic practices of antiquity. If this supposition be true the built tomb guards a secret, and the local Arabic tradition of the multiple tomb is not without meaning.

The builder, whoever he may have been, chose well the site of his last resting place. To the north, a thousand feet below, stretches the waters of the Mediterranean; to the south, long green slopes reach into the fruitful valley of the Mitidja. Along the southern horizon the cedar bearing Atlas mountains rear their purple wall, from which clear streams descend to make the valley prosperous.

Find Tree Stump in Process of Petrification

Bethany, Mo.—Workmen with a railroad construction crew from St. Joseph, working on the Burlington railroad right of way near this city, unearthed a red oak stump in the process of petrification. The stump, which measured about two and one-half feet through, is believed to have been buried in the for distant fifty years, or ever since the railroad was built. Its removal required four days. It showed no signs of decay and was so tough it could not be split with an ax.

World's Richest Girl

Somerville, N. J.—Fifteen-year-old Doris Duke, probably the richest girl of her age in the world, is worth $25,451,673. It is shown in an accounting of the estate of her father, James Buchanan Duke, tobacco magnate.

Potato Seed Not Used

Both the Irish and the sweet potato produce true seeds, but in neither case are they used for propagation. The sweet potato plant produces seed only in very warm climates while the Irish potato produces seed only in cool climates.

Quality is what we recommend. You will find this in Heath & Milligan's paints. The best since 1851. STALEY BROTHERS. 48 tf

CHURCHES

Congregational Church
Rev. R.G. Mattson, D.D., Minister

Sermon topic for morning, "Christ's Mastery of Man."

Sunday School at noon. The attendance steadily advances and the interest is very encouraging.

The young peoples' church service will be led by Mabel Turpin and the theme will be "The Spirit, of Youth as a Messenger of the Kingdom." Interesting accounts will be given of new successful ways in which youth is today carrying out the spirit of the early disciples of Jesus. Older people as well as young people attend this service and find it inspiring.

Services at Ironton church 2:30 p. m.

Methodist Church.
C. E. Pollock, Pastor.

Rev. J. C. Randall D. D., District Superintendent, will preach next Sunday morning at 10:30. Dr. Randall is a finely cultured christian gentleman and has a message for the people who are interested in modern church enterprises and problems.

Another wonderful evening is planned for next Sunday at 7 o'clock. Still pictures, music, sermon and illustration something entirely different—will make the evening worshipful and profitable. "Happy Sunday Evening" is a good phrase for these bright cheer hours of spiritual uplift.

The Epworth League meeting at six each Sunday evening are proving very popular. A large number attended and profit by the interchange of ideas. A good fellowship hour is planned for next Sunday at six p. m.

The men are planning two more great Monday evenings before the spring vacation. Next Monday evening the supper will be at six thirty. A very good speaker is provided. Last Monday evening Mr. A. L. Fitch gave a very forceful and instructive address on "Officer's Problems." Things that the ordinary citizen seldom if ever thinks about were presented, and instructive to those who listened to them.

Young peoples' prayer meeting each Tuesday evening. Some practical matters are discussed by the pastor at each of these meetings. The hour is seven and the time one half hour.

Thursday evenings at seven thirty the regular prayer meeting is open to all who desire to attend. These are profitable hours.

A Word With the Old Folks

Elderly People Are Learning Importance of Good Elimination.

IN the later years of life there is apt to be a slowing up of the bodily functions. Good elimination, however, is just as essential to the old as to the young. Many old folks have learned the value of *Doan's Pills* when a stimulant diuretic to the kidneys is required. Roomy or burning passages of kidney secretions are often signs of improper kidney function. In most every community are scores of users and endorsers who acclaim the merit of *Doan's. Ask your neighbor!*

DOAN'S PILLS 60c
Stimulant Diuretic to the Kidneys
Foster-Milburn Co., Mfg. Chemists, Buffalo, N.Y.

Special Offer to Victims of Indigestion

Your Druggist Says Pleasant to Take. Elixir Must Help Poor Distressed Stomach or Money Gladly Refunded.

You can be so distressed with gas and fullness from poor digestion or dyspepsia that you think your heart is going to stop beating.

Your stomach may be so distended that your breathing is short and gasply.

You are dizzy and pray for quick relief—what's to be done.

Just one tablespoonful of Dare's Mentha Pepsin and speedily the gas disappears, the pressure on the heart ceases and you can breathe deep and naturally.

Oh! What blessed relief; but why not get rid of such attacks altogether? Why have them at all?

Especially when any druggist anywhere guarantees Dare's Mentha Pepsin, a pleasant elixir, to help you or money back.

Taffeta Hats in High Colors; Smart Spring Travel Coats

NEVER a fabric more beloved by those who worship the beautiful, than taffeta. When it falls under the magic of the milliner's touch, then indeed does it convey a message of enchantment.

The "just-arrived-from-Paris" taffeta hats not only radiate springtime colorings, but they are works of art in point of needlecraft and design. Thereby milliners in their color blends and contrasts, as they so eloquently interpret that favorite theme of the mode—"compose."

Every hat in this group is superbly colorful, showing an interworking of taffeta together with lavish embellishment which runs a gamut of a more elaborate styling than we have known for seasons past.

A bit of fine straw for the brim of the first hat helps emphasize the flavorful tint swing is here. A galaxy of flower colorings is represented in the roundcrown moiré which busk the front of the lilac-hued taffeta crown.

Like children dancing around a Maypole, circlets of fine straw in most every tint of the rainbow frolic about the soft silken crown of the novel toque in the upper right corner. The taffeta for this hat gives the effect of mother-of-pearl in its shimmering nacre coloring.

The hat in the center is of sterling blue, taffeta, plaited exceedingly fine. The flat-flower ornament at the side is made of straw, as is the band; also the wee ripple brim.

Worked over the taffeta like a gorgeous carpet of flowers or a rich brocade is diminutive straw in exotic colors, for the hat to the lower left. The flat-flower ornament at the side is made of straw, as is the band; also the wee ripple brim.

Worked over the taffeta like a gorgeous carpet of flowers or a rich brocade is diminutive straw in exotic colors, for the hat to the lower left.

Group of Taffeta Hats.

Style interest for sports coats centers around pockets and belts. Artful adjustments often combine the working of the belt with the pocket in that the narrow belt slips through one of the pocket, or otherwise is buttoned somewhere in connection with it. Pockets appear in many sorts, some huge patch pockets, round or square, others fine and modest shaped ones with insets of contrasting material.

All-around narrow belts are fashionable as are also those which come from the sides.

The straight-line silhouette remains a favorite for the sports coat, depending on unusual pockets and belts for individuality. Raglan sleeves are very successful this season for the novelty suiting coat. Quite a few of the bright plaid coats are reversible. Some extremely attractive blanket coats which are made out of fringed squares or shawls have found their way among motor coats and the like.

There is a class of coats of undoubted appeal, and having the sports feeling, which are made of kasha and other lightweight woolens such as repps and twills. These depend upon unique and intricate seamlines, tucks arranged usually in tiers and of graduated sizes, yokes and other detailing details, together with flat fur decorative trimmings, such as cuff, pony and leopard.

JULIA BOTTOMLEY.

(©, 1927, Western Newspaper Union.)

Loose Woolen Weave for Travel Wear.

Satin Hats

To wear with fur and fur-trimmed coats are small hats of black satin. Sometimes they are trimmed with touches of black velvet but quite as often stitching and quilting is an effective decoration.

High Hats

Hats are high both in price and crown. In headgear, as in other parts of the wardrobe, the Russian and Oriental embroidered designs are coming rapidly to the front. These are of the all-over type, rather heavy and so gaudy as to coloring as to be rather trying for some complexions. However, they have a richness of appearance which has been lacking up till now in millinery lines.

High Hats

It matters not what color or material your hat, it must have a crease or an ornament that will lend height to the crown.

THE WORLD'S GREAT EVENTS

ALBERT PAYSON TERHUNE

(©, by Frank Scott & Company.)

The French Revolution

"THE people are in revolt!" asked the amazed King Louis XVI. And Count Mirabeau, wiser than his royal master, replied:

"Sire, this is no revolt. It is a revolution."

After the fall of the Bastile the nation had awaited further developments. Politicians wrangled, finances became more and more entangled, Queen Marie Antoinette continued to meddle with affairs of state which she did not understand, famine and misery stalked abroad, and the news of the Bastille's destruction spread through France, everywhere stirring up the masses to courage and fury.

At the juncture the king, advised by his wife, made one of his costly blunders. Although his people were starving, and although more than ever before he needed the loyalty of his native soldiers, he gave a great and expensive banquet at Versailles to his foreign troops.

This was the last straw. The National Guard, led by Lafayette and preceded by a mighty mob of angry women, marched from Paris to Versailles on October 5, 1789, attacked the Versailles palace and dragged the king and his wife and son back to Paris with them. Again a wrangle of politicians. Louis lost a chance to save his throne if he would consent to become a constitutional monarch, but Marie Antoinette and the advisers with which she surrounded him would not hear of such a thing. So the foolish king, by once more yielding to his wife's demands, hastened on to the doom that awaited him and his.

National Guard regiments were formed all over the country in the name of the people. In the rural districts bands of peasants strolled and scores against the masters who had oppressed them by butchering whole families of aristocrats and burning and looting their castles. Noblemen, from royalty down, began fleeing from France by the hundreds, in fear for their lives.

Meantime, in Paris a body known as the assembly drew up a "Declaration of the Rights of Man," based partly on our own Declaration of Independence. Its keynote was "equality." It proclaimed the freedom of all men, the sovereignty of the nation, religious tolerance, fair love and the abolition of aristocracy and privilege. To this declaration Louis would not subscribe. Marie Antoinette regarded its clauses as insane. Louis secretly appealed to his fellow-sovereigns of Europe, and a foreign alliance was formed to invade France and reinstate the king. The royal family sought to escape over the frontier on June 20, 1791, but were caught and brought back. After this Louis consented to swear to the Constitution, and was reinstated, but he continued to plot with foreign powers.

The allies marched against France, and famine again swept the land. This double provocation maddened the people, and they took matters in their own hands. A mob sacked the Tuileries (the king's residence in Paris), massacred the Swiss guard, who sought to defend their master, and imprisoned the royal family. Louis was suspended from office and in November, 1792, was brought to trial. By a vote of 387 to 334 he was condemned to death. All titles had been abolished, so under the name of "Citizen Louis Capet" the unfortunate monarch was beheaded January 21, 1793. In the same year the Reign of Terror set in. Aristocrats were guillotined by scores and hundreds. Marie Antoinette was beheaded, and in turn secretly put to death in prison.

While the allies were preparing to invade France, civil war, accompanied by massacres and other atrocities, broke out and weakened the already demoralized country. Another drawback to military success was that heretofore all officers of the French army had been noblemen. These had fled or been beheaded, leaving the army officerless. The regulation officers were men promoted from the ranks solely for merit. When they proved incompetent their soldiers refused to obey them, and often even shot them. Realizing that France's welfare and very existence in this crisis depended on her soldiers, the republic granted the army all sorts of privileges and made it an object of adoration.

The newly reorganized French army, in the Revolution, turned on its allied foes and in battle after battle whipped the best disciplined troops of Europe, finally uplifting the alliance against France.

Marat, Danton and Robespierre were the three prime movers in the Reign of Terror. Each of the trio used the other two for his own ends, and each sought to be dictator of the stricken country. Marat, merciless and hateful, was murdered by Charlotte Corday, whose lover he had executed. Danton, kindest and most human of the three, was routed by Robespierre and beheaded. Robespierre—dandy, bloodless, incorruptible, deadly and yet visionary—became practically dictator of France. But in 1794 he in turn was deposed and guillotined.

And now, amid the chaos, confusion of wild schemes and conflicting experiments in self-government, arose a man. Perhaps the greatest the world has ever seen.

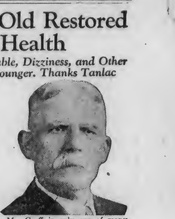
Napoleon Bonaparte.

When Pins Were Scarce

The expression "pin money" originally came from the allowance which a husband gave his wife to purchase pins. At one time pins were so expensive that only the wealthy could afford them. The manufacturers of pins were permitted to sell them only on January 1 and 2 of each year, and when those days came around the women whose husbands could afford it secured the much-desired pin money from them and went out and got their pins.

Man 77 Years Old Restored to Good Health

Recovers From Stomach Trouble, Dizziness, and Other Ailments. Feels 30 Years Younger. Thanks Tanlac



If good health seems slipping from you; if indigestion, nervousness, and ailments caused by a run-down condition torture you, benefit from the remarkable experience of J. A. Groff, retired restaurant owner of East Dubuque, Ill., who suffered for many years only to regain health and strength!

Sitting in his comfortable home Mr. Groff recently said: "My condition was unbearable. Nervousness caused splitting headaches and made sleep impossible. I was always tired and worn-out. My hands shook like a leaf. I had no appetite for food. And when I ate I suffered from indigestion.

"I sought relief, trying this and that without success. Then Tanlac came to the rescue. It has made me feel 30 years younger.

"I am feeling stronger and healthier. I eat everything without a thought of pain. Tanlac drove away dizziness caused by constipation, calmed my nerves. This great tonic has the first bottle of Tanlac shows amazing results. Ask your druggist for Tanlac—today!

Artists' Ways

Cornelius Vanderbilt, Jr.—the Vanderbilt of tabloid newspaper fame—told a story at an artists' dinner in New York.

"Artists nearly always despise and hate one another," he began. "They simply would one another cruelly enough.

"An impressionist called one day on a cubist whose little son had just died. Laughing in the face of the grief-stricken parent, the impressionist lit a cigarette and said:

"'Ha, ha, Dauber, another of your works skied, what?'"

If Back Hurts Begin on Salts

Flush Your Kidneys Occasionally by Drinking Quarts of Good Water

No man or woman can make a mistake by flushing the kidneys occasionally, says a well-known authority. Too much rich food creates acids which clog the kidney pores so that they sluggishly filter or strain only part of the waste and poisons from the blood. Then you get sick. Rheumatism, headaches, liver trouble, nervousness, constipation, dizziness, sleeplessness, bladder disorders often come from sluggish kidneys.

The moment you feel a dull ache in the kidneys or your back hurts, or if the urine is cloudy, offensive, full of sediment, irregular of passage, or attended by a scanting or scalding, begin to drink soft water in quantities; also get, about four ounces of Jad Salts from any reliable pharmacy and take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine.

This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help flush clogged kidneys and stimulate them to activity, also to help neutralize the acids in the system so they no longer cause irritation, thus often relieving bladder disorders.

Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink which everyone can take now and then to help keep the kidneys clean and the blood pure, thereby often preventing serious kidney complications.

Few Long-Horns Left

There are still a few long-horned cattle to be found in Texas. It has just been announced, however, that the United States forest service will undertake a herd of these picturesque examples of early pioneer life in the Southwest on the Wichita National forest in Oklahoma. They will be grazed in a pasture adjoining the one occupied by the herd of buffalo already established in the forest.

Why Suffer Pain

from a cut or burn? Cole's Carbolsalve stops pain instantly and heals quickly. Without a scar. Keep it handy. All druggists, 30c and 60c, or J. W. Cole Co., Rockford, Ill.—Advertisement.

The letter "i" in the Chinese language is said to have quite 125 ways of being pronounced—and, moreover, each has a different meaning.

Age often secures for a man a respect which he may never have deserved when he was younger.

HAS SALT TO LAST FOR MILLION YEARS

Supply in Four States Insures Against Famine.

Washington.—Millions of years will elapse before the United States will suffer a shortage of salt such as that reported recently at Cuzco, Ecuador.

It is estimated that deposits of 2,000 tons of salt, which would last 2,000 persons at the present rate of consumption, are contained in a single deposit, underlying an area 650 miles long and about 200 miles wide in portions of Kansas, Oklahoma, northwestern Texas and New Mexico. This is by far the largest known deposit in the world, and has scarcely been touched except in Kansas, where an extensive industry has been developed.

The shortage at Cuzco recalls the importance of salt in ancient times. The Germans believed the presence of salt in the soil gave it a peculiarly sacred character, and for salty streams they would wage war.

Valuable in Ancient Times.

For centuries before the Christian era blocks of salt were used by districts of China bordering the ocean to pay revenue to the Chinese rulers. In China and Tibet the tribes used salt with gold as a medium of exchange.

Salt is due in some of the native tribes of Central Africa, particularly among the pygmies. Gifts of salt have made it possible for the white man to approach and study these jungle dwellers. Even the tusks of elephants pyramids kill, which are their prized possessions, are buried in the ground until they are traded for salt and tobacco.

While some salt is produced by evaporation of sea water in localities along the seaboard and in the vicinity of salt springs and lakes, most of our supply is extracted from deposits in the earth. This is done either by forcing water down boiler machine to the salt beds and evaporating the brine which is forced up said withdrawn, or by the systematic mining of the deposit.

The most famous mines are the Wieliczka mines in Galacia. They virtually constitute an underground city, with their 65 miles of galleries, traversed by more than 30 miles of railroads, and their monuments, houses, churches, restaurants and railroad stations, all carved out of solid rock.

Even the massive, artistically patterned candeliers in numerous chapels and ballrooms are salt. There are subterranean rivers and lakes. One of the 16 lakes is navigable and a boat is provided which visitors may hire.

The mines have been in operation since the Thirteenth century and a depth of 1,200 feet has been reached. They justify their classification among the lesser wonders of the world.

Of more than 7,000,000 tons of salt produced annually in the United States, Michigan, New York, Ohio, Kansas, and Louisiana rank foremost. Michigan is slightly in the lead, with New York close on her heels. All of these states have deposits which show no indication of exhaustion.

New York's Supply Large.

The New York deposit alone will supply the demand of this country for thousands of years, although extensive operations have been carried on for a century. The deposit underlies an area of 2,000 square miles in the central part of the state and is from 3 to 330 feet thick.

Although salt is used principally for cooking and seasoning, it plays an important part in the great world industries. Large quantities are consumed in meat packing; in curing; dairying, baking, refrigeration; pottery glazing; in the enamel and pipe works, in the silk and textile industries, in salting cattle, curing and tanning hides, making pickles, and in many other industries. In the form of brine it is used in all chemicals containing a sodium base.

Every living thing would perish without salt, and a quantity is necessary for good health. Every tissue of the body has a small content of iodine, which may be supplied or renewed by the consumption of salt.

Before the invention of the cook pot and the establishment of the kitchen our primitive ancestors ate raw meat in which was ample salt. The animals consumed salt, and their instinct directed them to salt water areas and outcropping salt deposits. But the cooking process destroyed a large percentage of the salt in meat and it became necessary for human consumers to make up the deficiency. Thus the salt shaker found its way to the dining table.

Thousands of Rats Invade California Rice Farms

Sacramento, Calif.—Farmers of Glenn and Colusa counties are hoping that a pied piper will visit their district to exterminate thousands of rats which recently centered an issue in the rice-growing communities. Norman Buhn of the state department of agriculture is leading the drive by distributing neatly wrapped packages of poison meat. He declared the rodent invasion was most unusual and that a warehouseman at Williams had trapped 3,000 rats. Buhn reported heavy losses to poultrymen as well as to rice and grain growers.

Topsy-Turvy

San Francisco.—Pygmyland is topsy-turvy. Among the tribes in New Guinea visited by the Stirling expedition, men let their hair grow, women keep their cut short. Children stop smoking when they reach maturity.

Baby Not Baggage

Wichita, Kans.—A baby is not baggage, Judge Grover Pierpont ruled in the District court here. He signed a writ ordering Mrs. Vivian Smiley to recover her son, who had been held in default of a board bill.

LEGAL MILL SPEEDS ROUTINE MEASURES

(Continued from Page 1)

trespassers to obtain the written consent of the owner or his agent before entering any enclosed or improved land.

Meanwhile the House committee has reported favorably a bill by Rep. Brake of Fremont, while it does not go nearly as far as the Horton bill, provides as follows: "No person shall hunt with firearms, or dogs, or in any other manner, upon any farm lands or farm woodlots connected therewith without the written consent of lessee or owner of such lands or lots."

Another measure of considerable importance to Michigan fruit growers has made its appearance in the Senate. It is intended to protect growers against the unjust competition of dealers who have been selling imitation fruit juices which are artificially colored and flavored so that they might be passed off as the genuine article. The bill would require all dealers in soft drinks to be licensed by the Dept. of Agriculture which would have authority to revoke any license in case the dealer did not live up to the terms of the bill.

That Michigan must still be a wild and woolly state is indicated by two bills. The House has passed a measure to provide that farmers whose live stock and property might be damaged by bears should be reimbursed. The Senate has approved a bill which would place a bounty on wolves, coyotes and wildcats.

An earlier season for hunting deer is proposed. The season now is from Nov. 15 to 30. Under the new bill the season would be from Nov. 9 to 20.

Under the terms of a bill by Rep. Minto of Cheboygan, the State Administrative Board would be empowered to fix the salaries of three appointive state officials—Health Commissioner, Director of Conservation and Secretary of the Securities Commission.

Department of the present State Tax Dept. by a State Tax Commission is proposed. Besides changing the name, the bill would give the new commission authority to employ a secretary. Probably the real purpose of the measure is revealed in the provision that twenty days after the signing of the bill the terms of the present commissioners would expire and the Governor would appoint three new commissioners.

The Governor has signed the bill that will require the Supt. of Public Instruction to give a surety bond for $10,000 for the faithful handling and accounting of the funds in his department.

Removing Ink From Prints

Books of 25 years ago asserted that milk would take ink out of prints, but the directions would not apply today, for the reason that milk is not what it was, nor is ink. Milk contained in cities is freed from lactic bacteria, which were once depended on to perform the necessary chemical action, and today has insitipated into 150 varieties, so that no general household directions can be considered safe to remove ink from clothes. A spotter is required to determine the formula to apply to the removal of each type of ink stain, since a remedy for one might make another indelible.

Valuable Radio Beacon

A mobile radio beacon has been invented to prevent collisions at sea in foggy weather. It is described as a low-power automatic radio transmitter which sends out a characteristic signal over a short distance. It is installed in the pilot house and operates independently of the ship's wireless apparatus. In foggy weather the device is turned on. The radio signal it transmits is heard by any ship within ten miles, which, by the use of the radio compass, or direction finder, can determine the position of the approaching vessel.

Student Rides Horse 42 Miles to School Daily

Lincoln, Ark.—Riding 42 miles each day on horseback probably would have been maple mannaismic for the four famous horsemen if the journey were relayed in four equal parts. But John McDonald, of this place, rides a horse 42 miles daily without relays to attend the University High school, at Fayetteville, Ark.

McDonald mounts his steed at 4 o'clock each morning and gallops to school 21 miles away, arriving there in time for the session beginning at 8 o'clock. He is by classes until noon, when he eats his lunch and feeds his horse for Lincoln again.

The youth is carrying on an agricultural project at his home and refuses to give up his long rides by mooting to Fayetteville.

New Steamship Has All Marks of Huge Ice Box

Tacoma, Wash.—Robinson Crusoe would have lived kingly if his wrecked ship had been the Stuart-Star, a modern new refrigerator vessel. This ship has 55 compartments, each separate in itself for various perishable products. It can carry fish, frozen meats, chilled meats, fruits of all kinds, or any sort of foodstuffs requiring a fixed temperature for preservation. In sailing from here for Europe the Stuart-Star was loaded with many kinds of perishable and most products assured of safe delivery by 40 miles of refrigerator piping.

FOUNTAIN OF YOUTH NOT HARD TO FIND

Seeker Can Locate It in Any Spot Desired.

Police de Leon crossed the high seas and traveled thousands of miles in a fruitless search for the fountain of youth when he might have found it in his own back yard—so to speak. Like wealth and happiness, health is something that depends quite largely upon the little daily habits of mind and body, and these the individual carries with him even to the ends of the earth.

The doctor, be he never so skillful, has no health to give to another any more than a priest can dole out happiness or a lawyer blot out a crime. The most that a doctor can do is to prescribe and advise and then it's up to the individual to find out health for himself.

The fellow who inherits wealth has a hustle to keep it, and he has to guide his transactions by economic laws in order to protect his bank account. Physical health is tied up in the same sort of a bundle. Most everybody inherits a reasonably healthy body, but there are a lot of prodigal sons among these heirs.

Some young fellows find it pretty hard to work when their bank books show a balance of a few thousand dollars. Likewise the youth with an abundance of health fairly tempts from his body sometimes feels that his physical resources are interminable. Three or four nights out per week, a trifling cold, a mild attack of "flu," a few "social" drinks of some whisky, and the old man with a wicked scythe sends his messenger, Pestilence, to remind you that this man's health account is closed, maybe a bit overdrawn.

Lots of people who sneak an S. O. S. to the doctor are like the victims of wildest investment schemes who call in post mortem conferences with bankers. A prescription on how to keep well may seem quite commonplace and require one to avoid some of the thrills of night life, but then a real banker never advised any depositor to look for long-chance bargains on the theory that big returns are the winner, while the loser enjoys the experience of the venture.

Fifteen minutes of physical exercise, and a one-mile walk per day coupled with a moderate diet, using fruits, nuts, sweets, dairy products, fruits, vegetables, especially the green leafy ones, six or eight glasses of water per day, a bit of sunshine, eight hours' sleep, eight hours' work and eight hours' play, constitute a pretty fair idea of what the ingredients of the fountain of youth are. Ponce de Leon didn't know that, so he looked the world over for what the modern man may find within the threshold of his own doorway.

London Fog Changes; Even Taste Altered!

London.—London's fog has lost its individuality and some say its taste. Time, or something, seems to have worn the edge clear off of it.

Dickens, who so delightfully described the London mist, would be disappointed were he to see one today. He would not recognize the modern fog any more than he would the streets which David Copperfield so often trod.

The same old stream of wind about in the same old way, but many of them have been widened. This may have something to do with the changing fog, which is not so impenetrable as formerly, but the experts disagree about the vapor's transformation and its causes.

At any rate, the wilder streets are now more easily negotiated even when a fog is at its height, and the automotives are quite positive that the fog of today tastes much different to that served in the days of Victoria.

NOTICE OF ELECTION

To the Qualified Electors of the City of Charlevoix, Michigan:

Notice is hereby given that the next ensuing Biennial Spring Election and the Annual City Election will be held on Monday, April 4, A.D. 1927, at the usual polling place, in said city. At which election the following officers are to be voted, viz.:

Notice is Further Given, That Saturday, the 26th day of March, will be the last day for Registration, for said election.

CHAS. H. LAMPHIER,
By D. S. Payton, Deputy. City Clerk.

LEGAL NOTICES

MORTGAGE SALE

Default having been made in the condition of a certain mortgage executed by Michael C. Birnkrant (a single man) of Detroit, Michigan, unto Llewellyn S. See, of Warmspring, Oregon, and Charles E. See, of Charlevoix, Michigan, dated August 26th, 1925, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, October 9th, 1925, in liber sixty-three of mortgages on page one hundred and sixty-five, on which mortgage there is claimed to be due at the date of this notice, the sum of Two Thousand One Hundred Fifty and 39-100 Dollars including the principal sum due with interest, together with an attorney fee of thirty five and No-100 Dollars as provided for by the said mortgage and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas, the taxes required by the statutes to be paid on said mortgage were duly paid prior to the recording thereof.

Now Therefore, Notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by the said mortgage, at public auction, to the highest bidder therefor, at the front door of the court house in the city of Charlevoix, Charlevoix county, Michigan, (that being the place where the circuit court for the county of Charlevoix is held), on Tuesday the twenty-first day of June, 1927, at eleven o'clock in the forenoon on that date.

The premises described in said mortgage being the lands, premises and property situated in the city of Charlevoix, county of Charlevoix and State of Michigan, described as follows, to-wit: Commencing at the northeast corner of lot one in block six of the recorded plat of the village (now city) of Charlevoix, Michigan; thence south forty-two feet two and one-half inches along the east line of said lot one; thence west ninety-six feet along the party wall line of the old joining parcel of land on the south and extending to a point in the west boundary line of a public alley running north and south through lot two in said block six of the recorded plat of the village (now city) of Charlevoix, Michigan; thence north forty-two feet two and one-half inches along the west boundary line of said alley to a point in the north boundary line of the aforesaid lot two in said block six; thence east ninety-six feet along the north boundary lines of said lots one and two, subject to an easement of a public alley fourteen feet in width on the west side of said parcel of land, also subject to a party wall agreement concerning the party wall between the above parcel of land and the parcel adjoining immediately south, together with the buildings and appurtenances thereunto belonging or in anywise appertaining.

Dated March 21, 1927.

NOTICE OF MORTGAGE FORECLOSURE SALE

Whereas, default has been made in the terms and conditions of that certain real estate mortgage hereinafter described by the non-payment of the three annual installation installments of forty-eight and 75-100 ($48.75) dollars each, due December 25, 1925, June 25, 1926 and December 25, 1926, and taxes paid by the mortgagee on November 29, 1926, in the sum of one hundred sixteen an 84-100 ($116.84) dollars for the years 1923, 1924 and 1925, the entire amount claimed to be due and unpaid on said mortgage at the date hereof for said delinquent installments and taxes being Two Hundred Seventy and 75-100 ($270.76) Dollars;

Now, Therefore, Notice is hereby given that that certain mortgage made by John W. Clarke and Alice E. Clarke, his wife, mortgagors, to The Federal Land Bank of Saint Paul, a body corporate, of the City of St. Paul, State of Minnesota, mortgagee, dated June 25, 1923 and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on July 7, 1923, in Liber 62 of mortgages on page 285, will be foreclosed, and the lands and premises therein and hereinafter described, or so much thereof as may be necessary to satisfy said mortgage debt, with interest, costs and statutory attorney fee, sold at public auction, to the highest bidder, at the front door of the court house in the City of Charlevoix, Charlevoix County, State of Michigan, on Monday, March 28, 1927, at ten o'clock in the forenoon.

The mortgaged lands to be sold are described as, to-wit:

East half of the east half of the northeast quarter (E½E¼NE¼) and the east half of the southeast quarter (E½SE¼) of section eighteen (18), township thirty-three (33) north, range eight (8) west, containing One Hundred Twenty (120) acres, more or less, according to the government survey, thereof, Charlevoix County, Michigan.

Said sale is to be made subject and inferior to the unpaid principal of the said mortgage to The Federal Land Bank of Saint Paul, amounting to Fourteen Hundred Forty-Two 97-100 (51442.97) Dollars and accrued interest thereon.

THE FEDERAL LAND BANK
OF SAINT PAUL, Mortgagee.
Dated, Dec. 22, 1926. St. Paul, Minnesota.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by George Ross, an unmarried man, of Charlevoix, Michigan, unto Rudolph C. Korth, of Charlevoix, Michigan, dated the 24th day of October, 1926, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, on the 28th day of August 1925, in Liber 56 of mortgages on page 242, the description contained in said mortgage being incorrected by a mortgage executed by said George Ross to said Rudolph C. Korth, dated the 4th day of October, 1926, and recorded in the office of the Register of Deeds, of Charlevoix County, Michigan, on the 8th day of October, 1926, in Liber 63 of mortgages on page 200, on which mortgage there is claimed to be due the sum of two hundred fifty five and 73-100 ($255.73) dollars including interest computed to the date thereof, and also an attorney fee of twenty-five and 00-100 ($25.00) dollars as in said mortgage, and no suit or proceedings at law having been instituted to recover the moneys secured by said mortgage or any part thereof.

Therefore, by virtue of the power of sale contained in said mortgage and the statute in such case made and provided, notice is hereby given that on Monday, the 20th day of June, A. D. 1927, at the east front door of the Court House, in the City of Charlevoix, Charlevoix County, Michigan, that being the place where the circuit court for the County of Charlevoix is held, the premises described in said mortgage or so much thereof as may be necessary to pay the amount due on said mortgage with seven per cent interest and all legal cos ts, together with an attorney fee of twenty-five ($25.00) provided for in said mortgage, which premises are described in said mortgage as follows: Commencing at the northeast corner of the southwest quarter of the southeast quarter, Section twenty-three (23), Township thirty-four (34) North, Range eight (8) west; thence west 30 rods to a point which is the starting point; thence north 80 rods; thence west 10 rods; thence south 80 rods; thence east 10 rods to place of beginning, situate in the Township of Charlevoix, County of Charlevoix and State of Michigan.

CHARLEVOIX HARDWARE CO.

Cleaning, Painting, Brightening-Up Time Is At Hand.

All your wants are here under one roof.

Pails, Mops, Scrub-Brushes, the neatest oval mop-pail, can't up-set, with wringer that you ever saw, Sweepers, Hoovers (sale or rent), Floor Wax, (an electric floor polisher for rent)—all things for cleaning.

Paints.

We honestly believe the B. P. S. brand is the best paint to be had or we should not have changed from the line handled for years by this store.

We have B. P. S. Paints, Varnishes, Lacquers for all purposes in all the colors and shades. Call and see the possibilities and combinations.

Muresco and Alabastine and the best line of paint brushes ever brought into town. Some odds and ends of paints and enamels in small cans, enough to brighten up an old chair or table. Everybody's doing it—costs a trifle.

Floor Coverings, Armstrong and Congoleum, piece stuff and rugs and a splendid selection of Wool Rugs. A piece or two of New Furniture, New Shades at the windows and the house is like new.

The whole lay-out is here and the prices are right.

SANFORD READY TO MAKE TRIP

Captain John N. Chambers informs us that the Charlevoix-St. James Transit Company have for some days past been ready to start their regular service between Charlevoix and St. James for the season, but unable to do so until such time as repairs on the swing bridge, now under way, are far enough along to permit a partial opening of the bridge in order that the mail ship, James E. Sanford, can pass through the channel to Lake Michigan.

According to present plans the mail ship will make her initial trip of the season to St. James Friday, April 8th and arrangements are under way to work to this program by both the Transit Company and State Highway repair crew that has been working on the bridge for several weeks.

SHAKESPEARE-DICKENS PROGRAM

Held Monday Afternoon at the Congregational Church

A rare and beautiful musical treat was afforded the people of the community last Monday afternoon when the members of the Shakespeare and Dickens Clubs held an open meeting at the Congregational church. Each club has pursued its individual line of study during the winter but joint meetings have been held once a month taking up the study of music. These meetings have been of much unusual interest that the meeting Monday was made public and the church was filled with a most appreciative audience.

The program was worked out jointly by Mesdames Stelter and Livingston, the former developing the subject of "Church Music" and the latter "Church Music." Mrs. Fitch gave the most interesting paper on the origin and construction of the organ after which Mrs. Stelter played Bach's "Fantasia" and "Fugue in G Minor." Many of the composers of organ music having been studied in other connections during the year. Mrs. Stelter confined the remainder of her program to the composers of the present century. She gave an account of the life of the French composer and organist, Guilmant, and she played in a most impressive manner his "Funeral March and Seraphic Chant." This and Bachs "Fugue" were perhaps among the most profound numbers of organ music that has ever been rendered in our community. Her last selection was a lighter number, Miller's "Prelude in B flat Minor," which gave contrast to the program.

Mrs. Livingston presented Church music in a most interesting manner. She traced the evolution of music from its beginning through the fourteenth century when St. Ambrose, Bishop of Milan, promulgated a series of regulations which enabled the clergy to sing Psalms with more precision. St. Gregory, two hundred years later carefully revised the (Concluded on page 8)

Three Good Suggestions for Using the Sewing Machine

After twenty-five years' experience Mrs. George Stanley, of East Jordan, has three good suggestions for using your sewing machine. First, place one foot forward on the tread as in walking to balance your pressure while sewing. Second, practice stopping the machine off center so that it will start easily. Last of all, learn to start your machine with your feet alone so that both hands will be free to guide the sewing. This soon becomes instinctive and makes the sewing one much more quickly.—Farm and Fireside.

"EDUCATED MAN IS SENSITIVE"

The Need of Educated Men Greater Than Ever Before

"The educated man is sensitive to obligations and opportunities," Dr. C. D. Davis, professor of secondary education at the U. of M., told the 52 graduates at the winter term exercises at Central Michigan Normal, Thursday, March 24. "The educated man of culture is capable of making adjustments to the world about him—not only once, but with each arising situation. He is an individual who is laying anc unful," he maintained. "The process of education consists in leading or guiding the child from the place where he is to the place where we think he should be. The factors determining this process are the time—the place—the individual.

The conception of an educated man is decided by the standards of his age. Among peoples the wise man was he who learned the will of the Deity and interpreted it to his followers—consulting his g l orance by concise, mystifying statements. Later the orator who covered his ignorance with a great number of words was the educated man. In a still later era the student of classic literature was quoted frequently and immensely was considered the ideal man of learning.

Knowledge is not the sole aim of education. The solution of modern problems involves a mastery of such concrete data, it is true, but of greater importance is the intellectual power to manipulate circumstances.

The need of educated men is greater than ever before for upon the young people of today rests the responsibility of preserving democracy."

Weighty Subject

An instructor at New York university got a fractured skull recently in a philosophical argument. It is supposed he was struck with the truth of the Kantian theory of categories. This is a very weighty subject.—Atchison Globe.

Chemistry and Taste

As soon as the eminent dietitians pronounced anything an necessit of life high fees or unusual salt charges or something of that sort we get psychified against, even if we like it.—Ohio State Journal.

Jud Tunkins

Jud Tunkins says a man who loves his fellow men has the right to expect friendships that don't bind him any more servitude.—Washington Star.

THE BOXING FEST MONDAY NIGHT

American Legion Puts on Successful Carnival of Bouts

Last Monday night proved to be a great night for boxing fans and for the local members of the American Legion, who put on an entertainment that was interesting throughout, drew a large crowd, kept them in good humor and all in all making the best show of this nature ever staged in Charlevoix.

The program not only interested local citizens but drew some from Boyne City, East Jordan, Ellsworth and Petoskey; not only spectators, but each of the places mentioned was represented by one or more local boxers who acted as demonstrators of the manly art when they engaged in some one of the bouts.

In the main the several contestants in the boxing bouts were evenly matched, instructed the gamb and exhibited good head work and gave an interesting demonstration of their ability to handle the gloves, give and take some punches in good humor and at the same time keep spectators interested.

An estimate made of the number in attendance and witnessing the events has been placed at about twelve hundred and this it is generally thought to be a very conservative guess. All pay rate there was a large crowd with the business district and residence streets packed with automobiles with parking space at a premium within a reasonable distaucc of the place of meeting.

Ten bouts of three rounds each comprised the program as put on, more were ready but these were pulled off on account of the lack of time. The boxers were matched up as follows;

Heise vs. Cook; Snyder vs. Bolton; Scout vs. McArthy; Wix vs. Covey; Higman vs. Lathrop; Crandall vs. Hough; Woods vs. Hearns; Russell vs. Allen; Gravelin vs. Chute; McCaren vs. Coveyou.

Wix and Chute came from Boyne City; Coveyou and Coveyou, Lathrop and Hough from Petoskey; Hearns from Ellsworth. All other contestants local Charlevoix boys.

FARMER ACQUITTED

L. J. Wilson, residing near Stanton, was acquitted of a charge of manslaughter, tried on one count for having shot and killed a chicken thief.

The court was petitioned by some sixty thousand farmers and friends of the accused man, seeking to have him exonerated of blame on the grounds that a man's right to protect property on his farm is as inherent as that of the banker to protect funds in his bank from robbers.

The jury had the case just ten minutes when its verdict was rendered. The court was filled with farmers. The case had attracted statewide attention in that farmers' organizations, as well as individuals, had taken Wilson's part in the matter of protecting legal and financial assistance to help free him of the serious charge against him.—Farm Bureau News.

MAKING MICHIGAN DRY

Most Drastic Dry Law Ever Before Attempted

What is an attempt to discourage rum running once the bars are let down under the new liquor law in Canada, which goes into effect some time in May is seen in the Lennon bill which has already passed the senate and now reposes in the house of representatives at Lansing with more than an even chance of being enacted into a law.

The proposed measure makes it mandatory upon judges to impose a minimum sentence of $500 fine and imprisonment in prison for one year of all persons convicted of selling, bartering, importing or transporting liquor for sale. It is the most drastic dry law ever before attempted and has the support of the ardent drys who fear a deluge of forbidden goods once our neighbor across the river becomes liberalized.

Home brewers will not be molested under the provisions of the Lennon bill, both the drys and the wets agreeing that the householder is well within his rights under the present liquor laws if he manufactures liquor purely for home consumption.

Age of the Earth

According to Dev Vignoles, there are twenty different computations as to the creation as at 9 a. m. on October 23, 4004 B. C.

Twenty-Two Million Motor Vehicles Registered in the U. S.

A recent statistical report from the U. S. Department of Agriculture furnishes the information that more than twenty-two million motor vehicles were registered in the United States during 1926, making an increase of more than two million over the previous year.

Receipts for registered fees, licenses, etc. amounted to $388,282,352, an increase of $27,682,731 for the fiscal year. Of the gross receipts $190,406,060 was available for highway construction under supervision of state highway departments.

In the report Michigan is credited with 1,118,785 registrations and registration receipts of $16,953,685.

DEMAND FOR SERVICES

Sheriff Vaughan Kept Busy Last Few Days

Sheriff Vaughan seems to be on the job and in demand for his services in several places in the county and on frequent occasions is attending to official business in adjoining counties where he picks up any prisoners that may be wanted in this state larceny. Increased perjury prevails as to what amendments, if any, to the present grass and weight tax laws are to be passed at the present session.

HIGHWAY BILLS IN TANGLE

State Officials Have Banquet in Downtown Hotel

Considerable concern and no little dissatisfaction is evident among the members over the announcement that at a little banquet held a few days ago, Gov. Green, members of the Highway committee of the State Administrative Board, the Highway committee of the Senate and the Roads and Bridges committee of the House agreed to support a 3-cent gas tax with no change in the present annual weight tax on motor vehicles, except that 50 per cent of the weight tax revenue be returned to the counties.

The present State officials are said to be backing this new program to meet the emergency caused by the depletion of the highway funds by the previous State administration. Some of the Senators and Representatives who attended the highly informal banquet say, now insist that they did not give their sanction to any such program and they will not support it. They point out that they do not see how the present administration can upon so such a program as the platform at the last election pledged that no new taxes would be favored which would not definitely displace the burdens of the existing levies.

On the day previous to the banquet at which the 3-cent gas tax with no weight tax reduction was discussed House leaders had perfected a compromise which was said to be satisfactory to several members sponsoring various highway finance schemes. This would have provided for a 4-cent gas tax, permanent license for passenger cars at the cost of 40c per hundred pounds; trucks weighing up to 2500 lbs, 30c per 100; trucks weighing 2500 to 4000, 5c per 100; and those above 4000 according to present rates.

The plan provided that the proceeds of the gas tax be distributed as follows: 35 per cent, $8,400,000, go to the various counties in same proportion as the $6,000,000 which they now receive—per cent estimated at $1,200,000, would be divided equally among the 83 counties; the balance, 60 per cent, about $14,000,000 would be turned over to State Highway dept.

TUBERCULOSIS HOSPITAL

Advocate the Placing a Hospital at Ann Arbor

One of the principal issues during the past few days has been relative to the care of those who contract tuberculosis. High medical authorities who testified at the various hearings said that they had been amazed with the Idlewild people and that the location was all right for certain patients, but was unadapted to treatment of more complicated cases.

They advocated placing a hospital at Ann Arbor where baffling cases might be expertly diagnosed and where the best specialists would be available. It was also suggested that the Ann Arbor location would provide for research and would make possible training of nurses and medical students in tuberculosis and its treatment.

Favor Agricultural School—The House, without a dissenting vote, passed Rep. Bradley's bill providing the desired State aid for maintaining the Upper Peninsula Agricultural school at Menominee for the next two years.

One of the most spirited battles in the Senate thus for this session was over Sen. Lennon's bill to impose stiff penalties on bootleggers and rumrunners. After wordy hearing fiery debates, the measure passed 22 to 9. It places the minimum penalty at $200 fine and one year in jail.

Coming April 4th—Moday, April 4th, is the date when Dr. Leahy, the optometrist, will be at Hotel Charlevoix, one day only. Headache, dizziness, nervousness, crossed eyes and all other symptoms of eye-strain corrected.

GAS TAX BOOST MEETS OPPOSITION

Many Members Insist on Permanent Plates, Lower Licenses

The legislative machinery grinds relentlessly on through long grueling afternoon sessions. The clerks voice drones monotonously section after section of tedious bills. The presiding officer rattles off perfunctory phrases. New laws are born. Old statutes are amended or repealed. Nearly every evening public hearings are held before various committees and men for special interests deliver pleas for their pet projects.

Wearisome routine measures comprise most of the legal grist, but now and then controversial measures appear which set off the oratorical fireworks. The chief worry in both branches just now seems to be how all the necessary and worthy appropriation requests are to be granted without a boost in state taxes. Increased perjury prevails as to what amendments, if any, to the present grass and weight tax laws are to be passed at the present session.

WEALTHY WIDOW WEDS

IS ARCHBIGAMIST

THINGS YOU MAY NOT KNOW

About 90 per cent of the fires originate inside structures.

Adept Aztec surgeons sewed up wounds by means of hair.

Prehistoric cave men of the Alpine region depended on the bear for food, clothing and hunting tools.

In the Newcastle district of England, school authorities often provide bicycles for pupils who live far from school.

Elephants work at plowing in the Belgium Congo.

Hogs are now tattooed as a means of identifying them.

Women contain the severities of the English winter by wearing short sleeveless jackets of scarlet flannel.

Philadelphia is to have anti-noise squads of police to reduce noise of motor vehicles in the center of the city and near hospitals.

Prolong Period of Sire Service

Beneficial Effects of Exercise Have Been Proven by Tests.

(Prepared by the United States Department of Agriculture.)

Dairy bulls at Beltsville, Md., have been put on a daily regime calculated by specialists of the bureau of dairy industry, United States Department of Agriculture, to produce their life of usefulness in the various breeding projects under way on the experimental farm. Systematic exercise and the feeding of sprouted oats are two of the most important features of the plan.

Advocate Exercise.

Investigations in the past have proved the beneficial effects of exercise in maintaining the health and fertility of bulls, and the practice has been consistently advocated. The feeding of sprouted oats to bulls is in line with the beneficial results this feed has shown in correcting breeding difficulties in cows and virgin heifers. Sprouted oats supply the so-called vitamine B, a shortage of which is often held responsible for abnormal breeding of reproductive organs in various kinds of animals.

The special need for determining the best methods of handling dairy bulls to maintain their potency for many years is a result of the "proved sire" idea recently brought into favor. Proved sires are those whose daughters have been tested in sufficient numbers to indicate a reasonable ability on the part of the sire to transmit high production. Such proof obviously cannot be obtained from the sires are older than the average dairy bull.

Test Fertility.

Five of the bureau's herd bulls are over eight years of age and average ten and one-half years old. Six fifteen years old and continues as breeding breeder. Several young bulls are being put experimentally to test the effect of rations on fertility, and two older bulls are now being examined to determine the effects on fertility of excessive service, lack of exercise, and close confinement.

Provide Warm Water for the Cows During Winter

If dairy cows are to produce abundantly and economically they must be encouraged to drink all the water possible. When cows are forced to drink ice water they will drink only as much as absolutely necessary, and will result in a falling off in milk flow. In addition the cows will need more feed to furnish materials to warm up the ice cold water to body temperature.

It is cheaper to warm this water with some type of a tank heater or by installing a water direct from the well than it is to make the cow do it by consuming more feed. It is dangerous to look after the cows and heating system before the extreme cold weather of winter sets in. Cows that are allowed to drink ice cold water for a few days, it is more difficult to bring their milk flow back to normal than to avoid this by installing a tank heater before cold weather gets in.

Sweet Clover Valuable in Building Up Soils

The value of sweet clover as a green manure or soil builder is becoming more and more apparent. Those interested in soil conservation and building have had remarkable success in the use of sweet clover, and sweet clover in a two-year rotation. The inoculated sweet clover is sown in the spring on the wheat. After the wheat is harvested the clover occupies the land for the remainder of the season. The next spring it makes a rapid growth, and during the latter part of April is plowed under and the land prepared for corn.

At the Missouri College of Agriculture it has been found profitable to fertilize the land with about 100 pounds of acid phosphate to the acre. Where the phosphate is added the amount of green clover ready to turn under was almost double that where no phosphate was used.

Rich, Deep, Mellow Soil Is Proper for Parsnips

Parsnips delight in a rich, deep, mellow soil. Under that the roots may grow long and straight. Undesirable side roots result when hard soil is reached. For this reason the soil must be plowed or spaded to a depth of 12 to 15 inches and a liberal dressing of fine, well-rotted manure worked into it. Fresh manure tends to cause spreading, fibrous roots and should not be used. Ground that was heavily fertilized the past season is best for growing good parsnips but if only well-rotted fertilizer is used, good results may be expected.

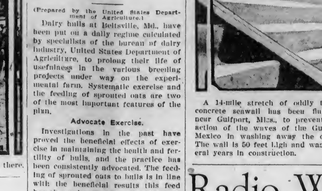
Bovine T. B. Eradicated at Much Increased Rate

The number of cattle tested for tuberculosis in the country under government and state supervision during the fiscal year ended June 30, 1926, was 24 per cent more than for the preceding year, according to the United States Department of Agriculture.

Nearly every phase of tuberculosis-eradication work showed an increased activity during the year. Though the accredited-herd plan of combating the disease was conducted in all the states, general preference was given the area project which provides for the testing of all cattle in a county. Under this plan over 6,500,000 cattle were tested, or over 1,500,000 more than during the preceding year.

Of noteworthy interest in connection with the tuberculin testing under both accredited-herd and area plans was a survey to show the present extent of the disease. The survey showed the probable extent of the disease as 2.8 per cent.

Built to Resist Waves of Gulf of Mexico



A 14-mile stretch of oddly fluted concrete seawall has been finished near Gulfport, Miss., to prevent the action of the waves of the Gulf of Mexico in washing away the coast. The wall is 50 feet high and was several years in construction.

Radio Warnings Make Sea Safe

Keep Ships Informed as to Location of Icebergs and Derelicts.

New York.—"Barquentine ——— ahoy! Sound in sinking condition and set on fire at 30 north, 40 west, June 17, 1926. May possibly be a danger to navigation. Crew on board steamship ———."

Such was the purport of a warning to all ships which was radioed from the mid-Atlantic by a series of an Atlantic liner one lonley night, held in suttrad and conveying little to the average landsman. But what of the hidden menace behind those words? asks a writer in the New York Herald-Tribune.

From time to time, when disaster overtakes some plutelial liner, we are reshuded of the dangers of the sea and of the vital part played by wireless as a life-saving agent. But what of the hundreds of other ocean casualties which occur every year?

These casualties are equally disastrous, from the point of view of the total loss of life and property involved, but they are on such small scales individually that they are considered relatively unimportant and we never hear anything about them.

We never hear either of the part played by wireless in these cases, or of the part it plays subsequently—perhaps months or years later—in preventing major disasters which may easily result from a minor casualty such as that recorded in our opening paragraph.

Wireless Plays Important Part.

Yet, wireless communication continues to play an increasingly important part in the safeguarding of life and property at sea, and in this article it is proposed to deal with some little known phases of wireless activity which are in constant operation out on the broad Atlantic, far beyond the ride of the horizon.

The busiest ocean route in the world is that followed across the north Atlantic by the great liners which ply between Europe and New York. During the busy season as many as 40 liners of different nationalities may be arriving at and leaving the terminal ports on either side every week. Added to this number there are countless cargo vessels, or freighters.

All these ships follow well-defined tracks or lanes across the ocean—lanes which are as definitely laid out as a highly followed as a main state highway on land.

If it were possible to ascend to a great height in an airship, so that a bird's-eye view of the whole Atlantic could be obtained, the observer would see two endless lines of ships but a few miles apart—one line bound west and the other bound east.

Dangers to Navigation.

With this enormous collection of shipping constantly moving to and fro a very close watch indeed can be kept upon dangers to navigation, and warnings can be broadcast by wireless to inform other ships as to the exact nature and position of these dangers.

And what are these mysterious dangers to navigation?

We have all heard of "flotsam and jetsam," but how many of us know the meaning of the expressions, and that it originated nuseng sailors? Flotsam is any loose anything which floats, and may have originated near the shore and been washed out to sea. Jetsam is also anything which will float, and the term is usually applied to something which has been thrown overboard, or jettisoned, from a ship at sea.

Many small freighters put to sea with "deck cargoes"—that is, cargo which, for want of space below, is stowed on deck. Timber frequently carried in this fashion, also hulky machinery which cannot, on account of its size, go lowered down a hatch. If a vessel carrying such a cargo encounters a violent storm her deck cargo may be torn adrift and washed overboard by huge waves, or it may, for the safety of the ship, be cut adrift by the crew and jettisoned.

Flotsam and Jetsam, therefore, may consist of an enormous variety of material, such as huge bulks of timber, steam engine boilers, lost barges, small boats, hawes torn adrift from their mooiings near shore, and wreckage from sunken ships, all highly dangerous to shipping.

If, for instance, a liner rushing along in the dark at 20 knots happened to hit a bulk of timber end on, her hull would certainly be pierced.

Such disturbances, although sufficient to cause damage of a more or less serious nature, rarely cause the complete destruction of a speeding liner. Far more dangerous than this miscellaneous collection of flotsam and jetsam are derelicts and icebergs.

The Menace of the Derelict.

It frequently happens that when a ship is very seriously damaged by fire storm or collision, she is abandoned by her crew and left in a sinking condition. However, ships so abandoned do not always sink. For a variety of reasons (such as air locks below decks natural buoyancy due, perhaps, to a cargo of timber, etc.), the vessel may continue to sink until she is unsun agreable, and remain, there. That is to say, her decks may be awash or just submerged, leaving only the masts and funnel above water.

A vessel in this condition becomes a derelict, and one of the sea's greatest perils to shipping, for whereas the presence of icebergs is to be expected in certain regions at certain times of the year, the derelict may be anywhere, at any time, lurking unseen just below the surface, or under cover of darkness.

Surprising as it may seem, such derelicts remain afloat like this sometimes for years, drifting about aim lessly at the mercy of the wind and ocean currents. There are always such derelicts moving about the Atlantic, mostly in unfrequented regions but occasionally they make their appearance in the more frequented parts and to wired as the credit is due that they do no harm.

It might be thought that a damaged vessel, abandoned to become a derelict, would not once very far from its position at the time of abandonment, and would, therefore, be quite easy to avoid. Such, however, is far from being the case.

Another grave danger which has to be faced annually by the navigators of our great liners and freighters is that of collision with icebergs.

Icebergs Great Danger.

From the time an iceberg breaks adrift from the foot of its parent glacier till the time it reaches the main shipping lanes, a period of two years is generally elapses, but every year, on being released from their winter imprisonment, they sweep down past Newfoundland and reach the Grand Banks about March. From then on till about July or August icebergs are a constant menace to transatlantic liners.

In clear weather they may be seen even in the dark, but in fozzy weather or their positivity can only be guessed at. As many of them measure anything up to 1,000 feet long by several hundred feet high, the disastrous consequences of a collision with one of them will be fully apparentied. It was thus that the ill-fated Titanic met her doom in 1912.

As a result of that disaster, regulations and arrangements were made to combat the danger, and all the navigators using the North Atlantic route contribute towards the upkeep of an ice patrol service. This service is conducted on behalf of all the nations concerned by the United States government, which sends out the revenue cutter "Seneca," "Modoc" and "Tuscapa" every year to patrol the ice region to report until all signs of the ice have disappeared.

During the season one of these cutters is always on duty, cruising over the danger area, noting new icebergs as they arrive and following the movements of those already reported.

Twice a day the ice patrol sends out by wireless a detailed report of all icebergs known to be in the region, and, with these reports to go by, ships which have to cross the ice region are enabled to do so with a pretty accurate knowledge of the whereabouts of all the icebergs in the vicinity.

Wireless Beacon Stations.

Most countries have now established special wireless beacon stations which, like lighthouses, send out a characteristic signal by means of which they can be identified. The direction finder is brought to bear on this signal and the ship's bearing from the beacon thus established with extraordinary accuracy. So accurate and reliable is the modern direction finder, in fact, that ships regularly steer by it alone when they have to make a dangerous landfall, such, for instance, as de Nantucket Light Vessel, in dense fog.

Probably one of the most spectacular uses of the direction finder, however, is in the location of ships in distress. If a marine radio operator hears a distress call he will jump to his direction finder and immediately take the bearing of the incoming signals. It had best be done right away in case the ship in trouble has had her hull pierced, in which case the dynamo room will soon be flooded and power for the wireless transmitter will fail.

A ship in distress, of course, always sends out her position, so that assisting rescuers may know where to head for, but it frequently happens that a ship has and lost weather for several days she will not have had opportunity of getting a sight of the sun to take sights and ascertain her exact position.

Under such circumstances she may only send out her position as calculated by "dead reckoning," which is only approximate at the best of times, and may easily be as much as 100 miles out. Without a direction finder, therefore, rescuing ships might easily speed many hours or even days too far in the luckless ship. They may never find her, or, perhaps, arrive too late to be of any use other than some wreckage.

Makes Rescue Easy.

If a rescuing ship is equipped with a direction finder, so long as the distressed ship can keep on transmitting, even with her engines temporarily set, the problem of finding her is the simplest part of the rescue job. All the searcher need do is steer right had on to the direction from which signals come and the sinking ship cannot possibly be missed, even in fog.

These little-known phases of wireless activity are constantly in progress on the sea, comfortably reducing the strain upon the engineer and navigating officers of the world's shipping, especially the large and fast liners. Before the days of wireless, when these men had only themselves to rely on, the hours they spent on the bridge were full of anxiety whenever the weather was encountered.

Now they can face the worst weather or the darkest night secure in their knowledge of the exact position of all dangers, and of their own position—thanks to wireless.

Stuck to Her Job

Paris.—Mlle. Marianne Henrion, cook for one family in Nancy, France, for seventy-four years, wielded the frying pan until the day she died before her death at the age of ninety-one.

BRIDE ACTS AS A LOOKOUT WHILE HER HUSBAND STEALS

Couple Confess to Having Committed 25 Burglaries in and About New York City.

New York.—A young man and his bride of a few months, arrested in Jersey City on suspicious persons, confessed to having committed twenty-five burglaries in Hudson county in the last month. They are Alvin Black, twenty-three years old, alias Alvin Jessup, of 442 Pacific street, Brooklyn, and his wife, Elizabeth, twenty-one.

The young wife, the police said, acted as a lookout while her husband forced his way into apartments. Seventy-two pawn tickets were found in their possession, representing loot valued at from $10,000 to $15,000, the police said. A jimmy also was found on the husband.

For several hours after their arrest the two offered a variety of defenses and explanations for the possession of the pawn tickets, but when the husband's police record was produced, showing a half dozen arrests and one conviction, they confessed and offered to take the detectives on a tour of Jersey City to show them where they had looted.

Inspector John Underwood said the Blacks told him they had been driven to refuse last September when in urgent need of money for doctor's bills and when both were without employment. Black said he had been a bus conductor, but the police have not yet confirmed his assertion. They told the police they were married on December 10.

The police report that Black and he and his wife scanned their cards in Weehawken. After several burglaries there they went to West New York, and then in turn to Union City, North Bergen, Bayonne and Jersey City. The husband said he rang bells of the apartments, but when the husband's police record was produced, showing a half dozen arrests and one conviction, they confessed and offered to take the detectives on a tour of Jersey City to show them where they had looted.

Botanist Finds Plants Grow Faster at Night

Bloomington, Ind.—Plants grow most in the darkness of the night.

With a mechanism which he calls the auxanometer, Prof. F. M. Andrews of the botany department of Indiana university is measuring the development of plants.

The results, he discovers, attain more length in the night than during the day, although leaves shows as much growth during the day as when the sun is down.

Rewarding Carefulness

Pittsburgh, Pa.—A Pittsburgh newspaper co-operating with a theater announces that show tickets good for two seats each will be given daily to careful automobile drivers.

THE DOOM TRAIL

CHAPTER XI—Continued

—22—

We spent two days with these people, recuperating in preparation for the stern task ahead of us. After parting with them we continued a leisurely fashion eastward, keeping well to the north of the Great Trail of the Long House and avoiding as much as possible contact with the Onondagas, Cayugas and Mohawks whose countries we traversed. Some ten days after leaving Oswegey we found ourselves on the verge of that much traveled domain which was roamed by the keepers of the Doom Trail.

In order to assure that our departure would be free from the observation of spies we left our last camp after dark and in two parties, Ta-wan-ne-ars and myself going in one direction and Peter in another.

Our meeting place was a grove on the bank of a creek, one of the principalties of the Mohawk. We reached it without observing, and lay in contentment most of the day, starting again in the late afternoon and moving warily through the forest, following the movements of those already reported.

Twice a day the lee patrol sends out by wireless a detailed report of all icebergs known to be in the region, and, with these reports to go by, ships which have to cross the ice region are enabled to do so with a pretty accurate knowledge of the whereabouts of all the icebergs in the vicinity.

Wireless Beacon Stations.

Most countries have now established special wireless beacon stations which, like lighthouses, send out a characteristic signal by means of which they can be identified. The direction finder is brought to bear on this signal and the ship's bearing from the beacon thus established with extraordinary accuracy. So accurate and reliable is the modern direction finder, in fact, that ships regularly steer by it alone when they have to make a dangerous landfall, such, for instance, as de Nantucket Light Vessel, in dense fog.

Probably one of the most spectacular uses of the direction finder, however, is in the location of ships in distress. If a marine radio operator hears a distress call he will jump to his direction finder and immediately take the bearing of the incoming signals. It had best be done right away in case the ship in trouble has had her hull pierced, in which case the dynamo room will soon be flooded and power for the wireless transmitter will fail.

A ship in distress, of course, always sends out her position, so that assisting rescuers may know where to head for, but it frequently happens that a ship has and lost weather for several days she will not have had opportunity of getting a sight of the sun to take sights and ascertain her exact position.

Under such circumstances she may only send out her position as calculated by "dead reckoning," which is only approximate at the best of times, and may easily be as much as 100 miles out. Without a direction finder, therefore, rescuing ships might easily speed many hours or even days too far in the luckless ship. They may never find her, or, perhaps, arrive too late to be of any use other than some wreckage.

Makes Rescue Easy.

If a rescuing ship is equipped with a direction finder, so long as the distressed ship can keep on transmitting, even with her engines temporarily set, the problem of finding her is the simplest part of the rescue job. All the searcher need do is steer right had on to the direction from which signals come and the sinking ship cannot possibly be missed, even in fog.

These little-known phases of wireless activity are constantly in progress on the sea, comfortably reducing the strain upon the engineer and navigating officers of the world's shipping especially the large and fast liners. Before the days of wireless, when these men had only themselves to rely on, the hours they spent on the bridge were full of anxiety whenever the weather was encountered.

Now they can face the worst weather or the darkest night secure in their knowledge of the exact position of all dangers, and of their own position—thanks to wireless.

Stuck to Her Job

Paris.—Mlle. Marianne Henrion, cook for one family in Nancy, France, for seventy-four years, wielded the frying pan until the day she died before her death at the age of ninety-one.

BRIDE ACTS AS A LOOKOUT WHILE HER HUSBAND STEALS

Couple Confess to Having Committed 25 Burglaries in and About New York City.

New York.—A young man and his bride of a few months, arrested in Jersey City on suspicious persons, confessed to having committed twenty-five burglaries in Hudson county in the last month. They are Alvin Black, twenty-three years old, alias Alvin Jessup, of 442 Pacific street, Brooklyn, and his wife, Elizabeth, twenty-one.

The young wife, the police said, acted as a lookout while her husband forced his way into apartments. Seventy-two pawn tickets were found in their possession, representing loot valued at from $10,000 to $15,000, the police said. A jimmy also was found on the husband.

For several hours after their arrest the two offered a variety of defenses and explanations for the possession of the pawn tickets, but when the husband's police record was produced, showing a half dozen arrests and one conviction, they confessed and offered to take the detectives on a tour of Jersey City to show them where they had looted.

ARE FARMERS DUMB?

The old question as to who are the brainiest, city people or country people, has cropped up again. A writer in one of the popular magazines comes to bat for the city, basing his comparison on the names in Who's Who. The editor of Farm and Fireside rises in defense of the country.

It has long been a tradition that most of the American geniuses are from farm origin. Indeed 70 per cent of the names in Who's Who are of country birth and only 30 per cent from the city. The farm boy with a college education has the best chance of getting into Who's Who, for it is perhaps significant that 77 per cent of those in the present volume have been to college.- The editor says:

"Statisticians say that 80 per cent of the big wigs of the country were bred on the farms. Be that as it may, there is no doubt about the value of the farm as a training camp for the soldiers of fortune. As to the dullards, they are on the farm just as they are everywhere. The percentage is about the same the world over. Just as many city dwellers are dumbbells as farmers. But if heredity has anything to do with life, the farm must produce some very wise people to have begotten and trained the 80 per cent of big wigs who were farm boys."

There is much to be said in favor of the farm for this generation, and they seem to know it. They have got good homes, promising young families, radios and automobiles. The farmer gets as much fun out of the cut as the city man's trousers and moustache as he furnishes,—so honors are even, a thing the city chap never seems to grasp.

But most important to the human being is the comforting assurance which the farmer has that as long as he has his farm he has a living and a competency for his old age. There is nothing so tragic as poverty in old age, and the percentage is very low in rural districts.

THE MODERN DIESEL

The Shipping Board has called attention to the wonderful results it has obtained with the Diesel engine.

The public has not paid much attention to the new invention which has come along in logical succession to sail boats, side-wheelers and ordinary varieties of steam engines.

The Diesel engine is something like an automobile engine, instead of a clumsy old steam churner of earlier mechanical construction. The Diesel engine differs from the automobile engine inasmuch as the explosion does not come from spark plugs, but from heat which produces an explosion by intense compression of air in the firing chamber of each cylinder. The fuel is introduced on the up-stroke of the piston by air pressure ranging from 85 lbs per square inch to 300 pounds per square inch. It is immediately exploded and the piston, forced down, opens a valve which admits fresh air to clear the chamber for the next charge of fuel and air.

The Diesel engine as a rule uses crude oil, which is automatically sprayed into the cylinder under high pressure. The outstanding feature of the Diesel engine is its very high thermal efficiency. It requires only apout one-third of the amount of fuel required by the oil burning steam engine, and in addition it has the power of giants.

An old-timer in Washington who has been accustomed to entertain his out of town visitors by showing them the sights of the Capital, remarks that very few of them, while leaning over the railing of the Senate, or the House gallery; show any particular degree of enthusiasm over the statesmen specimens. They are usually loquacious in pride over men from their own states.

But Charles Evans Hughes, who was in Washington recently as chief counsel of the Beech-Nut people, who claimed that the Lorillard Tobacco people have illegally appropriated their trade mark, is one of the rare exceptions pointed out, of whom people remark, "he looks like a president." There are whole flocks of Senators and cabinet officers that believe they are big enough, and capable enough to be president, but there are not many of them able to look in the glass and agree that they look as big as their ambitions.

A review of labor conditions in Russia shows that unemployment is widespread and is increasing, and that there is serious growth in number of accidents among workers. According to the Commissary of Labor, unemployment in Russia threatens to become a permanent evil, and is a source of considerable anxiety both to the trade unions and to the Commissariat of Labor.

It is estimated there are at least 2,000,000 unemployed workers in that country, a great portion of them being skilled mechanics. The report comes from a country which was to have been a paradise for working people through the government's taking over and operating the principal industries.

"1927 YEAR WITHOUT SUMMER," SAYS SEER

He Also Predicts Slim Crop Production.

Washington.—The weather, ever a favorite and inexhaustible conversational topic, is the bone of contention in a red-hot controversy between meteorologists here, with the immediate welfare of the nation in the balance.

If one group of scientists, headed by government weather forecasters, has the correct side of the argument, the present winter will be not much different from other winters and next year will record the seasons in regular order.

If the government experts and their supporters are wrong, however, the severe cold weather that already has been experienced by residents of Illinois is but a foretaste of even worse things in store for them, which will be the prelude of a "year without a summer."

Predicts Slim Crops.

Herbert Janvrin Brown, a long-range weather forecaster, told a gathering of county farm agents here that the present winter will be unusually severe and that the fall of snow and the thermometer will be unprecedented during the last half century. He also predicted that there will be little warm weather next year, to which he added the ominous forecast that crop production would be slim and that there is a strong probability that the output of American farms would be unequal to the national appetite.

The government weather bureau counters with the statement that Brown doesn't know anything about future weather conditions, and that in this respect he is no better informed than are other meteorologists. Experience has demonstrated that it is not safe, nor is it possible, to look ahead longer than a week, and that long-range forecasting at best is guessing, and not very good guessing at that, according to federal authority.

In rebuttal of this contention, Brown declares that since 1920 he has accurately forecast weather a year ahead, and that on the basis of his predictions he has made crop estimates that have been more reliable than have been those of the Department of Agriculture, which is official guardian of the weather.

Brown bases his weather predictions on ocean currents, which he claims determine the weather conditions of this continent. During the last several years there have been pronounced changes in these currents, the most important of which has been a decided drop in their temperature, and from this he argues that 1927 is to be a repetition of 1815, which is said to have been a "year without a summer," with almost complete crop failure north of Tennessee.

Volcanic Activity Needed.

A year ago Brown declared that the only phenomenon needed to fulfill his forecast was volcanic activity, which, he said, would fill the upper atmosphere with dust particles and reduce the sun's heat. He now points out that Vesuvius by its recent eruption has supplied this omission, and he declares that he is more convinced than ever that the present winter will be a record-breaker for cold and snow, and that the accompanying chilling of the earth crust, with colder ocean currents and reduced solar heat, will make the ensuing summer one long to be remembered by those who survive it.

It is conceded by weather sharps that so far this season Brown has had all the "breaks," the Northern sixties having had more than a normal amount of low temperature. Government forecasters, however, refuse to concede that the weather of the last few days is a sample of what is in store for the balance of the winter, and they laugh at the suggestion that there will be ice and snow in all the northern states every month of 1927, as Brown declares will be the case.

Ban Put on Dancing

Dancing has so far come under the displeasure of the Catholic government of the Swiss canton of Ticino that a law has been passed prohibiting dancing except during the first three months of the year. Every ball must receive police authorization and it is expressly forbidden that youths under sixteen years of age dance at all. Between the ages of sixteen and twenty dancers must be accompanied by their parents.

Shaw Easy Mark for Tunney

Conversation overheard in a subway:

"What a prize fighter that guy Tunney is. He is getting $7,000 a week in vaudeville."

"Yes," answered the other, "and what do you think? I hear he's going over to England to meet Shaw."

"Aw, he'll have no trouble putting away that guy. Take anything against his staying two rounds with the champion."—The Outlook.

SO MANY ALIASES, FORGOT OWN NAME

Crook Apparently Puzzled for Some Time.

New York.—A criminal of many aliases was being interrogated by detectives. Most crooks are satisfied with one or two, but this particular crook found it convenient to have six or seven fictitious names ready to use. And on different occasions he "had traveled," as the police say, under each of his names. In one city he assumed the name of Jim Green and in another the name of Tom Smith.

His capers were fairly familiar with his numerous aliases, and the mention of any one of them recalled the photo of a slim, dark fellow with a long nose and a pair of small, baby eyes. A detective had written the aliases on a piece of paper. After studying them a moment he turned to the prisoner and asked gruffly: "Which of these names is your right one?"

The crook examined the list intently and appeared puzzled. "Hiest if I know," he replied with a smile. "You see," he added apologetically, "I've been travelin' under these here names so long that I've clean forgot my right name. But it will come to me after a bit," and sure enough he soon recalled it. The name, however, was not among the aliases.

Would Like to Forget.

"I think this fellow," said a detective, "was just pretending he did not remember his name. Indeed, he would like to forget it if he could, because he has been tried and convicted under that name for more offenses than he can remember. He is, like most experienced crooks, a superstitious fellow. Crooks are masqueraders in a sense, and go by through-life wearing a mask.

"After being initiated into the criminal fraternity the crook resolves to put aside his own name and take on some other one. His main reason for doing this is outlandish; he desires to conceal his identity as much as possible. Only in rare cases, however, use his own name in criminal operations, a most thing if it were known for the cops if every criminal used his right name when he went adventuring! Besides, he has other reasons for his traveling under his own name. Though he may have fallen from grace, he has various notions of honor and sanitary that heretofore has not been dragged in the mud. He does not greet himself, but he does not want to bring disgrace on his father and mother, who are poor but respectable. Why drag them into his troubles?

"He decides to take a name, and while he is a criminal that name will suffice for his purpose. If he is caught by one of the many Dicks, Tom, Dick or John Smith. He will be arrested as John Doe, Richard Roe and John Doe and, if convicted and sentenced, he will go to the pen as John Doe, and no great harm will be done to anyone except to himself."

Sure to Find Him Out.

"He does not pause to consider that no matter how artfully he may try to conceal his real identity the police will find him out. They will investigate his past, and when they once begin such investigations they will ordinarily prefer sure to dig up a lot of knowledge concerning themself and his antecedents.

"After being in the game a while the crook finds that having only one alias is insufficient. He discovers the name he has been using is becoming entirely too familiar—especially to his enemies, the cops. If you are a crook, it does not pay to advertise; accordingly, he assumes another name and lays aside the first alias until people begin to forget it. In time he assumes alias after alias its purpose and it becomes necessary to take a third name. And this explains why criminals frequently have several aliases.

"All of these aliases he finds useful. It may not be convenient to use the name of Jim Jones in New York, but the name may do very well in another city in which he is unknown. He would prefer, nine times out to have a name at all, but since everybody must follow the custom and have a name, he must have one. Therefore he carries in his head several aliases, any one of which he may assume at a moment's notice. The names mean a lot to him. Some of them recall pleasant memories; others recall scenes that he would much prefer to forget. He remembers what Shakespeare said about calling a rose by any other name and it would smell as sweet. Though he would like to believe this, he knows the cops have a long memory for names. No matter how frequently he changes his name, the cops seem to be able to discover him and drag him from obscurity."

THE THEATRE

Cohen and Kelly—Cal Laemmle, president of Universal Pictures Corporation, recently gave enthusiastic praise to Harry Pollard for that director's unparalleled production of sure-fire comedies. The latest of these is "The Cohens and Kellys," with Charlie Murray, George Sidney and Vera Gordon, which opens at the Palace theatre Saturday and Sunday.

"Every king has his premier who acts as his official mouthpiece and interprets the king to his people," stated Mr. Laemmle.

"Just now comedy is king in pictures and Harry Pollard is its premier.

"Pollard is a serious-minded, serious appearing chap. He has no twinkle in his eye. But he has something deeper and better. Pollard has a twinkle in his heart.

"He has to his credit the most amazing list of successful pictures I ever heard of in my whole moving picture career. Let's go back over them and see what real brains and a twinkle in the heart can do.

"Starting with 'The Leather Pushers'—probably the most sensationally successful series of short pictures ever made, with comedy of the richest kind packed in every foot—Pollard has an unbroken line of genuine successes. And not a reason nor even a hint to sour the taste.

"'Trifling With Honor' was his next hit. While this was a melodrama, Pollard really turned it into a delightful comedy. And though it was a baseball story, it made a hit even in countries where baseball is not played.

You Never Know Women—Lovers of high-class comedy and attention! Listen! Our scene is the descried, darkened stage of a theatre. The characters,—a bold, brazen woman of the world and the worldling who is enamored with her. Considering this the logical moment for a bit for wooing, he speaks of his love and devotion.

She, who has just that afternoon written him a note saying she is through with his numerous aliases, and the mention of any one of them recalled the photo of a slim, dark fellow with a long nose and a pair of small, baby eyes. A detective had written the aliases on a piece of paper. After studying them a moment he turned to the prisoner and asked gruffly: "Which of these names is your right one?"

The crook examined the list intently and appeared puzzled. "Hiest if I know," he replied with a smile. "You see," he added apologetically, "I've been travelin' under these here names so long that I've clean forgot my right name. But it will come to me after a bit," and sure enough he soon recalled it. The name, however, was not among the aliases.

Would Like to Forget.

"I think this fellow," said a detective, "was just pretending he did not remember his name. Indeed, he would like to forget it if he could, because he has been tried and convicted under that name for more offenses than he can remember. He is, like most experienced crooks, a superstitious fellow. Crooks are masqueraders in a sense, and go by through-life wearing a mask.

"After being initiated into the criminal fraternity the crook resolves to put aside his own name and take on some other one. His main reason for doing this is outlandish; he desires to conceal his identity as much as possible. Only in rare cases, however, use his own name in criminal operations, a most thing if it were known for the cops if every criminal used his right name when he went adventuring! Besides, he has various notions of honor and sanitary that heretofore has not been dragged in the mud. He does not greet himself, but he does not want to bring disgrace on his father and mother, who are poor but respectable. Why drag them into his troubles?

"He decides to take a name, and while he is a criminal that name will suffice for his purpose. If he is caught by one of the many Dicks, Tom, Dick or John Smith. He will be arrested as John Doe, Richard Roe and John Doe and, if convicted and sentenced, he will go to the pen as John Doe, and no great harm will be done to anyone except to himself.

Sure to Find Him Out.

"He does not pause to consider that no matter how artfully he may try to conceal his real identity the police will find him out. They will investigate his past, and when they once begin such investigations they will ordinarily prefer sure to dig up a lot of knowledge concerning themself and his antecedents.

"After being in the game a while the crook finds that having only one alias is insufficient. He discovers the name he has been using is becoming entirely too familiar—especially to his enemies, the cops. If you are a crook, it does not pay to advertise; accordingly, he assumes another name and lays aside the first alias until people begin to forget it. In time he assumes alias after alias its purpose and it becomes necessary to take a third name. And this explains why criminals frequently have several aliases.

"All of these aliases he finds useful. It may not be convenient to use the name of Jim Jones in New York, but the name may do very well in another city in which he is unknown. He would prefer, nine times out to have a name at all, but since everybody must follow the custom and have a name, he must have one. Though he would like to believe this, he knows the cops have a long memory for names. No matter how frequently he changes his name, the cops seem to be able to discover him and drag him from obscurity."

Radio to Aid Study of Sun, Scientist States

Philadelphia.—A knowledge of the structure and activity of the sun may be obtained in the next 25 years by a study of the static and fading of radio, in the opinion of Dr. Michael I. Pupin, professor of electromagnetism at Columbia university, and retiring president of the American Association for the Advancement of Science.

Addressing the association's annual convention, Doctor Pupin said he regarded static and fading earth currents in submarine cables as messages of solar activity which the mind of man could not appreciate, but which the coming 25 years of progress would probably decipher.

Doctor Pupin also said he felt that within a few years the American method for long-distance telephoning would be duplicated on the continent of Europe, and that through the increased facilities would "proceed the human intermediaries which foster peaceful emotion."

Papers on most every scientific subject were discussed at sectional meetings. More than 4,000 scientists attended.

WANT COLUMN

FOR SALE—7 passenger Nash sedan, $225. A. C. Belding, Charlevoix. 47-2

FOR SALE—Large size Victrola, practically new. Peter Neilson, 405 Dixon Ave.

FOR SALE CHEAP—Ten acres of land inside city limits. Charlevoix State Savings Bank. 39-tf.

FOR SALE—Cottage very desirably located on Petoskey avenue. Parties interested in a Charlevoix cottage should investigate this offer as an attractive price will be made on this property. Address F. A., care Sentinel, Charlevoix.

FOR SALE—Four desirable lots facing Michigan Avenue—nothing better in this residential district.
BARRY-MERCH CO.
Charlevoix, Mich.

FOR SALE—$800 foot frontage on Walloon Lake. About 100 acres of land—will sell as a whole or subdivide. E. J. GLAZA 440 Pearl St., Boyne City Phone 324. 11-tf

Dependable paints since 1851 at Staley Brothers' Hardware.

"We Serve Michigan"

Have We Reached The Danger Line in Taxation?

AMERICAN railroad taxes are mounting to new *Alpine* heights this year, As the latest estimate for 1926, being that they will aggregate somewhere between $400,000,000 and $450,000,000, which may be expressed in various ways, although meaning the same heavy load:

That they will average from $1,005,800 to $1,150,675 a day.

That they will involve a charge per hour between $45,659 and $47,945.

That from six cents to six cents and four and a half mills out of every dollar taken in will go towards taxes.

That the railroads in 1926 will have to devote more than the net earnings of one mile out of every four for the payment of taxes.

The national government has *cut down* the national debt from January 1, 1920, to January 1, 1926, by about $4,250,000,000—four and a quarter billions.

In the same interval, the debts of state and local governments have increased by about 6½ billions—$6,750,000,000.

During this period of federal debt reduction, the state and local governments have been incurring obligations 20 times as fast as they paid off the old debt. During this same period, debts of state and local governments combined have been increased 4½ times as fast as they were before the war.

The total public debt of all forms of government in this country is higher than at the peak of the war debt in 1919.

The national debt is being *reduced* at the rate of three quarters of a billion dollars a year—$750,000,000.

State and local debt is being increased at the rate of more than a billion and a quarter dollars a year—$1,250,000,000.

From January 1st, 1920, to January 1st, 1926, national government expenditures were *reduced* about two billion dollars—$2,000,000,000

During the same period current expenditures by state and local governments increased more than two billion dollars a year—$2,000,000,000—and they are still increasing.

Rising taxes are one of the initial moving forces of the vicious circle of rising costs, Labor asks for higher wages, Producers and distributors pass along the accumulating burden to swell the family budget of the ultimate consumer. This, too, involves higher rents (or home ownership cost), higher food, fuel and clothing costs, etc.

After all, railroads are like any other industry. The farmer does not look forward to his tax bill with more anxiety than does the railroad.

Have we not reached the *danger* line?

Is it not time to retrench state, county and local expenditures?

MICHIGAN RAILROAD ASSOCIATION

New Palace Theatre

ATTRACTIONS FOR THE WEEK

Saturday-Sunday, April 2-3

"The Cohens and Kelleys" with George Sidney, Charlie Murray and Vera Gordon. Didjever hear the story of the Irishman and the Jew? Well, this is a its finest and funniest. A remarkably funny characterization of the private lives of America's two greatest laugh producers with a cast that makes perfection absolute. An Irish policeman. A Jewish merchant—a boy and a girl and a little child to lead them, while love conquers all, and Oi, oi—begorrah what a medley of human pathos and unadulterated joy. Also a Fox comedy, "Two Lips in Holland." Don't miss this.

Wednesday-Thursday—

Florence Vidor in "You Never Know Women," with Lowell Sherman and Clive Brook. What do women want? Wealth, power, fame and love. Here's one who had everything but didn't know till it was almost too late. Then—but you never know women. Also Life, "Cut Price Glory," and Fox News.

NOTE—There will be a show every Thursday starting Apr. 7
COMING—Richard Dix in "The Quarterback."

AN APPEAL

To Thoughtful, Fairminded People on the School Bond Proposition

Let us start from common ground and try to think our way through this question. In common with every other community in our America we acknowledge responsibility for the education of the youth of the community and we mean to provide adequate facilities for that education. The present building equipment of the Charlevoix public schools is not adequate to our present and future needs. The time is not far distance, even if it should now be postponed, when either extensive and costly repairs or some other building program will be forced upon the community by immediate necessity or by the pressure of state educational requirements. These facts are generally recognized.

For a number of years progress has been made toward the time for action by the purchase of land adjacent to the present buildings sufficient for an adequate school site, and a fund of some fifty thousand dollars has been accumulated by a moderate increase in the school tax. A large portion of the tax has been paid and will continue to be paid by property owners not permanent residents of Charlevoix. These people are substantially able to pay their share of the tax and will not be driven away from "Charlevoix-the-Beautiful" when our little city becomes still more beautiful both in appearance and in character by the erection of a new school plant for the welfare of our best asset, the boys and girls of our homes.

The plan proposed has been fully explained and is financially sound, backed by expert opinion and adequate guarantees. It is economical in that it provides for the continued use of the present buildings to the full limit of their usable life with only a moderate outlay of repairs and such changes as will make them more safe, sanitary and with great relief from the present unhealthy and inefficient congestion.

The plan proposed will not increase the percent tax rate which will continue even if the bond issue is rejected which would only mean postponing the problem to be inevitably raised at some future date.

The present proposal has been reached by the joint wisdom of the school board and a committee of citizens appointed to assist the board in making visits to other communities and in collecting all available data. It has their unanimous support. They are our own neighbors, business associates and fellow citizens. We and they have the same things at heart, the welfare of the children of our community, the good name and reputation of our fair city, and the wise and economical expenditure of public funds. They have taken us fully into their confidence, we should take them into ours. We believe they are both trustworthy and competent. If these fellow citizens of ours are not competent, what group could any of us select who would be so?

The time has come to decide this proposition on its merits, with entire freedom from personal or factional influences. The big and worthwhile things of life often demand some sacrifice for their attainment. Let us all be willing to make our share of these sacrifices with cheerful will. Let us make the time came he would prove to the world "that the black magic" of the Middle ages consisted in discoveries, far in advance of Twentieth-century science," and that the books contain information on the origin of life and other mysteries that will stagger the scientific world."

Last September Doctor Newbold died, whether with his task of translation completed or not we do not know; but at a recent memorial meeting in London a most interesting announcement was made. Among the formulæ in the books was a rule for making suits of copper. Doctor Newbold submitted it to a chemist, who said he had never heard of it; but he tried it, and found that it works, though it is too complicated to be of commercial value today.

The budget is interesting for two reasons: it shows that Doctor Newbold's solution of the problem is correct, and it shows that the trinr of more than six hundred years ago had knowledge not common to the time of his day, and that he knew how to win that knowledge down. It shows the appetite of the scientific mind for other secrets that the books may contain.

There is a sort of archeology of learning, of knowledge, as there is of archeology of the more material aspects of civilization, such as architecture, household utensils and armor; and out of its dust heaps long-buried jewels flash from time to time a ray that illumines the horizon and grips the fancy.—Youth's Companion.

"Time"

Observance of the advent of 1927 during this comment by the modern world.

The idea of "absolute" time has, of course, passed. We see now that what we called "time" is merely a name for our own human reaction to varying aspects of the environment in which we find ourselves. Nevertheless, this thought of time as merely human is an essentially modern thought. When our minds reach back with sufficient imaginative concentration through the millions of years of organic evolution which have led up to us, we realize how relatively unimportant are the human stupidities against which cynics rave. How infinitely important is the indubitable fact of our increasing capacity to shape our lives and our world according to our will and desire.

There was a vast desert of time behind us. There is a great stretch of time ahead of us.

Humanity could consciously shape the happenings of 1927 if it sufficiently desired. Humanity can shape its near and remote future when it so desires.

London.—Switzerland will resemble a rainbow when the English crowds arrive with all their new sports clothing.

Skiing, skating and tobogganing suits are brighter than ever. Piccadilly, Oxford and Bond streets are aflame with windows showing the latest models for those who will leave their winter holidays at Davos, Villars and other snow-clad resorts in the Alps.

Most of the outfits for women are knitted knickerbockers and sweaters in every imaginable variety of bright colors. Indian blanket effects and Egyptian influence are discernible in many of the suits, which invariably have caps to match them. Suits with short skirts are offered in less brilliant colors for the more sedate women.

Bacon's Genius Hailed by Scientific World

Five years ago Dr. Wilfred M. Voynich, a collector of old books and manuscripts, brought to this country a set of volumes written on vellum and constituting a sort of encyclopedia of scientific knowledge. At the monastery from which he bought them there was a tradition that they were the work of Roger Bacon, a Franciscan friar who lived in the Thirteenth century and has long been regarded as one of the great scientific minds of the Middle ages.

The books were written in a strange tongue and a complicated cipher, which no one had been able to solve until Doctor Voynich submitted the volumes to Dr. W. R. Ennslow Newbold of the University of Pennsylvania. He found the key and translated at least a part of the manuscript.

It was announced at the time that they show Bacon to have had knowledge both of the telescope and of the microscope. Doctor Newbold is even reported to have said that when the

Thought for Youth

There is an especial duty at middle age to sow the right seed thoughts that will make the latter period of life as beautiful and as attractive as it can be made.

Dependable paints since 1851 at Staley Brothers' Hardware.

Education and Vocabulary

The average vocabulary of a business man's native, so called mechanic is around 10,000 words, whereas a college graduate's vocabulary is about twice as large.

—— PERSONALS ——

Mrs. T. J. Brady was a visitor in Petoskey last Tuesday.

Charles Novak went to Grand Rapids on a business trip last Monday.

Dr. and Mrs. Frank H. Wilkinson were Emmet visitors last Sunday.

Dr. J. Leahy, the optometrist, will be at Hotel Charlevoix Monday, April 4th.

Dr. B. J. Beucker, of East Jordan, was a professional visitor here yesterday.

W. L. Phillips of Grand Haven, spent a little time here early this week on business.

Mr. and Mrs. Harry Bailey of Belsaire, were business visitors in Charlevoix last Friday.

Mr. and Mrs. Thomas Routley of Belsaire, spent Friday and Saturday with relatives and friends here.

Mrs. Irving Leventon, for the past two weeks a visitor in Chicago, returns today via the motor route.

Dr. and Mrs. A. Lawson Baxter and daughters Miss Alice and Charlotte, were Charlevoix visitors last Sunday.

Dan Soule of Belsaire, an employe of the city, and Frank W. Wilkes were business visitors here last Saturday.

Frank M. Sears is on the sick list this week, confined to the house with a bad cold and threatened with an attack of pneumonia.

Billy Paddock, for some days past spending a vacation with relatives here, returns to his student duties at M. S. C. Lansing, Friday.

Captain Harold McCann and Albon Smith were visitors in Traverse City on business Monday, making the round trip by motor following M11.

Mesdames John and Harold McCann, Earl Miller and Albon Smith, were visitors at the "fashion show" in Petoskey last Tuesday.

Captain and Mrs. William C. Taylor returned from their winter vacation last Friday, the major part of which was spent in Florida.

Superintendent George H. Coverdale took advantage of C.H.S. vacation week by making a business trip to Chicago and other points south.

Captain and Mrs. James H. Gallagher and children, Aimee and Margaret, of Boyne City, were Charlevoix visitors last Tuesday afternoon.

Dr. and Mrs. Armstrong are spending a short vacation with daughters Miss Helen in Chicago and Mrs. Dorothy Wantz in Indianapolis.

Miss Lillie Flanders spent the week-end at Harbor Springs, and while there attended the wedding of her sister, Ida Flora, now Mrs. Leslie D. Welsheimer.

Interior decorators are engaged this week at the Central Drug Store, all making for a decided improvement in the appearance of this business place.

Mr. and Mrs. A. C. von Dolcke and children arrived from Detroit a few days ago and are at home in the Lewis cottage, corner Michigan and Dixie avenue.

Visitors from Petoskey, Mesdames Doan Baker and Sherman Castle were guests of the Congregational Ladies Aid Society at the home of Mrs. Clyde Ogdon last Thursday.

George E. Bacon for some months past in the south, part of the time at Sarasota, Fla. and part at Havana, Cuba, returned to Charlevoix last Saturday for a short visit.

Mr. and Mrs. Andy J. McCall Jr., were hosts to a party of twenty or friends last Saturday night. A most delightful time is the general report by those in attendance.

Dan Cannon advised his mother, Mrs. Ida Miller, of this city, recently that he had accepted a position with the government and that he is working in the Chicago postoffice at present.

The Charlevoix-Petoskey bus, commencing with Sunday, April 3, starts its Sunday operations for the season, making regular trips during the summer in addition to the weekday service.

Captain and Mrs. Thomas Bonner, who spent the winter months in Chicago, arrived in Charlevoix last Monday and visited relatives here for a short time before continuing the trip to their home on Beaver Island.

Captain and Mrs. John N. Chambers entertained about twenty-five friends last Monday night. Five tables were formed the principal part of the entertainment and this was followed by the serving of delicious refreshments.

"An Evening With the Radio" is the name of the musical comedy to be given Friday evening, April 1st, 1927, in the high school auditorium by amateur talent. Admission 35c. and 25c. An evening of laughter—do not fail to be present.

The fire department made a run to the Moses residence this forenoon in response to an alarm and call for assistance. Some damage to the roof and interior of the residence in a nominal amount was the result of the blaze which was discovered early and quickly placed under control.

Fishing tugs experienced some difficulty early this week in the outer harbor, due to an icefield that shifted from the open lake to the east shore near the mouth of the river. The field was not very extensive but solidly packed in for some distance making navigation of the pack ice both slow and dangerous.

Miss Ida Flora Flanders, daughter of Mr. and Mrs. Joseph Wm. Flanders, of this city and Mr. Leslie Donald Welsheimer, of Harbor Springs, were united in marriage last Sunday at the latter place where they will make their home in the future.

Tuesday and Wednesday evening pictures of the twenty-eighth International Eucharistic Congress, held in Chicago, were shown at the Princess theatre in Boyne City. Several Charlevoix citizens made the drive to our neighboring city to witness the scenes, and feel well repaid for making the trip.

Grand Chancellor H. E. Vroman and Grand Keeper of Record and Seal, Will E. Hampton were guests of Local K. of P. members last Thursday night. This was one of their periodical visits and in keeping with their regular duties as Grand Lodge officers and making for an interesting and pleasant evening for the officers and members of the order.

Attorney F. H. Dodds of Mt. Pleasant, was a business visitor in Charlevoix last Monday. Mr. Dodds for some years was representative in Washington for this, the Eleventh congressional district of Michigan. During these years he was a frequent visitor in this city. Following his retirement from service in the National house, he resumed his law practice in his home city where he still continues.

Several Charlevoix citizens made the trip to Beulah last week to witness the smelt run and watch the catching of these little fish, which proves to be a great attraction, drawing thousands of people each night to witness the extraordinary scene. Charlevoix visitors were: Eddie, Louis and Marshal O'Donnell, Claire Webster, A. A. Shores, William Higman, Lynn Sheldon, Peter Withers, "Pete" Haight and Kenneth Usher.

G. A. Lisk, publisher of the Charlevoix County Herald, East Jordan, spent the major part of the day here Wednesday awaiting the outcome of an operation performed on Mrs. Lisk at the Charlevoix hospital by Dr. Parks assisted by Dr. McMillan and Dr. H. J. Beuker. Attending surgeons pronounce the operation as being successful and that Mrs. Lisk shows evidence of speedy and complete recovery from an ailment of long standing.

Applications for admission into the 1927 U.M.T.C. in-so-far as the counties of this district are concerned have not been made in any considerable numbers, with several counties as yet without representation and Charlevoix county is one unless such applications have been made within the past day or two. Antrim county has made several applicants; Antrim, five; Crawford, one; Grand Traverse, one; Montmorenci, one; Presque Isle, four. None from Charlevoix, Cheboygan, Emmet, Kalkaska or Roscommon.

Announcement was made last Thursday from the headquarters of the Olivet College Campaign in Detroit of the names of the alumni of the college who will be the officers of the army of workers that will start on May 2 to raise the $1,000,000 sought by the college. Olivet College hopes to celebrate the 53rd year since its founding as one of the first colleges of Michigan, by increasing its endowment to $1,000,000—it now has $250,000 of permanent endowment. It also plans to build a new gymnasium to replace the antiquated frame building that is now used by the students, to secure a central administration and recitation hall, and to raise $50,000 for needed repairs and current expenses. Percy F. Bowers of Olivet has been designated chairman for Northern Michigan.

Government Railroad Reports $1,116,000 Loss

Washington.—While the railroads throughout the United States are enjoying their greatest period of prosperity, the only government-owned line, the Alaskan railroad—continued a loss of $1,116,000 for the year, its general manager reported to the secretary of the interior recently.

Revenues of the road increased by $206,274 during the year, while operating expenses were cut $286,000.

Plans for the completion of the road and purchase of modern equipment call for an expenditure of approximately $12,000

"Sorry, ma'am, but you can't bring your dog into this theater."

"Indeed, sir! My dog is of age and the show can't possibly hurt his morals!"

What the X Signified

Elsie had been rummaging around in the attic and had found a bunch of her parents' old love letters. After reading them, she asked: "What did the X's at the end mean, daddy?"

"They marked the spot where I fell, my dear," answered her father with a sigh.—Ladies' Home Journal.

Will Move in Soon

Irate parent (from head of stairs)—Edith, hasn't that young man any home?

Daughter—He has now, papa. I've just accepted him.

Fleas have very poor eyesight.

PUT ON SOME STYLE

Ethel—She puts on one new dress after another, but never looks well.

May—No; what she wants to do is to put on some style.

Oh, for One Like This!

"I know a chap who saves half his income."

"How does he do it?"

"His wife pays the rent and grocery bills."

A Happy Ending

It was their first quarrel, and it lasted longer than honeymoon squats generally do. But finally it was over, and the wife was confiding to a friend:

"It was terrible while it lasted," she said, "but it was worth it. Just look at the fur piece John gave me."

"Ah!" exclaimed the friend, surveying the gift, "a cloud with a silver fox lining."

"My wife," admitted Lop Lazzenberry of Gosshomely, "is so good tempered, kind and considerate, and such a fine cook, that I let her keep boarders, in spite of my feelings."

Special Offer to Victims of Indigestion

Your Druggist Says Pleasant to Take, Elixir Soon Helps Poor Distressed Stomachs or Money Gladly Refunded.

You can be so distressed with gas and fullness from poor digestion or dyspepsia, but you think your heart is going to stop beating.

Your stomach may be so distended that your breathing is short and gaspy. You belch and pray for quick relief—what's to be done.

Just one tablespoonful of Bare's Mentha Pepsin and speedily the gas disappears, the pressing on the heart ceases and you can breathe deep and naturally.

Oh! What blessed relief; but why not get rid of such attacks altogether? Why have them at all?

Especially when any druggist anywhere guarantees Bare's Mentha Pepsin, a pleasant elixir, to help you or money back.

We Need Ambitious, Industrious Young Men

One of the largest, most successful companies in the country, needs and guarantees to train a few active, earnest young men for permanent positions as salesmen. Good habits and a determination to succeed, starting with a willingness to work and study, will enable you to make a success.

Write at once, stating age, and if under 25 years, give name and address of parent or guardian. Address

Help Kidneys By Drinking More Water

Take Salts to Flush Kidneys and Help Neutralize Irritating Acids

Kidney and bladder irritations often result from sluggishness, says a noted authority. The kidneys help filter this acid from the blood and pass it on to the bladder, where it may remain to irritate and inflame, causing a burning, scalding sensation, or setting up an irritation at the neck of the bladder, obliging you to seek relief two or three times during the night. The sufferer is in constant dread; the water passes sometimes with a scalding sensation and is very profuse; again, there is difficulty in voiding it.

Bladder weakness, most folks call it because they can't control urination. While it is extremely annoying and sometimes very painful, this is often one of the most simple ailments to overcome. Begin drinking lots of soft water, also get about four ounces of Jad Salts from your pharmacist and take a tablespoonful in a glass of water before breakfast. Continue this for two or three days. This will help neutralize the acids in the system so they no longer are a source of irritation to the bladder and urinary organs, which then act normal again.

Jad Salts is inexpensive, and is made from the acid of grapes and lemon juice, combined with lithia, and is used by thousands of folks who are subject to urinary disorders caused by acid irritation. Jad Salts causes no bad effects whatever.

Here you have a pleasant, effervescent lithia-water drink which may quickly relieve your bladder irritation.

Might Have Hit Kaiser

Had Annie Oakley been a poor marksowoman she might have ended the career of the former kaiser of Germany while he was still a crown prince. She was in Berlin with Buffalo Bill's show and she skipped a matinee to accept the crown prince's invitation to go to the palace gardens and shoot a cigarette from his mouth. Standing fifty yards from Annie, the prince lighted a cigarette and took two puffs, then signaled her to blaze away. She lifted her rifle to her shoulder, drew a perfect bead and fired. The bullet flicked the ashes from the end of the cigarette, leaving a four-inch stub sticking in his mouth.

Stop the Pain.

The hurt of a burn or a cut stops when Resinol Ointment is applied. And this ointment usually heals the injury, too. Sold by druggists. 50c to The Z. W. Cole Co., Rockford, Ill.—Advertisement.

No Private Weddings

When people are married in Brazil everybody may come to the wedding. Weddings and funerals are quite the functions in that republic.

Officials arrive before the bride and groom, all the doors and windows of the house, indicating the ceremony is open to the public. A long procession from the home of the bride to the church is an important part of the ceremony. The longer the procession the wealthier the bride or bridegroom. Same way with funerals.—Capper's Weekly.

BLOUSES LAVISHLY TRIMMED; BLACK AND WHITE COMPOSE

FASHION is in a lavish mood when it comes to embroidering the blouse. If you are at gifted in the art of needlework, the blouse of the present is opportunity knocking at your door, coaxing to use your talent to the glory of the present-day modes.

Lovely is a white jersey blouse enlivened with realistic flowers—daisies, buttercups, forget-me-nots and wild roses—done in wool yarns in colors true to nature. When one considers its effectiveness, the simplicity of the work is amazing. Even an amateur need not hesitate to undertake it. A few "lazy daisy" stitches, considerable outlining stitch, a solid worked flower here and there, and presto! you are the possessor of a blouse which will excite both the envy and admiration of all who behold.

There's this about the hand-stitchery of today: it individualizes the garment it adorns. That is, it becomes a very part both of the costume design and its color scheme. In no instance is this so definitely stressed as in connection with the present vogue for black and white. Emphasis for which is sweeping throughout the world of fashion. The smartness of black embroidery on white is artfully told in the two-piece frock here portrayed. At a private exhibit of exclusive modes held by the Fashion Art League of America, this stunning costume occasioned much favorable comment. The skirt is of black satin and the blouse of heavy white crepe de chine, the same harmonized to the black and white ensemble by means cross-stitch embroidery to the finest of crepe de chine meshes.

The mode continues to "say it" most emphatically in black and white and this, too, when colors were never more entrancing. However, since the fashionable wardrobe must contain many costumes for many occasions, black and white plus all the colors of the rainbow are not more than enough when it comes to catering to the whims of milady.

As to the black-and-white mode, without a doubt it is making a record display this season. When it comes to carrying the message of that intangible something called "style," there is no combination quite so con-

Blouse Trimmed With Embroidery.

vincing as black with white. Startling effects as here pictured are the pride this season. An interesting feature in the development of this black-and-white theme is the way the plaits in striking contrast. One notes this treatment not only in connection with the black-and-white compose, but repeatedly when two colors or black and white are used. There's a bit of embroidery on the girdle.

Methods of interpreting the black-and-white vogue are many and varied. Some there are who prefer the strictly tailored costume enlivened with dainty white accessories. A smart black crepe or crepe-back satin frock with a becoming and fashionable flat neckline either V-shaped or square, a rose of pearls and a cluster of white violets on the shoulder, a white fur-collared black satin coat, topped with

Startling Effects Stylists' Pride.

of handsome black embroidery describing a wide girdle and sash effect. The high neck and the button trimming are the last word.

The peasant blouse which abounds in embroidery and smocking is a foremost favorite. These range from sheer white cotton voiles done in vivid

and a black-and-white chapeau of exceeding great chic, this indeed is a costume ideal for spring.

To one aspires to tailored perfection, then choose a short-jacket two-piece tailleur of fine black twill.

JULIA BOTTOMLEY.

Shoes Are Crepe de Chine

Crepe de chine shoes are embroidered in gold for evening wear in Paris. The pastel tones in their patent tints are prominent. The idea is to have the shoes to match the gown.

Charleston Knickers Seen

Feminine fancy leans more and more to the "breeches" and the latest addition to the well-stocked lingerie drawer of the English woman is the "Charleston knickers" made of satin or crepe de chine. These are finished with a deep band of elastic which covers the knee and gives firm support. Dance dresses have a pair to match as no petticoats are worn.

Shawls Embroidered in Gold

For women who do not care for the shawls with large exotic patterns there are strikingly beautiful ones with a shimmering satin background and small conventional motifs embroidered in gold or silver.

THE KITCHEN CABINET

(©, 1927, Western Newspaper Union.)

Why do we worry about the next? We only stay for a day, at the best, a festival. Or a month or a year, at the hostel's behest. In this habitat of clay.

The best will come in the great "to be." It is sure to serve and wait. And the wonderful future we soon shall see, For death is but the gate.

FISH COOKERY

Fish does not require long cooking, nor the slow cooking of varieties of meat. The cooking time of fish are more gristlonous and very tender, therefore they soften quickly under the application of heat.

Most fish would taste better, be more nourishing and palatable if cooked about half as long as the average cook cooks it. This does not mean that any fish should ever be served undercooked. Europeans and Asiatics use fish more freely than we Americans do, and they cook it much more deliciously, with highly seasoned sauces, dressings and stuffings which add to and bring out the flavor of the fish. They take especial care not to destroy the flavor itself by long, slow cooking that toughens the flesh, dries up the natural juices and loses the flavor altogether.

There are so many ways of serving fish acceptably; here are but a few: Baked, broiled or fried, scalloped, mashed, pickled, smoked, spiced in chowders and broths.

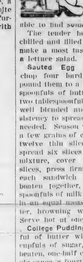
Fish should be served more often than once a week, and that on Friday. Often one is able to get much better fish may other day in the week and at a lower price, as many women think because Friday is required as fish day the fish will be better, when the contrary is true more often, as the market men finds it hard to supply the demand on that day and will buy and store fish for the Friday market.

If the housewife would patronize her nearest fish dealer impartially throughout the week, as she does the grocer and baker as well as the butcher, she would not only help herself but would find that the market costs would be lower. Naturally the man who has a good fish trade only one day in the week will make as much profit on that one day as possible.

Fresh Trout.—In camp nothing in the food line can compare with fried trout or baked in the coals of a camp fire. When frying lay the fresh, newly cleaned and dried trout in hot pan with plenty of butter; brown first on one side, then on the other, adding salt and pepper while cooking. When the fish is done it is ready to serve.

Special Good Things.

Fortunately we are not all alike in our tastes. Food of which one is especially fond will not be at all acceptable to the neighbor. This diversity of tastes gives us many dishes, and he is indeed hard to suit who is not able to find some-



thing to his liking.

The tender hearts of celery well chilled and filled with cream cheese make a most tasty accompaniment to a lettuce salad.

Sautéed Egg Sandwiches.—Finely chop four hard cooked eggs, then pound them to a paste with two tablespoonfuls of butter, adding gradually two tablespoonfuls of cream; stir until well blended and if the right consistency to spread; add more cream if needed. Season with salt, pepper and a few grains of cayenne. Have ready twelve thin slices of white bread, spread six slices generously with the mixture, cover with the remaining slices, press firmly together and dip each sandwich into egg and milk beaten together, allowing two tablespoonfuls of milk for each egg. Sauté in an equal measure of lard and butter, browning well on both sides. Serve hot at once.

College Pudding.—Mix one-half cupful of butter with one and one-half cupfuls of sugar, add four eggs well beaten, one-half cupful of strained apple sauce, a fourth of a teaspoonful of salt and the juice of lemon. Line a pudding dish with plain pastry, fill with the mixture and chill. Serve with or without cream.

Sponge Pudding.—Stir one cupful of flour into a cupful of milk until smooth, set in boiling water and cook. Cool and add the yolks of three beaten eggs, a teaspoonful of melted butter with one-fourth of a cupful of sugar. Cut and fold in the whites of the eggs, beaten stiff. Bake in a well buttered baking dish set into hot water. Bake until puffed and the egg well set. Serve with the following sauce: Cream four tablespoonfuls of butter and add one-half cupful of sugar and a teaspoonful of boiling water; flavor with nutmeg or vanilla; chill before serving.

Toasted Cheese With Nuts.—Cut thin slices of rich cheese a trifle small er than saltine crackers. Arrange the crackers in a dripping pan, cover with the sliced cheese and over each place a half of a pecan nut or English walnut meat. Sprinkle with salt and pepper and set in the oven to brown.

Nellie Maxwell

Geographical Term

The term "the Spanish Main" is popularly given to the Caribbean sea and to the north coast of South America from the Orinoco to Darien. The term is also applied to the shores of the Spanish possessions in Central America.

Uncle Eben

"You can't believe all you hear," said Uncle Eben. "And you'll make it get fooled even if you is deaf an' dumb."—Washington Star.

Beautiful Old City Long Noted Seaport

Probably the most unclonal of all seaports is Jeqpu, on the Mediterranean coast, the soutest harbor to dorpse Jeqe nod for centuries Fqitesiler's most important commercial trading port of antiry.

The name means "The Beautiful," and its situation well entitles it to be so called. It is built on a lofty rocky knoll on the edge of the sea, its fortifications facing seaward, with an encircling wall within which its buildings are crowded tier above tier on hewn out terraces. Surrounding it are the limestone plains of the Shepherds or low country, where are the groves producing the famous datfa oranges, the most luscious and costly the world has yet known, the olive trees which have always furnished much of its trade, the figs and dnue plums, as well as the great wheat fields of the country.

Nature vs. Science

"What's the fuss in the school yard today?" asked a gentleman passing a ward school.

"Why, the doctor's just been around examining us an' one of the defective boys is knockin' the stuffin' out of a perfect kid."

By the Blood of the Cross

By REV. H. OSTROM, D. D.
Extension Department, Moody Bible Institute, Chicago.

TEXT—I determined not to know anything among you, save Jesus Christ and Him crucified.—I Cor. 2:2.

Our key word for this subject is A-N-D. More and more to the revelation of Bible student appears the force and value of single words. Not in the least to neglect the connected sense in the Bible, we see in instance after instance that one word may unlock a whole treasury of truth. If for and water are

Rev. H. Ostrom, D.D.

chiefly needed to make steam with which to drive the great locomotive that it may draw the heavy train of cars, how important is the word A-N-D in the telling forth of this necessity. To say fire alone or water alone would be to say what would leave the engine devoid of power.

So when we read, "I determined not to know anything among you save Jesus Christ and Him crucified," the word A-N-D carries an infinite meaning.

Of all hands men are preaching that a Christ personality, teaching, example are to constitute the incentive to everlasting goodness. They tell us to heed the example and win. We must try to make Him our ideal and forthwith ascend to that. A Gospel? No, indeed. So far from its being good news it is the message of despair. Granted that He is the greatest among men . . . greatest personality, example, teacher, and doer, then (if that is all) the more you tell of Him to men, the more you . . . we admit that I am a failure. By sheer discouragement I am driven to give up the stretch and struggle, allowing my lois to be deeper and deepest loss. It would be as bread higher than I can reach to feed myself upon, a lifeboat sliut off by waves so mountainous I never could swim to it. The bread is good, the lifeboat is safe, but I am undone, and every effort but reveals a further undoing. Such splendor as the life of Jesus discloses would only serve to blind me. And, he has come, I remember, a light into the world. To talk of Him as our great social example whom we are to imitate is to prepare for social anarchy. Let the Decoy fruit and you may avoid despair.

But the Gospel has the A-N-D in it. . . . "A-N-D H-I-M crucified." Here is the dispatch defeating fact. Reducing not the smallest fraction from His Deity-personality, that n-o-t leads us to the crucified. The crucified! That is the sin-bearer. That is the Lamb . . . That is the once-accepted for me. That is my substitute for guilt. That is my provider against discouragement. That is my gospel. And all, all because of love. "He loved me and gave Himself for Himself for me." When He said, "It is come," He was coming to be a sacrifice for us. He offered His very blood, and that sacrifice is once for all. He is living in which dispensation agent and consul general reside; Oslo, Norway, Ingelsa, Panama, legation; San Salvador, Salvador, legation; Bangkok, Siam, legation, and Constantinople, Turkey, legation.

Telescope Warmer

There has recently been invented a method of keeping telescopes and surveying instruments from sudden changes of temperature which are apt to contract or expand the metal parts of the instrument and may spoil the accuracy of measurements made with it.

These delicate instruments can now be provided with a tiny electric stove made in the form of a heating coil wound round the tube containing the lenses. An automatic regulator makes it possible to keep the instrument at exactly the same temperature no matter how the weather may change from day to day, and prevents moisture from condensing on the lenses and blurring the image.

Book Borrowers' Reviews

Persons borrowing books from a new type of circulating library being started in Germany are required to write a review of each volume taken out before it can be returned. These reviews are arranged and analyzed and charts prepared which will form a valuable index for the librarians. Under this system it will be possible to determine the subjects most in demand by the reading public or by special groups. The director of one of these libraries will be able, ten years from now, by looking at his charts, to tell the subjects in which, for instance, women between the ages of eighteen and twenty-five were most interested in reading in 1926.

Another Cause

Judge Xenophon Hicks of Knoxville said in a discussion of the divorce evil:

"Married people are so frank with one another—that's another cause of divorce. They say exactly what they think. Her!

"'Marriage is certainly a lottery,' a wife said thoughtfully, as she looked up from her evening paper. 'One draws a prize, another draws a blank.'

"'Yes, love,' her husband snickered. 'You drew me, I drew you.'"

Self-Conquest

Self-conquest is not easy or pleasant, but there is reward for those who overcome, proportioned to the extent to which they overcome.—Presbyterian.

Young America Armored in Its Sophistication

Left to fend for himself, as he usually makes sure that he is left, the average young American is surprisingly precocious in getting his son begs. If he has had free rein through his last years in high school he has an armor of hardiness and sophistication by the time he reaches college which his father probably did not possess at thirty and his mother may not yet possess.

If he doesn't have it at the beginning of his freshmen year, he will by the end of it. People who still talk sentimentally of "the tender years," meaning the late teens, should read from sixty to one hundred theme a week for five years as I have done, and should hold three hours a week of conferences over anything from the piecing of courses to the expediency of house parties.

At the end of a regimen like that one feels that he knows what is in the minds and hearts of young people. And except for the rare young person who has come up in a home where the right-and-wrong standard was still rigorously applied, and whose case, just because he is not armored like his fellows, is very sad indeed, I do not worry greatly about the mere worldliness of the standard which finds its sanction in experience.

I am still awed by the sureness and the level-eyed poise with which sorority pledgers steer in waters their mothers never dreamed of trying to navigate. They know, these rouged and marcelled seventeen-year-olds, that there is a definite margin of "what you can't get by with," and they are careful not to allow any pretty sentiment or rash impulse to take them beyond that margin.—Avis D. Carlson in Harper's Magazine.

Trade Dollars

The trade dollar of 420 grains troy was authorized by the act of February 12, 1873. It was issued for circulation in oriental countries as a substitute for the Mexican dollar, which it slightly exceeded in weight, but by the terms of the authorizing act it was made legal tender in the United States in sums not exceeding $5. This legal tender quality was withdrawn by the joint resolution approved July 22, 1876, and the coinage was limited to such amount as the secretary of the treasury should consider sufficient to meet the export demand. The act of February 28, 1878, provided for the retirement of trade dollars or subsidiary silver. For six months after the passage of the act they could be exchanged at the treasury or any subtreasury, dollar for dollar, for standard silver dollars or subsidiary coin. The total number of trade dollars coined was $5,360,10.4.

United States Abroad

The United States owns embassy or legation buildings in the following countries: Rio de Janeiro, Brazil, embassy; Santiago, Chile, embassy; Peking, China, legation; San Jose, Costa Rica, legation; Havana, Cuba, embassy; Prague, Czechoslovakia, legation; Paris, France, embassy; London, England, embassy; Tokyo, Japan, embassy (destroyed by earthquake; government owns land on which it will be constructed a building, for which a little more than $7,000,000 has been appropriated); Mexico City, Mexico, embassy; Tangier, Morocco, building in which diplomatic agent and consul general reside; Oslo, Norway, legation; Panama, legation; San Salvador, Salvador, legation; Bangkok, Siam, legation, and Constantinople, Turkey, legation.

SHAKESPEARE-DICKENS

(Continued from page 1)

plain song into what is now known as the Gregorian chant music.

A choir composed of members of the two clubs with Mrs. Stelter at the organ illustrated the different features of Mrs. Livingston's paper. Two parts of the "Mass of the Angels" written by St. Gregory were sung in a most impressive manner. Mrs. Clinton Cooper explained the different parts of the Mass in a manner that revealed much of the sympathetic spirit of worship in music and the inner harmony of music in church worship.

The next composer presented was Palestrina who in the Renaissance of the Sixteenth century, restored the entire system of church music. A Motet was sung to show how the presence of a soul in song immortalized his music.

The greatest impetus in the development of sacred music was the Protestant Reformation and Martin Luther was the leading spirit and the founder of Choral music and hymns which for the first time was sung in the language of the people. Choral music added the finish to the Oratorio and the choir sang as an illustration of this feature the choral "Since by Death Came Man" from the Messiah. The oratorio, passion music, sacred drama and anthems were discussed and the trio "Lift Thine Eyes" from Elijah was sung as an illustration of the latter which had its origin in the Church of England.

The Gregorian music and the Psalm tunes or Angelican Chant of the English Church are perhaps the most noble feature of church music. The "Te Deum Laudanus" from the Episcopal church was sung.

The meeting closed by a most interesting work of the Shakespeare-Dickens Club in the study of Shakespeare's Julius Caesar, with the chorus of women's voices coming in on the verses of the hymn. The meeting closed by the singing of the hymn "Sun of My Soul Thou Savior Dear," by Kehle.

INDIAN RED BUGS RICHLY ENDOWED

Wealthy Banker Leaves $100,000 for Rest Homes.

Allahabad, India.—One hundred thousand dollars for a home of rest for bugs (the irritating Indian red bug) is the strange legacy left by a Marwari banker millionaire named Seth Buddhimal, who died recently in India.

Seth Buddhimal set aside a quarter of a million rupees (which is roughly $100,000 real money) for the building and maintenance of three resthouses for insect ease, in each of which a special room is to be set aside for the preservation of red bugs.

The red bug is a well-known Indian pest, encroaching everywhere in railroads, trolley cars, automobiles, houses, and, in fact, wherever human feet tread, the bug creeps in to disturb the peace and quiet of the evenings. The Seth banker demanded that in the red bug rooms at his resthouses, pest travelers should be paid for the "service" of sleeping in them at the rate of a rupee, $1 per two bugs.

There is of course a catch in this. If at any time a poor unfortunate bug be found dead, through the unconscious spurming of the paid visitor, or otherwise, the traveler loses his dollar.

There are at present some 250 "red bug rooms" in the resthouses of Rajputana state, but the occupants thereof are not paid for the privilege of their company. They are more or less "quarantined" for the benefit of the non-infested travelers who use the resthouses. But while it has been a time honored custom to provide "bug rooms" for resthouses, no such valuable legacy has been left for many years in this part of India, and certainly no such legacy which sensibly considers the feelings of the bugs.

Believe Rich Copper Vein Found in Canada

Timmins, Ont.—Interest is running at fever heat over the first geological report of what may be the biggest copper strike ever made in the north country in the Kamiskotin lake gold area.

"Anything from 60 cents to $30,000,000" was the only declaration of possible wealth George Scott, geologist, would give. "It may be worth a fortune and may be a washout."

Mr. Scott accompanied George Jamieson, prospector, to the district and made a survey of the vein. Comparing it with the Flin Flon and Horne camps, Mr. Scott said in his opinion the Kamiskotin find appeared to have better prospects. "Every new discovery of sulphides in the area, no matter how small, will be of unusual interest," states the geologist.

He has been in and out of the Kamiskotin lake area three times within the last few weeks, and on his second trip he would have staked a claim on his own behalf in Jamieson township if he had been able to persuade the men accompanying him to cross the Mattagami river on an improvised raft.

Freak Chickens Subject of Study by Zoologist

Philadelphia.—Chickens with two wings and four legs and even with four wings and four legs, and a duckling squarely symmetrical, were studied by Dr. F. E. Chidester, professor of zoology at West Virginia university, who described observations to the American Society of Zoologists meeting here.

The freakish external features of the birds were found to be coupled with odd internal structures. Four kidneys were found in some of the birds, double ureters in all of them, and frequent variations in some of the digestive tubes. The gizzard, however, remained single, nor was there any evidence of duplicity in the heart or respiratory apparatus.

Moved by Ald Bridge, seconded by Ald Eckinger that the bills be allowed, motion carried by the following aye and nay vote. Ayes—Ald Bridge, Eckinger, Gelken, Howe, Livingston. Nays—None.

The matter of tax title held by Lisle Shanahan was referred to the Finance committee with full power to act.

Moved by Ald Bridge seconded by Ald Eckinger, that the "matter of purchasing a site be referred to the Mayor, Electric and Water committees with full power to act. Motion carried by aye and nay vote as follows: Ayes—Ald Bridge, Eckinger, Gelken, Howe, Livington. Nays—None.

The following persons were elected inspectors of the election to be held in said city on Monday the 4th day of April, A. D. 1927: E. E. Cross, Maggie Novak, Milo Miller, D. S. Payton, G. C. Gelken, Josephine Mudill.

On motion duly made the council adjourned.

Chas. H. Lamphear, City Clerk.
By D. S. Parton, Deputy.

"Sent to Coventry"

This phrase, which is in quite general use in English schools, means to ignore a person absolutely. The generally accepted explanation is that the citizens of Coventry objected at one time to the soldiers sent to the town. They treated them with silent contempt, and for a soldier to be ordered to the town meant little less than a mild excommunication.

Druggists' Mortar Old

The druggists' mortar, which has come down to modern generations almost unchanged in shape, can be traced back to prehistoric times. The mortar in its present shape was used centuries before medicine was known as an art, and was used to crush hard bodies. It was used by savages as well as civilized peoples.

LEGAL NOTICES

MORTGAGE SALE

Default having been made in the condition of a certain mortgage executed by Michael C. Birnkrant (a single man) of Detroit, Michigan, unto Llewellyn S. Sea of Warnsgring, Oregon, and Charles E. Sea, of Charlevoix, Michigan, dated August 26th, 1925, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, October 9th, 1925, in liber sixty-three of mortgages, page one hundred and sixty-five, on which mortgage there is claimed to be due at the date of this notice the sum of Two Thousand One Hundred Fifty and 39-100 Dollars including the principal sum due with interest, together with an attorney fee of thirty-five and No-100 Dollars as provided for by the said mortgage and no suit or proceedings at law having been instituted to recover the money secured by the said mortgage, or any part thereof, and whereas the taxes required by the statutes to be paid on said mortgage premises are described in said mortgage as follows, to-wit: Commencing at the northeast corner of lot one in block six of the recorded plat of the village (now city) of Charlevoix, Michigan; thence south forty-two feet two and one-half inches along the east line of said lot one; thence west ninety-six feet along the party wall line of the said joining parcel of land on the south and bounding to a point in the west boundary line of a public alley running north and south through said recorded plat of the village (now city) of Charlevoix, Michigan; thence north forty-two feet two and one-half inches along the west line of said alley to a point in the north boundary line of said lot one; thence east ninety-six feet along the north line of said lot one to the point of beginning, and subject to an easement of a public alley fourteen feet in width on the west side of said lot one, and subject to the rights of wall agreement concerning the party wall between the above described lot and the said parcel adjoining immediately south, together with the hereditaments and appurtenances thereunto belonging or appertaining, and whereas

MORTGAGE SALE.

Default having been made in the conditions of a certain mortgage executed by Eugene Ross, a bachelor, and Clark Slevoix, Michigan, unto Rudolph C. Korth, of Charlevoix, Michigan, dated the 24th day of August, A. D. 1925, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, on the 28th day of August 1925, in Liber 62 of mortgages on page 242, the description contained in said mortgage having been corrected by a mortgage executed by said George Ross to said Rudolph C. Korth, dated the 4th day of October, 1926, and recorded in the office of the Register of Deeds of Charlevoix County, Michigan, on the 8th day of October, 1926, in Liber 63 of mortgages on page 200, on which mortgage there is claimed to be due the sum of two hundred fifty five and 73-100 ($255.73) dollars including interest computed to the date hereof and also an attorney fee of twenty five ($25.00) dollars provided for in said mortgage, and no suit or proceeding at law having been instituted to recover the money secured by said mortgage or any part thereof.

Therefore, by virtue of the power of sale contained in said mortgage and the statute in such case made and provided, notice is hereby given that on the 20th day of June, A. D. 1927, at the east front door of the Court House, in the City of Charlevoix, Charlevoix County, Michigan, that being the place where the circuit court for the County of Charlevoix is held, the premises described in said mortgage or so much thereof as may be necessary to pay the amount due on said mortgage with seven per cent interest and the attorney fee as in it with an attorney fee of twenty-five ($25.00) provided for in said mortgage, which premises are described in said mortgage as follows, to-wit: Commencing at the southeast corner of the southwest quarter of section twenty-three (23), Township four (34) North Range eight (8) west; thence west 30 rods to a point which is the starting point; thence north 80 rods; thence west 10 rods; thence south 80 rods; thence east 10 rods to place of beginning, situate in the Township of Charlevoix, County of Charlevoix and State of Michigan.

MARCH OF MONGOLS HELD RECORD FEAT

Not Duplicated by Cavalry in Any Age.

A march of 90 degrees of longitude was made by the Mongol Horde of Genghis Khan early in the Thirteenth century. It was the most remarkable feat performed by cavalry in all history.

Starting from the northern Gobi, 1,000,000 horsemen crossed the ranges of Central Asia, passed over the Khali Kum desert, took Samarkand and Bokhara, went through the Hindu Kush and looked in on Delhi, turned west over modern Afghanistan and northern Persia, including the great salt desert, continued on west into a corner of Armenia, turned north and passed through the Caucasus, entered the Russian steppes, swung down into the Crimea on the Black sea, and then Europe as far as the Dnieper river, then returned to the Gobi through the heart of what is now Russia.

This trek of a wandering army is remarkable in itself. The great salt desert of the route lay through hostile country, and battles were the order of the day. Moreover, the march from Afghanistan westward was made by two of the Mongol Empire's great marshals, Subotai and Chepe Noyan—with two and a half thousand men. Genghis, himself, directed the main body of the army.

They were ordered by Genghis Khan to set out in pursuit of the Mohammedan monarch, and to keep on going wherever he went in the world and not to come back until he was dead. They did.

Many of us have been given the impression that Genghis were a mighty people, vast multitudes moving over and conquering half the world. Also that the Mongols were Chinese.

They were no more Chinese than the Arabs are Turks. They conquered Thirteenth-century China. The Horde was a disciplined body of cavalry that could go anywhere.

It was uniting. As for its rate of progress, Subotai once galloped with 20,000 men 200 kilometers in a little less than three days. It was handled with all the genius of Genghis Khan and Tsi vetemia Engles, who was himself waged war for a generation in China. The victories gained by the Mongols—invariably, swiftly, and with terrible losses to the foe—seem incredible until we reflect that the same armies of the Middle ages were accustomed to fight in compact masses, almost standing their ground or charging. The Mongols fought in extended detachments and their bows outranged anything opposed to them.—Harold Lamb in Advenure Magazine.

Easy to View Scenery

Tourists are able to enjoy an unobstructed view of the scenery along the Apache trail in Arizona from a limber seat with a top that slides back, converting the vehicle into one of the open type in a few seconds, says Popular Mechanics Magazine. The roof is made in sections of light steel. The units are operated by chains with a crank controlled by the driver. When pulled back they rest over the baggage compartment. At the slightest indication of stormy weather, the driver can crank the three sets of sections back into position above the passengers. Reclining seats also aid the occupants, as they permit a more level look without discomfort. The sliding top has been designed to eliminate rattling regardless of its position.

Protected Animals

By far the greater number of game animals in the national forests of California, new Mexico and Colorado are protected. There are more than 500,000 deer in these forests, out of a total of about 700,000 big game animals.

Girl Rescues Puppy, Twits Male Cowards

Poughkeepsie, N. Y.—Biff Baff, white puppy owned by President Henry Noble MacCracken of Vassar college, was saved from drowning by heroism of Celeste Corcoran, twenty-year-old senior of Springfield, Mass.

The rescue was staged on Sunset lake, the campus scene of student aquatic sports, while several men stood about the shore watching the puppy drown.

Biff Baff likes to chase sticks thrown to a distance. Following one thrown by a man he came to a hole in the ice. He tried to stop, but skidded on into open water. As he tried to climb out the ice broke under the weight of his paws.

Miss Corcoran heard his cries and strode out on the cracking ice. One of the long few feet to reach the dog. She pulled him from the water by the nape, wrapped him in her cloak and made her way back to shore without mishap other than wet feet.

BRIDE ACTS AS LOOKOUT WHILE HUSBAND STEALS

Couple Confess to Having Committed 25 Burglaries in and About New York City.

New York.—A young man and his bride of a few months, arrested in Jersey City as suspicious persons, confessed to having committed twenty-five burglaries in Hudson county in the last month. They are Alex Black, twenty-three years old, alias Alex Jessup, of 442 Pacific street, Brooklyn, and his wife, Elizabeth, twenty-one.

The bride, police said, usually acted as a lookout while her husband forced his way into apartments. Seventy-two pawn tickets were found in their possession, representing loot valued at from $10,000 to $15,000, the police said. A Jimmy also was found on the bandsman.

For several hours after their arrest the two offered a variety of defenses and explanations for the possession of the pawn tickets, but when the husband's police record was produced, showing a half dozen arrests and one conviction, they broke down and confessed.

Catch Twenty-Four-Pound Trout.

The largest catch this year was a trout weighing twenty-four pounds. Eighteen others weighed twenty pounds or more, but their size is made by the average weight. . . .

As soon as the snow falls there is an end of hiking, skating, and another unusual sport takes its place. This is the hurling of coins by spectators. Though there must be a hard frosty crust before it is safe to try speeding on the Emile and Lac La Roche.

There are tens of thousands of coyotes in the district. A large number of these cross Lac La Roche on ice at a speed that would leave a horse far behind, but is still very inferior to that of the automobile. Early one month has a chauffeur and three or four riflemen out in it as possible to drive close to the coyote while his wife remained on guard in the hallway. Not once in the coyote rifle robberies did they encounter difficulty.

Protected Animals

By far the greater number of game animals in the national forests of California, new Mexico and Colorado are protected. There are more than 500,000 deer in these forests, out of a total of about 700,000 big game animals.

Big Cattle Ranches

The largest cattle ranches are in Texas, where there are several with a herd of thirty-five and more. The largest number of range cattle are in California, new Mexico and Colorado.

FISH SKATING POPULAR SPORT

Men and Women of Canadian Northwest Take Part in Sport.

Vancouver, B. C.—Fish skaters are having an unusually successful season this year on Lac La Hache, in the Cariboo district of northern British Columbia. The ice, which forsaed during the first cold snap before the snow flurries came, is transparent over the length of the entire lake and a width of two miles, and the fish are easily spotted in the clear blue waters beneath the frozen surface.

So far as is known, Lac La Hache is the only place in the world where fish are caught on skates, and even there the sport is only possible when there is no snow. As a business enterprise it might not yield heavy dividends, but as an outdoor attraction it has few peers.

Lac La Hache is situated in a cattle country, and the cowboys were among and young women have spent much of their winter months. Many of them are brilliant skaters and nearly all can travel three times the fast as a man, whose speed is usually much overestimated.

"Chasers" and "Spearers."

In skating on the ice-fishing are divided into two groups, the "chasers" and the "spearers." The chasers go to the side of the lake where the fish are known to congregate in winter and scoot around until they discover a school. By beating on the transparent ice with branches or sacks they frighten the fish into resting place and then chase it across the lake. A spearer of the fish dive into deep water, but the majority stay close to the surface, twisting and turning as they watch their pursuers through the clear ice, their goggle eyes almost bursting from their heads as they see the branches and sacks moving in their direction.

Forced to swim much faster than their normal speed, the fish soon tire. It is then a comparatively easy matter to steer them toward long trenches cut in the ice at the edge of which stand the "spearers" all ready for action. As soon as a fish strikes this bit of open water it loses nearly all its maneuvering power and is easily speared.

Automobiles have been tried on some parts of the lake, but the uneven surface of the ground, even under snow, has made the sport rather costly. There is also a shortage of gasoline during the winter, from a sporting point of view.

Lac La Hache is not the only one of either of these drawbacks. Even when the coyotes are killed off in one district another is overrun with them from the neighboring forests where the supply is apparently inexhaustible.

HIGH SCHOOL ON APPROVED LIST

By recent action of the Committee on North Central Schools the Charlevoix high school has been placed on the approved list of the North Central Association of Colleges and Secondary Schools. Under date of March 31st notification of this action was forwarded to Superintendent Coverdale. The letter in part, follows:

Ann Arbor, March 31, '27.

My Dear Mr. Coverdale:—The Michigan Committee on North Central Schools is pleased to inform you that your school was placed on the list of approved schools of the North Central Association of Colleges and Secondary Schools. This action was taken at a meeting of the Association held in Chicago, March 15-18. A certificate of approval will be furnished your school within a few weeks. It is the recommendation of the Committee that this certificate be framed and hung in a prominent place in your school in order that teachers, pupils and patrons may know the high rank that has been recorded your school by the Association.

The Michigan Committee desires to congratulate your school on securing recognition by the North Central Association. Very truly yours,

J. B. EDMONSON,
Com. Chairman.

THE parent company of the associated companies of the Bell system will expend during the present year a total of $365,000,000 for gross plant additions.

This sum would pay the entire construction cost of the Panama Canal, exclusive of expenditures for military fortifications, and leave a sufficient balance to have paid the original agreed price of the Louisiana Purchase.

The total includes the following expenditures: Land and buildings, $33,000,000; central office equipment, $100,000,000; station equipment, $80,000,000; exchange lines $110,000,000; toll lines $58,000,000.

FALLS ON EACH

TAX BURDEN CARRIED BY ALL

POOR MORE THAN THE RICH

Everybody Who Pays Rent or Goes to Theatre, Pays Taxes

Showing how the burden of taxation falls upon everyone, rich and poor alike, Professor William B. Munro, chairman of the division of History, Government and Economics at Harvard, says:

"Everybody who pays rent pays taxes. The landlord is merely a middleman who collects the taxes from his tenants and passes the lump sum to the city collector. Everybody who buys merchandise pays taxes. The retail merchant passes his burden along to his customers in the price of his goods. So with everyone who travels on a street car, or goes to the theatre, or smokes a cigar. They all pay taxes, whether they realize it or not.

"The rich kind of material is here for the building of teams equal to any in all athletic games but the simple fact that a suitable place has not been provided for preparatory work and in which to stage even and comfortable care for patrons has been a source of hindrance to students and annoyance to those who enjoy witnessing the various games.

"This proposition is one of special interest and has been under discussion by the entire public for some weeks. Naturally it has many supporters and many others who take the opposite view. Therefore the vote for and against will probably be large, registering practically the entire strength of the district.

BOND ISSUE UP TODAY

One Hundred Twenty Five Thousand Dollars Asked

Qualified electors are expressing their views by ballot today on a bonding proposition in the sum of $125,000, the fund to be used in the construction of a new gym with several rooms in connection to be used for school purposes.

Athletically inclined students have been seriously handicapped for all time past due to the fact that Charlevoix has never furnished a suitable place for students use in which to carry on their practice work, and much less so for fans and followers of athletic events, thereby differing with other high schools in surrounding territory.

That a good big gym building is desired and essential for the benefit of the Charlevoix schools, something adequate for present and future needs, is generally conceded and must be admitted if Charlevoix students take and maintain a place in the forefront of athletic events and contests in this region.

The right kind of material is here for the building of teams equal to any in all athletic games but the simple fact that a suitable place has not been provided for preparatory work and in which to stage even and comfortable care for patrons has been a source of hindrance to students and annoyance to those who enjoy witnessing the various games.

This proposition is one of special interest and has been under discussion by the entire public for some weeks. Naturally it has many supporters and many others who take the opposite view. Therefore the vote for and against will probably be large, registering practically the entire strength of the district.

CHIEF HONORED, THEN EXECUTED

Chinese Justice Moves Swiftly in Case of Convicted Traitor.

Hsinkin, Manchuria.—Sleek and prosperous, smiling at the recollection of the honors just heaped upon him in the capital city of Mukden and hoping to be back in his home city, where he owned a luxurious mansion, where he was a heavy investor in real estate and a theater magnate, and where his beautiful wife was awaiting him, General Yangwufen, the Chinese vice premier of the Chinese Eastern railway, alighted from his special car here one morning recently.

The next morning his body lay in a rude coffin set out on the bleak plain at the edge of the city used as a garbage dump. The man that was his was condemned to the coffers of Chang Tso-lin, Hsi-liang, and possibly others were stripped away and he died before a firing squad, a convicted traitor.

Such is the way justice moves in China.

Was Backed by Moscow.

Information had reached Chang Tso-lin that the man he had executed and placed in high office in Harbin was plotting a revol

Death Faster Than Airplane

By airplane and train Donald Saltmarch made the three weeks' journey from Teheran, Persia, to Staines, England, in nine days, only to find that death had won the race to his mother's bedside. Saltmarch was traveling for a London firm, who intercepted the wireless regarding his mother's condition, and cabled him. He flew over the mountains near the Caspian sea to Baku, and from there took a train to Moscow. After being delayed and humiliated by Russians he reached Finland and arrived home by way of Germany.—Philadelphia Inquirer.

Cole's Carbolisalve Quickly Relieves and heals burning, itching and torturing skin troubles. Don't suffer. Get a jar of Cole's Carbolisalve today. 30c and 60c. Ask your druggist, or send 30c to The J. W. Cole Co., Rockford, Ill., for a package.—Advertisement.

A Warning

"Whereof you get that black eye?" asked Smith.

"I got it," growled Jones, "as a result of asking another man where he got his."

Even the devil never puts off till tomorrow what he can do today.

BABIES CRY FOR "CASTORIA"

Prepared Especially for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 30 years as a pleasant, harmless substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups. Contains no narcotics. Proven directions are on each package. Physicians everywhere recommend it.

The genuine bears signature of

Chas. H. Fletcher.

DODD'S PILLS
DIURETIC STIMULANT TO THE KIDNEYS
Standard for Generations.

Mrs. Della Olson, of New London, Wis., writes:

"I was afflicted with rheumatism for years. There was a gravel deposit in the urine, and I had frequent headaches. I had dark circles around my eyes, and felt tired all the time. I was advised to take Dodd's Kidney Pills and am glad I did, for I secured quick relief and think they are a wonderful remedy."

Buy a box today, 60c, at your drug store or the Dodd's Medicine Co., 709 Main St., Buffalo, N. Y.

Special Offer to Victims of Indigestion

Your Druggist Says Pleasant to Take. Elixir Must Help Poor Distressed Stomachs or Money Gladly Refunded.

You can be so distressed with gas and fullness from indigestion or dyspepsia that you think your heart is going to stop beating.

Your stomach may be so disturbed that your breath is almost gone.

You are dizzy and pray for quick relief—what's to be done.

Just one tablespoonful of Dare's Mentha Pepsin and speedily the gas disappears, the pressing on the heart ceases and you can breathe deep and naturally.

Oh! What blessed relief; but why not get rid of such attacks altogether? Why have them at all?

Especially when any druggist anywhere guarantees Dare's Mentha Pepsin, a pleasant elixir, to help you or money back.

Sam Bass, Who Came From "Indianny"

END OF THE TRAIL OF SAM BASS

RANGERS ON SCOUT IN BIG BEND COUNTRY, WEST TEXAS

Sam Bass was born in Indianny,
It was his native home;
And at the age of seventeen
Young Sam lowed he would roam.
He took to flat cars Texas,
A cowboy for to be—
A better-hearted fellow
I know you'd never see.
—Old Cowboy Song.

By ELMO SCOTT WATSON

THAT is one of the many verses of a song that has been sung along the cattle trails or around the camp fire of every round-up camp from the Rio Grande to the Canadian line; to its strains the night herder lulled his restless charges to sleep; and it was a prime favorite of every wandering troubadour whose battered old ukulele or guitar and gift of song assured him of a warm welcome from the lonely inhabitants of some sod shanty on a government claim in the wind-swept West.

The Sam Bass song takes almost equal rank with the one about Jesse James as the most distinctively native American ballad. For what Jesse James was to Missouri, that, Sam Bass was to Texas. The other day press dispatches carried the news that the University of Texas was collecting material about her most famous outlaw because without the story of this picturesque figure the history of the Lone Star state would not be complete.

But Texas alone cannot claim him for her own. The states of Indiana, South Dakota, Nebraska, Kansas and Oklahoma all had a share in the Odyssey of this Robin Hood hero. In a broader sense he belongs to all America because in a figure in the pageant of the American frontier he symbolizes so well our frontier type—the outlaw, whose brief and stormy career inevitably ended in this paraphrased epitaph "Sic transit, sic gunibus."

Although Sam Bass has been dead less than fifty years, around his name already has collected a name of myth and legend until it is difficult to know where fact leaves off and fiction begins. Perhaps the most authoritative account of his life is that contained in a book recently issued by the Yale university press which is doing a notable work in preserving Americana outside of the usual fields of historical research. The book is "Six Years With the Texas Rangers" by James B. Gillett, which, although it does not pretend to be a complete chronicle of the Texas Rangers, gives an interesting cross section of the history of one of the most remarkable bodies of law enforcement officers the world has ever known. In the chapter on "Sam Bass and His Texas Robber Gang," Captain Gillett tells of this outlaw hero of song and story as follows:

Sam Bass was born in Indiana, on a farm near Mitchell, Lawrence county, July 21, 1851. He came to Texas while a young man and worked for W. F. (Dad) Egan, sheriff of Denton county, until he reached manhood. While still an exemplary and honest young man, Bass came in contact with a race horse and a little different mare. Monday evenings, when most of the neighboring boys met in Denton, Bass raced his pony with much success. Mr. Egan soon noticed that Sam was becoming to neglect his work because of his pony and, knowing only too well what this would lead to, he advised Bass to sell his mare. Bass hesitated, for he loved the animal. Finally matters came to such a pass that Mr. Egan told Sam he would have to get rid of the horse or give up his job.

Bass had Denton county in the spring of 1877 and traveled to San Antonio. Here many cattlemen were gathered to arrange for the spring cattle drive to the north. Joel Collins, who was planning to drive a herd from the Uvalde county to Deadwood, Dakota, hired Bass as a cowboy. After six months on the trail the herd reached Deadwood and was sold and all the cowboys paid off by Mr. Collins.

At that period Deadwood was a great, wide-open mining town. Adventurers, gamblers, robbers and cutthroats all mingled together. Those of the line bought his cattle on credit and owed the greater part of the money he received for them to his friends in Texas, he gambled it all away. When he wound up and realized the money was gone he did not have the moral courage to face his friends and creditors at home. He became desperate, and with a band of his cowboys held up and robbed several stage coaches in the Black Hills. These robberies brought Collins very little booty, but they started Sam Bass on his criminal career.

In the fall of 1877 Collins, accompanied by Bass, Jack Davis, Jim Barry, Bill Heffridge and John Underwood, better known as Old Dad, left Deadwood and drifted down to Ogallala, Neb. Here they met Joe Sparks, who had with him a herd of cattle and one of his boldest train robberies that had ever occurred in the United States. When they were ready to start Sparks, heavily armed and mounted, held up the Union Pacific train at Big Springs, a small station a few miles beyond Ogallala. The bandits entered the express car and ordered the messenger to open the safe. The latter explained that the through safe had a time lock and could only be opened at the end of the route. One of the robbers then began to beat the messenger over the head with a six-shooter, declaring he would kill him if the safe were not opened. Bass, always of a kindly nature, pleaded with the man to desist, declaring he believed the messenger was telling the truth. Just as the robbers were preparing to leave the car without a cent, one of them noticed three small little boxes piled near the big safe. The curious bandit seized a coal pick and knocked off the lid of the top box. To his great delight he exposed $20,000 in shining gold coin. The three boxes each held a similar amount, all in $20 gold pieces of the mintage of 1877.

After the robbery these boys, the robbers went through the train, and in a systematic manner robbed the passengers of about $5,000. Before daylight the bandits had hidden their booty and returned to Ogallala. They hung around town several days while railroad officials, United States marshals and sheriffs' posses were scouring the country for the train robbers.

Suspicion fell on Sparks after the robbery, Collins and his men frequented a two-story frame merchandise store, together which was a clerk by the name of Leech who had once been a messenger on the Union Pacific and who was well acquainted with the officials of the company. Of course the great train robbery was the talk of the town. Leech conversed with Collins and his gang about the holdup, and the bandits declared they would help hunt the robbers if there was enough money in it. The suspicions of Leech were aroused and he became convinced that Collins and his band were the real holdup men. However, he said nothing to anyone about this belief, but secretly

LIEUT. WM. REYNOLDS

J.B. GILLETT, TEXAS RANGER

Pictures, Courtesy Yale University Press.

Bass' most trusted lieutenant. About the same time as this 5-Mile Pete captured Dyer, Herndon and Jim Murphy and drove Bass and his two remaining companions out of northern Texas.

By mid-summer of 1878 the climax of Bass's career was approaching rapidly. Jim Murphy was persuaded by the rangers to turn traitor and to return to the bandit leader for the express purpose of betraying him. Eventually Murphy sent word to General Jones, commander of the Texas Rangers, that Bass and his comrades were planning to rob the bank in Round Rock, a little town less than twenty miles from Austin, the state capital, where Jones had his headquarters and where at the time he was with nine Texas rangers.—Corporal Vernon Wilson and Privates Dick Ware, Chris Connor and George Herold. Jones immediately went to Round Rock with Ware, Connor and Herold and upon his arrived notified Deputy Sheriff Grimes that the Bass gang was going to rob the bank but that he (Grimes) should take no attempt to arrest any strangers who came into town until Lieutenant Reynolds and his men of Company B (among them Corporal James B. Gillett) had arrived from San Saba where Corporal Wilson had been sent to order them to Round Rock.

Bass had decided to rob the bank on Saturday, July 20, and on Friday morning he rode into town with his two companions, Jackson and Barnes, to take a look at the bank and to plan the route of their getaway on horseback.

They went up the main street of the town and entered Coupral's store to buy some tobacco. As the three bandits passed into the store, Deputy Sheriff Moore, who was standing on the sidewalk with Deputy Sheriff Grimes, said he thought one of the newcomers had a pistol.

"I will go in and see," replied Grimes.

"I believe you have a pistol," remarked Grimes, approaching Bass and trying to search him.

"Yes, of course, I have a pistol," said Bass. At the words the robbers pulled their guns and killed Grimes as he hooked away to the door. He fell dead on the sidewalk. They then turned on Moore and shot him through the lungs as he attempted to run into the store.

At the crack of the first pistol Dick Ware, who was sitting in the store, grabbed his rifle and, rushing to the door, opened fire on the bandits. Moore was also quick to see and grasp the significance of the situation and, being armed with a six-shooter, he, too, opened fire on the bandits. Other citizens, scared by the excitement, followed suit, and, for the first time in many years, universal peace reigned in Round Rock.

Meantime, in France, Bonaparte was forwarding his personal ambitions to such good effect that, when the project of crowning him emperor of the French was broached, it was carried by a popular vote of 3,500,000 to 2,000. He sent for Pope Pius VII to crown him at Paris amid imposing ceremonies, December 2, 1804, but at the last moment he snatched the imperial diadem from the pope's hands and crowned himself. He then placed the crown on the head of Josephine, his wife. The following year he became king of Italy as well.

And now came a change of character so remarkable as to support the old rumor that Bonaparte the general and Napoleon the emperor were two different men. Even being shy, lean and silent, Napoleon grew assertive, fat, talkative. The rigid, temperate simplicity of early days gave way to court etiquette, pomp and imperial splendor. His court was brilliant and extravagant.

England, resenting certain of France's annexations, declared war, and Napoleon prepared to invade Great Britain. But Russia, Austria and Sweden formed an alliance with England and the plan was changed. Napoleon, with 180,000 men, crossed Bavaria, took Vienna and met the combined Austrian and Russian armies at Austerlitz. Each of the three armies was commanded by an emperor. After a long and bloody battle Napoleon defeated the allies with fearful loss. The dim-witted Dragon at Jena and Auerstadt and captured Berlin. Russia's army was punished by Prussia's aid, but Napoleon met and overwhelmed it at Friedland, June 14, 1807, and forced the czar to sue for peace. He next conquered Spain and Portugal, and extended his conquests throughout the continent of Europe. He made his brother king of Spain and his brother-in-law king of Naples, and lavished similar royal honors on others of his family.

Spain, dissatisfied that a low-born Corsican should rule it, revolted. England and Portugal allied themselves with the Spaniards and the "War of the Peninsula" began. The British army being commanded by Sir Arthur Wellesley, afterward duke of Wellington. Austria took this time to rise against Napoleon. The emperor hurried an army across the frontier and inflicted a crushing defeat on the Austrian host at Wagram, July 6, 1809. He next defeated Russia and made peace to the beaten country. Nearly all the world was now at the Corsican genius' feet.

Yet he was far from satisfied. He saw that he had overreached himself through sheer strength; Austria's action had taught him that the instant his back was turned the kaiser and his cohorts would spring at him like wild animals at their trainer. He knew that, even while kings and countries cringed to him, they secretly despised him as an upstart. He longed to be he could overawe foes by active, aggressive power could he hope to retain his mastery.

He had no son to inherit his title. Moreover, he saw his brothers and sisters take in having married a stupid woman of the people. He had long since outgrown his early adoration for the fickle Josephine. He calmly proceeded to divorce her, and on March 11, 1810, he married the Archduchess Marie Louise, daughter of the emperor of Austria. The proud Austrian monarch had no choice but to submit, and to sell his daughter for the sake of his country's welfare. Marie Louise cursed nothing for her imperial bridegroom, and in his later days of adversity promptly deserted him. They had one son, who, while in his cradle, was proclaimed king of Rome. This son died of consumption in twenty-one.

The years 1810 and 1811 marked the floodtide of Napoleon's prosperity. His dominion extended from Naples to Denmark. He was proclaimed ruler of Spain, Italy, Switzerland, Holland and most of the German states. Russia, Austria and other nations were at his feet. England alone held out against him. Never before or since has such tremendous authority been vested in one man.

Fruit of the Baobab Tree

The baobab, a native of western and northern Africa, is sometimes called the monkey-bread tree. It is one of the largest known trees, its trunk being sometimes no less than 30 feet in diameter, although at that size its height will not be over 70 to 75 feet. The fruit tastes like gingerbread, with a pleasant acid flavor. The juice is used medicinally and also to a certain extent employed as a seasoning, and the pulverized leaves are also used similarly.

THE WORLD'S GREAT EVENTS

ALBERT PAYSON TERHUNE

Napoleon Bonaparte
(Part 11)

FOR the son of a Corsican lawyer to plan a world empire, nowadays, would be sheer insanity. But in Napoleon Bonaparte's time and country almost anything was possible to the man who knew how to use his chances. Tavern waiters became field marshals; servants rose to dukes. For the first time in France's history it was the man, not his ancestry, that counted. Bonaparte, being the greatest genius in France, rose highest in the mighty upheaval that followed the overthrow of old customs. Having, as first consul, set matters to rights at home, he drew sword against all Europe. Heretofore long, time-wasting campaigns and scores of red tape had marked every war. Bonaparte changed all this. Whirlwind campaigns and defiance of all unwritten military traditions formed the keynote of his warfare. On May 15, 1800, he hurried an army across the Alps, captured Piedmont by a brilliant victory over the Austrians at Marengo, June 14, and dictated peace terms to Austria. Other countries, scared by the example, followed suit, and, for the first time in many years, universal peace seemed established all over the civilized world.

Meantime, in France, Bonaparte was forwarding his personal ambitions to such good effect that, when the project of crowning him emperor of the French was broached, it was carried by a popular vote of 3,500,000 to 2,000. He sent for Pope Pius VII to crown him at Paris amid imposing ceremonies, December 2, 1804, but at the last moment he snatched the imperial diadem from the pope's hands and crowned himself. He then placed the crown on the head of Josephine, his wife. The following year he became king of Italy as well.

And now came a change of character so remarkable as to support the old rumor that Bonaparte the general and Napoleon the emperor were two different men. Even being shy, lean and silent, Napoleon grew assertive, fat, talkative. The rigid, temperate simplicity of early days gave way to court etiquette, pomp and imperial splendor. His court was brilliant and extravagant.

England, resenting certain of France's annexations, declared war, and Napoleon prepared to invade Great Britain. But Russia, Austria and Sweden formed an alliance with England and the plan was changed. Napoleon, with 180,000 men, crossed Bavaria, took Vienna and met the combined Austrian and Russian armies at Austerlitz. Each of the three armies was commanded by an emperor. After a long and bloody battle Napoleon defeated the allies with fearful loss. The dim-witted Dragon at Jena and Auerstadt and captured Berlin. Russia's army was punished by Prussia's aid, but Napoleon met and overwhelmed it at Friedland, June 14, 1807, and forced the czar to sue for peace. He next conquered Spain and Portugal, and extended his conquests throughout the continent of Europe. He made his brother king of Spain and his brother-in-law king of Naples, and lavished similar royal honors on others of his family.

Spain, dissatisfied that a low-born Corsican should rule it, revolted. England and Portugal allied themselves with the Spaniards and the "War of the Peninsula" began. The British army being commanded by Sir Arthur Wellesley, afterward duke of Wellington. Austria took this time to rise against Napoleon. The emperor hurried an army across the frontier and inflicted a crushing defeat on the Austrian host at Wagram, July 6, 1809. He next defeated Russia and made peace to the beaten country. Nearly all the world was now at the Corsican genius' feet.

Yet he was far from satisfied. He saw that he had overreached himself through sheer strength; Austria's action had taught him that the instant his back was turned the kaiser and his cohorts would spring at him like wild animals at their trainer. He knew that, even while kings and countries cringed to him, they secretly despised him as an upstart. He longed to be sure he could overawe foes by active, aggressive power could he hope to retain his mastery.

He had no son to inherit his title. Moreover, he saw his brothers and sisters take in having married a stupid woman of the people. He had long since outgrown his early adoration for the fickle Josephine. He calmly proceeded to divorce her, and on March 11, 1810, he married the Archduchess Marie Louise, daughter of the emperor of Austria. The proud Austrian monarch had no choice but to submit, and to sell his daughter for the sake of his country's welfare. Marie Louise cursed nothing for her imperial bridegroom, and in his later days of adversity promptly deserted him. They had one son, who, while in his cradle, was proclaimed king of Rome. This son died of consumption in twenty-one.

The years 1810 and 1811 marked the floodtide of Napoleon's prosperity. His dominion extended from Naples to Denmark. He was proclaimed ruler of Spain, Italy, Switzerland, Holland and most of the German states. Russia, Austria and other nations were at his feet. England alone held out against him. Never before or since has such tremendous authority been vested in one man.

Open-Air Chorals Olympic of Song

In August I was in Wales, to see for the first time the Royal Welsh Eisteddfod, a gathering of Welsh culture that goes back to the Twelfth century for its birthday, or even earlier. I should think that ten or even twenty thousand were here for the ancient Druid festival, to listen to the poems and songs that Old-World harpists set waving on the air. The chief choral prize, as heretofore, is open to the world. To hear the tending chotes of the British, late in the open air at such an event provides a necessary that will not soon pass away. It is an Olympic of song. If you want to enjoy quaint costumes and scenic effects reminiscent of a flood and years of a small nation's art and music, then the Eisteddfod, with its gowned druids, tall-hat women harpists, banners inscribed with mystic Celtic symbols, with its bards touching the affection arrival of peace on blowing Hiein's horn, is the festival for any summer visitor to old Wales.—From "My European Excursions," by Robert Petrie.

Life's Aim

The architect's plan precedes the builder's toil. Before the artist touches the canvas or the sculptor the block of marble, a vivid idea of the picture to be painted and the angel is to be released must be reflected on the mind's mirror. People fail because they have no unifying ideal. They never climb because they have no hilltop in view.

First Wrong Step

The moment you abate anything from the full rights of men each to govern himself, and suffer any artificial positive limitation upon those rights, from that moment the whole organization of government becomes a consideration of convenience.—Burke.

His Job

Jock—Have you a good situation? Tam—It's hardly a situation; it's more like a predicament.

Where Girls Are Scarce

There are two large American companies doing business on the island of Spanish Honduras and the American colony is about 200 or 700 strong, but they are nearly all men. The proportion of women is about one to fifteen and this is a very favorable one in the unmarried girl. Women who may be almost devoid of any physical or other charms are mighty apt to pose as minor belles in that place. The native girls give a certain amount of attention to the American gentlemen and, by adopting the ways and wiles of the American flapper, they are said to fill the bill. Many of the American men marry the native girls.

Their Yearns

"It's powerful queer?" in the cross roads store announced Gap Johnson of Limpon Holler.

"What's so queer?" questioned the proprietor of the emporium.

"It's queer, what sorts of dad blamed ambitious boys have," My boy, Hillster, wanted to grow up, marry the school ma'am and whip a member of the legislature. Greedy always hoped to get enough to eat. Bunty wanted to drag a dead skunk into church some Sunday. Beurra's ambition was to become a movie actor like Lon Chaney and Rowdy had hopes of killing a full grown wild goose when he got big enough."—Kansas City Star.

DEMAND "BAYER" ASPIRIN

Take Tablets Without Fear if You See the Safety "Bayer Cross."

Warning! Unless you see the name "Bayer" on package or on tablets you are getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 26 years.

Say "Bayer" when you buy Aspirin. Imitations may prove dangerous.—Adv.

"Dead Sea Apple"

The Apple of Sodom is a fruit described by ancient writers as extremely of fair appearance, but dissolving into smoke and ashes when plucked—Dead sea apple. The name is often given to the fruit of Solanum sodomeum, a prickly shrub with fruit not unlike a small yellow tomato.

Tanlac Responds to Call For Relief From Pain

Amazing Improvement in Miss Haberbush's Health Surprises Friends. Boils and Other Troubles Caused by Nervousness and Upset Stomach Relieved. Gains 15 Pounds

Thousands of Illinois men and women suffering from nervousness and run-down condition may discover the surest way to get quick relief in the experience of Miss Mary Haberbush, 2621 Prairie Avenue, Chicago, whose marvelous recovery from a long siege of suffering surprised everyone.

"If you are tired and fagged-out; if your stomach rebels at taking food and you spend miserable hours doubled up with pain caused by indigestion; if you do not sleep soundly and dizzy spells attack you when you stoop over; if you are losing weight and feel old—watch out!

"Three years ago I was in a run-down weakened condition," says Miss Haberbush. "Suffering from indigestion, being unable to sleep and getting up in the morning after a long night of tossing and tumbling, tired, without my strength. Pimples swept through my system and had blood caused boils that pained terribly and compelled me to carry my arm in a sling.

"I sought relief but failed. Then a friend told me of Tanlac. The first bottle gave me an appetite. Indigestion and boils gradually disappeared. I began to sleep better and arise refreshed. Soon my nerves calmed down, I took on weight. Thanks to Tanlac, I restored my health."

Thousands have found happy relief from pain and gained new strength by taking Tanlac. It usually builds up the body when out comes of pimples. Heed their advice. Keep well, keep youth and health—take Tanlac.

Get your first bottle of Tanlac from your druggist today! Over 40 million bottles sold.

Pompadour Home to Go

The Chateau de la Bastie, once the home of Madame de Pompadour and du Barry, is to be torn down to make way for progress in Paris. The Chateau is on the edge of the Bois de Boulogne. It has had many notable historical tenants, among them the duchess du Barry, who was credited with having had 800 servants at one time and with having saturated her rooms with perfumes. This was in 1716.

Up to Date

"How is the earth divided?" asked a solemn-eyed mother of her already worn out the patience of the class.

"By earthquakes," replied the boy.

Too Eloquent

Jean—Isn't he a regular debater? So forceful with his arguments.

Allen—Yes, but he eloquent? Which side is he on?

An Arizona canyon where Indians once held their ceremonies is to be made into a stadium seating 25,000 persons.

Many a man who boasts of being self-made is in reality the product of a good wife.

GREATER OPPORSUNITIES

In a recent address on "The American Petroleum Industry of Today, Judson C. Welliver, director of Public Relations, American Petrolia Institute, said:

"By giving us lubricants, petroleum made the Age of Machinery possible. It has lighted our homes, our towns and cities. It has furnished fuels under the boilers and power in the cylinders of the engines, great and small, which do our work for us. By shacking millions of horses power to the mechanical devices which inventors have produced, it has relieved men from their drudgery and given the race a measure of real freedom such as it had never before dreamed. It has offered new incentives, held up new rewards, for industry and honest effort. It has broken down the barriers of class and caste, and given a new meaning to the academic pronouncement that all men are created free and equal.

It has furnished an inducement, quite without parallel heretofore, to social and economic stabilization; it has helped to make wages good, and the real rewards of industry better. By making transportation cheap, easy and enjoyable, it has carried to the country these privileges of neighborship, of social opportunity, of educational advantages, of intellectual intimacy which formerly were monopolized by residents of the cities.

And, just as it has multiplied the opportunities and privileges of life in the open country, so on the other side, it has opened up for the people of cities and towns the privilege of easy access to the fresh air, the open sky, the inviting scenery and the generous distances of the countryside. It has given highways to the country, and relieved the congestion of the city. It has added enormously to the national wealth, but vastly more to the national health, well-being, contentment and real prosperity."

"THE LEAGUE

Otto Kahn, NewYork banker told the members of the American club in a recent address that while he believed in the League of Nations he did not believe the America should join it under the existing covenant and he gave one sound reason which is not often mentioned in the summaries of reasons why we ought to avoid European commitments. That reason, he stated, is inherent in our league our foreign minister, or Secretary of State as he is called, could not attend in person and if he went he would be at a serious disadvantage because he could not speak with the same personal authority as could the representatives of European nations present. Continuing, he said:

"In Europeit is a tradition rarely departed from that when once a foreign minister with the approval of his cabinet, has made a commitment, ratification by parliament may be taken for granted.

In America on the contrary, the power of the foreign minister and his chief, the President to enter into binding commitments is sharply limited by a constitutional provision making the Senate a part of the tr-aty making power and it enables any one-third of the Senate to reject a treaty or compel its modification.

"That provision as it is known, is not theoretically right unobserved or little observed in practice. On the contrary the Senate is jealous of its prerogative in foreign affairs."

Europe does not understand this fundamental difference in the treaty making making power and for that reason to this day European politicians cannot understand why America was not bound to the league covenant by President Wilson's commitments at Versailles.

"There can be no doubt that a similar situation would arise if America were connected with the League of Nations," Mr. Kahn concluded. "Our representative would inevitably express certain views and advocate or join in certain policies, which expressions, however guarded and conditioned, would be looked on by Europe as American commitments, while on the other hand the American Congress might take a differing attitude and the American Senate would consider itself perfectly free to disavow such views and policies and to reject any such commitments as would be subject to its control.

"Because of this and other reasons I feel convinced that the entrance of America into the league would be liable to lead to further difficulties between America and Europe.

"I cannot see that it is either wise or proper for nation to enter into a relationship which implies and invokes commitments that it may not always be able to fulfill and, in the eyes of the other parties concerned, raises expectations it may not be able to live up to."

Here is something else for the pessimistic to think about when they put on another drive to try to sell European entanglements to the American people.

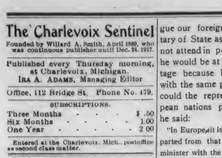
SHOULD AID MARINE.

It is indeed encouraging to know that our leading men in the business world realize the necessity of maintaining the United States merchant marine. Charles M. Schwab, chairman of the board of the Bethlehem Steel Corporation recently returned from his seventieth trip abroad, and incidentally he came home on the great American liner Leviathan, After predicting a prosperous year for American business and especally for the steel buisness, which is usually regarded as the barometer of our economic situation Mr. Schwab touched on the important merchant marine problem and said that he had been impressed with the Leviathan and her crew, declaring that the great ship was a good example of what America could accomplish in the shipping business.

Mr. Schwab advocated legislation which would enable our ships to compete with the marine of other countries on an equitable basis and stated that without some sort of government aid this could not be done. The steel magnate added that he did not believe the government should remain in the shipping business but that the government should aid the shipping buisness. Continuing he said:

"The German governments today making liberal subsidies for privately owned ships, and while our people would never consent to a subsidy, I think some plan should be worked out whereby Americans could have definite aid in the development of shipping companies."

There is of course, difference of opinion as to how our marine should be maintained, whether by the government direct or by government aid to the shipping business. But there is no difference of opinion in America as to whether the merchant marine should be maintained and developed.



Eastwood & Underwood

Dr. Hans Heinrich Dieckhoff, charge d'affaires of the German embassy during the absence in Germany of the ambassador, Baron Ago von Maltzan.

The Talhers

"Gabe Gudgeon's funeral went off all right," said Tobe Sagg of Sandy Mush. "Except that Uncle Ellick Tucker and Uncle Bone Duggins, who are both afraid of snakes, got to talking together during the sermon. Ellick whispered to Bone, and Bone couldn't hear him, and asked 'What say?' Then Ellick yelled it at him, and Bone knowing he was talking too loud whispered to him. Ellick asked him 'What say?' and Bone yelled it. People began stirring about and Ellicks says to Bone, or Bone says to Ellick:

"I was at a funeral once when two old men got to yelling at each other, and like to have busted up the obsequies."

"That so?' yelled the other one, whichever it was, 'What were the old fools talkin' about?"—Kansas City Star.

Toys From Shrapnel

Deadly shrapnel is turned into peace-time use at a Hartford (Conn.) factory, where nearly 200 tons of shrapnel, removed from shells, are being melted down and converted into toys. Cast in molds, the metal is fashioned into miniature autos and other figures. The last trace of their warlike origin disappears as the models are painted in natural colors.—Popular Science Monthly.

What! No Collar Buttons?

A woman in England is the inventor of a shirt that can be worn without collar buttons. Her soltion of buttons at the front and back of the neckband is made so that the collar fastens under the neckband. A special device with a button on a link is designed as an aid to bachelors.

Whiz! !

Alma—I suppose Richard was so happy when you accepted him that he was treading on air.

Irma—No, he was treading on the gas at the time.

Never Fails

Ted—Do you think there is a method to tell if a man is lying? Have you seen the listrument?

Bill—Sure. I married one.

Cat and Dog Saved

Atlantic City, N. J.—A black cat and a poodle seem to be sole survivors of the schooner Camilla May Page. They stuck by the craft when the captain and crew of seven abandoned it in a storm.

Simple Enough

Newark, N. J.—Perfect anagram displayed at the convention of the National Puzzlers' league: Itsenrage the letters of "they see" to make two words with a kindred meaning. Answer: "The eyes."

Stop and shop—Staley Brothers for paints and varnishes.

WORDS OF WISDOM

Find the way, or make it.

Hatred is self-punishment.

Goodness can become tiresome.

Men have strength; women, tact.

The blush of a queen is a royal flush.

The rudder of a ship is a stern necessity.

Trying to avoid trouble will keep any man busy.

A woman always looks on the bright side of a mirror.

Love makes a young man sober and an old man giddy.

It is foolish to fear that what you cannot avoid.—Syrus.

The money paid the infant's nurse is likely to be hush money.

Many a man who claims to be wedded to his art can't prove it.

Wealthy relatives sometimes enable a man to deal in futures.

Apothecaries deal in scruples, but it may be different with lawyers.

Smartness enables a man to catch on and seldom enables him to let go.

The moment a girl finds her ideal she begins to search for a substitute.

Our deeds determine us as much as we determine our deeds.—George Eliot.

Kindred weaknesses induce friendships as often as kindred vices.—Bovee.

Some men are so accustomed to making fools of themselves that they don't mind it.

Of nothing you can, in the long run, deal with unwisely but labor, make only —nothing.—Carlyle.

Where life is more terrible than death, it is then the truest valor to dare live.—Sir Thomas Browne.

Region of Fertility Surrounds Old Gaza

The old town of Gaza still exists under the Arabic name of Ghuzeh, and, with its 15,000 or 20,000 inhabitants, ranks as the second city in Palestine. The sea is now three miles away, though according to history it was once a seaport. Much sand has filled in, and the sea-sand has encroached to quite a large extent upon the land.

The plain between Ghuzeh and the sea is by "uninterrupted line of old foundations and ruins, strewn with pottery and marbles."

Looking north and east, gardens and orchards of oranges, date palms and olive trees, stretch far away, succeeded by immense prairie-like fields of wheat, unbroken by fence, tree, or hedge, the old granary of Judah, extending with barely a hillock to interrupt it, right to the very foot of Mount Carmel.

Guile and Gall

Herman Hormel, customs appraiser of New York, said at a dinner at Princeton:

"A great many ladies, when they are caught smuggling, feel no guilt or shame whatever.

"They carry it off, in fact, like the young girl at the muskrat.

"A crusty old banker strode up to this young girl and growled savagely:

" 'Excuse me, miss, but you're sitting on my new silk hat.'

"'Oh, going already, are you?' said the girl."

Few Long-Horns Left

There are still a few long-horned cattle to be found in Texas. It has just been announced, however, that the United States forest service will maintain a herd of these picturesque examples of early pioneer life in the Southwest on the Wichita National forest in Oklahoma. They will be grazed in a pasture adjoining the one occupied by the herd of buffalo already established on the forest.

Among Scientists

"What is that distinguished-looking man's business?"

"Grave robber," answered Miss Cayenne.

"His looks belie his trade."

"Not at all. He confines himself exclusively to Egyptian tombs."—Washington Star.

Chains Clean the Chimney

Chimneys, especially those in soft coal districts, require cleaning from time to time. This task can be made easier by using a bundle of automobile skid chains on the end of a rope for scraping the soot from the flues.—Popular Science Monthly.

A Pipe

Visitor—Your husband gets a lot of sentiment out of his pipe, doesn't he?

Mrs. Hitchkock—Indeed he does. It's perfectly disgusting to see him clean it.—Tit-Bits.

Patronize Our Advertisers

They are all boosters and deserve your business.

Maurice Charton, a railroad official, has been arrested by the French police as a spy. It is said he was carrying confidential documents, revealing French mobilization plans, to Munster, Westphalia, the German secret service center. The papers were found in his handbag when he was nabbed at Cologne.

THE THEATRE

"The Quarterback."—A one-time football player, baseball pitcher and all-round athlete to direct a motion picture with a football theme. What better choice?

The director is Fred Newmeyer who has just completed work on Richard Dix's latest Paramount staring vehicle, "The Quarterback," which comes to the Palace on Saturday and Sunday.

Newmeyer obtained gridiron experience in Denver while starring on the high school team. From amateur football he stepped into professional baseball, pitching until his arm "went bad." Fred played with Wichita and Denver in the Western League, with Chattanooga in the Southern and Waco in the Texas.

That Newmeyer hasn't forgotten football was forcefully exhibited last year in Harold Lloyd's "The Freshman." As codirector of that picture, he inserted some of the most realistic football scenes ever filmed.

Director Newmeyer is highly enthusiastic about "The Quarterback." After completing the film and conferring with Dix, Esther Ralston, and the authors,—William O. McGeehan, sports editor of the N. Y. Herald Tribune, and William Slaven McNutt,—he said the production afforded great dramatic and comedy possibilities than any football story he'd ever made.

This man has probably a finer record of comedy his than any other director in the industry. After working as an actress, property man and assistant director Hal Reach gave him his first chance in 1891.

"The Potters."—Although she has played the type almost exclusively for fourteen years, Mary Alden, appearing as Ma Potter in W. C. Fields' Paramount staring picture, "The Potters," which arrives at the Palace Th:atre Wednesday and Thursday, believes that the sweet, suffering, old-fashioned mother was much less admirable than she has been painted. "Playing an all-forgiving mother and analizing her emotions gives one a fairly good idea of what she represented," says Miss Alden. "She is supposed to encompass all her faults not minimize her virtues. To me her chief handicap was the fact that she was literally smothered in sentimentality.

"Take the modern mother. She does not absorb herself in her offspring and she's much more appreciated. The present-day child's regard for his mother is one of real sentiment, not of sentimentality. Sentimentality is the froth of emotion, its chief ingredient, selfishness. True sentiment is beautiful—like truth—not based on false values.

"In many pictures, I have portrayed the type of sentimental mother of which I am speaking, but I often wished to do something different. In The Potters, I think I have accomplished this. Ma Potter isn't a supine, uncomplaining doormat. She is understanding argumentative, a keen critic, the real dynamo in the Potter family."

SOUND SENTIMENT

The poetry of earth is never dead.—Keats.

Men, by doing nothing, learn to do ill.—Ovid.

Youth comes but once in a lifetime. —Longfellow.

The course of nature is the art of God.—Young.

Do good by stealth, and blush to find it fame.—Pope.

There are no tricks in plain, simple faith.—Shakespeare.

Some folks have the stuff; some have only the stuffing.

In long sentences there is noble scorn.—George Eliot.

Keep what you have yet; the known evil is best.—Plautus.

Civilization is just a slow process of creating more ngeds to supply.

The most serious thing that can happen to a man is to forget how to play.

Mistake, error, is the discipline through which we advance.—Channing.

It is some compensation for great evils that they enforce great lessons. —Bovee.

Every man should keep a fair-sized cemetary in which to bury the faults of his friends.

Great hearts alone can understand how much glory there is in being good.—Michelet.

Men's plans should be regulated by their circumstances, not circumstances by the plans.—Livy.

If religion and science quarrel, it is because we have neither religion enough nor science enough.

Age often secures for a man a respect which he may never have deserved when he was younger.

Master of Silhouette Stirred by Challenge

August Edouart, probably the greatest of all silhouette artists, was the first to apply the term "silhouette" to human likeness cut from paper. Before his time they had been called "shades."

He took up the art as the result of a trivial incident. While visiting a family one day he was shown some shades that had been cut by a maid. He criticized them as unlike and unstylish, and was challenged to do better, and in a fit of pique he seized a pair of scissors, tore off the corner of a letter that lay at the table, led the father to a chair, and in a short time exhibited a paper likeness. The family expressed approval and showered Edouart with praises. Then he made the mother's likeness with the same facility and exactness. Edouart embarked on a successful career with scissors and paper, and when he came to America in 1839 he took New York by storm.—Kansas City Star.

All Alike

London.—American and English flappers are alike, in the opinion of Mrs. James Highte of San Jose, Calif. "They both like their cocktails and their smokes."

Three Dimes Per Horse

Dauton, Pa.—Three horses were sold at auction for 30 cents, averaging just 3 dimes per horse.

WANT COLUMN

LOST—Elk emblem locket. Initials on outside; picture inside. Liberal reward for return of same to the Sentinel office.

FOR SALE—Large size Victrola, practically new. 405 Dixon Ave.

FOR SALE CHEAP—Ten acres of land inside city limits. Charlevoix State Savings Bank. 50-tf.

FOR SALE—Cottage very desirably located on Petoskey avenue. Parties interested in a Charlevoix cottage should investigate this offer as an attractive price will be made on this property. Address F. A., care Sentinel, Charlevoix.

FOR SALE—Four desirable lots facing Michigan Avenue—nothing better in this residential district.
BARRY-MEECH CO
Charlevoix, Mich.

FOR SALE—3800 feet frontage on Walloon Lake. About 100 acres of land—will sell as a whole or subdivide. E. J. GLAZA, 440 Pearl St., Boyne City Phone 324. 11-tf

Cause of Thunder

It is not believed that thunder is caused by the inrush of air into a vacuum, but by violent heating and disintegration of the air along its path, which produce a sudden and great expansion of the same nature as an explosion

Work to Know

Properly thou hast not other knowledge than what thou learn by working: the rest is yet all an hypothesis of more or less value; by which unfit to schools, a thing floating in the clouds, in endless logic vortices, till we try to fix it.—Carlyle.

Ended Humane War

"The invention of gunpowder," said Hi-Ho, the sage of Chinatown, "put an end to our eminently humane wars, when war consisted largely of wearing false faces and throwing bombs of evil odor."

Statement of Ownership, Management, Circulation, Etc., Required by the Act of Congress of August 24, 1912

Of the Charlevoix Sentinel, published weekly at Charlevoix, Michigan, for April, 1925.

State of Michigan, County of Charlevoix, ss.

Before me, a Notary Public in and for the State and county aforesaid, personally appeared Ira A. Adams, who, having been duly sworn according to law, deposes and says that he is the owner of the Charlevoix Sentinel and that the following is, to the best of his knowledge and belief, a true statement of the ownership management (and if a daily paper, the circulation) etc., of the aforesaid publication for the date shown in above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to-wit:

1. That the names and addresses of the publisher, editor, managing editor, and business managers are: Publisher, Ira A. Adams, Charlevoix, Mich. Editor, Ira A. Adams, Charlevoix, Mich. Managing Editor Ira A. Adams, Charlevoix, Mich. Business Manager Ira A. Adams, Charlevoix, Mich.

2. That the owner is: (If owned by a corporation, give its name and the names and addresses of stockholders owning or holding per cent or more of the total amount of stock.) Ira A. Adams, Charlevoix, Mich.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: (If there are none, so state.) None.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than are so stated by her.

FLORENCE S. ADAMS.

Sworn to and subscribed before me this 31st day of March, 1925.
Ira A. Adams, Notary Public.
Charlevoix Co., Mich.
My commission expires April 11, 1926.

War on Prairie Dog Is Finally Victorious

Hot Springs, S. D.—The prairie dog, which since pioneer days has roamed the South Dakota prairies, has suffered the fate of the buffalo and the rattlesnake in the war of extermination in this section of the state. In Fall River county the war of extermination against the rodents is considered practically at an end.

As late as ten years ago the prairie dogs were squallingly numerous. When the campaign to exterminate the animals began, it appeared that the task was a fruitless one. Not only were the rodents discouragingly prolific, but farmers were skeptical or indifferent on the battle of extermination.

Year by year, however, the campaign continued, concentrating on the more infested districts. Farmers in recent years have co-operated in the campaign and many have conducted individual extermination work. Today the prairie dog has become more or less a rare sight in this section.

Dependable paints since 1851 at Staley Brothers' Hardware.

Clean, Smooth Streets
OF LASTING BEAUTY

WHAT impression does your town make on visitors—on you?

Consider your streets. Are they crumbling under motor traffic which must pick its way around ruts and holes? Or are they smoothly paved—clean and attractive—a good investment?

Portland cement concrete is the ideal pavement for this motor age—in towns and cities of all sizes. It is economical to build and maintain, permanently beautiful and —the safest pavement wet or dry.

The Portland Cement Association is a national organization to improve and extend the uses of concrete, with offices in 31 cities.

ATTRACTIONS FOR THE WEEK

Saturday-Sunday, April 9-10

Richard Dix in "The Quarterback," with Esther Ralston. A Special. Daredevil Dix scores in "The Quarterback" the trickiest, funniest, fastest football game ever played. That's what you'll see in Paramount's latest Richard Dix comedy. Richard and his pal, David Butler, are working their way through college by means of a milk route. To speed matters up, they utilize their football knowledge and send their bottles whizzing through the air. Then, when they actually get in the game, action starts and never stops 'till the final whistle blows. Fielding H. Yost, Michigan football mentor, was showing a group of young men the "ins and outs" of the game for scenes in Richard Dix's picture, "The Quarterback." Also educational comedy, "The Humdinger."
Note—No advance in prices.

Wednesday-Thursday—

W. C. Fields in "The Potters." A comedy of middle-class American life, its chief character, Pa Potter, a rather pompously inefficient man of middle age, solid citizen, husband and father, with an alpaca office coat and a patch on the seat of his trousers—a hero? every day but pay day. Also Felix the Cat and Fox News.

CHURCHES

Methodist Church.

C. E. Pollock, Pastor.

Palm Sunday Sermons—
"The Loyal Superscription" 10:30a.m.
"The Present Age". 7:00 p. m.

The evening will be almost entirely on hour of music and songs and pictures. Features of the evening will be, a great hymn, a half hundred still pictures,with a brief explanation, excellent special music.

In addition to the regular service program of the day there will be an afternoon sacramental and church reception program from 2:30 p. m. until six p. m. Parents who desire their children baptized, any who are prepared for baptism should come some time during the afternoon Sunday to be cared for.

The ladies literary and sewing club will meet Thursday afternoon this week at the church. The basement has been newly renovated and painted, through the courtesy of the club, and will be reopened to the church services at this afternoon meeting. Mrs. Ted Pearl will be the hostess of the occasion.

The Ladies Aid Society will serve a public dinner Friday evening from 5:30 until all are served. This will be a good opportunity to try out the newly finished basement of the church, and get an excellent,Easter supper of tasty and substantial food.

The pastor spoke at East Jordon last Friday afernoon on "Youth time and Spring time." He also spoke at Boyne City last Friday evening on the subject, "The Justification of Seventy Six."

The Epworth League held a box social at the home last Tuesday evening, and a good time was enjoyed and some money realized toward the state Epworth League Institute at Albion.

Last Tuesday evening was a busy evening with a prayer meeting at seven, an official board meeting at seven thirty and a Sunday school board meeting at eight thirty. Large attendances were present at each of these affairs.

The Woman's Missionary Society met with the Geen Esther's for a very happy time at the McMillen home Wednesday afternoon.

Church of God

Rev. Paul L. June, Pastor

Services held at the Chapel on West Hurlbut Avenue:
Sunday School at 10:30.
Sunday School at 11:45.
Evening service at 7:30.
Prayer Meeting, Wednesday evening at 7:30.

Congregational Church

Rev. B.G. Mattson, D.D., Minister

Morning sermon theme "Jesus Master of Destiny." A Palm Sunday interpretation.

6:30 Evening Young People's church hour. Leader, Alfred Gill. Question forum conducted by the pastor.

Sunday school at noon. The record of honor classes and the names of individuals winning star honors was read last Sunday with much interest and applause. New goals are being set for the coming quarter and an earnest spirit prevails.

A special good Friday service will be held at 7:30 p.m. April 17, with presentation by surpliced choir of the inspiring cantata by Stainer, "The Crucifixion." This is a noble composition by a master in the creation of sacred music, very solemn and tender in its unfolding, capable of stirring the deepest religious feeling.

[[Easter service will include Sunday morning worship April 17 with flowers, Easter music, reception of new members, a brief sermon and the celebration of the Holy Communion.

At the regular evening hour of 7:30 the choir and pastor will parsent a special musical service with interpretive presentation by the pastor of "Christ the Master of Masters," revealing by a series of dramatic interpretations the overwhelming power of the person of Christ upon some of the master personalities of the ages.

The Easter day celebration will be ushered in by a sunrise prayer meeting by the young people.

Services at the Ironton church are held every Sunday at 2:30 p.m. beginning with Sunday school followed by a brief sermon by the pastor.

Christian Science Society

Sunday service, 10:45 a.m., Subject Are Sin, Disease and Death Real?"
Sunday School 12 o'clock.
Wednesday evening service 7:45.
Reading room, Tuesdays and Saturays, 2 to 5 p. m.

The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church

Sundays 8:00 a. m., and 10:00 a. m.
Mondays and Tuesdays 8:00 a. m.
Saturday 7:00 a. m.

Rev. Fr. Odelc.

Where Legion Will Gather

The Trocadero, where it has been decided to hold the session of the American Legion convention this year, is an immense structure, built for the Paris International exhibition in 1878, on a commanding site on the right bank of the Seine. The building is of oriental style and consists of a central portico surmounted by towers and flanked by long curving wings. The wings are used as art galleries for the display of sculpture and paintings, while the central portico contains a concert hall or auditorium with seating accomodations for 6,000 persons.

First Prize Ring Champion

Prize ring history goes back to 1719, when James Figg, the earliest recorded champion, made his appearance in London. He opened an amphitheater in Tottenham Court road, where he met all comers with backsword, quarterstaff or bare knuckles. Presently he was joined by one of the leading celebrities of London. Boxing was only a side line with Figg, who was expert with sword and cudgel. At every fair in the neighborhood of London Figg set up a booth from which he buried his proud challenge at all comers. There 4s no record of his having been defeated.

Hawk's Unlucky Flight

While Lt C. Hlle, racing pigeon fancier of Washington, was exercising his birds he suddenly noticed that a small group of them was closely pursued by a hawk. When the birds were about 200 feet over the loft one of them decided to break for home. As it did the hawk also dove and when the pigeon landed on the trap and entered the loft the hawk followed. Realizing that it was penned, the hawk attempted to escape and flew into the aviary. There Hlle ended its career with an iron pipe.

Cat and Dog Saved

Atlantic City, N. J.—A black cat and a poodle seem to be sole survivors of the schooner Camilla May Page. They stuck by the craft when the captain and crew of seven abandoned it in a storm.

This Loud Cackler Lays Four-Inch Eggs

Bakersfield, Calif.—An eight-inch egg laid by Leghorn hen, which cackles louder and lays bigger and better eggs than any other hen in the flock of 5,000, is giving L. J. Latray, poultryman, something to think about.

One of the eggs, on exhibit here, weighs 6¼ ounces, is 4 inches long and 7¾ inches in circumference. It is equal to about three ordinary eggs in food content, Latray said.

An egg like this arrives every other day at the Latray farm.

Dependable paints since 1851 at Staley Brothers' Hardware.

—PERSONALS—

Mr. C. Brooks of Boyne City, was a business visitor in Charlevoix last Tuesday.

"Billy" Fessenden and Lloyd Curtis spent the week end with friends in Central Lake.

The Busy Bees will meet with Mrs. Harry Howman, Grant street, Friday afternoon.

Miss Lois Fessenden spent vacation week with friends in Detroit, returning home last Sunday.

Harold Taylor, employed at Pinehurst, N. C. during the winter, returned to Charlevoix last Friday.

Walter Alexander returned from a short vacation spent with friends in Detroit, arriving here Sunday morning.

Mr. J. L. Anderson, who spent the winter in the east, mainly at New York City, returned to Charlevoix last Sunday

Mrs. B. G. Mattson left for Chicago last Tuesday on a business trip that will occupy the major part of the week.

Charles Taylor who spent two weeks at home on account of sickness resumed his duties at the P. M. Station last Friday.

Postmaster W. A. Stroebel and Editor G. A. Link of East Jordan, were business visitors in Charlevoix Wednesday afternoon.

The Pythian Sisters will hold a regular meeting Monday evening, April 13th and this will be followed by initiatory and refreshments.

Emerson Hull is helping out at the Adams Cigar Store this week while the proprietor is taking a short vacation from his usual duties.

Archibald Russell, former agent for the P. M. R. R. in this city, now general freight agent, spent the week end with Charlevoix friends.

Harold Jones, for some weeks past a visitor in Flint, returned to Charlevoix last Saturday and will be found at the Priest studio in the future.

Mr. Harry R. Dagwall motored over from Indian River last Saturday and spent Sunday with his daughter, Mrs. F. E. McMillan and family.

The front of Robt. Bonthron's place of business is being improved in appearance this week. Poole Brothers, painters, are in charge of the work.

R. F. Sloan Sr., drove up from Muskegon last Monday and will continue with us for a short time attending to local business interests before returning.

Miss Cecile Louise Pollock, Albion student, is making her parents, Rev. and Mrs. C. E. Pollock, a short visit during her vacation week from school work.

Mr. and Mrs. H. S. Harsha are again occupying their residence, 103 State street, following an extended visit with their daughter in Birmingham, Florida.

T. J. Fetters of Harbor Springs, was a visitor in Charlevoix yesterday, mixing business with pleasure, the latter by calling on old friends and business acquaintances.

The Ladies Aid society of the M. E. church will serve an Easter supper Friday, April 8th at the church, commencing at 5:30 p m and continuing until all are served. Bill 50 cents.

The government ship Fulmar, Captan S. M. Rose, is making a trip today, to Cross Village and other northern points on lake Michigan with a shipment of white fish for planting.

Richard Saltonstall came up from Olivet last Saturday and will spend the week with his parents, Mr. and Mrs. B. Saltonstall, after which he returns to complete his course at Olivet college

R. E. Rosenbrock in charge of the P. M. station here for some weeks acting as relief agent, concluded this service at the local station a few days ago and will take up the same line of duty elsewhere.

Frank M. Sears has been in serious condition for several days with a chronic ailment that yields slowly to medical treatment and nursing. At this time he shows evidence of improvement over the past few days.

Mrs. C. J. Winder, manager of the Hotel Charlevoix, has been with relatives and friends for the past few days in Eaton Rapids, is expected home Friday of this week, making the return trip over the motor route.

Mr. and Mrr. F. J. Fessenden motored to Petoskey where they met their daughter, Miss Lois, who arrived over the Pennsylvania line from Detroit, last Sunday morning, where she had been with friends for several days.

Mr. and Mrs. John Withers, visitors for the past few months in, Indianapolis, returned to Charlevoix last Friday. Their daughter, Miss Charlotte, will follow later as soon as her school year where she is teaching is concluded.

Walker Miles is taking a short vacation from his usual duties at the office of the Charlevoix Abstract and Engineering Company and is taking advantage of the time to fix up his home, a recent purchase on Antrim street.

Several steamships, some of which have been in winter quarters at Sault Ste. Marie, on account of the ice blockade, are again on duty on Lakes Michigan and Huron, having passed through the Straits of Mackinaw early this week

Percy Holmes of Marion township has decided to enter C. M. T. C. this summer and has forwarded his application for such assignment., We believe this is the first Charlevoix County application for this outing and service.

John Kirby, for some years past a member of the local coast guard crew, retired from active service in Charlevoix early this week and left for Grand Haven last Monday, where he will continue with the government in the same line of service.

We hear that Prosecuting Attorney A. L. Fitch is practicing up on the art of rope throwing, possibly with the intention of becoming expert in that profession and then joining some Rodeo outfit and contesting for honors at some great western meet.

B Nickerman took charge at the P. M. station as local agent last Friday and will probably continue in the position during the coming months. He comes from Pentwater where he was employed in a like position. His family will join him later, at the close of the school year.

Mr. and Mrs. Albert Goddard, accompanied by Mrs. Nellie Wood, returned from Mount Dora, Florida last Friday and are at home in their cottage on Dixon avenue, where they will spend a few weeks before continuing their motor trip to Lincoln, New Hampshire where they will spend the summer months.

Letters to friends here from B. A. Herman carry the information that he has been spending some time visiting points of interest in Cuba, with headquarters mainly at Havana. Also that his vacation is about over and that he will soon start for the north following the usual motor route from Miami, Florida to Charlevoix.

Inspectors B J. Gellick and E. C. Ecklund of Grand Haven, are here today making inspection of the day ferry B. Johs for the Petoskey Transportation Company. With the inspection the ship will be ready to engage in her usual seasons work, making trips to the several ports on the great lakes.

A. W. Wilkes, a prominent citizen of Elmira, met death last Tuesday morning following an accident of the day before, when a car he was driving down a steep hill left the highway, turned over pinning him to the ground. Mr. Wilkes was taken to Petoskey for treatment and died at Lakewood hospital without regaining consciousness.

Two strangers found blood and a human eye, in the grass at Silver Creek, on M12 just beyond Moran. They reported it to Deputy Sheriff Lixner. He called Sheriff McCauley and they gathered up the ghastly relics. The sheriff made a trip to Petoskey yesterday, but the affair remains a mystery.—St. Ignace Republican-News.

According to present plans the state owned and operated ferry, Mackinaw City, now at Cheboygan, where she and her sister ship are being fitted out for the season, will be placed in commission, running between Mackinaw City and St. Ignace about the fifteenth of the present month, and the St. Ignace National Association of Broadcasters, a position which was tendered him by the association. Mr. Scott for several years and until his retirement last month was recognized as one of the hard workers and a leader in the national house, a splendid representative of his district, the state and nation. He has a host of friends who will be pleased to learn of his appointment to the new position. They have appreciated his work in the past, understand his capabilities and know that he has the essential qualifications to successfully conduct the department that was tendered and accepted.

The bill passed by the state senate to require courts to give bootleggers a year for first offense convictions is an idle gesture. In other words the law, if finally adopted, will be observed where it is not expensive and ignored in Detroit where the senate probably presumes it is necessary. This measure is one more addition to what, for lack of a better name we shall term preferential law. Law is public opinion, nothing else. For example, up state judges send men to prison every week for liquor violations that receive no legal interference whatever in Detroit. Public opinion was responsible for this. The senate in trying to reach prohibition conditions in Detroit has strength ened the dry law up state and weakened its enforcement in Detroit. The whole thing savors of buck passing with no one benefited.—Charlotte Republican.

The steamship James E. Sanford, Captain John N. Chambers, made her first trip of the season to St. James from the port last Wednesday, and thereafter will make the usual runs over the Charlevoix-St. James route. Trips could have been made earlier but for the fact that the ship was held in the liner harbor while repair work on the swing bridge was in progress. During this period the bridge could not be opened sufficient to permit the ship to leave the harbor and enter Lake Michigan. Repair work on the bridge continues with the prospect of the Sanford being compelled to land below the bridge until such time as work on the big draw is completed and that will be for an indefinite length of time that will be measured by days, possibly weeks.

Hard to Stop Legend Once Started on Way

It is rather interesting to watch a legend in the course of growth, remarks the Manchester Guardian. It recites the case of the ancient chalice which was recently found and which after a hectic newspaper career is now so far advanced that it is how ored by some as the cup that served the Lord at the Last Supper. It was a similar jumping at conclusions that involved medieval bell makers in some hopeless tangles. Pierre Van Paassen comments, in the Atlantic Monthly, the classical case is that of the Eleven Thousand Virgins of Cologne. Digging in the Twelfth century brought to light a big collection of human bones. An ecclesiastic promptlimed them at once to be the remains of the Eleven Thousand martyrs. Further search showed the bones of men were among the piles. The ecclastic lady was not put out. She declared at once that certain ecclesiastics had been put to death in the Virgins. Worse followed. The bones of children were found. Were the seers defeated? By no means. Entire families had been put to death with them. 11,000, they said. Modern research made an end to the whole farce by establishing the fact that the bones were those of the first Roman colonists in Cologne and that they had been buried in a cemeyeniun cemetery.

Mental State Depends Much on Environment

In order permanently to cure a child of nervousness It is necessary to remove the underlying cause, not merely to alleviate the distressing symptoms, declares Dr. Frank Howard Richardson in Hygeia Magazine. "This will probably involve some change in the environment, for It is recognized that environmental influences affect a child so much that they will greatly modify any mental condition, no matter how bad.

While this is encouraging, there will be plenty of difficulty in many cases. If a companion, a teacher, a brother or a sister is at the bottom of the nervous condition, the change may easily be made. However, in many cases the child's nervousness is really due to a jealous or tyrannical father or to a weak, pampering mother. It is almost hopeless to alter the environment resulting from such parental disturbances.

In all cases it is up to the parents to provide the proper atmosphere and environment for their children's

Play in New White House Front Yard

Children have made a playground of Dupont circle, the "front yard" of the temporary White House. The photograph shows a typical afternoon scene in the park circle.

Repairing the White House Roof

A complete new roof will be on the White House by the time President Coolidge moves in again next September. This photograph shows the preparations workmen have made for a temporary roof while the old one is being removed.

Ma and Son Study Law

Williams & Williams, mother and son, attorneys-at-law. That will be the description of this couple in a few years. Mrs. Nellie Williams, thirty-eight, and her son, Sidney, twenty, are students at the Southwestern university, Los Angeles.

Three-Year-Old Piano Prodigy

Three-year-old Shura Dworine of Baltimore is one of the most accomplished musicians of his age. He can compose and read music.

ALL AROUND THE GLOBE

The largest active volcano in the world is Kilauea, in Hawaii.

A Montmartre dancing academy has instituted classes in jigs and other old-fashioned French dances.

Vellum is the finest grade of parchment, made from skins of very young calves, kids, or lambs.

Bounties of a dollar each were paid by the territorial treasurer on 41,312 eagles killed in Alaska since 1917.

A method of fitting a tiny blotter to the end of a fountain pen has been devised.

For bathers' wear a Frenchman has invented jewelry made of a rubber composition, even some gems being imitated.

The bat catches its food during twilight, for the reason that it can not see clearly either in broad daylight or in complete darkness.

Hero Dog Will Have Memorial

Wins Fight With Fox While Pinned Between Boulders Under Ground.

Woodruff, S. C.—Bing, most famous foxhound in the north, is dead. While in twenty-four hours after being rescued from six days' captivity in a deep cave into which he had chased and killed a huge red fox the gallant old dog's stout heart ceased to beat.

Like the famous Blood Collins, old Bing found the subterranean dungeons more than his iron constitution could endure. Bing contracted pneumonia while jolting between two sharp stones that prevented him from leaving the underground chamber he had entered in pursuit of his enemy, and despite the tender ministrations of veterinarians and his master, R. V. Kelly, wealthy farmer and fox hunter, the famous hound died in the home he had known and loved for seven years.

An Anniversary.

Did fate indulge in a strange whim? It seems so, for it was on the second anniversary of the foaling of Floyd Collins' body, that Bing's end occurred.

Bing breathed his last surrounded by his partners in hundreds of thrilling fox hunts, gathered about their stricken comrade. These lieutenants seemed to sense the tragedy happening. Strong men stood about the room and the porch and many of the big, tough muscular chest suitted his final convulsive gasp and then remained motionless.

Tender hands laid the gallant old foxhound to rest on a hill overlooking two miles from Woodruff. A suitable memorial will be erected later over the little mound. A thousand dollars was spent willingly in freeing the old fox, bound from his subterranean prison and another large sum will be expend ed to provide an appropriate marker for Bing's last resting place.

Hundreds of men worked day and night to rescue the dog, which chased a fox into the cave, killed the animal after a terrific struggle and then became wedged between two boulders forty feet under ground. The only opening to the cavern was too small to permit a human being to enter, and it was necessary to use dynamite as well as picks and shovels in order to sink a shaft forty feet through rock and earth to effect the dog's rescue.

Bing barked intermittently throughout his long imprisonment underground, apparently with the intention of encouraging the crowds of sympathetic workmen laboring to rescue him. But the joyous, hilt-clinging note was missing from Bing's typically foxhound bay.

At ten o'clock in the night of Thursday, February 10, Bing was trapped in the cave. It was Saturday, February 12, when a boy crawling to pass the cave heard a dog, evidently in distress, barking. It was 3:00 a. m. Thursday, February 17, when a shovel pierced the barrier above the imprisoned and gallant hound the rays of a flashlight to reveal an exhausted but supremely happy foxhound.

Freed From Rock.

Strong hands freed Bing from his prison. A moment later a gaunt, yellow foxhound, his lanky coat damp with underground moisture, was raised to the surface by his rescuers and deposting in the waiting arms of his master. Bing's long, sharp jaws, black color and noted foxhunter of Woodruff. Through his that quivered with emotion Mr. Kelly greeted his boys. It is worth $1,000,000 to see old Bing again !"

The entire countryside hurried to the cave, two miles from Woodruff, when it had been learned that Bing was caught in a trap. Men, women and children assembled on the steep hillsides.

Bing was out of a dozen fine foxhounds that part in the battle on the night of Thursday, February 10. Half a dozen hunters had assembled at the home of the Kelly's for the chase.

Into a peaceful little valley, hushed in the mellow glow of a full moon, the pack of hounds dashed in search of their age-old enemy. Suddenly one of the dogs emitted a deep yelp, indicative of the discovery of the desired quarry. The pack took up the trail and soon straightened out in a race that extended for approximately one mile.

"That fox is headed for the old fox den on Hillsdale creek," declared one of the hunters, "and he'll make it before the dogs get near him."

A Deep Cave.

The old fox den is in a deep cave on the banks of Hillsdale creek. The hunter's prediction came true. The wily old fox, however, failed to take into consideration that one of the dogs on his trail was a veteran of seven years' experience, not to be confused or daunted, by any subterfuge in Reynard's repertoire. Within a few feet of the fox's tail yelped Bing, filled with the joy of the chase.

The fox, a magnificent specimen, rushed into the tiny opening to the cave. Scarcely a foot behind, however, Bing plunged madly onward, either unaware or contemptuous, of the proximity of the fox's haven. The old dog's rush carried him nearly 40 feet into the blackness of the cavern. Suddenly his body became wedged between two sharp boulders. It was impossible to push forward or to retrace his steps. He was trapped, and both dog and fox realized what had occurred.

At the mouth of the cavern stayed a dozen disgusted, baffled foxhounds. Around them stood half a dozen disappointed hunters, facing the painful realization that another wily Reynard had made his escape into the old hole that had caused many fox hunts to end in disgust.

None of the hunters noted that old Bing was missing from the pack of hounds circling at the black entrance to the cave, but after a few minutes the hunters called the hounds and left the scene.

Inside the inky blackness of the cave, with no other living soul to see, two animals staged a drama. The fox realized that his enemy was in dire distress. His shifty eyes told him that Bing could neither advance nor retreat, therefore could not parry blows. Shifty jabs from the pinioned enemy told him that Bing was in excruciating pain. Desperately the old dog tried to press forward, but every painful attempt only wedged his body more tightly between the sharp boulders.

An Opportunity.

Here was an opportunity to avenge many old scores. The fox, confident that he could thrash the imprisoned dog, advanced to the attack. But he did not know the caliber of the veteran foxhound he sought to destroy. With the cunning born of long experience and the ferocity born of desperation, Bing bared his white, stiletto-like teeth and prepared to uphold the treasured traditions of his ancestors. Again and again the long tusks of the fox penetrated the old dog's hend, but Bing was fighting to the death and he fought craftily, conserving his strength. Finally the coveted opening came. The old foxhound sunk his long teeth into the soft, hot, palpitating throat of his foeman.

The battle was over, Blood gushing from his wound, the fox slunk farther back into the narrow passageway —to die.

Tuesday night, February 15, workmen discovered the bloody body of the fox. Every man at the cave realized that Bing had been painfully if not seriously wounded in the fight in the cave.

A few minutes after midnight Wednesday, February 16, it became evident that the shaft being sunk into the cavern would reach the prisoner in a few hours, and anxious eyes peered into the hole for a glimpse of Bing. A flashlight playing in the black depths of the tunnel revealed a yellow tail, wagging joyously. The dog that had been a prisoner for six days was at last in sight of his rescuers.

The lurush of air told old Bing that his period of painful captivity was almost ended. He barked feebly, but with a voice vibrant with joy. At 3:45 o'clock Thursday morning Bing crambled out of his prison and his yelping re-echoed through the little valley until it was drowned amid the deafening cheers of the hundreds who had gathered to witness the hound's liberation.

A racking cough shook Bing's gaunt body. He had contracted a serious cold in the dampness of the cave. Pneumonia threatened.

Bing's eyes were feverish and at most filled with dirt, but they seemed the faces about the brink of the shaft. He was looking for his master. Vanly Kelly, and a second later the old foxhound was licking the face he loved more than any other.

Harvey Kelly took the weary animal in his arms and strode across the hills to the Kelly home, a mile distant, where a bowl of warm milk awaited the hound.

Safe at home, Bing collapsed. His gaunt frame shivered with the ravages of pneumonia. He refused food, but lapped eagerly at bowls of water placed before him. He yelped once more, his fever-broken lungs unable to function normally, and those nimbering in the old foxhound realized that the end was near.

Maine Banker Wills Fortune to Humanity

Bath, Maine.—An estate estimated at $1,778,000, of which all but $15,000 is in personal property, was left by George B. Dutenport, retired lumber and banker, according to William H. Sharey, Arthur J. Dunton and J. Edward Donley, named by him as executors and trustees under the terms of his will, which has been filed in the Sagadahoc county probate court.

Mr. Davenport made 20 specific bequests, most of them to institutions, and only one of them personal, totaling $116,000, and the income from the residue, estimated at considerably more than $1,500,000, is to be expended by the trustees for religious, educational and charitable institutions and organizations "which love for their object the good of the world and the bettering of the condition of the human race."

The trustees have nonlimited Oliver Mones, Charles C. Low and Daniel Williams as appraisers of the estate.

The will was drawn August 20, 1908. Mr. Davenport was never married and upon his death left no near relatives. Outside of a $10,000 bequest to Miss Nellie A. Webber, who was his housekeeper for a long term of years, there are no personal bequests.

Mr. Davenport stated that his father, the late Charles Davenport, gave during his lifetime a very large amount of money to other relatives and he did not feel it his duty to give more.

MEAT CONSUMPTION OF 1926 SHOWS INCREASE OVER 1925

Figures Show Producers Have Hard Task Keeping Pace With Demand.

Chicago.—Government figures just made available showing a large increase in total meat consumption for 1926 over 1925 while consumption per person was slightly less, indicate that livestock producers have a difficult task in keeping pace with the American appetite for meat, according to D. A. Millett of Denver, prominent live stock breeder and chairman of the National Live Stock and Meat board, in a report to board members.

Mr. Millett pointed out that the total production of 17,245,000,000 pounds of meat for 1926 exceeded the previous year by 240,000,000 pounds. Per capita consumption was quoted at 142.8 pounds in 1926 it was 145.6, he attributed this slight drop of eight-tenths of a pound to the rapidly increasing population and emphasized that this was indicated in the absence of surplus supplies.

The fact that more beef was produced and consumed during 1926 than ever before was given emphasis by the board chairman. The official figures showed 7,458,000,000 pounds of beef produced and this not only broke all previous records but placed beef above pork in point of quantity, it was the first time for a number of years that cattle had furnished more meat than hogs.

This situation was attributed partly to the shortage of hogs which was experienced as a continuation of the downward trend following the overproduction of 1923 and 1924.

The production and consumption of lamb was noted for its increase over the last several years. Production reached the highest mark since 1914 and per capita consumption was on the up grade, standing at 5.5 pounds. For the past three years this figure stood at 5.22. Total lamb and mutton production was placed at 1,000,000,000 pounds, which was larger by 44,000,000 pounds than the production for the year 1925.

Storm Washes Gold Nuggets From Road

Stockton, Calif.—Streets of gold in California? Sure.

Recently there was a heavy rainstorm in San Andreas, Calaveras county, which washed the streets thoroughly.

George Treat, editor of a newspaper in that city, walking out of his front yard, noticed a glittering substance in the road and, stopping to pick it up, found it to be a heart-shaped gold nugget. It was about a half inch in diameter.

ORCHARD GLEANINGS

PRUNE FOUR-YEAR-OLD GRAPEVINES

It should not be very difficult to prune four-year grapevines, that they may conform to the single-stem Kniffen type of training. The fruit of the past season was borne directly on shoots that made all of their growth during the past summer. These shoots are now canes. The former canes from which the shoots grew are now worthless for fruiting purposes, but in some types of training serve for some years to support the fruit canes that arise from time to time. With the Kniffen types of training, the growth other than one year is almost completely cut away

In pruning according to the Kniffen training, spurs which are but the current year's growth, shortened to a length of two or three buds, are much used. The ideal vine pruned and trained to the single-stem four-cane Kniffen method should include two canes of the current season's growth, arising from just below the level of the top wire, or near the head of the vine. One cane will be tied in the spring to the right along the top wire, while the other will be tied to the left. The amount and character of the cane growth made will largely determine the number of buds to be left on each cane. With especially vigorous vines 12 to 14 may be allowed on each. In addition to the two canes from the head two or more others are cut back to spurs of two to three buds." These will throw shoots the coming season, which in turn become the fruiting canes to be utilized one year from the growth time. After the two canes are chosen and the spurs provided all other cane growth is cut cleanly away in this location. Just below the level of the lower wire, two more canes are selected as above directed and spurs provided for, but the two canes to be tied along the lower wire are pruned two to four buds shorter than the canes at the upper wire. Thus the vines after pruning will have four fruit canes, two near each wire level, and spurs at each level to provide fruit canes for 1928.

Prevent Pear Blight by Careful Winter Pruning

The dormant season with an absence of succulent growing plant tissue, affords suitable conditions for checking the destructive blight disease. The disease, which is commonly known as "fire blight," is characterized by a death of blossoms, young twigs, and later larger limbs, thereby giving rise to the affected trees the appearance of having been scorched by fire. The blight is produced by a bacterial germ and is the cause of many economic losses to growers, especially during the growing season. It is during the winter months, only, that effective control measures can be put into practice.

Since the blight overwinters in dead twigs and limbs, killed mainly during the previous season's growth, the pruning out and destruction of affected parts during the winter months will eliminate a large source of infection for the following year's growth. Despite considerable experimentation which has been done in connection with the control of fire blight, no method of prevention with spray material has been found, due to the manner in which the disease works beneath the surface of the bark, where it is not reached with spray materials.

Late Winter Right Time for Cutting the Scions

Scions for cleft-grafting should be cut during the late winter, according to the New York State College of Agriculture at Ithaca. "Cut them while they are dormant," says Prof. Joseph Oskamp, the fruit man at the college, "pack them in moist sawdust, and store them in a cool cellar until they are to be used in the spring. The grafting should be done at about the time for applying the delayed dormant spray, when the buds are showing green.

"Many orchards," declares Professor Oskamp, "contain old trees of undesirable or seedling fruit. If the trees are healthy and not too old, a desired variety can be grafted on them to good advantage. If the stock of the original tree is suitable. For example, it is not generally profitable to rework Duchess of Oldenburg or Alexander, as the first does not give a healthy growth to the trees worked upon it, and the second blights badly.

"Careful selection pays in picking scions to use. They should be from vigorous twigs of the preceding summer's growth of the variety you have decided upon. Make sure the scion you use is of the kind you intend to use and not of some undesirable variety.

Get After Pruning

If the pruning has not been done, get it done at once. Don't put off the way before spring. Do not cut the trees too severely. We have noticed that there has not been so much growth on the peach trees this past season. Go over each one and prune as necessary, but do not do a lot of unnecessary cutting. Thin out the apple trees and cut back the leaders, but do not head back generally. As soon as the work is done get the prunings out of the orchard.

Figure Garden in Winter

Fi-phard planting is one of the most frequent causes of poor success and flagging enthusiasm in vegetable growing. A neat garden can be most certainly obtained by following a carefully thought out plan. There is time to figure it all out in the winter weeks. There isn't the time to do a real job of planning when you confront the spaded ground with a collection of seed packets in your hand and start putting the seed in as you pick up the packets.

The DOOM TRAIL

by ARTHUR D. HOWDEN SMITH

AUTHOR of PORTO BELLO GOLD ETC.

W.N.U. SERVICE COPYRIGHT BY BRENTANO'S

CHAPTER XI—Continued

Peter answered him with the Iroquois war-whoop, and we swung from the sumac clump, dodging right and left through the tree trunks.

"Here they come," yelled Bolling for warning.

He fired his musket, and I felt the wind of its bullet on my cheek. Tom shot with no better results. The two surviving Caluugas threw away their guns and fled.

"I will take care of them, brothers," shouted Tawinose, reloading and starting his own musket. "One Seneca against two Caluugas—that should be full odds."

He put on speed as he spoke, waved his hand and was gone, running like a greyhound after the two frightened savages, who were scurrying around the swamp.

The field was left to Peter and me and the two ruffians at the other frontier called Red Death and Black Death. They seemed nothing loath to meet us.

"Ho, ho, ho," roared Bolling. "Dye see who it is, Tom? Wasn't feelin' feller"—this to me—"was you intendin' to misuse me some?"

"I'm intending to let a little clean air into your dirty skin," I answered.

He threw back his head and laughed amused.

"Ho, ho, ho! Now ain't you got the smart way o' puttin' things? Young feller, I'll tell yer what; you're too good for the frontier. You—"

As quick as lightning, and without an inflection in advance to warn me, he flung his tomahawk at my head. I saw it coming, and instinctively did the only thing possible to save myself—raised my own ax to guard. Bolling's hatchet struck mine and knocked it from my hand, leaving my arm sore and tingling.

"You wasn't expectin' that, was you?" he gloated. "Waall, young feller, there's a heap o' other things you ain't expectin', but they're a-goin' to happen. Yes, right now. You watch."

He poised himself on the balls of his feet, and, grinning at me, his big, double-edged scalping knife held ready in his right hand.

"I'm a-goin' to carve you, my lad," he warned me. "You ain't got the chance a squirrel has ag'in an eagle. You'll be stretched out like a bear's skin before I'm done with you."

He stepped forward with a peculiar sweeping blow that was aimed at my shoulder, but fell at the level of the waist. I had it passed my guard, 'twould have disemboweled me. I parried his blade with mine, and struck back for the first time with such venom that he leaped away in alarm.

The suspension in his attack gave me opportunity to glance over my shoulder toward the edge of the swamp, where Peter and the negro were circling each other warily, and Tawinose poised for throwing.

The sight put an idea in my mind. I remembered my duel with the Caluuga in the glade by the Great Trail and the discovery that he was at a disadvantage when I used the knife as I had learned to use the sword. I promptly shifted my grip on the knife-hilt and held it straight before me as if it were a rapier. At the same time I inclined my other arm behind me to balance it. Bolling viewed this maneuver with derision.

"Ye pore lubly," he sneered. "Think ye can meet a knife-fighter like me with one arm? Or fight me off with the point? I'll show ye."

He charged upon me like a battering-ram, his knife a whirling point of steel, its broad blade slashing in both directions. I retired slowly, anxious to increase his self-confidence.

"Stand up to me now!" he yelled finally. "Do ye fearful?"

I laughed at him, and it made him furious. He stamped around me, slashing and stabbing, and it was several minutes before he discovered that however viciously he struck I was always able to parry him with an economy of effort.

He crept forward like a huge cat, feet spread wide, shoulders crouched, knife a menacing dance.

Somewhat to his surprise I did not give ground to him this time, but met him squarely as he advanced. My arm was extended, full-length, tipped with a good ten inches of steel. He struck, and I parried the blow. He slashed, and I put it aside. He struck again, and I almost caught his wrist in twisting his blade from his hand by an old trick of the salle des armes. But my knife was not long enough to get the necessary purchase with it.

He charged with wonderful celerity, dropped to his knee and slashed upward so effectively that his point cut the shirt of my leather shirt.

"I'll get ye yet," he howled with glee.

But I refused to be intimidated. Indeed, I was no longer doubtful of the issue. I knew that I could outfight him or any fighter of his caliber by my adaptation of sword-play to knife-fighting.

I leaped upon him by way of answer, and pressed the fighting. He yielded ground to me, seeking to retreat into the woods by the trail; but I rounded him up and herded him steadily toward the edge of the swamp.

I shortened our fighting-range, and gave him the point, drawing blood occasionally. He kept his head down, and parried desperately, trying to escape to one side, but I was on him each other's arms, and as I looked, Tom heaved Peter into the air and his legs around the negro's waist, and they rolled over and over across the field.

I reached them just as they struggled to their feet, grips unbroken. Peter warned me off.

"Stand clear," he croaked. "I finish this myself."

Cortes, nobody but Peter could have finished it. The negro's strength was colossal. He flung them, with teeth and nails and legs. But Peter sat him philosophically, refusing to be angered by the vilest attempt. They had torn the clothing from each other's shoulders and flanks. They dripped blood. Their skins shone with sweat. Their chests rose with the effort for breath.

Tom stooped and flung his arms around Peter's waist, striving his head for the Dutchman's loins. Peter retaliated by bringing up his knee against the negro's chin. Tom reeled back, and Peter swooped upon him. One arm hooked Tom's waist, the other caught him by the neck.

Dazed and with a mouthful of shattered teeth, Tom struggled feebly, but without avail. Peter twisted him, bent him to the ground, shifted grip rapidly, drove his knee into the quivering belly and throttled the life out of the black throat.

"So I make an end of him," panted the Dutchman as he staggered to his feet.

"Aye, we have made an end to Red Death and Black Death," I answered.

"And I slew the two who run," added Tawasa-se-ars, touching two scalps whose clustered feathers protruded from his belt.

"A clean sweep," I said. "There will be some to carry the tale to La Vierge du Bois."

CHAPTER XII

Governor Burnet Is Defied

'Twas early autumn when we returned to Albany. The fog over the battlements of Fort Orange stood out straight from its staff. The citizens who thronged the street leading up to the fort gate must needs hold on to their hats-of-state.

"Are the streets usually so crowded?" I asked Peter.

He shook his head, and I accosted a tavern keeper who stood in his doorway, regarding the passers-by with abdelgation of the harvest he would reap later.

"It's his excellency the governor," he explained. "The governor and Master Colden of his council have summoned certain gentry and merchants and the officers of the troops to meet them in the great hall of the fort this afternoon."

We came to the fort gate and gave our names to the sentry who stopped all save the few the governor had summoned to attend upon him. A messenger he dispatched brought back word that we were to enter, and we were escorted across the parade and into the quarters of the commandant adjoining the great hall.

Master Colden met us in the doorway.

"Zooks, but I am right glad to see you," he cried. "And his excellency is in overpowering humor."

He opened an inner door and ushered us into the presence of the governor. Master Burnet rose and came forward with hand outstretched.

"Mester Ornesel, this could not have been better! I wished above all things for speech with you. Corbies, I am deeply in your debt. Tawasa-sers, you have again incurred the gratitude of the province."

"Did you receive my report from Oswego, sir?" I asked.

"Certes, 'twas that—and this"—he tapped a document which lay before him on the table—"and the tongue of Peter."

He proffered it. 'Twas a report from a secret agent at Montreal, quoting the decision of the French for desisting in manufacture with the Iroquois, to raise the price of beaver from two livres, or one shilling sixpence in English currency, the pound, to the level of four livres, or three shillings, the established price then prevailing at the English trading-posts.

"That, mind you," continued the governor as I returned the paper to him, "was the first reaction to Canada by the tidings that Murray had succeeded in legitimizing his trade over the Deux Rivi'. But come with me. It may be I shall appeal to you for firsthand testimony."

We deposited our muskets in a corner of the room, and filed into the larger chamber adjoining, where some forty men awaited him. Several were gentry who were members of his council. There were officers in command of the frontier garrisons. The remainder were merchants, dealing in furs or lesser extent in the fur-trade, the great export staple of the province.

His excellency waded his time in preliminaries or generalities. He declined several papers on the table in front of him, and addressed himself to his task.

"Gentlemen," he began, "I have summoned you to meet me here because a situation has arisen which is of the utmost gravity to the welfare of the province and the larger interests of his majesty's realm. Recently I have been in receipt of a communication in the form of a petition signed by many of the chief merchants of the province, beseeching me to abandon my opposition to the erection of the free trade with Canada which is now temporarily secured to them by the action of the lords of trade in suspending decision upon the law prohibiting the trade to higher grade which I secured to be passed last year."

That petition represented the sober thought of a majority of the merchants and traders, your excellency," spoke up a prosperous-looking man.

Wasp Larva Feeds on Carcass of Tarantula

The common tarantula which is so dreaded by man has as one of its most deadly enemies a mere wasp, nowhere near its size. Dr. Alexander Petrunkevitch, professor of zoology at Yale university, has made a detailed study of the habits of this digger-wasp and its victim. This species of wasp feeds her offspring on an exclusive diet of tarantula. As soon as the wasp is ready to lay her egg, she goes in search of prey. She is guided by sight of the burrow of the tarantula, which supinely submits while the wasp stings one of her legs to render the mandibles and inserts the poison sting into her side. With the tarantula thus paralyzed, the wasp cleans herself carefully; licks the oozing blood briefly from the wound, and drags the unconscious victim over to a grave which she has already dug in advance. Burglary, for the occasion. The tarantula is stuffed into the grave and the wasp lays her egg on the "corpse." She covers the opening with earth and goes away. The paralysis affects the entire body and stops the heart. Nevertheless a gradual recovery takes place, but the tarantula cannot escape because the earth has been packed too tightly over her. When the larva emerges from the egg it feeds on its paralyzed provision until it is old enough to brave its underground birthplace.

Causes of Thunder

It is not believed that thunder is caused by the inrush of air into a vacuum, but by the violent heating and subsequent rapid expansion of the air along its path, which produces a sudden and great expansion of the same nature as an explosion. However, this does not explain the relatively long duration of the thunder; this duration is owing mainly to the facts (1) that the several parts of a streak of lightning are at different distances from the observer, and (2) that sound travels at the rate of about a mile in five seconds. The duration is also owing, in part, to sound reflections, or echoes.

Southern Expression

Hildolf's "Fact, Fancy and Fable" says that the expression "Nigger in the woodpile" originated in the South and refers to the thieving propensity of slaves.

We've Noticed It, Too

Often when you think you are losing you are winning, and when you think you are winning you are losing. Time will tell the story, too.—Watertown Standard.

What Meat Like Beef

The whale is a warm-blooded mammal and its flesh is exactly similar to beef with but slightly coarser texture. The canned product has no oily taste and it is cheap, palatable, and easily digested. The analysis of canned whale meat has shown that its food value may be compared with that of round steak. Some time ago it was estimated that 100,000,000 pounds of whale meat could be supplied the people of the American continent from the British Columbia coast annually at a price of about 12½ cents a pound.

Tailored of Moire Silk.

brims showing a white background trellised over with huge black roses and other floral motifs. White vest and inlaid with black kid and vice versa will add a beauty note to the black-and-white ensemble.

That Paris so enthusiastically indorses the all-black vogue redounds to the good fortune of the matron. No mode is quite so distingue

white outmodasm now on, the blouse to wear under the jacket is preferably of white crepe or satin; although satin vestees are also in fashion.

Silk topcoats for spring, also says the mode, either beaupliee, faille or satin. They show intriguing details of pintucks, folds, seamwork and some are quilted. JULIA BOTTOMLEY.

Double Sleeves

Any woman who wishes to laugh in her sleeve finds it easy today. For many of the sleeves are double. That is, one sleeve flares and ends just below the elbow while the lower part of the arm is covered by another of close and tight-fitting design.

Mixed Tweeds

For spring sports, mixed tweeds with or without fur collars, are popular.

Cape on Spring Coats

The coat with a cape is much in evidence, and will be, it is predicted, the favorite for the spring and summer. Some of the capes button on the shoulders, others do not cover the arms but hang below the wrist in the best only.

Last Minute Suggestions

A really gorgeous shawl is of red quilted satin, which has corners of rhinestone lace and a heavy silver fringe

must agree after studying the style points of the frock here pictured. While this dress has a slenderizing effect, yet fullness is introduced ever so adroitly in the peasants belt in place under scallops arranged in tiers. All the scallops are bound with dire satin. Another favorite frock for the matron is of black satin styled with to one-side drapes, causing falling belt from the left shoulder and front waist line. These one-side fastenings and surplice effects are particularly becoming to mature figures, and they are the "last word" in the matter of dress fashioning.

The mutron who has wearied of the regulation cloth suit will find relief this spring in the way of silk or satin suits and ensembles. These feature skirts with plaits accordion pleated in their making, topped with jackets which, while they are neatly tailored, naturally a charming feminine styling. Because of the black-and

THE KITCHEN CABINET

(©, 1927, Western Newspaper Union.)

"There is no earthly ailment but somewhere God hath an herb for its healing," says a quaint writer. "The trouble is that we think the herb has a hard foreign name. We seek it in far lands, but find it at last in our own garden plot."

FOR THE INVALID'S TRAY

To the whimsical palate of an invalid, a dainty is far more acceptable

whenever it may be, if it is served in some unusual form.

For the busy house wife who has but one pair of hands on which to depend, in performing her various duties, time is a most important consideration, so she has little time for frills.

A few moments spent in arranging and garnishing a dish will make all the difference between its being eaten with pleasure or refused with distaste.

It is not easy for everybody to prepare a dish so that it appeals to the eye; but with little practice the art may be acquired.

So many fetching things may be done with the ordinary foods common in every home. Take the lemon or orange: a whole set of dishes may be made from a few. The lemon has a spout all ready made for a pitcher, cut a ring for a handle, scoop out the pulp, shave off the bottom to make it level and behold a pitcher, not for cream, but for jellies or custards, junket or tapioca. Cut the lemon crosswise, scoop out and put on handles and you have a sugar bowl; cut a smaller lemon the same way, insert a ring for handle and you have a cup. Pigs, using toothpicks for legs, black plus for eyes will delight the heart of a child—a lemon is shaped like the body of a pig.

With dates, figs and raisins flattened and decorated with cloves, all sorts of lurries may be formed. Peanuts with toothpicks will make all kinds of animals and more. Unless one has tried doing these things for a grown person, it will surprise you to see how much these childish toys will please us adults. We are but children at heart and when one is ill, one is mentally as well as physically; so simple things please and divert us.

With the varieties of gelatin on the market, with custards and fruits one has a large field in serving the invalid.

The appetite of an invalid usually has to be coaxed with various devices. Often the recovery of a patient depends entirely upon the food which he can eat and assimilate, so the serving of food is a vital thing.

In all homes there are some bits of choice china, glass or silver which may be used to advantage on the invalid's tray. Colored foods like jellies, gelatin desserts and fruits look well in glass.

Fruit Cream.—To the white of an egg unbeaten add a half glass of any sweet jelly; beat until stiff enough to stand and serve with a thin custard or with whipped cream.

Good Sandwiches.

A sandwich is a never failing food and with the great variety from which

to choose, one can have something different without repeating.

Swiss and Spanish Sandwiches.—Spread thin slices of rye bread with prepared mustard and an equal number of slices with mayonnaise dressing; cover half the slices with thinly sliced Swiss cheese and the remaining slices with thinly sliced Spanish onion; spread cream with a thin layer of mayonnaise. Serve with coffee and sliced cold meat at a snug supper.

Ham and Mustard Pickle Sandwiches.—Finely chop cold boiled ham, using enough to fill one cup, mix with one-half cupful of finely chopped mustard pickles. Moisten with salad dressing. Spread bread with horseradish butter, then with the ham mixture, using rye bread.

Cheese and Cherry Sandwiches.—Mix well seasoned cottage cheese with finely minced maraschino cherries. Spread thin slices of white bread with butter, then with the cheese mixture. These are especially nice for an afternoon tea.

Toasted Cheese Sandwiches.—Cut white bread into one-fourth inch slices, spread lightly with mustard butter and sprinkle with grated cheese, cover with a buttered slice and press well together. Arrange on a wire broiler and toast a delicate brown on both sides.

A Dessert Sandwich.—Make a jelly roll, cut into slices and serve for dessert with a thin custard poured over the slices. Serve cold.

Cheese and Pineapple Sandwiches.—Mash a large cream cheese, add one-fourth of a cupful of cream whipped. Add an equal measure of finely chopped fresh or canned pineapple, well drained. Spread thin slices of white bread with mayonnaise, cover half the slices with the mixture and the other half with lettuce, spread with mayonnaise. Put together in pairs, trim off edges and cut into various shapes. Garnish each one with a small piece of pineapple cut into wedge shape; sprinkle with paprika.

RADIO WARNINGS MAKE SEA SAFE

Keep Ships Informed as to Location of Icebergs and Derelicts.

New York.—Barquentine ——— abandoned in shifting conditions and set on fire in Lat. 41 north, Long. 47 west. May possibly be a danger to navigation. Crew on board steamship ———."

Such was the purport of a warning to all ships which was radioed from the wireless aerials of an Atlantic liner one balmy night, held in outline and conveying little to the average landsman. But what of the hidden menace behind those words? asks a writer in the New York Herald-Tribune.

From time to time, when disaster overtakes some palatial liner, we are reminded of the dangers of the sea and of the vital part played by wireless as a life-saving agent. But what of the hundreds of other ocean casualties which occur every year?

These casualties are equally disastrous, from the point of view of the total loss of life and property involved, but they are on such small scales individually that they are considered relatively unimportant and we never hear anything about them.

We never hear either of the part played by wireless in these cases, or of the part it plays subsequently—perhaps months or years later—in preventing major disasters which may easily result from a minor casualty, such as that recorded in our opening paragraph.

Wireless Plays Important Part.

Yet wireless communication continues to play an increasingly important part in the safeguarding of life and property at sea, and in this article it is proposed to deal with some little known phases of wireless activity which are the direct operation of on the broad Atlantic, far beyond the rim of the horizon.

The busiest ocean route in the world is that followed across the north Atlantic by the great liners which ply between Europe and New York. During the busy season as many as 40 liners of different nationalities may be arriving at and leaving the terminal ports on either side every week-end. Added to this number there are countless cargo vessels, or freighters.

All these ships follow well-defined tracks or lanes across the ocean—lanes which are as definitely laid out and as rigidly followed as a main state highway on land.

If it were possible to ascend to a great height in an airship, so that a bird's-eye view of the whole Atlantic could be obtained, the observer would see two endless lines of ships but a few miles apart—one line bound west and the other bound east.

Dangers to Navigation.

With the marvelous collection of shipping constantly moving to and fro a very close watch indeed can be kept upon dangers to navigation, and warnings can be broadcast by wireless to inform other ships of the exact nature and position of those dangers.

And what are these mysterious dangers to navigation?

We have all heard of "flotsam and jetsam," but how many of us know the meaning of the expression, and that it originated among sailors? Flotsam may be anything which floats, and may have originated near the shore and been washed out to sea. Jetsam is also anything which will float, and the term is usually applied to something which has been thrown overboard, or jettisoned, from a ship at sea.

Many small freighters put to sea with "deck cargoes"—that is, cargo which, for want of space below, is stowed on deck. Timber is frequently carried in this fashion, also bulky machinery which cannot, on account of its size, be lowered down a hatch. If a vessel carrying such a cargo encounters a violent storm her deck cargo may be torn adrift and washed overboard by the waves. If not, it may imperil the safety of the ship, be cut adrift by the crew and jettisoned.

Flotsam and Jetsam.Therefore, may consist of an enormous variety of material, such as huge balks of timber, steam engine boilers, last barges, small boats, buoys torn adrift from their moorings near shore, and wreck wreckage from sunken ships, all highly dangerous to shipping.

If, for instance, a liner rushing along in the dark at 20 knots happened to hit a bulk of timber and on her hull would certainly be pierced.

Such obstructions, although sufficient to cause damage of a more or less serious nature, rarely cause the complete destruction of a speeding liner. Far more dangerous than this miscellaneous collection of flotsam and jetsam are derelicts and icebergs.

The Menace of the Derelict.

It frequently happens that when a ship is very seriously damaged by fire, storm or collision, she is abandoned by her crew and left in a sinking condition. However, ships so abandoned do not always sink. For a variety of reasons (such as air locks below decks, natural buoyancy due, perhaps, to a cargo of timber, etc.), the vessel may continue to sink until she is unmanageable, and remain there. That is to say, her decks may be awash or just submerged, leaving only the masts showing above water.

A vessel in this condition becomes a derelict, and one of the sea's greatest perils to shipping, for wherever the presence of icebergs is to be expected in certain regions at certain times of the year, the derelict may be anywhere, at any time, lurking unseen just below the surface, or under cover of darkness.

Surprising as it may seem, such derelicts remain afloat like this sometimes for years, drifting about aimlessly at the mercy of the wind and ocean currents. There are always such derelicts moving about the Atlantic, mostly in unfrequented regions, but occasionally they make their appearance upon the great shipping lanes, and in wireless the credit is due that they do no harm.

It might be thought that a dangerd vessel, abandoned to become a derelict, would not move very far from its position at the time of abandonment, and would, therefore, be quite easy to avoid. Such, however, is far from being the case.

Another grave danger which has to be faced annually by the navigators of our great liners and freighters is that of collision with icebergs.

Icebergs Great Danger.

From the time an iceberg breaks adrift from the foot of its parent glacier till the time it reaches the main shipping lanes, a period of two years generally elapses, but every year, on being released from their winter imprisonment, they swoop down past Newfoundland and reach the Grand Banks about March. From then on till about July or August icebergs are a constant menace to transatlantic liners.

In clear weather they may be seen, even in the dark, but in foggy weather their proximity can only be guessed. As many of them measure anything up to 1,000 feet long by several hundred feet high, the disastrous consequences of a collision with one of these will be fully appreciated. It was thus that the ill-fated Titanic met her doom in 1912.

As a result of that disaster, regulations and arrangements were made to combat the danger, and all the ships using the north Atlantic route are continuously on the lookout for ice patrol service. This service is conducted on behalf of all the nations concerned by the United States government, which sends out the revenue cutters "Seneca," "Modoc" and "Tampa" every year to patrol the ice region in relays until all signs of the ice have disappeared.

During the season one of these cutters is always on duty, cruising over the danger area, noting new icebergs as they arrive and following the movements of those already reported.

Twice a day the ice patrol sends out by wireless a detailed report of all icebergs known to be in the region, and, with these reports to go by, ships' masters have no excuse for running aground and are enabled to do so with a pretty accurate knowledge of the whereabouts and size of the icebergs in the vicinity.

Wireless Beacon Stations.

Most cutters have also established special wireless beacon stations which, like lighthouses, send out a characteristic signal by means of which they can be identified. The direction finder is brought to bear on this signal and the ship's bearing from the beacon thus established with extraordinary accuracy. So accurate and reliable is the modern direction finder, in fact, that ships equipped with one by it alone when they have to make a dangerous landfall, such, for instance, as the Nantucket Light Vessel, in dense fog.

Probably one of the most spectacular uses of the direction finder, however, is in the location of ships in distress. If a marine radio operator has a distress call he will jump to his direction finder and immediately take the bearing of the incoming signals. He had lost he done, right away; in case the ship in trouble has had her hull pierced, in which case the engine room will soon be flooded and power for the wireless transmitter will fail.

A ship in distress of course, always sends out her position, so that intending rescuers may know where to head for, but it frequently happens that if a ship has had bad weather for several days she will not have had opportunity of getting a clear enough view of the sun to take sights and ascertain her exact position.

Under such circumstances she may only send out her position as calculated by "dead reckoning," which is only approximate at the best of times, and may easily be as much as, 100 miles out. Without a direction finder therefore, rescuing ships might easily spend hours or even days searching for the luckless ship. They may never find her, or, perhaps, arrive too late to find anything more than some wreckage.

Makes Rescue Easy.

If a rescuing ship is equipped with a direction finder, so long as the distressed ship can keep on transmitting, even with her low-power emergency set, the problem of finding her is the simplest part of the rescue job. All the searcher need do is steer right head on to the direction from which signals come and the sinking ship cannot possibly be missed, even in fog.

These little-known phases of wireless activity are constantly in progress at sea, considerably relieving the strain upon the captains and navigating officers of the world's shipping, especially the large and fast liners. Before the days of wireless, when these men had only themselves to rely on, the hours they spent on the bridge were full of anxiety whenever thick weather was encountered.

Now they can face the worst weather or the darkest night secure in their knowledge of the exact position of all dangers, and of their own position—thanks to wireless.

California Women Best Dressers, Says Expert

Paris.—Californian women dress better than any others in the United States, says Mrs. Benjamin Haynie, Paris dressmaker, who runs a shop under the name of Marjorie Lou.

Mrs. Haynie is herself a Californian, having been born in South Dakota and educated in San Francisco. But her opinion is unbiased, she believes, because years of life in New York, South America and Paris have interested since she was actually resident in California.

Next to Californian women, in the approval of the fashion designer, come women of the Argentine. The California women breathe vigor, health and wholesomeness, she says. Argentina typifies grace. She can achieve style with a breadth of black cloth and a string of pearls, according to Mrs. Haynie.

Three years ago Marjorie Lou opened a shop in Buenos Aires, where her husband is a planter. Last year she extended her business to Paris and now she operates dress houses in both cities.

Police Misunderstand Boy Scout's Good Deed

Los Angeles, Calif.—Because James McDermott, twenty-one years old, played the role of a good Samaritan, he was arrested on a charge of stealing an automobile, it was revealed in judge Baird's court, where the boy was granted probation after having pleaded guilty to a technical charge of operating a car without the consent of the owner.

According to the probation officer's report in the case, McDermott received his boyhood training in the Boy scouts, and after he attained his majority he continued to remember he admonition of the boys' organization to "do a good deed every day."

So when McDermott was walking by Echo park one day he noticed an automobile that apparently had been abandoned and he decided he would do a good deed for that day by returning the car to its owner. The car was the property of C. D. Behrent, 2234 13-lshore street, and McDermott stopped to inquire of two policemen how to locate the address.

He was taken into custody for stealing the car, but later the officers were convinced of the truth of his good-hearted philosophy when he proved that he had returned another car two weeks previously to its owner after the machine had been reported stolen.

Botanist Finds Plants Grow Faster at Night

Bloomington, Ind.—Plants grow most in the darkness of the night.

With a mechanism which he calls the auxanometer, Prof. F. M. Andreaves of the botany department of Indiana university is measuring the development of plants.

The stalks, he discovers, attain more length in the night than during the day, although leaves show as much growth during the day as when the sun is down.

Rewarding Carefulness

Pittsburgh, Pa.—A Pittsburgh insurance paper co-operating with a theater in nuances that show tickets good for two seats each will be given daily to careful automobile drivers.

Very Forgetful

Milwaukee.—Because Joseph Reinschissler forgot that he was married when he took the witness stand at a naturalization hearing, Judge Fair child refused him final papers.

Scientists Baffled by Mystery of Crystals

Although the comparatively modern science of crystallography has now satisfactorily explained the formation of crystals, and mathematically charted their innumerable "faces" in respect to the angles, very little is definitely understood concerning crystalline conditions, as for instance the reasons for the palpability of crystals, or under what circumstances the ancients were led to use crystals, or beryls, in their puzzle of divination by means of "gazing."

The beautiful "glass arrows" were for centuries considered to have supernatural abilities, and even today a large crystal is a part of the paraphernalia of most magicians, so-called. Spirits were supposed to make crystals their habitat, and Andrew Lang, famous British author, once declared that there might be something more than superstition attached to the reports of amazing things said to be read within the crystals of even the moderns.

Although the origin of crystallography is somewhat obscure, both Prof. M. Danne of the College of France, and the eminent Prof. F. E. Ives of Calvert, credit Swedenborg, the extraordinary universal genius of the Eighteenth century, as being one of the first to comprehensively set forth the reasons for crystal formations, and with having computed and characterized the arrangement of crystal spheres and angles. Nearly seventy-fifty years earlier (1923), was probably the first of the modern, of pleasant, to give public utterance to the aspects of the subject.

Crystals, because of their prelcious value, have been in commercial use in optics and for watch glasses, etc., while there is always a demand among jewelers for certain types. Recently, two magnificent imported Burmese crystals, cut by natives with small steel bladed, were sold at a New York auction room for $50,000.

Beards of Indians

J. H. Hutchinson, statement prepared for the Publinder Magazine, explains why the American Indians always appeared in the movies and, "The beard of the American aborigines," says Hutchinson, who is an ethnologist on the staff of the bureau of American ethnology, "was sparse, the fact of the growth of his good deed philosophy when he proved that the had rescued another car two weeks previously to its owner after the machine had been reported stolen.

Not All Bad Lands Desert

The Bad lands of South Dakota cannot, strictly speaking, be classed as a desert region. The term is somewhat misleading, as the land is fertile, except where it is so steep that vegetation is washed off. The region thus buffalo grass grows and supports great herds of cattle. Good water is usually found in shallow wells and considerable farming is carried on.

Symbolic Japanese Gates

The Torii gates in Japan are archways of two upright posts with two horizontal beams. They were originally supposed to be the perch for sacred fowl that heralded the approach of day. The word "Torii" means either a bird rest or a gateway.

Strength of Rings

Some elaborate calculations backed by experiments have been made to determine the "breaking strength" of rings. It appears that a ring of ductile material like malleable iron will be pulled out into the form of a long flat like before it breaks, and that the ultimate strength of the ring is virtually independent of its diameter.

Fracture finally occurs as the result of almost pure tension, and the resistance to breaking is if little less than twice that of a rod of the same cross-section subjected to a straight pull. As the ring increases in diameter they appears to be a slight approach toward equality, with double the strength of a bar. Thus a 50-inch ring made of three-quarter inch iron broke at 10½ tons, a 4-inch ring at 10¾ tons and a 6-inch ring at 20 tons, the ultimate bar of the same metal being 10½ tons.

LEGAL NOTICES

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Michael C. Birnkrant (a single man) of Detroit, Michigan, unto Llewellyn S. See of Warmspring, Oregon, and Charles E. See, of Charlevoix, Michigan, dated August 26th, 1925, and recorded May 1st, 1926, at of the Register of Deeds for Charlevoix county, Michigan, in liber 94, page 205, on the 26th day of January 1914, in liber 39 of mortgages on page 457, which mortgage there is claimed to be due at the date of this notice the sum of Two Thousand One Hundred Fifty and 39-100 Dollars including the principal sum due with interest, together with an attorney fee of thirty-five and No-100 Dollars as provided for by the said mortgage and no suit or proceedings at law have been instituted to recover the money secured by said mortgage, or any part thereof, and no action has been instituted by the trustees to be paid on said mortgage were duly said prior to the recording thereof.

Now Therefore, Notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount due on said mortgage, together with the costs and expenses of the foreclosure, including the attorney fee provided by the said mortgage, at public auction, to the highest bidder therefor, at the front door of the court house in the city of Charlevoix, Charlevoix county, Michigan. (that being the place where the circuit court for the county of Charlevoix is held) on Saturday, the 16th day of April, 1927, at eleven o'Clock in the forenoon of that day.

The premises described in the said mortgage being the lands, premises and property situated in the Township of Marion, county of Charlevoix, and State of Michigan, described as follows, to-wit: The southeast quarter of the southwest quarter of section eighteen in township thirty-three North Range eight west, as per the United States survey thereof and containing forty acres, more or less.

Dated January 18, 1927.

MARTIN BLOCK,

Lisle Shanahan, Assignee of Mortgage

Attorney for Assignee of Mortgage.

Business Address: Charlevoix, Michigan.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by George Ross, an unmarried man, of Charlevoix, Michigan, unto Rudolph C. Korth, of Charlevoix, Michigan, dated the 24th day of August, A. D. 1925, and recorded on the office of the Register of Deeds for Charlevoix County, Michigan, on the 28th day of August 1925, in Liber 56 of mortgages on page 242, the description contained in said mortgage being incorrect by a mortgage executed by said George Ross to said Rudolph C. Korth, dated the 6th day of October, 1926, and recorded in the office of the Register of Deeds, of Charlevoix County, Michigan, on the 8th day of October, 1926, in Liber 61 of mortgages on page 200, on which mortgage there is claimed to be due the sum of two hundred fifty five and 73-100 ($255.73) Dollars including interest computed to the date thereof, and also an attorney fee of Twenty-five ($25.00) dollars provided for in said mortgage, and no suit or proceeding at law having been instituted to recover the moneys secured by said mortgage or any part thereof.

Therefore, by virtue of the power of sale contained in said mortgage and the statute in such case made and provided, notice is hereby given that on Monday, the 20th day of June, A. D. 1927, at the front door of the Court House, in the City of Charlevoix, Charlevoix County, Michigan, that being the place where the circuit court for the County of Charlevoix is held, the premises described in said mortgage or such thereof as may be necessary to pay the amount due on said mortgage with seven per cent interest and all legal cos s, together with an attorney fee of twenty-five ($25.00) provided for in said mortgage, which premises are described in said mortgage as follows: Commencing at the southeast corner of the southwest quarter of the northeast quarter, Section twenty-three (23), Township thirty-four (34) North, Range eight (8) west; thence west 10 rods to a point which is the starting point; thence north 80 rods; thence west 10 rods; thence south 80 rods; thence east 10 rods to place of beginning, situate in the Township of Charlevoix, County of Charlevoix and State of Michigan.

TOOK ALL DELIGHT FROM TRIP ABROAD

Traveler Writes Feelingly of Passport Picture.

A real gentleman came in the other day (he is my friend forever now; I have great confidence in his taste) and asked why but more stuff about that trip abroad. "I read every word of it," he swore glibly, and I almost believed him. Those things "get to you" easier as you get older. The excuse I made I'm not doing more of it was the fear of being an already too indulgent public.

But this perfect gentleman lind hardly left the office when another man came in to ask about the trip abroad. He was going over in May. How about it? He began to talk about the passport and the passport picture. I haven't fully got over the shock of the latter yet. And it seems such a little thing, too—that passport picture.

The trouble with the passport picture is, or one of them, that the photographer cannot leave out to flatter you. He doesn't "touch you up" any. You just sit there in the picture, like a mirror, and reflect the idol, unregenerate, and in all your unadorned loveliness, unrelieved by shadow, without excuse and without hope in the world. Your skull bulges in the wrong places, your ears stand out and your bumps proclaim gluttony, licentiousness and avarice. Your expression is that of a self-accused roller when chased, startled and dazed.

I shall never forget it. I looked upon the passport picture after the shootin' was done and I was perceptible shudder ran through me. Only by superhuman fortitude did I show it to a friend of forty years' standing in the office and with the bitter cry: "This can't look like me!" But he was relentless.

"It's exactly the way you look!"

I gazed at it for a long time and I finally said with something like a sigh: "Anyhow, it's the best me!"

And that is what you have to go through to get the unflattering passport picture and to get over it before embarking on the great deep. It has taken away much of my relish to go to Europe again, if that has to be done over the passport picture. One must have been exactly the way I used to be Europeans! They are certainly a polite race. They say nothing.

Of course, a man ought to forget himself, if he is out for a holiday, and just sit back and enjoy life. He should forget that he has friends, and wife training, and the office, and business, and think of himself as a young millionaire poet and novelist tasting the nectar of life from the golden cup of the gods so freely held to his lips. And this I came very near doing. Once about a hundred and fifty miles from land, the remembrance of the passport picture somehow rolled off of my heart and buried itself fifty fathoms deep and I suffered a new change into something new and strange, and began to take notice of the wonders of the voyage—mostly fountains.—A. J. R., in the Minneapolis Journal.

UNIVERSITY OF DETROIT ERECTS NEW BUILDINGS

Three New Units of $10,000,000 Program Are Under Way

Construction of three more buildings costing approximately $500,000 by the University of Detroit are announced recently by Rev. Fr. John P. Nichols, S.J., president of the institution. Six buildings are now nearing completion on the university campus, at Livernois avenue and the six-mile road.

The university's construction program will eventually total $10,000,000.

With the recent acquisition of 11 acres of land adjoining its campus, the University now owns 76 acres, which it is believed will be sufficient for the 18 buildings which the University eventually hopes to erect there. Upon the completion of the second group, it is planned to erect a $3,000,000 gymnasium early in 1928 in order that mass exercise may become a part of the university curriculum.

PRISON YAWNS POULTRY THIEF

A New Basis of Apportioning of Members, Loses

The Senate committee on Judiciary amended the Huff bill by providing a minimum penalty of one year in prison for stealing poultry valued at $25.00. This bill has been approved by the Senate committee of the whole and stands final consideration on third reading.

A new basis for apportioning members of the state Senate and House of Representatives as proposed in a constitutional amendment offered by Rep. Fred R. Ming of Cheboygan, was defeated by the House. It fell eleven votes short of obtaining the necessary two-thirds majority required by an amendment to the constitution. It provided that the basis of apportionment of representatives according to the votes cast for Secretary of State at the last general election in 1932. The number is given by the census in the present basis.

The Senate committee on the Whole adopted the bill, with Senator Chester M. Howell of Saginaw, which would make the provisions of the farm wood-lot tax law more liberal and attractive to the standpoint of the farmer owner.

New Plants for America

The Department of Agriculture has sent plant explorers to the ends of the earth, and many new species are being adapted to this country. Until recently the list was limited to only two plants, sorghum and alfalfa, but has been added to the list since Colonial days.

Oldest Fine Art

Architecture is the most ancient of the fine arts. The earliest dated architectural remains are those of the Babylonians, from as far back as 6000 B. C. Their building material was brick, and they were the first to construct vaults and arches.

Short and Gay

Scientists say small. lotial women make the best mates. A short wife and a gay one.—Wall Street Journal.

VIIST CHARLEVOIX COUNTY

Special at Boyne City, Friday Forenoon on April 29th

The first Lime, Legume and Livestock special, consisting of 3 carloads of college exhibits and a lecture coach, will be operated in Eastern Michigan by the Pennsylvania railroad in co-operation with the Michigan State College and the State Dept. of Agriculture.

It will stop at Boyne City, Friday 8:30 to 11:30, standard time, on Friday forenoon, April 29. The entire public is cordially invited to inspect the many dairy, alfalfa, and lime exhibits housed in the three cars and to listen to short talks by representatives of the M. A.C. on problems of vital interest to every farmer and to explain the exhibits.

The train will be equipped to test soil samples for lime requirements while you wait. Question boxes will be placed in convenient places to receive written questions. Miniature mail digging machinery will be on display. Dair mins the Substrata showing how to recognize high producing characteristics in young heifers. Three prominent ladies of the three leading breeds, will be carried on the train for your inspection. See the European cow lower exhibit showing methods of prevention and control.

Plan on visiting the lime train. It is one often you can spend three hours as profitably as those.

JUVENILE CRIME BLAMED ON HOME

Lack of Respect for Laws Hit by Reformatory Chaplain

Lack of the home-making spirit on the part of parents and their failure to observe religious duties, and neglect less of their creeds, were named as fundamental causes for present day juvenile delinquency by the Rev. F. X. Keller who recently succeeded the Women's Day of Memories on "The Cause and Cure of Juvenile Delinquency."

Father Exler, who is on the faculty of St. Norbert's College, DePere, Wis., was formerly chaplain of the reformatory at Green Bay, Wis. His experience among the juvenile inmates of this institution convinced him "that parents are largely responsible for the faults of their children, he said.

Parents unconsciously influence the actions of their children by the practice of little acts of insincerity and deceit, not only toward each other, but also toward their neighbors, he declared. The children are quick to reflect this mental attitude and carry it to even greater lengths, he said.

The prevailing lack of respect for the laws of the land was scored by Father Exler, who said that children could not be expected to observe or fear laws which they were accustomed to hear mocked by their elders on every hand. Among those attending Father Exler's talk were the pastors of Menominee due to a delay in city schools, and various city and county officials.

CAR ACCIDENT

Auto, Driven by Woman, Enters a Barber Shop

Mr. Wilcs, one of our local barbers, has become so popular with the ladies who want their hair bobbed that they stop for neither curbs or railings but drive right into his shop Saturday, he was peacefully shaving a client when he looked up to see a Ford, driven by a determined lady, head directly for him. He jumped and yelled to the man in the chair and they got out of the way just in time to avoid a shower of glass as the car hit the window.

Mr. Wilso says that in the future, all ladies, who drive their Fords into his shop, must be more careful and park their car on the shelf where he keeps the gold fish. The car was not damaged, the accident was caused by defective brakes. Boyne Citizen.

HALF MILLION, WORKERS' AIM

Seek Funds to Free Employed Girls' Home From Debt

A campaign for $500,000 to establish a permanent Girls' Industries Building in Detroit, free from debt, opened recently when over 1,000 women gathered at the Book-Cadillac hotel to hear Agnes G. Regan, executive secretary of the National Council of Catholic Women, make a stirring plea for the welfare of employed young women.

When completed, in the autumn, the building will accommodate 150 young women at one time. It will serve as a "safety zone" where girls who have "fallen" arrived in the city from rural communities may find shelter and counsel during the period in which they become adjusted to the ways of a metropolitan center.

"In the building up of our great cities," said Miss Regan, "the girl is the last cog." Miss Regan said, "Modern economic needs are taking more and more women out of the home and, whether they like it or not, some sort of a substitute. A home is more than a place to stay. It means health and relaxation, recreation and inspiration. It will take fundamental causes for present day juvenile delinquency by the Rev. F. X. Keller who recently addressed the Women's Day of Memories on "The Cause and Cure of Juvenile Delinquency."

Father Exler, who is on the faculty of St. Norbert's College, DePere, Wis., was formerly chaplain of the reformatory at Green Bay, Wis. His experience among the juvenile inmates of this institution convinced him "that parents are largely responsible for the faults of their children, he said.

Parents unconsciously influence the actions of their children by the practice of little acts of insincerity and deceit, not only toward each other, but also toward their neighbors, he declared. The children are quick to reflect this mental attitude and carry it to even greater lengths, he said.

The prevailing lack of respect for the laws of the land was scored by Father Exler, who said that children could not be expected to observe or fear laws which they were accustomed to hear mocked by their elders on every hand. Among those attending Father Exler's talk were the pastors of Menominee due to a delay in city schools, and various city and county officials.

MISS BELLE ROY PASSES

Prominent Charlevoix County Woman of East Jordan, Mich.

Miss Belle Roy, well known throughout this region and for upwards of twenty-five years a resident of East Jordan passed away in Battle Creek, Monday, April 18th, her death being due to an attack of Brights disease.

Miss Roy was a competent and highly expert stenographer, employed by the law firm of Clink & Williams of East Jordan, and has been with the firm during the entire time the copartnership existed and connected with the firm or one of its members for the past twenty two years.

She was not only an accomplished stenographer but through her work in and out of court had become proficient in the methods of legal procedure and with a knowledge and understanding of the law that was exceptional for a lay but very few practicing attorneys, a knowledge such that she so desired would have entitled her to admittance to the bar as a regular attorney. With this knowledge she was an invaluable aid to the firm with which she was connected, such an one as can only be replaced with great difficulty, making for a distinct loss to Messrs. Clink & Williams.

She was also a business woman of exceptional qualities, grasping difficult problems and solving them quickly and accurately as well as satisfactorily to those whose interest she represented, all of which she carried on with a scrupulous regard for others, whether or not she represented their individual interest. In the process of conducting legal affair or business matters she had absolutely known them to find some sort of a substitute. A home is more than a place to stay. It means health and relaxation, recreation and inspiration. It will take fundamental causes for present day juvenile delinquency by the Rev. F. X. Keller who recently addressed the Women's Day of Memories on "The Cause and Cure of Juvenile Delinquency."

Father Exler, who is on the faculty of St. Norbert's College, DePere, Wis., was formerly chaplain of the reformatory at Green Bay, Wis. His experience among the juvenile inmates of this institution convinced him "that parents are largely responsible for the faults of their children, he said.

The prevailing lack of respect for the laws of the land was scored by Father Exler, who said that children could not be expected to observe or fear laws which they were accustomed to hear mocked by their elders on every hand. Among those attending Father Exler's talk were the pastors of Menominee due to a delay in city schools, and various city and county officials.

GRAND RAPIS HOSPITAL OPENS MODERN ADDITION

Citizens Contribute $500,000 to Building Fund

The new $500,000 addition to St. Mary's hospital, Grand Rapids, was thrown open for public inspection in that city, recently. The new building consists of seven stories and a ground floor and conforms in exterior design with the original five-story brick building. The combined buildings now have a capacity of 250 beds.

Some features of the addition are the built-in X-ray illuminators in the wall of emergency operating room and in the regular surgical department, a detail which St. Mary's believes it is the first hospital in the country to use. The addition was erected on the Bacon plan, which requires one central kitchen and one linen storage room.

In the room of every patient is a utility compartment, with lavatory, lee watering, wardrobe locker and all necessities for patient and nurse. Great savings in labor and time for both attendants and nurses are said to result from this plan.

HALF MILLION, WORKERS' AIM

Seek Funds to Free Employed Girls' Home From Debt

A campaign for $500,000 to establish a permanent Girls' Industries Building in Detroit, free from debt, opened recently when over 1,000 women gathered at the Book-Cadillac hotel to hear Agnes G. Regan, executive secretary of the National Council of Catholic Women, make a stirring plea for the welfare of employed young women.

BELLS TINGLING EVERY MINUTE

Telephone Industry Pay $150 that Every 60 Seconds In-to Treasury

The number of telephone conversations varies considerably from hour to hour throughout the day. The greatest number occur in the mornings and afternoons, and they fall away to almost nothing during the small hours of the early morning. Yet if all the calls in the U. S. during 1926 had been evenly distributed throughout the day and night, there would have been more than 45,000 telephone conversations begun every sixty seconds.

Each of these calls netted on the average $1,400 would have been disbursed every minute (or the operating expenses of the telephone industry. Then the calls, and of the above amount the telephone industry would have been busy every minute turning into the public treasury in the form of taxes.

Unfortunately the Christian world has not been busy on every minute all day and night. The telephone industry must maintain a huge system to care for the peak load which comes around ten in the morning and three in the afternoon, and also maintain a reserve to meet the emergency.

The World's Hustlers

Jo Davidson, the American sculptor, departing from his home in France to finish his bust of Robert M. LaFollette and his statue of Walt Whitman, praised American energy.

"It's no wonder we advance," he said to a New York reporter, "for we are the world's great hustlers.

"Yes, sir," he smiled, "in America if you're not up and doing you're down and done."

Bell-Ans Really Sure Relief

Thousands of Testimonials From Doctors, Nurses and Dentists Say So.

For correcting over-acidity and quickly relieving belching, gas, sick-headache, heartburn, nausea, biliousness and other digestive disorders, BELL-ANS has been proved of great value for the past thirty years. Not a laxative but a tested Sure Relief for Indigestion. Perfectly harmless and pleasant to take. Send for free samples to: Bell & Co., Inc., Orangeburg, N. Y. —Adv.

Ducal Dig

Suzanne Lenglen said at a dinner in New York:

"When I began to play golf my friends all patted me at one. One day I was playing at Mont Agel, the golf course high up in the mountains back of Monte Carlo. I was very hot from that day, and the way I backed holes in the green velvet turf was a caution. The duke of Westminster passed as I was hacking away.

"'Ah, mademoiselle,' he said, 'when you get through it won't be a matter of repairing the turf—it will be a matter of retopping the place.'"

Method in It

"But why in the world did you want to elope, anyway?"

"Well, I was in hopes that her family would never forgive us."

Sure Relief

The great value of Bell-Ans in the relief of digestive disorders of the stomach and bowels is proved by its astonishing increase in use every year for the past thirty years. Promptly and properly taken we have never known it to fail. Bell-Ans Tablets to Bell & Co., Inc., Orangeburg, N. Y.

Cannibal Butterflies

Butterflies that eat plant lice and mealy bugs during the larval stage, instead of the usual vegetarian diet, have been discovered in the Orient and New England. Known as ball-streaks, they even carry their cannibalistic habits to the point of devouring their own species during the helpless state of transition from larva into the pupa.

The World's Hustlers

Jo Davidson, the American sculptor, departing from his home in France to finish his bust of Robert M. LaFollette and his statue of Walt Whitman, praised American energy.

"It's no wonder we advance," he said to a New York reporter, "for we are the world's great hustlers.

"Yes, sir," he smiled, "in America if you're not up and doing you're down and done."

Bell-Ans Really Sure Relief

Thousands of Testimonials From Doctors, Nurses and Dentists Say So.

For correcting over-acidity and quickly relieving belching, gas, sick-headache, heartburn, nausea, biliousness and other digestive disorders, BELL-ANS has been proved of great value for the past thirty years. Not a laxative but a tested Sure Relief for Indigestion. Perfectly harmless and pleasant to take. Send for free samples to: Bell & Co., Inc., Orangeburg, N. Y. —Adv.

Important Life Rule

Best of all is it to preserve everything in a pure still heart and let there be for every cause a thanksgiving, and for every breath a song. —Gesner.

Actor Reveals Secret of Health

Biliousness, Indigestion and Dissiness Helped by Ruin-Down Condition, Believed by Tanlac.

R. E. Fulton, popular professional entertainer, 413 North Clark Street, Chicago, says: "Twenty years in the show business undermined my health, sapped my energy, upset my stomach and made me a prey to nervousness.

"When I began taking Tanlac, I had almost given up hope of recovering my lost health. Biliousness and headaches bothered me so that I was nervous, always tired and irritable. From morning till night I suffered indigestion pains and heartburn after every meal.

"I want the world to know about Tanlac. For it has returned to me my lost health, built up my strength."

Tanlac, nature's remedy made from roots, barks and herbs according to the famous Tanlac formula usually wipes out constipation, tones up sluggish liver, puts stomach in shape, vanquishes pain and builds strength. Regain good health. Get Tanlac at your druggist's. Over 40 million bottles sold.

DIURETIC STIMULANT TO THE KIDNEYS.

Standard for Over Forty Years

"I heartily recommend Dodd's Pills, as I have taken them for some time and can truly say that they were a benefit to me. I also believe they will help anybody who has kidney trouble of any kind."

Signed, F. C. Chase,
Welcome Lake, Pa.

THE KITCHEN CABINET

(© 1927, Western Newspaper Union.)

The fragrance of a thought may rise
To nobler life and subtler guise
As still as violets by the brook—
A thing too rare to set in books,
Or cage in song.
—Edward Dayr.

SIMPLE SEA FOODS

There are more edible fish in the sea than edible animals on land.

There are very few fish which caught that are not good to eat.

Brook Trout in Cream.—Brook trout are delicious cooked any way, but to vary this dainty morsel salt the fish lightly and lay in a baking dish or casserole baking pan with just enough water to keep the fish from burning. Bake slowly, basting with butter and water, about fifteen minutes. When the fish is nearly done add a cupful of cream and two tablespoonfuls of water to a double boiler, stir into this two tablespoonfuls of melted butter and a teaspoonful of finely minced parsley. Pour this over the fish in the pan and cook in the oven three minutes. Garnish with parsley and serve.

It has been well established in recent years that cluss, both hard and soft shell, are most nourishing and easily assimilated, especially when the tough and hard portions are removed. As a result, clam juice or extract, is now almost universally employed as a food for invalids.

Clam Broth.—Scrub the fresh clams with a brush until the shells are clean, using several waters. Place in a kettle, cover with cold water and simmer slowly for an hour. This method brings out all the flavor, the real ocean taste, and a highly concentrated broth which will allow diluting. Pour off the broth, strain it through a cloth, season, reheat and serve.

Clam Bouillon.—Heat the broth, add salt, pepper and a lump of butter. Serve very hot in bouillon cups. Add a spoonful of whipped cream to each cup if desired.

Baked Whitefish.—Clean the fish and leave it whole, cleaning it well outside and in and season well with salt and pepper. Put the fish on a well-oiled plank, cover with sliced tomatoes, onions which have been chopped and boiled in bouillon and seasoned with chopped parsley. Pour a little oil over all and sprinkle the top with bread crumbs. Bake twenty minutes, in an oven hot enough to brown well. When the backbone loosens from the fish it is well done.

Recipes and Hints.

As fish is such easily digested food, it should be served as often as possible on the family table.

Deviled Fish.—Take two pounds of any meaty fish, brush a dish with hot fat, lay in the fish and cover with the following sauce: One cupful of white sauce, one-half cupful of chopped green pepper, one-half beaten egg, two teaspoonfuls of salt, one-half teaspoonful of mustard, one teaspoonful of any table sauce, one teaspoonful of grated onion, two teaspoonfuls of butter; brush the fish with the outer half of the beaten egg, add two cupfuls of lightly flaked fish to the sauce and pour over the fish. Sprinkle with bread crumbs and bake in a hot oven until well browned.

Tapioca Pudding.—Cook one tablespoonful of tapioca fifteen minutes in a pint of milk. Dissolve one tablespoonful of gelatin in one-half cupful of water, add one-half cupful of sugar, the yolk of an egg, and add to the first mixture. Pour over stewed prunes, apricots or peaches. When cool stir in one-half cupful of whipped cream.

Cream of Cheese Soup.—Slice a large onion, add a pint of boiling water and boil until tender. Remove the onion and add a pint of milk, with a pinch of soda. Pour this liquid over one tablespoonful of butter and flour cooked together. When the mixture thickens add one-half cupful of grated cheese and a beaten egg. Season with salt and pepper.

Old silk stockings make fine rugs. When you have a run in a good stocking take it at once with a crochet hook and loop the stitch back, then fasten securely.

To make two pounds of butter out of one pound, soften it, but do not melt, and mix with a pint of new milk, add salt and carefully mix. The butter will be lighter in color, and, as we scald, but it will go farther when used on the table.

For a severe chest cold melt two parts of lard and add one part of turpentine. Rub the chest and back well with this mixture, cover with a flannel and in a few hours one will be relieved.

A good sized mustard basket is a helpful servant in the home. It will hold fruit and vegetables when visiting the fruit cellar, or carrying lunch or anything from floor to floor.

Any knives with horn, wood, ivory or pearl handles should never be put into water but washed in the hand without wetting the handle.

A piece of silver money or a penny makes a good utensil to remove paint from windows.

Nellie Maxwell

Reptile Inspires Fear

The domestic fowl will ignore any reptile, but a lapwing, curlew, or snipe will dash away from one as quickly as its wings will carry it. A parrot that has been kept in captivity for many years will show the greatest panic at the sight or a harmless grass snake.

Sarcasm

Diner (to head waiter)—By the way, did that fellow who took my order leave my family?—Boston Transcript.

TUCKS AND PLAITS ADD CHARM; FLOWERS NOW FEATURE HATS

TUCKS and plaits have formed a union. By doing teamwork they are contributing a twofold effectiveness to many a springtime frock. This conjoining of both tucks and plaits in the styling of dress is characteristic of many of the newer styles. The tucks are usually assigned to the blouse, and the plaits to the skirt, after the manner described by the fashion-wise silk frock in the picture. Sometimes the two are even more intimately interworked, for the idea of tucks plus plaits is being carried out in many intricate ways.

As to tucking, novelty is the word this season. 'Tis a fact, tucks have departed from the "straight and narrow path." No longer do they follow the course of row-on-row-orderliness. Rather are they taking to strange and devious curves, zig-zags, scallops, diagonals, and the favored of all, is sunburst tucking, the same radiating from a center like spokes of a wheel.

Not even for as simple a little frock as this in the picture do tucks run straight. They sort of loop-the-loop in a series of curves on the blouse and the result is an added touch of artistry to the general effect.

As to the plaits in the skirt, they are the all-around kind, not merely extending across the front as was the fashion some time ago. The very wide knife pleat is an outstanding style item in this dress, as is also the self-fabric "kerchief neckfile. This frock also carries out the prevailing idea of employing two tones of silk.

Speaking of the novel use of tucks, very smart is the blouse, tucked from neck to hem, those at the top being quite tiny, gradually widening toward the bottom, until at the hemline the final tuck is maybe two inches wide. The same method of graduated tucks running around-and-around is employed for the long sung-fitting sleeves.

At last, flowers, which have been so long absent from milady's chapeau, have re-entered the millinery picture. When certain little violet toques came sailing across the sea to our shores straight from a leading atelier of Paris, they brought with them a promise of more flowers to follow. So it is, that at this moment, more interest is being shown in flower-trimmed hats than for many seasons.

Violets! Myriads of them forming a cunning flower toque, the same accompanied by a flirtatious nose-veil of maline, that is the way the mode forecasts it.

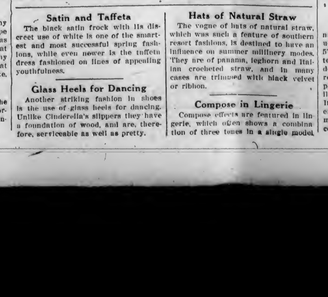
Simple Little Frock.

Flat flower work is most charmingly interpreting this season's floral vogue. With genuine artistry, milliners are designing shapely pads made of silk blossoms, these applied to the hat so as not to disturb its contour. Particularly is this method carried out when trimming the larger shapes, as illustrated at the top in this group.

Some of the French models bear flower bodkpects posed high at the side of the crown as shown on the first hat in the picture. The toque to the right at the top is of wide satin-faced taffeta ribbon, with two large roses becomingly posed to one side. Lavender hydrangeas trim the straw-with-velvet-crown toque below to the left. Two shades of yellow with black velvet form the side crown of the dainty toque which completes this group.

JULIA BOTTOMLEY.

(© 1927, Western Newspaper Union.)



Some of the New Hats.

Satin and Taffeta

The black satin frock with its discreet use of white is one of the smartest and most successful spring fashions, while even newer is the taffeta dress fashioned on lines of appealing youthfulness.

Glass Heels for Dancing

Another striking fashion in shoes is the use of glass heels for dancing. Unlike Cinderella's slippers they have a foundation of wood, and are, therefore, serviceable as well as pretty.

Hats of Natural Straw

The vogue of hats of natural straw, which was such a feature of southern resort fashions, is destined to have an influence on summer millinery modes. They are of panama, lechorn and Italian crocheted straw, and in many cases are trimmed with black velvet or ribbon.

Compose in Lingerie

Compose effects are featured in lingerie, which often shows a combination of three tones in a single model.

THE WORLD'S GREAT EVENTS

ALBERT PAYSON TERHUNE

Napoleon Bonaparte
(Part IV)

(© by Dodd, Mead & Company.)

EUROPE, for the first time in twenty years, could rest in peace and repair its shattered fortunes. Napoleon, who had been the "Bogie man" of a whole seared continent, was beaten by sheer force of numbers; disowned by his own people; and safely stowed away on a distant island, where he could annoy no one. Small wonder that there was thanksgiving in Europe!

But the calm was soon broken. Barely ten months after the allies had imprisoned him on Elba, Napoleon escaped. With 1,000 of his "Old Guard" he landed in France, March 1, 1815. The news of his return swept the country like wildfire. The French nation which, a year earlier, had groaned under his yoke, went mad with joy. Louis XVIII had been a stupid, unpopular king. After a quarter century of military glory and endless excitement it had been hard for France to settle down to humdrum peaceful existence. People spoke of Napoleon as an almost immortal hero.

With one accord army and populace greeted their returned emperor with a frenzy of joy. He moved northward prepared for opposition. But he met with none. His journey to Paris was a triumphal march. Soldiers sent to arrest him flocked to his standard. The gates were everywhere flung open to the Corsican. Poor old Louis XVIII fled for his life, and Napoleon entered the French capital without striking a blow. In his absence people had forgotten his tyranny and selfishness and the havoc he had wrought. They remembered only his glory, magnetism and genius. He was again their idol.

But the Napoleon who returned from exile was not the same sort of man who had overawed Europe. His early life was beginning to tell on him. He could no longer concentrate his thoughts, make up his mind quickly, nor even keep awake at official mosuels. He was living solely on his past fame.

The "Hundred Days" now set in. By meddling some of his former despotism the emperor won over to him those whose memories had at first proved stronger than their sense of treachery. Then their enthusiasm for the purpose of securing the "most cordial and comfort co-operation between nations which are governed by united or liberal, inherit the same literature and laws, recognize the same ideas of freedom and humanity, in the guidance of their national policy and are drawn together by strong common interests in many parts of the world."

Coon's Food Preferences

In Bethel, Maine, is a black and white coon kitten that loves above all else a sublime, preferring it to meat or fish, and will even unscrew the cracker box and steal one in order to satisfy its taste.—When the cracker is accompanied with a bit of cheese or an olive, so much the better. The kitten is also fond of vegetables, especially spinach and cabbage. Its mother was born in a grocery store and lived there, and during her three years of existence ate nothing but lumbango steak, and never, as far as her master could determine, did she drink water or milk.

Original Package

The life-saving crew had just pulled the man's wife out of the surf at Bailon beach. She was unconscious, rescuers and white going close to her at the time, and the husband was consumed with anxiety.

"Shall we apply artificial respiration?" asked the life guard.

"No," bellowed the trembling man. "She's all I have, and I want you to use the real thing!"—Los Angeles Times.

Diving Dog

Doris Pigeon of North Adams, Mass., has a "diving dog." Brownie, as he is named because of his color, likes to go swimming better than anything else. Doris says that one of his best stunts is to stand on his hind legs and dive into the water. Brownie does all the other "dog" tricks, such as "paying," sitting up, and speaking for his dinner, but Doris and her friends think that his "diving" act is entirely different from anything else that dogs usually do.—Washington Star.

Toy Industry Booming

In twenty years the American production of toys has grown from a little over $7,500,000 to $80,000,000. Also the toys are infinitely better, for where the imported ones were formerly made of flimsy tin and lead these now made in this country are mostly of pressed steel and tough wood, well fitted to stand the rough usage of childhood.

The Derivation

"You've never been to India—why do you call your home Emily?"

"Because it's similar to every other house on the street."

Roger Bacon's Error

Columbus was misled into discovering America by the false reasoning of Roger Bacon, who thought that there was only a small ocean between Europe and Asia.

Arabs Make Good as Desert Police

Because of their exceptional military qualities, more noticeable in the service of the French authorities, the Christian tribesmen are acquiring a distinction as conquerors of the Sahara.

They are less known to the world than are the Tuaregs, plunderers of the camel caravans and explorers. However, the Chaambas are earning a reputation in tracking down the despoiling elements and have made it possible to cross the Sahara from Algeria to the River Niger, with no fear of danger.

Staid as the camels on which they are mounted, able to ride over the hot sands for days and nights, stopping only to eat from their little bags filled with dried grass-peppers, and endowed with a keenness of sight that gives deadly accuracy to their rifles, these nomads inspire a great fear among the plundering tribesmen.

Admirers of Bret Harte Get Relics

A portable writing desk presented to Bret Harte, the American author, by friends in England and used by him until his death in 1902, is intended in a group of intimate Harte association items, autographed first editions and letters recently sold at auction in New York city. The objects belonged to Mrs. Richard Bret Harte of Los Angeles, for whose account they were sold.

The desk, which folds into a chest, has a drop front and is fitted with compartments for holding papers and envelopes and four drawers. It was used by Harte regularly in his European period and many of his later tales were written on it. Various personal articles used by him, including his silver pencil, pocket mirror, pincushion case, paper cutter, locket, cuff links and cigarette and cigar cases, also were sold.—New York Herald-Tribune.

For Harmony Between Britain and America

The first important "hands across the sea" movement, designed to cultivate more cordial relations between Britain and the United States, was launched 50 years ago when the Anglo-American association was established, many men of prominence in both countries being interested and enlisted to the support of the movement.

In 1898 the Anglo-American league was formed at Stratford house in London for the purpose of securing the "most cordial and comfort co-operation between nations which are governed by united or liberal, inherit the same literature and laws, recognize the same ideas of freedom and humanity, in the guidance of their national policy and are drawn together by strong common interests in many parts of the world."

The Sad Part

"Where is the young man you said gave such promise?"

"He's doing right his work; was continually tardy. I had to let him go."

"He didn't give you a square deal."

"That doesn't worry me. He didn't give himself a square deal."

Why He Succeeded

Honored politically and professionally, during his lifetime, Dr. R. V. Pierce, whose picture appears here, made a success few have equalled. His pure herbal remedies which have stood the test for many years are still among the "best sellers." Dr. Pierce's Golden Medical Discovery is a stomachic alterative which makes the blood richer. It clears the skin, beautifies it, pimples and eruptions vanish quickly. This Discovery of Dr. Pierce's puts you in firm condition. All dealers have it in liquid or tablets.

Send 10 cents for trial pkg. of tablets to Dr. Pierce, Buffalo, N. Y., and write for free advice.

SCHOOL INFLUENCE

The South Bend Tibune says that a father of that city with a schoolboy son recently was discussing international affairs. The father who is a real internationalist and a great admirer of President Willson's policies was discussing these principles with the boy. When the father left the room he overheard his son confiding to his mother the opinion that "daddy doesn't know much about history."

This aroused the father's curiosity and he found upon investigation that the boy's teacher had been talking against American entry into the world court and had to greatest tent molded the boy's opinion on the subject. The father, according to the Tribune, told the story as a good joke on himself and the incident became a subject of much amusement among his friends. "But," concludes the Tribune, "it raises an interesting question."

The question to which the Tribune alludes is doutless that of the influence of our text books in history, and our teachers upon the future political opinions of the youth of the land. In the South Bend instance the teacher doutless was a real American nationalist. But in all to many instances the internationalists have the better of it in this molding the opinion of the youngsters.

There has been an insidious, and often successful effort on the part of pacifists and educators who think they are liberal, to change our text books in history, for the purpose of stressing "internationalism, 'the "new freedom" disarmament and its correlating theories. The situation is not as bad as it was because there has been a general protest from patrotic societies and patriotic science that is being taught in our public schools.

SIT STEADY.

This a good time not to take too much for granted one way or the other in the Chinese situation. All sorts of stories are coming out of the Orient. Every Chinese faction has a propaganda bureau all its own, and the European powers interested in China of course have a way of censuring the news which comes from their correspondents. There can be little doubt that the situation in China is bad. Just how bad it is only time can tell. It might be that the Cantonese will sweep on to Peking during the present year, and then again it is possible that the so-called nationalists will get set back again.

It is therefore not a good time to enter into any rash undertakings and it is consoling to know that the administration at Washington is not one which is apt to go off on a tangnent on this or any other proposition. The government is of course taking such steps as are necessary to protect Americanlives and American property in China. In so doing the government is only performing its duty. But it will not embark on any definite and sweeping policy in China until it is sure of all the facts.

It is significant to note that with all the trouble in Chinaand the world wide concern it has caused, there has been as yet no effort to call the League of Nations in to iron out the trouble. The League as has been suspected, can only act when Great Britain and France want it to act,and in the Chinese situation these two powers prefer to work things out without any league interference.

NEW ERA COMES IN INDIAN AFFAIRS.

Quaker O'Taylor has written an interesting story of Indians and Uncle Sam's Indian affairs in the current issue of the National Republic, in which he tells of the new era in Indian affairs and how our aboriginal inhabitants are now taken care of. Of the relation of the officials with their wards Mr. O'Taylor says:

"To the officers and employees of the Bureau of Indian Affairs in the Department of the Interior, the Indian is not a problem to be talked and written about in an abstract way at irregular intervals. It is as intimate and personal to many of them as their own family relations, for it is their daily duty to feed and clothe a large portion of the Indian population, minister to their health, educate them, and improve their industrial and social condition.

"Uncle Sam's Indian family now comprise 193 tribes and 225,000 people, who occupy 111,000 square miles of territory in widely scattered sections of the West. The bureau has followed the Indian in his migrations and force from the borders of the original thirteen states to the shores of the Pacific. To administer this empire requires the services of almost 5,000 employees and about $35-000,000 annually.

"The federal government. through this bureau in the Department of the Interior, teaches sanitation to the Indians, promotes

ANNA Q. NILSSON

Anna Q. Nilsson, the popular screen star, was born in Ystad, Sweden. After small parts she soon became leading woman for a prominent producer. She is the true blonde Scandinavian type, with dark blue eyes.

home building, educates the children, encourages thrift and industry,cares for the indigent and helpless, supervises the marketing of Indian products, makes individual allotments of land to Indians, teaches them how to farm and raise live stock, supervises the leasing of lands for noncompetents; sends the tubercular to hospitals and sanatoria, protects their property holdings, sells lands under supervision to secure a fair price, teaches Indian mothers how to care for their homes and children, contructs irrigation projects, encourages the proper utilization and conservation of timber resources,determines heirs of deceased Indian allotees and approves Indian wills, supervises the development and conservation of mineral resources on reservations, purchases annually approximate ely $5,000,000,00 worth of goods and supplies for use at Indian schools and agencies, and sends physicians, nurses and field matrons to Indian homes to improve health and sanitary conditions."

HARD TO REALIZE LOSS BY EROSION

Economy is the keynote of government but nevertheless, according to Nature Magazine of Washington, $200,000,000 are being stolen from the American people, particularly the farmer, every year by one thief.

This culprit is erosion and the total of his thievery is set by Hugh H. Bennett, soil scientist. He asserts that soil erosion is the most important problem confronting the conservation of our natural resources. Millions of tons of rich soil are carried away every year, Mr. Bennett points out, and the United States is far behind most nations of the world in soil conservation. Forest growth is one of the most important factors in preventing erosion and we must not forget that we have laid waste some 80,000,000 acres of land fitted only for forest and left them waste.

MISSIVE OF 1814 LIES LONG UNREAD

Like a voice from the dead, a letter written when Napoleon Bonaparte was exiled "the Corsican toad under the harrow" and "the devil's imp praying for peace" was discovered and unsealed in Chicago recently.

It was written in London in 1814 by R. Ackermann, London artist and publisher, and addressed to a book collector, "Codrington, Esq.," who never opened it.

It was found by W. Russell Button Chicago manager of a London art establishment, inside an old copy of a pictorial "History of the University and City of Oxford." The letter announced the forthcoming publication (in 1814) of a companion volume on Cambridge.

Artists' Ways

Cornelius Vanderbilt, Jr.—the Vanderbilt of tabloid newspaper fame—told a story at an artists' dinner in New York.

"Artists nearly always despise and hate one another," he began. "They can't wound one another cruelly enough.

"An impressionist called one day on a cubist whose little son had just died. Laughing in the face of the grief stricken parent, the impressionist lit a cigarette and said:

"'Ha, ha, Dawber, another of your works skied, what?'"

Half Lit

The first selectman of a town in northern Maine walked into a Portland department store to do some shopping.

"I'd like to see some of those bridge lamps you're advertising so cheap," he demanded.

He was shown the articles in question.

The customer eyed them doubtfully. "Do they light bridges with them darned things?" he finally ejaculated.

Many special household articles, great values at 10c each, placed in center of store on display counter.—Staley Bros. Hardware.

Soda Fountain Opening Saturday. Specials for Saturday and Sunday:—Maple Nut Ice Cream, Strawberry Ice Cream, Nut and Fruit Bricks, Bundy Pops.—Fessenden the Druggist.

PRESS COMMENT

Why the Taxes.—Professor Robert M. Craig, of Columbia University, tells us in a national magazine that aggregate taxes, federal, state and local, in 1926, established a new high record His statistical tables, drawn from well accredited sources,place approximately total for1926 —the previous "peak" year—at $,900,000,-000. The calculation for that year includes the"special assessments so liberally used to finance local improvements." The estimated total for 1926 is $8,700,900,000, but it does not include those "special assessments" whose addition probably would top the 1926 record. That taxes should have gone on thus increasing is largely the fault of the American people themselves. For there has been strict economy in every department of the national administration, and we have no monarch to impose levies against the public's will. Still while Professor Craig considers the tax problem one of major importance, he finds in it "no real occasion for alarm. Its proportions, though large, are not terrifying. Never has there been so much interest in the problem of taxation, and never such an intelligent interest." Against this source of comfort, however, must be listed the fact that several states have adopted the "nuisance" taxes discarded by the federal government. The governor of Arkansas was quoted the other day as saying: I have searched the whole state now for something to tax." There are too many laborers in that particular field of search and research just now.—Ft. Wayne News Sentinel.

His Real Field.—Dr. Sherwood Eddy is on terms of cordial friendship with the bolshevik crowd and is trying to advance its interests in this country by urging the American government to recognize the regime in Moscow. At the same time Dr. Eddy is an ardent pacifist. He condemns military training in institutions of learning. He decries real preparedness. He says it is quite proper for a person to refuse to fight for his country in time of trouble.

In view of this, we point out to the doctor these facts:

Pursuant to a recent order of the soviet government, all school children in Russia are being subjected to compulsory military training of a rigid and practical sort by way of preparation for actual war. At the same time, Moscow is maintaining a regular army of 562,000 men at a cost of $616 for each man—the total budget being about$346,000,000, which is a large sum in a nation where a majority of the people live under conditions that Americans would consider abjectly miserable.

Besides this, the regime is actively engaged in giving military aid, comfort, advice and training to the Cantonese army, and is busily engaged in fermenting strife, both domestic and international, in several parts of the world.

Instead of being friendly to America, where there is no government compulsory military training, where the defense establishment is vestigial, and where his talents are neither needed nor appreciated, Dr. Eddy ought to go back to Russia and do his pacifist preaching to his old friends of the red oligarchy. They are the people who need it. Russia is the doctor's real field of labor.—Detroit Free Press.

Good Roads Notes

There are about 3,000,000 miles of roads in the United States, according to recent estimates.

* * *

Santo Domingo is pushing to completion its program for general improvement of its highways.

* * *

Twenty millions for highways may also be considered a reason why the material salesmen are interested in better roads.

* * *

Twenty-five states now possess improved highways entirely across their length and 16 of these have completed trans-state arteries in two directions.

* * *

The Department of Agriculture, through the bureau of public roads, announces that recent research tends to indicate that wooden flooring in bridges is neither efficient nor economical and should be replaced by the use of concrete.

* * *

Farm lands in the almost isolated rural districts of the United States have increased in value by more than $2,400,000,000 as a result of construction of nearly 500,000 miles of improved highways, according to the American Road Builders' association.

MISS SYLVIA BLAIR

Miss Sylvia Blair of Amherst, Mass., has been selected as Tree-day miss treas at Wellesley college. Tree-day exercises are held at the end of the academic year.

THE THEATRE

Great Company Supports Gilda Gray in "Aloma."—Gilda Gray, famous musical comedy dancer, the lady who popularized the shimmy and hula-hula in this country, has six prominent screen players in the cast of her first Paramount starring vehicle, "Aloma of the South Seas," which comes to the Palace on Wednesday and Thursday.

Warner Baxter is "Nuitane", Gilda's South Sea lover; Percy Marmont, "Bob Holden," "Aloma's white man; Julienne Johnson, "Sylvia"; William Powell, the villain; Harpy and Joseeb Smiley is Gylda's uncle.

Maurice Tourneur directed "Aloma of the South Seas." James Creelman adapted it from the play by John B. Hymer and LeRoy Clemons.

* * *

Palace Saturday and Sunday.—Richard Dix! Again he hits! He climes up higher and clinches his reputation as the fastest stepping male dramatic comedian on the screen today. The young man as an Indian with a feather in his hair, as a quarterback in moleskins, or as a rich man's son in evening clothes is equally at ease. He rode to popularity on polo ponies as "The Lucky Devil," "The Vanishing American" and "The Quarterback." He takes great strides with the public for he has taught them that he never disappoints. A Dix comedy always means thrills and laughter. He is now treating to "Paradise for Two."

Aunt Is Uncle

"I want a package of Aunt Jerusha's Dixie Kid," he said.

"Here it is, madam."

"This isn't what I want. This is Uncle Josh's Cereal Food."

"Yes, ma'am. It's exactly the same thing. Uncle Josh is Aunt Jerusha's other name."

"Who is Aunt Jerusha, anyway?"

"Aunt Jerusha is a couple of old millionnaire bachelors in Michigan!"—Detroit Free Press.

The Darker View

The chairman at a company meeting had been exjoined to shout prosperity.

"Always prospects," said a gloomy shareholder, "but never results. I belgin to doubt if results will come."

"Oh, Mr. Jones, you're a pessimist!" cried the chairman.

"I don't deal in it," said the shareholder. "A pessimist is a man who has had too much to do with optimists."

Stanley Memorial

A tablet is to be erected in a Fleet street church in London to the memory of Stanley, the African explorer, It is to be of metal to bowerful with an inscription on either side of a central symbolic figure. One inscription is to refer to Stanley himself and the other to the missionaries in Uganda whom the explorer aided.

Helping the Dream Along

Mrs. Blinks—My dear, I want a hat the perfect picture of a hat. Will you get it for me?

Blinks—Sure. I'll make a Welsh rarebit for you to eat just before you go to bed.

Misjudged

Housewife—I gave you a piece of pie last week and you've been sending your friends here ever since.

Tramp—No, pardon, lady—my enemies.—Sydney Bulletin.

A Slap

Glindys—I wish I could keep my good looks!

Marge—Well, the first thing I would suggest, dear, is to get some.

Filling Up

"Is this a filling station?"

"Yep."

"We want five gallons of gas and eight hot dogs."

Motor Statistics

There is a motor car for every five persons in the United States—but some have several and others none.—Toronto Star.

If you are looking for bargains in household specialties, your attention is called to articles on display in our store. All priced at 10c each.—Staley Bros. Hardware.

The Crucible

The passing over from one year to the next offers opportunity for stock taking or inventory-making in life. What interest in service has my life yielded? Life has been considered by some one as doing business under the firm name of "Soul & Company." Soul is the senior partner. Body is the associate. Journey first is the time to set down the income and the outgo of the character, to consider how life's business prospers; to determine whether "Soul & Company" are rich in the coin of heaven or are facing moral insolvency.—Cheesman A. Herrick.

Party-Line Incident

"Whenever my sister called up on my brother, she did every morning at a certain hour, the people downstairs listened in. That led to installing a private line," writes M. G. "A short time afterward a member of the family sent out one of the newspapers. She said, 'You're not on our party line any more, are you?' The answer was 'No.' 'I'm sorry,' said the eavesdropper, 'because we don't get the latest news any more.'" . . . That sort of evened it up.—Capper's Weekly.

Celebration Passed Up

Fourth of July in Vicksburg, Miss. is much the same as any other day. It is the only city in the United States which does not celebrate the Fourth, as it was on that day that the city fell to the Union troops during the Civil war.—Detroit News.

WANT COLUMN

LOST—Elk emblem locket. Initials on outside; picture inside. Liberal reward for return of same to the Sentinel office.

FOR SALE—Large size Victrola, practically new. Peter Neilson, 405 Dixon Ave.

FOR SALE CHEAP—Ten acres of land inside city limits. Charlevoix State Savings Bank. 20-tf

FOR SALE—Cottage very desirably located on Petoskey avenue. Parties interested in a Charlevoix cottage should investigate this offer as an attractive price will be made on this property. Address F. A., care Sentinel, Charlevoix.

FOR SALE—Four desirable lots facing Michigan Avenue—nothing better in this residential district.
BARRY-MEECH CO.
Charlevoix, Mich.

FOR SALE—3800 foot frontage on Walloon Lake. About 100 acres of land—will sell as a whole or subdivide. E. J. GLAZA 440 Pearl St., Boyne City Phone 324. 11-tf

WANTED—Boys and girls from eight to eighteen years of age, to earn spending money and attractive prizes by working for a well-known and popular magazine. Full instructions will be given, and no investment or expense is needed. Address Mr. Gordon, The National Magazine, 425 10th street N.W., Washington, D.C.

ATTRACTIONS FOR THE WEEK

Saturday-Sunday
Richard Dix in "Paradise for Two," with Betty Bronson. Another do-luxe Dix love comedy. A smashing, crashing funderbolt by the star director combination responsible for "Womanhandled,"and "Let's Get Married." Dix opens wide the gates of laughter in his latest tickling love-tangle. If you own a pair of eyes and a funny bone, come and give them both a treat at "Paradise for Two." Also an Educational comedy "Open Spaces."

Wednesday-Thursday
Gilda Grey in "Aloma of the South Seas," with Percy Marmont, Warner Baxter, Julianne Johinston, William Powell. Gilda the golden girl; radiant star of the Follies. Alluring empress of the dance. Now she comes in her first starring motion picture doing the dance that made her world famous. Also Felix the Cat and a Fox News.
Coming—Tom Mix in "Broncho Twister."

CHURCHES

Methodist Church.

C. E. Pollock, Pastor.

Every Junior is expected for the 10:30 a. m. service. The pastor has something for them.

"Insurance Atonement"—is the sermon subject at 10:30 a.m. next Sunday.

Study the Transfiguration at Church School at its twelve o'clock session April 14

A great feature service next Sunday evening at 7:30. The pastor's sermon subject will be "Consternation." Special features of the evening will be, singing from the new book, instrumental music, a dramatization by several young people of a marvellous New Testament idea entitled, "The Young People Talk It Over."

Note the change of time for the evening services,—Epworth League at six thirty and evening worship at seven thirty. The public will enjoy next Sunday in the church.

The Methodist Men of the Detroit Area will meet in Lansing next week, April 25-27. A great program is planned, Men from all over Michigan are making great plans to attend. Some from the Charlevoix Methodist Episcopal Church are expecting to go.

Congregational Church

Rev. B.G. Mattson, D.D., Minister

There will be the several services at the First Congregational Church Sunday morning at 10:30. Sermon by the pastor.

Sunday School at 12 o'clock.

Evening service by the young people at 6:30, assisted by the Junior choir.

Irontan service at 2:30 p. m.

Church of God

Rev. Paul L. June, Pastor

Services held at the Chapel on West Dutlbut Avenue

Morning service at 10:30.

Sunday School at 11:45.

Evening service at 7:30.

Prayer Meeting, Wednesday evening at 7:30.

St. Mary's Catholic Church

Sundays 8:00 a. m., and 10:00 a. m.

Mondays and Tuesdays 8:00 a. m.

Saturday 7:00 a. m.

Rev. Fr. Odelo.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "Probation After Death."

Sunday School 12 o'clock.

Wednesday evening service 7:45.

Reading room, Tuesdays and Saturdays, 2 to 5 p. m.

The public is cordially invited to attend our services and use our reading room.

WATER NOW SPREAD BY ELECTRIC PUMP

Irrigation is now beginning to be adopted in states east of the Missis. sippi river, where the farmers for ages have said "God alone makes it rain." Electric pumping is furnishing water for hundreds of overhead pipe-systems sprinkling outfits on truck farms and now irrigation is used for other crops. A Virginia farmer employed it to raise alfalfa during 1926. A Pennsylvania farmer near Altoona has 50 acres thus covered by "peace insurance." It is calculated by the committee on the relation of electricity to agriculture that electric pumping for each irrigation ordinarily requires 400 kilowatt-hours per acre each season. Crop yields are increased by water sufficiently to make a profit for the farmer over his expenses.

Still View Lenin's Corpse

So well was the body of Lenin embalmed that thousands still view its lifelike lineaments daily at Moscow, though his death occurred several years ago. Recently the authorities were accused of substituting a wax figure for the corpse. They sent for a German scientist to open the case and prove to the public it was really Lenin's body. While in power Lenin tried to suppress all religion. Today the religious Russians whisper that the devil himself is preserving Lenin's body that he may burn it later.

How Many Are "You-All?"

A reader complains, in the Adventure Magazine, that the expression "you-all" is often used in Western or Southern stories as applying to one person, which, he says, is never done in reality.

Another reader reports having heard the expression in Massachusetts; Ohio, Washington and from a gatekeeper at a New York city ferry, and that it often is used by the singular. Is there any rule about this?

In Hoosier Eden

Recently a North side family was passing the West Washington street bridge. One of the party spoke of a huge stone placed at the end of the bridge to mark the spot where the large of the first Indianapolis settler stood.

On hearing the remark a daughter, age eight, asked:

"Mother, is that where Adam and Eve lived?"—Indianapolis News.

Clock Induces Sleep!

Based on the fact that a softly humming, monotonous sound often serves to induce sleep, a clockwork apparatus patterned by a German doctor produces the desired noise for about forty minutes after winding. In order not to awaken the person using it by an abrupt cessation of the sound, this gradually becomes weaker until it finally dies away.—Popular Mechanics Magazine.

Didn't Forget His Manners

A child was dining with his parents at the Claypool hotel. Having finished dinner he and his parents rose to leave. The boy being well instructed in good manners said to the waiters, "Goodby, everybody. The cake was good and I had a nice time."—Indianapolis News.

Lucky Vermonter

Henry Young of Milton, Vt., lost his pocketbook, containing $70 and a $100 Confederate bill, on the main street of that town. About a week later, after the snow had melted, he found his missing property.

Old Pit Pony

A thirty-year-old pony has just been retired after making a record of 24 years' service in a mine in Scotland. Butler, as the pony is called, spent 14 of these years underground, during which time he never saw the sun.

Bear Suffocated in Tree

After sawing through a large cedar tree stump near Keystone, B. C., two ranchers were amazed to discover that they had decapitated a bear. Evidence showed that bruin had entered through a hole at the roots of the tree. Scratching the rotting wood inside, the animal released enough chips to block the hole and cut off his air supply. The body was in a rolled-up posture, suggesting that he had been attempting a turn when he died through suffocation

Soda Fountain Opening Saturday. Specials for Saturday and Sunday:—Maple Nut Ice Cream, Strawberry Ice Cream, Nut and Fruit Bricks, Bundy Pops.—Fessenden the Druggist.

A Fact

Professor—Binks, have we unconscious minds?

Student—Yes, only some have minds more unconscious than others.

Soda Fountain Opening Saturday. Specials for Saturday and Sunday:—Maple Nut Ice Cream, Strawberry Ice Cream, Nut and Fruit Bricks, Bundy Pops.—Fessenden the Druggist.

PERSONALS

W. L. Phillips of Grand Haven, was a business visitor here yesterday.

Ed. Goldstick spent the major part of last week in St. James on business, returning to Charlevoix Saturday.

Dr. Leahy, the optometrist, will be at the Hotel Charlevoix, Monday May 2nd. Hours from 10 a.m. to 4 p.m.

Mr. and Mrs. W. E. Parmelee motored to Bellaire last Sunday, spending the day with friends in that county seat town.

Mr. and Mrs. Harrison Bedford are again occupying their Park avenue cottage after an absence of several months from the city.

"Bob" Logan of Petoskey was a business visitor here last Thursday and while from his business spent some time calling on old time friends.

Pedro and Bridge will feature the entertainment and meeting of the Busy Bee Club next afternoon at the residence of Mrs. John Bugbee.—Ellit Sbc.

Miss Marion Sears, who has been here for several days with her mother, Mrs. F. M. Sears and other relatives, returns to Pittsburgh, Pa., today.

Messrs. A. D. Crimmins, C. W. Mc-Bess Friday afternoon at the residence Donald and A. J. Maynard all interested in banking business in Grand Rapids, were Charlevoix visitors last Tuesday.

William M. Sears, who was called to Charlevoix on account of the death of his father, Frank M. Sears a few days ago, returned to Chicago early this week.

The ladies of the local Baptist society will offer a line of quilts, rugs, cosmetic, for sale next Saturday in the building owned by Addie Holley, opposite the Hotel Charlevoix.

The steamer Griffin, Captain James H. Gallagher, left her winter quarters at Boyne City last Saturday, passing through this port on her first trip of the season, bound for Escanaba.

R. F. Sloan Sr., motored up from Muskegon Tuesday and will spend a day or two longer here attending to business interests before returning. Today he makes a trip to Fox Island.

Rev. Fr. McMennon made the trip from St. James to Charlevoix on the Rambler last Monday, later in the day he continued to Grand Rapids where he will spend the major part of the week.

B. G. Mattson D. D. pastor of the local Congregational society was called to Hilsdale on business matters last Tuesday. He will according to present plans, return to Charlevoix Saturday.

The S. S James E. Sanford is taking on a new appearance due to the expert workmanship of painters handy with brush and paint. With green bull, white lower works and red trim the ship looks better than ever.

The steamer J. H. John cleared from this port at an early hour last Saturday morning, sailing for Petoskey where she will take on a cargo of cement for some lake port, her first trip of the season.

Mr. and Mrs. Frank M. Gissaford, for some months past visitors in Florida and other Southern States, returned to Charlevoix a few days ago and once more occupying their residence on Dixon avenue.

The state owned ferry, Mackinaw City, was placed in commission several days ago on a three-hour schedule, leaving St. Ignace for her first daily trip at 6:00 a.m. The sister ship St. Ignace will soon be placed on the same route and following about the same schedule as during the 1926 season.

Mrs. C. L. Judd returned to her home Saginaw, last Saturday. Mrs. Judd is a sister of the late Frank M. Sears, her trip from Saginaw being made earlier in the week in order to be present at the funeral service held last Friday afternoon at the Dixon avenue family hour.

Allan Shapton and Bert Carey motored in from Miami, Florida last Thursday. They spent the winter in the Sunshine state, coming here at an early stages, visited many places of interest and report having enjoyed a splendid vacation trip throughout the time they were away from Charlevoix.

Gilbert Saltonstall and Raymond W. Faulkner returned to Ann Arbor and their studies at the U. of M. last Monday, leaving their return here at an early hour on Monday. They were accompanied by Roy Graham of Harbor Springs, also a U. of M. student. The trio making the trip to Olivet by automobile, the remainder of the distance by rail.

William R. Montgomery a resident of Petoskey for upwards of a quarter of a century, died unexpectedly at his home in that city last Friday morning. He was a veteran of the Civil War, past commander of Lombard Post G. A. R. and a life member of Newaygo Lodge No. 131, F. & A. M. He was about 79 years old, a native of Canada, born in Hamilton, Ontario.

Mr. W. H. Miller received a message yesterday that Mrs. A. B. Scrsborough passed away at her home Bonham, Texas at a late hour Tuesday evening. Aside from the notice of death the message carried no further information. She was the wife of Mr. A. H. Scarborough, President of the Belvedere Golf Club, prominent in social affairs at the Belvedere Club and held in high esteem by local citizens and Charlevoix summer visitors.

Mr. and Mrs. W. S. Richardson for several months past visitors on the Pacific coast, mainly in California, returned to Charlevoix last Thursday night. During their western trip they visited Tia Juana, a noted town outside the confines of the U. S. A trip taken by the multitude of sight-seeing tourist; a trip that few visitors overlook; one that all enjoy and long remember.

Michigans quota for the C.M.T.C. at Camp Custer and Fort Brady is being rapidly taken with prospects of more applications for membership than can be accepted by officials in charge. The practical move for those interested and who desire to take this vacation outing at government expense is to make application at once, otherwise the quota will be filled, resulting in late applicants being denied admission to camp benefits.

Mr. and Mrs. R. E. Gids motored up from Lansing early this week to inspect the work underway at their country home near here and to make extensive improvement work which has been under consideration by them for some time past. Rapid progress has been made in their building program and with the new work under way the entire place begins to take on an appearance pleasing to the eye as well as the appearance of comfortable hospitality for the owners within a reasonable period of time.

This section was visited by a splendid warm rain storm last Saturday night, and this was accompanied by some display of electricity and heavy peals of thunder. Monday morning was bright and clear. Lawns took on a fresh and green appearance. Later in the day the sun was wholly obscured by a dense fog that prevailed throughout the major portion of the day, necessitating the placing of the fog signal bell at the outer harbor into action for the benefit of the lake going ships and navigators in nearby waters.

The vocational lecture by Charles Mitton Sanford, who appeared for the Charlevoix high school at the Palace Theatre last Monday night delivering a regular number on the Lyceum course, was well received and thoroughly enjoyed by the audience. Mr. Sanford is a pleasant speaker from the platform, has a fund of common sense that he applies logically, speaks largely from personal experience gained through contact and observation and keeps in touch with his listeners all of whom speak in praiseworthy terms concerning his appearance here and his address.

Sheriff Vaughan was called upon a few days ago to serve a warrant under which Monroe VanCamp was charged with an attempt to commit statutory rape upon a fourteen year old girl. The man was finally located by officials in Ionia who made the arrest and turned over to Sheriff Vaughan, who in default of bail held VanCamp in custody at the county jail. An effort is being made to secure bail for VanCamp but up to date such effort has been fruitless and unless such is procured the defendant in the action will continue with Sheriff Vaughan until the case is disposed of by court action

Mrs. Era T. Kutsche, owner-manager of the Little French Novelty Shop, operated in Charlevoix during the summer season, motored up from Grand Rapids early this week. She was accompanied by her son William T. and her mother, Mrs. Anna Tuxbury, the trip being made primarily in order that Mrs. Kutsche could look after her business interests in Charlevoix; then, too, it was vacation week for Grand Rapids school students of which William T. is one. With good roads and fine weather conditions it was an excellent time and opportunity to make the round trip purely for pleasure even though business had not been taken into consideration.

M. Spangenburg operator of a soft drink place at Boyne City, was visited by Sheriff Vaughan a few nights ago accompanied by other officials, who under a search warrant proceeded to search the premises. They found some evidence, twenty-three gallons of moonshine, plenty of home brew and a barrel and jug of hard cider; enough to convince the authorities that the business was not exactly in compliance with statutory provisions. Spangenburg gave bond for his appearance at the next term of circuit court. Some of the liquor taken are being held for evidence, some confiscated and dumped. Spangenburg can now explain to the court his position in the matter.

That representative J. M. Harris of this district is on duty in Lansing is evidenced by a write up given in the Pontiac Daily Press, the writer of which pays Mr. Harris a high tribute as a member of the lower house and his ability from a professional standpoint. "Judge" Harris as he is familiarly called by Northern Michigan citizens generally, has long been recognized as an able attorney, one who has high legal ability combined with a clear understanding of the law, a man who has a judicial mind, an exceptional student and a hard worker. It is pleasing to note that he has special qualifications for public service that extends and is recognized the cughout his district and far beyond its boundaries. The affairs of this representative district and the state are in safe hands when we have men of Mr. Harris type built from a legal and business view on duty in legislative halls. More men of the same mental caliber would advance progress of the state and could produce beneficial results by way of fewer as well as superior laws.

Household Specialties priced at 10c each will be placed on our bargain counter. Every article worth more. All are necessities. Staley Bros. Hardware.

L. O. Bloomer, banker of Kalkaska, spent a little time here Tuesday.

A. V. Smith of Grand Rapids, spent two or three days here on business.

George W. Hawthorne of Bay City, was a Charlevoix business visitor last Monday.

Dr. and Mrs. R. B. Armstrong, visitors in Chicago and Indianapolis for the past month, returned to Charlevoix yesterday.

Miss Isabelle Hines, who spent the winter months with relatives and friends in California, returned to Charlevoix last Tuesday.

Mrs. C.E. Bailey who has been spending an extended vacation in the West, principally in California, is expected to return today.

Monday, May 2nd, is the date when Dr. Leahy, the optometrist, will be at the Hotel Charlevoix, for one day only. Hours from 10a to four.

Mrs. P. E. Cartier motored to Grand Rapids last Monday with her son, Dr. C. Cartier, who spent the week end with his parents and Charlevoix friends.

Mr. Frank A. Lesher, one of Antrim counties most substantial citizens and representative farmer, residing near Mancelona, was a business visitor here yesterday.

All Odd Fellows and Rebekahs are requested to meet at I. O. O. F. Temple Sunday April 24th at 9:30 a. m. for the purpose of attending the morning service at the Baptist church.

Mr. and Mrs George Broderick entertained a party of friends from Boyne City last Thursday night. The Boyne City friends were: Mr. and Mrs. J. F. Dean, Mr. and Mrs. Clifford Burnett, Mr. and Mrs. Alfred Sarasin.

A fire in the business district destroyed four frame buildings in Kalkaska last Tuesday morning, together with their contents. Work by the local fire department prevented the fire from spreading to other and more modern store buildings in the threatened district. Loss covered by insurance.

Mr. Albert Bridge, who with Mrs. Bridge spent several months in the west with Pasadena, California as their headquarters, returned to Charlevoix last Monday and is again on duty at the County Bank as its president. Mrs. Bridge accompanied him on the return trip as far as Chicago, where she will remain a few weeks before continuing to her home here.

Captain John Roen will soon enter this port with his new steamship, the Craycraft, a recent purchase from the U. S. shipping board. The ship sailed from Newport News last Tuesday and on her trip from salt water to the Great Lakes will carry a full cargo of sugar from Philadelphia to Milwaukee. Following the delivery of her cargo the Craycroft will proceed to her future home port, Charlevoix.

Frank A. Keiyan of Mackinac Island spent Wednesday night in Charlevoix. He leaves today for Lansing, where he will attend a meeting of the Mackinac Island State Park Commission at which Governor Green will be present. At this meeting tentative plans will be formed and program of ceremonies adopted for the entertainment of various state governors during the Governors Conference to be held on Mackinac Island this season.

A new "Frigidaire" Knight Soda Fountain, recently purchased by F. S. Myers is being installed today by a special representative of the manufacturer. The "Frigidaire" fountain is something modern in the way of a fixture for ice cream and soda fountain use, has many advantages over the old types does away with the handling and cost of ice and much laborious effort in connection with fountain work. The new fixture is neat in appearance, conveniently arranged, perfect in point of sanitation, making for an exceptional feature of equipment in Mr. Myers place of business.

The Steamship Griffin, Captain Gallagher, cleared this port for Escanaba last Tuesday forenoon on her second trip of the season. When some distance out she encountered heavy weather and high wind necessitating her return to this harbor where she arrived late in the afternoon for shelter, where the ship remained through the night, entering Lake Michigan Wednesday forenoon in her second attempt to negotiate the distance and reach her point of destination on the north shore, evidently with success as the ship has not returned with her second cargo at this writing.

The Genevra Green cottage 410 Antrim street has been ordered recently by some person at present unknown with damage to the building through forcing an entrance with further loss of personal property. An effort is being made to apprend the guilty party. Should this be accomplished there will be a rigid posecution of the offender. The forceful entrance to other peoples houses is under the law a most serious offense, whether or not the property is temporarily vacant, and parties found guilty of committing an offense of this nature are headed toward service for the state in some one of its penal institutions.

Bargain hunters will find a large variety of articles for everyday use on our Bargain Counter. The price, while they last, 10c each. Every article is worth more. Come in and look them over. Quality and price will surprise you.—Staley Bros. Hardware.

Record Worth While

In school buildings, material equipment and pedagogical experiments America leads the world.

Easter Service

The Easter season was very happily observed in the First Methodist Episcopal church with a week of interesting services, beginning with "an all day service" April tenth, and continuing with public services each day, excepting Monday and Saturday, and closing with the Easter day services last Sunday. The outstanding features of the Sunday worship were; a fellowship hour with the Sacrament of the Lord's Supper and receptions into the church at 9:30 a. m., and Easter sermon at 10:30 a. m., an Easter musical vesper service at 4:15 p.m. Remarkably good congregations attended all these services in the morning sermon the pastor's theme was, "Continued Living." He stressed the New Testament teachings that the resurrection life introduces the human race to the larger universe of spiritual living, to the prospect of continued living, to the faith of a resurrection body in a spiritual universe, and to the hope of a perfecting personality in the great hereafter, with all that this latter fact involves of fellowship and established achievements. Excellent Easter music made a fitting background for the message. The vesper service program was pleasingly rendered as follows:

Orchestra "Poet And Peasant"
J. S. Seredy.

Hymn.....
Easter lesson.....455.
Pastoral prayer.
Anthem, "Thanks be unto God."
Ira B. Wilson.
Offertory.
Orchestra.....'Old Favorites."
Violin solo, "Abide with me."
Henry Parker. J. R. Pollock.
Vocal solo.....Frank Poole.
Anthem, "How Golden Trumpets."
E. L. Ashworth.
Duet, Bells and violin, "Ufen golden morn." Merritt Miller, J. R. Pollock.
Orchestra, "Calvary,"....Paul Rodney.
Hymn.....66.

During the Easter week there was a large number of baptisms, both children and youth, and many were received into the church. The church was tastefully and appropriately beautified with ferns and flowers suited to the Easter season. This is one of the great festival occasions of the church year, and the loyalty and talent of the many faithful workers of the church and congregation made possible its proper observance. Much credit is due vocalists and instrumentalist for the success of these great services of the church.

Card of Thanks

We wish to express our deepest gratitude and appreciation for the many kind and thoughtful attentions of our friends and neighbors during our sad bereavement. They have been a source of great comfort to us all.
Miss Ida C. Sears.
Miss Marion Sears.
Mr. and Mrs' Franklin C. Sears.
Mr. and Mrs. Wm. W. Sears.

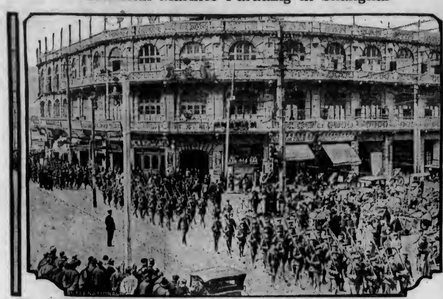
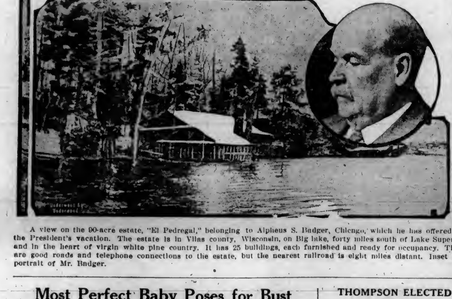
The Hollelujah victory was that gained by the Union over the combined Picts and Scots at Mold,

American Marines Parading in Shanghai



With flags flying and band blaring, the United States marines lauded from the U. S. S. Chaumont and Pecos are shown marching through the streets of Shanghai to impress on the minds of the natives that America's fighting forces are not to be trifled with.

"El Pedregal" Offered for President's Vacation



A view on the 90-acre estate, "El Pedregal," belonging to Alpheus S. Badger, Chicago, which he has offered for the President's vacation. The estate is in Villas county, Wisconsin, on Big lake, forty miles south of Lake Superior, and in the heart of virgin white pine country. It has 25 buildings, each furnished and ready for occupancy. There are good roads and telephone connections on the estate, but the nearest railroad is eight miles distant. Inset is a portrait of Mr. Badger.

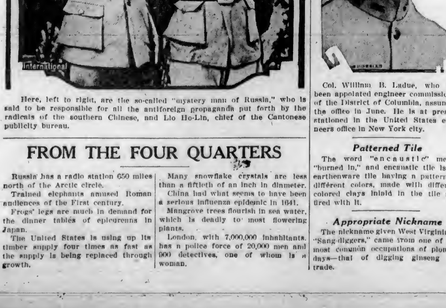
Most Perfect Baby Poses for Bust

THOMPSON ELECTED

Ernesto Perugal, sculptor, making a bust of little Mildred Murcia Fichtenfeld of Brooklyn, N. Y., who is just sixteen weeks old. She is America's most perfect baby, being so adjudged by its bust.

Feeders of Anti-Foreign Flame

D. C. COMMISSIONER



Here, left to right, are the so-called "mystery men of Russia," who is said to be responsible for all the antiforeign propaganda put forth by the radicals of the southern Chinese, and Lio Ho-Lin, chief of the Cantonese publicity bureau.

FROM THE FOUR QUARTERS

Russia has a radio station 650 miles north of the Arctic circle.

Trained elephants amused Roman audiences of the First century.

Frogs' legs are much in demand for the dinner tables of epicureans in Japan.

The United States is using up its timber supply four times as fast as the supply is being replaced through growth.

Many snowflake crystals are less than a fiftieth of an inch in diameter.

China had what seems to have been a serious influenza epidemic in 1641.

Mangrove trees flourish in sea water, which is deadly to most flowering plants.

London, with 7,000,000 inhabitants, has a police force of 20,000 men and 900 detectives, one of whom is a woman.

Sanitation Kills All Swine Risks

Use of System Transforms Industry on Many Farms, at Small Cost.

On many farms the hog business has been transformed through the use of the simple system of swine sanitation which the college of agriculture, University of Illinois, has been demonstrating over the state during the past few years in co-operation with county farm advisers and interested farmers, according to E. T. Hobbins, live stock extension specialist.

Last year, for instance, 1,213 farmers in 75 counties of the state co-operated in demonstrating the methods and results of the system to their neighbors. Before the end of the year there were 160 written reports sent in by farm demonstrators from 28 counties. These have been summarized to show results under practical farm conditions.

Sanitation Pigs Best.

These farmers raised 31 per cent of the pigs which were saved at farrowing time, and only one runt developed among every 71 pigs on the average, as compared with one runt to each 14 pigs among those raised the old way. With sanitation the litters raised averaged 1.5 pigs more than previously upon the same farms, the pigs averaged 24 pounds heavier when four months old, and they were ready for market at small weights when they averaged six weeks younger than usual. The sanitation pigs averaged to be also a profitable thing others, and the need plan to continue to use this sanitation system.

Reports from 29 counties indicate that sanitation helps to keep animals free from "serum breaks" and other troubles after vaccination; that they seem to escape better than other herds, and that they seem to show more resistance to cholera than do herds raised the old-style way.

Expensive Equipment Not Needed.

The sanitation system does not require expensive equipment nor supplies. The reports show that the size of litters raised to four months old was actually increased by the use of small self-feeders. Also that the size of litters raised was not much affected by the month of farrowing. The average was 6.3 pigs a litter.

There were fewer runts to 100 pigs where no hogs had been on the pasture for at least a year. The percentage of runts was smallest in large pastures. There were also the fewest runts where there was running water to drink.

There was very little loss of sanitation pigs from sore mouth whether their sharp teeth were cut at birth or not. The size of litters raised was not increased where the sharp teeth were reduced by the use of expensive mineralic. The largest litters were raised and there were the fewest runts where the sanitation work was thoroughly done.

With such a splendid showing in health, vigor, uniformity, cheap gains and larger profits, the method seems worth while. It is safe to conclude, as many farmers have said, that "this is the right way to raise pigs in Illinois," Hobbins said.

Early Radishes Favored Over Later Varieties

Radishes have been cultivated by men for many ages. In medieval times, harms spiced the feasts in the castles with dishes of the long and very hot varieties now grown for manure use, such as Chartier and White Strasburg. These take twice as long to mature as do the early radishes now available to us, such as the earliest White Icicle, Scarlet Turnip, Rosa and Scarlet Globe. Improvements in most vegetables run decidedly to the production of earliness, which matures earlier, and probably the greatest advantage which we have over our ancestors in the matter of radishes is the possession of more early kinds. The early radishes are tender, crisp and sublder in flavor than the late sorts, but at the same time, quick to turn pithy, so they must be eaten as soon as they mature.

William Hale Thompson, Republican, who was elected mayor of Chicago, defeating Dr. William F. Dever, Democrat. Mr. Thompson served two previous terms as mayor of the city the first one starting.

Agricultural Facts

High wages accent the "saving" in labor-saving equipment.

Chickens need sunlight to prevent rickets. Don't be stingy—sunlight is free.

Soy bean hay is a close second to alfalfa. Ground soy beans are fully equal to linseed meal in feeding value.

A coating of wax on the kitchen linoleum makes it easier to clean, makes it wear better, and gives it a rich luster.

• • •

Four of five years supply of acid phosphate may be applied at one time for it does not leach from the soil.

• • •

A successful corn-raiser must do more than just "tickle the ground with a hoe," to make it laugh with a harvest.

• • •

Nine times out of ten cheap seed is priced too low—and it results in much dirt or weed seeds, or it has a low germination.

• • •

"Roadside markets in a community are a daily fair where farm products may be exhibited and studied for the good of the producer and the consumer."—Hadley.

• • •

Paint will go a long way in making buildings last longer and give better service. Well painted buildings also add to the attractiveness of the farm as a home.

• • •

Nature abhors a bare spot and tries to cover it with some sort of growth, even if it be only noxious weeds. Follow nature, but keep the ground covered with food crops, instead of weeds

Quack, Quack Here and Quack, Quack There

A national duck-calling contest was recently held over station WTAD at Quincy, Ill. F. W. Brockmeyer of Quincy, Ill., was the winner. He is shown holding the cup and the lady calling is Mrs. Margaret Gillot of Peoria, Ill.

Phone Swindle Soon Thwarted

Soft-Spoken Thief Dupes Commercial Operator to Get Aid in Fraud.

New York.—In these days of highly specialized endeavors rogues have kept pace with the trend of the times as is proved by police records. Cracksmen meet protective skill with destructive cunning, highwaymen utilize latest methods of transportation to sweep upon victims and so on down the calendar of crime where brain is pitted against brain by forces for good or evil.

Among criminal free companions who patrol the highways and byways at cities there was one swarm which invariably shunned the clash of arms while obtaining their sustenance through illegal practices. Actuated by the age-old theory that the world owes these living they collected by stealth and with little effort. From public booth boxes of the telephone companies. They were a mild herd of thisbitterigers, as a rule, with logical ex-salons and joint yearts, willing to accept what could be pilfered with the least risk. In recent years they pulled several Lovel swindles from their bag of tricks, but each thin the companies were soon able to earth these frauds and to the perpetrators over to justice.

Among toe ranks of these shrinking knaves were some of permanete vagues and lingering memories. But there come the greatest harvest. It was only when the hand of the law, as exercised by the efficient police of the telephone company, closed upon them that they pulled or spun at pulled in wards of the world.

The plan of operation employed by the more ambitious of the "telephone-box thieves, who were often gro-mates from the actual peerless crooks was not new or ronunce. A middle-aged, wavy-haired youth made the rounds of the community thirty years to become acquainted with a girl who worked on the switchboard at some big commercial establishment and who considered the work a labor of love. Each of these had been paid for at the regular nail rate to coin money from a nickel to a quarte

Now the coin box is a telephone booth, which seems as human to the lay mind both in efficiency and otherwise. It is a wonderful bit of mechanism but it functions according to li. lights on some other device beneath. The coin is dropped into the slot desig nated; if it be a nickel it traverses so irregular chute, rings one bell, and one sharp, and drops on to a horizontal plate, where it is held in abeyance until the conversation is finished.

Should the call go through, per phonome, and the party desiring to talk ph-one hangs up, the operator at the switchboard, advised of this by a flirt on her desk, presses a button and the toll passes to the company's bank, which is at one side of the telephone appliance. But if there be trouble at of a wrong number or busy sig nal the money drops into the coin slot at the other side by touching a red button. A dime or quarter passes through almost the same procedure, except that the dime rings two bells and the quarter one resonny chime. So much for technique.

When the pseudo-sutter had loitered about for a half hour or so he stepped into the booth and spoke to his genie accomplice. As a rule by this time she was aware of wh t was going on but to her, at least, love could do no wrong. After an hitcr-change of cooing he bade her fond farewell and the line was plugged out. Then he garnered the harvest.

Talking the thay wedge from under the receiver hook, the thief jogged this hook impatiently. The operator in the telephone office, who had failed to notice the extent of the call, answered with a query regarding the trouble.

"I can't get my party," he complained; "trying here for almost half an hour. Gimme information, please."

"I am in an impasse, gentlemen. In London a corrupt use has arisen to protect the purse of the citizens from the wiles of the confidence man. Before I am permitted to withdraw any money from my account I must have the duke of Newcastle has been pleased to write me, renouncing over my inability to get along better with the prominent men of the province. This I deem most significant, for it is no more than the wish of Murray speaking through the medium of his agent's pen.

"I am in an impasse, gentlemen. In London a corrupt use has arisen to protect the purse of the citizens from the wiles of the confidence man. Before I am permitted to withdraw any money from my account I must have the duke of Newcastle has been pleased to write me, renouncing over my inability to get along better with the prominent men of the province. This I deem most significant, for it is no more than the wish of Murray speaking through the medium of his agent's pen.

"Will you support Do-ne-ho-gen-weh in a demand for an expedition against the Doom Trail?" I asked.

"I will," he replied.

There was no more to be said, and we resumed our journey that day. We sent messengers on ahead of us, and traveled leisurely, arriving at Deonna-da-ga-o on the sixth day after starting from Ka-na-ta-ga-wa.

The splendid old Guardian of the Western Door, attended by his counselors and retainers, met us at the village limits and escorted us to the council-house, where there was high feasting and a rendition of the dance which is used to open councils or welcome ambassadors.

Then Ta-wan-ne-ars translated my message from the governor and the advice of To-da-da-ho. "Two things may be done, O roy-an-eh," I concluded. "Ga-en-gwa-ra-go might take up the hatchet against the French on behalf of Ga-weh-go-wa and destroy the new fort at Jagara, or the People of the Long House might descend upon the Keepers of the Trail and destroy La Vierge du Bois and its wickedness. For Ga-en-gwa-ra-go to take up the hatchet would mean a long war, with much bloodshed, even if his people would obey him. For the People of the Long House to smash the Doom Trail would mean the use of one large war party and at most a few weeks on the warpath. If the Doom Trail is smashed you need not worry over the fort at Jagara, for with Murray gone Ga-en-gwa-ra-go can soon control his own people, and we will dispose of Joncaire in due time. 'Tis for you to choose."

"Ya-hay!" ("I have heard—I have understood!") answered Ta-wan-ne-ars. "I am much pleased that To-da-da-ho suggested you should come to me first. For, in the end, you will find that the People of the Long House will be more eager to fight if the signal is made to them by one of their own leaders. I will make such an appeal.

"We will summon a council of the Senecas to meet tomorrow. I will present the matter as you have told me to them. We will send out belts to the Cayugas, the Onondagas, the Oneidas, the Tuscaroras, the Mohawks. You shall come with me to the Ho-ya-ne-go-war and hear me make good my promise.

"Na-ho!"

CHAPTER XIII

The Council of the Roy-An-Ehs

The assembled warriors of the Senecas had come by hundreds to attend the tribal council at De-o-nun-da-ga-o. They squatted in serried ranks around the open place in the middle of the village, some about the fires, some aside, or war post, where public assemblies were held, where war parties gathered when setting off upon expeditions, where prisoners were tortured and victors were celebrated.

The ceremonies were brief and were divided into two sessions upon different days. The first session was merely applied mainly by the speech of De-ne-ho-gen-weh, a powerful orator, who announced the council and pleading for authorization of the sending of belts to the other nations of the League so that the Hoya-ne-go-war might be convened.

"You have heard my cause, O my people," he framed his peroration. "You know that the French have ravished one of the fairest daughters of the tribe. You know that I have been deeply wronged. You know that at Jagara, on land which is our land so much as that on which you now sit, the French are building a fort, and that they boast it will be a chain by which they will bind us in the future.

"You know that ever since Onontio came to Quebec the French have been our enemies, and the English have been our friends. You know that these men, Murray and De Venlle, who have stolen my daughter, who have debased our ancient religion, who have deluded so many of the white men, who have built the final nest of fiends who guard the Doom Trail, are the servants of the French.

"I ask you for vengeance. I ask you for the right to go before the Ho-yane-go-war. I speak with a straight tongue. I have witnesses by me. One is my nephew, Ta-wan-ne-ars. You know him. The other is a brother of the Wolf clan. They have found the secret of the Doom Trail, and they will lead our warriors to it.

"If you will follow them, O my people, you will gain rich spoils and take many scalps. The cries of your enemies will delight your ears. Your families will be proud of you.

"Na-ho!"

The council broke up into separate councils of the five clans of the tribe. After the chiefs had come to agreement, the roy-an-ehs of the several clans as spokesmen met and reached a joint agreement. Their response was made at the second session of the tribal council on the following day by Ga-ne-o-dyo of the Turtle clan, the senior roy-an-eh of the tribe.

"It is the judgment of the council that belts be sent to the brother nations for the sending of the Hoya-ne-go-war. Let the counselors of the people decide what course is best."

That night the messengers were dispatched, and as they passed from nation to nation, the People of the Long House stirred with expectancy.

Then the hands of the messengers flowed a steadily swelling stream of men, women and children.

The delegates of the Senecas found the Great Trail already choked with humanity when they set out from Onondaw-a-a week behind the messengers. Senecas and Cayugas met and mingled with Oneidas, Tuscaroras and Mohawks, and Onondagas viewed the extraordinary confluence of people with grave interest.

It must have been a week after our arrival that Tod-da-ho presided over a meeting of the Ho-ya-ne-go-war for the third day. At the morning deliberations of the Six Nations left their headquarters, and marched with slow dignity to the council house in broad longhow on the edge of the forest above the river valley.

The deliberations of the council were begun, the direction of affairs passing from the Keeper of the Western Door to the Keepers of the Door who ask for counsel.

There would be no point in repeating De-ne-ho-ge-weh's oration. It was merely supplementary to the speech by which he carried his own people with him.

He explained succinctly the situation which existed in New York. A Cayuga chief, expressing unmeasured thirst for the English, who were usually so serene, should get in such a rage in such a manner. He concluded by asking if the league might expect the help of the English in the attack upon the Doom Trail.

This was the most difficult point we had to overcome, and De-ne-ho-ga-weh replied with circumspection.

"It is true, as my brother has said," he answered, "that we might expect the English to move with us in this matter. But my friends among the English send me word that their brothers, the Dutch of Albany and the fubtlties of Murray and the French. Their counsels are divided.

"Da-en-gwa-ra-go would welcome our action, and would support it and protect us from the vengeance of France. But he would find it difficult to act himself."

"If Ga-en-gwa-ra-go will not act, why should the League act?" demanded Tegonn.

(TO BE CONTINUED.)

Reasons for Indians Holding Cow Sacred

The sacred cow is one of the chief causes of friction between the Hindus and the Moslems in India. The Hindus regard her almost as dear as life, whereas the Mohammedans not only eat beef but also sacrifice cows at their festival of Bakrid. This gives rise to a hostile sentiment often results in riots.

The cow is the protector of India, because it, being an agricultural country, is dependent upon the cow's progeny. She is a most useful animal in hundreds of ways. Many of the functions performed in America by gas, steam and electricity are performed in India by oxen. Oxen plow the fields, draw carts (passenger and freight), grind mortar, cement and oil seed. Cow's milk, apart from its nutritionary use, is converted into curds, buttermilk and ghee, articles of food used daily in every Indian home. The dung is used to great advantage by the farmer and the husbandry. The Hindu farmer and the husbandry realize the vital importance of the cow until one has been in India. In short, the cow is the great giver and sustainer of life, and is

Tiger Snake Most Deadly

The tiger snake of Australia is the most deadly poisonous of all snakes, says the Sydney Bulletin. Scientific tests have shown that, compared with the Indian cobra, the deadly properties of the tiger snake's poison are having regard for weight and size, as five to three, and with the Australian rattlesnake as four to three. The tiger snake's venom is slower in action than that of either of the other two. The death rubber's poison is swifter than any of them.

Pair of Aces That May Win Flag

The photograph shows Ty Cobb, at left, and his new boss, Connie Mack, at the playing field at Ft. Myers, Fla., where the Philadelphia Athletics train for the championship race in the American league.

Has Good Chance to Break All Records

Bill Carrigan, returning to baseball this year, has a chance to break all records of all time by taking the Red Sox into the pennant.

Boston finished a bad last again in 1924.

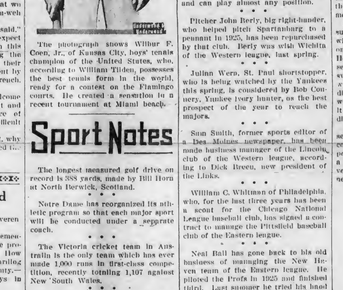
It is not much of a team, but Carrigan is much of a manager. He is regarded as the best who ever led an American league team.

It has always been said that no man can win a pennant unless he has the players, and it must be admitted that Carrigan has less playing talent on his Boston roster than any rival manager has at his command.

If Carrigan can finish out of last place he will be doing better than 90 out of 100 managers could do with the same baseball timber.

If Carrigan should win a pennant this year then one may well say that the day of miracles is with us again.

Boy Tennis Champion



The photograph shows Wilbur F. Coen, Jr., of Kansas City, boys' tennis champion of the United States, who, according to William Tilden, possesses the best tennis form in the world, ready for a contest on the Flamingo courts. He created a sensation in a recent tournament at Miami beach.

Sport Notes

The longest measured golf drive on record is 388 yards, made by Bill Horn at North Berwick, Scotland.

Notre Dame has reorganized its athletic program so that each major sport will be conducted under a separate coach.

• • •

The Victoria cricket team in Australia is the only team which has ever made 1,000 runs in first-class competition, recently totaling 1,107 against New South Wales.

• • •

Despite the fact that golf experts rate her as one of the best female players in the game, Miss Louise Brown of Richmond, Va., has never participated in any golf tournament.

• • •

Five women are prominent in the breeding of thoroughbreds in this country—Mrs. H. F. Carmen, Mrs. C. W. Moore, Mrs. Louis Viau, Mrs. Payne Whitney and Mrs. Margaret Emery Voorhis.

• • •

"Lefty" Groves, Connie Mack's pitching pride, won second honors in a live-pigeon shooting match held recently at Lonsdowne, Md.

• • •

The Wichita Falls (Kan.) baseball club has erected a clubhouse at the ball grounds in which unmarried players may live free of charge.

• • •

Victor Sorrell of the Toronto Leafs was the only undefeated pitcher last season in the International league, winning eight games and losing none.

• • •

Pitcher Lefty Darrough is again with the Dallas team of the Texas league, having been turned back to the Steers by the Philadelphia Athletics.

• • •

"I'll let them know the old batting eye is as keen as ever," Zach Wheat is reported by a Philadelphia paper as saying. Presumably with the information.

• • •

Lyman Bigbee, veteran third baseman, has been signed to manage the Pulaskine team of the new Lonoke league. He played with Dallas the last summer.

• • •

Manager Dorelli Pratt of the Waco team of the Texas league has signed Pitcher Harold Elliott and Catcher Vern Edgar, both former members of the University of Michigan team.

• • •

Matty Alivo, former Lincoln (Neb.) high school player, has signed with the Moline of the Mississippi Valley league. He is a right-handed batter and can play almost any position.

• • •

Pitcher John Berly, big right-hander who helped pitch Spartanburg to a pennant in 1925, has been repurchased by that club. Berly was with Wichita of the Western league, last spring.

• • •

Julius Wern, St. Paul shortstopper, who is being watched by the Yankees this spring, is considered by Bob Connery, Yankee coach, as the best prospect of the year to reach the majors.

• • •

Sam Smith, former sports editor of the Des Moines Register, has been made business manager of the Lincoln club of the Western league, according to Dick Breen, new president of the Links.

• • •

William C. Whitman of Philadelphia, who, for the last three years has been a scout for the Chicago National League baseball club, has signed a contract to manage the Pittsfield baseball club of the Eastern league.

• • •

Neal Ball has gone back to his old business of managing the New Haven team of the Eastern league. He piloted the Profs in 1925 and finished third. Last summer he tried his hand at Pittsfield, but quit before the season had gone very far.

• • •

Buffalo of the International league, has sold Outfielder Vernon Spencer to the Toronto club of the same league. Spencer was placed on the suspended list by Manager Clymer of the Bisons last July, following a run-in. He played with Toronto some years ago.

• • •

Harry T. Mudden, registrar of Lackawanna county, Penn., for many years and a close follower of baseball, has been made president of the Scranton club of the New York-Pennsylvania league. Mudden acquired an interest in the club from Charley Davids of Newark.

• • •

Harry D. Storey, star of the old Athletics, once stole second and third bases three times in succession in the same game.

• • •

Manager Stuffy McInnis of the Phillies, announced the signing of two rookies—John Curry, a catcher, and Dick Spalding, an outfielder.

• • •

Regularly appointed umpires made their first appearance in the National league in 1883. Up to that time it was the custom for the home club to furnish the umpire.

Miller Huggins Has Been Much Abused

No manager has been more criticized and abused than Miller Huggins.

The diminutive leader of the Yankees has had to take it ever since he took the job.

There are still a great many people who have no regard for the managerial ability of Huggins.

Point to his record and they will tell you his teams win in spite of him.

This argument cannot go far.

Other managers in the American league have had too class playing talent at their command but they could not win pennants.

A team might pull through to one championship in spite of poor management, but the team would not repeat the performance.

ATHLETE NEEDS GOOD TRAINING

Form and Relaxation Are Among Big Essentials.

One day last spring Bob Simpson, world's champion hurler when a student in the University of Missouri, and I were talking about a third athlete, a man who was a promising prospect for the American Olympic team in the high hurdles. We agreed that his form was wrong. writes Harold M. Osborn, decathlon champion, 1924 Olympic games, in the American Boy Magazine. He had recently broken an ankle, and, although it had mended well, the leg dragged as he took the barriers.

"He'll go all right in the earlier heats and races," Simpson said. "But just wait until he meets the best competition. He'll not make the grade unless he perfects his form."

I happened to be talking to this man a few days later, and told him what Simpson and I had said. It made no impression on him.

"That's just my style," he insisted. "I don't want to change it."

When the final trials came, this man was eliminated. That dragging leg kept clipping the tops of hurdles.

He had committed one of the two great crimes of the track and field athlete—one had not studied his event.

Another case. A high-school boy—long, rangy chap he was, with clean limbs and the appearance of a real athlete—was competing against my team in the broad jump. His run was speeded the points pretty badly, and although we had a good little jumper I had figured this fellow as a sure winner.

When he started his run I sensed something wrong. He pounded up to the takeoff and launched stiffly into the air. When he hit the ground he had jumped only 17 feet, and he was rigid as a statue as he came down—sprawled all over the jumping pit.

He had committed the second error —he did not relax.

These are the two worst things you can do, if you have aspirations—on the track or in the field events. No man, or boy, can be an athlete if he doesn't practice incessantly, study every move he makes, get all the advice he can from coaches, athletes and anybody who really knows, and correct every fault the moment he finds it.

And no matter how perfect his form is, he'll never get good results from it unless he learns to relax—to use his muscles freely and easily, to swing through his event rather than to break through it, to let his arms and legs move naturally and not at a tension.

Relaxation is the secret of track success. I once knew a college athlete who knew every possible move he ought to make in throwing the discus. He timed himself to a fraction of a second, and spaced his steps and swings to a fraction of an inch. But when he actually started to throw the discus, he stiffened up and his arms were like bars. He couldn't take it easy, and he never became a real discus thrower.

You must, of course, first get yourself into good working order. Cross-country running is the finest of the best possible conditioning for any kind of a track or field map, because it develops every muscle in the body. Remember that next fall, and try it out.

New Indian Manager

The photograph shows Jack McCallister who is taking the place of Tris Speaker as manager of the Cleveland ball club. He is one of eight new managers in the big leagues.

Judge Landis Voids Trade

Judge Landis has kept a good ball player away from Buffalo, but he has kept faith with the rules of the game, comments Billy Reily in the Buffalo Courier-Express. The transfer of Eddie Sicking to New York and his transfer from New York to Buffalo were accomplished almost in the same motion, so the judge decided the work was too rough and voided the whole affair. For just such instances of efforts of magnates to circumvent the rules Judge Landis is needed.

The DOOM TRAIL

by ARTHUR D. HOWDEN SMITH

AUTHOR of PORTO BELLO GOLD ETC.

WNU SERVICE COPYRIGHT BY BRENTANO'S

HISTORIC TREASURY MONEY ROOM WILL BE MODERNIZED

Equipment In Use Nearly Sixty Years Will Be Replaced With Up-to-Date Facilities.

Washington.—With appropriation by congress of $250,000 to supplement a previously authorized expenditure of $50,000 for modernizing the subtreasury of the treasury, which handles more money daily than any other banking room in the world, equipment in use nearly 60 years will be replaced with more efficient up-to-date facilities.

Ever since it was formally opened, March 4, 1869, when the inaugural ball for President Grant was held there, the cashroom has been recognized as one of the most beautiful chambers in any government building, being finished in eight kinds of marble and having a solid bronze railing made midway between floor and ceiling.

Marble counters which have survived from the beginning will be left as they are, under the scheme of renovation, but the heavy ornamental glass fixtures will give way to modern bronze equipment, the antiquated iron wire cages for the tellers will be changed and a better lighting system will be installed. At present the paying teller, who on a normal day must pass out $1,500,000 in government obligations, officers and local banks, is behind such grated quarters that he must start work in the morning standing in the midst of great piles of coins in bags.

Daily deposits which come to the receiving teller, made up of all sorts of government revenue, such as postal and tax receipts, amount to $12,500,000, while the change teller handles approximately $500,000 in nuts from $cent pieces to $10,000 bills, and the paying teller cashes from 5,000 to 15,000 checks.

In a vault adjacent to the cashroom, under the personal supervision of Charles J. Gates, the cashier, is stored the nation's reserve of about $1,500,000,000.

It occupies little space, considering the amount, and when not in reserve, the "cash" until it is transferred across a table into the cashroom vault. The longer paper currency can be kept in reserve, the better "seasoned" it becomes and the longer will be silvers stand the strain of being handled, once it gets into circulation.

Leads in Scholarship

Washington.—Mattie Jeanne Veillard, French student of archeology, is the most scholarly woman in 25 countries competing for the international fellowship, which she has been awarded.

Trying It Again

Greenwich, Conn.—After 32 years, Mrs. Frank Brodsky is again wearing her first husband's wedding ring. The Brodskys were remarried by a justice of the peace in an elopement from New York.

Robin Goes Bobbin' With Key to Bank

Columbus, Ind.—The key to the Citizens National bank at Hope was stolen by a robin recently and the robin was chased by a posse of citizens of the town until the key was recovered. Joseph A. Spaugh, president of the bank, was host and went to the home of Henry Simmons, caretaker of the bank building, to leave it with him, as is his daily practice. Mr. Simmons was in the graveyard at his home and placed the key on the top of a stone post, Mr. Spaugh called to Mr. Simmons that he had left the key on the post. Mr. Spaugh turned to depart when a robin alighted on the post, and, taking hold of a string to which the key was attached flew away with it. Mr. Spaugh gave an alarm and several citizens living in the neighborhood who, with Mr. Spaugh and Mr. Simmons gave chase, finally frightening the robin to an extent that it dropped the key, which was recovered.

Sanitation Kills All Swine Risks

Use of System Transforms Industry on Many Farms, at Small Cost.

On many farms the hog business has been transformed through the use of the simple system of swine sanitation which the college of agriculture, University of Illinois, has been demonstrating over the state during the past few years in co-operation with county farm advisers and interested farmers, according to E. T. Hobbins, live stock extension specialist.

Last year, for instance, 1,213 farmers in 75 counties of the state co-operated in demonstrating the methods and results of the system to their neighbors. Before the end of the year there were 160 written reports sent in by farm demonstrators from 28 counties. These have been summarized to show results under practical farm conditions.

Sanitation Pigs Best.

These farmers raised 31 per cent of the pigs which were saved at farrowing time, and only one runt developed among every 71 pigs on the average, as compared with one runt to each 14 pigs among those raised the old way. With sanitation the litters raised averaged 1.5 pigs more than previously upon the same farms, the pigs averaged 24 pounds heavier when four months old, and they were ready for market at small weights when they averaged six weeks younger than usual. The sanitation pigs averaged to be also a profitable thing others, and the need plan to continue to use this sanitation system.

Reports from 29 counties indicate that sanitation helps to keep animals free from "serum breaks" and other troubles after vaccination; that they seem to escape better than other herds, and that they seem to show more resistance to cholera than do herds raised the old-style way.

Expensive Equipment Not Needed.

The sanitation system does not require expensive equipment nor supplies. The reports show that the size of litters raised to four months old was actually increased by the use of small self-feeders. Also that the size of litters raised was not much affected by the month of farrowing. The average was 6.3 pigs a litter.

There were fewer runts to 100 pigs where no hogs had been on the pasture for at least a year. The percentage of runts was smallest in large pastures. There were also the fewest runts where there was running water to drink.

There was very little loss of sanitation pigs from sore mouth whether their sharp teeth were cut at birth or not. The size of litters raised was not increased where the sharp teeth were reduced by the use of expensive mineralic. The largest litters were raised and there were the fewest runts where the sanitation work was thoroughly done.

With such a splendid showing in health, vigor, uniformity, cheap gains and larger profits, the method seems worth while. It is safe to conclude, as many farmers have said, that "this is the right way to raise pigs in Illinois," Hobbins said.

Early Radishes Favored Over Later Varieties

Radishes have been cultivated by men for many ages. In medieval times, harms spiced the feasts in the castles with dishes of the long and very hot varieties now grown for manure use, such as Chartier and White Strasburg. These take twice as long to mature as do the early radishes now available to us, such as the earliest White Icicle, Scarlet Turnip, Rosa and Scarlet Globe. Improvements in most vegetables run decidedly to the production of earliness, which matures earlier, and probably the greatest advantage which we have over our ancestors in the matter of radishes is the possession of more early kinds. The early radishes are tender, crisp and sublder in flavor than the late sorts, but at the same time, quick to turn pithy, so they must be eaten as soon as they mature.

Col. William B. Ladue, who has been appointed engineer commissioner of the District of Columbia, assuming his office in June. He is at present stationed in the United States engineers office in New York city.

Patterned Tile

The word "encaustic" means "burned in," and encaustic tile is an earthenware tile having a pattern in different colors, made with different colored clays inlaid in the tile and fired with it.

Appropriate Nickname

The nickname given West Virginians, "Sang-diggers," came from one of the most common occupations of pioneer days—that of digging ginseng for trade.

Robin Goes Bobbin' With Key to Bank

Columbus, Ind.—The key to the Citizens National bank at Hope was stolen by a robin recently and the robin was chased by a posse of citizens of the town until the key was recovered. Joseph A. Spaugh, president of the bank, was host and went to the home of Henry Simmons, caretaker of the bank building, to leave it with him, as is his daily practice. Mr. Simmons was in the graveyard at his home and placed the key on the top of a stone post, Mr. Spaugh called to Mr. Simmons that he had left the key on the post. Mr. Spaugh turned to depart when a robin alighted on the post, and, taking hold of a string to which the key was attached flew away with it. Mr. Spaugh gave an alarm and several citizens living in the neighborhood who, with Mr. Spaugh and Mr. Simmons gave chase, finally frightening the robin to an extent that it dropped the key, which was recovered.

HISTORIC TREASURY MONEY ROOM WILL BE MODERNIZED

Equipment In Use Nearly Sixty Years Will Be Replaced With Up-to-Date Facilities.

Washington.—With appropriation by congress of $250,000 to supplement a previously authorized expenditure of $50,000 for modernizing the subtreasury of the treasury, which handles more money daily than any other banking room in the world, equipment in use nearly 60 years will be replaced with more efficient up-to-date facilities.

Ever since it was formally opened, March 4, 1869, when the inaugural ball for President Grant was held there, the cashroom has been recognized as one of the most beautiful chambers in any government building, being finished in eight kinds of marble and having a solid bronze railing made midway between floor and ceiling.

Marble counters which have survived from the beginning will be left as they are, under the scheme of renovation, but the heavy ornamental glass fixtures will give way to modern bronze equipment, the antiquated iron wire cages for the tellers will be changed and a better lighting system will be installed. At present the paying teller, who on a normal day must pass out $1,500,000 in government obligations, officers and local banks, is behind such grated quarters that he must start work in the morning standing in the midst of great piles of coins in bags.

Daily deposits which come to the receiving teller, made up of all sorts of government revenue, such as postal and tax receipts, amount to $12,500,000, while the change teller handles approximately $500,000 in nuts from $cent pieces to $10,000 bills, and the paying teller cashes from 5,000 to 15,000 checks.

In a vault adjacent to the cashroom, under the personal supervision of Charles J. Gates, the cashier, is stored the nation's reserve of about $1,500,000,000.

It occupies little space, considering the amount, and when not in reserve, the "cash" until it is transferred across a table into the cashroom vault. The longer paper currency can be kept in reserve, the better "seasoned" it becomes and the longer will be silvers stand the strain of being handled, once it gets into circulation.

Leads in Scholarship

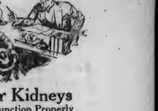
Washington.—Mattie Jeanne Veillard, French student of archeology, is the most scholarly woman in 25 countries competing for the international fellowship, which she has been awarded.

Trying It Again

Greenwich, Conn.—After 32 years, Mrs. Frank Brodsky is again wearing her first husband's wedding ring. The Brodskys were remarried by a justice of the peace in an elopement from New York.

Your Kidneys

Must Function Properly For You to be Well



LATE hours, rich foods and stimulating drinks are all hard on our kidneys. If their action becomes sluggish, they do not thoroughly cleanse the blood of poisonous wastes.

Such impurities may make one dull, tired and achy, with often a toxic backache, drowsy headaches and dizziness. A common symptom of imperfect kidney function is scanty or burning excretions.

Thousands have learned the virtue of *Doan's Pills*, stimulant diuretic in these conditions. 50,000 users have publicly recommended *Doan's. Ask your neighbor!*

50,000 Users Endorse Doan's:

Lambert W. Cox, Westover, Md., says: "Doan's Pills proved their value to me. My kidneys acted sluggishly and the secretions were scant and scalding. There was such a soreness across my back that I couldn't bend or stoop. Doan's Pills soon put my kidneys in order and I'm glad that I did. They put me in fine shape."

Changing His Tune

Bobbie, like most little boys, had been told that Santa Claus resembles only the good little boys and girls, so he tried to be good before Christmas. While visiting his grandmother he forgot for a moment and started crying. As he opened the door Santa Claus heard him and said:

"Santa Claus, just listen to this little boy cry."

The crying stopped instantly as Bobby exclaimed:

"Shut the door, grandmother; I'm not crying. I'm laughing."—Indianapolis News.

More Important

Kathleen—Mother and dad absorbed so many grown-up words as one small head can gather. She went "motoring recently with Billy, Billy's mother was driving. To make conversation, Kathleen asked (in the same manner her mother might have used):

"Billy, are you married?"

"No," the little boy replied; "but I knew a nun once who died."

Must Give Vacations

The grand duchy of Luxemburg is the only sovereign state in the world that has a law making it obligatory for all employers to give a vacation with pay to all their employees. The Luxemburgers are proud of being in the van of progress.

CHILDREN CRY FOR "CASTORIA"

Especially Prepared for Infants and Children of All Ages

Mother: Fletcher's Castoria has been in use for over 30 years to relieve babies and children of Constipation, Flatulency, Wind Colic and Diarrhea; allays Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep without opiates.

The genuine bears signature of

Chas. H. Fletcher.

Special Offer to Victims of Indigestion

Your Druggist Says Pleasant to Take. Elixir Must Help Poor Distressed Stomachs or Money Gladly Refunded.

You can be so distressed with gas and fullness from poor digestion or dyspepsia that you think your heart is going to stop beating.

Your stomach may be so distended that your breathing is short and gasp. You may have a sour grip for quick relief—what's to be done.

Just one tablespoonful of Dare's Mentha Pepsin and speedily the gas disappears, the pressure on the heart ceases and you can breathe deep and naturally.

Oh! What blessed relief; but why not get rid of such attacks altogether? Why have them at all?

Especially when any druggist anywhere guarantees Dare's Mentha Pepsin, a pleasant elixir, to help you or money back.

CHAFING and RASHES promptly relieved and healed by a few applications of

RADIO WARNINGS MAKE SEA SAFE

Keep Ships Informed as to Location of Icebergs and Derelicts.

New York.—"Barquentine —— abandoned in sinking condition and set on fire in Lat. 41 north, Long. 47 west. May possibly be a danger to navigation. Crew on board presumably ——."

Such was the purport of a warning to all ships which was radiated from the wireless aerials of an Atlantic liner one balmy night, held in outline and conveying little to the average landsman. But what of the hidden menace behind those words? asks a writer in the New York Herald-Tribune.

Iceberg Great Danger.

From time to time, when distance overtakes some palatial liner, we are reminded of the dangers of the sea and of the vital part played by wireless as a life-saving agent. But what of the hundreds of other ocean casualties which occur every year?

These casualties are equally disastrous, from the point of view of the total loss of life and property involved, but they are on such small scales individually that they are considered relatively unimportant and we never hear anything about them.

We never hear either of the part played by wireless in these cases, or of the part it plays subsequently—perhaps months or years later—in preventing major disasters which may easily result from a minor casualty, such as that recorded in our opening paragraph.

Wireless Plays Important Part.

Yet wireless communication continues to play an increasingly important part in the safeguarding of life and property at sea, and in this article it is proposed to deal with some little known phases of wireless activity which are in constant operation out on the broad Atlantic, far beyond the rim of the horizon.

The busiest ocean route in the world is that followed across the north Atlantic by the ocean liners which ply between Europe and New York. During the busy season as many as 40 liners of all nationalities may be arriving at and leaving the terminal ports on either side every week-end. Added to this number there are countless cargo vessels, or freighters.

All these ships follow well-defined tracks or lanes across the ocean—lanes such as are definitely laid out and as rigidly followed as a main state highway on land.

If it were possible to ascend to a great height in an airship, so that a bird's-eye view of the whole Atlantic could be obtained, the observer would see two endless lines of ships but a few miles apart—one line bound west and the other bound east.

Dangers to Navigation.

With this enormous collection of shipping constantly moving to and fro a very close watch indeed can be kept upon dangers to navigation, and warnings can be broadcast by wireless to inform other ships as to the exact nature and position of these dangers.

And what are these mysterious dangers to navigation?

We have all heard of "flotsam and jetsam," but how many of us know the meaning of the expression, and that it originated among sailors? Flotsam may be anything which floats, and may have originated near the shore and been washed out to sea. Jetsam is also anything which will float, and the term is usually applied to something which has been thrown overboard, or jettisoned, from a ship at sea.

Many small freighters put to sea with "deck cargoes"—that is, cargo which, for want of space below, is stowed on deck. Timber is frequently carried in this fashion, also bulky machinery which cannot, on account of its size, be lowered down a hatch. If a vessel carrying such a cargo encounters a violent storm her deck cargo may be torn adrift and washed overboard by the waves, or if may, for the safety of the ship, be cut adrift by the crew and jettisoned.

Flotsam and jetsam, therefore, may consist of an enormous variety of material, such as huge bales of timber, steam engine boilers, lost barges, small boats, boxes torn adrift from their moorings near shore, and wreckage from sunken ships, all highly dangerous to navigation.

If, for instance, a liner rushing along in the dark at 20 knots happened to hit a bale of timber or one of the smaller boats, the liner's bow would certainly be pierced.

Such obstructions, although sufficient to cause damage of a more or less serious nature, rarely cause the complete destruction of a speeding liner. Far more dangerous than this miscellaneous collection of flotsam and jetsam are derelicts and icebergs.

The Menace of the Derelict.

It frequently happens that when a ship is very seriously damaged by fire, storm or collision, she is abandoned by her crew and left in a sinking condition. However, ships so abandoned do not always sink. For a variety of reasons (such as air locks below decks, natural buoyancy due, perhaps, to a cargo of timber, etc.), the vessel may continue to sink until she is unmanageable, and remain there. That is to say, her decks may be awash or just submerged, leaving only the masts showing in the water.

A vessel in this condition becomes a derelict, and one of the sea's greatest perils to shipping, for whereas the presence of icebergs is to be expected in certain regions at certain times of the year, the derelict may be anywhere, at any time, lurking unseen just below the surface, or under cover of darkness.

Surprising as it may seem, such derelicts remain afloat like this sometimes for years, drifting about aimlessly at the mercy of the wind and ocean currents. There are always such derelicts moving about the Atlantic, mostly in unfrequented regions, but occasionally they make their appearance upon the great shipping lanes, and to wireless the credit is due that they do no harm.

It might be thought that a damaged vessel, abandoned to become a derelict, would not move very far from its position at the time of abandonment, and would, therefore, be quite easy to avoid. Such, however, is far from being the case.

Another grave danger which has to be faced annually by the navigators of our great liners and freighters is that of collision with icebergs.

Iceberg Great Danger.

From the time an iceberg breaks adrift from the foot of its parent glacier till the time it reaches the main shipping lanes, a period of two years is generally elapsed, but every year, on being released from their winter imprisonment, they swoop down past Newfoundland and reach the Grand Banks about March. From then on till about July or August icebergs are a constant menace to transatlantic liners.

In clear weather they may be seen, even in the dark, but in foggy weather their proximity can only be guessed. As many of them measure anything up to 1,000 feet long by several hundred feet high, the disastrous consequences of a collision with one of them will be fully appreciated. It was thus that the 46,000-ton Titanic met her doom in 1912.

As a result of that disaster, regulations and arrangements were made to combat the danger, and all the nations using the north Atlantic route contribute towards the upkeep of an ice patrol service. A fleet of vessels is plied on behalf of all the nations concerned by the United States government, which sends out the revenue cutters "Seneca," "Modoc" and "Tampa" every year to patrol the ice region in search of all signs of the ice have disappeared.

During the season one of these cutters is always on duty, cruising over the danger area, keeping new icebergs and any moving ice under observation, the movements of these all duly reported.

Twice a day the patrol sends out by wireless a detailed report of all icebergs known to be in the region, and, with these reports to go by, ships which have to cross the danger zone are enabled to do so with a pretty accurate knowledge of the whereabouts of all the icebergs in the vicinity.

Wireless Beacon Stations.

Most countries have now established special wireless beacon stations which, like lighthouses, send out a characteristic signal by means of which they can be identified. The direction finder is brought to bear on this signal, and the ship's bearing from the beacon thus established with extraordinary accuracy. So accurate and reliable is the modern direction finder, in fact, that ships regularly steer by it alone when they have to make a dangerous landfall, such, for instance, as the Nantucket Light Vessel, in dense fog.

Probably one of the most spectacular uses of the direction finder, however, is in the location of ships in distress. If a marine radio operator hears a distress call he will jump to the direction finder and immediately take the bearing of the incoming signals. It had best be done right away in case the ship in trouble has had her hull pierced, in which case the dynamo room will soon be flooded and power for the wireless transmitter will fail.

A ship in distress, of course, always sends out her position, so that intending rescuers may know where to head for, but it frequently happens that if a ship has had bad weather for several days she will not have had opportunity of getting a sight enough view of the sun to take sights and accertain her exact position.

Under such circumstances she may easily be out of her position as calculated by "dead reckoning," which is only approximate at the best of times, and may easily be as much as 100 miles out. Without a direction finder, therefore, rescuing ships might easily spend hours or even days searching for the luckless ship. They may never find her, or, perhaps, arrive too late to find anything more than some wreckage.

Makes Rescue Easy.

If a rescuing ship is equipped with a direction finder, so long as the distressed ship can keep on transmitting, even with her low-power emergency set, the problem of finding her is the simplest part of the rescue job. All the searcher need do is steer right ahead on to the direction from which signals come and the sinking ship cannot possibly be missed, even in fog.

These little-known phases of wireless activity are constantly in progress at sea, considerably relieving the strain upon the captains and navigating officers of the world's shipping, especially the large and fast liners. Before the days of wireless, when these men had only themselves to rely on, the hours they spent on the bridge were full of anxiety whenever thick weather was encountered.

Now they can face the worst weather or the darkest night secure in their knowledge of the exact position of all dangers, and of their own position—thanks to wireless.

ROAD BUILDING

ROMAN HIGHWAYS BUILT TO STAND

The Romans are credited with having the most substantial road system of all times. The far-sighted leaders could see that the success of the armies depended on transportation—and transportation was dependent on good roads. They built roads for permanency—how permanent can be seen today, when more than 2,000 years after they were built, some are still doing good service.

But the Romans could not foresee the tremendous traffic of the present day. The lay observer who drives to and from his work daily in his touring or closed automobile has little conception of the tremendous loads the highways of today are called upon to bear.

It is only when he essays a journey for many miles on some of our trunk roads on a week day that he will begin to appreciate the importance, in an economic way, of the paved roads of today.

Could we have been given a peek into the future say ten years ahead and, if, today, we could see, say twenty years ahead—the transportation problem might not now require the attention of men who devote much valuable time in trying to solve it. But it is here and must be met.

In the cities, where the solution of traffic congestion has become of paramount importance, there are bodies that are giving it scientific study, not alone with the idea of immediate relief but with an eye to the needs ahead.

In the outside districts, however, there is another problem—that of heavy hauling by truck on the main highways.

Highway construction costs huge sums. Roads, trunk routes, are built today with the same engineering and forethought that were spent on the routing and building of transcontinental rail lines in the last century. The highways should serve all—and no class of users should be permitted to usurp them.

Bus Lines in Illinois Big Transportation Aid

Operating fleets of 872 busses, with an organization with nearly $10,000,000 invested, 78 bus lines now blanket the state of Illinois, aided ably by the state's system of hard roads, perhaps the best in the Union.

These busses last year operated 25,280,120 miles, and carried 70,738,770 passengers.

These figures are taken from a report made by Charles A. Moore, executive vice-president of the Illinois Motor Transportation association, for an interstate commerce hearing.

Of these 78 companies 63 operate entirely busses only, while 17 have interstate operations. Of the 872 busses, 828 ply between the cities of Illinois, the rest operating within the limits of the cities of Illinois.

Over the bus lines compare with the steam lines is shown by the fact that in Illinois during the year 1925 the railroads carried 88,558,564 fare-paying passengers at the average fare of 78 3-10 cents per passenger, while the interstate busses, operating in cities only, carried an additional 68,- 585,218 passengers. It is shown, the report states, that 47 4-5 per cent of the passengers carried by the steam railroads and busses combined were handled on busses, and 52 1-5 per cent on the steam railroads.

Gas Station Is Modern Tollgate on Highways

The gasoline filling station has replaced the fruitstand and sapling that formerly was swung down to block the public highways in the form of a toll gate.

Motorists are paying part of the highway construction expenses at three cents a gallon at the filling station pump, where formerly every vehicle passing the designated spot had to plank down a quarter.

Toll gates were satisfying to the traffic a hundred years ago when the pioneers blazed through forested areas and established accommodation for travel, but today the state is building its own improved and modern highways. Motorists will drive miles out of the way over another route to escape the periodical gates.

On June 14, 1796, one turnpike company organized a toll road with rates ranging from one cent for every ten sheep or hogs to three cents for each four-horse carriage. The rates advanced with the progress in roads and modes of travel and similar toll systems were adopted in other states.

Seek Auto Tax Increase

There are 372,000 miles of highway in France as compared with 24,800 miles of railroads. The money derived from taxing autos is used largely in the roads in fair condition. Shareholders of the railroads fear that the automobile will eventually reduce their dividends and a number of politicians are now endeavoring to have taxes on motor vehicles increased enough to restore the railroads to their old importance and increase their revenue.

Live Food No Longer Given Captive Snakes

In order to satisfy numerous readers who protested against feeding the snakes live pigeons at the zoo, the Post-Dispatch arranged for a visit by its reporters at feeding time.

The reptiles are no longer given anything actually alive for food. Actuated by it desire to meet the objections of humane persons to this method of feeding, the zoo authorities corresponded with the New York zoo curator, who said that freshly killed food could be substituted for living creatures if the substitution were done with skill and understanding, meaning, no doubt, if the serpents could be fooled into the belief that what was offered was still alive. This is done by dangling the stunned or killed rabbit or bird before the hungry snake. He has to be hungry, however, before snakes being able to go without food for weeks or months.

So we still feed the horrid reptiles so as many women delight in calling zoos, although from the records of zoological gardens they are the most popular denizens of these places. But we kill their food, for them. We presume the guilt. If there be any, of shedding innocent blood. An only matter for the lords of creation, who slaughter everything, including each other.—St. Louis Post-Dispatch.

Simple Device Made Revolution in Music

According to a recent account of the feeling of the steel guitar, which has made Hawaiian music famous throughout the world, was originated by a Hawaiian lad in 1832, who found that by placing an article on the fingerboard of the guitar while playing a novel sound could be produced. The boy Joseph Kekuku, of the island of Kamehameha school, first got the idea when he pressed a pocket comb on the fingerboard and brought a new tuneful from the instrument. This was followed by experiments with the back of a pocket knife and resulted in the use of a piece of steel for just that purpose. The "new music" took the islands by storm and later spread over the entire world.

"This invention of the Hawaiian schoolboy," says Surrey, "is the most significant contribution of Hawaii to music, the introduction of an entirely new technique for the playing of stringed instruments, at least as far as the western world is concerned, although the Japanese have used a similar technique with one of their stringed instruments and some African tribes north and south of the Congo do the same with the musical bow, using a shell on a knife blade."

Pleasure in Hot Dishes

"One of the delights of a summer in a country boarding house is getting meals piping hot," said a city woman. "I had about forgotten how delicious a dish was when it was served smoking hot. For so long I have had dishes brought to the table by the maid only warm or at the best merely hot. Now, there is a wide difference between a piping hot dish and a hot dish, a difference which may make a meal a huge success or an indifferent affair.

"But in these days of gas stoves it is not a difficult matter to keep vegetables hot, and no one has almost become accustomed to them just past the warm stage. But when a smoking meal is dished up right from the coal stove into a waiting covered dish there is a heartiness, a suitability about the entire meal which makes for good digestion and sociability."—Springfield Union.

On the Smoker

A house painter went to rent to the great Sargent and asked him for the loan of a match. Then, noticing the great painter's brushes, and the array of colors, he said genially:

"I see we're both in the same line; I see we are," said Sargent, with a laugh.

"I've been whitewashin' a barn today," said the house painter. "How's trade with you?"

"Brisk," said Sargent, "I coated a village this morning and gave several coats to a castle; I am now about to stain this afternoon. I finished up the day with a flash of lightning—gold-leafed her, you know."

"Gosh, some hustler!" said the house painter. "You sure must be on piecework."

Valuable Wood

Bird's-eye maple is found from Newfoundland to Georgia and westward to the northern edge of the Great lakes, eastern Nebraska and Kansas. When the grain has a pronounced wavy appearance the wood is called bird's-eye maple and is used as a veneer. The finest service says that there is a parasitic growth that gets into the wood of the maple and causes a swelling, which when cut off straight by the saw appears as eyes. This does not harm the wood but makes it more valuable. Generally speaking, this wood is scarce.

Sevenfold Misfortune

The adage that misfortunes never come singly" seems to be illustrated by the unfortunate case of a woman of Jersey City traffic cop.

"You don't tell me that Professor James has been struck dumb?"

"He has."

"And would he muster of seven languages?"

"He was."

"And is it possible he was struck dumb in all seven? How extraordinary!"

Weighty Subject

An instructor in New York university got a fractured skull recently in a philosophical argument. It is supposed he was struck with the truth of the Kantian theory of categories. This is a very velghty subject.—Atchison Globe.

Lake Michigan's Distinction

Lake Michigan is the only one of the Great lakes lying wholly within the boundary of the United States, says the Dearborn Independent.

ROAD-BUILDING IS SPECIALIZED

Few motorists as they roll smoothly over the unmolested pavements now found in many parts of the country realize the detailed and painstaking research which preceded the laying of the pavement. To many, a road is a road, and no matter what the type of surface or the local conditions, road building to them is largely a matter of smoothing the ground and providing some kind of a hard surface.

But had such a policy been followed millions of dollars would have been wasted, and the country would today be mired in a bog of replacement, repair and reconstruction. Because of the farsightedness of engineers in charge of road building this possible waste has been prevented, and the pavements being laid today are the best possible.

Road construction, as practiced today, is a highly specialized business. Good, permanent construction insures years of carefree power and the saving of millions of dollars in transportation costs. Poor construction means waste that mounts into almost countless figures.

Foremost among the possible sources of waste is the construction of roads of lower type than justified by traffic. Tests conducted in many parts of the country have proved that a road should be built according to its maximum requirements rather than to its minimum. A dirt road carrying a traffic of 110 tons per day, in general, will pay for gravel in ten years by the saving in upkeep costs. Traffic on a dirt road exceeding 610 tons per day or traffic on a gravel road exceeding 1,450 tons per day will, in general, pay for a concrete, brick or asphalt road in 12 years by the saving. These figures are today being taken as standards in determining type of surface justified.

Scientific research has established the best practice in road building and grades. Formerly it was held that hill soils could be drained, no matter how wet and unstable in their natural condition. Tests finally established the fact that in clay soils little can be done to reduce the moisture content by drainage. The waste in highway funds saved through this research returned taxpayers millions of dollars.

Tests have made it possible to build a road which is permanent and able to stand up under any given volume of traffic if properly maintained. Through research the public is now protected against building road pavements too light for the volume of traffic which will assuredly come, and which break down under traffic.

Similarly, after having determined the volume of traffic, road builders need not build a pavement too heavy for the traffic the road will carry. This saves overinvestment in road pavements.

Construction of Highway Surface of Importance

The construction of highway surface, says Dr. H. C. Dickinson of the United States bureau of standards is an important element in skidding accidents. While much has been done on banking and widening curves, more research is needed on the frictional qualities of the finished surface.

"Running a tangent into an arc of a circle obviously produces a curve," explained the scientist. "The car must be approximated by a vehicle, since to literally bisect the curve would require instantaneous shifting of the steering wheel from the position of a straight line to the curve for the constant radius of curvature for the vehicular arc. Such a thing is evidently impossible. Doubtless a study of the traffic lines on a stretch of new concrete would show how many motorists of average driver can approximate this instantaneous curve."

Earliest Known Bird

"Pterodactyl" was a flying reptile of the Mesozoic age. "Archaeopteryx" is the earliest known bird and appeared in the Mesozoic time.

Boys, It's All Luck

Both fit an arrow shot into a knothole the only reason why it hit smoother is because it missed it.—Josh Billings.

MORTGAGE SALE.

Default having been made in the conditions of a certain mortgage executed by George Rose, as mortgagor, to Nicholas Lewokin, Michigan, unto Rudolph C. Korth, of Charlevoix, Michigan, on the 24th day of August, A. D. 1925, and recorded in the office of the Register of Deeds for Charlevoix County Michigan, on the 26th day of August, 1925, in Liber 63 of mortgages on page 204, on which mortgage there is claimed to be due the sum of two hundred fifty five and 73-100 ($255.73) dollars including interest computed to the date of this notice the sum of Two Thousand One Hundred Fifty and 39-100 Dollars including the principal sum due with interest, together with an attorney fee of thirty-five and No/100 Dollars as provided for by the said mortgage and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas, the taxes required by the statute to be paid on said mortgaged premises duly paid prior to the recording thereof.

Now, Therefore, by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due and payable with the costs and expenses of the foreclosure, including the attorney fee provided by the said mortgage, at public auction, to the highest bidder therefor, to be made at the front door of the court house in the city of Charlevoix, Charlevoix county, Michigan, (that being the place where the circuit court for the county of Charlevoix is held), on Tuesday the twenty-first day of June, 1927, at eleven o'clock in the forenoon on that date.

The premises described in said mortgage being the lands, premises and property situated in the city of Charlevoix, county of Charlevoix and State of Michigan, described as follows, to-wit: Commencing at the northeast corner of lot one in block six of the recorded plat of the village (now city) of Charlevoix, Michigan; thence south forty-two feet

NEW CHARLEVOIX HOTEL DESIGNED

By Chicago Man—Will Stand on Top of Hill—100 Rooms

Interesting to the fortunate Chicagoans who spend their summers in the Charlevoix district is an announcement of a handsome new hotel that is to be erected in the Michigan resort town. The structure will contain 100 rooms and, it is stated, will represent an investment of $100,000.

It will stand on the top of a commanding knoll, overlooking Lake Michigan to the west and Lake Charlevoix on the east. Winding paths and steps will lead to the tennis courts at the base of the hill, while a rustic bridge across a wooded ravine will lead to the 18-hole golf course adjoining.

Fred Abbott Fielder, Chicago architect, designed the building, which, in the picturesque style of old England. Half timber work will constitute the decorative feature of the upper portion of the hotel.

The above is from the Chicago Tribune, issue of Sunday, April 24th. Although we are not mentioning local Charlevoix citizens will recognize the location as the property formerly owned by E. S. Shapton just south of the city, and purchased last season by Messrs. Creamer and Flynn, who at the time of making their original investment had under contemplation the project outlined in the Tribune.

A compelling to information recently received construction work will be completed and ready for opening by the commencement of the 1928 season.

GOOD SHEPHERD NUNS PURCHASE NEW SITE

Sixty-Eight Acres Near Northville to Be Future Home

Tribute to the Rt. Rev. Joseph C. Pinten, M. D., the new Bishop of the Grand Rapids diocese of the Roman Catholic church, was paid by 1,000 persons, Protestants and Catholics, at a public reception held recently in the Grand Rapids auditorium.

Mayor Elvan F. Swarthout officially welcomed the prelate. Martin H. Carmody, deputy supreme knight of the Knights of Columbus, presided. Other addresses were made by Edmund W. Brooks and Lee M. Hutchins.

Responding to the greeting, Bishop Pinten expressed his faith in the ultimate success of justice on the part of people. "Storms may arise" he said, "but they are only storms." The genuine American will not be moved by strife-begotten hatred. It has no place in America.

"All power comes from God, I think the reason the church demands that her children look up to civil authority is not generally recognized outside of the church. It is that all power, civil as well as ecclesiastical comes from God. Only when laws are notoriously unjust and contrary to the moral law, may we refuse to obey the civil authority. The Catholic Church has always been one of the staunch upholders of the Constitution and taught her children to obey it on penalty of sin."

ALUMNI SUPPER

Twenty One Attend Banquet at Hotel Charlevoix Friday

Celebrating the diamond jubilee anniversary of Ypsilanti State Normal with a banquet at the Hotel Charlevoix last Friday night, was a social function extraordinary in which twenty one local graduates participated and fully enjoyed.

Not only were they celebrating the diamond jubilee but in addition they were making part of a state wide program to raise funds with which to build a permanent new structure in memorial to one of which approximates one half million dollars.

The building will be known as the Normal College Union Building, designed for holding conventions and other public meetings pertaining to college affairs and a place where graduates can meet and entertain friends when temporarily visiting the State Normal city.

Professor M. S. Pittman of Ypsilanti, was the speaker of the evening.

Much Lumber in Sight

Upwards of 255,000,000,000 feet of merchantable saw timber are now found in the national forests of the United States and Canada.

DICKENS FEST

Home of Mr. and Mrs. R. L. Lewis Last Tuesday Evening

The Dickens Club as a final social event of the years activities, enjoyed a banquet last Tuesday night at the home of Mr. and Mrs. R. L. Lewis, at which time the husbands of the members of the club were guests. An excellent radio program furnished entertainment during the early part of the evening. The spacious rooms and beautifully decorated banquet table resplendent in cut glass, silver and fine china where forty people were seated in a happy mood of fellowship, presented a most delightful scene indeed.

The club president, Mrs. Cornelia Bailey, welcomed the guests in a charming, womanly manner and an after dinner program of unusual interest was given. Mrs. Livingston read a "quiz" on Dickens works in the form of original conundrums which were both bright and witty, and this proved to be the most interesting discussion of the subject of reforestration and the accomplishments of the "Green Cross" campaign.

It is an interesting coincidence that the day set for the launching of the nation-wide drive for members of this society, should occur on the same date as this event of the Dickens Club, which sponsored the first local movement in this direction when several years ago it began to have walnut trees to be planted along several avenues of Charlevoix.

Mrs. Goddard gave an account of the work of Melvin Dewey, the organizer of the Lake Placid resort and originator of the plan for winter sports in that place. Following this account, Mrs. Cooper presented stereoptican pictures of winter sports at Lake Placid and at Charlevoix and it was noted how similar were the advantageous conditions for such sports and how encouraging were the prospects for Charlevoix to become a close rival of this famous resort.

The program of work of the Dickens Club for the past year has been interesting and well planned. Now it is hoped the committee having lent themselves to a wide range of co-lateral reading.

Ship's Official Record

Log-book is the book in which the master of a ship enters each day a brief but exact account of all the events of that day, the miles made by that day's run of the ship, an account of the weather, and the names of vessels sighted or spoken when names can be obtained. The log is the official record of the voyage.

Difficult Stage Part

Shakespeare's character, Hamlet, has 1,569 lines to speak, the greatest number of lines of any of his characters. Some of the famous modern Hamlets have been Sir Forbes-Robertson, E. H. Sothern and John Barrymore.

MARY C. DUFFY

At a recent meeting of supreme officers and national directors of the order in Oklahoma City, Okla., Miss Mary C. Duffy of Newark, N. J., supreme regent of the Catholic Daughters of America, the largest Catholic women's order in the world, announced elaborate plans for community and welfare work.

CONFER WITH BISHOPS

A drive for membership among Catholics all over the United States has been launched by the Catholic Near East Welfare Association in 83 dioceses. The Rev. Fr. E. A. Walsh, S. J., vice-president of Georgetown university, Washington, D. C., and head of the relief organization, conferred recently with the three Michigan bishops concerning the drive in this state. It is the aim of the association to enroll 1,000,000 members as a result of this drive, which has been endorsed by the hierarchy.

STEAMER J. B. JOHNS TAKES ON FIRST CARGO

Loaded With Cement Last Week at Petoskey

The steamer J. B. John of the Petoskey Transportation Co. arrived early Sunday morning for the first cargo of cement to be carried on that ship this year. The craft was in first class order and ready for the season's work. The ship has been overhauled, repainted and put into good order.

Fred Bechtold, chief of Petoskey is master, with Roy Stafford of Charlevoix as first mate and Julius Meyer, of Milwaukee as second mate. Joe Squires of Ingone City, is chief engineer, and George Latimaur of Charlevoix is second engineer. Nell Bergan of Ingone City, is steward, and is assisted by his wife. The dining room is attractive, clean and well arranged for quick and easy service.

As soon as the ship was safely docked, members of the crew, assisted by other men, began preparing the holds for the incoming cargo of sacked cement.—Emmet County Graphic.

Poisonous Upas Tree

Upas is the name given to various species of trees found in Java, and other islands of the Eastern archipelago. From these trees come a poisonous gum, used by the natives for dipping their arrows. The tales of the deadly effect of this tree on plants and animals in its vicinity are largely fictitious.

STEAMER MANITOU AND PURITAN SOLD

Price $125,000 and $102,000 Paid at the Auction Last Week

The steamships Manitou and Puritan for some years operated by the Michigan Transit Company on Lake Michigan from Chicago north, touching at points along the east shore and in this region at Charlevoix, Harbor Springs and Mackinac Island, were sold Wednesday of last week under the direction of U. S. Marshall Martin Brown his authority being by way of a court order to conduct such sale.

The Manitou was purchased by an Illinois Trust company for $125,000 and the Puritan by R. Floyd Clinch for $102,000. In addition the purchasers are obligated to pay certain liens providing the court decides such liens to be legal in an amount of approximately $37,000.

Statements issued by the Illinois Trust company, one of the heavy purchasers, of which Mr. Clinch, the purchaser of the Puritan, is a director, are to the effect that both craft will be put in condition and go into commission about May 15, on a schedule to be announced later, probably about the same as in past years.

The Manitou and Puritan have been sailing into the port of Charlevoix for a period of years. They have always enjoyed a liberal patronage and popular with the public. While the Manitou is without doubt the speediest ship that has ever been in this port.

M. A. C. EXPERT

Soils-Fertilizer-Alfalfa Campaign in Charlevoix County

During the period of May 9-13, specialist from M.A.C. will be in Charlevoix county co-operating with County Agent Mellencamp, in putting on an intensive Soils and Legume campaign. The meetings will be held in barns and will be informal discussions in which tried and proven methods in soil improvement and alfalfa growing will be emphasized.

Over 56 counties have already conducted campaigns of a similar nature and all have resulted in a remarkable increase in profitable alfalfa growing to a point where Michigan today is the leading state east of the Mississippi. 15,000 acres of alfalfa, a very reasonable goal in a county like Charlevoix, would in a year such as 1926, add nearly one half million dollars to its agricultural income.

The foundation of all successful agriculture lies in the fertility of its soils. During this campaign, special emphasis will be placed on ways and means of improving the soil, as the importance of lime will be discussed. It is far cheaper than other plant food and in Charlevoix county we have an unlimited supplies in the form of marl. The use of fertilizer will be discussed in detail, especially the amounts and analysis to be used for various crops.

These many subjects that will be considered in the big campaign are by far the most important that you as a farmer come in contact with. Plan on attending one of these meetings the week of May 9th.

GRAND RAPIDS WHOLESALERS

Visitors in Charlevoix Next Month

Mr. Ray L. Beverly, assistant secretary of the Grand Rapids Association of Commerce was a visitor here Monday in the interest of the Grand Rapids wholesalers, who are preparing the itinerary for their 21st Annual Trade Extension Tour.

Their next tour will include a visit to this community, will bring about one hundred representatives of Grand Rapids wholesale houses who come to meet their friends, the business people of this community.

They will have with them the celebrated Pirmitive City band and the Wolverine Four, a male quartette, second to none. The trip begins May 23 and ends May 26th will be made in a vestibuled train of Pullman cars.

As is customary with these tours, souvenirs will be widely distributed with especial attention given to the children in the territory visited.

WILL SPEAK ON ART

Interest in Detroit art and musical circles has been aroused by the announcement of the forthcoming visit of the Rt. Rev. Raphael Walzer, Archabbot of the famous Benedictine Benedictine congregations, who recently arrived in New York. The Archabbot comes to the U. S. at the invitation of a number of distinguished Catholics who have visited Europe, Germany and are interested in the unusual character of his work. He will visit Detroit soon and will lecture on Beuron and its art. The date will be announced later.

L. D. WELSHEIMER WEDS IDA FLANDERS

Dairyman and Charlevoix Teacher are Married

L. D. Welsheimer, prominent dairyman of West Traverse township, and Miss Ida Flanders, daughter of Charlevoix county treasurer, Joseph William Flanders, were married at the Presbyterian manse in Harbor Springs by Rev. Walter N. Apelgran on Sunday, March 27.

They were attended by Miss Lilith Flanders, sister of the bride, and L. D. Welsheimer, brother of the groom. Following the ceremony, the party left for a week's honeymoon visiting at Alpena and

CHAPTER XIII—Continued

—28—

"Because it is to the interest of our people to act even more than it is to the interest of the English," retorted Do-ne-ho-ga-weh with impassioned energy. "Already the English are more numerous than we are. They have strong forts. We have only the forest. They have brothers across the Great Water who will aid them. We have only the uncertain aid of our allies and subject tribes.

"The decision is in your hands. If you fight for the English you will survive and grow stronger. If you fight for the French or if you do not fight for the British, you will see them be crippled and in a little time you will be no more feared than the Mohicans or the Erie.

"Ne-he!"

That was the last speech of the day, and the council adjourned, only, as is the case of the Senecas' tribal council, to dissolve into minor councils of the roy-an-eh-ses of the different clan groups.

When the representatives of each tribe had reached the unanimity which was required by the laws of the Long Leagüe, they discussed the situation informally with the roy-an-eh-ses of the other tribes; and on the fifth day To-do-ha-ho delivered the common judgment of the roy-an-ehs.

"Murray and the Keepers of the Doom Trail are the enemies of the Long House. We must break them now before they grow too powerful. Therefore we have decided to take up the hatchet against them. But we shall send word to Da-en-da-ra-ge, appealing to him, by virtue of the covenant chain between us, to support us against the vengeance of the French. This is the decision of the Roy-an-ga-ono, O ung people."

"Yo-hay!" answered the roy-an-ehs.

And the thousands of people in the smoke-choked lodges cheered.

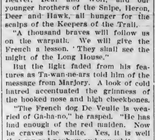
My attention was diverted to a young Onondaga who attempted to explain something to me in his dialect. Seeing I could not understand, Tawan-ne-ga approached and listened to him, a look of astonishment creasing his usually impassive face.

"The Onondaga says that a Frenchman has come to the village who claims to have a message for you," translated the Seneca.

"For me? Who can it be from?"

"I do not know, brother. Let us hasten and find out."

We pushed our way through the masses of warriors already beginning the war-dance, and, in between, the vegetable gardens toward Ka-na-ta-ga-wa.



CHAPTER XIV

The Evil Wood

We found the messenger squatting placidly by the council-house under the guns of several Onondagas. He was of the usual type of courier the world over, big with an unusually solemn countenance.

"You have a message for me?" I said.

"Are you Monsieur Ormerod?" he replied in his peasant's patois.

"I am."

He examined me with a sidewise squint out of his shifty eyes, and dished with one hand in the bosom of his fringy leather shirt.

"You will pay for the service?" he inquired warily. "She said you would pay what I asked."

I took one step forward and grasped the ruffian by the arm.

"Who! I repeated. "Tell me, if you value your life! And give me the message."

"No offense, no offense, monsieur," he growled, pulling away from me. "Mademoiselle Murray—"

"Give it to me," I insisted. "We will talk of pay afterward."

He reluctantly withdrew his hand from his shirt, and offered me a folded square of heavy paper, stained with sweat. I opened it carefully, lest it tear, and saw these lines of fine, angular writing staring me in the face:

"A Vitrey du Bois ye Tot Sirr, 1711.

"You said You would come if I called for I Help. Come by ye ways you Lefte of All you Holde Deer, help Me. I am in hard-ly need ye Ohee, do Visite. 'Tis ye price he has Find for his Sorre. Yes to Mr. Murray. They will Murry me whenne Pere Hyacinthe is returned from a Visit to ye Dinondadies by ye Horonne Lake. So much grace I have gleaned from them. Help Me.

MARJORY.

"Do nolte Trust ye messenger who Carries this, but pleas Pay him What he aske. Come by ye ways you Lefte through ye Woode of ye False Face."

Stunned, I read it a second time, then handed it to Ta-wan-ne-ga.

"What is your name?" I asked the messenger at last. Ta-wan-ne-ga scanned the paper.

"Reptiste Meurlier," he said sullenly. "Who gave you the paper?"

"Who but the mademoiselle herself?" "How did she happen to choose you?"

He protruded his chest.

"Who better could she select than Baptiste Meurlier?" he replied. "North of the Lakes everyone knows Baptiste Meurier—and I am not unknown to the Iroquois."

"But how did mademoiselle hear of you, Baptiste?"

He shrugged his shoulders.

"Who can say? A beautiful young person says she has a wisdom of much importance and profit to be performed. I reply I will go anywhere for a price, I am told I have only to name it. And so I am here, monsieur."

"And what is your price?" I inquired, amused despite myself by the cool insolence of the scoundrel.

"Two hundred livres," he said instantly.

"Very well. It shall be paid. You will be detained here for a time, and I will purchase for you a sufficient number of beaver pelts to defray that sum."

And, turning to Ta-wan-ne-ga, I asked him to give the necessary instructions to the Onondagas. The messenger, a look of sour satisfaction on his cunning face, was marched off to undergo the restraint of an unwelcome visitor.

"Well?" I said to Ta-wan-ne-ga.

The Seneca returned me the letter. "See," he said, pointing to the wild goose flying in pairs to the south, "the cold weather is coming. Black Robe will be delayed in returning from his visit to the Dinondadies. And that is a very good thing for us, brother. But for that I think we would be too late."

"But we shall have fighting," I exclaimed. "The Keepers will soon discover me, and no matter how numerous we may be they will fight desperately. They may carry her away to Canada before we reach La Vierge du Bois."

"What is true," he admitted. "And the thought Ta-wan-ne-ga's, bad, brother, was that we might less-te to Do-ne-ho-ga-weh and Corlaer the breaking of the Doom Trail whilst you and a handful of warriors marched around by the way we escaped, as the white nation advises in her letter. That way is not guarded, for none has known it, and perhaps we may hide in the Wood of the False Faces and bear off the maiden in the confusion of a surprise attack."

"It sounds reasonable," I said doubtfully. "Tis preferable to trusting to the main attack."

"There is no other plan," he rejoined with energy. "Now we must tell what we have learned to Do-ne-ho-ga-weh, and arrange our plans with him."

The Guardian of the Western Door

was the center of an immense mob of warriors who danced around the totem post which had been planted in the council-place.

The grim face of Do-ne-ho-ga-weh was alight with the joy of battle.

"Behold, O ung sachems," he called to me, "the warriors of the Eight Clans are with us. Our brothers of the Turtle, Beaver, Bear and Wolf, and our younger brothers of the Snipe, Heron, Deer and Hawk, all hunger for the scalps of the Keepers of the Trail.

"A thousand braves will follow us on the warpath. We will give the French a lesson. They shall see the might of the Long House."

But the light faded from his features as Ta-wan-ne-ga told him of the message from Marjory. A look of cold hatred accentuated the grimness of the hooked nose and high cheekbones.

"The French dog De Veuille is weasel of Ga-ha-no," he rasped. "He has had enough of the red maiden. Now he craves the white. Yes, it is well that my red nephew and my white son should go against this man who knows no law to curb his lust. I charge you, do not spare him."

"We will not spare him," I promised. "Good! It shall be as you ask. Corlaer shall guide me to the Doom Trail, and many warriors are to go with you."

We debated this point together, and decided that for purposes of swift movement and secrecy we had best restrict our escort to twenty men. To this Do-ne-ho-ga-weh approved this number.

"Do nothing, if you can help it, until we have begun our attack," he said. "If you must move without us, rely upon flight, for you cannot hope to succeed by fighting."

Our party mustered at dawn the next morning. It consisted of twenty stalwart young Senecas. Wolver, each man selected by Ta-wan-ne-ars for strength and wind. In addition to their scalping and weapons each man also carried two lengthy contrivances of wood, with hide strips laid across them.

"What are they for?" I asked as Ta-wan-ne-ars presented me with a pair and showed me how to fasten them on my back so that the narrower ends stuck up over my head.

"Ga-weh-ga—snow-shoes," he replied. "In the wilderness, brother, the snow lies deep, and we should sink down at every step once the ground was covered after the first storm. You must learn how to use the ga-weh-ga, for otherwise you would be helpless."

We kept our purpose a strict secret, even from the warriors of our escort. They were told no more than that they were given an opportunity to go upon a hazardous venture which should yield them fame and a proportionate toll of scalps.

That was all they wanted to know. Ta-wan-ne-ars was a leader they had fought under before. I was assigned a wholly undeserved measure of fame because of my recent adventures in his company.

We marched rapidly. For three days we averaged forty miles a day, and each day, when we camped, I practiced with the snow-shoes on some level bit of ground, learning how to walk without catching the points and tripping myself.

We had not gone very far on the fourth day when Oda-wa-nah-de, the hunter, a warrior who had attached himself to me, pointed through the leafless trees toward a grayish-white hank which was rolling down upon us from the north.

"O-geo-de-o," he said. "It snows."

Fifteen minutes later the snow began to fall. Driven by a piercing wind, it descended like a vast, enveloping blanket, coldly damp, strangling the breath, blinding the eyes, numbing the muscles.

We struggled along against it until we came to a hillside scattered with large bowlder-stones. Here we halted and built shelters for ourselves by rooting the boulders with pine saplings we had brought with our tomahawks. Under these, with fires roaring at our feet, we made shift to resist the cold.

The snow fell for the better part of two days, so thickly as to preclude travelling, and during that time we dared not stir from shelter, except to collect firewood. In the evening of the second day the storm passed, and the stars shone out in a sky that was a hard, metallic blue.

"We have lost much time, brothers," said Ta-wan-ne-ars, "and we have had a long rest. Let us push on tonight."

Our progress was slowed considerably by my clumsiness on snow shoes. But The Otter and other warriors went to considerable pains to help me, picking out the easiest courses to follow, quick with hint or rebuke at my ignorance. I became quite proficient enough to travel at the end of the column, although my companions could never march as rapidly as they would have done without me.

The wilderness which we traversed by the Doom Trail was deserted because of the universal Indian fear of the False Faces. Ta-wan-ne-ars and I discussed this point as we neared the forbidden country, and I suggested that he tell his followers our destination.

He waited until we were a long day's march from and well to the northwest of the goal. Then he gathered the warriors about him as they mustered for the trail.

"Soon, O my brothers," he said in the musical, cadenced Seneca dialect that was my delight, "we shall strike the Doom Trail. Beginning to take pleasure in understanding, "we shall strike our enemies. It is a desperate enterprise you go upon. No war party ever set out to risk such heavy odds. No warriors of the Long House were ever called upon to practice such caution, to reveal such courage.

"O my brothers, we are going into the Wood of Evil, the haunt of the False Faces, which is the breeding place of all the wickedness that brands the keepers of the Doom Trail. You will face much that is horrible. You will be tempted with sights and witchcraft. But I ask you to remember that my brother O-te-ti-an-i and I passed through all such perils without harm. Keep your hearts strong."

(TO BE CONTINUED.)

Some Queer Beliefs Held About Cuckoos

The cuckoo has been a bird of mystery from time out of mind, and many strange superstitions still center round it.

A common belief is that whatever you are doing when you hear the cuckoo's note for the first time, you will do most often during the year.

Both Aristotle and Pliny record that the cuckoo makes no nest, but lays her eggs in the nest of another bird.

It was once thought that one of the gods had taken the form of a cuckoo; and it was then a serious crime to kill the bird.

Long ago the cuckoo was associated with the character of the man whose wife was unfaithful. This belief appears to have come from the Romans, and probably entered English folklore through the Normans.

In many parts of England, the old people still believe that the cuckoo is only a hawk changed for a time and unable to forget its old habits. They say that from the cuckoo's habit of perching—like hawks and owls—on posts and rails, or on anything upright and detached. And the old folks also say that if an unmarried man hears the cuckoo he will remain a bachelor for as many years as he hears the cuckoo repeat its call.

Pays to Admit Errors

Nothing is perfect, and you don't have to claim an article is perfect to sell it. The best article is the one that has fewest things wrong with it. like the principle that took the prize at the fair.

"I've seen better pumpkins than that," remarked a farmer.

"Maybe so," his neighbor replied, "but that ain't the point. This is the best pumpkin in the show."

A competitor may beat you in this point or that. Don't argue against the obvious. If you are trying to defend an article or a position that has too many features wrong, drop it. Take up something worth while. Make an argument and friend is won by the man big enough to say that the other is right.—System.

The Incomprehensible

"I understand your daughter married a musician."

"I haven't a word to say about the matter," replied Mr. Cumrox. "I don't pretend to understand music and I certainly don't understand my daughter."—Washington Star.

NECKLINES FEATURED BY MODE; SOLID COLOR TRIMS DRESSES

NECKLINES tell a story of fresh-hattan interest this season. Collarless, flat, with keen rivalry between square and V-shapes, this is the important style message their convey. Hows of every description or else colorful bouquets are doing splendid work in the way of achieving becomingness for the new flat necklines.

Especially does the sports-frock depend upon the contour of its neckline for smartness. The models in this picture interpret both the square and the V-effects as indorsed by Dame Fashion.

No doubt the possessor of the trim tailored gown to the left will not lose much time in acquiring a handsome ribbon bow to pose at the left of the square neck which marks its styling.

Showing Square and V-Shaped Necklines.

In landing the square and V-necks one should not lose sight of the fact that the flat, round and boat necklines with bow or flower to one side are also in good form.

Mothers can afford to spend much time and thought in the making of their children's ginghams, for gingham is considered an exceedingly "classy" fabric this season. Such entrancing things are being done with it, not only for the "kiddies'" clothes, but for those of grownups as well.

One of the likable qualities about gingham is that it always comes out of the tub looking fresher and prettier than ever. That is because gingham is never printed—the threads used for it are always dyed before they are woven. This makes it absolutely sure

Pretty Gingham Frock.

fast and tubfast—which, of course, is just what is wanted in materials for children's wear.

Another way of emphasizing gingham's tones, tints and designs to their utmost advantage, designers have taken to adding trimmings of solid color. The picture gives some idea of how effectively this compose scheme is being worked out in the matter of frocks for the little folks.

This lovely little dress of rose and white gingham is colored and cuffed with a plain rose color. There is a cunning applique of the solid rose fabric, also, in the corner motifs encircling a wide heading. The knee-strap bloomers are bound in a plain color to match the dress.

It may not sound practical, but it really is, and a trial will convince—that of finishing the neckline and the sleeve edges, and also the bottom of the gingham dress with a narrow organdie ruffling. Have the organdie pleat-shaped. It is surprising how exquisitely it irons out. A blue and white checked gingham with deft blue organdie ruffling, an orange and brown gingham with an orange colored frilled edge, are suggested.

There is a marked trend toward small checked and tiny plaided patterns in the new ginghams.

Colored pearl buttons are a favorite trimming for the gingham frock. A row of these buttons down the front and cuffs of the solid colored material is very effective. Sometimes the buttons are also attractive when used on the ends of a self-fabric tie, or across a sash belt. A scalloped border also adds charm, especially if it be piped with a contrasting color or white.

Dozens of Bangles Are Worn

The latest fashion in bracelets consists of wearing a dozen, sometimes two dozen, tiny gold bangles on one wrist. They give a tinkling sound that is quite charming.

Imitation Jewels

Paste jewels are in exhibited silver in imitation of antique silver settings are among the smart jewels for evening wear. Lovely pendant earrings with medallions of imitation diamonds

from which extend numerous strands of tiny pearls are most effective. Bracelets and necklaces likewise are of paste.

Color Names

Fashion seems to be in a sentimental mood at the moment. One of the new English shades is called "love bird green," while another attractively named color is "lido blue." A reminder of the Victorian times is a shade known as "forget-me-not."

Mother of 3 Children Tells Experience

Effects of "Flu," Nervousness, Indigestion, Biliousness, Conquered by Tanlac. Good Health Restored

Mrs. Mary Barnett, Route 8, Niota, Ill., mother of 3 wonderful children, says: "After years of pain, worry and despair, I regained good health, strength and energy—Thanks to Tanlac.

"Imagine being unable to eat the lightest food without suffering afterwards! Constipation wore me down to a shadow. I became almost a nervous wreck and felt miserable all over. Still I dragged through the days, getting thinner and weaker, and at last was on the verge of a complete breakdown.

"A friend of mine suggested Tanlac. I tried it. Results amazed me. I soon began to sleep naturally and enjoy eating.

"Tanlac really made a new woman of me. I feel just fine now, as you can see from my healthy appearance. I urge every sickly person to take this tonic."

Tanlac is Nature's own remedy made from roots, barks and herbs, according to the Tanlac formula.

Why neglect your health? Why suffer needlessly? Begin taking this wonder tonic now. Ask your druggist for Tanlac—today! Over 40 million bottles sold.

Time to Go

Lack of Hospitality Toward "Poteen" King

Accused of manufacturing "poteen," the famous Irish moonshine, the king of the bootleggers of the Galway region was sentenced recently to pay a fine of $50 or spend three months in the jail. On the day appointed for his choice he appeared at the gates of the prison and announced that he would serve his time, as he was unable to pay the fine.

He had not, however, complied with the rule of the prison to provide himself with a police escort and a committal warrant. Admittance to the prison was refused. The following day he again applied for admission, with the same result. Vowing that he would pay off the line by distributing more of his troublesome "poteen," he turned away from the inhospitable prison and went back to Connemara.

Takes Movies of Plants

The slowest motion pictures ever made are those of the United States Department of Agriculture which portray the growth of plants. This is done by the use of a "time-lapse" machine, invented by Howard Greene, that exposes only one frame of film at a time and regulates the time between each exposures. These periods usually are about 20 seconds, so that in an hour only about 180 pictures would be taken.

Never Fails

Jerry—You say your wife is on this train. Are you sure?

Dave—Why, there is no doubt about it. The train is one hour late.

This fact remains, the Bible has outlasted all disbelievers; it is only its interpretations that change.

Find Handicap in Beauty and Brains

There is a great deal of truth to the expression, "beautiful but dumb," as applied to women. But this is due to men's insistence that they appear that they are not always what they seem.

There is, of course, a good deal of pressure applied to the beautiful woman, as she goes through life, to abandon the use of her brains. It is nearly always to her financial advantage to give up what little intellectuality she may have developed in her marriage or out, and she can always negotiate her beauty the better the stupider she pretends to be. Also, if she does insist on using her brains, she will be met with suspicion.

I knew a young surgeon, for whom her college professors prophesied a great future, but who never could break out of hospital work into private practice because hardly anybody was sufficiently emancipated from tradition to let a girl who looked like a movie star take out his appendix.—Rebecca West in Liberty Magazine.

The Only Answer

The bishop of London said at a luncheon in New York:

"Most of the books that succeed nowadays advocate immorality. It's very strange. We bring up our sons and daughters to be good, we try to be good ourselves, yet we all read books that tell us that the only wisdom is to be bad."

Doctor Winnington-Ingram made a helpless gesture.

"What's the answer?" he said. "The only answer seems to be that in literature nowadays nothing succeeds like sex-ess."

Masquerading

Pauber—I perfectly hate society as I see her.

Critical Friend—Well, my boy, she's certainly been fooling you.

JOHNNY APPLESEED, Patron Saint of Arbor Day?

JOHNNY APPLESEED

JOHNNY APPLESEED'S GRAVE, FORT WAYNE, IND.

BY ELMO SCOTT WATSON

IF EVER America adopts a patron saint for Arbor day, which is being observed in many states this month and that is set by governor's proclamation in each state and therefore varies), that saint undoubtedly will be the picturesque figure who went up and down the land in the early part of the Nineteenth century as a personification of the spirit of Arbor day—"Plant trees!" Johnathan Chapman was his name, but the early settlers knew him as "Johnny Appleseed," or "Appleseed Johnny." For Chapman, the first exponent of Arbor day, made it his life work to plant apple trees, and the settlers who came into new territory and were welcomed there by the sight of apple trees laden with fragrant blossoms were given to exclaiming, "Johnny Appleseed has been here before us!"

Johnny Appleseed was not only one of the most picturesque figures in the history of the American frontier, but he was also something of a man of mystery. Around his name there has gathered such a mass of myth and legend that it is difficult to determine just how much of the information about him is fact and how much is fiction. There is one romantic story which professes to give the reason for his devoting his life to planting apple trees. According to this story, Chapman as a young man in the Ohio country was engaged to marry a beautiful young girl who lived with her father in a cabin in the clearing. In the Ohio wilderness, Once during Chapman's absence the girl fell ill. The only hope for her recovery lay in the juice of the wild crab apple, but in all the forest which surrounded her father's cabin there were no fruit trees. So the girl died. When Chapman returned to find his sweetheart dead he was grief-stricken and enraged against the cruelty of the circumstances which had withheld the only thing that would have saved her life. In the bitterness of his sorrow he plunged into the wilderness resolved to plant apple trees so that no one should ever lack for the fruit that had meant so much to his happiness.

Now, this is a very pretty little story, but unfortunately there is little foundation of fact for it. The known facts about Chapman are as follows: He was born in Springfield, Mass., 1775. In 1794 he settled about a farm at Pittsburg Landing, Pa., and planted an apple orchard. To emigrants on their way west, who stopped at Pittsburg Landing, Chapman became a familiar figure. He would invariably present each family with a package of apple seeds and urge them to plant the seeds as soon as they had found their new homes in the west. As there were not enough seeds on his place to supply all the demands, Johnny went from farm to farm to buy more. His farmer friends regarded him as somewhat "queer," but the emigrants gave glad enough to help him out with seeds. In 1706 Johnny appeared as a wanderer in the valley of the Potomac. In the summer of 1800 he was again in western Pennsylvania.

In the fall of 1800 A woman living on the banks of the Allegheny river in the midst of the city of Steubenville saw a crazy-looking craft floating down the river. It was made of two canoes lashed together and heavily laden with bags. On top of them sat a wild-looking man, clad in ragged clothes and wearing a battered tinpot hat. John Appleseed was setting forth upon his great adventure! For the bags contained apple seeds which he had gathered from the cider presses of Pennsylvania, and he was starting out as the advance guard of the wave of pioneer settlement which was then just beginning to pour into the fertile valleys of Ohio. Johnny's idea was to plant his apple seeds so that the trees would be growing there when the settlers arrived.

The chronology of Johnny's life from this point on is somewhat uncertain. It is known that he established a nursery at Marietta, Ohio, and that he used this place as the base for further explorations. He wandered from place to place in Ohio, planting his seeds and caring for the trees already growing. His crazy craft traveled him into Indiana, and even to Illinois, where, on a road leading into St. Louis, there still stands an orchard which he planted. Frequently he revisited the cider mills of Pennsylvania and Ohio to get more seeds which he would wash from the pomace and put in his forest-gift bags. These bags he presented to emigrants as they continued to pour into the further regions of the rich Mississippi valley and some of these tiny bags are still the treasured possessions of descendants of the pioneers who profited by Johnny' bounty. Occasionally word drifted back to Marietta that the trees which he had planted were not doing well, or that the settlers, busy with putting in their fence rails, were neglecting to plant the apple seeds which Johnny had given them, so he would set out again on his career of "Horticultural Evangelist."

Johnny started four nurseries in Ohio. They were situated near the present cities of Mansfield, Ashland, Salem and Delaware. He is said to have established more than a hundred subnurseries in various parts of the Ohio valley and there is no way of telling how many thousands of fruit trees he planted during the course of his forty years of wandering. As Ohio began to settle up he spent more and more of his time further west in Indiana and Illinois, and it is more than likely that he crossed the Mississippi into Missouri. He was almost forgotten in the last state over their origin to this queer genius.

With nothing more than an ax, a hatchet and a hoe he would go into the wilderness, clear away the trees near a stream and there dig up the soil until it was thoroughly pulverized. Then he would plant thousands of apple, peach and pear seeds and build a brush fence around the forest nursery to keep away cattle and other grazing animals. When the settlers arrived they had only to dig up the young trees and transplant them, when they had established their homes, to start an orchard. Johnny planted other things besides apple trees in the wilderness. Hops were set out in rich, damp places, and he also planted grapes and berries he scattered through the forests.

Planting trees was not the only activity in the Odyssey of Johnny Appleseed. He was always a friend to the Indians and the settlers for he always carried a Bible and some books from which he would read and preach to them as they sat before their blazing fireplaces in the evening. Johnnie practiced his teachings of humility and kindliness. He never killed anything for food. He carried a kit of cooking utensils, including a mush pan, which he sometimes wore as a hat. He usually wore a broad-brimmed black hat, but this was about the only article of clothing in which he showed a preference. He was clad in a ragged shirt which, loosened about his waist, served also as a traveling bag in which he carried various articles. He usually wore two or three pairs of trousers, one over the other, so that the holes wouldn't show, and his cloak was a common gunny sack with holes cut for the head and sleeves. Most of the time he went barefoot in winter as well as in summer. No wonder the white men called him "queer." But the Indians said "He has been touched by the Great Spirit," and he was as well loved among the red men as he was by the whites.

This fact made Johnny Appleseed an especially important figure in the history of the Ohio valley. He frequently gave the settlers warning of Indian raids and in this manner doubtless saved many lives. During the War of 1812 when the British and Indians were overrunning Ohio, Johnny repeatedly warned the inhabitants of approaching danger. At one time the Indians killed a man in Richland county and the residents of Mansfield fled to the block house in the town public square. The danger of the Indians appeared imminent and it was imperative that some one go to Mount Vernon, several miles away, and summon the troops which were stationed there. Johnny Appleseed volunteered to make his way through the Indians who were swarming around the place. Barefooted and hareheaded, he set out in the night for Mount Vernon and arrived, theoretically after visiting several gardens on the road and warning their inhabitants of their danger. When he returned to Mansfield it was with a sufficient force to overawe the Indians and prevent the attack.

Johnny Appleseed ended his days on the soil of Indiana. He died at the home of a friend in Fort Wayne in 1847, and was buried in what is known as the Archer cemetery near that city. For many years his grave was neglected, and Johnny Appleseed, himself, was almost forgotten. However, a few years ago the Indiana and Ohio Horticultural societies decided that something should be done to recognize his services to mankind. As a result of their investigations his grave was located and an iron fence built around the spot. A monument in his memory was also erected in one of the principal parks of Fort Wayne. Ohio also has paid this tribute to a prominent citizen who was erected at Mansfield by the Ohio Horticultural society, and the organization of the John Chapman Memorial Association of Ohio, devoted to marking places where Johnny's apple seeds served as the basis for establishing pioneer orchards. Illinois also has honored him. Last year the Johnny Appleseed Sesquicentennial committee, composed of representatives from thirty-six different organizations, set out an orchard of one hundred and fifty apple trees in Hartsher woods in Lee county. Iowa, Indiana Preserve, near Chicago, at which time special exercises in honor of Johnny Appleseed were held. One of the tree planters was Mrs. Ada Chapman Atchison of St. Louis, a descendant of Johnny Appleseed, and another was Mrs. Florence Ketchum Corbett of Chicago, a descendant of Elder William Brewster of Mayflower fame, who is said to have planted the first apple tree in New England and, from one of whose trees Johnny Appleseed is said to have obtained his first seeds.

Johnny Appleseed is dead these many years, but truly his "soul goes marching on." His memory is unconsciously recalled each year when school children do for future generations what Johnny did for them—plant trees on Arbor day. If Johnny Appleseed has a modern counterpart it is in the person of Charles Lathrop Pack, president of the American Tree association, who for three years has been going up and down the land preaching the gospel of "Plant Trees!" Day and night he has hammered away on the need of a national forest policy. He has called on timber land owners and foresters everywhere to get together on a fire protection policy as the first step and to replace our vanishing forests by planting more trees, more trees, more trees. Mr. Pack's pioneer work has resulted in the observance of American Forest week each year. The seventh annual observance of this week has been proclaimed by President Coolidge for April 24 to 30, and all Americans are called upon by their President to join in celebrating it by recognizing the need for us to take steps now which will guarantee for future generations the perpetuation of our forests. So far as we do that we can all be Johnny Appleseeds and have posterity in debt to us.

The KITCHEN CABINET

(©, 1927, Western Newspaper Union.)

The helpers by great men reached and kept
Were not attained by sudden flight,
But they, while their companions slept,
Were toiling upward in the night.

—Longfellow.

WHOLESOME GOOD THINGS

Now that fresh eggs are plentiful, we enjoy all the tasty dishes which

Mexican Scrambled Eggs—Roast one dozen fresh green peppers, remove the skin and seeds and chop, then boil in a very little water until tender; season well with butter. Beat six eggs, and seasoning and the peppers and cook for a moment in a little butter. Spanish Meat Dish.—Arrange a layer of thinly sliced potatoes in a well buttered baking dish, add a thinly sliced onion, over this a layer of sliced cold roast beef, steak or lamb chops. Cover with a cupful or two of thick tomato and place in the oven to bake; when ready to serve garnish with two or three tablespoonfuls of cooked peas over the top.

Mexican Sauce.—Cook one onion finely chopped in two tablespoonfuls of butter for five minutes. Add one red and one green pepper, one clove of garlic, each finely chopped; add two tomatoes peeled and chopped. Cook fifteen minutes, add one tablespoonful of worcestershire sauce, a few dashes of celery salt and salt to taste.

For Sunday night supper a bowl of pimento and cheese is delicious. It may be ground if preferred.

Popcorn Biscuit.—Sift four teaspoonfuls of baking powder, one teaspoonful of salt, the same of sugar, one cupful of corn meal, one-half cupful of corn flour, four tablespoonfuls of shortening and one cupful of freshly ground corn. Add enough milk to make a mixture to roll out. Cut into rounds and bake on a hot griddle, turning when one side is brown to brown on the other. They may be baked in the oven if preferred. This recipe makes one dozen biscuits.

Popcorn Soup.—To one quart of milk brought to the scalding point add two tablespoonfuls each of butter and flour well cooked together. Add one cupful of finely ground popcorn and serve garnished with a spoonful of freshly popped kernels.

Stuffed Onions.—Prepare as many onions as there are persons to serve. Parboil until tender but unbroken. Drain, remove the centers and mix with butter, chopped ham and seasoning, a little cream and the yolk of an egg. Fill the onions with this mixture and place in deep dish and bake, basting with cream during the baking. Cook sweet potatoes nearly done, remove the cover and put a spoonful of sweet potato puree on the top of each brown.

Food We Like.

If the turkey is not at hand, any fowl may be used for the following sandwiches.

Turkey Sandwiches.—Chop fine three cups of crisp celery. Take one pound of cold cooked turkey from the breast, free it from all fat, gristle and skin and chop fine. Mix all lightly together, season with salt and pepper and moisten with mayonnaise. Cut thin slices of white bread and spread with pimento butter. Spread half the slices with a thick layer of the mixture and the remaining slices with crisp lettuce, spread with mayonnaise, put together in pairs, press edges together and cut into three-cornered strips. Garnish each sandwich with stars cut from pimentoes. At the point of the star place a tiny pearl onion.

Tea Sandwiches—Spread thin unsweetened wafer crackers with quince, orange marmalade or any fruit jam. Set another wafer over the one spread with fruit and arrange in a paper basket or a plate covered with a lace paper doily. Serve with tea, cocoa or chocolate.

Orange Meringue Pudding.—Slice three oranges in a pudding dish, sprinkle with sugar to taste. Make a custard from the yolks of three eggs one tablespoonful of cornstarch, one-fourth of a cupful of sugar, salt, vanilla and one cupful of milk. Cook in a double boiler until smooth and well cooked, then cool and pour over the oranges. Beat the whites of the eggs until stiff, add one tablespoonful of orange juice and one tablespoonful of sugar. Heap lightly on the pudding and set into the oven to brown the meringue.

Banana Cream Pie.—Bake a rich pastry shell, place on a cheap plate and fill with sliced bananas; over this spread sweetened and flavored whipped cream.

Rolled Jelly Cake.—Beat three eggs until light, add one cupful of sugar, two tablespoonfuls of cold water, a pinch of salt, stir in one cupful of flour sifted with two teaspoonfuls of baking powder, adding the flour grad ually. Bake in a shallow pan and grease. Turn out on a cloth wring out of cold water, spread with jelly and roll; sprinkle with powdered sugar.

HAMMER THIS FACT

Professor William B. Munro, chairman of the Division of History, Government and Economics at Harvard, says:

"The idea that most of the people pay no taxes is one of the great delusions of modern democracy. Everywhere in political discussions, we hear about taxpayers and non-taxpayers, but a moments reflection will convince anyone that there is no basis for any such distinction.

"Taxes fall upon the entire citizenship, and mainly on the ultimate consumer The man who thinks he pays no taxes is deluding himself. He grumbles about the high cost of living, when one of the big items in it is due to the high cost of government. Of itself the government earns no income. Every penny that it gets must come from somebody who has produced or saved it. That is perfectly obvious and simple economic fact, yet most people overlook it entirely.

What our people most need is to have an elementary lesson in economics hammered into their heads, namely the plain and homely truth that the cost of government falls on the entire population, and not upon the propertied element in it."

MARINE PUBLICITY.

Friends of the American merchant marine, and this includes practically all of the American public which is, unfortunately, unorganized on the subject, will be pleased to learn that the publicity campaign for the maintenance of the marine is not to be neglected. Some of the United States senators and other statesmen of the marine and members of the shipping board intend to deliver addresses and to issue publicity during the next few months calling attention to the fact that something tangible must be done in the next session of Congress on the shipping question.

One of the senators interested in the merchant marine is Senator Copeland of New York, who said in a recent address at Chicago: "The United States as a nation can never be wholly independent while it depends upon foreign countries to export goods and import its own purchases from abroad."

There is food for thought in this statement which is true in every sense. For what nation can be entirely independent which has no merchant marine of its own?

The country recently lost a real American publicist and one of the first rank in ability in the death of George W. Hinman at Chicago. One of his last articles which Mr. Hinman wrote was one supporting our merchant marine and pointing out how it had increased our South American trade, and showing that our business with the countries to the south of us has tripled since the year beforethe war. This growth the writer added, has come about largely through the efforts of our merchant marine. Great fleets of American ships are now operating between the United States and South American ports. How long could we depend on this export business if we were again forced to rely on European ships as was the case before the war? The answer is obvious. The merchant marine must be maintained.

THE RED PROGRAM.

The drive of the Russian Soviet to defeat the capitalistic nations of the world through Asiatic penetration is now under full steam, and that it is making some headway the present situation in China eloquently shows. The Soviet leaders are now calling the peoples of the Asiatic countries "colonial slaves" and are serving notice on the world that they are out to help these "slaves" throw off the European yoke. They are hoping that the present situation in China will lead to the withdrawal of the other nations from that country and the estrangement of China from them. They will then be the problem of India and perhaps the Philippines.

The first plan of the Reds was to destroy Europe by direct penetration. But they were defeated in their drives in Hungary, in Bulgaria and in Warsaw. Then came the complete collapse of their cause in Germany and Austria, the Mussolina coup in Italy and the coal strike defeat for the communists in Great Britain. All these set-backs have convinced the Reds that they cannot penetrate Europe directly and that they must bring about the world revolution by inflaming Asia and Africa, destroying European colonies and setting the darker skinned races against the Caucasians. This is the drive that is now under way, and while there is no indication as yet that it will be successful the situation is such that it calls for serious consideration on the part of Europe and America. While America does not have vital interests in Asia, the Reds are seeking to embarrass us in Mexico and South America.

The new Soviet dogma, according to the Moscow correspondent of the New York Times: is "the road to special revolution in Europe lies through the freedom of subject peoples from European exploitation." And no matter how the leaders may temporize, the correspondent states, they remain faithful to the old ideal of communism and death to the capitalist system."

WANT THE MONEY

The opinion of the American people on the policy now being followed by the national administration with regard to the European debts, is overwhelmingly favorable,according to T. E. Burton, member of the War Debt Funding Commission. Returning from an extended trip through out the country he states he found people everywhere favorable to the present debt settlement plan recently defended by Secretary Mellon in his letter to the college presidents. Mr. Burton continued:

"The settlements made by the United States were generous to the debtors and fair to the American taxpayers. We cancelled 43 per cent of the debts of nations of Continental Europe. We cancelled 53 per cent of the French debt, 75 per cent of what Italy owed us and 20 per cent of the British debt. Our settlements were based on capacity to pay. These countries can pay what they agreed to pay. We hear no complaints from the governments who have settled. They are paying regularly.

The college professors suggest a conference to revise the settlements. Where would we figure with one vote against it? It would take several years to go over the ground. It took our commission four years to examine the condition of the debtors. We had all the necessary facts before us and settled on easy terms."

There is little doubt that Cong. Burton has made a correct estimate of public opinion. The American people know that if Europe does not pay the debts our taxpayers will have to pay them, and they feel therefore that the European nations should settle to the best of their ability and resources.

SAGE SAYINGS

No one can be happy and not be useful.

The surest of the human mind is the mind at rest.

There is no knowledge that is not power.—Emerson.

Happiness is great, and cannot be understood.—Curly.

Be sincere; be true; be those that will not seem.—Matthew Henry.

The most certain sign of wisdom is cheerfulness.

It is no use to have ideals unless we work for their perfection.

Losses, troubles and wrongs all have a side of opportunity to them.

Wholesome is the source of every misfortune that threatens us.—Spiegel.

Don't build up on some of your bad habits before your health runs down.

Death is the wish of some, the relief of many and the end of all.—Seneca.

There is a remedy for every wrong and a satisfaction for every soul.—Emerson.

One may know what he wants and unreasonably he knows he ought'n to have it.

It isn't the so-called highbrow cities that produce the most good literature.

Many special household articles, great values at 10c each, placed in center of store on display counter.—Staley Bros. Hardware.

Colleen Moore, the "movie" star, sat on an "extra" bench for six months and then got a job lasting only three days. Finally her chance came in "Flaming Youth." Her success continued to grow with "So Big," "Sally" and "Irene," "Twinkletoes" and "Orchids and Ermine." Miss Moore was born in Port Huron, Mich.

PRESS COMMENT

Practical Aspects—If Dr. Sherwood Eddy is consistent in support of his doctrine that a nation should "turn the other cheek" when assailed,he necessarily must deprecate strongly the interference of the navy in behalf of the American refugees at Nanking, and other disturbed points in China. According to his theory, the missionaries and nationals of this country, caught, abused and robbed by the soviet infected mobs—and Dr. Eddy seems rather partial to the soviet crowd—should have been left to become the victims of brutal massacre; and necessarily they must have been left to that fate had the doctor's ideas all been in force, because there would have been no American missions and marines in China or anywhere else to use for protective purposes.

Happily this country has too much sense to allow itself to be contaminated badly by the Eddy brand of pacifism. It is altogether too plain that even if a person has a right to be a non-combatant where his strictly individual fortunes are concerned, and may, if he chooses to be so silly, allow himself to be robbed or assassinated without offering resistance, it is quite another thing to stand by and see others treated in that fashion without doing to their aid.

Unfortunately for Dr. Eddy's special doctrine of general non-resistance, individuals or nations that deliberately remain aloof and allow those it might save to be killed or outraged, become moral accessories to whatever crimes are perpetrated because of their indifference or poltroonery. As far as practical results go, such persons or nations join with the looters and killers, and become co-conspirators with them in a war against society.—Boston Herald.

Ships and Sailors—There is a story that the men of the first Roman navy were trained to row as they were seated on the sand and that they defeated their ancient enemies, the Carthaginiians, in their first sea battle.

The story probably is a myth. Certainly beach-trained sailors cannot man the modern merchant marine, and Senator Willis was right when he wrote to a New York editor: "American ships mean employment to American workingmen in American shipyards. We should not only keep the ships we have, but as needs develop, build more. There is a tremendous need for those ships, not only in time of peace but in time of war if, unfortunately, we should have another war."—Toledo Blade.

Thought for Youth

There is no greater duty at middle age than to sow the right seed thoughts that will make the later period of life as beautiful and as attractive as it can be made.

Ostrich Eggs as Cure

The ancient used ostrich eggshells for divers ills, says the Dearborn Independent.

Immortal Love

Love lives on, and hath a power to bless when they who loved are hidden in the grave.—Lowell.

St. George on Stamps

The only representation of St. George, the patron saint of England among the stamps of the British empire is to be found on the postal issues of Tasmania from 1903 onward. On these stamps the incident of St. George and the dragon appears expertly as on the reverse of the British sovereign.

Crete gives him pride of place on the five-drachma stamp of 1906, while the Caucasian republic of Georgia pictures him on a prancing steed setting out in search of his dragon. A Russian stamp of 1904 shows him armed with a lance instead of the short sword of Roman pattern with which we are so familiar.

Tragic Mistake

Osbert Sitwell, the English satirist, said at a dinner in New York: "A law should be passed forbidding aged millionaires to marry beautiful young movie stars. I mentioned the need of such a law the other night, and an aged millionaire took me up.

"'Why shouldn't men of ripe years,' he barked, 'wed young brides if their inclination lies that way?'

"'Well, for one thing,' said I, 'it's so much like buying books for your friends to read.'"—Detroit Free Press.

Orders Is Orders

A young mother in a small suburb, the proud but distracted mother of two mischievous little boys, was overheard by a neighbor to call to the older one:

"Joe, oh, Joe, go find Bobby and tell him to stop whatever he is doing."

STOP, START, *and* STEER *better!*

JUST four small points of contact—four areas of only a few square inches each where tires and pavement meet—how allimportant they are to the safety and comfort of driver and riders alike!

Did you ever think that you cannot stop, start, or steer your car without perfect contact of tires and pavement? Portland Cement concrete pavement affords the best surface for rubber tire contact.

Your city needs more *concrete* streets.

PORTLAND CEMENT ASSOCIATION
Dime Bank Building
DETROIT, MICH.

PORTLAND CEMENT
CONCRETE
for permanence

The Portland Cement Association is a national organization to improve and extend the uses of cement, with offices in 32 cities.

BEAVER ISLAND

(Late for last week)

—Dr. Newman is here on business.

—Robert Gibson of Grand Haven, is visiting friends here.

—Robert Bridge of Charlevoix paid the Island a business visit.

—Mrs. Tim Roddy is home after a few months stay in Chicago;

—L. J. Mallory spent several days in Charlevoix last week on business.

—Pat Lafreniere went to Charlevoix last week, returning Wednesday.

—James Wyers of Charlevoix, came over Wednesday on business bent.

—Mrs. Jerry Palmer and daughter Tilley, of Detroit, are here on a visit.

—C. A. Allers of Grand Haven, is here vacationing among his many friends.

—James Bogart, of the Argo Milling Co., called on our merchants this week.

—Dave P. McDonough arrived home from Chicago, where he spent the winter.

—W. L. Philips, deputy U.S. collector of customs, of Grand Haven, was here on business.

—James B. O'Donnell returned home Wednesday from Chicago, where he spent the winter.

—The barge Rambler of this port, made several trips to Manistee, Frankfort and Charlevoix last week.

—The Sea Hawk of Charlevoix, belonging to the McCann Bros., made a trip here last week with a load of gasoline.

—Mrs. John McCann arrived home on Monday, after spending Easter at Grayling with her son, Dr. Charles McCann.

Proud Metropolis Got Title From Royalty

The infant village of Manhattan-on-the-Hudson was still in its swaddling clothes when across the sea, in the palace of the English king, Ruby Stewart posed to Anthony Van Dyke for the prim little portrait that has become so widely known and beloved. The "Stuart Baby," second son of Charles I of England and Henrietta Maria, had no thought then that the struggling village, one day to be the pride of the Western world—would years later be named in his honor, New York.

This child, who in his turn succeeded to the English throne as James II, was an inane young oaf, created duke of York and Albany. Upon reaching manhood he precipitated himself into various wars, all of which he came through with a reputation for brilliant personal courage.

In 1664 Charles granted New Netherlands to the duke of York, and an English force under Col. Richard Nicolls took possession of the city, naming it New York in honor of the duke. Subsequently the Dutch reconquered the province, but the English quickly took it away from them again, restoring the name of the Stuart prince.—Mentor Magazine.

Good Answer

A business man who had been irritated beyond measure by solicitors for this and that—tag days, drives and charity advertising—on the street got was bitten by a dog. He went on to "business as usual." When word got around his outer office and a couple of his irritants inquired solicitously of him:

"You have just been bitten by a mad dog?"

"Yes, I was." (Business of not looking up.)

"What! And you came right to your office?"

"Yes. There was some writing I felt I just had to get done." (Business of going on writing.)

"Oh, I see. Writing your will, I take it."

"No. Writing the names of the people I am going to bite when I go mad."—Merle Thorpe, in Nation's Business.

A Soft Answer

They had been married just long enough for the novelty to have worn off, and the girl was beginning to find fault. Over on her mother would undoubtedly have put it.

"Before we were married, George," she complained, "you always took a taxi from the theater, but now the bus seems good enough. In fact anything is good enough for me."

Her husband frowned, for he seemed to be in rather a difficult fix. But he was not long in finding a way out.

"No, darling," he murmured, "don't think that. You see, I'm so proud of you, and if I took you in a cab there would be nobody to see you, whereas I can show you off to dozens in the bus."—London Answers.

Fish Have Nicknames

As a rule, sea fish, not river fish, have nicknames. The red snapper, for instance, is often called the sea woodcock because of its taste, and the dab is sometimes known as natter.

Fishermen call the hake the sea ling because its shape is a little like that of the pike, and they term a flounder a flick or fluke.

One of the gurnards has the name of cuckoogurnard, by reason of the odd sound it makes when caught.

Schoolboys' Ambitions

A London schoolmaster gives the result of a ballot from more than 100 boys at preparatory school age as to the profession or occupation in life that each hoped to adopt: "Air force 21, motor engineers 10, electrical engineers 15, navy 12, army 10, commerce 6, law 5, stage 4, politics 3, journalism and literature 3, private detectives 2, architects 3, explorers 2, civil engineers 2, painters 1, church 1, schoolmasters 1.

If you are looking for bargains in household specialties, your attention is called to articles on display in our store. All priced at 10c each.—Staley Bros. Hardware.

THERE ARE LOYAL HEARTS

There are loyal hearts, there are spirits brave,
There are souls that are pure and true;
Then give to the world the best you have,
And the best shall come back to you.

Give love, and love to your heart will flow,
A strength to your utmost need;
Have faith, and a score of hearts will show
Their faith in your word and deed.

For life is the mirror of king and slave.
'Tis just what you are and do;
Then give to the world the best you have,
And the best will come back to you.

THE THEATRE

"The Broncho Twister,"—United States marines ledpd Tom Mix make scenes aboard the battleship California for "The Broncho Twister," Fox Films latest release starring Mix, which will show at the Palace Theatre from Saturday and Sunday April 30-May 1st. The California is flagship of the Pacific fleet and Mix and his company were guests of Admiral Richard H. Jackson, commander-in-chief.

Lieutenant Colonel R. B. Sullivan, marine corps officer on the admiral's staff, invited Captain R. Griffin and sixty Marines in overseas uniforms to report to O. O. Dill, director in charge of "The Broncho Twister" and they worked through all the battleship scenes with Mix.

The appearance of Mix on the California is his first on a warship. The scenes picture marines returning from France at the end of the war.

Helen Costello has the featured feminine role. Others in the cast are Paul Nicholson, Doris Lloyd, Otto Fries, Dorothy Kitchen, Malcolm Waite and George Irving.

"The Cat's Pajamas."—One of the most unusual pictographic feats on record was preformed by Victor Milner during the filming of "The Cat's Pajamas," which comes to the Palace on Tuesday and Wednesday May 2-3.

This consists of an "opera-glass effect." The scene is in an opera house Ricardo Corez is playing the role of "Romeo" on the stage, and Miller, Arlettee Marchal, "Juliet." Betty Bronson, a little seamstress, seated way up in the topmost gallery, enthralled by Corlez.

He is first seen through Miss Bronson's glasses as a tiny figure. Then as she adjusts the lenses, he grows larger and larger, until he occupies a "close-up" in the spectacles. All this was done without a single break in filming it.

Has Biblical Sanction

Capital punishment as a lawful procedure has existed since the bibleof of mankind. It will be found laid down in the Mosaic law in the books of Leviticus and Deuteronomy.

Limit of Hate

When two women really hate each other they will pass in the street with out even noticing what each other had on.—New Orleans Sitnes.

New Palace Theatre
ATTRACTIONS FOR THE WEEK

Saturday-Sunday—
Tom Mix in "The Broncho Twister" with Tony, the wonder horse. Ride 'em Cowboy!—and that's just what Tom Mix does—in a series of daring and amazing stunts in a smashing romance of western ranges. A picture that will make you grip your seat while the ace of stars crashes his way, against terrific odds, for the sake of a girl and revenge.
Also a Fox comedy, "Matrimony Blues."

Tuesday-Wednesday—
Betty Bronson and Ricardo Cortez in "The Cats Pajamas." Cortez as an opera star sheik. Betty Bronson as a pretty model in a Fifth avenue gown shop. And gay old Theodore Roberts luck, cigar and all. A sparkling comedy-romance of 1927 New York society and theatrical life.
Also "The Yellow Pirate" and Fox News.

CHURCHES

Methodist Church.

C. E. Pollock, Pastor.

The preacher next Sunday morning will be the Reverend Myron E. Hoyt, pastor of the Asbury Methodist Episcopal church in Traverse City. Mr. Hoyt is a scholarly church leader of tried experience and will bring a message of good cheer. The pastor of the church will deliver the Thanksoffering sermon for the Asbury Missionary in Traverse City at the morning hour of worship.

"The High Points of th Great Council" will be the pastors theme next Sunday evening at seven thirty. Every interested person will want to hear this message. Interesting features will make this a service of note.

Sunday School meets at twelve o'clock each Sunday. There is a class for every person who desires to study the great Book.

The Men's Area Council which meets in Lansing this week attending a Methodist Conference, the Michigan Conference, the Central German Conference, the Norwegian Swedish Conference, the Norwegian-Danish Mission and the Bi-lingual Mission., Three thousand delegates from the Methodist churches of these conferences are expected to attend. Among the outstanding speakers are Ralph Connor, the author, the Honorable Pat M. Neff, former Governor of Texas, Bishop Francis J. McConnell, Bishop Thomas Nicholson, Dr. M. S. Rice of Detroit as well as many others of less renown. Rev. C. E. Pollock left Monday morning to attend the Council, and expects to return the latter part of the week.

Church of God

Rev. Paul L. June, Pastor

St. Mary's Catholic Church

Sundays 8:00 a. m., and 10:00 a. m.
Mondays and Tuesdays 8:00 a. m.
Saturday 7:00 a. m.
Rev. Fr. Odelo.

OPEN-AIR CHORALS OLYMPIC OF SONG

In August 1 was in vitedes, to see for the first time the Royal Welsh Eisteddfod, a gathering of Welsh cultured that goes back to the Twelfth century for its birthday, or even earlier. I should think that ten or even twenty thousand were here for the modern Welsh festival, to listen to the poems and songs that Old World patriots set waving on the air. The chief choral prize, as heretofore, is open to the world. To hear the leading choirs of the British Isles in the open air at such an event provides a memory that will not soon pass away. It is an Olympic of song. If you have ever heard a great chorus in a scenic effects reminiscent of a thousand years of a small nation's art and music, you can understand what the Eisteddfod means to Wales.—From "My European Excursions," by Robert Peter.

Limit of Hate

When two women really hate each other they will pass in the street with out even noticing what each other had on.—New Orleans Sitnes.

Old Stuff

Hindus at Mysore, India, during a religious festival, kneel down before an automobile instead of an elephant. A lot of white men have been there to it.—Minneapolis Journal.

—PERSONALS—

Elmer Keel of Petoskey is spending some time here on business.

Edward H. Maltby of Bellaire was a business visitor here Tuesday afternoon.

John Gallager a visitor here for several days returned to St. James Wednesday.

Mr. and Mrs. Charles R. Munyon spent last Saturday with relatives in Boyne City.

Mat Routley is spending some time in Bellaire this week finishing some contract work.

Mrs. Emory Pierce and son of Sault Ste. Marie are guests of Mr. and Mrs. Joseph Howard.

Dr. Leahy, the optometrist will be at the Hotel Charlevoix, Monday May 2nd. Hours from 10 a. m. to 4 p. m.

Mr. and Mrs. Joseph Howard are at home in their cottage on Dixon asenve, after spending several months in Chicago.

Monday, May 2nd, is the date when Dr. Leahy, the optometrist, will be at the Hotel Charlevoix, for one day only. Hours from ten to four.

The L. O. T. M. fraternal society will hold a meeting Friday evening when initiatory work will be conducted and this followed by a pot-luck lunch.

Mr. and Mrs. George Ilyres motored up from Grand Rapids last Saturday and spent the week-end with relatives here, returning to their home early this week.

Dr. Cleland Mayne was a Charlevoix visitor last Friday and upon his return was accompanied by his mother Mrs. Fredrick W. Mayne to his home Cheboygan.

Mrs. M. A. Levinson, who was called to Eveleth, Minn., about two weeks ago on account of the death of her brother-in-law, returned to Charlevoix last Saturday.

Mr. and Mrs. Joseph Stanford of Muskegon report the birth of a son, Jerome Robert at their home last Sunday, to the grand parents of the new arrival, Mr. and Mrs. James Sanford of this city.

Miss Priscilla Scott arrived here Tuesday, the first of our regular summer visitors of the season. Miss Scott resides in Chicago, but spends the winter months in the south, the summer season in Charlevoix.

Mrs. Frederick W. Mayne, who spent several days here recently returned to Cheboygan last Friday, where she will remain a short time before returning to her home in Charlevoix for the summer season.

Painting the exterior of F. S. Myers store building is in progress this week, making for a more attractive appearance to the property and street. The work is being done under the direction of E. M. Davy.

A Rebekah district Convention is scheduled for Wednesday May 4th, at Mancelous. Mesdames Robert Mitchell and F. F. Bird have been designated as local representatives and with several others will attend the meeting.

James P. Parsons attended a business meeting of the Agricultural Life Insurance Company at Bay City last week, spent Sunday with his daughter Mrs. C. R. Robinson and family in Alma, returning to Charlevoix Tuesday.

Miss Hellen Armstrong is spending the the week with her parents Dr. and Mrs. Armstrong. She is accompanied by her friend Miss Anne Shanewise during their short vacation from their school where They will return to Chicago some time during the latter part of this week.

Funeral service for Robert Price was held at East Jordan Wednesday forenoon. Mr. Price was a pioneer of Charlevoix county, well known, has many friends who will be sorry to learn of the earlier residents of the city. He was eighty three years of age and survived by two daughters and three sons.

Mrs. L. B. Bartlett, who spent the winter with friends in Grand Rapids, returned to Charlevoix last Saturday and is now busily engaged in placing the Hotel Bartlett in readiness for the summer season. The Bartlett will open within a few days according to present plans, much earlier in the season than during past years.

Mayor Bergeon appointed D. F. Meech city assessor last Monday night and members of the Council at once confirmed the Mayors recommendation, a commendable action on the part of all concerned. Mr. Meech owing to his knowlege of values and local conditions reaches the acme of prefection in this official capacity.

Rev. C. E. Pollock is spending some time in Lansing this week attending a Mess Council connected with the duties of his position. He will return later in the week. Sunday, May 1st Pastor Pollock exchanges with Rev. M. E. Hoyt. The latter from Traverse City filling the local pulpit, with Rev. Pollock preaching the Thanksoffering service for the Women's Foreign Missionary Society in Traverse City.

Dependable Paints manufactured by Heath and Milligan Mfg. Co. "Best since 1851." We carry this line of high grade paint and will be pleased to show you color lines and supply your needs.
Staley Bros. Hardware.

The steamship America of Harbor Springs entered this port, Wednesday forenoon with a scow in tow on her way up lake Charlevoix where Roe Brothers have a contract building wharves.

We carry the Heath and Milligan Mfg. Co. line of dependable paints, now better—"Best since 1851." The best is what we all want. Why not buy and use this standard quality on your job? Staley Bros. Hapdware.

The Steamship Marquis Roen sailed from this port on her first trip of the season early this week, going to Petoskey where she will load with cement for delivery at some port near the south end of lake Michigan. Captain Albert La Blance is in command of the ship this season.

Trout fishing legally opens May 1st at which date a large number of local sportsmen will spend some portion of the day on their favorite stream in this region famous for its production of speckled beauties. With the element of luck in their favor many of the fishermen should return with a well filled creel approximating in the number taken the full legal limit.

Several members of Charlevoix Chapter No. 141 R. A. M. visited Emmet Chapter No. 104 Petoskey last Monday evening and witnessed work put on by officers of Cheboygan who conferred the work in the Royal Arch Mason degree. The same degree will be put on by Charlevoix Chapter next Monday night at the local Masonic temple, when the visit will be returned by members from Petonkey.

B. A. Herman returned from his trip south last Thursday. During his vacation, which extended over only four weeks, Mr. Herman visited many southern cities and spent some time in Cuba, mainly at and near Havana. The trip to and from the southern states was made by motor, and was fully enjoyed by Mr. Herman and family he having accompanied him from southern Michigan.

The government lighstship tender "Somac" entered the port of Charlevoix on her first trip of the season, last Monday forenoon, and tied up at the Charlevoix station where she took on a load of buoys, etc., to be placed in regional government waters as aids to navigation. The work in which the ship will continue, with Charlevoix as the base of operation until the placing of such aids is completed.

Postmaster and Mrs. George W. Weaver spent the week-end in Grand Rapids. They made the trip by motor and reported the roads in excellent condition. Mr. Weaver was accompanied by Mrs. Harrold Meggison and daughter Ilene who will visit friends there for a short time.

The music committee of the First Congregational church wishes to announce that they will present to the music lovers of Charlevoix the Peerless Colored Concert Company, a program of negro spirituals of exceptional merit. The company consists of a double quartette, four women and four men. They have been widely heard in concert circles all over America. The date is May 12th at the Congregational church.

Mr. and Mrs. Frank A. Kenyon of Mackinac Island, spent the early part of the week here looking after business interest relative to the building operations at the Ainslie cottage located at the corner of Michigan and Dixon avenues, which they are getting ready for the resort season. This cottage is nicely located, attractive in appearance, modern throughout, will be newly furnished, making for a most desirable home for occupancy by Charlevoix summer citizens.

A heavy iron weight attached to a banner above Bridge street near Park avenue broke its moorings last Monday morning and in its descent struck the top of a large coupe that was traveling south with considerable force, enough to shatter the rear view mirror, but causing no other damage. The weight weighed several pounds, sufficient to cause serious injury had the same fallen on the driver, some occupant of the car or some foot passenger; had any one happened to be in the direct course of the falling piece of iron.

The annual observance of Shakespeares birthday was held Tuesday April 26th at the home of Miss Eva E. Adams on Michigan avenue. Guests included the husbands of the members and also Miss Helen Armstrong of Chicago, Miss Anne Shanveis of California, Mrs. Dudley, mother of Mrs. Bernard G. Mattson and Miss Isabel Michell. Decorations consisted of spring flowers, emphasizing the club colors of purple and gold. After the delicious four course English dinner, the entertainment committee furnished a mucsal comedy, a revised version of Hamlet, and other formes of amusement.

Something like forty high school bands from various parts of the state will enter the band contest at East Lansing, May 17th according to a recent announcement by the director of the Michigan State College band. The high school bands from Petoskey, East Jordan and Ellsworth are named as the ones entered from this region. Bronze tablets will be awarded to bands winning first and second place in the contest with a medal suitably inscribed going to the director and members in the winning class. Also the winning band will be eligible for entrance in the National School Band Contest which is to be held at Council Bluffs, Iowa May 27 and 28th.

Spread of Infection Blamed on Handshake

The question has often occurred to us: Why is a handshake? Isn't it only a relic of the past with which we might profitably dispense? Much has been written about the custom, its origin and its meanings; yet nothing to justify it from a sanitary standpoint.

That it can convey infection can be proved by laboratory tests. The warm, moist surface of the hand fourm a very favorable resting place for bacteria while waiting for further transfers to our friends. Germs are no respecters of persons or relationship. The most devoted of parents are physically just as capable of transferring infection to their children as anyone else.

It is a strange thing, but nearly universal, that people cough and sneeze into or upon their right hands—the ones with which they shake hands. Germs cling very readily to the skin of the hands and it requires much mechanical and chemical scrubbing and disinfection to remove them; yet, so little things that they are, they are ever ready to transfer their offections from one hand to another, or from hand to lip or food. Under ordinary conditions the human hand is a culture bed of germs and fluids at any time to have its millions of germs augmented, or transferred, as the occasion presents. If you want to realize the possibilities of the transfer of disease by the hand just watch any one for a day and see where he puts his hands, what he allows to touch and sell them and how democratic he is in passing his germs along to his friends and family.

That the custom of handshaking will ever go out of use seems hardly true, but that it is a means of conveying disease is susceptible of scientific demonstration. Our only hope is that people realizing the danger will take every precaution against putting their hands where they may either receive or transmit infection. The Chinese have a very commendable custom of shaking their own hands when meeting friends, a custom we might well adopt. We make a bit of fun of China, but often may profit by her ancient wisdom if we but would. At least, your own germs will stay at home if you shake your own hand.—Ohio Health News.

Protests Against "Jazz"

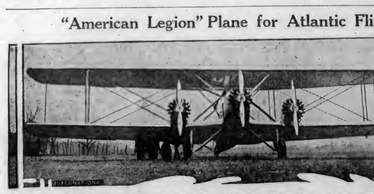
Shoshones Make Unique Peace Treaty With Whites

A historic friendship of three generations' duration between the Shoshone Indians and the whites was further cemented by a remarkable ceremonial held recently on the Shoshone reservation at Fort Hall, Idaho, when Chief Tendoy III completed a unique treaty of peace between the Shoshone nation and President Carl R. Gray of the Union Pacific railway. The illustration shows Chief Tendoy and A. C. Hinckley, representing Mr. Gray, at the conclusion of the ceremony.

"American Legion" Plane for Atlantic Flight



The first official flight of the three Wright-engined Keystone "Pathfinder" plane was made recently at Bristol, Pa., by Lieut. Com. Noel Davis. The plane, known as the "American Legion," is the one in which Commander Davis will attempt a nonstop flight this spring from New York to Paris for the Raymond Orteig prize of $25,000. It is a biplane, destined for commercial use.

Tamed Pelicans Are Her Pets

WORTH REMEMBERING

People of prehistive races rarely have headaches, a doctor reports.

A full-grown elephant is capable of carrying a two-ton load on his back.

A cane has been devised with two small wheels on the end to aid in guiding blind men along sidewalks.

Captain Cyril Turner, A. F. C., a British war aviator, was the first man successfully to demonstrate skywriting.

Not until 1840 were watches successfully made by machinery.

There are four tides every twenty-four hours at the Isle of Wight, England.

Tasmania spends one-ninth of its total government revenues on free education.

It took 108 husky dogs to transport witnesses to a court session at Fairbanks, Alaska.

Increased Crop Yield is Shown

Generally Rising Trend Is Indicated by Survey Recently Made.

(Prepared by the United States Department of Agriculture.)

A generally rising trend in yields per acre of leading crops over the last forty years in the United States is indicated by a survey concluded recently by the Department of Agriculture.

The average yield per acre of corn has increased 18 per cent since 1885, wheat 17 per cent, oats 14 per cent, and potatoes 20 per cent. The total area of the four crops expanded about 52 per cent, but the total production has increased 77 per cent.

Increased production due to higher acre yields alone amounts to 440,000,000 bushels of corn; 120,000,000 bushels of wheat, 165,000,000 bushels of oats, and 115,000,000 bushels of potatoes, a total of over 800,000,000 bushels of the four crops.

Outstanding Increases.

The outstanding increases in yields have been in the North Atlantic and the northern portion of the South Atlantic states, with somewhat lesser increases in the East North Central states. Similar changes have occurred in many portions of the West North Central states where pioneer agricultural methods have disappeared.

Corn yields in the North Atlantic states have increased from 6 to 10 bushels per acre during the 40 years, in the East North Central group from 6 to 12 bushels, and in the northern section of the South Atlantic states from 5 to 14 bushels. Yields average about 8 bushels per acre higher in Iowa, and 6 bushels in Minnesota.

Wheat yields have increased 5 to 6 bushels per acre in the northeastern portions of the country, but a decrease is shown in Ohio and other states in the Ohio valley for the period 1920-24; due largely to unfavorable weather.

Statistics of wheat yields per acre suggest that the southern part of the corn belt, as represented by Missouri and eastern Kansas, has lagged behind the northern portions as represented by Iowa and Illinois. In the development of agricultural practices and soil management methods that tend to raise the acre yields of important crops.

Pioneer Methods Used.

Continuance of pioneer methods in the spring wheat region and the expansion of wheat production into drier areas have prevented a rise in the state averages. Moreover, the economists point out, since moisture is commonly the limiting factor in crop production in the semiarid portions of the plains states, it appears probable that this part of the country will not experience as much rise in acre yields as is shown for the northwestern states and for northwestern Europe.

Department economists declare that developments in ensuing decades with regard to acre yields will depend, as in the past, to a great extent on prices of agricultural products. Rising values normally would result in increasing intensification and a higher level productivity through the wider use of better cultivation methods, development of suitable rotations, including the growth of legumes, more efficient use of crop residues and animal manures, greater use of commercial fertilizers, and the more common use of selected seed.

Full details of the department's study have been published in Department Bulletin No. 1438-D, entitled "The Trend Toward a More Effective Use of the Land as Shown by the Yield Per Acre of Certain Crops," copies of which may be obtained upon request to the Department of Agriculture, Washington, D. C.

Make Garbage and Other Wastes Into Fertilizer

A new method of municipal garbage disposal by composting has been worked out by the bureau of soils of the United States department of Agriculture as a result of its studies of present practices in this field including disposal by reduction and conversion of refuse into grease and fertilizer. Slaughterhouse and cannery wastes have also been studied by laboratory methods with a view to making recommendations that these by-products be conserved for use as fertilizer material wherever it is feasible. It has been found possible to compost raw slaughterhouse offal from small establishments with certain chemical agents in such a way as to avoid fly breeding and at the same time to conserve much of the fertilizing constituents contained in the original material.

The bureau has also co-operated with the bureau of biological survey in investigations of the potential value of the wastes from the meat-rabbit industry, as a source of oil, grease, and fertilizer tankage. More than two tons of rabbit wastes are produced daily in the environs of Los Angeles, Calif.

WAS WITH PERSHING

William B. Prosser, Omaha mailman, who was a cadet at West Point with General Pershing. Pershing was a senior when Prosser was a freshman. Among those in Prosser's class were Generals Dumont and Poore. Prosser left the academy in his second year to be a policeman. Then he got the mail route. He admits he's sorry he took the step.

All Worth While

There is nothing puerile in nature, and he who becomes impassioned of a flower, a blade of grass, a butterfly's wing, a nest or a shell, wraps himself around a small thing that always contains a great truth.—Maeterlinck.

Germany Led World

Germany was the first nation to establish compensation for industrial accidents in 1884. Austria followed in 1887 and Norway in 1894.

The idea that no crop at sea is complete without a storm might well be applied to life in general—on some days.

Masonic Memorial Nears Completion

The national memorial being erected to George Washington, Master Mason, by American Masons, is nearing completion at Alexandria, Va.

Oil Awakens Dreary Old Town

Arid Wastes Suddenly Leap in Value When Petroleum Is Located.

Boise City, Okla.—When oil is discovered in an American community, curious transformations take place in rapid sequence. Changes are as emphatic as riding suddenly from defeat to victory; wunt to satisfaction, drowsiness to activity, hope to realization, shacks to homes, overalls to riding breeches. Boise City, the sleepy hamlet in No Man's Land of Oklahoma, is the latest example of what the discovery of flowing black gold can do for a community.

Boise City, bound territorially to Oklahoma, is a sort of poor relation of five states—Oklahoma, Kansas, Colorado, Texas and New Mexico. It is within hailing distance of each, but none of them ever sent delegations in quest of Boise City's trade, because Boise City was poorer than a field mouse.

The 200, more or less, happy souls of this once dreary capital of No Man's Land plodded along trying to get a living under discouraging conditions from broom corn and wheat and cattle. Drenching rains were hailed as godsends. Merchants let their business away when depression appeared; where there were no crops there was no money. The place never had a reputation as a crop producer; usually it was drier than Old Tray's last year's bone.

A Bandit Lair.

In Wild West days the desolate mesas furnished horse thieves and bandits with impregnable fortresses. When gunfire seemed imminent the outlaws would ascend the steep, narrow trails to the summits of rocky hills. There they would stand their ground, and since only one trail led to the summit, the pursuing posse of men found it impossible to escape the shower of bullets from the top. As long as outlaws held their summit they were safe. They could dispatch food to halt the ascent of any one who took the trail to them.

Where the mesas converge in an effort for fertility, apple and peach orchards relieve the monotonous panorama. The cattle rancher still rides over the hills; farmers have optimistically sown patches of broom corn and kaffir.

Last summer, when an oil rig pounded into the earth there a herd of cattle mosied suspiciously at it. Now that the rig is the cynosure of all eyes and hundreds of persons visit the well, these cattle have moved further into the hills. All about is wild country; but this, of course, was of minor import to the geologists who located the well. Casing and coal would have to come considerable distance, hauled in by truck or team over the trails of ranchers through the flint hills.

Calm Before Storm.

To the east of Boise City there were indications of the shrubbing haul of civilization. Farms were fenced, the old rancher trails were cut off; milch cows, chickens and hogs added to the revenue. Boise City itself frowned, its 300 residents could not get much kick out of drought and rocky hills and baked earth.

A little more than a year ago the railroad came and more attention was given to Ridgeway. The 60 miles to a larger town is now a drive of something like an hour. South in Dalhart, Texas; southwest, Clayton, N. M.; northeast, Elkhart, Kan.; east, Guymon, Okla. Recently Boise City was awed with sudden tidings that the Ramsey brothers had struck oil in their wildcat test ten miles out of town. The word was broadcast over the oil fields of Kansas, Oklahoma and Texas.

The little hamlet of No Man's Land was overrun with visitors. Prices soared overnight. An oil scout asked for the check for his supper. The proprietor called to the cashier that the bill was about 90 cents.

"But I had only two fried eggs and coffee," the customer protested.

"Well, I'll let you have that for 75 cents," the proprietor retorted. Whereupon the oil scout instigated a movement to transfer headquarters for the new field to Elkhart, Kan., 52 miles northeast, or to Dalhart, Texas, 60 miles south.

Lodgings Are Scarce.

Opportunity seekers are now finding it difficult to live comfortably in Boise City. Lodgings are scarce, although Boise City has converted every facility into sleeping quarters. Garages and barns and attics and sheds are bringing their owners large returns by caring for the overflow from the hotel and two small rooming houses. To those who do not mind pimping what water they want and reposing under inadequate coverage, these accommodations are to be had for from $2 to $5 a night. Oil men sleep in their clothing to keep warm.

On every corner lever lease speculators. Everything is "sewed up" in the immediate vicinity of the well, but remote leases oftimes bring good profits. Business men from nearby towns are taking a fling in the oil game, and Boise City residents are talking to their farmer friends about "signing up."

The professional lease seeker might be mistaken for a millionaire horseman or a lieutenant of some Balkan army. His boots are high and laced, and from the top of these, in neat folds, are varicolored stockings. His shirt is bright, and when it is not open at the throat Byronesque it is adorned with a cravat of latest vogue. Usually he wears a corduroy suit of blue, brown or gray.

Talks of the countryside discuss with awe the fact that geologists poked about among the rocks and hills and finally passed off men that if they would spend approximately $115,000 on a given spot they had a good gamble of hitting "pay." Farmers bring their families almost daily to Boise City to gather facts about the well. Perhaps the field extends to their farm? Anyway, their leases ought to be worth a nitie.

Real estate prices are being inflated; sales are rapid. A few weeks ago shacklike homes on a 25-foot lot could be bought for $200 without any bickering. Today one would be lucky to secure one at $1,500. Merchants have enlarged their stocks. One of them built a fence-to at the rear of his store and offered "rooms to rent." Activity is surging beyond the city limits. Oil men come by train, by motor car and by airplane.

Oil in the well is 2,000 feet deep and has a paraffin base, while the base of oil in the Borger (Texas) field, 150 miles away, is asphalt. So the sleepy capital of No Man's Land finds itself exceedingly prosperous and somewhat awed.

Maine Town Puzzled by Punch Bowl Gift

Biddeford, Maine.—The town fathers are perplexed over what will be done with a big cut glass punch bowl that was presented to the citizens at the town meeting.

They are trying to figure out the significance of such a gift. Maine, the banner prohibition state, of course, has no use for such a receptacle, but, at any rate, the huge piece of glassware has been accepted and will ultimately, in all probability, find a reposing place somewhere in the town hall.

Mrs. Fannie Hall Fagan, of Cambridge, Mass., sent the gift here. It was presented by Selectman Elmer M. Robbins.

Shanghai Volunteers in Action

The Shanghai Volunteer corps has been taking a prominent part in the preparations for the defense of the international settlement there from the warring Chinese factions. Members of the corps are seen above leaping from a lorry for action.

OLD RUSSIAN OFFICERS KEEP THEIR ORGANIZATION INTACT

Traditions of Imperial Army Are Being Kept Alive by Exiles in Serbia and Bulgaria.

Belgrade.—How the traditions of the old Russian imperial army are being kept alive in exile and how its officers are being constantly replenished was revealed in an investigation recently completed by the Chicago Tribune correspondent.

Not only is the bulk of the old Wrangel corps officers undisbanded, but many troops who took part in the Odessan disaster are being maintained in military units in various parts of Serbia and Bulgaria. Two cadet schools, which were established shortly after the Bolshevik revolution, continue their functions and have just graduated a class of 100 young officers who have been accepted into the Jugo-Slav army, while retaining their Russian nationality.

The cadet schools, in which the bulk of the professors are from the imperial school near Leningrad, are models of co-operation. The students are divided into two groups, each half working six months. Thus, while one group studies, it is supported by the other in employment. At the end of the half year, the students become workers, while the workers enter the classes as guests of the boys they have maintained in school.

The course is completed in four six-month terms, the students showing much greater enthusiasm and diligence than formerly when their parents supported them during their terms of study. The two schools bear the names of "Don" and "Crimea."

As for the troops, many regiments have been able to maintain complete organizations working in companies in the coal mines, mills, fields, and so forth, in Yugo-Slavia and Bulgaria. Several times every year they don their uniforms and go through a training period in preparation for the day when they will be able to return and enlist the Bolshevik masters in Russia.

Seventy-two imperial regimental flags, saved from the revolution, have been deposited in the Russian church here and are guarded day and night.

Motorcyclist Attacked by 4 Leopards, 2 Elephants

Cuttack, India.—Four leopards and two elephants recently attacked a motorcycle riding at night from Mominsz to Nilrekli.

The road was so narrow that the rider could not turn his machine around, but by throwing out his clutch and racing his engine he frightened the leopards away. The explosions, however, did not alarm the elephants, which continued their advance to attack the rider.

By speeding up his machine the motorcyclist managed to dodge between the two beasts and made his escape uninjured.

Woman, 80, Lived All Her Life in Same House

Woodward, Okla.—Not many octogenarians leave behind them the unusual story of their life, as is revealed in the passing of Mrs. Thomas R. Tullose, who passed away recently at her home in Franklin, Texas. She was the mother of W. S. Tullose, Woodward, who was with her during the last ten days of her life.

Of the eighty years Mrs. Tullose had lived the entire time was spent in the house in which she was born November 16, 1846. She was married in the same room 55 years ago and her six children were born in the same room in which she was born. Two of them died in that room. The room is 20 by 22, and for many years, with another room, constituted the home. A log house with an open porch between the two rooms. As the family increased rooms were added, and today the house claims seven rooms.

Spring Will Tell

"What do you think it means?" asks the sweet young thing. "Jack comes over to see me every night now."

"Well, it may mean that he's in love with you, and it may mean that his landlady's run out of coal."

Realize the Need

She—Most men never think seriously of saving a fortune until they're married.

He—Perhaps they only realize then how badly they need one.

TREATED LIKE A DOG

She—You say she treats you like a dog?

He—"Yes." She—"Then how can you be so cheerful about it?"

He—"Because she loves dogs."

Her Ailment

Old Lady—Oh, officer, I feel so funny.—

Officer—Have you vertigo, ma'am?

Old Lady—Yes, about a mile.—The American Boy Magazine.

Explained

"Why are there more divorces now?"

"More marriages, old man."

A Sure Cure

Moore—Powers is a changed man. Does he still suffer from sleeping sickness?

Peters—No, he's completely cured.

Moore—How did it happen?

"He bought his son a saxophone."

The Cat!

Blinks—You say your wife treats you like a kitten? Is she really that gentle?

Tweek—Yes, she curries me around by the neck.

GOOD ENOUGH TO EAT

She—He said I looked good enough to eat.

He—"Well, as a very delectable sand-witch, you do."

Only Fair

"Do you believe in long engagements?"

"Long enough to get the installments on the ring paid up."

A New Trick

"I say, Jim, lend me the price of a telephone call, will you?"

"Certainly. Here's a nickel."

"But it's a call to London."

"To market, to market, a gallop, a trot"—and don't forget the Monarch Cocoa and Teenie Weenie Peanut Butter. We want to treat the children today.

Every genuine Monarch package bears the Lion Head, the oldest trademark in the United States for coffee, a complete line of the world's finest food products—Coffee, Tea, Cocoa, Catsup, Pickles, Olives, Preserves, Jellies, Spices and Vegetables. Ask still other items now sold by your grocer.

MONARCH

To Get Power From Sea

A floating factory to draw power from the sea, is an idea conceived by French engineers. It is to be operated by a turbine-driven generator, converting into power water driven through pipes plunged 1,000 metres into the sea. The floating plants would be hexagonal in shape and are planned so that ships may be loaded or unloaded on bridges at the edges.

Best for the Dog

Table scraps form the best food for the dog, says Nature Magazine. Do not feed him either potatoes of chicken bones.

Takes Out *all pain instantly*

CORNS

Dr. Scholl's Zino-pads stop all pain quicker than any other known method. Takes but a minute to quiet the worst corn. Healing starts at once. When the corn is gone it never comes back. If new shoes make the spot "touchy" again, Zino-pad stops it instantly. That's because Zino-pads remove the cause—pressing and rubbing of shoes.

Dr. Scholl's Zino-pads are medicated, antiseptic, protective. At all druggists and shoe dealers—35c.

Dr Scholl's Zino-pads
Put one on—the pain is gone!

Green's August Flower

For indigestion, Dyspepsia, etc. Relieves Distress after Hurried Meals or Overeating. Being a gentle laxative, it keeps the digestive tract working normally. 30c & 90c. At all Druggists. G. G. GREEN, Inc. WOODBURY, N. J.

SKIN BLEACH

Formula recipe, directions, \$2.00. Send for FREE BOOKLET. Am conducting write-in H. H. Jersey Co., Dept. F, 309 Michigan Ave., Chicago.

Harmless, purely vegetable, laxative and tonic. Children love it. Safe. Sold and Guaranteed non-narcotic, non-alcoholic.

MRS. WINSLOW'S SYRUP
The Infants' and Children's Regulator
Children grow healthy and free from colic, diarrhoea, flatulency, constipation and worms. Makes teething easy. Buy, to-day. Always keep on hand. Safe, pleasant—always keeps regular habits and avoids sickness.
At All Druggists

JUNGLE GROWS OVER ONCE MIGHTY CITY

Americans Find Place Older Than Ancient Rome.

A city in Indo-China, known through Chinese literature to have been old and powerful when Rome was new, has just been discovered by the Americans—Harry Hervey and Carlton Hildreth.

Writing of the lost city, in McCall's Magazine, Mr. Hildreth tells of the people whose decaying capital he helped in discovering:

"The Khmers were a people more mysterious than the Incas, and their greatness is comparable with the city builders of China and Babylon. Indeed, the ancient Khmer capital, Angkor-Thom, whose ruins stand forty miles the Cambodian jungles, was a city more thrilling than Rome at its height.

"The Khmer empire reached its height in the Twelfth century, then declined, and after a series of wars with the Thai race (now the Siamese) and the people of Champa (modern Annam) the Khmers slipped out of history, leaving the ruins of their mighty cities and a few meager inscriptions as the only records of their spectacular rise and fall. What became of the Khmers? Did their defeated armies retreat into the hinterlands and there build other cities? Or did they die out, leaving only a thin strain of their glorious blood to be drawn through the centuries into the present-day natives of Cambodia?

Mr. Hervey adds to what is known of the city as a result of his explorations. He makes something of the rise of the city and says:

"It was Suryavarman II, some centuries later, who ordered the building of Angkor-Wat. Out of the toil and death of thousands of slaves rose the mammoth edifice rose stone upon stone, tier upon tier, until its towers crowned with golden lotus, it dominated the surrounding marshy jungle—a huge pyramide of Cheops or Thom, a monument to the cruelty and magnificence of the Khmers.

"Near the end of the Twelfth century the empire reached its height. A comparatively short time after that—between the years of 1296 and 1297—Angkor was visited by a Chinese ambassador, Tcheou-ta Khouan, whose memoirs are the only records of the manners and customs of his people.

"The splendor of Angkor at the time of Tcheou-ta-Khouan's visit was prodigal. Odors of wax were eating into the heart of the Khmer empire. In one mighty gesture, spending their wealth and their strength, these people had built Angkor—and their race died.

"The Thirteenth and Fourteenth centuries they were attacked again by the Siamese, by the Thai. That race, the Siamese. Then the slaves rose up against them. The end of the Fourteenth century saw the city and Angkor's lavish beauty and brutality.

"As a final ironic humiliation, the city, deserted, sacked, and delivered over to the jungle, whose monstrous greenness inundated it, ripped with its exquisite walls, tore its gods from their shrines, and held it captive until, more than 500 years later, a wandering Frenchman came upon it and so stirred his country with his account of its grandeur that in 1907 France acquitted it from Siam by one of those political feints which is called diplomacy. . . . Thus ends a history brazen as a scarlet poppy."

Houses of Cork

Among the great number of new houses required for men to work the new Kent coal field are some that are being built on a novel plan.

The walls are 6 inches thick apart from the inner half-inch coating of plaster. The outer three inches are of concrete, while next to the plaster are two inches of compressed cinders called breeze. Between the concrete and the breeze is one inch of compressed cork! The whole is built solidly about a steel frame, the cork taking the place of the usual airspace in the wall.

The cork, being a nonconductor of heat, keeps the heat in during winter and keeps it out in summer, and those already in occupation are proving very comfortable on that account. Over a hundred have been built during the past twelve months, and two hundred more are under construction.—London Tit-Bits.

He Had Proof

The young son of a certain family having for some time annoyed his musical friends one of the best singers of the city, whose name is often mentioned in connection with musical affairs, came to his mother one day saying:

"Did you know that Mrs. ——— sings at the Lyric?"

"No, my dear, she sings in concerts and some times in church, but not at the Lyric," replied mother.

"Well," said he triumphantly, "look here at this program, it says 'Mrs. ———, lyric soprano.'"

And then it was up to mother to explain what a lyric soprano is.

Wind-Made Snowballs

The wind made snowballs and George E. Sanderson of West Townshend, Vt., says he never saw anything like it in his sixty-four years. Meadows owned by Mr. Sanderson and John Chaplin adjoin, making a comparatively level area nine acres in extent and the entire acreage was covered with snowballs. The snow was wet, so it did not drift, but the wind rolled it up into balls from three to ten inches in diameter.—Boston Globe.

Unable to Put Trust in Alligator's Memory

Charles Ringling, of circus fame, who died at Sarasota, used to collect anecdotes of Florida crackers, poor whites and colored folk.

"One of Mr. Ringling's anecdotes," said a Sarasota realtor, the other day, "was about a cautious convert.

"There had been, you see, a colored revival, and the colored revivalist was about to baptize a batch of converts in one of those dark, silent, suspicious-looking streams that you find in our Everglades.

"'Come,' the revivalist said, as he stepped into the black water, 'Come, follow me, brethren and sistern.'

"But just then a couple of alligators raised their heads from the mud and opened their terrible mouths in a vast yawn. This caused the converts to step back with low cries of alarm.

"The revivalist rebuked them. 'Brethern and sistern,' he said, 'wan't yo' afraid de Lord? He took keer o' Jonah, didn't he?'

"'Yaas, he did, parson,' said a convert soberly, 'but a whale's different. A whale's got memory. But if one o' dem 'gators was ter swaller dis coon he'd jes' go to sleep agin in de mud an' forget all about it.'"

Big Discovery Made With Crude Telescope

One of the capital discoveries of astronomy was made with a crude telescope in April, 1845. It was the discovery of spiral nebulae, by Lord Rosse, an English peer. His large telescope was erected in a country district of Ireland more than eight years ago, for the most part with local labor, and it lacked all the advantages that modern machine tools now afford. Its long tube, supported upon a ball-and-socket joint, and slung in chains between two high walls of masonry, peered through the Irish mists. Lord Rosse could observe only when the object was near the meridian and then at the cost of constant effort in motion. The cost of constant effort in motion. The cost of constant effort in motion. The instrument's apparent westward motion of the stars is counteracted by the steady motion of the telescope tube, turned slowly about a polar axis by a powerful driving-clock. Lord Rosse, after the tube had been worked back and forth with a windlass until the ponderous task of finding a celestial object had been completed, then had to keep it in the field of view by constant exercise of his similar primitive contrivances.—George Ellery Hale, in Scribner's Magazine.

Attire Hard to Adjust

The original dress of the Scottish highlanders consisted of the belted plaid can, or belted plaid, this being a piece of tartan cloth two yards broad and four yards long, drawn around the waist in carefully adjusted folds, and firmly secured with a belt. Like the modern kilt, the lower part reached the knees while the upper was tixed to the shoulder. It appears to have been a perfect freedom of the right arm, in wet weather the plaid or upper part of cloth served as a covering to the shoulders. It required considerable dexterity for a Highlander to attire himself in a belted plaid. The mode usually employed was to lay it on the floor and, after the folds had been carefully arranged, to lie down upon it and buckle it on.—Vancouver Province.

Birth of the Ego

It is easy to see that great economic advantage accrued to the individual, and hence to the race, through the acquisition of self-consciousness. It enabled each man to economize enormously his expenditure of energy by concentrating upon definite desirable accomplishments. Instinctive impulses and urges now had something to declare and control them, instead of being switched about by every new and passing sense impression. Man had acquired the capability of thinking consciously "I want, I will." And so was born egoism.—From "Concerning Irresistible Strong," by William H. Smyth.

Swiss Religious Founder

The Mormonites take their name from that of their founder, Menno Simons, a Swiss religious enthusiast of the Sixteenth century, and they maintain, according to the Encyclopedia Britannica, "a form of Christianity which, discarding the sacerdotal idea, owns no authority outside the Bible and the enlightened conscience, limits baptism to the believer, and lays stress on those precepts which vindicate the sanctity of human life and a man's word."

Portents of Sneezing

In the ancient days of Greece and Rome a sneeze was supposed to bear with it some prognostication more than a mere cold. To sneeze while rising from the table or bed was said to indicate approaching death.

Yet, to sneeze between midday and midnight under favorable planetary conditions, was an augury of happiness. Again, if the Greek or Roman sneezed to the right while entering, it was regarded as a happy omen.

Ridiculous Sentences

Imprisonment for 350 years at hard labor—believed to be the longest sentence on record in the Balkans—and 10 other sentences of 250 years each have been given a leader of a band of Albanian brigands and a number of his followers for the murder in 1915 of 14 Siberian soldiers in a convent near Prizerad.

ROAD BUILDING

GREAT ECONOMY IN PAVING ROADS

One of the surprising things about the statistician is the number of facts he can tell us about ourselves that we did not know. In the last few years the figure man has applied himself to automobiling and trucking, and he seem to have proved that pavement, when actually needed, costs less than nothing for those driving cars, because the driving expense is so reduced that the saving is more than the driver's share of the paving cost, says the Indiana Farmer.

For a half dozen years engineers and statisticians for highway commissions, tire companies, fuel stations and engineering companies have been at work, learning exactly what the saving is when hard-surfaced roads are traveled, and they have found that a driver traveling 6,000 miles a year will save a little more than $185, if gasoline sells for 20 cents. This is a comparison between hard-surfacing and gravel roads. Going from earth roads to pavement will save $47 a year. There are other savings that have not been so accurately figured. Tires cost much less when used on pavement, but there is no exact data on the subject. An example, however, is cited by the Indiana highway commission. A bus owner uses 9 30-passenger cars on paved roads and a seven-passenger car on gravel roads. The distance is equal in both cases. The former has gone 30,000 to 50,000 miles on one set of tires on pavement, but the little bus goes only 12,000 to 14,000 on gravel. From this it is apparent that the saving on tires alone might pay the driver's share of hard surfacing cost.

Roughly speaking, it will cost three-quarters of a cent more a ton-mile to travel on earth than on paving, and it will cost one-third of a cent more a ton-mile to travel on gravel than on paving. A ton-mile of traffic is the equivalent of driving a car and load weighing one ton the distance of one mile. If a car and its load weighs two tons it has given a ton-mile of traffic when it has gone a half mile. A driver, loaded with three persons, produces a ton mile in about one mile. These are the figures of F. R. Whitehead engineer of the Iowa state highway commission. Mr. White shows that on an earth road 14 ton-miles may be expected from a gallon of gas used in a gravel road 21 ton-miles and on pavement 31 ton-miles. His rule is that when an earth road carries 320 vehicles daily average, it is economical to pave the road, and when a gravel road has 470 ton-miles of traffic, it is economy to pave it.

Some day we may expect the figure men to give us the total comparison between earth, gravel and paved roads, taking into account not only the costs of fuel and tires, but the wastage caused by vibration, shock and jar, the loss of paint and similar items. There is no doubt that a car will last much longer, if driven over pavement than if driven on earth or gravel highways, but the foregoing does not make comparisons based on the wear and tear.

Improved Highways Cost Canada $100,000,000

Canada spent $100,000,000 on good roads in 1926, according to a bulletin issued by A. W. Campbell, federal commissioner of highways of the Dominion.

"More than 2,000 miles have been completed in the Dominion this year," said Mr. Campbell. "Ontario led the provinces in road building with an expenditure of $30,000,000 on new highways and maintenance and repair of existing roads. Quebec spent $20,000,000. The prairie provinces of Manitoba, Saskatchewan and Alberta accounted for a combined total of $30,000,000. British Columbia about $8,000,000 and Nova Scotia and New Brunswick $5,000,000 each.

"Part of the provincial highways were constructed under the federal aid scheme. Under the terms of this grant, the provinces undertake the construction of trunk highways. On completion and approval by the federal highways department, the Dominion government pays 40 per cent of the construction cost.

"Road patrols and maintenance crews now operate constantly on 21,600 miles of highway in Canada, keeping the roads in condition for motor traffic. Highway improvement has been a big factor in developing Canada's tourist trade. More than 2,500 000 automobiles entered Canada from the United States this year for tour ing purposes. Rapid settlement of farm land in western Canada has encouraged a comprehensive program of road building in the prairie provinces."

Trumbower at Wisconsin

Doctor Trumbower, chairman of the committee of highway finance of the highway research board, has resigned his position with the United States bureau of public roads to become professor of transportation at the University of Wisconsin. One of his duties will be the development of a highway transport curriculum. Doctor Trumbower will not sever his connection entirely with the bureau, but will continue his highway research activities for the present, at least.

Council Proceedings

Council Chambers, April 25, 1927.

The Common Council of the City of Charlevoix met on the above date, with Mayor Bergeon presiding. All present. Bridge, Eckinger, Geiken, Howe, Livingston, Partridge.

Minutes of the meeting held April 11, 1927, were read and approved.

A communication signed by Mrs. D. K. Soayda and four others, asking for the construction of a sewer in that part of Garfield avenue, lying between State st. and Bridge st. was read, and referred to the committee on Streets and Sewers and Public Health.

Ald Livingston offered the following resolution, and moved its adoption, seconded by Ald Bridge.

RESOLUTION

Garfield Avenue Sewer, between State and Bridge Streets

Resolved by the common council of the city of Charlevoix that the petition of Robert Dickie and others, being the owners of a majority of the lands abutting on either side of that part of Garfield avenue lying between State street and Bridge street in said city, asking for the construction of a sewer in such part of said avenue, be and the same is hereby received and placed on file.

Resolved further, that Monday the 16th day of May, 1927, at eight o'clock in the afternoon, be and hereby is fixed as the time when the common council will meet in the council rooms in said city, for the purpose of hearing objections and suggestions relative to the construction of such sewer.

Resolved further, that the city be, and hereby is, instructed to cause notice of the time and place of such hearing and the purpose thereof, and of the filing of the plans and estimates and petition of cost for the construction of such sewer, to be given to the owners of the lands and premises abutting on either side of said part of street, and all other persons interested, by publication of such notice in the Charlevoix Sentinel, the official paper designated by said city, once a week for three consecutive weeks previous to said day of hearing, in the Charlevoix Sentinel a newspaper printed and circulated in said county.

MORTGAGE SALE.

Default having been made in the conditions of a certain mortgage executed by George Bates, an unmarried man, of Charlevoix, Michigan, unto Rudolph C. Korth, of Charlevoix, Michigan, dated the 24th day of August, A.D. 1925, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, on the 28th day of August 1925, in Liber 56 of mortgages on page 303, on which mortgage there is claimed to be due the sum of Two Thousand One Hundred Fifty and 39-100 Dollars including the principal sum due with interest, together with an attorney fee of thirty-five and No-100 Dollars as provided for by the said mortgage and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas, the taxes required by the statutes to be paid on said mortgage were duly paid prior to the recording thereof, and are therefore, Notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by the said mortgage, at public auction, to the highest bidder therefor, at the front door of the court house in the city of Charlevoix, Charlevoix county, Michigan. (that being the place where the circuit court for the county of Charlevoix is held) on Tuesday the twenty-first day of June, 1927, at eleven o'clock in the forenoon on that date.

The premises described in said mortgage being the lands, premises and property situated in the city of Charlevoix, county of Charlevoix and State of Michigan, described as follows, to wit: Commencing at the northeast corner of lot one in block six of the recorded plat of the village (now city) of Charlevoix, Michigan; thence south forty-two feet two and one-half inches along the east line of said lot one; thence west ninety-six feet along the party-wall line of the adjoining parcel of land on the south and extending to a point in the west boundary line of a public alley running north and south through lot two in said block six of the recorded plat of the village (now city) of Charlevoix, Michigan; thence north forty-two feet two and one-half inches along the west boundary line of said lot one and alley, to the northwest corner of said lot one; thence east ninety-six feet along the north boundary lines of said lots one and two, subject to an easement of a public alley, fourteen feet in width on the west side of said parcel of land, also subject to party wall agreement concerning the party wall between the above parcel of land and the parcel adjoining immediately south, together with the hereditaments and appurtenances thereunto belonging or in anywise appertaining.

Dated March 21, 1927.

RED CROSS $10,000,000

For Relief in Mississippi Valley Flooded Districts

National Red Cross officials are appealing for funds to be used in connection with Mississippi valley flood disasters created during the past few days, a disaster such as has caused a loss of millions of dollars, thousands of homes and some loss of life.

Local Red Cross chapters are urged to take part in the work, act promptly in soliciting financial aid and forward all cash raised to local quarters at once in order to assist the thousands made homeless and destitute by the floods that have inundated homes and millions of acres of land in the flooded districts.

Early estimates of the fund needed for flooded districts was placed at $2,000,000 but the first official survey of the territory by officials the amount has been increased to $10,000,000 and the Red Cross officials state that the amount be speedily raised by local chapters and forwarded as early as possible to the headquarters.

Several counties in this region have raised the quota allotted to them, some part of which has been forwarded as requested, the balance to be sent later.

Charlevoix county Red Cross workers are putting on a drive and probably will raise the fund requested from headquarters without loss of time or great effort on their part.

TOP O' MICHIGAN ANNUAL POTATO SHOW

Meeting Held at Gaylord Last Week

Seventy-five farmers and business men, representing nine northern counties, met in Gaylord last week to formulate plans for the Top O' Michigan Potato Show this fall, the meeting to be the fifth annual of the association.

New directors were elected at the meeting held last week, two Charlevoix county citizens, William Pearson of Boyne Falls, and County Agent Mellencamp being selected to take a place on the board of directors, while Mr. R. C. Benoit of Alba, Antrim county was elected president of the association, with Irwin Cole of Alanson, vice president, and C. Lytle of Gaylord, treasurer and N. E. Glasser also of Gaylord, secretary.

The 1927 show will be held at Gaylord November 2-3-4, and early interest taken indicates that the fifth annual event will be superior in every way to those held in the past. Higher standards, better qualities and greater yields per acre with improved marketing facilities are the advantages sought by the association.

Firemen Refused Job

The fire alarm sounded from the outskirts of Ward 7, Bangor, Maine, early in the morning. An arrival of hard rain in deep snow, they found, no sign of fire, nor could any one in the neighborhood explain why the alarm had been turned in. Finally an old woman appeared and said that her family was in great distress. A skunk had fallen into their well and she thought the firemen ought to pull it out. But the firemen did not.

ALPHABET BORN IN MIND OF EGYPTIAN

Theory Advanced by Chicago Scientist.

Picture writing, familiar in old Egypt poring over a tablet of Egyptian picture writing. He knows something about the Egyptian hieroglyphics, how the sign for house, for ox, ample, is a bottle drawing, vaguely suggestive of a child's picture of a house. Probably he knows how to write his name in the Egyptian, picturing it together, in a series of simple signs to make up the sounds. And he has an idea.

From one inscription or a simple series of inscriptions, the scholar, with a little help, perhaps, from an Egyptian friend, picks out some twenty-five signs that represent different consonant sounds in words. With those he can begin to build words. And nothing can be done that will be easier to spell out than the picture puzzles of the Egyptian tablets. He has chosen as letters are set down in the order of their appearance on the Egyptian inscription. And so the first crude alphabet is devised and ready for changes and improvements by other thinkers of many countries.

This theory as to how the alphabet was invented is how the letters were set down in order has just been advanced by Dr. B. L. Ullman of the University of Chicago. Doctor Ullman, who presented his theory at a meeting of archaeologists at Cambridge, believes that the alphabet may be of greater antiquity than most scholars have considered likely.

The oldest specimens of writing hitherto to be found are those in the Cuneiform inscriptions found at Sinai in 1905. These inscriptions Doctor Ullman said, have been generally dated as late as 1500 B. C., and that date has been widely used in recent years as the time of invention of alphabetic writing.

But three years ago inscriptions in Phoenician alphabetic writing almost as old as the Sinai writings were found at Byblos, in Syria. The letters of these inscriptions were considerably more developed than the Sinai writing, and Doctor Ullman points out that such progress in age of the two and one-half inches along the east | two inscriptions would indicate that the Sinai writings were the first attempts at alphabetic writing.

CRAYCROFT ON WAY HERE

Steamer Recently Purchased by Capt. Roen to Join Fleet

The steel steamer Craycroft recently acquired by Captain John Roen from the U. S. shipping board at Newport News is making the trip to the Great Lakes, leaving from Philadelphia April 28th with a cargo of sugar for delivery at Green Bay and Milwaukee, with Captain Charles Davis in command who will deliver the ship in Montreal, when Captain Roen will take charge of the same as owner-master and bring her to her home port Charlevoix; while Captain Davis will return from Montreal to Norfolk, Va. and his duties as a salt water sailor.

Other chief officers on board the Craycroft are: Mate Ole Jacobson of North Tonawanda, who last season was chief, and J. B. John; second mate, Peter Gallagher of St. James and chief engineer, James Gordon of Norfolk, and in addition a full crew of twenty eight men.

After delivering her cargo at Milwaukee the Craycroft proceeds to Muskegon where derricks and other equipment will be installed on the new ship in order to facilitate the proper and speedy handling of future cargoes.

The ship will engage for the season in carrying cement and gravel for delivery to ports along the east shore of Lake Michigan for use in highway construction mainly projects that Mr. E. F. Sloan of the Charlevoix Abstract and Engineering company have charge as contracting constructor with the state highway department.

The new ship in length and breadth compares favorably in size with the J. B. John, the latter well known at this port.

INSECTS THAT ARE SUPERIOR TO MAN

Bees' Government Cited as an Instance.

No human government has ever approached in perfection the economy, nutrition, and scientific precision and perpetuity to be found in the government of the honey bees.

Biologists have sought in vain for a means of sex determination in our race, writes Dr. Frank Thone in Nature Magazine of Washington. Bees, wasps and some other insects produce males, females and neuters at will, in accordance with the needs of the colony. We have learned to send wireless messages, but the insects have long been able to signal one another perfectly by means of odors, the sense with which we do not understand.

One of our problems in plant nutrition is to create a fire which glows, but which does not burn. So far, in our best incandescent lamps, energy of combustion is wasted in the form of heat. Lightproducing insects, such as the fireflies, however, are able to kindle in their bodies a little blaze which is more than 90 per cent light and less than 1 per cent heat.

If we have ever wanted to warm his habitation with fire, the bees had discovered a muscular exercise whereby in very cold weather they could raise the temperature of their homes as much as 40 degrees Centigrade.

We cool our rooms with electric fans, but before electricity was harnessed the bumblebees had learned to do individuals along their passageways to create cool air currents by constantly fluttering their wings.

The gardener might learn points in his art from the ambrosia beetle, which plants beds of succulent fungus in its burrows to furnish nourishment for the young.

The soldier might learn the possibilities of poisonous gases in warfare from the bombardier beetle, which hurls disconforting charges of anacrid gas at its enemies.

The farmer could discover that good seeds are produced when the flowers are pollinated, by watching the operations of the pronuba moth on yucca blossoms.

The tinsmet, with amazing wisdom, Nature Magazine points out, gathers pollen from the anthers of the flowers and applies it directly to the stigma, with no other object, so far as we know, than to insure the formation of plump seeds upon which the caterpillars of the moth depend for food.

The surgeon might get hints on the use of anesthetics from the solitary wasp, which thrusts its drug-laden sting into its spider or insect victim and by that means stupefies and preserves it as food for future baby wasps.

Insects are the original paper, silk (2d), fabric makers. We have, perhaps, beaten them in the paper business, but our imitation silk is inferior to the genuine and our synthetic honey an abomination.

Jud Tunkins

Jud Tunkins says a man who loves dogs at least has the enjoyment of friendships that don't hand him any sassy sarcasms.—Washington Star.

Tug in Trouble

The flatting tug Dorothy M. went on the rocks near Good Hart during the blow last Tuesday morning, resulting in a call for the local Charlevoix coast guard crew to come and release the ship. The members from the Charlevoix station made the run to Good Hart and succeeded in releasing the stranded vessel from her perilous position after which they returned to the home port. Captain Charles Hansel was in charge of the Dorothy M. and reports that the stranded craft was uninjured by the accident.

PACEMAKERS CLUB

Charlevoix the Beautiful 1927 Play Place

The Pacemakers Club, members of which are connected with sales departments of the Kalmazoo-Loose Leaf Binder Co., and its officials have designated Charlevoix as "The 1927 Play Place of the Pacemakers," with headquarters at the "Inn" during their annual outing which will take place in September.

The pleasant vacation spent in Charlevoix in 1926, courtesies extended by the Inn management, the surrounding resorts, entertainment provided, golf course, tennis, boating, bathing beaches, etc. influenced their final decision in selecting this city as the place for spending their holiday season.

The number of pacemakers that will be in attendance is at this time undecided. Approximately one hundred were present at the 1926 gathering and it is expected will be increased during the 1927 meet—and all, particularly those present last season are looking forward toward a pleasant enjoyable time here in September.

Commercial Peers

Corsetina Vanderbilt, Jr., was talking to a New York reporter about Madame Jacques Balsan and the recent amalgamation by the Catholic church of her marriage to the duke of Marlborough.

"On her father's part," he said, "this was a marriage of wealth and aristocratic blood. On the duke's part it was a worse thing still, a thing of sordid commercialism.

"The duke reminds me of the little girl whose mother, after a birthday party, asked her:

"What, what is the feminine of peer?'

"'Heiress,' answered little Minnie."

SOILS, FERTILIZER, LEGUME CAMPAIGN

Specialists will be in County Next Week

During the week of May 9-13, specialists from M.S.C., will be in this county cooperating with your county agent in putting on an intensive Soils-Fertilizer - Alfalfa Campaign. The meetings will be held in barns and will be informal discussions in which tried and proven methods in soil improvement and alfalfa growing will be emphasized. Your success depends first of all on the fertility of the land you work. Are you keeping it up? Learn the most effective ways of doing it. Are you using enough fertilizer? Are you buying the right kinds and applying the proper quantities? Should you use lime? Do you know what it will do to your land?

Are you sure that you have enough alfalfa and sweet clover? These meetings are the most important and beneficial to be held this year. Plan on attending the meeting nearest you:

May 9—3.00 p.m., Edd Ewing, Chandler 10.00 p.m., Carl Clark, Chandler; 12.00 p.m., John Matthews, Melrose; 3.00 p.m., Harry Behling, Wilson p.

May 11—9.00 a.m., Wm. Burns, Forest Grange 1.00 p.m., Wm. Withers, Marion tp; 3.00 p.m., Robert Sherman, Eveline tw.

May 13—9.30 a.m., Fred Larsen, South Arm tp; 1.00 p.m., County Poor Farm, South Arm tp; 3.00 p.m., Ray Loomis, Eveline tp.

May 13—9.30 a.m., Terry Barber, Wilson tp; 1.00 p.m., Frank Fox, Bay tp; 3.00 p.m., Roy Kent, Hayes tp.

CHARTER MEMBER RE-SORT COLONY PASSES

Mrs. L.J. Heaton, Old Time Summer Resident

A message of recent date from Detroit, announces the passing of Mrs. L. J. Heaton, one of our best known old time Charlevoix summer citizens, at her home Friday night, April 29th.

Mrs. Heaton was a charter member of the early association now known as the Belvedere Club, her membership dating back to 1876, extending over a fifty year period during which time she has been prominently identified with its progress, social and financial.

She is survived by one daughter, Miss Marie Heaton and one son James H. Heaton, both of Detroit.

NUTRITION PROJECT ON

Meetings Held in BoyneCity and in East Jordan Last Week

The leaders in the Ladies Nutrition Project held their second meeting last week at East Jordan the 28th and Boyne City the 29th. Mr. Bernice Wells, specialist, gave the instruction to the thirteen groups represented.

After each lesson these leaders go back to their respective communities and carry the message to all the ladies interested in receiving the work. They are doing this work without pay, and are doing at least eight days of their time to be of service to their communities. With the following 8 days of ladies acting as leaders there is no reason why all ladies should not be interested in attending the classes and receive this beneficial information without pay.

Meetings Held at Boyne City

Wallace Lake; Hattie Frank, Chas. Fehl, B. R. Gardner, Florence Hosmer, Ivah Hattes, Verna Bearded, A. Kiplehoff, J. R. Furman, C. Reidel, Boyne City; A.W. Loomis, Emma Arnot, Hattie Murphy, Clara Liskum, Amanda Sommerville, Kenny, Maud Porter, Mildred Campbell, Robye Stueck, Grace E. Murray, Elizabeth Craig, Flora Craig, Ruth Ney, Maude Crawford, East Jordan; Daisy Snyder, Mrs. Schutz, Boyne Falls.

MRS. MABEL REEVES RUSSEL

For many years, at first with her parents, and after their demise, with her own family, Mrs. Mabel Reeves Russel came to spend her summers in Charlevoix at their cottage on Lake street, and for years ago she came to make it her permanent residence. She acquired a largeacquaintance of friends, and by her genial, pleasant ways endeared herself to them. She became a victim of cancer, and decided to take the operation for relief. Her operation, which was performed April 23, and from which she never waved away the following morning.

She leaves one daughter, Francis Lillian, three brothers and several other relatives, besides a large number of local friends to mourn her going. She took a great interest in the work of the W.C.T.U., the Methodist church and the Ladies work of the Baptist church.

The funeral services were held in the Baptist church on Monday morning, conducted by Pastor Rev. Herman Iterns D.D. and the remains taken to her birthplace, Bloomington, Ill., and there buried beside her parents to await the great Easter morning, which she had anticipated the Sunday before her passing.

NUPTIAL VOWS ARE EXCHANGED

Photoengraving is very detail work and the services which took place in the early morning on Wednesday, April 27th, when Miss Florence Ruth Meierer, daughter of Mr. and Mrs. O. L. Maderer of Superior, Wis., was united

CHAPTER XIV—Continued

"Ya-hay," muttered the warriors in guttural assent. "We will keep our hearts strong, O Ta-wan-ne-ars."

Their faces were more serious than before, but they exhibited no signs of fear.

We moved much more cautiously now that we were near our journey's end, with three scouts always in front, one on either flank of the path we trod. But we saw no signs of other men, although many times we came upon bear tracks. Toward evening we struck the waters of the tumbling little river through which Ta-wan-ne-ars and I had waded that night after Marjory had released us.

Scouts returned to report not a footprint in the snow. We ate a little parched corn mixed with maple sugar and some jerked meat we carried in our haversacks.

About midnight we all moved forward, Ta-wan-ne-ars leading the line. The oaks and elms, maples and willows, which had composed the environments of the forest, now gave place to tall funereal fire, whose massive judegreen foliage remained untouched by the icy breath of winter. Grotesque shadows darted eagerly over the white ground as the trees swayed and groaned. In the distance an owl hooted solemnly. The Otter touched my shoulder.

"Did you hear the owl?" he murmured.

"Yes," I whispered back.

"It is cold for an owl to leave his tree hole."

He threw back his head, and I started at the fidelity of the repetition.

"Too-whoo-oo! Too-hoo!"

We listened, but there was no answer. Instead, after brief interval, the howl of a wolf resounded.

A few yards farther on the owl hooted again. The line halted, and the warrior in front of him whispered that Ta-wan-ne-ars wished to speak with me. I passed by him and several others, and came to where the chief stood, peering, or, trying to peer, into the night.

"There was something strange about the owl, brother," he said. "The warriors told me that the Otter answered it, yet it did not reply. And then the wolf—"

A yell as of fiends from hell shattered the mantle of silence. Flames spurted through the firs, and in the gleam of the conflagration I saw arrows thrown into our midst. I had a fleeting glimpse of hideous masked figures bounding between the tree trunks, and

"Keep your hearts strong, brothers of the Long House," shouted Ta-wan-ne-ars. "They are only Cahnunga dogs. Stand to it."

He fell as he spoke. I imitated him. Our men shot off a scattering volley. Then the False Faces were amongst us, coming from all sides, springing out of the ground, dropping from the very branches overhead and wielding their gin-je-was, or war clubs, with dreadful effect.

CHAPTER XV

Ga-ha-no's Sacrifice

There was no time to reload. We fought with ax and knife as best we could. Ta-wan-ne-ars and I, with half a dozen of our warriors, crowded back to back. The rest of our party were cut off in twos and threes.

Resistance was hopeless. The assurance of False Faces seemed to cure nothing for death if only they could bring down an Iroquois.

I was knocked senseless by a blow which I partially warded with my tomahawk. When I came to I was lying in the snow in front of a huge fire. My arms were bound and my head ached so violently that I felt sick.

"Is my brother in pain?" asked the voice of Ta-wan-ne-ars.

I rolled over to find him lying beside me, the blood from three or four trivial cuts freezing on his head and shoulders.

"Yes," I groaned, "but 'tis naught."

"There was treachery," he said. "They knew we were coming, and they lost many men so that they might take us alive."

"All our warriors—" I faltered.

He turned his head to the left; and, following his gaze, I saw that I was on the right of a line of recumbent figures, which my dizziness would not permit me to count.

"No not all, I think," Ta-wan-ne-ars answered after a moment. "Five are slain and fourteen others lie here. But I do not see the Otter."

"The Otter suspected something wrong," I said. "'Twas he who answered the owl's call."

"It may be he escaped," replied Ta-wan-ne-ars. "I must warn our brothers to my naught of him. If the Keepers do not suspect, they may believe they have all of us safe in their net."

He whispered his warning to the man beside him, and it was passed down the line.

"Your head is much swollen, brother," he said, rolling over again so as to face me. "Let Ta-wan-ne-ars make shift to bathe it with snow."

A shadow fell athwart us as we lay and a mocking voice replied for me:

"By all means, most excellent Iroquois. I trust you will nurse our valuable captive back to full strength and health."

I struggled to a sitting position, for I liked not to lie at De Vaille's feet, however much I might be at his mercy.

"No you walked into the spider's web," he continued, standing between me and the firelight which rustled ill-omenful force. "A woman's ploy—and you threw caution to the winds! You fool!"

"Quite so, quite so! And so you visit us once more, Master Courier. I confess 'tis an unexpected pleasure which we shall strive to make the most of."

"Sir," I said earnestly, "it makes little difference to me what is my fate, but I conjure you by whatever pretensions to gentility you possess to give over your plan of selling your daughter."

"The words you choose for your appeal do not commend it to me," he returned. "Nor do I perceive what business of yours it may be to question my daughter's marriage."

"Now, what put it in my head I know not, unless it was the fact that in her letter to me Marjory had spoken of him as 'Mr. Murray'; but I feigned to the lubrant confusion that she was not his daughter. Sure, no man could have disposed of his own daughter so cold-bloodedly!

"She is not your daughter in the first place," I retorted boldly. "And in the second place, she has expressed to me her abhorrence of her marriage, as you know."

"Zooks," he remarked mildly after an interval of silence, "'tis strong language that you use. You are a headstrong young man, Master Ormerod. Can it be that you have some personal interest in the matter?"

Again some instinct prompted me.

"I have," I asserted. "Your daughter prefers me to the man you would force upon her. And as a suitor, according to your estimates of the world's opinion, I am far more eligible than this Frenchman."

"You are scarcely wise to say so to his face, and I beg leave to differ with you. I find the Chevalier de Veulle a very eligible young man, of rank in the world, of achievement, of distinct promise for the future."

"If you can call a man eligible who was not even eligible for continued residence at the most profligate court in Europe, I agree with you."

"Tut, tut," remonstrated Murray. "Your words are not those of a gentleman, sir. We will abandon the subject. Where do you propose to incarcerate the prisoners, elevation?"

"I would not risk them a second time in the keeping of the savages," said De Veulle. "Let us try your strong room. There you and I can have an eye to their security."

"I applaud your thoughtfulness. This continued delay in the ceremony is to others a time tedious and fraught sufferings are upon your own head."

I looked eagerly for Marjory's face as we marched across the yard inside the stockade and through the heavy timber doors of the house. But she was not visible. Our guards examined our bonds carefully, fastened our legs and then left us.

We remained there three days, without intercourse with anyone except our Indian jailers, who brought us messes of food twice daily.

On the fourth day we were eating our meager fare of boiled corn when the door was flung open violently and the gaunt figure of Black Robe entered unannounced. Behind him, obviously unwillingly, walked Murray.

"Which is the Englishman Ormerod?" demanded the priest in French.

"Here I am, father," I answered, standing up as well as I could.

"Mistress Murray tells me that you have won her affections?" he asked coldly.

My heart leaped with sudden joy.

"That is true, father," I said.

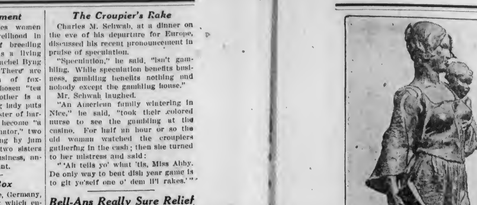
"And you love her?"

"As much as a man may, father."

He turned upon Murray with a gesture of decision.

TO BE CONTINUED.

Pretty Things that are Made at Home



SAYING it" with ribbon, that is what the mode is doing this season. Not only are ribbon bows trimming everything they can find an excuse to trim, but head bags, belts, as well as the hats we wear are expressing themselves in terms of ribbon.

A gay striped ribbon belt and purse to match have a wonderfully enlivening effect on a somber tailored dress or jumper frock. To buy "ready made," well, that is one way of doing it, that is, if your allowance is a generous one —but think of the fun and satisfaction one gets out of making these pretty things at home.

In choosing ribbon for an envelope purse with a belt to match, the stylish belt is added, as the picture shows.

The silk square in the picture can be made at home by hemstitching a plain border as shown.

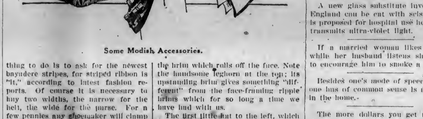
Not rumor but fact says we are due to witness a revival of the spangled brim. Many of the little shapes from Paris are now showing that tendency.

Sometimes in the newer hats the brim rolls up very shyly as it timidly announcing a coming innovation. Then again it adopts a bold course frankly declaring a decided cuff or flare.

The group herewith, which includes both straws and felts, presents an interesting study from the standpoint of

Some Modish Accessories.

thing to do is to ask for the newest two-tone stripes, for striped ribbon is "in," according to latest fashion reports. Of course it is necessary to buy two widths, the narrow for the belt, the wide for the purse. For a few pennies any shopkeeper will change several brass eyes in the belt length of ribbon. Then all that remains to do is to attach a suitable buckle and there you have it, a belt as handsome as one could wish. As to the envelope purse, cut a piece of stiff canvas or pasteboard so it will fold in three pieces, one for the flap, the other two for the sides of the pocketbook. Insert gussets at each end and line



Hats for Early Summer.

the flap which rolls off the face. Note the handsome fastener at the top; its outstanding brim gives something "different" from the face-framing ripple which is so long a time we have had with us.

The tiny little hat to the left, which is a crushed vixen, gives a mute little reminder of ribbon-bonnet brim.

One of the latest whims of fashion is to dip the brim at the back, in contrast to a severe outfit at the front. The nobby felt in the lower left corner illustrates this new movement.

The felt to the right above boasts a cuff directly turned from the face. This is interlaced with narrow felt strips which are in contrasting color.

Because the last hint in the purse is the banded effect, and with which it is very stylish, for hats are showing a considerable use of velvet, ranging from tiny narrow ribbons to very broad softly folded, draped and knotted effects. It is an interesting observation in regard to this shape that while the brim rolls, it also flares at the bonnet trend, and "they say" the cloche is considering a return engage ment.

JULIA BOTTOMLEY.

Kasha and Stone Marten

Among the smartest coats introduced for spring wear are models developed of black kasha trimmed with stone marten, whose tones of creamy tan are in striking contrast to the somber tones of the material.

Intricate Fur Workings

The squirrel and chinchilla pelts are frequently worked in the most intricate patterns, of which the chevron motif is a leader. These V-shaped workings enable the designers of the fur garments to emphasize slenderizing lines and take away the look of heaviness from a fur-clad figure. The roll or shawl collar is seen on nearly all the coats.

Smart Sports Sandals

New sports sandals with a comfortable low heel are made of ursine fur patterns, of which the chevron motif is a leader. These V-shaped workings enable the designers of the fur garments to emphasize slenderizing lines and take away the look of heaviness from a fur-clad figure. The roll or shawl collar is seen on nearly all the coats.

Women's Employment

Among the many trades women have taken up for a livelihood in Great Britain is that of breeding goldfish. An Irish girl gets a living by breeding goats; Lady Rachel Byng breeds Angora rabbits. There are several women "masters of foxhounds," a woman has chosen "sea tasting" for a living, another is a cattle judge and one young lady puts in her whole time as a master of harriers. A college girl has become "a scribe and heraldic illuminator," two others jointly earn a living by jam making on a large scale, two sisters run a small upholstery business, another is a builders' merchant.

Portable Post Box

Two inventors in Cologne, Germany, have designed a small box which enables a resident to post letters without going out of doors. The device consists of a special post box divided into two compartments. In one side the postman places the letters for delivery (when there are any) and from the other compartment takes any letters for transmission.

Sister Has Long Vigil

Believing that her seventy-year-old sister, Mary, was only in a trance and would recover, Caroline Hay-well, sixty-eight, guarded the body for three weeks before the two were found recently in Hull, England. The body was lying on a mattress before a roaring fire, and was surrounded by loaves of bread and other food.

Inefficiency Efficiency

"I'm sorry, sir," she exclaimed, "but it's in my contract."

"Have you been reading my books on efficiency?"

"Yes, but I got so interested in them that I found they were interfering with my regular work."

Only the First

A hypnotist in Boston has succeeded in putting people to sleep over the radio. This merely makes him the first hypnotist to do the trick.

Part of the Truth

Allee—You never told Dan your age, did you?

Mse—Well, partly.

Taking It Literally

Clarice—Don't you think George dresses nattily?

Maurice—Natalie who?—Judge.

A new glass substitute invented in England can be cut with scissors. It is proposed for hospital use because it transmits ultra-violet light.

If a married woman likes to talk while her husband listens she ought to encourage him to smoke a pipe.

Bedded one's mode of speech, what one has of common sense is acquired in the home.

The more dollars you get together the louder they talk. The same may be said of women.

If appearances are to be trusted, the average man gets very little brainy sleep.

The Croupier's Rake

Charles M. Schwab, at a dinner on the eve of his departure for Europe, discussed his recent pronouncement in praise of speculation.

"Speculation," he said, "isn't gambling. While speculation benefits business, gambling benefits nothing and nobody except the gambling house."

Mr. Schwab laughed.

"An Asserleun family wintering in Nice," he said, "took their colored nurse to see the gambling at the casino. For half an hour or so the old woman watched the croupiers gathering in the cash; then she turned to her mistress and said:

"'Ah tells yo' what 'tis, Miss Abby. De only way to beat dhih your gains is to git yo'self one o' dem iffi rakes.'"

Bell-Ans Really Sure Relief

Thousands of Testimonials From Doctors, Nurses and Dentists Say So.

For correcting over-acidity and quickly relieving belching, gas, sick headache, heartburn, nausea, biliousness and other digestive disorders, BELL-ANS has been proved of great value for the past thirty years. Not a laxative but a tested Sure Relief for indigestion. Perfectly harmless and pleasant to take. Send for free samples to: Bell & Co., Inc., Orangeburg, N. Y. —Adv.

Cat's Golden Opportunity

With the enforcing of a new quarantine law on dogs at Burlington, Vt., one pussy there, whose life used to be made miserable by said dogs, now exacts sweet revenge on any canine that may happen to pass with his fighting weapons securely muzzled. One young lady, with Fido on a leash, found her pet suddenly attacked and had to call for aid from bystanders to make the cat desist.—Boston Globe.

Visits Graveyard in Boat

To inspect an old graveyard, Lord Craigavon, premier of Ireland, recently had to make the journey in a "coi," the primitive boat still used by the people of Galloon island, in Upper Lough Erne. During the trip his lordship was told that the only industry that the island has ever had was the making of illicit whisky, but the police had destroyed it.

Statesmen Nowadays

Dr. Nicholas Murray Butler, brilliant and downright, said at a recent dinner in New York:

"We have nowadays too many statesmen resembling the clap who was out after the governorship. This clap ended all his important speeches with the words:

"'And so, gents, there's my sentiments, and if you don't like 'em I'll change 'em.'"

Nice Little Windfall

William Morrison of Wheeling, W. Va., driving to Washington, D. C., at night, ran out of gasoline. Climbing from his machine he flagged with a flashlight the first motorist approaching, a big truck. The truck slowed up, but did not stop. As it passed him, something struck Morrison in the face. He found it to be a sealed envelope which contained a $100 bill.

The open mind

GENERAL MOTORS has an open mind. Its program is to provide a quality car in each price field. Already this program has led to the development of cars that differ widely in type and special features, each designed to serve a special purpose.

Through its laboratories, which are the largest automotive laboratories, General Motors seeks to look into the future. At its Proving Ground it tests improvements created anywhere in the world.

It is committed to nothing except quality at the lowest possible cost. Every detail is subject to constant questioning and the possibility of betterment.

This mental attitude is of interest to you as a car buyer. You are assured that you are buying the result of *today's* best thinking, not yesterday's prejudices or the mere product of habit.

You are benefitting by contact with active open minds.

Moore's Famous Poem Sold Before Written

The full quotation runs: "The trail of the serpent is over them all," and means, "They are all turned with the same dread;" or "They are birds of a feather." The line is from Tom Moore's poem, "Lalla Rookh."

"Lalla Rookh" is little read today, Moore's fame resting solidly and lastingly on his "Irish Melodies." But Moore was immensely popular in his lifetime, and got a substantial sum for every song he wrote.

Mr. Stephen Gwynne, in his "Life of Moore," tells us that John Murray offered two thousand guineas ($10,-000) for the copyright of "Lalla Rookh" before it was written. Moore's friends thought he should have more, and, going to Longman, the rival publishing house, they claimed Mr. Moore should receive the highest price ever paid for a poem.

"That," said Longman, "was £3,000 ($15,000) paid to Scott for 'Marmion.'" Longman was inclined to stipulate for a preliminary perusal. Moore, however, declined, and the agreement was finally worded: "That upon giving into our hands a poem of the length of 'Rokeby' you shall receive from us a sum of £3,000." It is probable that the publisher did not regret his bargain, for the poem had a tremendous sale.

Have Faith in Yourself

Most men go to pieces when they have had a few beatings. They wilt. They fade away. They crawl into a safe little corner and hide while the great rough ride of glorious life rushes past them. The fact is that defeat is the normal thing in this haphazard little world and victory comes but seldom. Every victory, usually, is the result of a long series of defeats. A man must have faith in himself and in what he is trying to do. He must say: "I can." He must back himself to win. He must bet on himself. He must have faith in the people he works with. He must believe in his team. He must see the better side of his co-workers and not think that his own point of view is the only right one. He must have faith in those great principles that make us superior to the animals of the forest—to truth, honesty, sympathy, justice, progress.—Forbes Magazine.

Too Easy

Cole Black had fallen foul of the law and was having a preliminary conference with his counsel.

"Can you prove an alibi?" asked the latter.

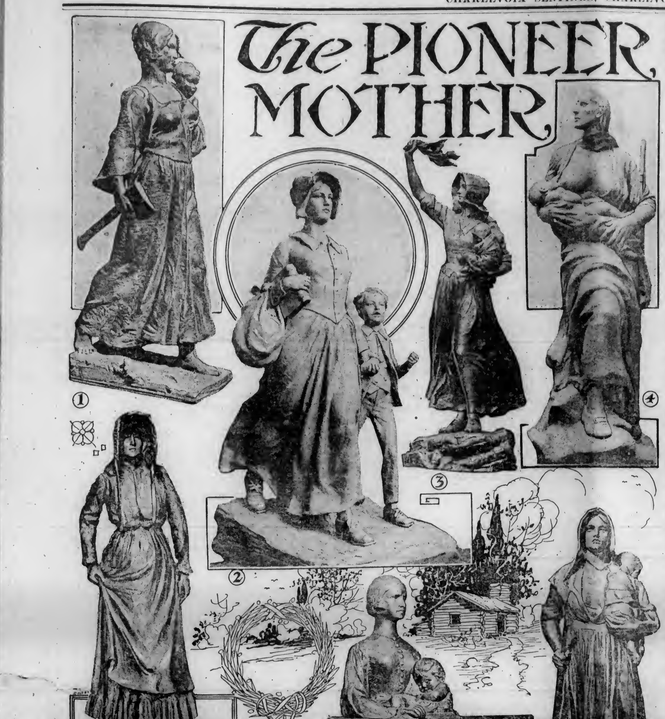
"Al—what's that, boss?"

"Alibi. Can you prove where you were at the time the offense was committed?"

"Lawdy, boss, don't fer what sake's skeered dey's gwine ter find out!"

Old London Tavern

The Running Footman tavern in Charles street, Mayfair, London, is named for the last running footman in England. He was in the service of the notorious "Old Q," the fourth and fifth duke of Queensberry, who died in 1810. Footmen were regularly employed to run before the lumbering coaches of the residents of Mayfair in the Seventeenth century, a necessary precaution when the narrow streets of the period and the deep ruts rendered it impossible for these vehicles to pass one another except at certain points. These footmen congregated at the Charles street tavern, then known as the Running Horse, its present name dates from the early part of the Nineteenth century.—London Chronicle.



1. Model by H. A. MacNeil. 2. By Bryant Baker. 3. By F. Lynn Jenkins. 4. By James Fraser. 5. By Jo Davidson. 6. By Marie Korbel. 7. By A. Stirling Calder. 8. By John Gregory.

PHOTOS COURTESY EDWARD GALLERIES, NEW YORK

courage, fidelity, ambition was in their mothers' milk. Love of home, husband, children, made the wilderness to smile."

Accordingly he advertised for a typical statue of "The Pioneer Woman" on the Cherokee Strip in Oklahoma, the last American frontier and the last great tract of land opened to homeseeking. Then he asked ten celebrated galleries in New York to commission the leading American sculptors to make models for the monument. Twelve responded—Bryant Baker, A. Stirling Calder, Jo Davidson, James Fraser, John Gregory, F. Lynn Jenkins, Mario Korbel, Arthur Lee, H. A. MacNeil, Maurice Sterne, Wheeler Williams and Mahonri Young—and submitted their models which were on exhibition at the Belmurrel galleries for three weeks. During that time the models were viewed by more than 10,000 persons and each visitor was given an opportunity to vote for the typical pioneer woman. In this unique contest the figure modeled by Bryant Baker (No. 2 in the photograph above) received the largest vote among the ten thousand. Second choice was given to the model submitted by H. A. MacNeil (No. 1), and third place went to that by A. Stirling Calder (No. 7).

After the exhibition in New York closed the 12 models were sent to Boston and after being shown there they will be exhibited in other cities. Including Pittsburgh, Washington, Cleveland, Chicago, Kansas City, Portland, Ore., San Francisco, Los Angeles, Oklahoma City and other places in the Middle and Far West. In each place the public will have a chance to express its preference and this popular vote will aid Mr. Marland in his final selection of the model which will be chosen for the heroic statue more than 40 feet in height, which will be erected on the knoll near Ponca City. The completed statue will be one of the most colossal in the world, even vast in many ways. It will probably still be second only to the Statue of Liberty in New York harbor. The total cost of the undertaking will be between $30,000 and $100,000.

But more important than the cost of the statue is the fact that at last an enduring monument is to be erected to the memory of the heroic mothers of the pioneers. "What other woman ever had a better claim to glory?" says Bryant Baker, whose interpretation ranked first in the New York exhibit. "Her figure should be in America what the Victory of Samothrace was to Greek life and art. No woman of the world ever combined the ideal in a more beautiful way with hardy resistance. If the pioneer man found the trail, she weeded the path and probably built the fire as well. She had to be home-maker in the wilderness, companion, sweetheart and mother."

Orange Growers in Dispute Over Seed

All orange trees in California sprang from a seed from Robinson Crusoe's island, according to T. A. Van Norden, Pacific Grove. And the first tree to grow in the state was the "mother tree," soon to be dedicated by Native Sons of the Golden West at Bidwell's Bar, Butte county.

The Crusoe Island theory was explained as follows:

In 1840 Van Norden's brother, R. T. Van Norden, came around the Horn in a sailing vessel. They called at the island of Juan Fernandez, commonly called the island of the original Robinson Crusoe. From this island Van Norden brought orange seeds.

One of these seeds grew into a tree near a ferry at Bidwell's Bar on the west branch of the Feather river, where Van Norden planted it. This is the mother tree to be dedicated.

The Van Norden theory of the origin of oranges in the state is questioned by many, who claim the "mother tree" was brought from Sacramento in 1850.

Interesting Experiments

We did not believe, until we saw it tried, that a piece of writing paper, bent in basin shape, filled with water and held in the flame of a candle, will not burn, while the water will boil. Try it and see. You might also heap the edges of a piece of cardboard so as to make a small tray; cover the tray with shot and hold over a lamp. The shot will melt but the cardboard will not burn.—Farm Journal.

Pirate Home in 1771

Lafitte, a colorful buccaneer, made his stronghold on Galveston Island in 1771, and buried much of his pirate treasure on the shores there. The island was then known as "Campeachy." Like the pirates of the story books, he dressed in a green uniform and possessed a polite and easy manner.

THE KITCHEN CABINET

(©, 1927, Western Newspaper Union.)

To act the fool in the right direction, and then simply to travel on, unmindful and never discouraged by even frequent relapses by the way, is the secret of human achievement.

FOOD, ITS FUNCTIONS

No housekeeper who reads the current magazines should be ignorant

in regard to the importance of food study. To know why her child is not thriving and to remedy it with property balanced food is something every mother should learn.

There are a few general principles which if learned and borne in mind when supplying the food for the family will feed them correctly. First in importance is the point that all families differ more or less as to needs.

The outdoor worker who is doing hard labor can eat, digest and thrive on foods that would be injurious to an indoor worker. The growing child who is active will consume and care for as much food as the average man, because he is building a framework and covering it with good healthy muscles. Food supplies the body with what it needs for growth and energy.

There are certain elements which are essential to support life; many of them are found in small quantities in the body. When any one of these is lacking the health begins to break. These elements are carbon, oxygen, nitrogen, sulphur, phosphorus, iron, calcium, potassium, sodium, iodine and several others of smaller amounts. The foodstuffs which furnish these elements are:

Proteins which yield carbon, hydrogen, oxygen, sulphur and sometimes iron and phosphorus.

Proteins are found in lean meat, fish, eggs, milk, cheese, peas, beans and lentils.

Fats are found in meat, butter, cream, vegetable oils, yolks of eggs and nuts.

Mineral matter is found in water, fruits, green vegetables, meat, milk, whole wheat and other grains, and egg yolk.

Carbohydrates are found in rice, other cereals, potatoes, other starchy vegetables, fruit, honey and sugar.

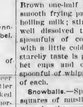
The fats which yield carbon, hydrogen and oxygen—these are the heat-producing. In cold weather we need more of such food to keep up the body heat.

If one is fortunate enough to live near where water cress grows, a supply of most wholesome greens will always be available. Serve with lamb chops, just as a garnish, but eat the garnish. When eaten with just a bit of salt its peculiar piquancy is most apparent.

Radishes cut to simulate tulips make a pretty garnish and are fine with thin slices and arranged in overlapping rows with slices of tender young onion; they may serve as a garnish or as a salad with shredded cabbage or lettuce.

Easy Luncheon Dishes.

With a cooky jar always replenished and a dish of fruit with a hot drink,



one need never worry about an appropriate dessert. For something different try:

Jelly Fluff.—Take the white of one egg, unbeaten and one-half of a glass of jelly, beat until the mixture stands up well. Heap in sherbet cups and top with a spoonful of whipped cream on the top of each.

Snowballs.—Spread cooked rice over squares of muslin wet with cold water. In the center place a canned pear, peach or apricot. Tie carefully and steam ten minutes. Remove to cloth and serve with a sauce made from the fruit juice.

Beef Collops.—Put a tablespoonful of butter in a frying pan; add one small onion chopped fine, a teaspoonful of minced parsley, the same of salt, and a few dashes of pepper. Slit in one inch slices of sour and add one pound of raw beef cut fine. Cook five minutes, stirring constantly. Serve hot on buttered toast.

Mock Terrapin.—Cut cooked cauliflower into dice. Put a tablespoonful of butter into a saucepan, and add salt, pepper with a dash of paprika, and cook until the butter is slightly brown; add two tablespoonfuls of flour and enough beef stock to make a moderately thick sauce. Use beef extract and water for the stock if needed. Add a little chopped parsley, one-half cup full of cream, and when cooked pour out thin, a tablespoonful or more to the dice and the liver. Cook until the liver is heated through; add two tablespoonfuls of jelly or any canned fruit juice and serve at once on buttered toast.

Nellie Maxwell

Women Like It

The statement is made in a recent book that women do not like to be idealized by men. My answer is that women like it most of them demand and expect it; only the nonlove object. Anyway, idealization of women is the most conspicuous trait of American men.—E. W. Howe's Monthly.

Ink Stains on Hands

A solution of peroxide of hydrogen containing a few drops of ammonia will remove ink stains from the hands

Not All Animals Are Wisely Led by Instinct

Animal instinct is not the infallible, divinely inspired affair that is commonly supposed, according to Dr. William E. Ritter. Many times instinct causes an animal to do things in the wrong place or at the wrong time or else to repeat an act unnecessarily, thus wasting energy. Occasionally instinct, misapplied in this way, may do the animal actual harm.

An instance of the senseless repetition due to instinct may be found in the woodpecker that pecks far more holes than he ever fills sapfills many more than he ever empties.

The same repetition of activity was demonstrated by a young monkey. It was literally fed up on peanuts at the end of a visiting day, yet when baited in an attempt to reach them put up a good fight, only to discard the nuts the minute they were obtained.—Hygeia Magazine.

MORAL MORSELS

Borrow makes men sheere.

Best kind of loafing is studying nature in the woods.

Politeness sometimes beats the almighty dollar under the wire.

The farmer can give you spuds—even if he has no card to hand out.

It is difficult for a stout woman to get away from solid facts.

"Pious conscience" is a combination of stubbornness and brutality.

Tolerance from the very beginning is what helps make a happy marriage.

As long as a man can control his temper he isn't his own worst enemy.

Pep won't redeem the mistake of taking the wrong course.

Each experience a man has makes him either better or worse.

Use your judgment and also recognize him when it befalls you, is the best policy.

Which would you rather have knocking at your door, Opportunity or Dame Fortune?

We suspect that a lot of fellows are surprised that they get along as well as they do.

A political worker depends on the majority, but he is sure to coddle an organized minority.

Fewer food nuisances were killed in this country in 1926 than in 1925, yet 240,000,000 more pounds of meat was produced.

For a Firm Basis

Fred—How could we cement our friendship?

Moe—With a little concrete action.

Almost Positive Proof

Wilbur—Why do you think he's successful in business?

Winters—I never board him any so.

DIURETIC STIMULANT TO THE KIDNEYS

Mrs. A. L. Crawford, Medfield, Mass., writes: "When the doctors pronounced my case Bright's Disease, I was in such a serious condition that they could not do anything for me. I kept getting worse, and my limbs were so swollen by my knees swelled and my eyes were so swollen that I couldn't see. As a last resort I decided to use Doan's Kidney Pills a trial. I gradually improved until I was entirely well. That was over two years ago.

Buy a box today. 60 cents at your drug store or the Doan's Medicine Co., 70 Main St., Buffalo, N. Y.

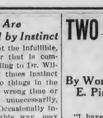
Another Infant Prodigy

Catherine Clelks of Biddeford, Maine, has attained linguistic ability for a child of only five years of age. The little girl speaks fluently Roumanian, Bohemian, French, and, of course, English.

TWO HOMES MADE HAPPY

By Women Who Used Lydia E. Pinkham's Vegetable Compound.



"I have taken Lydia E. Pinkham's Vegetable Compound and I think it is the most wonderful medicine I ever tried." is the statement made by Mrs. Goldie Stoup of St. Joseph, Illinois. She declares that after taking the Compound she is in better health than before.

Mrs. J. Storms of 29 Lane Street, Paterson, N. J., writes: "I cannot speak too highly of your medicine and I recommend it to all my friends."

These statements were taken from two enthusiastic letters which tell of the help that has been received from using the Vegetable Compound. Both Mrs. Stoup and Mrs. Storms were in a run-down condition which caused them much unhappiness. When women are suffering from lack of strength and from nervousness their own life and that of their family is affected. When they feel well and strong and are able to do their housework easily, happy homes are the result.

Are you on the Sunlit Road to Better Health?

One Year	2.00

Entered at the Charlevoix, Mich., postoffice as second class matter.

At the session of the Virginia legislature which was recently held there were all kinds of bills introduced with regard to highway taxes gasoline taxes, and two year license system, compulsory insurance, and other proposals to regulate automobiles, and the traffic. The legislature shelved most of these propositions and appointed a commission of five to investigate the entire subject. There isn't much question about them getting the right answers and the Virginia investigation should be of interest to everyone who drives an automobile.

The only mistake the Virginia legislature was ever known to make was the time of Patrick Henry was its leader down to now, was when it broke off from the Union and substituted a National Capitol for its legislature in the Richmond State House. But Virginians are the most loyal people in the world, and it is no trouble to forgive them for their indiscretions of the sixties.

TARIFF AND EUROPE

Some of our free trade newspapers have been calling attention to the fact that European newspapers seeking to make a drive on our protective tariff system center their fire on our tariff against manufactured goods and not on agricultural products. The reason, is not however, as the free traders would have us believe, that the agricultural tariff does not protect and is therefore unimportant. The real reason is that Europe has no agricultural products to send us, only manufactured ones. Our agricultural competitors are not in Europe but in South America, Canada and in Australia, and Europe is herefore naturally interested principally in our tariff against manufactured goods.

It is difficult to see just why any change on our duties on manufactured articles would help the American farmer, as our free traders seek to make out. In the first place, everything used exclusively by the farmer is now on the free list, and curiously enough, the prices of some of these commodities are higher than ever, because of European control of the markets. Secondly if we permitted a flood of cheaply made European goods to come into our market the first result would be to throw thousands of our well paid American workers out of employment, in the vain hope of increasing our market in Europe.

Now as the American citizen who depends on American prosperity for his job, consumes nearly all that our farmers raise, we would be destroying for the farmer the market in which he sells four fifths of his products to try and help him in a free trade market in which at best he is only able to sell a small fraction of what he produces. The American farmers know this and the free trader will have a hard time winning him over to international economics.

RURAL SCHOOLS

The division of Rural Education in the United States Bureau of Education has an energenic and efficient chief in Mrs. M. M. Cook who is fully conversant with the subject of rural schools. In an article on "The Biggest problem of Our Education," she says:

"What is the biggest problem in American education today? Undoubtedly it is that of providing a square deal education ally for children from farm homes and rural communities. The social and economic welfare of the farm population is admittedly of nation-wide importance. Standards of living in farm homes, the farmer's income as compared with that of persons engaged in other occupations, advantages and disadvantages of cooperative marketing, methods of regulating supply and demand for farm products, are subjects on which a number of recent research studies have been made and much educative experience. In receiving the farmer's economic situation is receiving unwonted attention.

Undoubtedly there is a basis in fact for this in existing conditions. Farmers are apparently at the present time in a mood to solve their economic and social problems than other occupational groups. This article does not attempt to suggest one reason as solely responsible. There are many reasons as is usually true of serious problems, especially when complicated by extension over a period of years. It does aim to call attention to one phase of the question frequently overlooked, namely, that concerned with the educational welfareof farm commun ities and the educational facilities of farm children.

The principle on which the economic success and independence of citizens of the United States are based is equality of opportunity, an equal chance in so far as is humanly possible, for every man to choose the occupation for which he is best fitted and to develop to the limit of his inate ability to his chosen vocation."

APOLOGIZING FOR U. S.

When it comes to making a college address there is something unusually sane and healthy in Hanford MacNider, assistant Secretary of War. In a recent address to the students of the University of Maryland Mr. MacNider paid his respects to those performers on the public platform, now all to numerous, who are trying to make it popular to apologize for America and all things American. These internationalists, Mr. MacNider said, have as their favorite sport the holding up of our international dealings to scorn and derision and they are in a constant state of astonishment that we should want to abide by the faith and traditions of our fathers.

Continuing Mr. MacNider declared:

"They kneel down' beside us and exhort us to change our old-fashioned American ways; to admit the sins of imperialism, militarism, and penury, which we never realized we had. They weep and wail because our nationalenerosity will not extend itself to cure the financial ills of all the rest of the world.

"Every foreign suggestion for the conduct of world affairs which we do not immediately adopt chases hundreds of native born agitators to platforms of our schools and our clubs to denounce American policy. If we were to believe them, we would appear to be a hard and sorded people indeed. It would be easier to persuade us of our shortcomings if we did find the very peoples they hold up to us as good examples clamoring at our doors for admission as Americans.

"We are harangued by societies which boast long and fantastic names and urged to risk our claim to our coveted possessions of peace and freedom by throwing our defenses into the sea. They tell us that American is sorely aggravating every nation on earth by our unsympathetic attitude on foreign matters. They assure us in one breath that we are aligning the world against us and in the next that we should be ashamed of our defenses for spending a penny or giving a thought to the protection of the lives of American citizens."

There is much good sense and sound Americanism in what Mr. MacNider has to say to the college youth. It is to be regretted that a considerable portion of the misguided internationalism to which he refers, has its birth in our American institutions of higher learning.

CUBAN SUGAR.

Several weeks ago the President of Cuba signed the decree which puts into effect the proposed Cuban sugar crop restriction. The decree allocates to various Cuban sugar mills the maximum amount of sugar each may produce, and under the estimate places the probable output of sugar in the ensuing year at 5,000,000 long tons.

But the Cuban congress last May passed a decree limiting the output at 4,500,000,000 tons and the decree recently signed provided for putting this restriction into effect.

The purpose of this reduction of the output is of course to increase the price of sugar and the profits of the sugar planters. The plan follows that of the rubber trust of the Orient and the coffee monopoly in Brazil. Uncle Sam, as the biggest user of Cuban sugar is expected to foot the bill.

The Cuban restriction plan will result in an increase in the price of sugar unless steps are taken in the United States to checkmate it. And the plan shows how out-of-date is the old free trade argument that the tariff controls the price of sugar in America.

Thanks to our protective tariff we are now raising a considerable part of the sugar we use, and it may be that the restriction of the Cuban crop will stimulate production at home. This will be one way of fighting the Cuban sugar trust.

The way not to fight it is to remove the sugar tariff. This would only put the local producers out of business and place the country entirely at the mercy of the Cuban planters. But no doubt when the price of sugar goes up the free traders will dust off the old argument and bring it out for public inspection again.

City's Glory Departed

The village of Erbia stands on the site of the ancient Jericho, and consists merely of some 300 hovels and huts.

—and
No Place
to Go!

We find ourselves, almost without realizing it, a nation on wheels.

We drive or ride in more than 22,000,000 motor vehicles.

We pack the paved highways coming in and out of town. We over-run even so-called remote regions. And we are pounding to pieces all but permanent roads.

This year probably 3,000,000 new cars will be on the road. Compared to this increase, the mileage of new permanent roads will be insignificant.

We don't want to be a nation on wheels, with no place to go.

The answer is, build more, and where necessary, wider concrete roads and streets —and start building them now.

Not in a long time have general conditions been so favorable for carrying on such public works as permanent highway building.

PRESS COMMENT

Influence of Small Papers—The power of the weekly and small daily papers is sometimes discounted. Perhaps this is because they are considered individually and not collectively as that imposing assemblage of newspapers which serves the 60,000,000 Americans who live in communities of less than 5,000 population and on the farm.

Call them "only a country newspaper" but remember they fill a need in their communities as great as that of the large city dailies. The weekly and small daily are as impatiently awaited by their readers as are the metropolitan editions. Because these newspapers are in the majority and because they are inseparable linked with community thought and action it is of them that F. W. Howe speaks:

"Give me a newspaper to operate in and I can raise the devil, or pacify him, every day. Clergymen hold great councils to discuss world betterment, but editors and reporters do not, although much more powerful than clergymen indeed, editors and reporters are easily our most powerful men."

It is only when the army of small newspapers are mobilized behind one cause that their irresistible influence in public affairs is fully appreciated, although the influence each exerts in its own community is always sensed. Inadequate space and facilities forbid the little home town newspaper from combining within itself all that large volume of matter now offered by itself and the metropolitan dailies, but the average reader finds his local journal more indispensable than his city paper. That the weeklies and small dailies are a force in their respective communities is fully established.—Colorado Springs Gazette.

Island Found by Dutch

Tasmania, the large island near Australia, was discovered in 1638 by a Dutch navigator named Tasman. He named the island Van Diemen's Land after the Dutch governor of Java at the time. Later the island received the name of the discoverer, Tasman.

NOTICE OF HEARING.

To the owners of all lots, parts of lots, lands and premises abutting on either side of that part of Garfield avenue, City of Charlevoix, lying between Bridge street and State street, has been filed with the undersigned and duly presented to the Common Council of said city, and that Monday the 16th day of May, 1927, at eight o'clock in the afternoon has been fixed by the said Council as the time when it would meet in the Council rooms in said city for the purpose of hearing objections and suggestions relative to the construction of said sewer, at which time and place all persons interested in such construction may be heard. And further, that the plans, maps, diagrams and specifications for such sewer together with an estimate of the cost thereof, are on file in my office.

Dated, April 20th, 1927.

RAY S. HAMILTON,
City Clerk.
By D. S. PAYTON,
Deputy.

THE THEATRE

The Mysterious Rider—With Jack Holt and Betty Jewell in the principal parts, the cast of "The Mysterious Rider" coming to the Palace theatre on Saturday and Sunday, is one of the strongest Paramount has ever given the popular Zane Grey's stories.

Hob plays Bent Wade, the mysterious rider, who fights to save the homesteads of the desert ranchers from illegal seizure and Betty Jewel is Dorothy King, daughter of the city financier, who falls in love with the out-of-doors man.

The villain is Cliff Harkness, played by Charles Sellon, and the role of his henchmen, Tom Saunders, fails to Ivan Christie.

Tom Kennedy, who clicked so well in "We're in the Navy Now," has a comedy role, and Guy Oliver and Jane Keckley, two veteran character players, sustain the pathos element of the story.

Arthur Hoyt has one of the "shrimp" parts for which he is distinguished, this time playing the secretary to Mark King, the financier, who is personified by David Torrence. Albert Hart plays the sheriff and some clever children and character players carry the important "bits" of the production.

The Buckaroo Kid—A striking resemblance to Hoot Gibson as he looked at the age of fifteen won Newton House a nice part in "The Buckaroo Kid," Gibson's latest Universal which comes to the local theatre on Friday.

Young House was selected because of his resemblance to a portrait of the pride of the Gibson family, taken at the age of fifteen. When it was decided to show an introductory sequence in "The Buckaroo Kid" with Hoot as a youth, the star rummaged about his possessions to find the ancient picture of himself.

It was found that Newton, who has been playing juvenile roles on the screen for some time, really looked like the picture and a good part was the result.

The Demi-Bride—Norma Shearer, who is starred in "The Demi-Bride," soon soon to be shown at the Palace theatre, Tuesday and Wednesday, is rapidly becoming an expert with the foils. In order to play the first sequence of the picture, Miss Shearer took fencing lessons from Emil, fencing master to John Gilbert and other stars who have used the sport in their screen offerings. Norma intends to keep up her lessons even though the picture has been completed.

Herd to Confine Elk

No person has yet devised a wire fence that an elk cannot easily demolish in order to get at it's food supply and hence the elk of Utah have developed into a very serious nuisance. Some years ago a cry of alarm was sent out for the elks, which were threatened with extermination. As most of the elks of this country were located in Utah, practical measures were adopted which were so successful that the elk has become a serious nuisance, breaking their way through barriers and destroying forage wanted for the domestic animals. Various measures have been tried to regulate the elk supply without avail until it was decided to permit shooting of the male animal and the state is now supplying a rich income by permitting hunters to kill one animal upon payment of a fee of $12.

Barber Shop Near-Tragedy

A young woman tripped into a Hobbs (Mich.) barber shop to have her hair trimmed. She hung her coat and hat on a rack and after she had been served and sought her purse, she announced that her pocket had been picked of $1.80. A young man awaiting his turn was the only one near the coat. He was accused of the theft, but vehemently denied it. When he was threatened with arrest he turned over $1.80 under protest. A half hour later the girl telephoned she had found the money in her dresser.—Indianapolis News.

Electricity in Favor

Fifty-eight per cent of the people of the United States have discarded the watch in favor of the electric button as the means for lighting up the home. According to a recent report by the light and power industry 68,500,000 persons now use electricity in preference to all other lighting systems. In the last decade the number of electrically lighted homes has tripled and now totals 10,000,000, not including those with private plants of their own.

Getting His Bearings

Judge Slick of South Bend said at a South Bend luncheon: "Expert testimony—the testimony of handwriting experts and medical experts and so forth—sometimes makes me think of the witness who, after he had been sworn, leaned forward over the bar of the witness desk and asked anxiously: 'Which side am I on, judge—the fat lawyer's or the thin one's?'—Chicago News.

Education and Vocabulary

The average vocabulary of a business man or skilled mechanic is around 10,000 words, whereas a college graduate's vocabulary is about twice as large.

ATTRACTIONS FOR THE WEEK

Saturday and Sunday

Zane Grey's "The Mysterious Rider," with Jack Holt. Who is he? This mysterious masked Lothario with flowing, screaming steed. Riding through the hilly stretches of the night. Where does he go? Whence does he come? Hoofs follow nearer, nearer! What has he done? Don's miss Zane Grey's latest master-mystery melodrama. Its headed this way.

Also a good comedy, "Movieland."

Tuesday and Wednesday

Norma Shearer in "The Demi-Bride," with Lew Cody, a rollicking farce comedy. Carmel Myers and Dorothy Sebastian head supporting cast. Norma Shearer sweeps all before her in the rollicking tale of love and laughter. She starts out to win the gayest bachelor in all Paris. You'll roar at her adventures before and after she gets him. Her greatest role, and that's not forgetting "His Secretary," and "Up Stage.

Also Felix the Cat and Fox News.

Friday, May 13th

Hoot Gibson in "The Buckaroo Kid," a rattling good story of the nerviest, breeziest cowman who ever scorched a saddle. The ever popular Hoot in one of his most fascinating and racy characterizations. You'll run the gamut of emotions from start to finish. Don't miss it. Also an Educational comedy, "Hoot Mon."

Coming—Lon Chaney in "Mr. Wu."

Coming—"Slide, Kelly Slide."

—) PERSONALS (—

Mr. D. H. Hunkley of Petoskey, is a business visitor here today.

C. C. Boggs of Bellaire, was a Charlevoix business visitor yesterday.

Attorney E. N. Cink of East Jordan, was a professional visitor here Friday.

Mrs. C. S. Webster is spending a few days with her sister, Mrs. Angus Pochman, in Petoskey.

N. R. Torrey of Cadillac, was a business visitor here for one or two days during the latter part of last week.

Dr. and Mrs. A. Lawson Baxter and daugter Charlotte of Central Lake were business visitors in Charlevoix Monday.

The Womens Guild of the Episcopal church met and were entertained at Mrs. O. E. Wilbur's Wednesday afternoon.

W. S. Gallagher of Fresno township, spent two or three days here on business last week returning to St. James, Saturday.

Mrs. J. W. Harris of Oak Park, Ill., arrived here early this week and is spending a few days here with Charlevoix friends.

Mrs. Virginia R. Conley of Milwaukee, has been here for some days attending to business interests and visiting friends.

Everett Cole, who operates a garage and conducts an auto livery business at St. James, was a business visitor here last Monday.

Mr. C. J. Winder and son Paul, motored up from Eaton Rapids last Friday spent the week end with relatives and friends, returning to their home Monday

Regular meeting of Pythian Sisters Monday evening, May 16th. Refreshments and entertainment furnished by the committee at close of business session.

The annual sales for delinquent tax lands claimed the time and attention of W. J. Gallager of St. James, for two or three days during the first part of the week.

Clair S. Webster was a business visitor at St. James last week, making the trip in the interest of the Standard Oil Co., of which he is local Charlevoix representative.

D. S. Payton is attending to the duties in the office of the city treasurer during the temporary absence of the city treasurer Mr. John Cook and Mrs. Cook from the city.

The Busy Bees will meet with Mrs. C. B. Hendricksen on Mason street, Friday afternoon at which time bridge and pedro will enter into the social feature of the program.

Miss Helen Armstrong and friend Miss Anne Shanewise, guests of the formers parents, Dr. and Mrs. R. B. Armstrong for several days, returned to Chicago last Saturday.

Mr. and Mrs. L. S. Rupert of Bloomington, Ill., usually about the first of our regular summer citizens are motoring up and will probably arrive at their Charlevoix summer home today.

John J. Fagan who spent the winter months in the west, the major part of the time at Santa Monica, California, returned to Charlevoix last Friday and will remain here for the summer season

Harry M. Gross arrived from Rochester, N. Y. last Monday and with the opening of the Inn will resume his former position at that hostelry, via cooks helper a position satisfactorily filled by him in past years.

Theodore Birnkrant returns to Detroit today, after spending about two weeks here arranging for new construction work now in progress on the business block located at the corner of Park avenue and Bridge street.

Mrs. Ray Gilden, owner-manager of the Hotel Beaver, St. James, returned from an extended visit in Chicago last Thursday and continued her trip to St. James the following day, to arrange the hotel for the summer season.

A new fishing tug from Milwaukee, the Herman joined the local fleet last Wednesday and will try local waters for a time at least. Captain John Herman, owner and manager, is a relative of Mrs. Charles Hendrickson, Jr. of this city.

Special Sunday dinners are being featured at the Hotel Charlevoix with service from 12:30 to 2:30 o'clock. The price will be 75c per plate, and an invitation to the public to be present is cordially extended by the manager, Mrs. C. J. Winder.

Mr. and Mrs. John Cook are taking a few days vacation by making a trip to Ann Arbor where Mr. Cook will consult an eye specialist with the expectation of securing treatment that will greatly benefit a trouble both annoying and of long standing.

The government ship Manitowoc, connected with the Engineering department has been in this port several times during the past week and will continue to make this harbor her base while attending to duties in northern Lake Michigan waters.

Richard Lewis and Kit Carson of East Jordan, were Charlevoix visitors last Friday, primarily in the interest of the Charlevoix County Agricultural Society, their special business being concentrated on securing advertising patronage to be placed in the premium list for distribution to the public as soon as such lists are completed.

Mrs. Margaret Cook, who spent the winter in Cleveland, Ohio, returned to Charlevoix last Monday and will be at her home, 104 Garfield avenue, for the summer.

E. E. Cross is having equipment installed at his oil station on Petoskey avenue for the benefit of automobile owners. As soon as the same is completed owners of cars will be treated to free air in any quantity—quality 100% pure—for the inflation purposes.

John Grill, accompanied by his daughter, Miss Winnifred, came over from St. James last Monday, spent a few hours with friends here and then continued their trip to Grand Rapids where they will spend a few days with friends and attend to some business matters.

Late information from Southern Pines, N. C., says that Mr. A. I. Cramer is on his way to Charlevoix and that he will arrive here about May 15, to make preparatory arrangements for opening the Inn and have same in readiness with the beginning of the resort season.

Captain John Roen returned from Newport News last Saturday and Tuesday afternoon, accompanied by Robert Mayer, left for Montreal where they will go on board the steamer Cayvoff, a recent purchase of Captain Roen's and make the return trip from Montreal via the water route.

Mr. and Mrs. Albert Goddard and Mrs. Nellie Wood, after spending several weeks here, following their winter spent in Florida, left for their summer home, Lincoln, New Hampshire, Wednesday of this week. The entire trip was made by motor which up to date was wholly enjoyable.

The concert by the Peerless Jubilee Concert Co. to be given Thursday, May 12th, at the Congregational church, will offer a rare treat to all lovers of music. The company consists of a double quartette of highly trained colored musicians. The program will feature plantation melodies and negro spirituals. Tickets 50c, children 25c.

The Ways and Means committee of the P.T.A. have arranged and will present a musical program at the high school building, Wednesday evening, May 18th, at 8 o'clock. The charge of admission has been placed at 25c with the funds created to be used for the purpose of purchasing uniforms for the high school band.

The steamer Jane, now being outfitted, will engage in the cement carrying trade leaving this port some time this week for Petoskey where she will take on's cargo for delivery at Muskegon. Captain Roen has chartered the little tug which will be captained by Peter Bakke, with Alec Moore as chief engineer.

State trooper, Corporal Sam Mapes on duty last Sunday near Sturgis, on M-23 was shot supposedly by rum runners. Mapes was rushed to a Lansing hospital for treatment but died about one hour after entering. He had been connected with this branch of state police service for about two years and is said to have been one of the best troopers on the force.

Two brothers A.J. and Emmet Pierce, residents of Harbor Springs are dead, the first mentioned instantly killed and Emmet dead two hours later, due to their automobile being struck by a south bound passenger train Wednesday morning. The accident took place just north of Petoskey where the line of the G. R. & I. R.R. crosses M-1; south of the old brewery building.

Peter Anderson of Northport lost his boat house and fishing tug last Monday night during the electric storm that visited this region. The loss was caused by a bolt of lightning striking the boat house. An instant later the structure was a mass of flames which destroyed the boat house, contents and ship. Mr. Anderson is doing about for a ship to take the place of his former craft and spent some time here Wednesday looking over some of the ships in this and nearby harbors.

An automobile left the pavemnt near the VanDusen place on M-11 last Tuesday night, resulting in injuries to two men, both from Grand Rapids, who were the only occupants of the car, of a nature that necessitated their going to the hospital for treatment. Howard Friar was badly cut about the head, one of his ears being nearly severed. The other by name of Feybold was not seriously injured the damage consisting of several small cuts and bruises. A heavy rainstorm falling at the time obstructed their range of vision thereby contributing to the cause of the accident.

The Republican-News, St. Ignace, says, "there is some gossipy talk going around" to the effect that private parties contemplate entering the ferry business between St. Ignace and Mackinaw City by establishing a line in competition with the state owned ferry line. In view of the fact that the state ferries are under control of the state highway department and operated as a connecting highway link and could should the commission so direct, carry on gratis instead of showing a profit as now, we incline to the opinion that only a business sucker would interest himself financially in a competive line with the ferries as now established.

Ingenious Advertising

The calling on local merchants in the stage settings provided for performances of notable works at its civic opera and is turning them to advertising advantage. In one of the windows of the large city department store which the municipality maintains near Potsdamer plats some especially good sets are reproduced in miniature. The brilliantly illuminated stage settings with diminutive reproductions of the settings all in place inevitably attract the eye of the passerby. Needless to added to the scene by a Lilliputian figure or two of characters from the opera being advertised.

Getting the Days Placed

Hunter, says Theos, is trying to learn the days of the week.

Almost every morning his first question is, "Mother, what kind of a day is this?"

He also has a habit of expressing his views in the form of wishes. Recently his mother found him in possession of her fountain pen. "Wish she took it from him he studied a moment and then said: "I wish I had a mother what would not take pens away from people when they want to mark on magazines."

Exchange of Information

A very pleasant arrangement providing for an exchange of expert information of the subject of road construction has been arrived at between the United States and Germany. All data on construction methods, costs and results of experiments, as well as new machinery, will be transmitted from one to the other, and as both countries are giving a great deal of attention to this subject at the present time it is anticipated that the results will be very gratifying and helpful to both countries. This arrangement grew out of the visit to Berlin of the American delegates to the international Road congress, which took place in Milan a few months ago.

Artist Prodigals

Isadore Duncan, the famous dancer, is in want in Paris, and a collection is being made to set her on her feet again. Otto Kahn, one of the most liberal supporters of this movement said in New York the other day:

"Isadore Duncan, like most artists of genius, is too generous, too generous altogether. Her prodigal, reckless generosity once caused John Drew to say about her in a slack season:

"I think I'll dress up as a beggar and go to Isadore's house, and what I collect may keep her till she gets another engagement."

Strategy Saved Town

Wishing to extend the training grounds of a camp near the village of Villedieu, in the Vosges, the French military authorities decided to wipe out the little town by gunfire.

Their audacious plan, however, been thwarted by the parish priest, who determined to do what he could to save the village from destruction. He searched through volumes of the laws of France, and found that his church could not be closed down so long as there were two attendants at daily mass. Since then the church has been thronged every day with villagers, who thus render the authorities powerless to carry out the destruction.

New Scholastic Idea

One semester each year for three years is spent in an industry as nearly allied as possible to their chosen line of work by students in the department of engineering at the College of the Pacific, Stockton, Calif. During the fifth year students remain continuously in college. This is said to be the only college west of the Mississippi following the co-operative plan of instruction, under which students are qualified, after the freshman year, to gain valuable first-hand experience in the work they expect to follow as a profession, and at the same time to support themselves while attending college.

MRS. WILLIAM M'NALLY PASSES

Funeral service attended by a large number of friends was held at St Marys church, Tuesday, for Mrs. William McNally of Hayes township, who passed away at a Petoskey hospital following a major operation performed last Saturday.

Her maiden name was Mary Haggarty and place of birth New York City, the date being May 10, 1863. About twenty years later she became a resident of Hayes township. Forty one years ago she was united in marriage with William McNally the husband by whom she is survived. The couple continuing their residence in Hayes township during the succeeding years.

From the early years of pioneer life she was held in high esteem by her acquaintances while the McNally home noted for its surroundings and kindly interest, solicitous sentiment and generous attitude displayed by the family members to all dwellers in this region. Therefore the death of Mrs. McNally is a matter of deep regret such as extends far beyond the range of family members here.

Other survivors are a sister Mrs. F. W. Smith of Hayes township and one brother Jone L. Haggerty, the latter a resident of Canada.

Interment was at Undine cemetery in Hayes.

Card of Thanks

I wish to express my thanks and appreciation to all friends for their many recent acts of kindness and sympathy during my recent bereavement.

William McNally.

Well Was He Called "Wise Ben Franklin"

"I made it a rule to forbear all direct contradiction to the sentiments of others, and all positive assertions of my own," wrote Benjamin Franklin in his autobiography. "I even forbid myself the use of every word or expression in the language that imported a fixed opinion, such as certainly, undoubtedly, etc., and I adopted, instead of them, I conceive, I apprehend, or I imagine a thing to be so or so; or it is appears to me at the present. When another asserted something that I thought an error, I denied myself the pleasure of contradicting him abruptly and of showing immediately some absurdity in his proposition; and in answering I began by observing that in certain cases or circumstances his opinion would be right, but in the present case there appeared or seem'd to me some difference, etc. I soon found the advantage of this change in my manner; the conversations I engag'd in went on more pleasantly. The modest way in which I proposed my opinions procur'd them a readier reception and less contradiction: I had less mortification when I was found to be in the wrong, and I more easily prevail'd with others to give up their mistakes and join with me when I happened to be in the right."

Mother-in-Law Gives Voice to Reflections

"I thought for a while that Harold was going to get out in the golf controversy, but let me tell you mine and Millie's new trousers were delivered.

"Lamech and I lived happily together many years, but he never played a game of any kind after we were married except once. We went to the volunteer fireman's picnic and he played baseball for two or more minutes. He was laid up for days.

"Minnie's husband works harder at his play than he does his job. Lamech used to watch the weather signs to keep from losing his crops. Many's the time his rheumatic knee has given him warning to get the hay in out of the south forty. In the spring and summer Harold reads the forecasts to see if the weather is likely to be bad enough to make him go to the office.

"Of course, Minnie makes him take his recreations seriously. I've noticed a woman who can never sport clothes usually advocates golf, for her husband. But if Minnie hasn't got better swinging a club than she's a broom it is a waste of good silvered cloth to put her on the links."—Exchange.

Strictly Business

A celebrated Welsh bard, profundo, after years of fame, returned to his native village in the wilds of Cardiganshire. A charity concert was arranged, and the worldfamous virtuoso was billed to sing "The Village Blacksmith." Just before the concert a local supporter came around to the artist's dressing room.

The visitor approached the artist and said: "I understand that you are going to sing a song, 'The Village Blacksmith.' Well, I'm telling you now that I am the village blacksmith and I want to say that if by any chuunce you get an encore, will you shove in an extra verse to say that I also let out bikes on tire at sixpence an hour?"—Taffy Tales From Welsh Wales."

Diet and Cancer

The theory advanced by many persons that eating a natural or wild diet will prevent cancer has apparently been contradicted by recent experiments, reports Hygeia Magazine. When mice, the type of animals especially suited to cancer experiments, were placed on various diets, those fed the wild diet had the highest cancer mortality and those fed an apparently unbalanced diet had the lowest. There was not the slightest evidence that fried or well-cooked food was associated with an increase in cancer.

Dependable Paints manufactured by Heath and Milligan Mfg. Co. "Best since 1851." We carry this line of high grade paint and will be pleased to show you color lines and supply your needs.

Staley Bros. Hardware.

CHURCHES

Methodist Church.

C. E. Pollock, Pastor.

"Mother's Bible" is the Mother's Day theme next Sunday morning, 10:30. Special music is planned for this service. Church school at its best next Sunday at twelve. Plan to stay for the study.

Epworth League meets at six thirty, "With Christ in the Out-of-Doors" is the topic.

The evening service is at seven thirty. The subject is "The Mother of Methodism." This will be one of the great evenings with great people.

The Epworth League business meeting last Monday evening made plans for the summer months. Vera Belding was chosen as the summer president, with Cecile Louise Pollock for first vice and Ellen Cook for 4th vice.

Delegates were chosen for the State Epworth League Institute that meets in Albion June 27 to July 3.

Outstanding themes that were discussed at the Area Council meeting in Lansing last week were: The outlawry of war, the modern missionary challenge, prohibition enforcement, stewardship, and the irresistible leadership of Christ. It was a commanding gathering of great leaders.

Baptist Church

Rev. Herman Burns, D. D.,
—) Pastor (—

The Grand Traverse Association is now in session with the local Baptist church and having a feast of good things—social, spiritual, mental, and the ladies of the local church are providing a bountiful feast and entertainment with characteristic thoroughness and hospitality for all.

During the winter the pastor has been giving a series of Sunday evening sermons for the early history of the Jewish people and will now, for a few weeks study about the Jewish people under the prophets. They should be as interesting as the former were.

The usual services of the week will be held and the public is invited to all of them.

Congregational Church

Rev. B.G. Mattson, D.D., Minister

At the morning service at 10:30 we wish to emphasize in our invitation to the public the opportunity and privilege of public worship, the primary object of which is the recognition of the presence of the unseen God, and the acknowledgement of his goodness and love with gratitude and praise. "As parts of this service the music by the organist and choir and the sermon by the pastor are not in their purpose this primary object. The sermon announced for the morning is upon the theme "God's Individualism." a study of the rhythm, the harmony and the onward purpose in the ways of God in his world.

The Sunday school is at twelve. The Young People's meeting is at 6:30.

The church will resume the regular evening hour of 7:30 after an extended series of combined meetings with the young people.

The pastor announces that the hour will be informally occupied with "Conversations, Readings and Reviews in the paths of religious inquiry, experience and activity. Those who are willing to spend the hour thus will impressed with the vitality of the Christian religion in the life of the world of today. Those who have little time for broad reading will be enriched by the acquaintance with some recent and inspiring books and other books not new but still inspiring. The aim will be not to conduct a duplicate of the morning service but spend an hour together in friendly give and take, in interchange of thought and in common effort for the mutual enrichment of life.

At the church Thursday evening at 7:30 the pastor will conduct a meeting for prayer and for a weekly survey of current events in the religious world.

At the Ironton church service, Sunday school and wor

Romance Seen In Gold Rush

Boys Find Pay Dirt at Weepah in Time to Save Family Fortune.

Tonopah, Nev.—If the sun that shone upon the waste lands of Nevada last summer had been less intense the world would not have had to wait until March 2 of this year to learn about the gold strike at Weepah. For the discovery credited to Frank Horton, Jr., and Leonard Traynor was actually made last summer. The story of the strike has the elements of romance and today Weepah is a camp of prospectors, fortune hunters and sightseers who use automobiles instead of pack mules and are building a new gold town.

Horton's partner is owner of the Electric Gold mines and the nineteen-year-old lad was expecting his prosperity when he picked up a piece of rich "float" decked with small particles of free gold. Frank Horton's pulse beat rapidly. With a hazy idea of locating a rich gold-seam such as the one that made Goldfield famous 25 years ago, he began covering the ground carefully. As he worked, however, the sun beat down upon him as only a desert sun can. The intense heat squelched his ambition for the time being and young Horton went on his way resolving to return when the weather was cooler.

The Horton family consists of Frank Horton, Sr.; Mrs. Horton, Frank, Jr., a sister and twin baby brothers. The babies furnished Frank, Jr., the incentive to return once more to Weepah. He wanted to make a stake for the babies. Leonard Traynor, another nineteen-year-old lad, joined Horton, and the two boys set out for the hills from Tonopah.

Two Boy Prospectors.

On the morning of March 2, after they had eaten their last rations, the boys returned to the spot where the gold float had been picked up the summer before. A badger hole on the ground at that time showed that gold-bearing rock was just below the surface. It pinned well and the boys began digging the little cut that has caused so much excitement since that time.

In a few hours a trench had been dug into the hillside and two sacks of ore had been taken out. The ore had flecks of gold running through it and when crushed yielded a long string of yellow gold in the pan. But the boys were too excited to tarry longer. In a short time they had staked bond claims in their mothers' names close to the Electric Gold ground and left in a cloud of dust for Tonopah.

In Tonopah they created a genuine sensation by handing out several thousand dollars' worth of ore as samples. Mining men made offers running into thousands of dollars for the right of being told the district in which the gold was first found. Prospectors who happened to be in the town of Tonopah that night hurriedly threw their packs together and waited for the news to break.

Keeping the Secret.

For two days the boys remained silent. The strike was on the ground belonging to Horton's father and they wanted to keep the location secret until he could return.

It so happened that in the days of Goldfield Mr. Horton had made nearly $1,000,000, which had been spent in water projects in the vicinity of Oakland and in the Southern oil fields. For years Frank Horton, Sr., had been working the Gold Electric, developing ore, but after reaching the stage where it would make a paying proposition he was unable to interest further capital. The ground at the time of the gold discovery was under option to another company for money due, putting young Horton in the same position as little Nell when the villain was ready to take up the mortgage on the old homestead. Horton, Sr., had borrowed funds a few days before to take care of his family for a short time, while he made one last desperate trip to Los Angeles, hoping to raise money enough to keep the wolf away from the door of his home and of his company.

It was then that Frank Horton, Jr., and Leonard Traynor found rich gold-bearing rock. The name of Horton was saved. The Weepah gold rush was started with automobiles, moving picture cameras and radio sets as modern trimmings.

What Weepah Looks Like.

The camp of Weepah itself is not large. It is situated in the heart of a barren country where water, grass, trees, birds and beasts are unknown. The landscape for hundreds of miles is made up of nothing but mountains, foothills and great flats or valleys where stumpy sagebrush is the principal verdure.

It is in a country where roads can be better classified as trails off the highways.

Traffic, road and rail, goes to Tonopah first; that is an established town capable of taking care of the influx of fortune hunters and sightseers. Then it pours into Weepah. For that reason those who make money at their business or trade and those who have ground near the strike are the only ones who are living in Weepah, although a number pitch camps there nightly while on the road.

The town is a squalid little camp at the base of a low hill spreading out into the flat. No townsite has been staked out yet, and the inhabitants have picked out their locations for their homes by using the squatter's rights. Most of the inhabitants sleep in tents ranging from the small one-man dog tent to the large and spacious dwelling (20 by 10 feet) of the real shack, store or club room. Scattered among these outfits are the brown houses of the regular tourist or city campers, whose tents are always newer and contain many more conveniences than do those belonging to the prospector.

Four frame dwellings were already on hand at the camp, which belonged to the Gold Electric Mines company. Since the camp started the majority of dwellings have been tents. During the last week or so there has been an influx of building supplies, as all the available trucks in Tonopah were brought into service, and now the frame buildings are becoming more numerous. These buildings spring up in but a few hours after the supplies arrive in camp.

Fast Work.

One of the best examples of such work is the Weepah club, where "Hard Rock Jack" jocularly greets all comers. It is a flat-roofed structure with a canvas sign bearing the words "Eats and Drinks." The material for this place was brought into camp at 1:30 Saturday afternoon. By six o'clock there were three poker games going full blast, and another famous old character of the camps, "Sailing Jack," was standing behind a short, improvised bar ready to dispense cigarettes or liquid refreshments. Flooring is not out about the tables and counters is a steady stream of prospectors, miners, brokers, slicksters and newspaper men. The speech is rough, but the men are happy.

There is always a good group hanging around Frank Horton, Sr., when he is in Weepah, and he is accepted as being the father of the camp, for it is he who has been trying to "sell" that particular section of the country for a long time. Having found the one big fortune he handles his work now with admirable equability. The sudden visions of wealth and the immense quantities of mail offering him help do not bother him in the least. He is always the same jovial man each day.

Each day Horton takes a trip out to the camp to see that everything runs smoothly there. He listens to the fickle praise of those who come to Weepah, and attends to his duties on the ground until early evening. Back in Tonopah at night he smilingly rejects more offers to help him, and at the same time listens gravely to the plans of others who are eager to show him how he can make a fortune.

Young Horton and Leonard Traynor do not say much. They answer all questions as courteously as possible, and then return to their prospector friends to do their talking.

Thirteen Sacks of Ore.

Up on the side of the hill where the cut has exposed the gold ore are 13 sacks of ore. They weigh approximately 80 pounds each and have an estimated value of somewhere between $50,000 and $100,000, according to the elder Horton. These are left for public inspection each day, and at night they are placed in the safe once more, covered with an old wagon top and guarded by a man who sleeps there.

No work is being done on the pocket or vein of ore for two reasons. One is that there is a possibility of its petering out, and the other is that people are looking at it most of the time.

Although there is no established law in the camp at Weepah, there is a very trusty little attitude among the residents there. Stories concerning claim jumpers are sent out occasionally, but such cases are few and far between. The average man who has lived in the desert for any length of time realizes the value of helping rather than hurting the other fellow, and he lives by that rule. His test is always open to any one who may need it or anything in it.

Whether or not Weepah will prove to be a camp great enough to produce millionaires in the same manner that Tonopah, Goldfield, Virginia City and other famous Nevada towns did is at this stage of the game problematical. Until enough work can be done in the field to prove that the district is a really rich one there is always the doubt that it may be just a "flivver."

Cuts Off Relatives to Benefit Girl Friend

Cambridge, Mass.—Cutting off three relatives from any share in an estate estimated at approximately $2,000,000, Miss Elizabeth Wentworth Roberts, internationally known painter, who committed suicide in her Concord home on March 12, left the income of the bulk of her fortune to her friend and companion, Grace B. Keyes of Concord.

The will, filed here, fails to name the artist's three closest relatives, all cousins. They are Elizabeth S. Wyatt of Philadelphia, Ellen C. Roberts of Hopkinton, N. H., and Lorraine Melton of New York.

This Means Spring Has Come

When you see "Huck" and "Tom" getting ready to go fishin', you may be sure that spring has arrived.

MARKED CHANGE IN FARM TENURE IN FIVE-YEAR PERIOD

More Tenant Farmers and Fewer Farm Owners, According to Department of Agriculture.

Washington.—Marked readjustments in farm ownership and tenant farming in the United States between 1920 and 1925 are shown in an analysis by the bureau of agricultural economics, United States Department of Agriculture.

The bureau reports that there were 7,724 more tenant farmers in 1925 than in 1920, and 56,706 fewer farm owners. The net change, says the bureau, is not startling, but the picture in detail "is not at all reassuring."

Farm owners have increased in the New England, Middle Atlantic, and Pacific groups of states and decreased in all other groups, the largest decrease being in the west north central, east south central, and west south central areas.

Tenant farmers have increased in the west north central, west south central, and mountain states, and decreased in all other areas. The increase in tenant farming has been especially notable in the newly developed cotton areas in the Southwest.

An analysis of the various tenancies appears to indicate that the increase in owner farmers has occurred mainly in regions sufficiently close to cities or to mining and other industrial enterprises to create a demand for farm homes supported largely by wages earned in nonagricultural industries. In regions mainly dependent on agriculture the agricultural depression appears to have resulted in a relative increase in tenancy.

Full details of the bureau's analysis have been published in a mimeographed report entitled "Changes in the Tenure of Farm Land, 1920-1925" copies of which may be obtained from the bureau of agricultural economics, Washington, D. C.

"Wooden Leg" Castle Built in 16th Century

Hallenstadt, Germany.—This "Gute-way to the Harz Mountains" has a historical building dating from the Sixteenth century known as the "Stelzfuss" or wooden leg.

It derives its name from the fact that a bend, two-window alcove, extending through the second, third and fourth stories and surmounted by a picturesque gable, is supported entirely by a column of wood which rests upon the sidewalk.

Whoever does not like the smell of freshturned soil in the spring isn't a real dirt farmer.

Farming is hard work, but the biggest waste in farming is the waste of time in an unbalanced farming plan.

One hears a lot about the link in the chain, but it only takes one guy in the town to let the five stores out of the pasture.

Recipe Found for Spain's "Lost Bread"

Malaga, Spain.—Spain's "lost bread" has been discovered in the recipes of an old monastery and now is all the rage as a table delicacy. It is a sort of fritter with a cinnamon flavor. The recipe is: Cut ordinary white bread into fingers and pour over them the yolk of one egg beaten up in a glass of Malaga wine. Dip the soaked strips in beaten egg and fry to a golden brown in deep boiling lard. Drain well and sprinkle with cinnamon and sugar.

Increase Potato Yield Per Acre

Farmers Do Not Make Efficient Use of Knowledge in Growing Spuds.

(Prepared by the United States Department of Agriculture.)

Last fall a firm of California's potato growers harvested an average of 1,000 bushels of potatoes per acre from nine acres. The rest of the country, if previous production records are a reliable index, harvested approximately 113 bushels to the acre. Farmers in Great Britain have been producing an average of 200 bushels per acre for a number of years. It is evident, says William Stuart, potato specialist of the United States Department of Agriculture, that the general run of farmers who grow potatoes in the United States do not make efficient use of the available knowledge on increasing acre production.

Cause of Low Yield.

Of the many factors causing a low average potato yield in this country, poor seed is one of the most important, says Mr. Stuart. The American potato grower, generally speaking, pays too little attention to the quality and quantity of the seed used. The California record was due in part to the use of 40 bushels of seed per acre, almost twice the quantity generally used even by the most progressive growers.

Perhaps the best way for the average grower to be assured of good seed is to purchase "certified seed." Certified seed is being produced by groups of growers in twenty or more states, who give special attention to the production of seed that will pass state inspection as to yielding ability, uniformity, trueness to name, and freedom from disease.

Improved Seed.

There is abundant evidence that certified seed is improved seed, and that it will yield much more than common or "grocery store" seed. For instance, the average yield in Michigan last year was 122 bushels per acre, while the average production from certified seed was 256 bushels per acre. This represents a gain of 134 bushels on each acre planted with certified seed In comparative tests made last year by the Tennessee state experiment station certified seed produced an average of 183 bushels to the acre, while the yield from uncertified seed was but 102 bushels per acre.

Sweet Clover Excellent as a Cow-Pasture Crop

Sweet clover hay is a satisfactory substitute for alfalfa in the ration of the dairy cow. If it is well cured and not too coarse, it supplies nutrients quite similar to alfalfa in quality and quantity. It is not so palatable a dairy feed as is alfalfa and because it is somewhat coarse and stemmy, the high-producing milch cow should not be required to clean up all that she is fed. In localities where both legumes can be grown successfully the usual practice of dairymen is that of relying upon the alfalfa crop for hay and upon sweet clover for pasture.

With a few exceptions, sweet clover seems to give excellent results as a pasture crop. Several experiment stations report no ill effects on dairy cattle when pastured on sweet clover. Furthermore, these reports show that milk flow was maintained satisfactorily and no complaints were received regarding the odor or flavor of the milk as being disagreeable. Occasionally the loss of a cow from bloat is reported when sweet clover is pastured. Unless the crop is pastured closely the growth will become rank, coarse, and unpalatable.

Soy Beans One of Easy Crops to Grow on Farm

Soy beans will grow on all kinds of soils. Soy bean hay is more nutritious than cowpea hay and stock like it better. As a soil-and-butter producer, they are equal to alfalfa and superior to cottonseed meal. A bushel of soy beans is worth more for feed than two bushels of corn. They can be logged down without any harvesting expense. When cut at the proper stage of growth the hay is equal to alfalfa for dairy cattle. Drought and excessive rainfall affect them less than cowpeas.

It is one of the easiest crops to grow and harvest. They make a fine hay pasture. They can be grown with cowpeas to hold the pea vines off the ground, and will improve the quality of the hay and make it easier to cure. They increase the yield of the following crop. They make a rich and nutritious hay and one of the cheapest. One can always find ready sale for both beans and hay. They are one of the most economical of soil improvers. They require no fertilizer except acid phosphate. Plant more soy beans.

Agricultural Facts

Hugs and fatal quiz for no man.

Legumes and lime are the gold dust twins of agriculture.

* * *

The bold aura of "farm relief" comes from intelligence, energy, and thrift.

* * *

Regardless of the statements of overenthusiastic dealers seed treatment will not control corn smut.

* * *

Whoever does not like the smell of freshturned soil in the spring isn't a real dirt farmer.

* * *

Farming is hard work, but the biggest waste in farming is the waste of time in an unbalanced farming plan.

* * *

One hears a lot about the link in the chain, but it only takes one guy in the town to let the five stores out of the pasture.

All Material Things
Matter of Viewpoint

A Minneapolis bookseller, speaking one day of a book collector who was making his cautious way through a pile of old books that had just come in, said of him, not disrespectfully, "He is a rather close buyer." I watched him carefully lay aside two or three books that had a resplendent look. Then, after he had gone through the pile, I saw him return to the auspicious books, collate them carefully, study their title pages, the copyrights on the back of these pages, give a general look at their condition, and then lay them back on the pile. The decision had been against them.

The next collector who came along would doubtless examine them with interest, buy them to overflow his shelves and fill a place in his drawers or garret, where they would, in time, find their way again to the second-hand bookstore. He was the less common buyer, A. J. R. comments, in the Minneapolis Journal.

I once read of "a close buyer" in another line who must have had Yankee ancestry. He did the buying for the family larder and exerted a miser-like abuse. With this intention, he cautiously tested the nuts and apples. If a worm were inside, the unscrupulous rendered its gnawing audible and the apple or nut was rejected. The frustrated regarded the man's actions with some distaste.

I thought of the robin's work on the lawn. Doubtless the bird has a microphonic ear and is able to hear the earthworm gnawing away at the planet, and thus he locates his prey and drags it from unwilling exit.

Everything in the point of view. The man with the microphone doubtless regarded himself as his mental bank and thought of himself as a cautious and wise buyer. The fruiterer's inner description of him was not so flattering.

Speaking of the point of view, the bishop of Hereford, in England, is quoted in an epigram that will make you smile. He says:

"I scrupulously exhort the clergy of my own diocese to learn to conjugate:
'I am firm, thou art obstinate, he is pig-headed.'"

New Idea in Polygamy

One generally associates polygamy with a plurality of wives, but Lieut.-Col. A. H. W. Haywood, in his book, "Sport and Service in Africa," gives us something new in this line.

"I must not omit to mention an interesting, and in many ways, remarkable, country through a portion of which I passed after crossing the Tanganyika. This is the Ruggar: It is a mountainous land situated almost in the middle of the central Sahara. It is the true home of the Tuareg, a race supposed to be descended from the Nubidians. . . . The country covers a vast area and is traversed by a mountain range, attaining a height of 11,000 feet. The Tuaregs wear veils, that is, the men do. The women are unveiled. The women govern the land and inherit the rights which in Europe are inherited by the other sex. Moreover, the women may have as many as six husbands, whereas the men are only allowed one wife."

Played With Mind Blank

The disclosure is made that during the recent football trial match at Stamford Bridge, Parker, the Arsenal fullback, who was sparring for the first time against the England eleven, played throughout the second half with his mind a blank.

It was little half that the game underwent a remarkable transformation, England, who had been two goals down at the interval, winning by 3 goals to 2.

Parker in some way sustained concussion, and after the match had the recollection whatever of having played in the second half.

It is a record that footballers, while suffering from concussion and quite unconscious of their surroundings, have played with remarkable skill and intelligence, and even scored goals.—London Tit-Bits.

GOOD ROADS

GOOD HIGHWAYS NO LUXURY NOW

Government engineers are trying to dispel three erroneous ideas about public highways in order to give the country a highly improved system of motor travel.

These ideas are:

1. That an improved road is a luxury, to be enjoyed only if it can be afforded and not essential to the economic health of the community.

2. That all roads, if improved, should be hard surfaced to make it worth while.

3. That roads be built for permanency.

These thoughts are attacked and broken down in a statement of members of the bureau of public roads to the secretary of agriculture.

The idea of good roads being luxuries, say the engineers, "had its origin in the early days of the automobile when the motor vehicle was thought to be merely a toy for the wealthy few, and road improvement was thought to be in the interest of only this special class.

Conditions are different now. Automobiles are necessities to a great degree, and roads are needed to accommodate them if only for transportation purposes.

"The fact is," reads the report, "we lose more by not improving the roads than it costs to improve them. So we may say that we pay for improved roads whether we have them or not, and we pay less if we have them than if we have not."

Hard surfaced roads are not economical in every case. According to the bureau of public roads, the types of surfaces should be left to the discretion of those who actually use them.

"It has been shown that the maximum amount which it is proper to spend for the improvement of a given road is the sum of the individual savings accruing from the improvement to the owners of the vehicles driven over it," is the opinion of the government road officials. "What we spend for the improvement of any given road should always be less than the sum total of savings from the improvement."

The type and amount of travel over a road determine to a large extent the type of construction.

That the road should be made for permanency is looked upon as an absurd idea. There isn't such a thing as a permanent road, say the government men.

"It is this delusion, they say, "that has been responsible for the unhealthy disregard of the maintenance of our roads in the past. Following the will-o'-the-wisp of the permanent road we have in the past allowed some of our new roads to go to pieces for lack of necessary repair.

Through Road Is Being Pushed Across Nevada

Special efforts are being made to have the Victory and Lincoln highways across Nevada in good condition for the opening of the Transcontinental Highway exposition in Reno next June, according to reports received by the California State Automobile association from Reno. A mild winter is facilitating continuance of important work on several road projects in the Sagebrush state, the association highway bureau was informed.

Work is reported progressing steadily on the Sparks-Derby section of the Victory highway. Plans are being completed for starting activities on the Churchill division of this route.

The Washoe county board of commissioners recently approved an appropriation of $20,000 toward the paving of the Victory highway from Verdi to the California line. Additional funds will be received toward this project from the state and from federal aid.

Good Roads Facts

Nearly 18,000 miles of road in several highway systems was surfaced in 1925.

Massachusetts motorists contributed $9,500,000 of the $13,400,000 spent by the state on highway construction last year.

* * *

The automobile public should have no hesitancy in demanding good roads of adequate width to take care of traffic.

* * *

Total highway expenditures in the United States during 1925 is estimated by the United States bureau of public roads at $1,902,000,000.

* * *

An annual saving of more than $2,000,000 in cost of paving highways was predicted recently by officials of the Agricultural department as a result of experiments which, it was said, showed thinner brick could be used with satisfactory results.

* * *

All male inhabitants of the Nicaraguan republic, who are older than eighteen, are required to contribute to the construction and maintenance of highways, according to a new law. A highway service tax has been levied, payable in service or cash.

Iodine From Seaweed

The first factory for the manufacture of iodine from seaweed was established in 1829 at Conquet in Brittany. To make a pound of iodine it takes approximately one ton of fresh seaweed.

Humanity's Odd Trait

The world is full of faint hearts, and yet everyone has courage enough to hear the misfortunes and wisdom enough to manage the affairs of his neighbors.—Poor Richard.

New York's Broadway
Famous Century Ago

While Broadway one hundred years ago did not possess the length in mileage nor the bowling streetcares which it has today, it is interesting to note that the editor of that celebrated publication, the New York Mirror, said in 1828 that Broadway was sufficient in itself to make New York famous. Its stream of brilliant illuminating electricity, gas lamps contributed to the brightness of the thoroughfare at that time.

"The stranger who can behold it of an evening," states the Mirror writer in 1828, "when its stream of gaslight throws a glare upon passing thousands and shoots its rays over a double row of open stores, displaying fancy merchandise in every shape and form and position to attract attention, must be dead to a sense of what is beautiful and grand, if no emotion be excited to light, in all the uniformity of fixed stars; there is no irregularity, no breach, no difference in the flame, but, as all are fed from one fountain, as all burn alike and live or die together. For hours, crowd follows crowd, in all the bustle of business or pleasure; it is not the monotonous march of an architect mob, but the passage of the inhabitants of a populous city upon their ordinary callings—they sweep onward, still and steady, like the current of a deep river, which may be impeded but which cannot be stopped."

He then adds the following paragraph, which is as true today as it evidently was a century ago:

"The city of New York is, of herself, a little world. Whatever art has discovered for the comfort and convenience of man is exhibited for sale in her markets. If Europe affords a luxury, it is there; and if Asia has added rich or splendid, money will procure it for New York. Her population is made up of almost every nation, kindred and tongue; they are amalgamated by oneness of interest—their home is where their occupations happen to call them, from Kamchatka to Japan. Their theater and other means of amusement are before those of any other part of the country, and whether it is all in all, we know not where to find its like."

Hindu Leader Saddened

Gandhi, the great Hindu leader, has just completed a year's absolute intellectual withdrawal from the world. He has spent his time meditating, studying the New Testament and expounding sacred Hindu writings. The Mahatma is reported to be unwell and extremely thin owing to a severe illness following his imprisonment. He is also a very sad man and confesses that he has lost the sense of communion with a personal God, professed by many Christians that gives to them a sense of joy. Nevertheless, he leans utterly upon God, as he understands Him. Gandhi has an extremely magnetic personality and there is a wonderful radiance in his eyes, we are told by a woman who interviewed him. Yet he is very unemotional and practical. He has given himself completely to God, and to the task of setting India free, as he understands freedom.—Pierre Van Paassen, in the Atlanta Constitution.

Course of Oriental Art

In the way of an experiment, the New York university a short time ago established a course of Modern art, manners, monuments and antiquities, and, while it was thought that it would fill a demand, it was not anticipated that it would meet with quick response. Its sponsors thought the classes would probably run only to 200 or 300 in five years, but the registration has already reached 2,000 students during the past summer. Dr. R. M. Reitstahl spent several months abroad gathering material in the way of copies, plans and photographs. He made accurate measurements of 25 ancient structures and drew detailed plans of them, which will be of great value to the students.

Reducing Railway Risks

An ingenious device intended to prevent railway disasters has been invented by an Italian. Special signals are worked automatically by the train, and develops electricity during the movement of the train.

A light shows in the driver's cabin when anything is obstructing the line, and if this is ignored a bell rings. Should this also escape attention, the train is automatically stopped by a device that applies the Westinghouse brake. The third rail can also be the means of working a telephone service for drivers.

Uses for Violet Rays

Those mysterious rays of invisible light which constantly play about us, yet which we never see, hold seemingly endless possibilities for usefulness. For example, says Popular Science Monthly, the latest use for ultra-violet rays is in the testing of silkworms' eggs. Healthy worms have the strange property of giving off visible light when exposed to invisible ultra-violet rays, whereas unhealthy worms give off weak light or no light at all. Similarly, eggs diseased in the germ violet rays to determine whether teeth are alive or dead.

Big Strike's Ramification

Stores of Elgin, Illinois, almost either close Saturday nights or the homes be lighted with candles as an indirect result of the coal shortage in Great Britain. Housewives complain that when the merchants of the village now city) of Charlevoix, Michigan; thence north forty-two feet two and one-half inches along the west boundary line of said alley to the place of beginning; thence north to the aforesaid lot two in said block six; thence east ninety-six feet along the north boundary lines of said lots one and two; subject to an easement of a public alley, fourteen feet in width on the west side of said parcel of land, also subject to party wall agreement concerning the party wall between the above parcel of land and the parcel adjoining immediately south, together with the hereditaments and appurtenances thereunto belonging, or in anywise appertaining.

"De oldest man," said Uncle Eben, "was Methuselah. But in all dem years he didn't do nuffin' but counsel people to celebrate his birthday."—Washington Star.

LEGAL NOTICES

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Michael G. Binkranz (a single man) of Detroit, Michigan, unto Llewelyn S. See, of Warrenton, Oregon, and Charles E. See, of Charlevoix, Michigan, dated August 26th, 1925, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, October 9th, 1925, in liber sixty-three of mortgages on page one hundred and sixty-five, on which mortgage there is claimed to be due at the date of this notice the sum of Two Thousand One Hundred Fifty and 39-100 Dollars including the principal sum due with interest, together with an attorney fee of Sixty-five and No-100 Dollars as provided for by the said mortgage and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas the taxes required by the statutes to be paid on said mortgage were duly paid prior to the recording thereof.

Now Therefore, Notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided for by the said mortgage, at public auction, to the highest bidder therefor, at the front door of the court house in the city of Charlevoix, Charlevoix county, Michigan (that being the place where the circuit court for the county of Charlevoix is held), on Tuesday the twenty-first day of June, 1927, at eleven o'clock in the forenoon on that date.

The premises described in said mortgage being the lands, premises and property situated in the city of Charlevoix, county of Charlevoix and State of Michigan, described as follows, to wit: Commencing at the southwest corner of lot one in block six of the recorded plat of the village (now city) of Charlevoix, Michigan; thence north forty-two feet two and one-half inches along the east line of said lot one; thence west ninety-six feet along the party wall line of the adjoining parcel of land on the south and extending to a point in the west boundary line of a public alley running north and south through lot two in said block six of the recorded plat of the village (now city) of Charlevoix, Michigan; thence north forty-two feet two and one-half inches along the west boundary line of said alley to the place of beginning in the north boundary line of the aforesaid lot two in said block six; thence east ninety-six feet along the north boundary lines of said lots one and two; subject to an easement of a public alley, fourteen feet in width on the west side of said parcel of land, also subject to party wall agreement concerning the party wall between the above parcel of land and the parcel adjoining immediately south, together with the hereditaments and appurtenances thereunto belonging, or in anywise appertaining.

Communion Table Profaned

Stealing of dice on the communion table for Bibles, a custom started 250 years ago in a church at St. Ives, England, has been altered so that the casting will take place on a table placed on the chancel steps. The unusual procedure was started by provisions of the will of Dr. Robert Wild, who bequeathed $250, the yearly income from which was to be expended on Bibles to be cast for by dice on the communion table by six boys and six girls.

NEXT EARLIEST LENT NOT DUE UNTIL 2008

Season This Year is Only Eight Days From Latest Possible Date

Lent, which began Ash Wednesday, March 2, is only eight days away from the latest date on which the season can begin, according to a writer in the New York Times. The earliest date is Feb. 4, which happened in 1818. The next earliest date will be in 2008, when Ash Wednesday will fall on Feb. 5.

These dates are set by an ecclesiastical reckoning for Easter Sunday, covering a period of 532 years, or twelve cycles of the moon, and an analysis of the table, from 1736 to 2013 shows that there are more late than early Easters, the figures being 175 Easters in April and 33 in March.

Easter Sunday this year, April 17, will be repeated according to date, in 1938, 1949 and 1960. The earliest date it can possible fall on is March 22 and only once does that date appear in the period referred to. That was in 1818. In 2008 Easter will be on March 23, the next earliest date.

Easter Sunday, according to ecclesiastical reckoning, is the first Sunday after the full of the moon following the vernal equinox; in other words, the first Sunday after the ecclesiastical full moon on or after March 21. The first efforts to bring about a uniform date were taken at a council of the Roman Catholic Church at Nicaea called by Pope Constantine in 325. "It was decided then that Easter would 1 1-3 on Sunday and on the same day throughout the world. The correct date was to be reckoned at Alexandria, then the home of astronomical science, and announced yearly.

At first the reckonings were based on an 8-year cycle, when the changes of sun and moon more or less exactly repeat themselves. Later an 84-year cycle was used, until the year 457, when a cycle of 532 years was used. Ultimately the 19-year cycle was adopted, which accounts for the table of 228 years referred to as being 12 cycles of the moon.

Lucky Amethyst

The amethyst, February's birthstone, is the most beautiful and rare worthy of all purple jewels. Described by a fifteenth-century writer as "purple red in color modefyd with a due quantite of appetite." It is one of the few precious stones that can, if one is superstitious, be worn at all times and in all places without harming the wearer. It is a favorite ring stone and is used by many as a lovers' pledge.

After the Ball

A dashing phase of every affair's ball is the home going, in the cold the gray dawn of the morning after. It is variably it rains, and there is not a spot in sight. Makeup and powder and paint are running, parts of rented costumes are missing, wigs are lost, lovers are quarreling and husbands and wives are not speaking. Oh, what bliss, to simply be gay, mad Bohemia!—Vanity Fair.

1905 1927

Looking Forward

The days of youth and joy and vigor should look forward to possible times of Storm and trouble, and a snug savings balance earning interest is a mighty convenient thing to have in time of strife. Moreover, it can be readily secured through determination and foresight. Don't delay your start. Make your initial deposit now. The interest at 4 per cent which we pay will help make it grow rapidly.

ALASKA, NOT GOLD, HOLDS SOURDOUGHS

Stay Despite Wealth and World Outside.

Fairbanks, Alaska.—One section of interior Alaska is a land of forgotten men. And the men themselves have wiped from their minds all memories of the vanities of the civilized world outside.

Three dozen men are living within the Arctic circle on the Koyukuk river 60th fortunes in gold, ranging from $35,000 to $75,000, according to Capt. Earl Webb, a prospector, who, after striking pay, is here on his regular winter vacation.

Most of the self-interned men are a remnant of the great trek toward the sources of gold in the early Klondike days. They prospect the creeks in summer, hunt, fish and trap in winter. They have married native women and settled down to enjoy their modest fortunes where wants are limited to food and a few clothes.

They use the purest post and express to secure what luxuries their tastes demand, but there is no desire to leave their polar wilderness.

Now and then some prospector makes an unusually large cleanup and turns his dust in at one of the local banks. They can get an estimate by applying to the United States assay office in Fairbanks. But rarely any fuss is made of the amount of gold being regularly taken from one of Alaska's creeks. The only one estimate apparently come from streams far within the Arctic circle.

The reticent attitude of the grim loners who come and go in silence and secrecy dates from the days of greater wealth than the world has ever known somewhere up there along the edge of the known land.

What lies in the undiscovered continent just beyond Point Barrow offers the greatest lure to Alaskan sourdoughs.

That gold in large nuggets of a peculiar bright yellow color is waiting in the creeks along the tundra country is certain, for but recently one miner brought by dog-sled four cases of dust as but a portion of his cleanup. The four parcels totaled over $40,000.

Airplane stone can aid men in reaching and holding down these storm-bound regions and bring them supplies even in mid-winter, say old-timers. But the lure of gold will bring stampedes sooner or later.

NOTED ARTISTS TO COME HERE

Mrs. William G. King, of Detroit, who is on a business trip to several northern Michigan cities, endeavoring to arrange concert engagements for the Detroit String Quartette, of which her husband is a member, was in Charlevoix a few days this week, having practically completed arrangements for dates at Traverse City, Manistee, Cadillac and Petoskey, during the last week in May.

The artists, comprising, this organization are members of the Detroit Symphony Orchestra, and the two violinists, Ilya Schkolnik and William Gratting King, are well known in Charlevoix, having appeared here in concert a few years ago. The new members are Vaibert P. Coffey, viola, and Georgen Miquelle, cello.

These artists present a brilliant and highly entertaining program, unexcelled in its ensemble and artistic interpretation, and Charlevoix music lovers should avail themselves of the opportunity of attending one of these concerts.

Shocking Affair

Ostriches may love fine feathers but they loudly loud rompers, so a device has been invented to conquer these birds. It consists of a bundle of tacks, each like a fork at the top which carries a strip of brass. When pushed against the neck of a charging bird, an electrical connect is made and the bird is given such a shock that destiny results.

CIRCUIT COURT JURORS

Drawn for May Term of Court

Jurors called to be in attendance at the May term of Circuit Court, which convenes on the 23rd instant are as follows:

Mrs. Hellen Clute—Boyne City.
Alstine Dunlop—Boyne City.
Fred Benzer—Boyne City.
Robert Bridge—Charlevoix.
Louis Orlowski—Charlevoix.
Kenneth Hathaway—East Jordan.
Dell Hale—East Jordan.
John Burney—East Jordan.
H. V. Dyer—Bay township.
John Heuter—Boyne Valley township.
William Hughes—Chandler township.
Edwin Noaton—Charlevoix township.
A. K. Fincher—Evangeline township.
Alfred Williams—Eveline township.
C. E. Murray—Hayes township.
Etty Bingham—Hudson township.
Wilbur Himebach—Marion township.
Ed. Herrick—Melrose township.
Charles Warner—Norwood township.
Daniel D. Boyle—Peaine township.
Wilfred O'Brien—St. James township.
Albert Miles—South Arm township.
Alva Kuhns—Wilson township.

MORE LIMESTONE NOW BEING USED

During the last month three more carloads of limestone were shipped and distributed to farmers near Charlevoix. This brings the total to seven carloads distributed in Charlevoix county since the first of the year and indicates the interest farmers are taking in improving their soils. Many farmers are hauling marl from several beds in the county and applying a fine coating on their soil.

The three carloads were handled by the Charlevoix Co-Op Ass'n and distributed as follow: One carload to Clinton Blanchard and Edd Vandenburg of Pheips, one to Loeb Farms, and the third to Geo. Meggison, Elmer Ingalis and several others in small quantities.

IMPROVING CAMP GROUND

Extensive Changes by the Church of God on Grounds.

The Church of God Campmeeting Ass'n in Northern Michigan, with the people of Charlevoix and this part of the state to know that some necessary and important improvements are being made at the camp ground, 2 1-2 miles south of this city and near the Loeb school.

This association is composed of the churches at Petoskey, East Jordan, Boyne City, Cadillac, Cheboygan, Charlevoix and all towns in northern Michigan.

About twenty years ago they obtained this five acres of ground and have improved it in different ways until at present they have a cluster of buildings seated in the heart of a beautiful grove, thus furnishing a quiet and suitable place for religious work in summer. There is one auditorium, where public services are held, the boarding house with kitchen and dining room on first floor, and sleeping rooms above; and store building where visitors may buy religious literature or eatables if they wish.

Besides this, a new dormitory has been erected this spring and is nearly completed. The work is under the supervision of C. B. Sheldon, who is business manager for the association. This building is 24x68 with chapel room in front where ministerial meetings will be held, while the rest of the first floor and all of the second contain sleeping rooms to accommodate guests who come from a distance.

Another new feature being introduced this year is changing the boarding house to the cafeteria plan, which we believe will be advantageous in many ways.

Besides the buildings there is room and suitable places for tents under the cool shade of the spreading maples with access to the use of pure water, and other things which help to make this a desirable place for an outing, and also the privilege of listening to good sermons at almost any hour of the day.

A Sunday camp meeting has been been held here every summer and this year it will be from August 5 to 14 inclusive. A minister and wife, also preachers, who have had much experience, have been engaged to conduct the meetings, and are looking forward to it with expectations of doing much good.

A BIG EVENT IN THIS COMMUNITY

Wholesaler's Tour Plans Are Completed

The coming tour of the wholesalers and jobbers of Grand Rapids to this city during the week of May 23rd will be one of the big events in this community during that week. This tour, made on a deluxe Pullman train with dining car, is the home of these, business men during the time they are away from Grand Rapids calling on their customers to build good will and friendship for that city throughout Michigan.

This tour will have the Furniture City band along to furnish music. This band has been along on these trips for many years. Each representative on this special train will wear the same kind of hat, also carry a cane so that they can easily be identified as one of the party. Upon arrival in each town a band concert is given on the main street, also souvenirs are distributed and in nearly every place the school will be assembled to give the scholars an opportunity of hearing the band, also receive souvenirs.

$250 PRODUCTS OUT OF TON OF STRAW

Gas for Autos Even Declared Possible.

New York.—A process by which a ton of straw may be buried to extract $250 worth of useful products from the smoke has been discovered by George H. Harrison, an industrial chemist, according to announcement by the tungstine Farm and Fireside.

The chemist, it is said, has obtained 1,000 pounds of products from each ton of wheat or oat straw, the products including a new gasoline favorably reported on by the Mayo brothers of Rochester, a roofing and damp-proofing paint, and a fly spray.

It is even possible, but not yet economically practical, to run an automobile on gas obtained from the straw, the magazine quotes the chemist as saying in an interview recorded in his laboratory near St. Paul, Minn.

"There is, indeed," said Mr. Harrison, "hardly any fluid in the products that can be derived from straw by destructive distillation. When the process has grown up to its possibilities every American farmer who grows grain will feel the difference. Even now, if only one automobile on a farm and offer use the grain or the straw, I would take the straw, incidentally, at least, it is the more valuable of the two."

Justice Qualifies as Authority on Mules

Raleigh, N.-C.—There is no telling when a mule will kick, and the only way to escape danger is not to go near the heels of one, the North Carolina Supreme court holds.

Associate Justice Brogden, grandson of a farm in Wayne county, dissenting in the case of Mrs. Sam Rector vs. Southern Cott company, and reversed the lower court which refused to grant a nonsuit in a personal injury case in which the plaintiff was awarded $200 in damages.

It was not alleged that the husband of the plaintiff, who has since died, was kicked, but that he was pressed to the wall of the mule by a mule. He had gone in the stable to look for eggs and there was no evidence that the mule had been previously vicious.

"What ditty does the owner of a mule owe to an employee who has charge of the mule and gets into the stable where the mule is?"

Here's the question to which the jurist from Durham addresses himself in the opinion in which he expatiates on mule lore. "A mule is a melancholy creature," the jurist remarks "It is a mulish fillus in the animal kingdom. It has been said that a mule has neither pride of ancestry, nor hope of posterity." It is a matter of common knowledge among men who know mules well and deal with them that they are uncertain, moody and morose."

CHARLEVOIX GETS NEXT MEETING

Alba Rebekahs Get Cup for Attendance

The Rebekah district ass'n meeting was held under the direction of Ideal Rebekah Lodge No. 120. The meeting was called to order by Noble Grand Katie Gooden. Instructions were given in the secret work. Assembly Vice President Mrs. Stella McClymont of Grand Rapids, supervising the work. Mancelona lodge entertained for the good of the order and a reading by P. A. Doyle.

The business meeting was held at the close of the afternoon session, Mrs. Mary Freske of Ionia, president of the district association, presiding. The next meeting will be held at Charlevoix following officers were elected for the coming year:

President, Sarah McDonald of Petoskey; vice president, Mrs. Updegrove of Central Lake; secretary, Ray Cattilbe Boyne City; treasurer, Blanch Smith of Charlevoix.

The silver loving cup was presented to Alba lodge for having the largest number of members present.—Mancelona Herald, May 5th.

JERSEY BREEDERS MET

At Ellsworth on Wednesday May 4th

The Antrim-Charlevoix Jersey Breeders Ass'n held the first meeting of the year at Ellsworth on the 4th with over thirty present. H. E. Dennison, Jersey fieldman, was present and gave a talk on matters pertaining to the Jersey breed. He said that they were growing faster in proportion of total numbers than any other dairy breed.

Plans were made for entering this year's state contest and for a large summer exhibit and show at Ellsworth in June. In the Ellsworth community alone over 100 head of purebreds are owned as compared with 20 head two years ago.

Elmer Murray of East Jordan, is secretary of the association and is anxious for all Jersey breeders not members to get in touch with him and join immediately.

Unique Record

Living in Lacoste, N. D., is a man whose father and he, together, have lived in the administration of every President of the United States. In 1791, when George Washington was in office, the father, John A. Rollins, was born. On September 3, 1827, there was born to John A. Rollins and his third wife a son, F. L. Rollins, the nineteenth child of his father. The son, now in his sixty-second year, is an assessor of the city of Lacoma.

PRIEST TELLS KIWANIANS OF BOYHOOD'S PROBLEMS

Director of Escanaba Hockey League Urges More Games and Athletic Sports

Men go wrong because they choose the wrong rather than the right; boys go wrong not from choice but because their energies and imagine tions have not been properly directed, the Rev. Fr. Raymond Bergeron, of St. Patrick's Church, told members of the Escanaba, Mich., Kiwanis Club, recently. Speaking on "Boyhood and Its Problems," Father Bergeron urged the Kiwanians to take a more active interest in athletics, particularly the recreations of the boys of the community.

"Keep the boys busy with out-of-doors sports and games," he said

"Develope the spirit of competition in them through play, let them breathe in the fresh air and develope healthy appetites and a demand for plenty of sleep and you won't have to worry unduly about the men of tomorrow," Father Bergeron declared.

Father Bergeron is director of the Juvenile Hockey League of Escanaba and he explained the aims of this organization to the assembled business men.

GIRLS ACCLAIMED CITY CHAMPIONS

Feminine Debaters Defeat Men From Other High Schools

The all-girl debating team of St. Theresa's high school, Detroit, was recently acclaimed champion of the debating teams of the high schools of the city in a forensic marathon sponsored by the Michigan High School Debating League and the University of Michigan, and embracing 233 high school teams.

St. Theresa's team achieved its distinction by winning four successive debates by unanimous decisions, and is the first in the state elimination series by a vote of two to one.

Northwestern, Central and Eastern high schools, all of Detroit, have fallen before the girl orators of St. Theresa's team, in addition to the high schools of Grosse Ile, Saline, Dundee.

The debaters are the Misses Dorothy Breder, Darlye Yates and Catherine Burns. A bronze cup will be awarded the winner of the state tournament by the University of Michigan.

Trees and Lightning

There is no foundation in fact for the statement that the locust tree or any other tree will attract lightning. The attraction of trees for lightning depends on the lightning zone that the tree may be in and the elevation.

In the Cause of Medicine

The Medical Insurance society of England has created a plan whereby students who have not sufficient means to buy a medical practice may now do it through a system of loans. The plan is considered a great aid to medicine.

COUNTY ACHIEVEMENT DAY HELD

The boys and girls winter club program was brought to a highly successful close on May 2-6, when the various clubs in the county held their Achievement Days.

A. G. Kettunen, state club leader and Miss Ruth Fosberrly, assistant state leader, in cooperation with County Agent Mellencamp, visited all the clubs and judged the exhibits. Following the program the local champions were selected.

These local champions are honored by being eligible to attend the state camp at Gaylord as a representative of their club and to enter the elimination trials for the purpose of competing for Northern Michigan championship, which takes a trip to the State Fair at Detroit.

We are proud to announce of the fifteen clubs that started with a membership of slightly over 100, that 12 finished over 100 per cent, that is,each member that started completed the years requirements creditably.

Much credit for this wonderful showing must be given to the leaders of the clubs who have donated their time, energy and efforts free gratis to the service of the county, the boys and girls along life's pathway.

Summer Resident Passes

William G. Caldwell, who with Mrs Caldwell spent many summer seasons in Charlevoix, passed away a few days ago at his home in Cincinnati, Ohio.

During the summer months it was Mr. Caldwell's invariable practice to remain in Charlevoix, and for this purpose maintained a cottage on the grounds of the Belvedere Club, where, notwithstanding his advanced years, he was a most active participant with its members young and also in an unusual degree with Charlevoix residents with whom he had an extensive acquaintance, all of whom feel a sense of personal loss at his passing.

JOSEPH A. MAGNUS DIES SUDDENLY IN CAR

Wednesday, May 4th—On Way to His Summer Home at Odin, Mich.

Joseph A. Magnus, prominent throughout this region, died suddenly in his automobile near Lima, Ohio, Wednesday afternoon, May 4th, while on his way to his summer home at Odin.

Mr. Magnus held heavy financial interests in Petoskey, stockholder in the Petoskey Cement Co. and vice president of that corporation, also interested in and vice president of the McCabe Hardware company, owner of the Magnus block one of the finest business blocks in Petoskey, and other properties.

Magnus state park, one of the finest in this region, was one of Mr. Magnus' donations to the public. He was about seventy years of age and is survived by Mrs. Magnus and 4 children two of whom reside in California and two in Cincinnati.

See Little of Reality

How little do they see what really is, who frame their hasty judgment upon that which seems.—Southey.

YOUNG WOMEN MAY KEEP WELL

By Taking Lydia E. Pinkham's Vegetable Compound Here is Proof

St. Paul, Minn.—"Here is a little advice I would like to have you put in the papers." Mrs. Jack Lorbetter of 704 Dellwood Place wrote to the Lydia E. Pinkham Medicine Company. "If young women want to keep their health and strength for the next thirty years of their lives, it is best to start in right now and take Lydia E. Pinkham's Vegetable Compound. I have tried the Compound myself and received fine results from its use." In describing her condition before taking the Compound, she writes, "I was afraid in my own house in broad daylight; I used to lock the doors and pull down the shades so that nobody could see me." One day a booklet advertising the Vegetable Compound was left on her porch and she read it through. In so doing, she found a letter from a woman whose condition was similar to her own. "I bought Lydia E. Pinkham's Vegetable Compound," Mrs. Lorbetter continued, "and have had fine results. My condition made me a burden to my husband. Now I ask him, "How is housekeeping?" and he says, "It is just like being in Heaven!" Are you on the Sunlit Road to Better Health?

Takes Out all pain instantly

CORNS

Dr. Scholl's Zino-pads stop all pain quicker. The use of vaccination method. Takes but a minute to quiet the worst corn. Healing starts at once. When the corn is gone it never comes back. If new shoes make the spot "touchy" again, a Zino-pad stops it instantly. That's because Zino-pads remove the cause—pressure and rubbing of shoes.

Dr. Scholl's Zino-pads are medicated, antiseptic, protective. At all druggist's and shoe dealer's—35c.

Dr Scholl's Zino-pads

Put one on—the pain is gone!

"A God-sent Blessing"

Vaccination for Control of Roup

Scientific Study Made of One of Most Serious Diseases of Fowls.

(Prepared by the United States Department of Agriculture.)

A scientific study of roup in poultry, one of the most serious fowl diseases, supports the conclusion that proper vaccination is one of the most effective means for reducing this source of loss.

The study was conducted by Dr. George W. Stiles and Dr. Hubert Bunyea, both of the bureau of animal industry, United States Department of Agriculture. In a recent scientific paper, "Vaccination and Medication for Control of Roup," Doctor Bunyea reports the following conclusions, based on experiments:

Young Birds Susceptible.

Birds about one year old appear to be more susceptible to roup than those two years old or older under the same conditions.

The use of antiseptics in the drinking water (permanganate of potash, and bichloride of mercury in particular) does not appear to have any appreciable curative virtue and very little preventive property.

The local external application of solutions of mercuric chloride or silver nitrate is not very effective in the prevention or treatment of roup.

Prevention of Disease.

Bacterins prepared from the bacteria involved in outbreaks of roup appear to be effective in the prevention of the disease as well as the treatment of incipient cases, even under unfavorable climatic conditions. Two kinds of bacterins have proved effective, one made from bacteria occurring in a single outbreak and one from infections in a number of outbreaks.

The progress of roup is appreciably influenced by secondary invasion of mouthing bacteria which develop in addition to the chief virus that causes the disease. The use of vaccination in treating a considerable number of poultry flocks with roup gave very encouraging results.

Wheat Protein Content of Greater Importance

Protein content has become of increasing importance in determining the price paid for any particular lot of wheat. On occasions when the supply of high protein wheat has been less than the demand, premiums of as much as a cent have been paid for each added tenth of one per cent of protein over a given basic amount.

Protein tests by different chemists often do not agree within one point of one per cent even when the ability and conscientiousness of the chemist are beyond question, which the result that numerous complaints are heard regarding the marking of protein tests on wheat.

To determine how close different laboratories should be able to report protein results on the same samples of wheat as well as to explain why these variations occur, was the object of investigations reported in Department of Agriculture Bulletin No. 1020-D, "Testing Wheat for Protein with a Recommended Method for Making the Test."

The sources of error which occur in making protein tests have been carefully studied and as a result a standard procedure is recommended to eliminate these errors. Suggestions are given also regarding how close independent laboratories should agree when making protein tests.

A copy of the bulletin may be obtained by writing the United States Department of Agriculture, Washington, D. C.

Iron Fed to Pigs

One of the newest advances in live stock feeding at Iowa college is the feeding of iron to pigs. This has been fed in the form of nails to full fattening pigs and to spring gilts that are to be kept over. It has been found that the iron causes the pigs to make more rapid gains at lower costs. The experimenters called attention to the fact that iron is one of the important constituents of the red color in blood which is associated with vigor and vitality.

Agricultural Facts

Test your seed—don't guess.

A test in time may save a bushel in nine. Test your seed corn.

The best way to economize in man and horse labor is to keep them busy.

Lime is required as a plant food by all crops. Some crops require more than others.

Plants, like animals, must be well fed if they are to pay for the labor and cost of growing them.

Lime promotes the decay of vegetable matter in the soil and thus aids in the formation of humus.

Competition may be the life of trade, but cooperation will certainly add vigor to the life of farming.

Lime, by worsening the acid soil, favors the growth of most legumes, such as clover, alfalfa, and peas.

Potatoes, whether for seed or eating purposes, should be stored at temperatures of not more than 40 degrees Fahrenheit.

Keep after the weeds, as this is very important, especially when the vegetable and flower plants are young. Cultivate often and good.

Remember when we used to think that alfalfa wasn't a safe feed for horses—but it calmed heaves and overworked the kidneys? The idea has been utterly well exploded.

Wearing Each Other's Shoes

Left to right are shown Rogers Hornsby and Frank Frisch, who figured in the biggest single deal in baseball in many seasons when they were traded, Frisch, for several years star second baseman of the Giants, was shipped to St. Louis in exchange for Hornsby, batting leader and manager of the world champions. They met for the first time when their teams clashed in an exhibition game.

Plan Outlined to Raise Money for Old Players

Joe Gardner, who operated the Dallas club in years gone by, is just like any other old-timer. He never loses his interest in baseball. The recent efforts of the Professional Players' association to gain financial support for operating their charity toward old players and present-day players who are ill or down and out, has set Gardner to thinking. He believes the money could be raised in easy fashion this way: Take 5 per cent out of each league's share in the world series; 7 per cent out of all sales and drafts of players from class AA; 2 per cent out of all sales and drafts of players from class A; 1 per cent of the some from class B, letting the smaller leagues alone. He would then organize a supervising board of directors including the heads of the two majors and President Sexton of the national association, and let them handle the money

Job for Oldfield

Barney Oldfield, for many years a colorful figure of the automobile racing game, has joined many other sports leaders in cashing in on his talents and speed renown through the movies.

Oldfield has signed a contract to act as technical adviser and coach to Harold "Red" Grange, professional football player, who is to be starred in an automobile racing picture.

Sport Notes

Robin Reil, Erie, Pa., has been elected captain of the 1928 Ohio State university basket ball team.

• • •

LeRoy I. LeCrone, '28, guard for two years on the University of Oklahoma basket ball squad, has been elected captain of the 1928 team.

• • •

The visit of the Fresno (Calif.) Japanese club to the Orient will be the first time a Japanese team has ever invaded Japan on a baseball tour.

• • •

Richard F. Vaughn, '28, of Newton Center, Mass., has been elected captain of the Yale university hockey team for next season.

• • •

John Newton Barbee of Chicago has been elected captain of the Harvard basket-ball team for next year. Barbee also is a first string pitcher on the baseball team.

• • •

Coach "Welt" Chrystie, who was elected as head field coach of the 1924 American Olympic track team, is now entering his twenty-sixth year of coaching at the University of California.

• • •

The University of Minnesota is planning to follow the lead of Iowa and Michigan in awarding varsity letters to all athletes who represented the university in major sports previous to 1900.

• • •

Charles Squires of Shanghai, China, has been elected captain of the Princeton university soccer team. Squires played on the team for three years and last season was named for the all-collegiate eleven.

• • •

John P. Chase, '28, of Milton, Mass., has been elected captain of the Harvard university hockey team for next season.

• • •

Tech Robby Jones and Virginia Van Wie, golf luminaries, entered their first important tournament at the age of fourteen—and both won.

• • •

Joseph S. Rennard, '28, of New York city, has been elected captain of the Princeton university hockey team. Rennard played on last season's football and lacrosse teams.

BASEBALL SQUIBS

Babe Ruth has taken part in more world series than any other player in the game.

• • •

The famous old Baltimore Orioles are credited with the invention of the hit-and-run play.

• • •

Babe Ruth has played on baseball teams in Baltimore, Providence, Boston and New York.

• • •

California has a Japanese Baseball league, which is the first of its kind and has met with huge success.

• • •

Clay on training diamonds takes solace in the Southern sun there is some talk of instituting a two-point baseball suit.

• • •

Back in 1881, George Gore of the New York Giants batted seven bases in a game, a record which has never been equaled in the big leagues.

• • •

Portland, Ore., has two pitchers on its roster who disdain almost a quarter of a ton between them—Toulin, 228 pounds, and Rhiney, 214 pounds.

• • •

Another popular baseball diamond in some sections of the republic Sunny South is the first ripe type, featuring a round raised bump in the center.—Bugs.

• • •

Joe Kelly, southpaw outfielder, was the first of the Georgia Nationals to feel the ax. He was released to the Toledo club of the American Association.

• • •

During the 1917 season Harry Krause pitched 58 games for the Oakland club in the Pacific Coast league. He earned run average being 2.06 per game.

• • •

In a game against the Giants of 1896 with Amos Rusie pitching, the Baltimore Orioles hit down six safe hunks in one inning, scoring six runs and winning the game.

• • •

Ernest C. Quigley calls 'em as he sees 'em in the National league during the summer and in the fall and winter keeps busy officiating at football and basket ball contests.

• • •

Babe Ruth's pilgrimage to Hollywood has brought the question into discussion whether he has a screen face. It is conceded freely by both sides that Mr. Ruth has a face.

• • •

Fred Frankhouse, Buffalo pitcher, is not only an effective hurler, but he is a hard and confident hitter as well. Joe Mathes will have a real pinch hitting threat this year in Frankhouse.

• • •

It is estimated that restricting Mr. Ruth's salary to a figure under that of the President of the United States robbed 2,500 bond-wagging public utterances already in course of preparation.

• • •

"Baseball scandals have not affected the demand for tickets to opening games—" item. This will cheer up many sport writers who could think of no way to describe them but as "crooked pastimes."

• • •

Among the highest-priced men in baseball are Babe Ruth, who receives a salary of $70,000 a year, followed by John McGraw, $65,000; Judge Landis, $65,000; Ty Cobb, $40,000; Tris Speaker, $40,000, and Rogers Hornsby, $40,000.

• • •

In addition to eight new managers in both the American and National leagues since the close of the 1923 baseball season, there have been deals, trades and sales, involving 33 players, some of whom rank among the game's elite.

• • •

"Baseball kills its fattest calves for the prodigals," says a sport writer, commenting on the salary boosts given participants in the winter's investigations. There haven't been any really fatted calves in baseball since Charley Hickman's.

• • •

With the players back in the center of the limelight, there is nothing really left for Landis but to find a new cluster and swim in.

• • •

Al Demaree says umpires have their weaknesses the same as players. "The Hornets were the worst fussers," he explains, "but on them reserves."

• • •

Connie Mack's team this season will be different. For some years when Mr. Mack has called "Come on, boys," the response has been "Go on, boys."

DEVELOP NATURAL STYLE IN RUNNING

Boy Should Strive Only to Please Himself.

How many boys have known they had the making of a runner in them? And, how many boys have given up discouraged, because their friends laughed at their decidedly less fancy get-like style?

Such boys may derive comfort and encouragement to go on from an article by Dean Cromwell, University of Southern California track coach and developer of Charlie Paddock, Ted Hamer and other famous stars, in the American Boy Magazine.

Coach Cromwell makes short work of those persons who argue that there is only one perfect style for any given track event, and who would have the youngster spend all his time trying to conform to their preconceived ideas of the proper angle at which to hold the arm or the head. He merely points to his protege, Charlie Paddock, "the world's fastest human," and says:

"If style counts how do you account for him? Paddock runs with a totally bent style. On the track he looks positively awkward, but I never undertake to change him and now he is the greatest sprinter of all time."

All of which proves, according to Mr. Cromwell, that a boy should strive only to develop a style that suits him—one that comes naturally to him.

Another point made by the Southern California coach in the American Boy Magazine article is the necessity for specialization in track competition. He says:

"Specialization holds good in track as it does in business or the professions. The lawyer who tries to sell insurance and run a collection agency on the side has a hard time winning out against the fellow who lits all his attention solely on the law. In those competitive days the jack-of-all-trades is generally out of luck.

"Choose your event and study it. That's fundamental. The pace or field event you select will depend upon your natural physical endowment. If you have endurance, pick a distance run. If you have speed, try the sprints. If you have both—select a middle distance.

"If you are long legged and loose-jointed you can run the hurdles after you have developed form and speed, but unless a boy is of the big, long-legged type, supple and limber, he will waste his time training for the high and low hurdles."

When Rod Houser was in high school at Oxnard, Calif., he was the height star in nearly every event on the program. In the intercollegiate meets, he heaved the shot and discus, threw the javelin, ran the high and low hurdles and competed in the high jump. But when a baseball star, too—After he joined the Southern California squad I urged him to drop javelin throwing. Tossing the spear simply doesn't mix with the shot and discus events. Nor does baseball, which Houser subsequently took up. Getting the shot away is a "push" while baseball requires an overhand "throw," and the two are antagonistic.

"Houser gave up running the hurdles, abandoned high jumping, put javelin throwing in the discard, and began to specialize in the events in which he could become a champion. Result: He became the outstanding shot putter and discus thrower of the world in 1924."

On the question of training Coach Cromwell says: "To my mind, there's more real danger of 'burning out' a track athlete's enthusiasm by reason of a too strenuous track program than there is of weakening his physically.

"Too much competition or a too rigorous training program may be real physically—it usually is—but it's more ruinous in its effect on the boy at his form he shouldn't spread himself all over the map," competing in half a dozen events, one should be at it top speed every afternoon in his training period, nor finally should he compete in too many races.

"If the potential college star over-competes in high school he'll have no resiliency when he's twenty-two and a senior—but when the coach and university are guarding on him for big things in the intercollegiate meets.

"Paddock conserved his enthusiasm and his strength. At President Hill's behest he took a rest when he was a junior in the 100 and 220-yard dashes. Sometimes he loitered up the relay team by running a lap of 220-yards, but in this case he outlived the 220-yard dash from his afternoon's program.

Money for Fighter

Photo shown Eddie Anderson, featherweight boxer, who although but a preliminary boy, is rated as earning $52,000 a year from his ring activities. Anderson took part in 52 fights during the past year, usually at the summer rinks, and his earnings average a thousand dollars for each fight.

Hebrews Are Out

There is not one Hebrew holding a title in boxing in the United States at the present time. Among the famous title holders in their times were Battling Levinsky, Ted Lewis, Benny Leonard, Matt Wells, Abe Attell, Sidly Smith, Kid Kaplan, Al McCoy and Charley (Phil) Rosenberg. Among the popular Jewish boxers were Joe Choynski, Joe Bernstein, Charley White, Lew Tendler, Joe Burman, Joe Benjamin, Abe Attell Goldstein, Sid Terris and Leach Cross.

Warming the Ocean

The Georgian inland watering place Westerland has now been connected with the mainland by railroad. The cars cross the marshes on a newly-erected dam. Westerland is very ambitious and expects to have a winter season as well as a summer season. When cold weather comes the bathing cabins are to be heated; also the covered ways leading to the water. And the water itself? That is the most remarkable part of the project. Some artificial electric "suns" are to be installed, making a winter dip in the sea practicable.

After the Ball

A dashing phrase of every artists' ball is the home going. In the cold gray dawn of the morning after, the variably it rains, and there is not a taxi in sight. Makeup and grease paint are running, parts of rented costumes are missing, wigs are lost, lovers are separated and husbands and wives are not speaking. Oh, what bliss, to mingle in gay, mad Bohemia!—Vanity Fair.

United States Banks

Up to and including October 31, 1928, there have been authorized to begin business 12,061 national banking associations, of which 4,918 were voluntarily closed to discontinue business or amalgamated with other banks, state or national, including those consolidated with other national banking associations under authority of the act of November 7, 1918.

Food's Value Proved

In the Canary Islands the staple food is gofeo, a meal made of wheat, rye and maize mixed. The fitness of the islanders proves the wonderful value of this mixed meal.

Uses for Vulcanite

Vulcanite, or ebonite, is a dark brown or black form of India rubber. Its hardness is due to the presence of more sulphur than soft rubber contains, and to the fact that it is "vulcanized" at a high temperature. It is used for the mouthpieces of pipes, for combs, for screw-stoppers in bottles, and largely as an insulator in electrical instruments.

OUR MARINE.

Is America going to yield its place as a commerce carrier on the high seas to Germany? This is a question which Americans may have to answer in the near future unless all principles made by shipping experts in this country and Europe go astray. The fact is that the new German merchant marine is up and coming and that of the United States is lagging still, so far as the construction of new merchant ships is concerned, at least.

The American merchant marine, true enough; is now about twice as large as that of Germany, but it is to be remembered that nearly half of the German ships have been built during the past five years, while our ships are older and less efficient. Transshipping men in this country believe that the American marine cannot long compete with the newer German shipping unless we decide upon a definite program for the maintenance and improvement of our merchant marine. With comparatively short time the German marine will have reached prewar strength, but it will have the big advantage over other marines in that it will be newer, faster, and fitted with all the latest equipment.

Shipping experts say that a merchant marine to remain efficient, must keep a replacement of seven per cent yearly. The records show that while the German marine is growing steadily, America is turning out tew if any ocean going vessels of its own.

Of course we have been somewhat handicapped by the lack of a definite policy. Fortunately this handicap bids fair soon to be done away with. The question of the merchant marine will be kept before the country until Congress convenes again and then we must have a definite program and maintenance and improvement of our merchant marine.

OUR HISTORIES

Occasionally we hear something about the inadequacy or unfairness of the text books on history in our public schools. At various times different criticisms are offered but the principal one is to the effect that the history of important events on which our government is founded, is not always stated emphatically enough to impress the youthful mind with admiration and enthusiasm so that these events become firmly fixed as essential factors in the formation of our country.

Immediately following the close of the war there was general criticism of our school histories. So sharp did this become that alterations were made in a great many histories to meet the popular demand. As a result, the criticism recently has not been so marked.

Doubtless the situation has improved some but it still behooves our patriotic citizens to keep an eye on the way history is written for our public schools. There has been a marked increase in the volume of the so-called "liberal" movement during the past few years, although this movement is really anything but liberal. The scions of the "liberal" cult, usually pacifists and internationalists, profess to believe that patriotism is one of date and that to worship one's flag is decidedly archiac. They realize that the best place to start the inculcation of the doctrine is with the young, and if some of the important patriotic events of our early history can be eliminated from or slighted in the school history books in the public schools their work will be much easier.

To the average person this point may seem trivial at first. But if you will think back on your own school life for a moment, remembering how your youthful soul was thrilled with the story of Paul Revere and Nathan Hale, of Bunker Hill and the earlier trials of Washington, Jackson and other heroes, you will come to realize how important a part these historical episodes had in forming your ideas of nationalism and patriotism.

Apparently the "liberals" are not having their own way. The patriotic people of America are keeping in touch with the situation and they are receiving aid and assistance from the organizations like the American Legion and the Daughters of the American Revolution.

CHINA AS AN EXAMPLE

Some time ago the British ambassador to the United States, Sir Esme Howard, suggested in an address here that an alliance between the United States and Great Britain, the two great English speaking nations of the world, would not assist in bettering relations between the two countries and the rest of the world.

Alanson B. Houghton, American ambassador to Great Britain, and one of the best diplomats America has produced in a long time, has approved of Sir Esme's segtments in an address in Manchester, England. In speaking of such an alliance Mr. Houghton said:

"The idea may be tempting; nevertheless I believe it to be wholly false. To bring the English-speaking peoples together into an armed and exclusive group, prepared if need be to enforce its collective will by force, would, if it were possible, tend neither to promote peace nor to assure our mutual security.

"Its only result would be to unite all the rest of the world against us. It would slowly perhaps, but very definitely, make an end of peaceful progress. It would turn this earth again into an armed camp; in the end, precisely what we sought to avoid would result."

The present situation in China is an example. America's principal interest in China is to protect the lives of our missionaries and other American citizens there. Great Britain is of course interested in protecting British lives. But the similarity ends there. Great Britain has important territorial rights and other valuable concessions in China which she desires to protect and to perpetuate. In these rights and concessions we have no material interest. The protection and maintenance of these rights may easily lead Great Britain into war with one of the Chinese governments. So long as we pursue our present policy in China there is no need of our engaging in any such war.

THE D. A. R.

The thirty-sixth continental congress of the Daughters of the American Revolution recently closed a very successful session in Washington. From a humble beginning the D. A. R. has grown to one of the most potent forces in the country for things American and patriotic. Its influence in the United States is steadily increasing, and in this era of pacifism, internationalism and 'pink' radicalism, this is one of the most encouraging signs for the future. The American estimate of the Daughters of the American Revolution is well summed up in the following words of President Coolidge in a letter to the convention:

"They stand for the Constitution and the flag. They believe in adequate military defense and represent the principles that have made this country free and prosperous. They are always on the alert to point out the difference between license and liberty, the destruction of our prosperity, and the promotion of human welfare. For all of this patriotic work they are entitled to the approbation of all loyal Americans.

EUROPEAN GOODS

In spite of our protective tariff law the chief danger continues to be to American industries the importation of cheaply made European goods according to representative Frank Crowther of New York. In part, he says:

"The bad spots in industry today are those that are handicapped be the importation of the cheaply produced European goods. We need a revision of the tariff laws right now and in spite of all the criticism that has been hurled at the Fordney-McCumber bill, the fact is that its schedules should be very largely be revised upward and not downward.

I am an old fashioned protectionists who believes no rate is too high that takes care of an American industry and insures high wages to its employes. I am for raising still higher the American standard of living for that great multitude of workers that go to their tasks in the shops and in the fields, and in order that these conditions may prevail we must not only have a protective tariff but we must consistently endeavor at all times, when purchasing necessities or luxuries, to buy the things that are made in the United States.

The Fordney-McCumber bill has been the greatest revenue provider that has ever been on the statute books. During 1926 it provided $615,000,000 at the custom houses. These added receipts to the Treasury have been an important factor in tax reduction."

Marrying Brother's Son's Widow Is Held Illegal

London.—A curious oversight in the law of England makes it illegal for a man to marry his brother's son's widow, though he can marry his brother's widow.

This was revealed in a ruling by Magistrate Clarke Hall after studying two "marriage prohibited" put before him. They were: "Can I marry the widow of my brother's son?" and "Can I marry my late wife's mother's sister?" The questions were asked by two men, each of whom desired to who was deeply in love with the woman in question. The magistrate ruled:

"These marriages are forbidden under the old law as set out in the tables at the end of the Book of Common Prayer. The prohibited degree of relationship has been modified comparatively recently by the acts of 1907 and 1921, whereby marriage is permitted with a deceased wife's sister and a deceased brother's widow. Apparently it never occurred to the legislature in passing these acts to extend them to what is a far more remote relationship, namely, a brother's son's wife."

The Saint in Politics

The president of the Young Men's Republican club of Chicago is named St. Peter. His given name doesn't count as far as this story is concerned.

He came to Indianapolis and put up at a hotel. An Indianapolis woman, much interested in the Republican party, called by phone at this hotel and asked:

"Is Mr. St. Peter there?"

"St. Peter has not come down yet," replied the hotel phone girl, not knowing she had made the "wisest crack" of the day from that exchange.—Indianapolis News.

We carry the Heath and Milligan Mfg. Co. line of Dependable paints. None better—"Best since 1851." The best is what we all want. Why not buy and use the standard quality on your job? Staley Bros. Hardware.

—and No Place to Go!

We find ourselves, almost without realizing it, a nation on wheels.

We drive or ride in more than 22,000,000 motor vehicles.

We pack the paved highways coming in and out of town. We over-run even so-called remote regions. And we are pounding to pieces all but permanent roads.

This year probably 3,000,000 new cars will be on the road. Compared to this increase, the mileage of new permanent roads will be insignificant.

We don't want to be a nation on wheels, with no place to go.

The answer is, build more, and where necessary, widen concrete roads and streets —and start building them now.

Not in a long time have general conditions been so favorable for carrying on such public works as permanent highway building.

Among the national capital's most popular hostess' in the diplomatic set is Senora Amelia L. de Alfaro, wife of the minister from Panama, who is shown in this new and especially posed portrait.

PRESS COMMENT

Sugaring our Pill—The United States will be officially rep esented at an international economic conference to May in Geneva by the League of Nations. The Geneva meeting has been preceded by a series of smaller economic conferences in London. European business leaders have met with the avowed principal object to protect Europe against American economic dominance.

The United States at Geneva may get a thorough education in European resentment against our preeminence and our prosperity. The United States has been suggested as the burden bearer of every "economic" plan for "world betterment" which we have seen come out of Europe.

We are either to remit Europe's debts or lower our tariff barriers so they can sell us more goods, or take down our immigration bars so they can send us their unemployed. The world is to be "bettered" at the expense of the American taxpayer, the American manufacturer and the American laborer. It will be interesting to watch them sugar the pill at the Geneva conference.—Seattle Post.

Birds and Farmers—When an Essex farmer complained that the pheasants were eating his corn the game department billed two of the birds examined their crops and found 200 corn worms and no corn. Almost without exception when the scientists investigate such cases they find the same results.

The farmer owes his crop to the feathered pets that keep down the bugs, insects and worms. With continuing killing of every form of bird life, the insect ions will be heavier and farm labor harder. The nation could train an army of riflemen in a comparatively short time but it could not in a century restore the bird armies that are the farmers' allies in raising food to feed the country.—Alliston Herald.

Marital Happiness

We don't say, necessarily, that we speak from actual experience but our idea of happy marriage would be one where the wife never said, or even blurted for that matter, when her thoughtful husband had given her a present, that she'd rather have had something else.—Hide Skute Journal.

Thousand Miles to Spawn

To think of traveling 1,000 miles to lay an egg! Many of the salmon salmon, says Nature Magazine, in order to spawn in the rivers of the Riverboth mountains of Idaho travel 1,000 miles from the sea.

NOTICE OF HEARING.

To the owners of all lots, parts of lots, lands and premises abutting on either side of that part of Garfield avenue, City of Charlevoix, lying between Bridge street and State street, and all other persons interested: TAKE NOTICE, that the petition of Robert Dickie and others being owners of a majority of the lands abutting on either side of that part of west Garfield avenue City of Charlevoix, Michigan, lying between Bridge street and State street, has been filed with the undersigned and duly presented to the Common Council of said city, and that Monday the 16th day of May, 1927, at eight o'clock in the afternoon has been fixed by the said Council as the time when it would meet in the Council room in said city for the purpose of hearing objections and suggestions relative to the construction of said sewer, at which time and place all persons interested in such construction may be heard. And further, that the plans, maps, diagrams and specifications for such sewer together with an estimate of the cost thereof, are on file in my office.

Dated, April 26th. 1927.

RAY S. HAMILTON,
City Clerk.
By D. S. PAYTON,
Deputy.

Dependable Paints manufactured by Heath and Milligan Mfg. Co. "Best since 1851." We carry this line of high grade paint and will be pleased to show you color lines and supply your needs. Staley Bros. Hardware.

THE THEATRE

Slide, Kelly, Slide—The World Series, America's baseball classic, has been utilized as the background for a motion picture. This is "Slide, Kelly, Slide," which comes Tuesday and Wednesday to the Palace theatre, with Haines as the redoubtable Kelly, Sarah O'Neil, Harry Carey, Dorothy Sebastian, Karl Dane, and a famous cast augmented by the best known professional ball players in the country; such men as Bob Meusel, Tony Lazzari, and other heroes of the New York Yankees, Mike Donlin and others.

Haines plays a "busher" who becomes a World Series hero in the story with Harry Cary as the veteran catcher of the team whose tutelage develops the recruit. Miss O'Neill furnishes the love interest as the catcher's daughter.

Earl Dane plays an elongated pitcher, and the team is made up of the famous professionals, many of whom are seen in actual plays in the scenes taken at the world series itself.

Mike Donlin, famous batter of the Giants, acted as coach and general baseball expert for the big production.

Two Many Crooks—George Bancroft simply can't wood being a gunman. As Bert the Boxman, in Paramount's "Two Many Crooks," which arrives at the Rex theatre on Thursday with Mildred Davis, Lloyd Hughes, El Brendel and Bancroft co-featured,—George hangs up a record by having appeared in seven consecutive pictures as an expert crackshot.

BEAVER ISLAND

L'Post of Petoskey, spent several days here on business recently.

J. Hoffman of Petoskey, paid our business men a visit last week.

Fr. Arnold of Harbor Springs, made a visit to Garden and High Island last week.

John Grill and daughter, visitors in Grand Rapids for several days, returned last Monday.

I. L. Pailthorp, attorney of Petoskey, spent some time here on professional business last week.

Clarence Bissell was in Petoskey on last week to see Mrs. Bissell who is a patient in the hospital.

Mrs. Myrtle Bradley, daughter Grace and son Jeck, are visiting their aunt Mrs. Susan Bonner.

Mr. and Mrs. Garret Cole of Nomadspent the week end with St. James friends.

Mr. and Mrs John Cross of Charlevoix and several friends were visitors over the week end at St. James.

Due to high wind we missed our mail Tuesday due to the non-arrival of our mail boat; the ship remaining in port on account of heavy weather.

F. J. Thomas of Walloon Lake, with a party of friends, spent several days at St. James.

Peter Neilson of Charlevoix who operates a fishing outfit near Garden Island, came over from Charlevoix last Monday.

W. S. Darling of Harbor Springs, spent several days here recently in connection with his duties as deputy collector of internal revenue.

Wasted Resolutions

To be always harmless, to live a new life but never to find time to set about it; this is as if a man should a pan of water, and dabbling, and dawdling, from one day and night to another until he is starved and destroyed.—Tillotson.

Biggest New Englander Jailed, Perils Supplies

Providence, R. I.—Nick Tartaglione, the biggest man in New England, who tips the scales at 518 pounds, was sentenced to seven months in jail and fined $100 and costs in Superior court here for violating the prohibition law. His attorney warned the court that the state would have to pass a special bone structure to feed the man in jail.

"Big Nick" traveled with a circus and gave public demonstrations on the stage of his enormous food capacity. A "fair meal," in his view, was five pounds of spaghetti, two chickens, four lobsters, a loaf of bread and a gallon of wine. He is the father of 17 children.

WANT COLUMN

LOST—Elk emblem locket. Initials on outside; picture inside. Liberal reward for return of same to the Sentinel office.

FOUND—A hockey. Inquire of Grover Gemeit. Tel 197.

FOR SALE—Six room house on Antrim street. No. 404. Enquire of F. S. Myers. tf

FOR SALE—Large size Victrola, practically new. Peter Neilson, 405 Dixon Ave.

FOR SALE CHEAP—Ten acres of land inside city limits. Charlevoix State Savings Bank. 30-tf.

FOR SALE—Cottage very desirably located on Petoskey avenue. Parties interested in a Charlevoix cottage should investigate this offer as an attractive price will be made on this property. Address F. A., care Sentinel, Charlevoix.

Handicap

A reputation for truthfulness must be a terrible handicap to Bubing.—Buffalo Evening News.

Built Up by Thought

Enoch is building his own world. We both build from within and we attract from without. Thought is the force with which we build for thoughts are forces.

MICHIGAN SISTERS MAY GO TO CHINA

Volunteers Asked to Establish Hospital in Wu Chang; Over 150 Accept Call

The Sisters of Charity of Mt. St. Joseph, Cincinnati, O., who operate St. Joseph's Hospital and Sanitarium at Mt. Clemens and conduct parochial schools in Detroit, Bay City, Alpena, Lansing and Jackson, will send a mission band to Wu Chang, China, in September for the purpose of establishing a hospital there, it was announced recently.

Volunteers for Chinese service already number over 100, it is said, and from this number six or more will be chosen to make the trip. This is the first time that the "Flying Cop" or Amerian Sisters of Charity have entered into the foreign mission field.

ESTABLISHES NEGRO CATHOLIC PARISH

St. Benedict the Moor parish, the second Roman Catholic parish in Detroit to be established especially for Negro worship, will be opened soon, The Rev. Fr. Norman A. Duchette, one of four Negro priests in the United States, will be pastor.

Father Duchette is the first Negro to be ordained priest in the Detroit diocese. He was born in Washington, D. C., and came to Detroit 18 years ago. His theological studies were done in St. Paul, Minnesota and he was ordained in 1926 by the Rt. Rev. Joseph C. Plagens, D. D., auxiliary bishop of Detroit.

IONIA PRIEST GETS NEW POST

The Rev. Fr. Hugh D. McCarthy, formerly of Ionia, was recently appointed pastor of St. Leo's church, Detroit, by the Rt. Rev. Michael J. Gallagher, D. D., Bishop of Detroit. Father McCarthy has occupied the Ionia parish since 1924. He was ordained in 1898 by the late Bishop John S. Foley, having been educated at St. Francis' Seminary, Milwaukee. He was born in Lenox, Mich., in 1870.

The ninth anniversary of the death of the Rt. Rev. John Foley, D. D., former Bishop of Detroit, was commemorated with a solemn high mass of requiem in St. Peter and Paul's cathedral, Detroit, by the present Bishop, the Rt. Rev. Michael J. Gallagher. Appropriate ceremonies at cations of children from the parochial schools of the city attended the Mass and offered their Holy Communions for the repose of Bishop Foley's soul. Bishop Foley died Jan. 5, 1918.

We carry the Heath and Milligan Mfg. Co. line of dependable paints. None better—"Best since 1851." The best is what we all want. Why not buy and use the standard quality on your job? Staley Bros. Hardware.

MICHIGAN BELL TELEPHONE CO.

Long Distance Is An Aid
To Albion College

ALBION COLLEGE
ALBION, MICHIGAN

March 15, 1927.

Mr. Hugh Faraday, President
Michigan Bell Telephone Company
Detroit, Michigan

My dear Mr. Faraday:

Please permit us to compliment and thank you for the splendid service we are receiving from your Albion office, especially as we are long distance users.

During our recent building operations was the Bonnie Brae Hall, our dormitory for women, was destroyed by fire. Long distance telephone conversations about time was saved and so found it temporarily cheaper and more effective to employ rather than to write or telegraph.

During all the time the new building was under way Albion College was fortunate in having with you have met the needs of Albion College and its students.

Very truly yours,
John L. Slaton
President.

We are glad to bear witness to the speed and efficiency with which you have met the needs of Albion college and its students.

Carib Gold

By ELLERY H. CLARK

Time was when Ellery H. Clark was famous as all-around athletic champion of America. He was a double winner at Olympic Games. For twenty-five years he was distinguished on track and field, winning prizes in thirty different lines of competition, from the ten-yard dash to the discus throw. And now he writes a boiradg story, racing away from the first word in a straight, swift dash and closing with a leap of burning speed. He does it in the calm, convincing manner of a champion, always master of himself and his material.

Read the Story as a Serial in Charlevoix Sentinel

New Palace Theatre

ATTRACTIONS FOR THE WEEK

Saturday and Sunday

Lon Chaney in "Mr. Wu" with Louise Dresser and Renee Aldoro. "Mr. Wu" is one of the most weird mystery stories ever written. As a dramatic production Walker Whiteside played it a short time ago with great success throughout the country. It is an ideal part for Chaney and only Chaney could handle it. In his portrayal of the old Chinese Mandarin in this wonderful mystery story Chaney in our estimation even exceeds his marvelous performances of the past. Also a Fox comedy, "A-1 Society."

Tuesday and Wednesday

A special, "Slide, Kelly, Slide," with William Haines, Sally O'Neil and Harry Carey. You'll just stand up and yell at the greatest baseball climax the screen has ever witnessed. Just one of a thousand laughs and punches in this mile-a-minute fun-fest. William Haines even better than in "Brown of Harvard." As the rookie who found baseball triumphs easy compared with the ways of a girl. With real big league players and actual scenes from big games. Also Hodge Podge and Nox News. Note—The same picture packed the Embassy theatre, New York at $2.20 admission. Special prices: Adults 40c, children 20c.

Thursday Only

Mildred Davies and Lloyd Hughs in "Too Many Crooks." Too many crooks are dangerous. Give 'em a finger they'll take a hand. Give 'em a giggle, they'll take every laugh you have. So watch out! Also a comedy, 'Dodging Trouble."

Coming—Clara Bow in "It."
Coming—Lillian Gish in "The Scarlet Letter."
Coming—"The Fire Brigade."

Third Year as Crucial Test of Married Life

The presiding judge of the Domestic Relations court in New York recently summed up his experiences in an epigram to the effect that "the first year of married life is the hardest."

His conclusion is challenged by Eleanor Blake, writing in the Woman's Home Companion, who declares that "the dreadful third year" is the crucial test of married life.

"I see nothing in all this talk about the trials of the first year of marriage," she says, "save a conspiracy on the part of the brides to call attention to themselves. In general, this first year is a year of delicious adventure.

"With the beginning of the second year a milestone has been passed. Somehow she and John are really married, and she has settled down into a happy routine of getting meals, keeping the house bright and fresh, and perhaps of preparing for another small life that is coming.

Then the third year creeps on her unlucky head she knows it. The baby is there, a baby who is healthy and lumpy as only the most sensible of mothers, following a wise routine, can make him. He is the nicest sort of baby to have around the house, but that is just one of the reasons why his mother is apt to wake up some morning with the dreadful realization that another scheduled day of activity is before her—a day of meal planning and meal preparation, baths, naps, an airing with Junior, another meal, nursering, rest and another meal."

It is the "fated round of routine" which Miss Blake finds the most serious crisis in married life, and for which she proposes as remedy an experiment with schedules designed to simplify routine.

The wise old judge, it appears, reached his conclusions mainly from experiments with marital shipwrecks, while Miss Blake is discussing the much more important classification of normal marriages.

Pilgrim Strayed From Path of Righteousness

John Billington was one of the Pilgrims Fathers. He led a tumultuous life, made numerous enemies and distinguished himself by being the first person hanged in Plymouth colony. The day of his execution was one of triumph for the righteous. There had been a great deal of controversy as to whether Billington's life should be taken, whether in fact the colony had legal right to hang him; but in the end the question was decided by expediency.

He was one of the signers of the compact on board the Mayflower, that document which has so often been the theme of orators. His family were public figures from the beginning of the colony, and this man's death at the hands of his fellow citizens was a turning point in the life of the settlement. Yet the inquiring reader will search far in school histories for any inkling that such an individual ever existed.

Textbooks for the new generation generally paint the Pilgrims as God fearing, heroic people, who came to these shores so that they might worship the Deity in their own way. They are credited with courage, perseverance, democratic ideas, devotion to duty. But if one digs into the early records of Plymouth for the story of John Billington he will find that not all the Mayflower voyagers were lovely folk. There was conflict among them, and casteliines, and doctrinal division. Discord had arisen on the ship long before land was sighted.

Billington was hanged in Plymouth on September 30, 1630, ten years after the arrival of the 102 colonists on Provincetown. He had waylaid a young man named John Newcomin, quarreled with whom he had quarreled, and shot him. Newcomin had interfered with his hunting deer. The defendant was arraigned before both grand and petit juries and was found guilty of wilful murder, "by plaine and notorious evidence."—John N. Beffel in McNaught's Monthly.

PERSONALS

Theodore Loekhoff of Bellaire, was in the city Tuesday.

Charles Cleveland of Bellaire, was a visitor here last Monday.

Mr. and Mrs. W. P. Porter, of East Jordan, were visitors in Charlevoix last Friday.

Mr. and Mrs. James Whitley, of Muskegon, are visiting relatives here for a short time.

Mrs. Wm. G. King, of Detroit, visited her aunt, Mrs. R. N. Faulkner a few days this week.

The W.C.T.U. meets at 2:30 p.m. Friday with Mrs. Amos Webster, at 1028 May street.

Mrs. Joseph Whitford of Detroit, is visiting her sister-in-law, Mrs. Etta Simineau, for some days.

The Womans' Guild of the Episcopal church will meet with Mrs. E. J. Edwards, Wednesday May 18th.

W. S. Darling, deputy collector of internal revenue for this district was a visitor in Charlevoix Wednesday.

Mr. and Mrs. Eugene DeVincent and Mrs. H. G. Kitchen, of Rogers City, visited friends here last Thursday.

Norman Shanahan is home from his work in the southern part of the state to celebrate Decoration Day evening.

Frank O'Donnell, a visitor in Rogers City for some time, spent Thursday in Charlevoix, later continuing to his home at St. James.

Mrs. J. W. Harris, for the past ten days a Charlevoix visitor, returned to her home—Oak Park, Illinois, Wednesday afternoon.

Mrs. William Graffing King, of Detroit, was a guest of her aunt, Mrs. R. N. Faulkner and family, for one or two days this week.

Mrs. Freemont E Woodruff with her daughter, Mrs. Crouse arrived in the city on Friday, returning to their home in Detroit Saturday.

Mr. Olaf Nordrum is a business visitor at St. James for two or three days this week. The trip to St. James was made Wednesday on the S. S. James E. Safford.

Archie C. Belding, County Commissioner of Schools, is spending the major part of this week on Beaver Island in connection with his official duties.

Joe Babcock, of Detroit, who usually spends the summer months at John Fisk Lodge, on Intermediate Lake, in Antrim county, was a Charlevoix visitor Tuesday.

James B. Parsons made the trip to St. James Wednesday, where he will spend a few days in the interest of the Agricultural Life Insurance Co. as their territorial representative.

Elk Rapids citizens are making preparatory arrangements for an old fashioned 4th of July celebration this year —something they have not attempted to do for several years past.

Mr. and Mrs. Harrison Bedford, visitors for two weeks in Grand Rapids, returned to Charlevoix last Monday afternoon. The trip was made the popular way, viz: the auto route.

Mr. and Mrs. George W. Priest are on their way from Florida, where they spent the winter. They are in Detroit at present and expect to arrive in Charlevoix "very soon," according to a communication from George.

Miss Mable Turpin returned to the city Tuesday morning after spending her two weeks vacation in various parts of lower Michigan. She attended the Architects' Annual May Party at Ann Arbor May 6th as the guest of Charles Dagwell.

Merkle and Davy will open their new place of amusement consisting, of archery, bowling, etc., Saturday of this week in the room recently occupied by the late A. E. Mason. Later other games will be added for the amusement of the public.

Announcement of the marriage of Miss Lizzie Aldrich and Mr. Charles E. See at St. Augustine, Florida, April 28, has been received by their Charlevoix friends. Also that they are leaving Florida enroute to Charlevoix, when they will be at home to their friends.

Special service will be held at the First M. E. church Tuesday evening, May 17, Messrs Chillon Smith and A. E. VanEvery, both of Petoskey, will make short talks, while Rev. C. J. Kruse, also of Petoskey, who has entertained Charlevoix audiences in the past, will deliver the principal address at the meeting, according to arranged program.

Mr. and Mrs. Percy J. Moran motored to Detroit last Sunday. They were accompanied on the trip by Theodore Hirnkrent, who for the previous two weeks was here attending to work in connection with the rebuilding and new construction work on the Hirnkrent business block.

Mr. and Mrs. Louis Orlowski and son Louis Jr., who spent the winter months in the southwest, principally in Arizona, returned to Charlevoix last Thursday. Their extended trip was taken mainly on account of the health of the son, who is afflicted with asthma, who was greatly benefitted by the change in climate, and who at present is feeling normal and well.

Oscar F. Nelson, born and raised here, later going through the campaign in France without a scratch, only to be shot and a foot crippled by a colored desperado while on the police force in Detroit, was in town this morning. Mr. Nelson is proprietor of the Fort-Nee Poultry Ranch at Charlevoix.—Mancelona Herald May 5th.

One of the front doors at the entrance of the saleroom of the Charlevoix Hardware Co.'s store is minus a large bevel plate glass at present, due to an accident. A new plate will soon replace the broken glass. In the meantime the open space will be kept boarded up, and the manager and employees will be kept busy explaining to patrons just what it was about and how it all happened.

Twenty special instructors have been engaged to assist the regular faculty of forty members at the 27th annual summer session at the Central State Normal School, Mount Pleasant. The session begins Tuesday, June 28th and officially ends Friday noon, August 5th. Nearly thirteen hundred students enrolled for the 1926 session and this number it is thought, will be greatly increased this year.

The event reinaugurates which prevailed in the days preceding the early days of the present week followed by moderate warm weather, have added a newness and freshness to the appearance of lawns and yards, a new green by way of foliage to trees and shrubs that is most pleasing to behold. Everything made some marvelous change in a short time and with such rapidity that such changes are noticeable almost hourly.

Due to higher water level on Lake Charlevoix and South Arm the approaches to Ironton ferry are several inches low, thus making for some annoyance to parties with automobiles desiring to go to the County ship. This difficulty will soon be remedied as men are working on a relief which will raise the approaches at the right level for safety and convenience. Recent heavy rain falls are given as the cause for higher water levels in this region.

Captain B. J. Gillen, inspector of hulls and inspector Charles C. Eckling from the government office at Grand Haven were here on business Tuesday and Wednesday. While in this region they inspected the ferry at Ironton of Charlevoix, the steamer used by Captain Gillen in connection with his official duties.

Mr. and Mrs. Percy J. Moran motored to Detroit last Sunday. They were accompanied on the trip by Theodore Hirnkrent, who for the previous two weeks was here attending to work in connection with the rebuilding and new construction work on the Hirnkrent business block.

Mr. and Mrs. Louis Orlowski and son Louis Jr., who spent the winter months in the southwest, principally in Arizona, returned to Charlevoix last Thursday. Their extended trip was taken mainly on account of the health of the son, who is afflicted with asthma, who was greatly benefitted by the change in climate, and who at present is feeling normal and well.

First American Flags Displayed in Warfare

It is perhaps little known that the first American flag displayed in war was raised by Colonel Wynkoop, commander of the Royal Savage one of Benedict Arnold's little fleet in Lake Champlain, in 1776. This flag was a replica of the first striped flag, hoisted over Washington's headquarters at Cambridge. It consisted of thirteen alternate red and white stripes in the field and retained the colors of England, the united crosses of St. George and St. Andrew on a blue ground, in the canton. This flag was known in England as "The Indentious Stripes."

A picturesque incident is told of the first Stars and Stripes used in a military engagement," said Mr. Jones, foremost flag manufacturer in the country. "The Revolutionary flag of thirteen stripes with a circle of thirteen stars was adopted by the Continental congress on June 14, 1877, but the statute was not officially promulgated until the third of the following September. Meanwhile a copy of an Albany newspaper describing the flag had fallen under the eye of a Continental officer from Massachusetts on his way with reinforcements to Fort Schuyler, formerly Fort Stanwix, where the city of Rome, N. Y., now stands.

"He arrived at 5 p. m. on August 2, and very opportunely, too, as it turned out. For the British attacked the fort the following morning, which was Sunday. Before the end of the day the garrison had run up the first American battle flag. White stripes from shifts and bright bunting alternated with red stripes made from the scarlet petticoat of a soldier's wife. A blue canton was improvised from the military coat of the Capt Abraham Swartout, who, a year later, died in Kent, Ohio. He inclosed a $1 bill in his letter: "About 35 years ago I and my schoolmates were at your store in Holden, Mo., and we each took an apron, unknown to you. Now the good Lord has burdened our souls and we want to make restitution and ask His forgiveness."—Exchange.

Clothes in the Discard

"The people of Europe have just discovered that they have been wearing too much clothing and they have jumped to the other extreme and $3,000,000 of them are now in a nudity cult. They are swimming without bathing suits, running naked over the hills and doing calisthenics without a thread of clothing. It began in Germany with a health uestle called "The Way to Strength and Beauty." This told of recent discoveries made by scientists concerning the wonderful effects of sunshine on the human body. For the first time it was found that ultra-violet light, those invisible rays in sunshine that increase the percentage of lime and phosphorus in the body fluids and increase resistance to disease. Now there are over 1,000 members of swimming clubs, athletic associations, working girls' clubs and others, all with the avowed object of discarding their clothing as far as possible.

Writing by Wireless

It will soon be possible for messages transmitted by wireless telephone and telegraph to be reproduced in facsimile. For over a year experiments have been conducted by Mr. C. M. Wright, an Englishman, who now announces that his system is nearly complete. Wireless messages will soon be transmitted and received in the sender's handwriting.

This method will result in a great saving in time and lessen costs, for instead of preparing and developing the sensitive plates by which the present photograph and facsimile writing is transmitted, it will be possible to place the original writing object into the transmitting apparatus This will be reproduced at the other end almost simultaneously.

Reject Mail Delivery

Most American communities begin early to try to prove to Uncle Sam that they are grown up and should have their mail brought to their doors. But in California is a community that does not want its mail delivered. In Ourimba-by-the-Sea the property owners recently voted no to mail delivery. The fact is that the town is an artist community and the residents enjoy the primitive way of going after their mail. Another consideration is that the government requires sidewalks to be laid as the first step to free delivery and the residents do not want to lay sidewalks.

Pair of Boots Makes Trip to Pole Twice

Seattle, Wash.—Several men claim the honor of having flown over the North pole once, but Commander Richard Byrd, arctic flyer, has a pair of boots with him in Seattle that has made the trip twice. Byrd has the boots made in Nome by an Eskimo for his flight across the pole. They were shipped 700 miles by dog team, then on to New York. Byrd took them with him to Spitsbergen and wore them when he successfully crossed the pole in his plane.

When he returned Byrd loaned the boots to Llewelyn Ellsworth, who wore them when he crossed the pole in the dirigible Norge with Amundsen.

Only Seven?

New York.—The well-dressed New York man must have seven suits. His trousers also must be from 17½ to 19 inches in width at the bottom. These are ukases from the New York Custom Tailors' club.

Blames Mule

Selma, Ala.—Dave Vassar of Berlin, Ala., is charged with the murder of his wife, who was found dead with her skull broken. Vassar claims a mule kicked his wife to death.

Dependable Paints manufactured by Heath and Milligan Mfg. Co. "Best since 1851." We carry this line of high grade paint and will be pleased to show you color lines and upply your needs
Staley Bros. Hardware.

Prisoner Makes Up Payroll Under Guard

Battle Creek, Mich.—Mark Richardson, arrested for employing the bonus check of a shell-shocked war veteran, made out the $30,000 payroll of the Veterans' Bureau hospital, No. 100, while under guard of Deputy United States Marshal J. Cooper Huffman.

Richardson's arrest brought to light the fact that he is the only person connected with the institution who is qualified to issue the pay checks. Through the efforts of hospital officials Richardson was taken from his cell at the police headquarters here and conveyed to the hospital, where he consented to make out the payroll.

Demand for Red Diamonds

Demand for the rare red diamond has become so great since the finding of the large crimson stone in the Transvaal recently that prices are climbing and miners are desperately hunting for more of the gems. The 15-carat diamond from the Transvaal that has attracted so much attention is valued at nearly $15,000, while a fine stone mined last April brought $4,500. A perfect white diamond encountered a price of $8,000 a carat, while an almost perfect "white" diamond recently was sold for $110 a carat.

Paid for Stolen Onion

An onion stolen 25 years ago from Hagmeyer's grocery store at Holden, Mo., finally proved too strong for the conscience of S. G. Yoder, now of Kent, Ohio. He inclosed a $1 bill in this letter: "About 25 years ago I and my schoolmates were at your store in Holden, Mo., and we each took an onion, unknown to you. Now the good Lord has burdened our souls and we want to make restitution and ask His forgiveness."—Exchange.

CHURCHES

Methodist Church.

C. E. Pollock, Pastor.

"Hearding the new age."—sermon, 10:30 a. m.

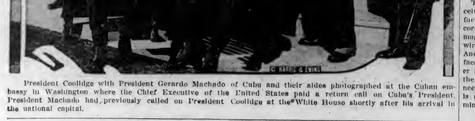
"Engineering a Queens dominion.—sermon 7:30 p m.

Both these services for next Sunday will be of special interest. A vital theme in the morning for the sermon will focus the worship of the hour in a practical manner. The more popular evening theme will be one of several attractive features of a happy Sunday evening. Among the other features evening features will be the twenty minute story contest period by the Queen Esthers, special musical features, and some wonderful still pictures of Hawaii. The womans Mission

When Presidents Exchange Formal Calls

President Coolidge with President Gerardo Machado of Cuba and their aides photographed at the Cuban embassy in Washington where the Chief Executive of the United States paid a return call on Cuba's President. President Machado had previously called on President Coolidge at the White House shortly after his arrival in the national capital.

Paris Flight Plane Crashes, Killing Two



This picture, transmitted by telegraph wires, shows the great plane American Legion as it lay wrecked in a marsh near Newport News, Va. Lieut. Com. Noel Davis and Lieut. Stanton Wooster, who were testing the machine for the Paris flight, were killed.

Taking the Place of the Army Mule

Infantry organizations in the Philippines are experimenting with native ponies as replacements for the time-honored army mules used as pack animals. Lack of roads in many parts of the islands makes transportation by any other means impossible. This photograph shows one of the doughboys with a typical native pony.

Indian Mounds Are Flood Refuges

Air view of Indian mounds near Greenville, Miss., that were filled with people and cattle which were driven there when the main levee broke.

SHORT ITEMS OF INTEREST

Following their queen, a swarm of bees alighted on the bumper of an automobile parked in an Ohio city street.

Starting from Silver Springs, Md., in 1925, Frank M. Heath rode the same horse through thirty-two states, covering 5,598 miles.

A survey shows that 115 industries, including the manufacture of paper, textiles, leather, glass and rubber, and steel, use lime in their processes.

In the last seventy-five years British Columbia has contributed more than $1,585,000,000 dollars to the mineral wealth of the world.

Out of one large piece of white pine Wilfred Dubois of Brunswick, Maine, whittled a windmill structure, carrying eight ornamental fans, the base and the lower having wooden balls whittled within. All the work was done with a jack-knife.

Seek Millions In Old Panama

Dig for Treasure Buried When Henry Morgan's Pirates Sacked Town.

Balboa, Canal Zone.—In the jungle-covered ruins of the ancient city of Old Panama, English and American explorers are now engaged in a scientific search for several million dollars' worth of buried treasure which, history records, was hidden there when the pirate, Henry Morgan, sacked and burned the town in 1671, writes Roy G. Blank in the Chicago Tribune.

A remarkable radio gold locater, invented by Professor Fable of Gatchester, England, is being used by the explorers, who have already unearthed three silver bowls containing golden ornaments worth thousands of dollars.

The instrument is like a radio receiving set in appearance. It is, in fact, a sort of ground radio, and it records accurately the presence of non-magnetic metals underground. One wire, attached to a rod, is grounded. Another rod is passed over the surface of the ground. When gold or other nonmagnetic metals are encountered the surface between the two poles is affected, and that the digger is also recorded by a distinct humming in the ear phones.

British Officer in Charge.

Lieut. George Williams, R. N. V. R., is at the head of the treasure hunting expedition. He has obtained a year concession from the government of Panama with the understanding that Panama is to retain one-fourth of all treasure located during that period. Other members of the expedition are Wallace Bain, American; Commander David Blair, R. D. S., and Lieut. F. M. Kealey, R. N. V. R.

At the request of Lieutenant Williams, the Panaman government has detailed armed police guards for day and night duty in the jungles where the explorers are camped.

A representative of the President of Panama has also pitched a tent alongside their camp and is watching their work to see that the treasure is divided evenly.

The police guards were requested by Lieutenant Williams when he discovered that large-scale unauthorized excavations were being carried out on sites where his instruments had indicated the presence of gold.

Finds Gold Ornaments.

After locating the treasure, the ruins to convince himself that there was gold there, Lieutenant Williams ordered a few trial holes dug. In several of the hundred dollars' worth of antique golden ornaments, while the hole made by

Council Proceedngs

[Council Chambers, May 9, 1927.

The Common Council of the City of Charlevoix met on the above date, with Mayor Bergeon presiding. Aid present, Eckinger, Gelken, Howe, Livingston

Minutes of the meeting held April 25, 1927, were read and approved.

The Finance committee submitted the following bills agreeing $7,531.96 report the same correct and recommend they be allowed.

To the Honorable Apr. 25, 1927

Discretion and Valor

Last summer a sewer was being put on on the south side of the city. Two boys who lived on the corner persisted in crawling through the large pipes that were to be put in the ground. Alvin, the older, was so heavy he could not run, but Hobert, the young er, was thin and wiry.

Their father had cautioned them to stay away from the pipes, and he had asked the foreman to look after them the day, soon after, while the boys were playing around the pipes, the foreman came up and said: "I'll give you boys just two minutes to get away from those pipes."

Robert jumped up, grabbed the man around the knees, and shouted: "Run, Alvin, I'll hold him!"—Indianapolis News.

Each Baby Boosts Rent

Each baby born in a London apartment causes the rent to automatically raise, according to a plan worked out by the landlord. Under an agreement recently submitted to a prospective tenant of a two-room apartment, the tenant were: "Rent 20s. per week or 17s. 6d. on requiring lease, increasing this own repairs on going to No children taken; above rent is for two persons only, or 2s. 6d. per week increase for every additional person or every child born in the house. Two weeks' rent in advance as standing deposit in lieu of two weeks' notice either side." The rooms were two small ones just under the roof of the building.

Big Japanese Project

The Daido Denreyoku Kobunshiki Kaisha of Tokyo have formed the Hokuriku Soden Kabushiki Kaisha (Hokuriku Electric Power Transmission Company, Ltd.), with a capital of 40,000,000 yen for a 50,000-kilowatt development on the Sho river in Toyama prefecture. It is estimated that power stations will cost the company about 22,000,000 yen, and 18,000,000 yen will be spent for transmission lines (154,000 volts) to Osaka. The line is now worth 48 cents.) The project will be completed early in 1929.

Helping Erring Youth

The Windsor state reformatory at Green Bay is not a place of punishment, but a place where youths are "corrected and mostly remodeled," and they are welcome to all the fun they get out of life there, according to officials of the institution. So they flooded the baseball diamond to give vide an acre and a half skating rink, which the boys enjoy for a 90-minute period each day. Skates have been bought out of the school athletic fund, raised by candy sales.—Exchange.

Elevator to the Belfry.

When Anton Brees, formerly of Antwerp, Belgium, but now carillonneur of the Park Avenue Baptist church in New York city, goes up to play the bells given by John D. Rockefeller, Jr., in memory of his mother, he does not have to climb a narrow flight of belfry stairs to reach the keyboard in the chancel tower. Instead there is a special electric elevator available, and, further, the room set aside for the keyboard of the carillon is heated in winter by electric heaters and cooled in summer by electric fans.

NOTICE—Board of Review.

Notice is hereby given that the Board of Equalization and Review of the City of Charlevoix, in the county of Charlevoix and State of Michigan, will meet in the Council Rooms in the basement of the Carnegie Library, in said city, on Monday the 16th day of May, 1927, at nine o'clock in the forenoon, for the purpose of reviewing and revising the assessment rolls of the several wards of said city. The said Board will continue in session for at least six hours each day for at least four successive days thereafter, or until the completion of such revision and review.

Ray S. Hamilton, City Clerk.
By D. S. Payton, Deputy.

Red Crown Ethyl Multiplies Motoring Pleasure

Easy starting—smooth speed—quick pick-up! No knocks—just a rhythmic purr from the engine and a steady flow of power *all the time*—with RED CROWN ETHYL in the tank! It "knocks out that knock".

Touring Suggestions

1—Lake Minnetonka in Minnesota, given over to pleasure all through Harbor Lights Festival, sponsored by the Chamber of Commerce.

2—Lake of Isles and Islands, estimated to have 400 miles of shore line. Reached by State Highway 12 from Minneapolis to Wayzata, a village on the north shore of the lower lake.

3—The Minnesota River running through Marine, Indiana, one of the three rivers in the world whose course runs north. State Highways 11 and 35.

4—Excelsior Springs, noted health resort, established among the hills and lakes of Kansas City, Missouri. Famous for its many mineral springs. Reached by Missouri highway 10 and highway 45.

5—Fort Tawas, Michigan, located on Tawas Bay. Gateway to Michigan National Forest, containing 141,000 acres of national forest, with unlimited recreational resources for the summer motorist. State Trunk Line M-30.

6—Grandview Drive, Peoria, Illinois, overlooking Illinois Valley and Peoria Lake. Selected by National Artists Commission as one of the most beautiful civic scenic drives in the United States. State Highways 8, 9, 24, 29.

7—Minocqua-Manitowish Waters-Boulder Junction, a little bit of Europe transplanted into Wisconsin. In September, 1873, a Bavarian Association from Munich purchased 9,000 acres of land, naming it Bavaria. In 1882 the first Bavarian college in the United States at Boulder Junction. Highway 227.

8—Devils Lake, North Dakota, in the heart of the famous Red River Valley. "Bee-Hunter of the West." Beautiful natural wooded parks and tourist camp. State Highway and State Highway 2.

9—Backbone State Park." Manchester, Iowa. Some of the best natural scenery in America. Local wonders—"Golden Stairs," the "Pulpit Rock" and "Devil's Backbone." Reached by Federal or A. Y. O. Trail 5. State Highway 13 north of Manchester.

10—Indian Head" marked on the Mississippi River bluffs by a fairly large face from which to daydream. Near Fountain City, Wisconsin. State Highway 35.

11—Jewel Cave, thirteen miles west of Custer, South Dakota. Interesting place to visit in winter for rest and cold-half miles, where is country Milk River, an underground stream with water flowing at 50 degrees. Reached by Custer Loop, which is on State Highway 87.

ROAD BUILDING

TRUCK AND BUS BRING NEW ERA

Five years ago the American people suddenly began to wake up to the fact that they had a nation-wide traffic problem starting them in the face. This problem existed despite a 10-year record of improved highway building such as no previous era in all the world's history could show. Yet in comparison with the requirements developed by the astounding advance of the motor vehicle, highway building had actually been losing ground for several years.

It was about this time, say five or six years ago, that a good many communities commenced to see the costly folly of compromise road improvement. They had paid out large sums of money annually on repairs and maintenance, in addition to their original expenditures, and now their roads and streets were practically gone—pounded to pieces by the passage of countless motor vehicles. Looking the facts squarely in the face, they decided to rebuild their main streets and roads—to build them firm, rigid, unyielding and permanent.

But while these communities looked at the facts and have profited by so doing, they did not look at all the facts. Perhaps it would be more accurate to state that once again they failed to look far enough ahead.

In the first place, they did not sufficiently realize that their highway problem was no longer merely a matter of roads, but that it was directly linked with the highway problem of the state and of the entire nation. By so-called "pork barrel" methods the number of automobile owners had about reached the peak. The plain fact is that it was impossible planning immediately to enter upon a new era of highway building and America's millions of motorists have come to realize it. In this connection it is significant that the motor industry has for some time past been taking a steadily increasing interest in the traffic problem. The manufacturers of automobiles, as well as trucks and buses, are giving more and more attention to this subject.

The motor bus, which has certainly come to stay, is only in the infancy of its developments. Less than ten years ago it was no little to evidence that it was not even talk-a into consideration in connection with the planning of highway construction.

Today the total number of motor buses runs high into the thousands. They transport 300,000 school children daily. They also carry daily crowds of passengers not only through our city streets and back and forth between city and suburbs but also between cities—frequently up to distances as high as 200 and 300 miles and beyond.

Closely connected with the advance in the motor bus industry is the more extensive scale is the development of the motor truck.

To tell the full story of the development of the motor truck from its initial appearance on our highways up to its present registration of almost 2,000,000 would require an enormous volume. Here then is a faint picture could be given of its future progress certain to come during the next decade.

If this condition has come about within the past five years, what will it be like in another five years? There is but one way to meet the problem, and that is to begin building paved roads on a scale far more extensive than we have ever done—even in the thickly populated centers. America is about to enter on a new era of highway building.

Wider Highways Needed to Care for Motor Cars

Wider highways with an eye to the large cities, must be built in the United States or the development of the country may receive a severe set back, according to the American Road Builders' Association.

"At the present rate of increase, we may have 30,000,000 passenger automobiles, busses and trucks on the roads within a few years," the bulletin declared. "Public enterprise meantime moves with parsnitic slowness in providing road room.

"It is estimated that good roads now save the highway users $750,000,000 a year. Motorists pay the bulk of road building expenses but probably profit the least by it. Land values have been enormously increased by highways, the benefits extending to farmers in remote sections. With the growth of our cities more and wider highways in their vicinity are a vital necessity, not only for passenger traffic but to facilitate the transportation of food and supplies into the population centers."

More Road Funds

Under the provisions of the new Wisconsin highway law there will be available annually for maintenance purposes $500 a mile for the principal federal aid highways and $300 a mile for the remainder of the state trunk highway system. This is a considerable increase over the amounts available in 1925 and the maintenance should show a marked improvement this year. This will mean that the highways will be well cared for and travel made easier.

Instruments Necessary

The United States geological survey says that it is not possible for even an experienced surveyor to estimate the approximate height of a mountain from the base without the use of instruments.

Uncle Eben

"De oldest man," said Uncle Eben, "was Methuselah. But in all dem years he didn't do nuffin' dat caused people t' celebrate his birthday."—Washington Star.

Medieval Legend

According to the story of "The Pot of Basil," Isabella was in love with Basil, but her romance was opposed by her seven cruel brothers. In order to frustrate the romance they slew Basil. Isabella then planted his head in a beautiful flower pot from which grew a plant which Isabella tended carefully. In Alexander's painting Isabella is shown standing beside the pot.

Ship's Official Record

Log book is the book in which the master of a ship enters such day a brief but exact account of all the events of that day, the miles made by that day's run of the ship, an account of the weather, and the names of vessels sighted or spoken when names can be obtained. The log is the official record of the voyage.

Coloring Electric Globes

Electric incandescent globes may be easily colored by dipping globes into a solution of collodion, previously colored to suit, with aniline soluble in collodion. Dip and rotate quickly, bulbs down, until dry.

LEGAL NOTICES

Order Appointing Time for Hearing

STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the City of Charlevoix in said county, on the 27th day of April, A.D. 1927.

Present: Hon. Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of Franklin M. Sears, deceased.

The above estate having been admitted to probate and Ida C. Sears appointed administratrix thereof.

It is Ordered, That four months from this date be allowed for creditors to present their claims against said estate, and that such claims will be heard by said Court on Thursday, the 15th day of Sept., A. D. 1927, at ten o'clock in the forenoon, at the Probate office, in the city of Charlevoix.

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix Sentinel a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
3-3t Judge of Probate.

Order A pointing Time for Hearing

MORTGAGE SALE

Default having been made in the condition of a certain mortgage executed by Michael J. Podrant (a single man) of Detroit, Michigan, unto Llewellyn S. See, of Warmuntig, Michigan, and Charles E. See, of Charlevoix, Michigan, dated August 26th, 1925, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, October, 9th, 1925, in liber 'sixty-three of mortgages on page one hundred and sixty-five, on which mortgage there is claimed to be due at the date of this notice the sum of Two Thousand One Hundred Fifty and 39-100 Dollars including the principal sum due thereon with interest, together with an attorney fee of thirty-five and No-100 Dollars as provided for in said mortgage and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and search foundation required by the statute;

Now Therefore, Notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount due as aforesaid thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by the said mortgage, at public auction, to the highest bidder therefor, at the front door of the court house in the city of Charlevoix, Charlevoix county, Michigan, (that being the place where the circuit court for the county of Charlevoix is held), on Tuesday the twenty-first day of June, 1927, at eleven o'clock in the forenoon on that date.

The premises described in said mortgage being the lands, premises and property situated in the City of Charlevoix, county of Charlevoix and State of Michigan, described as follows, to-wit: Beginning at the northeast corner of lot one in Block nine in the recorded plat of the village (now city) of Charlevoix, Michigan; thence south forty-two feet two and one-half inches along the east line of said lot one; thence west ninety-six feet along the party wall line of the adjoining property of land on the south and extending to a point in the west boundary line of a public alley running north and south through lot two in said block six of the recorded plat of the village (now city) of Charlevoix, Michigan; thence north forty-two feet and one-half inches along the west boundary line of said alley to a point in the north boundary line of said lot one aforesaid in said block six; thence east ninety-six feet along the north boundary lines of said lots one and two subject to an easement of a public alley, fourteen feet in width on the west side of said parcel of land, also subject to party wall agreement concerning the party wall between the above parcel of land and the parcel adjoining immediately south, together with the hereditaments and appurtenances thereunto belonging or in anywise appertaining.

Dated March 21, 1927.

LLEWELLYN S. SEE and
CHARLES E. SEE,
LISLE SHANAHAN, Mortgagees

MORTGAGE SALE

Default having been made in the condition of a certain mortgage executed by George Ross, an unmarried man, of Charlevoix, Michigan, unto Rudolph C. Korth, of Charlevoix, Michigan, dated the 24th day of August, A. D. 1925, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, on the 28th day of August 1925, in Liber 56 of mortgages on page 24, of the above description contained in said mortgage being corrected by a mortgage executed by said George Ross to said Rudolph C. Korth, dated the 6th day of October, 1926, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, on the 8th day of October, 1926, in Liber 63 of mortgages on page 200, on which mortgage there is claimed to be due the sum of two hundred fifty five and 73-100 ($255.73) Dollars including interest computed to the date thereof, and also an attorney fee of twenty five ($25.00) dollars provided for in said mortgage, and no suit or proceedings at law having been instituted to recover the moneys secured by said mortgage, or any part thereof;

Therefore, by virtue of the power of sale contained in said mortgage and the statute in such case made and provided, notice is hereby given that on Monday, the 20th day of June, A. D. 1927, at the east front door of the Court House, in the City of Charlevoix, Charlevoix County, Michigan, that being the place where the circuit court for the County of Charlevoix is held, the premises described in said mortgage or so much thereof as may be necessary to pay the amount due on said mortgage with seven per cent interest and all legal costs, together with an attorney fee of twenty-five ($25.00) provided for in said mortgage, which premises are described in said mortgage as follows: Commencing at the southeast corner of the southwest quarter of the northeast quarter, Section twenty-three (23), Township thirty-four (34) North, Range eight (8) west, thence west 20 rods to a point which is the starting point; thence north 80 rods, thence west 10 rods; thence south 80 rods; thence east 10 rods to place of beginning, situate in the Township of Charlevoix, County of Charlevoix and State of Michigan.

RUDOLPH C. KORTH, Mortgagee,

VISITORS DAY AT C. SCHOOL

Many See the Work Exhibited in the Different Rooms

Last Friday was visitors' day at the Central school buildings, and there was a good turn-out to see the work exhibited in the different rooms, both in the High school and grades.

This exhibit decorated the walls, blackboards and tables, and represented what has been accomplished by the students from kindergarten up, for the past school year, and was creditable in quality and minute, reflecting great credit upon teachers and students as well.

It was a revelation to those of us who visit the schools only infrequently, if at all, to see what is being accomplished by these children who plod tirelessly along through the school year, and the result of their study and application to the work they have had in hand is rewarded by the fine showing exhibited to the interested public last Friday.

Owner of Big Fish Inn, at Ellsworth, Dies Suddenly.

Mr. J. H. Aligire, owner and manager of Big Fish Inn, a comparatively new resort located on the shore near Ellsworth, died at his home, Lima, Ohio, a few days ago. The news of his death was a shock to his friends at Ellsworth and other points in this region.

Mr. Louis VanSkiver now of Central Lake, was the promoter and original owner of this resort property but disposed of his interest to Mr. Aligire about three years ago, who immediately took possession, proceeded to make extensive improvements by way of building several cottages.

Just what disposition will be made of the Aligire buildings is at this time undecided, but an effort will be made to open same this season.

SPECTACULAR OPERATION

Engineers Repair Cable Between St. Ignace and Mackinaw City

Because of transmission difficulties that have developed in some circuits, the Michigan Bell Telephone company has had to raise more than a mile of its longest submarine cable, which connects the two peninsulas of Michigan at Mackinaw City and St. Ignace, at the Straits of Mackinaw.

Transmission engineers, using delicate measuring apparatus, located the trouble, and the tug Favorite, largest wrecker on the Great Lakes, lifted the cable so experts could open it and correct the trouble. It was a spectacular and unusual operation.

It is believed that the trouble was due to the shifting of the currents of water, where the cable crossed a rock ledge, in deep water, about a mile off shore at Mackinaw City. Eight of the 10 long distance circuits contained in the cable were out of order.

The Mackinaw City-St. Ignace cable, which is more than four and a half miles long, was laid July 9, 1921, at a cost of $50,000, replacing one laid in 1890, since abandoned. Over this cable is handled most of the telephone traffic between the cities of the two peninsulas and much of the long distance traffic between the Upper and Lower Peninsulas and much of that to and from Mackinac Island, the summer resort lying in the straits that connect Lakes Huron and Michigan. Use of the circuits between the two peninsulas is growing rapidly.

Luzon Leads in Area

Although figures differ somewhat concerning the area of the various islands of the Philippines, it is an accepted fact that Luzon is the largest island. Mindanao ranks second. The area of Luzon is approximately 40,000 square miles, and that of Mindanao 36,292 square miles.

Architectural Secret

Russian fortifications "circle" still holds its secret. The magic construction of the old Imperial riding academy's roof at Moscow, which doesn't have a beam, brace or pillar, has again baffled inquisitive architects and engineers who tried to find out how it was put together.

CITY TREASURER DIES

John Cook, Charlevoix Resident Forty-Five Years

Funeral service was held for Mr. John Cook at the family home, 307 Mason street, Wednesday forenoon, at 10 o'clock, with Pastor C. E. Pollock of the M. E. church officiating, the service being under the auspices of Charlevoix Lodge No. 282 F. & A. M., of which the deceased was an honored member.

He was born in Brooklin, Ontario, Canada, Sept. 12th, 1859, therefore at the time of his death during his sixty-eighth year.

When eight years of age he lost his parents and from that time until he reached the age of manhood made he resided with an uncle, George Huntington. At the age of twenty-three years or in 1882 Mr. Cook came to Charlevoix and remained a resident of this city until his death, in the meantime until his health failed, he followed the occupation of brick layer and general work on buildings, stone, plastering, etc., work that was profitably and honorably performed work that he was compelled to abandon some years ago on account of ill health, a condition that has prevailed continuously for a dozen years or more, during which period he has been a great sufferer and to some extent crippled. Me later years another serious affliction developed, failing eyesight, for which relief was early desired.

In order to gain this Mr. Cook entered the University hospital at Ann Arbor about two weeks ago and submitted to an operation with the result that his eyesight was to some extent restored and a further prospect of eventually regaining perfect sight. A few days later he developed a case of pneumonia which was serious from its first inception. At times there was some improvement in his physical condition, but with a condition weakened by years of illness he could not combat the malady which caused his death Monday morning at 12:20 May 23rd.

Friends were notified a few hours later and the body prepared and shipped to his home here were it arrived Tuesday afternoon.

For a long term of years Mr. Cook was in charge of the Charlevoix city treasurer's office either as treasurer or deputy and through this long period the citizens of this city have had implicit confidence in his honesty and business integrity. No breath of scandal has attached to his official actions. The people of Charlevoix knew that funds intrusted to him were in capable hands and that their interest was properly safeguarded—even though for months at a time Mr. Cook was enable to be at his office. Such was the confidence of the people in his honesty there was but little effort made at city election to defeat officials for this important office. There was but little use to try to unseat him. He was popularly intrenched in the affections of the majority of the voting public solidly, staunchly supporting him for the position and his record.

He was united in marriage with Miss Elma Helena Moore in 1885 by whom he is survived; also by one daughter, Mrs. J. H. Campbell of Jackson, and one son, John Byron Cook of Belding, all of whom were present at the final service.

Chinese Catholic Bishops

On October 28, 1926, Pius XI, in the presence of his court and of the diplomatic body, consecrated six bishops six Chinese priests. They were Chao, Soow, Cheng, Chou, Soo and Tsuoo. These were the first of that race to be elevated to the position of bishop.

Not a Matter of Age

"Don't you sometimes wish you were young again?" "No," answered Senator Sorghum. "I have been reading the papers. A man can be just as foolish at thirty as he can at sixty."—Washington Star.

ADVERTISING LOWERS COSTS

Newspaper advertising in America cost $235,000,000 last year, a gain of $15,000,000 over the previous year. It has been argued that advertising is so much waste so much added unnecessarily to the cost of the article sold. In one sense, it is true; if the sales could be made without it, the prices could be just that much less to the consumer.

But the world buys only on information. It travels because it knows where to go, what it can see, how much it will cost. It builds new houses because it reads how other people build and live and enjoy. It is many times cheaper to get this information by reading than in any other manner. The world would settle down into a jumble of ignorant, unkempt, leave-me-alone provincial units, but for what it reads in the advertising columns.

MEMORIAL DAY SERVICE

Parade Starts Promptly at 9:30 — Program at Cemetery

All those participating in the Memorial services are requested to assemble on Park avenue, west of Bridge street, not later than 9:10 a.m. as the parade will form not later than 9:30, and proceed to Memorial Park, where a short but impressive service will be held to commemorate the memory of those who died upon the seas while in the service of their country.

All organizations are invited to participate in the parade and those who do will find a place assigned to them. Immediately after the service at the park the parade will continue its march to the cemetery where the program outlined below will be given to commemorate the memory of our heroic dead.

Command—Marshal Ralph C. American Legion, will be in charge of the parade and services as officer of the day.

VISITORS DAY AT C. SCHOOL

Many See the Work Exhibited in the Different Rooms

Last Friday was visitors' day at the Central school buildings, and there was a good turn-out to see the work exhibited in the different rooms, both in the High school and grades.

This exhibit decorated the walls, blackboards and tables, and represented what has been accomplished by the students from kindergarten up, for the past school year, and was creditable in quality and minute, reflecting great credit upon teachers and students as well.

It was a revelation to those of us who visit the schools only infrequently, if at all, to see what is being accomplished by these children who plod tirelessly along through the school year, and the result of their study and application to the work they have had in hand is rewarded by the fine showing exhibited to the interested public last Friday.

BATH TRAGEDY

WORST IN HISTORY OF STATE

FROM A CRIMINAL STANDPOINT

Wreck of School Building While in Session, Cost Lives

The worst tragedy from a purely criminal standpoint in the entire history of the state, was enacted Wednesday of last week in Clinton county, a tragedy that cost more than two score of human lives, students and teachers at the community school building in Bath township, the destruction of several buildings with thousands of dollars and some live stock, the entire loss due to the act of a maniac who for revenge, largely imaginary, planted hundreds of pounds of dynamite in the several buildings and through the use of wiring and a concealed battery caused destruction to valuable property and caused the death of teachers, students, the maniac's wife and himself as well as some civilians, local citizens.

Andrew E. Kehoe, a farmer living near the community school building, obsessed with the idea that the community school owed him an excessive tax burden as credited with laying the plans and carrying out the work of destruction—which began first by the blowing up and firing eight buildings on his home farm and the death of his wife. Thirty minutes later there was an explosion of two at the community school building, while the school was in session, resulting in the partial loss of the building and the death, practically instantaneous of forty two teachers and students, and the death of the maniac who conceived and carried out the plan of destruction. Some fifty others were injured, some so few seriously, some of which have since died.

SEVERAL RAIDS BY THE SHERIFFS FORCE

Alleged Violators to Answer in Court

Sheriff Vaughn aided by his deputies raided several nearby places last Wednesday night and as a result of these activities succeeded in gathering up quite a number of alleged violators of the local option-prohibition and Volstead laws. Eight or nine of the alleged offenders appeared in Justice court and gave bail in various amounts for their appearance in court when wanted at some future time.

Officials stating that they found some home brew, some mash, a quantity of moonshine and a still or two. Those interested and will be named later as evidence at the time the cases are brought before the court should necessity demand such action.

Those cited to appear or taken at the time of the several raids were: Joe Gengle, San Pavalik, Joe Sattla, Jake Bendli, Joe Houk, Paul Carrow and Guy Pearl.

YOUNGEST WORLD TRAVELER

Thirteen Year Old David Binney Putnam

To the list of explorers and world travelers to whom Washington has become accustomed must now be added the youngest of them all, David Binney Putnam, 13 years old, whose book, "David Goes to Greenland" has recently been placed in the White House library.

David went down to the equator two years ago with Dr. Beebe's Arcturus expedition, and wrote his adventures in a book "David Goes Voyaging." His latest volume deals with his experiences on the American Museum expedition to Greenland last year. In the American Magazine, the young author sums up his conclusions regarding the value to boys of such scientific wanderings.

"I don't believe anything would be much more fun than to be able to go off expeditions and really do worth while study of the things you see and collect. Being a writer, too, is fine if you are successful. He can take the job with him wherever he goes. Of course I'm not a scientist, and not much of a writer. But I have been awfully lucky in being taken along; on two really big expeditions. And I have written two books which have been read by a great many boys and girls—ups, too, judging from the number of letters I get.

What boy would miss a chance to go on a real expedition and have real adventures? But I know that sort of thing can't go on forever. And it suits me perfectly well, for there is such a lot of fun at home just playing around with the boys and girls."

CHARLES R. BELLINGER

Passes—Born December 25, 1857 — Death Was Unexpected

In the death of Mr. Charles R. Bellinger which occurred at the family home last Sunday afternoon, Charlevoix loses a pioneer business man, one who has been engaged in mercantile pursuits for the longest period of time of any of the long time business men in this city, a period that has been continuous for forty seven years, commencing in 1880 in which year he became a resident of Charlevoix and engaged in the jewelry business, handling the line of goods incident to business of this character and in addition worked at the bench repairing clocks and watches as an expert in this class of work, having served the regular apprenticeship under a master workman in order to become proficient in his chosen profession.

Charles Roland Bellinger was born on Christmas day, December 25, 1857 at Pope Mills, New York. For a term of years thereafter he spent on a farm near Black Lake. At the age of sixteen years he commenced serving his apprenticeship with one Joseph Tanney an expert repair man and builder of watches. With this apprenticeship served Mr. Bellinger came west where he visited relatives for some time and at Maple City, Michig

Latest Clock Novelty

A Louisville watch repairer has devised a clock which has no sign of mechanism. The face of the novelty is embedded in a slab of cement 12 inches in diameter, and the hands, which are made of platinum and diamonds, revolve on a thin metal pinion. Although the crystal is transparent, no one except the maker knows how the clock goes, because there is no apparent connection between the hands and the framework. The price of such a clock is something like $1,000.

On Its Last Legs

Landlady—Isn't this good chicken? Boarder—It may have been once, but, physically it's a wreck.

Health lay: Nothing too much.

WOMEN CAN NOW DO MORE

Because Lydia E. Pinkham's Vegetable Compound Keeps Them Well

Fifty years ago there were few occupations for women. Some taught school, some did housework, some found work to do at home and a few took up nursing.

Today there are very few occupations not open to women. Today they work in factories with hundreds of other women and girls. There are also women architects, executives, and legislators. But all too often a woman wins her economic independence at the cost of her health.

Mrs. Elizabeth Chamberlain who works in the Uniontown factory making overalls writes that she got "wonderful results" from taking Lydia E. Pinkham's Vegetable Compound. Mrs. Chamberlain lives at 109 Monmouth St., Trenton, N. J. She recommends the Vegetable Compound to her friends in the factory and will gladly answer any letters she gets from women asking about it.

If Lydia E. Pinkham's Vegetable Compound has helped other women, why shouldn't it help you?

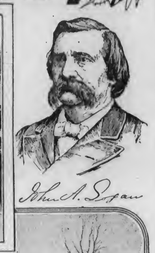
Memorial Day, 1927



John A. Logan

PARADE OF THE VETERANS' ©G.V. Buck

By ELMO SCOTT WATSON

All over the world—wherever there are men and women who claim the privilege of American citizenship—May 30 will be observed as the day on which we honor our soldier dead. For Memorial Day has outgrown its original significance as a day of remembrance for the men who wore the Blue and those who wore the Gray in the greatest civil war in history, the War Between the States of 1861 to 1865. America's soldier dead lie buried in many lands—in Cuba, in the Philippines, in Mexico and in France, Belgium and England.

In the environs of the City of Mexico there is a little cemetery in which a small granite shaft stands, bearing these words: "To the memory of the American soldiers who perished in this valley in 1847, whose bones, collected by the country's orders, are here buried—754." Memorial Day is a day of remembrance for those 754 Americans as much as it is for any of the hundreds of thousands whose graves in cemeteries in every state of the Union will be covered with flowers on May 30 of this year, 1927. Since 1918 the world-wide significance of Memorial Day for Americans has been more apparent because of the long rows of white crosses in England and France and Belgium. In a military cemetery at Romagne-sous-Montfaucon in the Meuse-Argonne region of France there are 14,045 of these crosses. In the Oise-Aisne cemetery there are 5,004; at St. Mihiel, 4,141; in the Aisne-Marne, 2,212; at the Somme, 1,816; at Suresnes, 1,540; in Flanders Field in Belgium, 368, and in Brookwood, England, 477.

So it is in remembrance of those 23,502 American soldiers, who are buried in eight European cemeteries, and the 46,214, who have been brought home to rest beneath the soil of their native land, as well as the countless host of the dead heroes of the Civil war, the Indian wars, the Spanish-American and every other conflict in which the United States has ever been engaged, that Memorial Day will be celebrated this year.

If there is any one Memorial Day ceremony which is outstanding it undoubtedly will be that in the great amphitheater in Arlington cemetery near Washington where President Coolidge will voice the nation's tribute to its soldier dead. Around him will be grouped high government officials and ambassadors of foreign countries. It will not be the presence of great men which will make the Memorial Day services there notable. It is the place itself which is the impersonation of the spirit of Memorial Day—Arlington cemetery, where stands the memorial to the "Unknown Dead" of the Civil war and where was placed the greatest of all American shrines, the tomb of the Unknown Soldier.

Of all national celebrations, Americans have best preserved the original connotation of "holy day" for "holiday" in the case of Memorial Day. Untouched by the commercialism and the materialism which has crept into the observance of other special days, it has a dignity and a spirituality all of its own. Perhaps the fact that it was received by love and perpetuated in reverence has made it so.

For it was the touch of a woman's hand, laying flowers not upon the grave of an enemy—perhaps the very one who was responsible for the death of some one near and dear to her—whose example of loving kindness and forgiveness for past hatreds eventually brought about the observance of Memorial Day. In 1865 Miss Lizzie Rutherford of Columbus, Miss., suggested to the members of the Ladies' Aid society, who had been carefully attending the graves of Confederate dead, that April 26 be set aside each year as a special day for decorating those graves.

Her suggestion was at once adopted by the society and on April 26, 1866, the first Memorial day services were held in St. Luke's Methodist church in Columbus with Col. James M. Ramsey as the orator of the day. On that day the graves of both Union and Confederate soldiers buried near Columbus were decorated with flowers. At the pleading letters to women in other southern towns resulted in the adoption of April 26 for a general observance of a memorial day for the soldier dead.

In the spring of 1867 a New York newspaper published a paragraph in which this brief statement was made, "The women of Columbus, Miss., have shown themselves impartial in their affections and in the memory of the dead. They strewed flowers alike on the graves of Confederate and National soldiers." In 1867 the nation was still bleeding from the wounds of the war, and anger, hatred and suspicion were still rife. But this act of the women in the South sent a thrill throughout the North and the following year, Gen. John A. Logan, national commander of the G. A. R., designated May 30 for the purpose of strewing with flowers or otherwise decorating the graves of comrades.

How General Logan came to issue the famous order to his comrades of the G. A. R. which resulted in the observance of May 30 as Memorial Day, or "Decoration Day," as it was first known and as it is still often referred to, was related a few years ago by his widow, for many years known as "The Grand Old Lady of Washington." The story, as told by Mrs. Logan, follows:

The late Col. Charles I. Wilson, editor of the Chicago Journal of that day, invited a party consisting of his niece Miss Anna Wilson, Harriet Mrs. Horatio May); Miss Farrar, his sister (Mrs. Caleb Dodd); General Logan and myself, to visit the battlefields around Richmond in March, 1865. The intense excitement of the people, resulting in repeated conflicts, rendered it unsafe, as I had been informed, for me to be isolated upon my going with those gentlemen. We made a tour of every battlefield, fortification, temporary barracks and cemetery around the erstwhile Confederate capital, driving about in old tumble-down vehicles, drawn by lean, jaded horses, driven by thinly clad, poorly fed men, who had survived the long siege of Richmond. We saw the colored men, women and children digging out the lead and iron which had been shot into the fortifications, almost the only support of these wretched people. Visiting cemeteries and church yards, we were deeply touched by the withered wreaths and tiny flags that marked the graves of the Confederate dead. In the bleak March wind and light-falling snow, the dreariness seemed most oppressive.

Returning together to the old Willard hotel, where we then lived, sitting in our parlor after dinner, we recounted the deeply touching sights we had seen during the day, and how deeply touched we were by the decoration and tender care of the unknown churchyard around an old historic church at Petersburg, every foot of the ground seemed occupied by the graves of the Confederate dead. Upon them lay wreaths, some beautiful flowers, now crumbling, which had been placed there by loving hands. Little faded Confederate flags marked each grave, mute evidence of the devotion of the survivors to their loved and lost ones. All of us party were much impressed by our description, saying, "The ideals and dreams in the day of that glory were sweet to honor their hero dead by chaplets of faded and flowers, as well as in frowns and arms" and that as commander in chief of the Grand Army of the Republic and member of congress from Illinois, which he then was, he would issue an order establishing Memorial Day, then called "Decoration Day." He declared at the same time that he believed that he could secure the adoption of a joint resolution making it a national holiday and a national ceremony. He then took up a pad and paper and wrote the matchless order No. 11.

As a result of this order formal exercises were held at Arlington, Va., (later the site of the present Arlington National cemetery) on May 30, 1868, the pitched ceremony being the decoration with flags and flowers of the monument to the "Unknown Dead," a memorial that had been erected in the memory of 2,111 unidentified dead found on the fields of Bull Run and the route to Bappahannock. The day was also observed in other parts of the country by strewing flowers on the soldiers' graves, in accordance with General Logan's order, but the term Memorial Day or Decoration Day had not yet been adopted.

The idea spread rapidly, however, and at the ceremonies held by the G. A. R. in Monument cemetery in Philadelphia on May 20, 1870, it was recorded that "the annual floral decoration of the graves of our dead soldiers has become a national custom." For it was going much to heal the wounds of the war and, in uniting to honor their dead, the North and the South were forgetting the bitterness of a few short years before. One of the most significant bits of evidence of this occurred in Brooklyn when on the eve of May 30, 1877, a great throng assembled in the Academy of Music to hear the chief orator of the day—Judge Roger A. Pryor, formerly brigadier general in the Confederate army.

From that time on Memorial Day celebrations were increasingly a symbol of a nation reunited. Especially was this true of those which followed the Spanish-American war, in which sons of men who had worn the Blue and the Gray fought side by side in the same cause. And it was even more true of Memorial Day celebrations since 1918. The world war has left America this heritage—a Memorial Day of broader and deeper meaning than it has ever had before. It knows no North, no South, no East, no West. It honors the fighting men of no particular war, but of all wars. It is a trumpet call to all Americans to pay reverent tribute to the memory of their honored dead—the AMERICAN soldier.

General Orders No. 11

"Headquarters Grand Army of the Republic,
Adjutant General's office,
416 14th Street, Washington, D. C.,
May 5, 1868.

"General Orders, No. 11.

"I. The 30th day of May, 1868, is designated for the purpose of strewing with flowers or otherwise decorating, the graves of comrades who died in defense of their country during the late rebellion, and whose bodies now lie in the various cemeteries, city, village, hamlet and churchyards in the land. In this observance, no form of ceremony is prescribed, but posts and comrades will, in their own way, array upon such floral tributes as affection may dictate or circumstances may permit.

"We are organized comrades, as our regulations tell us, for the purpose among other things, of preserving and strengthening those kind and fraternal feelings which have bound us together in the day of our country's need, and mariners, who united together to suppress the late rebellion. What can we more fitingly do at this resort than by sheltering tenderly the memory of our dead heroes, who made their breasts a barricade between our country and its foes. Their soldier lives were the sacrifice of freedom to a race in chains, and their dust commands the nation's reverence from all arms. We should guard their graves with sacred solicitude. All that can exalt the form and grace and adorn the tomb the survivor can bestow, and yet we can not weave a wreath of immortality for those who living, reaped the highest honor at their country's hands. Not what we say here, but what our respective posts will do hereafter, is what will be remembered of us.

"If other eyes grow dull, and other hands slack, and other hearts grow cold in the solemn trust, ours shall keep it well, as long as the light and verdure of life remain to us.

"Let us, then, at the time appointed, gather around their sacred remains, and garland the passionless mounds above them with the choicest flowers of springtime; let us raise above them the dear ashes of our heroes, sleeping in honored graves, sheltered by the solemn pines, and in the shadow of our deepest forests, let us, in this solemn presence, renew our pledges to aid and assist those whom they have left among us a sacred charge upon a nation's gratitude—the soldier's widow and orphan.

"II. It is the purpose of the commander in chief to inaugurate this observance with the hope that it will be kept up from year to year, while a survivor of the war remains to honor the memory of his departed comrades. He earnestly desires the public press to call attention to this order, and lend its friendly aid in bringing it to the notice of comrades in all parts of the country in time for simultaneous compliance therewith.

"III. Department commanders will use every effort to make this order effective.

"By order of
JOHN A. LOGAN,
Commander-in-Chief.

"Official: N. P. Chipman, Adjutant General."

ICE PATROL TAKES UP PERILOUS DUTY

Begins Annual Battle With the Icebergs.

Washington.—One of the most picturesque sea patrols in the world has just taken up its cold duty—the observation of the steamer lanes of the North Atlantic by cutters of the United States coast guard which do the work for the international ice patrol.

A bulletin from the Washington headquarters of the National lifesaving guards society tells what the patrol is and how it operates.

"Fifteen years ago April 14, the Titanic, queen ship of the seas, carrying a precious cargo of some of the best minds of Europe and America, ran into an iceberg 350 miles south of Cape Race and sank with a loss of more than 1,500 lives," says the bulletin. "Ever since that catastrophe a guard has been kept each spring to protect the hundreds of ships and thousands of travelers on the world's greatest ocean ship lane.

No Ship Lost Since 1912.

"The annual battle with the bergs can be compared to some jungle tragedy in which the beasts of prey stand watch and wait for a lion or tiger has invaded their hunting ground, to slacken not one bit before they start in to up their normal life. The international patrol, the work of which is entrusted to the seamen and ships of the United States coast guard watches and waits for the icebergs to die. For four months, from March to July, the patrol scouts for the ice hazards which are impelled by the Labrador current to invade the haunts of men. No successful method of attacking the 'enemy' has been conceived, although experiments continue. But by watching the bergs like guardian crows in a corn field, the Tampa and the Modoc are able to warn by wireless the whole fleet of transatlantic shipping of ice dancer. No ship has been lost since the ice patrol began its guard in 1912.

"To the layman a report that a 90-degree cold wall is over the entire Grand Banks means little. It is very significant to the ice patrol. Bergs will drift down the banks practically intact as long as they are in the Labrador current, in which the water hovers near freezing temperature. But once they cross the 'cold wall' into the Gulf stream with its 55 or 60 degree water they waste away in a few days and disappear. Each spring the Labrador current forces a cold tongue of water into the warm Gulf stream, which flows northeast toward Newfoundland. The tongue reaches maximum toward the last of April and then recedes until it is confined once more to the Labrador coast.

Like Flying Dutchman.

"Going on ice patrol with either the Tampa or the Modoc in early spring is like embarking on the Flying Dutchman. That old legend of the ghost ship whose sails were condemned to sail around Cape of Good Hope is very real to the coast guard men on North Atlantic service. The Dutch ship and crew shuttled over the sea buffeted by gales because once the captain uttered an unseemly oath. For two solid weeks a coast guard crew lives amid the gales of one of the most dangerous planned spots on the seven seas because of a different sort of oath the nations made that the Titanic disaster should not be repeated. That oath reckoned, 'Ice floes on steam into the safe shelter of Halifax for two weeks' respite while the Tampa takes her place.'"

Peer of Trappers Gets 15,600 Pests as Catch

Salt Lake City, Utah.—For eleven years Roy Mussulman has trapped on the Indian creek cattle range.

He has lived a secluded life at his lonely cabin in Mormon creek pasture, Jack, a large, stately dog of unmixed mineral ancestry, and Old Blue, his faithful horse, being his only companions.

In this time he has caught 2,100 lynx, or animals, 6,000 coyotes, 7,500 foxes, 6,000 badgers and civet cats and numberless crows and small pests. Mussulman whose ratings he has protected consider he has no peer in the West as a trapper.

ERNEST W. CAMP

Ernest W. Camp, who is now director of customs, probably will be appointed to the newly created post of commissioner of customs, it has been reliably reported.

PRESS COMMENT

An Object Lesson—There is in process of development a movement, when the old ship has been rehabilitated and put back into fighting trim, to take "Old Ironsides" on a glory cruise around the Great Lakes. Such an itinerary engaged in by the frigate should thrill the hearts of millions and operate somewhat to halt the insistent urge toward pacifism, sentimental internationalism, socialism and the howling protests of those who cry opposition to every proposal for the protection of this government and its people against the contingencies of probable war.

In the days of the Republic's infancy and weakness,"Old Ironsides"—a fleet within itself—guarded and defended the young nation, assailed and crushed imposing and powerful assailants of the national security, making possible the development of a government in which even mouthing ultra-pacifists may shout anathema against readiness and adequate means for the defense of its children, under the folds of the protecting banner once borne through the shock and surge of heroic battle by the old 'sea warrior'—a standard which now whispers of a recrudescence of patriotism, from her berth of years' long rest. And should she leave that berth on a traverse of the nation's inland seas, the fact should stimulate in the hearts of young and old a furore of patriotic interest which a flood of pacifist propaganda could not drown.

As was said by Major General Foreman at Chicago, "It would be the finest antidote in the world for the tendency toward being ashamed of national Americanism." Nations live on traditions. Old Ironsides represents patriotic traditions. The flag at her mast should tell of glories past and ripple the promise of glories more surpassing still to come.—Cincinnati Enquirer.

Posing as Idiot, Russian Commits 1,000 Robberies

Nyitra, Czechoslovakia.—One thousand successful burglaries in less than six years, or an average of more than three each week, is the record of Ivan Barlivo, a Russian emigre, who has just begun a year's jail sentence here.

Barlivo's method was unique. He pretended to be an idiot who had lost his mind, due to hardships suffered on him by the Bolsheviks before he was able to flee from Russia. He would never discuss any other question except communism, the rebels, and "the Russian murderers."

For this reason he was looked upon as a harmless imbecile by every one who lived in the various villages in which he plied his trade. No one ever once thought of associating him with burglaries, although they occurred in rapid succession, sometimes three or four in one day, soon after his arrival in any locality.

Solon Would Legislate to Fix Size of Biscuits

Topeka, Kans.—The Oklahoma legislators appear to have gone Kansas one better in the matter of culinary reform.

An Oklahoma man wants to regulate the size of biscuits, fixing their width at three inches. A copy of a bill setting forth a reform in the size of biscuits was received recently from Oklahoma City. Kansas was urged to join in the uplift movement. If the three-inch-wide biscuit reform is good enough for Oklahoma, the sponsors of the bill believe that Kansas ought to try it out.

Senator James W. Finley of Chanute, who recently championed the abolition of mince pie, has been asked to study the Oklahoma biscuit reform bill and make a report.

Wed in Lion's Cage

Jersey City, N. J.—Married in a lion's cage, Ernest P. Gervais, chauffeur, and his bride are on their honeymoon with a substantial gift of rugs and furniture.

We carry the Heath & Milligan Mfg. Co. line of Dependable paints. None better—"Best since 1851." The blat is what we all want. Why not buy and use the standard quality on your next job?—Staley Bros. Hardware.

DEFINE 'BY JIMINY' AS OATH OF ROMANS

Originated From the Name of Twin Stars.

Washington.—"By Jiminy!"

Many people have uttered this exclamation with no thought of where it came from. As a matter of fact, when you say "by Jiminy" you are swearing a Roman oath, by two of the Romans' favorite gods. And then, by looking in the southern sky on an evening in the late winter, the gods, or at least the stars which represent them, can be seen. Those are the twins, Gemini, the astronomer calls them, and to old the Romans, and when we consider the great changes that words may undergo in a few hundred years it seems little wonder that our modern "Jiminy" is so similar to the original name.

Favorite Stars of Sailors.

These stars, and the gods they represent, were special favorites of sailors, and often the figures of Castor and Pollux, the twins, were placed as figureheads on ships. In the Bible we are told that when St. Paul left the island of Malta, where he had been shipwrecked, he "departed in a ship of Alexandria, which had wintered in the isle whose sign was Castor and Pollux."

But still earlier than Roman times, Castor and Pollux were favorites. Archaeologists have often found in the ruins of ancient Babylon basaltic stones and monuments with the "triad of stars"—the symbol of a crescent moon and two stars near it. These are among the oldest known records made by man, and they are also the oldest records of an astronomical event. Theatwo stars are the twins. The Babylonian priests were also the astronomers, regulated the calendar, and the year began when the twins and the new moon appeared together in the western sky at dusk. Now this happens to come at a relatively different time of year, on account of the motion of the stars, but we still are reminded of these ancient times, 6,000 years ago, by these Babylonian inscriptions.

Binary Stars Not Uncommon.

Castor is the brighter of the twins, and is known as Alpha Gemini by the astronomer. This follows the usual naming of stars and so the name means that it is the brightest star in the constellation of Gemini. When it is seen through a telescope it is no longer a single orb, but is revealed as a pair of twin suns, or what astronomers call a binary star. Binary stars are not uncommon in the sky, for about one out of every 20 stars that we see can be shown as double by a large telescope, but Castor is one of the finest. Like the other double stars, the two members of the pair are continually revolving around each other.

Wide Pants, Short Skirt Start Rumanian Riot

Bucharest, Rumania.—Armed police had to be called upon here to rescue Rumanian dandies, who now wear the "charleston" trousers, as Oxford bags are called here, and ten jackets and pancake hats, from a mob of self-appointed sartorial censors who asserted their esthetic sensibilities had been outraged by the exotic raiment.

One youth, cornered by 200 men, was forced to promise to change his trousers. Police rescued him and, with drawn bayonets to keep back the crowd, took him to the station house.

The fair sex is not escaping the attentions of the censors. Several girls with skirts considered too short have been the objects of demonstrations, but thus far there have been no casualties, either to skirts or baggy trousers.

Marble Steps Are Test for Baltimore Wives

Baltimore.—Miles of white marble steps in Maryland's largest city maintain their purity of hue through the daily labor of housewives upon their knees with scrubbing brushes, soapsuds and pumice stone.

The pristine glory of the front doorstep is counted a direct measure of housewifely efficiency in the residential sections. The luckless sister who suffers the grime of yesterday to remain on her front stoop later than noon is likely to encounter the scorn, pity or levity of her neighbors.

In summer evenings the white stoops double for front yard and parlor. The families gather upon them while neighborhood gossip eddies up and down the streets.

Get Him, Scouts!

Buffalo, N. Y.—A butcher with the control of Grover Cleveland Alexander routed two holdup men by throwing a piece of salt pork at the bandits when told to throw up his hands.

SPECIAL DINNER

Sunday, May 29th

from 12:30 to 2:30 p.m.

75c Per Plate

Hotel Charlevoix

DR. H. VAN ROYEN

An especially posed portrait of Dr. H. Van Royen, the newly appointed minister from the Netherlands to the United States.

THE THEATRE

"If"—There are three kinds of people in this world of ours. Those who wish they had, those who haven't and those who have—IT. Betty Lou, sales-girl in the Waltham department store, belonged to Category Three and she knew it. Men spotted her as he entered the door and she was able to sell ear muffs in the summer, ice bags in the winter, and a good line all the year round. Betty Lou was twins and they were twins who knew what she wanted, she "got her man!"

For instance, there was the case of young Cyrus Waltham. He'd walked in one day and absolutely disregarded her. The other girls laughed when she said it was only a matter of time before he'd be eating out of her hands. So Betty set out to accomplish the seemingly impossible. He was rich and influential in society; she was poor and a clerk in his big store. But—Betty Lou was one girl in a million and she—!

That's the way Clara Bow's first Paramount starring vehicle opens. "It" was written by Elleanor Glyn especially for Miss Bow and in "It" she illustrates exactly what is meant one Glyn. "He has It." The film arrives at the Palace theatre on Saturday and Sunday.

The Great T. & A. Train Robbery—Tom Mix playing the starring role of Tom Gordon, a detective, in "The Great T. & A. Train Robbery," Fox Films latest release, which will be shown at the Palace theatre Monday and Tuesday, disregards the danger of death from bullets as he flees from a gang of desperadoes, and runs aside to rescue a girl whose horse has bolted, and who has caught her foot in a stirrup and left her head hanging near the runaway's flying hoofs.

Gordon saves her in spite of her fight to escape him because she believes he's a bandit and the pursuers are a sheriff's posse.

After she has had time to think it over, the girl concludes such a chivalrous man could not be an outlaw, and when he reappears in her own father's home, again apparently a desperado, the girl decides one good turn deserves another and hides him in a closet in her bedroom, so that he can elude her fathers pursuit.

These are only two of the many dramatic and thrilling scenes in the picture. Dorothy Dwan, who plays the feminine lead, gives the screen a new masterpiece of screen riding and acting.

SPECIAL EXAMINATIONS FOR 6-7-8th Grades.

So many pupils were either sick or in quarantine at the time of the regular Seventh and Eighth grade examinations, special examinations will be held for these pupils on June 6 and 7. Seventh grade subjects will be given the first day and the eighth grade the second.

Only those pupils who for unavoidable reasons were unable to attend the regular examinations will be allowed to write the special examinations.

Those students wishing to take the above examinations should notify the Commissioner at once,

A. C. BELDING.

Coming May 31

Tuesday, May 31, is the date when Dr. Leahy, the Optometrist, will be at the Hotel Charlevoix.

Headache, dizziness, nervousness, indigestion, crossed eyes and all other symptoms of eye strain corrected. Glasses guaranteed to fit.

Island Found by Dutch

Tasmania, the large island near Australia, was discovered in 1648 by a Dutch navigator named Tasman. He named the island Van Diemen's Land after the Dutch governor of Java at the time. Later the island received the name of the discoverer, Tasman.

Dependable Paints manufactured by Heath and Milligan Mfg. Co. "Best since 1851." We carry this line of high grade paint and will be pleased to show you color lines and upply your needs

Staley Bros., Hardware.

Dewberry, Long Lost to Horticulture, Rediscovered

Washington.—A new dewberry, lost to the horticulture world since its origin in 1905, has just been rediscovered by the Agriculture department and recommended to farmers for trial.

The dewberry is called "Young" for its originator, B. M. Young of Louisiana, and bears fruit larger than the general Lucretia variety, is much sweeter than the Logan and of an exceptional high dessert quality, the department said.

Soil and climate in southern and southeastern states is adapted for raising this berry, which is an attractive drop-vine color, according to the department.

Church, Then Pool Hall, Turns to Church Again

Junction City, Kan.—Erected in 1868, and used as a church, later turned into a school and then a pool hall and now back to a church again is the record of the Methodist Episcopal church at Milford, which recently "came into its own again."

Many years ago the congregation was disbanded and the church was used for a time as a school building.

Later it was turned into a pool hall but several months ago the work of reorganization was begun and the congregation, including some of those who worshiped 50 years ago, is again attending services there.

The Sinner

During a recent speed-law enforcement wave a motor officer stopped an autoist. He was met by the inquiry, "What are you holding me up for? I wasn't speeding."

"I know it," was the reply.

"And I am not drunk—have not been drinking."

"I know that, too, but you haven't your dimmers on."

"That's funny; I certainly put on everything Mary laid out for me."—Los Angeles Times.

WANTED—boys and girls from eight to eighteen years of age, to earn spending money and attractive prizes by working for a well known and popular magazine. Full instructions will be given, and no investment or expense is needed. Address Mr. Gordon, The National Republic, 425 10th street N.W., Washington, D.C.

Shocking Affair

Ostriches have the latest fine feathers but they have bad tempers, so a device has been invented to conquer these birds. It consists of a handle six feet long, with a fork at the top which carries a strip of brass. When inside against the neck of a charging bird, an electrical contact is made and the bird is given such a shock that docility results.

Uncle Eben

"De oldest man," said Uncle Eben, "was Methuselah. But in all dem years he didn't ever have de whole people t' celebrate his birthday."—Washington Star.

New Palace Theatre

ATTRACTIONS FOR THE WEEK

Saturday and Sunday
May 28-29

Double program—Clara Bow in "It", a special, an Elinor Glyn-Clarence Badger production with Antonio Moreno. Oh, lady, this has got it! Comedy, class, drama; and love scenes as only Elinor Glyn can write them! Some girls have It. Millions wish they had It. What is it? Soon you'll know. Also "The Mona Lisa" with Hedda Hopper and Crawford Kent, done in technicolor. As romantic as the thrilling history of the Mona Lisa. As beautiful in full color photography as DaVincis great picture itself. No advance in prices.

Monday and Tuesday
May 30-31

Tom Mix and Tony, the wonder horse, in "The Great K & A Train Robbery." You've never seen such hard riding, such deadly shooting or such trick roping as Tom uncorks in this one. Its by far the best that one of Mix's sons has ever turned out and that is saying a pageful. Also a comedy, "Dumb Bells."

Wednesday and Thursday
June 1-2

"Rolled Stocking." By popular demand, the stars of "Fascinating Youth," featuring Charles Rogers in another big special. Also a cartoon, "Raging Tide," and Fox News.

LUDINGTON WILL GET GRANITE MONUMENT

Spot of Father Marquette's Burial to be Marked by University

Erection of a monument to Pere Marquette, Jesuit priest and early American explorer, on the spot where the missionary was buried near the present city of Ludington, is under contemplation by Marquette University of Milwaukee.

The Rev. Fr. James Golder, of Ludington will confer with a group of Ludington men in an effort to determine the exact location of where the missionary was buried in 1675.

History records that Father Marquette was buried near Ludington in the winter of 1675 and that the following spring a band of Indians who had been converted to Christianity, reverently exhumed the remains and removed them to a spot near St. Ignace.

The University will erect a granite shaft at the spot and annual visits of the Marquette students are planned.

To Sell Home of Author of "Home, Sweet Home"

New York.—"Home, Sweet Home" is for sale. The inspiration for John Howard Payne's famous sentimental song, the old gray farmhouse, aged by the snows of many winters, in which the author spent his boyhood at East Hampton, Long Island, is to go to the highest bidder.

The home was owned by Gustave H. Hinek, president of the Alco Gravure company, until his death recently. Now his widow, Mrs. Hannah Louise Hoek, has announced her intention of disposing of the property.

Crime Is Expensive

New York.—Crime exacted [illegible] States at least $16,649,000,000 [illegible] It is estimated by Stuart [illegible] the Manufacturers

DOMINICANS LET CONTRACT FOR NEW PAROCHIAL SCHOOL

Contracts have been let for the new St. Dominic's school, Warren and Trumbull avenues, Detroit. The building, which will cost approximately $150,000, will include 12 class rooms, a large auditorium and facilities for social affairs.

St. Dominic's parish was established only about six months ago by the Dominican Fathers with the Rev. Vincent F. Kiesberger, O. P., as pastor. The attendance at services has grown until the crowds at Sunday services have reached 5,000.

Manistique—At least 150 delegates of the Women's Catholic Order of Foresters will convene in this city May 24. Elaborate plans for their entertainment have been made by the Manistique Court of the W. C. O. F. In addition to delegates from nearby points, visitors are expected from the iron and copper country.

Marquette—Two Redemptorist missionaries from the famous shrine of St. Anne de Beaupre, Quebec, conducted a two weeks' mission in St. John's church here recently. Services were held in both French and English by the priests.

Shortest Railroad in World Sells for $1,100

Kalama, Wash.—The town of Ostler, Ore., now owns the shortest railroad in the world, having bid in and purchased the utility at a sale for delinquent taxes. The road, sold by the sheriff, owed many thousands of dollars. It is ten miles long, constructed years ago to connect the territory with the Oregon Short Line at Cove. The purchase price, $1,100, includes a locomotive, one passenger and three freight cars as rolling stock.

—) PERSONALS (—

MY COUNTRY

When it shall be said in any country in the world, "My poor are happy; neither ignorance nor distress is to be found among them; my jails are empty of prisoners, my streets of beggars; the aged are not in want, the taxes are not oppressive; the national world is my friend, because I am a friend of its happiness." When these things can be said, then may that country boast of its constitution and its government.—Thomas Paine.

Henry Taggart of Central Lake, was a business visitor here Monday.

Dr. Leahy, the Optometrist, will be here again Tuesday, May 31, all day.

The Maccabee card party scheduled for Friday, May 27, has been indefinitely postponed.

The Women's Guild of the Episcopal church will meet with Mrs. R. A. Emrey Wednesday, June 1.

The Congregational Ladies' Aid society meets next Wednesday afternoon with Mrs. John Burns, on Grant street.

Bob Morse returned to Lansing Monday evening, after spending the week end with relatives and friends here.

Mrs. Harry G. Parker of Owosso, was a guest of her cousin, Mrs. Ira A. Adams, during the early part of this week.

Roscoe Mackoy and William A. Stroebel, the latter postmaster and both of Void Jordan, were visitors here Wednesday.

Miss Sylvia Block of Chicago, is spending a ten days vacation with her parents, Mr. and Mrs. William G. Block, 312 Mason street.

John B. O'Donnell, who has been attending to business affairs here for several days, returns to his home in Grand Rapids today.

Attorney J. M. Harris of Boyne City is spending some time here this week on matters connected with the present term of Circuit court.

Dr. C. W. Hewett returns to Jackson today after spending several days in Charlevoix and nearby territory attending to business interests.

Mr. and Mrs. W. D. Otis, Mrs. Anna Noteware and Mr. George A. Sanford of Hellaire, were business visitors in Charlevoix last Thursday.

Mr. and Mrs. Albert Holmes returned last Tuesday from an extended vacation of several months, the major part of which was spent in the sunny south.

R. A. Emrey, who recently spent about ten days at Hanover and other northern points, is back at his desk in the express office and attending to his usual duties.

Howard Thorman, owner-manager of the Thorman Country Club, returned from Charlevoix Tuesday evening and is making preparatory arrangements for an early opening of his resort.

Mr. and Mrs. L. P. Adams and daughters Misses Nellie and Mary, motored up from Miami, Florida last week arriving at their home here Friday morning. The trip being made in about four days.

George W. Beaman is spending a few days in Grand Rapids, attending the annual meeting of the Michigan Grand Lodge, F. & A. M., in which he is representative of Charlevoix Lodge No. 282.

Mr. and Mrs. George W. Priest, for several months past visitors in the south, principally in Florida, returned to Charlevoix last Friday and are occupying their Clinton street cottage for the season.

Oral Riker, one of the students seriously injured when the Community School at Bath, Michigan, was blown up with dynamite last week, is a nephew of Mrs. William Vaughan, the latter a resident of Petoskey.

Carlton Knight returned to his home, Kalamazoo, Wednesday after spending several days here with his mother, Mrs. May Knight, who arrived here some days ago and will remain through the summer season.

Next Tuesday evening the members of the L. O. T. M. will hold a regular meeting at which all members are requested to be present. A splendid program has been arranged which will be pleasing to those in attendance.

William J. Bogart recently completed a large dining room, an addition to some resort property at Bay Shore, and at the same time constructed a screened in porch for the same party, making a nice improvement to the property.

Attorney John W. Petebin of Traverse City, has been attending to interests of a client, a case that has been occupying the attention of Circuit court officers and a large number of local citizens during the first few days of the session.

Dr. and Mrs. W. W. Mitchell and family left Miami Beach, Florida, last Sunday by motor, and arrived at their home on Park avenue Wednesday afternoon. They report having spent a most enjoyable winter in the south, but glad to be in Charlevoix again.

Mr. and Mrs. E. G. Dutton, of Saginaw, called to Charlevoix on account of the death of Mrs. Dutton's father last Sunday afternoon, arrived early Monday morning, making the trip by auto. They of course remaining until after the funeral service Wednesday.

One of the teachers dangerously injured at Bath, Michigan, at the time of the explosion which wrecked the community school building, is a resident of St. Ignace. Besides having one of her legs broken in two places she received internal injuries of a serious nature.

Seventy-eight of the larger cities reporting automobile accidents which caused four hundred and ninety-one deaths victims for the month of April. The same period for the year 1926 shows four hundred and twenty-three deaths, an increase for the year of sixty-eight for corresponding periods.

F. A. Franklin, manager of the club on the grounds of the Chicago club, was a passenger on the Puritan last Sunday. Wednesday she returned to Chicago where she will be detained several days after which she returns to Charlevoix to attend to duties incident to the formal opening of the club for the season.

Messrs. Charles R. Daniels and H. G. Hart, representatives respectively of the Grand Rapids Press and Grand Rapids Herald, paid the Sentinel office a visit last Tuesday while here with the newspapers' extension trip, a visit wholly pleasing to the editor and was trust agreeable to the visitors.

Everyone interested in Sunday school work is invited to the County S. S. Rally at Barnard M. E. church Thursday, June 2, beginning at 1:30 p. m. There will be a fellowship supper (potluck) at 6 p. m. and an evening session at 7:30 p. m. Rev. Halpenny, the state field worker, will be present and give two addresses.

Mrs. S. J. Bacor of Junction City, Oregon, is expected in Charlevoix Friday of this week and will again make her home with her daughter and son-in-law, Mr. and Mrs. Frank Shuler, Muskegon; Mr. and Mrs. G. E. Durton, Saginaw; Mr. and Mrs. Henry Newberry, Michigan City, Ind.; Mr. and Mrs. William Lawrence, Mr. and Mrs. George Lawrence, Earl Lawrence and William Sommons, Saginaw; Mrs. Noyes Nichols, Iron Mountain; Mr. Corbett and family, Petoskey. Mr. Corbett was a personal friend of long standing, since their boyhood days.

The musicale for the benefit of the high school band, will be given in the Palace theatre, Friday, May 27.

To the Friends and Patrons of the Frank M. Sears' Garage:

The Sears Park Garage will be operated this season by the Sears Estate. The operation will be under the same policies as in former years and we solicit the continuance of your patronage,
1-1 SEARS ESTATE.

BIG DAY AT LOEB'S SCHOOL TUESDAY

The schools of Marion Township had their annual meeting Tuesday at the Loeb school. Every minute was occupied with something of interest. Ball games between Barnard, Phelps and the Loeb school resulted in Barnard trimming Loeb to the tune of two scores for every one made by the latter. In the afternoon Phelps played the winners and beat them by one score.

Then came the eats, a little tardy, but rll the more welcome. Pies, cake, potato salad, jello, beans, pickles, lemonade and lots of everything.

The May pole added to the attractions. Girls dressed in white wound in and out and back again, while their queen looked on from her throne near by.

Rev. Mr. Mattson gave a very appropriate address to the dedication and raising of the new flag and staff. Mr. Henry Bigelow, a Spanish war veteran raised the flag while the school sang The Star Spangled Banner. The ceremony was concluded by all singing America.

A very good program was given by the schools participating.

Judges reports were read, Commissioner Belding gave a farewell talk and to ended the day.

HENRIETTA CORLETT BALDWIN

Life Terminated Monday, May 23

"Leaves have their time to fall,
And flowers to wither at the north wind's breath,
And stars to set; but all,
Thou hast all seasons for thine own, O death!"

Henrietta Corlett Baldwin passed from this life at the home of her parents, Mr. and Mrs. D. H. Wood, 209 Petoskey avenue, at midnight Monday, May 23, her death being the culmination of an illness of several months duration. An illness serious from its earliest inception which failed to yield to medical treatment, and one such as scientists and specialists were unable to successfully cope.

She graduated from the Charlevoix high school, an honor student and salutorian, class of 1925. Following this she made arrangements to continue her studies at the U. of M., making the trip to Ann Arbor preparatory to entering college, and it was at this period that her illness developed which necessitated her entering the university hospital for a major operation, which was performed on October 9. For days and even weeks thereafter but slight hopes were entertained for her recovery, but her youth and fine constitution carried her safely through critical periods and upon reaching a point of safety she returned to her home. While she at no time fully regained her earlier physical condition, she continued to show marked improvement until Monday, May 16, from which time she gradually failed.

Henrietta Corlett Baldwin was born at Boyne City September 16, 1908, a daughter of Mr. and Mrs. Emrey Baldwin, the latter now Mrs. D. H. Wood, her father passing away soon after her birth, a victim of typhoid fever.

Henrietta spent practically her entire lifetime in this city where she was well known and held in high esteem, always surrounded by a home life which was most ideal, such as was most conducive toward character building and with such young associates as could fully comprehend her high ideals of life, all of whom were anxious and ready to assist and do her homage. So well was she known in this community that an extended review of her life is unnecessary and non essential, and which can best be summed up by saying that here was a record of a noble life, replete in ideals the loftiest and purest, full of inspirations such as brought her ever and made her dearer to family members and friends.

Funeral services will be held this afternoon at the family home, with her pastor, R. G. Matteson, D.D., officiating.

T. R. Dazed Only Once, Says Railroad Veteran

Washington.—Conducting Presidents on official, political and private trips about the country is a familiar experience to Capt. David E. Hardester, veteran pullman conductor of Washington.

He served President Wilson as conductor of his official and private trains for eight years, and was in charge of Calvin Coolidge's train during his first election campaign.

"Roosevelt and Wilson were both effective rear platform speakers," is Captain Hardester's opinion, and he found them both unniversal readers between stops.

"The only time I ever saw Roosevelt fluffed was when a hidden camera man unexpectedly set off a noisy flash light," he recalled. "It seemed to come from nowhere and startled both of us. Roosevelt recovered himself instantly and smilingly putting his hand on my shoulder, remarked: 'What's the matter with you, Hardester?'"

Lizard Porridge Used to Curb Errant Husbands

Leicester, England.—Central' African native wives have a first belief in lizard porridge as a food for errant husbands, according to Rev. A. S. D. Hauger, who has returned home after many years' missionary work in central Africa.

He says the native women whose husbands have strayed from the path of faithfulness dry lizards in the sun, pound them to a powder and put it in their husbands' porridge. The women have a first belief in the efficacy of this remedy because of the husband's ardent.

Buy your tomato and cabbage plants at the Aldrich Greenhouse, 921 State street.—Adv. 5-6

CHURCHES

Church of God

Sunday services at 10:30 a.m. and 7:30 p.m. Sunday school at 11:45. Prayer meeting Wednesday 7:30 p.m., topic, "Fellowship."

All young people are requested to be present Sunday at 6:30, for reorganization, choosing new officers, etc.

Preparations for Children's Day, June 19, are under way.

Everyone is invited to come to hear Bro. Gerrix as he proclaims the gospel.

Congregational Church

Rev. B.G. Mattson, D.D., Minister

At half past ten o'clock this church will unite in the union service to be held in the Methodist Episcopal church in observance of Memorial Sunday.

The regular sunday school session will is held at noon.

Young people' meeting at 6:30 p. m. and evening service at 7:30.

The evening service, thought and conversation, will center around a very choice book entitled "The Spirit of Christ," by Abraham Kibbany, a native Syrian who has risen to a position of literary and Christian leadership in America. The subject will give many beautiful illustrations and explanations of the customs referred to in the gospels, many of which are perpetuated in Syria to this day. Those who attend will find themselves enriched with a more enjoyable intimacy with their new testaments and with a fresh appreciation of the truths of the gospels.

The mid-week meeting will discuss living forces and significant events in the extension of Christianity through out the world No force today has more virility in it than the Christian Church. Cynical writers in magazines and novels make cheap capital out of the defects of certain types of religion which are rapidly passing away. It will be the aim of these evening conferences to meet such superficial ignorance and self-assurance with real facts and with glimpses of many noble and fruitless lives giving devoted service to many callings in many parts of the world.

Services at Ironton will be held as usual.

Methodist Church.

C. E. Pollock, Pastor.

Next Sunday is the church:

Union Memorial service at 10:30 a.m.
Sunday school at 12:00 m.
Epworth League at 6:30 p.m.

"The Great Word of a Great Methodist," sermon theme at 6:30 p.m.

The Petoskey choir from the First Methodist church of that city, under the direction of C. R. Tanner, will render a sacred concert at the evening service. There will be lots of choral singing also under Mr. Tanner's direction. The public is cordially invited.

The Epworth League held a very novel Sunday morning service last Sunday. The meeting place was on the top of Mt. McSauba. Singing, good fellowship and a brief address by the president, Addison Oakley, was followed by a morning breakfast in the open.

Baptist Church

Rev. Herman Burns, D. D.,
—) Pastor (—

The coming of Dr. Barnes was an event in our church life. His strong appeal for an educated Christian people will not soon be forgotten. Some Charlevoix young people will surely seek to secure a higher education. If not in Kalamazoo college, then in some other of the many—seven of them outside the state institutions in Michigan—because of his visit here.

The congregation last Sunday morning gave an offering to the sufferers of more than twenty dollars, and about the same amount to our emergency work in China. They were worthy gifts and made by a worthy people. The evening congregation greatly enjoyed the singing of Miss Black, and all say "come again."

The Mission Circle is meeting today with Mrs. Sam Hamilton for election of officers for the next year, and next week from today, June 1, the Ladies' Aid will meet with Mrs. Eva McGhan for the same purpose. Both of these meetings should be well attended.

Next Sunday morning we join in the union memorial service at the Methodist church. The other services for the day will be as usual, with a welcome to all who come.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "Unreality." Sunday School 12 o'clock. Wednesday evening service 7:45. Reading room, Tuesdays and Saturdays, 3 to 5 p. m.

The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church

Sundays 8:00 a. m., and 10:00 a. m.
Mondays and Tuesdays 8:00 a. m.
Saturday 7:00 a. m.

Rev. Fr. Odelo.

First Perforated Stamps

Postage stamps before being perforated, which was first practiced in 1851, in Great Britain, were cut apart by scissors or knife. The British government bought the patent for perforation of stamps from a man named Archer in 1853.—Boy's Life.

Card of Thanks

We desire to express our heartfelt thanks and appreciation to our neighbors and friends for their assistance and express

Fine Home for Women's National Democratic Club

This handsome old mansion on fashionable New Hampshire avenue in Washington has been purchased by the Women's National Democratic club for its headquarters in the national capital. The club has made rapid progress in the last few years.

England's Newest and Most Powerful Battleship

The H. M. S. Nelson, England's newest and most powerful battleship afloat, as it left Newcastle for Portsmouth to go through naval maneuvers. It was constructed at Newcastle, and is named after Lord Nelson, one of England's most famous sea fighters.

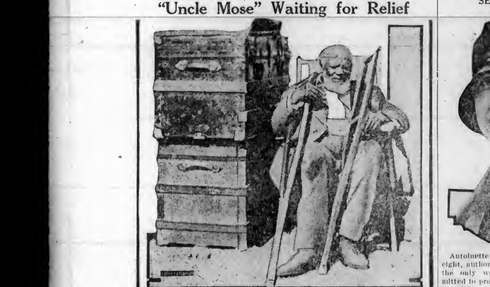
Turned Down by the Royal Academy

John Collier, famed artist, with his painting of George Bernard Shaw. British writer and critic, which has been turned down by the hanging committee for this year's Royal academy exhibit in London.

COUNTESS DE CAEN

Countess Constance-Hillyer de Caen, descendant of French royalty, who is in Washington organizing parties of American gold star mothers for visits to the graves of their soldier dead in France. She will also arrange visits for privately to the graves for mothers who cannot afford the trip to France.

"Uncle Mose" Waiting for Relief



"Uncle Mose" with all his worldly goods waiting on the high section of the levee at Greenville, Miss., for the return of the Red Cross relief steamer to take him down the river to the newly established camp for refugees at Monroe, La.

SEA LAWYER

Antoinette Isidores Bechner, twenty-eight, authority on maritime law, and the only woman attorney ever admitted to practice maritime law before the United States Supreme court. She is also special attorney for the United States shipping board and the interstate commerce commission, maritime division.

SHORT ITEMS OF INTEREST

Parrots made a favorite dish of epicureans in ancient Rome.

Illinois has a law which gives $1,000 to any one who kills or captures a bank robber.

Alaska cost us $7,200,000. The output of her mines since 1880 is valued at $500,000,000.

Many kinds of insects spread plant and animal diseases.

Shanghai is larger in population than New Orleans, Cincinnati and Buffalo combined.

A boy just born near Clitheroe, Yorkshire, England, is the latest arrival of five living generations.

Men who work with their hands are being paid, collectively, 27 per cent more than they were 25 years ago.

The KITCHEN CABINET

(©, 1927, Western Newspaper Union.)

People have to live first before they can live, and they can't think well until they are fed, and one needs always to have hot enough liveliness and cabbages to eat without troubling about the spelling thing, in order to see anything in them except food.—Mrs. Wilkins.

UNUSUAL CHICKEN DISHES

The familiar forms of the usual way of cooking chicken is relieved from monotony by various seasonings. One does not wish the character of a dish to be lost by seasonings, but the art of surprising with the familiar things is worth cultivating.

Chicken a la f arengo

—It is this dish which was served the great Napoleon after the battle of Marengo—it so pleased the great man that the dish was named for the battle. The following is a recipe which claims the honor:

Singe and cut up a five-pound chicken as for fricasee. Melt two tablespoonfuls of butter in a saucepan and add three tablespoonfuls of the best olive oil. When the fat is hot, add the dark meat of the chicken and cook for five minutes, then add the white meat with a clove of garlic and salt and pepper; stir often until each piece is well browned—about twenty minutes. Have ready a tomato sauce made from one can of tomatoes, a slice of onion, a little parsley and celery which have been cooked together until thick, then rubbed through a sieve, and one tablespoonful of butter. To the chicken add half pound of fresh mushrooms which have been cooked in butter five minutes. Arrange the chicken on a hot platter and the gravy in the pan three tablespoonfuls of the tomato puree, stir until hot, pour over the chicken and serve.

Chicken a la Stanley.—Add one onion thinly sliced to one-fourth of a cupful of butter and two young chickens cut into pieces for serving and cook for ten minutes; add one cupful of chicken stock and cook until the meat is tender. Remove the chicken, rub the stock and onion through a sieve, add one and one-half tablespoonfuls of butter and the same of flour, cooked together. Season with salt and pepper, serve on a hot platter with the sauce, poured around it. Garnish with banana, cut into diagonal slices and fried in butter. Dip the banana in seasoned flour before frying.

Chicken a la Marengo No. 2.—Cut the chicken, sprinkle with salt and pepper and dredge with flour. Fry in a little salt pork fat, put into a stew pan, cover with the following sauce, and cook slowly until the chicken is tender. Add one-half can of mushrooms cut into quarters and cook five minutes. Arrange the chicken on a dish and garnish with parsley. Serve with the sauce poured round the chicken:

Sauce.—Cook one-fourth of a cupful of butter with one tablespoonful of finely chopped onion, fine slice of carrot, one slice of turnip cut into cubes. Add one-fourth of a cupful of flour, a dash of cayenne, one-eighth of a teaspoonful of pepper, and cook until the flour is well browned. Add gradually two cupfuls of boiling water and one-half cupful of canned tomato, cook five minutes, strain and serve.

Sea Foods.

Let us break away from the old custom that Friday is the only fish day.

Fish should be served oftener; one may not lie side to have the fresh fish in any locality, but the canned, smoked, pickled and salted are usually in ordinary markets; if not, it is easy to express they will be sent to any address.

Planked Spanish Mackerel.—Split down the back a two-pound mackerel, dust with pepper and salt, and rub thoroughly with salad oil. Lay on an oiled plank, place in a very hot oven for about twenty minutes. Baste frequently with melted butter and a few drops of lemon juice. Remove from the oven and pipe seasoned mashed potato around the fish, brush with the yolk of egg beaten and run the plank under the gas flame to brown. Have meat from a half pound of cooked lobster, dip in butter and lay around the fish. Garnish with slices of lemon and parsley.

Fillet of Sole Marguery.—Take a three-pound sole, one-half pint of cooked shrimps, two tablespoonfuls of butter, one-half cupful of mushrooms, one tablespoonful of flour, three slices of lemon and onion, three sprigs of celery, one-fourth teaspoonful of celery salt and two egg yolks. Put enough water into a saucepan or fish kettle to cover the fillets, add lemon, onion, one tablespoonful of butter, celery and celery salt; cook ten minutes, then add the fish; cook till tender but unbroken; remove the fish to a platter and keep hot over hot water, strain the sauce, adding another tablespoonful of butter, the shrimps and mushrooms. Cover and let cook ten minutes, then stir in the flour mixed with enough water to make a paste. Stir and cook five minutes, add the beaten yolks and cook just long enough to heat through, but not boil. Add more seasoning if needed.

Nellie Maxwell

Appropriate Name

Smithwall is the western portion of the strait separating the Isle of Wight from the English mainland. It receives its name from the Spit, a sandbank which runs out for a distance of three miles from the coast of Hampshire, a beautiful southern county of England.

Sometimes Bad Company

First Beefsteak Club

A beefsteak club founded in the reign of Queen Anne early in the Eighteenth century is believed to have been the first. It was composed of the "chief wits and great men of the nation," and had for its badge a gridiron.

Built on the Sand

If hedging a growing youth shows with more wire fences will keep him straight, then his intellectual growth is not worth a copper.—James Hunneker.

VELVET APPLIQUE IN BOLD DESIGN; MILLINERY TAKES TO WIDE BRIMS

WHILE velvet in itself is not a novelty, the fact that it is playing, as all-year-round engagement on the stage of fashion is decidedly novel and modern. It is significant that prominent creators catering to the fashionables and elite of society in Paris whose decisions are generally accepted as setting style are paying much attention to velvet. This is true not only in regard to velvet as a trimming, but velvet jackets and coats are quite the smart style item of the moment.

Creating no end of excitement among those who aspire to the unusual are the new-vogue slender pastel-colored velvet coats. They are certainly lovely and one can readily foresee the triumphs they will score in the coming months. Just now they are being worn over matching crepe frocks, but later they will be used with top frocks of sheer flowery prints. Short velveteen jackets are also notable, especially with silk plaited skirts.

As to velvet in millinery, it is scheduled to trim the majority of white-trimmed black million straws. The large drooping horsehair capelines in lovely colorings, simply trimmed with wide velvet ribbon are a joy of smuster prouitte.

Used in a trimming way on frocks and coats, velvet shows a distinguishing mark of chic. Applique velvet scrolls and circles combine many a costume of crepe or satin. In the instance of the models in the picture thus embellished, the designer uses luster satin frock over which is worn a slender coat of the material which is all-over quilted, then collared and cuffed with matching velvet, with the added attraction of a big velvet ribbon bow.

While brims? The large hat is not only a summer fashion to be, but it is an immediate spring mode. Surely the capriciousness of millinery is manifesting itself in the matter of brims this season. The pendulum swings from the brimless to the wide, wider, widest brims. Not that the capluke snug shape is losing its popularity, not at all, but the mode now includes both types in its program.

As to the favorite wide-brim hat, it is manifesting the large black Italian straw, such as is the feature model in the center of this group. Just such a one should be included in every wardrobe, for luncheoning, for tea and the coming summer. Black satin borders and bands this elegant sailing, two sparkling ornaments completing the effectiveness.

Velvet is regarded very smart as a hat trimming. It is velvet which so handsomely bands the crown of the huge-brimmed model shown first in this picture. The glamorous semiband shows off resplendently against its velvet background.

We are so accustomed to seeing the tilly sung crochet hat that a broad-brim crochet type such as is pictured at the top to the right seems almost a novelty by way of contrast. This exquisite crochet vieux is turned up at both of its with the lifting of the manner which lends something my life so long.

"I am so happy I know not what to do," protested Marjory, wiping her eyes. "Hut, oh, see who comes!"

We followed her pointing finger; and there, striding between the ordered house-fronts of Pearl street, exactly as I had seen him the first time we met, came Ta-wan-ne-ars, the eagle's feather waiting from his scalplock, the wolf's head of his clan insignia painted on his naked chest. His grave face was smiling. His right arm was raised in salute.

"Qua, ta-ewy-ra-ra-go! Qua, friends! Ta-wan-ne-ars greets you."

"Have you any further news?" questioned the governor, short as always for tidings of his distant doublons.

"Only news of peace. The frontier is quiet. The Doom Trail is closed. The far tribes are traveling to Albany to offer their allegiance and friendship. The fur trade is once more under control of the English and the Long House."

"We have waited long for you to visit us, brother," I said. "Now that you have come we shall make you stay many moons."

His smile became sad.

"It cannot be. Ta-wan-ne-ars comes to say good-by."

"Good-by?"

"Yes, brother. Have you forgotten the search for my Lost Soul?"

"But she is dead!"

"She is with Atta-en-sic, Ta-wan-nears seeks his Lost Soul. He has no fear. He will go through Da-ye-ha-dis-go-wer, the Great Home of the Winds, where Ga-oh, the Wind Spirit, dwells. He will go through Ha-ah-kase-no-ga, the Dwelling Place of the Evil-Minded. He will go to the world's end if the Great Spirit will but guide his footsteps."

He would not step indoors for food, but insisted on walking back toward the Broad-Way with Master Burnet and me. At the Bowling Green we encountered Peter Corliner.

"Ha, Peter," the governor hailed him. "Well met, indeed. What hath earned us this honor?"

"I benvit Ta-wan-ne-ars was here," he panted. "I followeit him down rifer from Fort Orange."

"What does Corliner wish?" asked Ta-wan-ne-ars.

The big Dutchman stammered and gurgled with embarrassment.

"I go with you," he gasped after much effort.

"I go to the Land of Lost Souls."

"Ja, that's all rights," returned Corliner. "I go with you."

The hard lines of the Seneca's stern face were softened by a rare glow of feeling.

"Ta-wan-ne-ars never doubted Corliner. Ga-en-gwa-ra-ga!" he answered, squeezing Peter's hand in his. "He would not ask any to go with him he knew the peril is great. But he will be glad to have Peter by his side. We will take the first boat which leaves."

"One is sailing from der Whale's Head wharf," suggested Peter.

"Good. Then we will say good-by here."

"No, no, we will accompany you to the wharf," said the governor. "Where are you from, Peter?"

"I was in der Shawnees' country when I hearit Ta-wan-ne-ars was going upon a long journey alone. So I go to De-o-nun-ta-ga-s, nodt from there to Fort Orange unit here."

"How you heard aught of Murray?"

"Nien, Murray is nefer spoken of. Der French would hafe none of him. They nolit be sulied from Quebec for der Hufana."

"So are the mighty fallen," mused the governor as we strolled along. "A few short months ago he was more powerful than I in the province. Today he is nobody."

We walked out upon the wharf where the sloop River Queene lay with her moorings slack.

"Pumble aboard, my masters," shouted the captain. "There's a fair breeze and the tide is flowing."

"Good-by," said Ta-wan-ne-ars. "Ga-ewgwa-ra-go and O-to-tand-i will be always in the thoughts of Ta-wan-nears."

"Good-by," mumbled Corliner.

"Good-by for a while," retorted the governor. "We shall be ready to welcome you with jollicity when you return with a brave tale to tell us."

"Good-by," I called, and my voice clucked.

I raised my right arm in the Iroquois gesture of parting and farewell. Ta-wan-ne-ars answered in kind, motionless as a bronze statue against the dirty gray expanse of the wall. The sloop dropped her moorings and glided out into the current.

In ten minutes Peter's face was a broad white blotch at the foot of the mast, and Ta-wan-ne-ars was a darker blot beside him. They sailed on into the eye of the setting sun.

"'Tis the very spirit of this land, Orasero!" observed Master Burnet as we watched. "Having finished our adventure, they seek a fresh trial of their resource and daring. Ah, well, 'tis for you and me to take their prospect and strive to discourage it with upon some homely adventures of our own. All of us must need them in the Land of Lost Souls, but each of us may find a worth-while task upon his doorstep."

[THE END.]

Value of Milk Known From Earliest Times

Cows were the first animals domesticated when evenem forsook their cubs for rude places to till the soil. In India the cow has been worshiped for centuries. Sacred cows have been maintained in temples and milk has had an important place in Hindu magic. Milk has been the subject of song and poetry since history began. Canaan, the promised land of Israel, was said to flow with milk and honey. Ovid, the Roman poet, gave milk second place only to nectar, the drink of the gods.

Milk for ages has been regarded as a cure for human ills. The ancients discovered it was a tremendous factor in building up and maintaining the body. This is because milk is an almost perfect food, combining nearly all the elements necessary for complete nourishment.

Modern science has produced evaporated milk which, experts say, is an improvement on the original. By removal of 60 per cent of the water, evaporated milk is rendered twice as rich in food value as ordinary market milk. The sterilizing process through which evaporated milk goes makes it easier of digestion than ordinary bottled milk. This is due to the fact that the milk curds are rendered more flocculent by the heat.

The Bookshelves

It is a mistake to pack books too tightly on shelves. They should be loose enough to be withdrawn easily by placing a finger and thumb on either side.

Avoid dusting the tops of the books with a duster, which only rubs the dirt between the edges of the paper—especially if it happens to be a little rough. Take two books in your hands and gently clap them together so that the dust flies out. If the edges of the leaves become soiled the marks can be removed with a little pumice powder. This plan should not be followed when a book has gilt edges, in such cases a slightly damp cloth may be used.

In Little Old New York

A Brooklyn trolley conductor had listened to a loud tirade against his refusal to stop at an odd-numbered street and was aloof until the irate lady was well off his car at Fifty-second street, still scolding. Then he turned to the fusbie of the car, made a bow and called out cheerly: "Ladies and gentlemen, I have the honor to announce that the next stop will be at Fiftieth street."—The New Yorker.

Washington's Greatness

"Who was the greatest of American statesmen?" "George Washington," answered Senator Sorghum, without a moment's hesitation. "You must admit that he had wonderful advisers." "What made him great was the fact that he knew where to look for advice and how to take it."—Washington Star.

The Siege of Paris

THE price of a rat caught in the sewers and half cooked (for fuel, too, is short) is far higher than we formerly used to pay for spring chicken."

This entry in the diary of one of the survivors of the siege of Paris shows the straits to which the gallant defenders of the beleaguered city were reduced for the bare necessities of life. Rats, cab horses, the wild animals in the zoo, plant roots, and even garbage, were utilized as food. Furniture, wainscoting and other woodwork went for fuel in that bitter winter of 1870-71, while the conquering Prussians thundered at Paris' gates. And while the fated city's defenders fought among themselves, starved and attempted futile sallies against the besieging foe.

When Napoleon III was captured with Marshal Mac-Mahon's army France had cast off the imperial yoke, abolished the assembly and for the third time in eighty years had declared a republic. General Trochu, a brave man and wise soldier, was appointed military head of a hastily selected provisional government, his colleagues being Gambetta, Favre, Thiers and Simon. The city was at once set in order to resist the advancing Prussians.

But here a new difficulty arose. Paris was full of socits and factions, each at swords' points with the others. The first French revolution the warring factions had combined as one against the advancing foreign invasion and had repelled it. But now, in 1870, with the German army already within a few days' march of the capital, the politicl parties wrangled, disputed and accomplished nothing. The only point on which they united was their disgust for Napoleonism. Instead of preparing organized resistance, the chiefs of these factions—"Social Democrats," as they were called—spent their energies in hampering and trying to overthrow the provisional government. Even when, on September 19, the German armies reached Paris and laid siege to the city these malcontents did not cease from their efforts to overthrow Trochu and his colleagues.

The German armies bombarding the city, starvation stalking abroad and internal riots and uprisings—this was the triple state of affairs confronting Paris' defenders. And, over and above them all, the unconcealed and shocking shame of martial France's utter defeat at the hands of her hereditary despised Prussian rival. All this was, apparently, sufficient to break the stoutest spirits. Yet, in spite of it, the Parisians found and suffered like heroes. They endured hunger, cold and other privations with a gay courage that was the admiration of the besiegers. They joked about the murderous ball of Prussian shells that scourged them daily and night with fire and death. They volunteered eagerly for military service. Sortie after sortie was made against the stronger Prussians outside the city, and each crushing defeat served only to increase the warlike zeal of the brave defenders.

Armies were raised in other parts of France to relieve the siege. Garibaldi himself took the field in behalf of the stricken land. But, one after another, each of these relief armies was beaten back by the invading German hosts. At last, on January 19, 1871, a final sally against the enemy failed. Paris could hold out no longer. Nothing was left to eat. For three weeks a boulevard of dead from every quarter had devastated whole sections. Toreha resigned and the French capital surrendered. A truce (January 28) was agreed upon with the Germans and elections were held. In this new parliamental assembly was chosen, Thiers was elected executive head of the nation, a temporary seat of government was established at Versailles, near Paris, and peace terms were discussed.

But the Social Democrats and other factions in Paris saw in this an excellent occasion to foment civil strife and insurrection. They demanded that Paris be the ultimate choice—and finally declined the acts of the government at Versailles and opened an era known as the Commune. Communists were by no means new in France, nor was this their first active outbreak. They had been opposed to the empire, and now they had an equal dislike to the Thiers government. So, March 18, 1871, the horrors of a revolution again convulsed unhappy Paris. Home rule was declared and the Communists prepared to hold the city against all comers. The government tried to compromise, but failed. Then civil war broke out, the government attacking the city, the Communists defending it. A second siege of Paris began, lasting from April 2 to May 21. The Communists quarreled among themselves, indulged in the wildest excesses of mob rule, burned public buildings, ordered wholesale executions, scoffed at religion, murdered the archbishop, threatened in an excess of blasphemy to swear out a warrant for the arrest of God, and in similar ways demonstrated their mdliness to exist. The government troops at last forced their way into Paris. After eight days of street fighting the Commune was stamped out, 6,500 of its members being killed and many thousands more imprisoned. So ended the war, the siege and the Commune. The battered, humiliated French nation slowly began to rebuild its wrecked country. The price of Napoleonism was paid.

Showing the Vogue for Wider Brims.

Gold Jewelry in Many Styles

The gold jewelry that made its appearance at the French openings appears in many different versions. In some cases it is made of twisted strands of gold beads. Another type has overlapping plaques of gold.

High Waist

A new line in silk coats for spring is the rather high waistline, accentuated by a belt. There is usually a short shoulder cape.

Braid Trims Wool Frocks

Afternoon dresses for simpler wear are often in fancy woolen fabrics. These are simple in line, having generally plaits widening the skirt on the sides and trimmed with a leather belt often in matching suede.

Pantie Frocks

A new fashion recently launched is the frock with brief little panties of the same material to be worn under the very short skirt.

The DOOM TRAIL

by ARTHUR D. HOWDEN SMITH

AUTHOR of PORTO BELLO GOLD ETC.

COPYRIGHT BY BRENTANO'S

WNU SERVICE

CHAPTER XVIII—Continued

—30—

And, standing with legs spread out in the middle of the paved sidewalk, he read:

"And seeing that the resentment of the Six Nations is so deeply stirred by reason of the tabling of the lawwe are resolved that the provincial government shall have authority to impose the duties upon trade goods for Canada as before. And his excellency the governor shall be required to file a complete report of the situation with such addenda, facts and statistics relative to amounts and totals of trade and fluctuations thereto in the recent past as may be helpful to their lordships in reaching a final decision in this matter.

"There is more of the same tone as that I read. But I am sedately occupied with my own interests, Orasero. Here is a matter which more nearly concerneth yourself."

He produced a large rolled sheet of parchment, pretty essentially, across the top of which ran the legend:

"A FREE PARDON."

"Twas bound to come," he rambled on. "He got go to Albany to answer for his many lapses."

But Marjory had been feeding at the window, and as I opened the letter she fell into my arms and clung there, sobbing for the relief that came to both of us with the lifting of the

menace which had overhung my life so long.

"I am so happy I know not what to do," protested Marjory, wiping her eyes. "Hut, oh, see who comes!"

We followed her pointing finger; and there, striding between the ordered house-fronts of Pearl street, exactly as I had seen him the first time we met, came Ta-wan-ne-ars, the eagle's feather waiting from his scalplock, the wolf's head of his clan insignia painted on his naked chest. His grave face was smiling. His right arm was raised in salute.

"Qua, ta-ewy-ra-ra-go! Qua, friends! Ta-wan-ne-ars greets you."

"Have you any further news?" questioned the governor, short as always for tidings of his distant doublons.

"Only news of peace. The frontier is quiet. The Doom Trail is closed. The far tribes are traveling to Albany to offer their allegiance and friendship. The fur trade is once more under control of the English and the Long House."

"We have waited long for you to visit us, brother," I said. "Now that you have come we shall make you stay many moons."

His smile became sad.

"It cannot be. Ta-wan-ne-ars comes to say good-by."

"Good-by?"

"Yes, brother. Have you forgotten the search for my Lost Soul?"

"But she is dead!"

"She is with Atta-en-sic, Ta-wan-nears seeks his Lost Soul. He has no fear. He will go through Da-ye-ha-dis-go-wer, the Great Home of the Winds, where Ga-oh, the Wind Spirit, dwells. He will go through Ha-ah-kase-no-ga, the Dwelling Place of the Evil-Minded. He will go to the world's end if the Great Spirit will but guide his footsteps."

He would not step indoors for food, but insisted on walking back toward the Broad-Way with Master Burnet and me. At the Bowling Green we encountered Peter Corliner.

"Ha, Peter," the governor hailed him. "Well met, indeed. What hath earned us this honor?"

"I benvit Ta-wan-ne-ars was here," he panted. "I followeit him down rifer from Fort Orange."

"What does Corliner wish?" asked Ta-wan-ne-ars.

The big Dutchman stammered and gurgled with embarrassment.

"I go with you," he gasped after much effort.

"I go to the Land of Lost Souls."

"Ja, that's all rights," returned Corliner. "I go with you."

The hard lines of the Seneca's stern face were softened by a rare glow of feeling.

"Ta-wan-ne-ars never doubted Corliner. Ga-en-gwa-ra-ga!" he answered, squeezing Peter's hand in his. "He would not ask any to go with him he knew the peril is great. But he will be glad to have Peter by his side. We will take the first boat which leaves."

"One is sailing from der Whale's Head wharf," suggested Peter.

"Good. Then we will say good-by here."

"No, no, we will accompany you to the wharf," said the governor. "Where are you from, Peter?"

"I was in der Shawnees' country when I hearit Ta-wan-ne-ars was going upon a long journey alone. So I go to De-o-nun-ta-ga-s, nodt from there to Fort Orange unit here."

"How you heard aught of Murray?"

"Nien, Murray is nefer spoken of. Der French would hafe none of him. They nolit be sulied from Quebec for der Hufana."

"So are the mighty fallen," mused the governor as we strolled along. "A few short months ago he was more powerful than I in the province. Today he is nobody."

We walked out upon the wharf where the sloop River Queene lay with her moorings slack.

"Pumble aboard, my masters," shouted the captain. "There's a fair breeze and the tide is flowing."

"Good-by," said Ta-wan-ne-ars. "Ga-ewgwa-ra-go and O-to-tand-i will be always in the thoughts of Ta-wan-nears."

"Good-by," mumbled Corliner.

"Good-by for a while," retorted the governor. "We shall be ready to welcome you with jollicity when you return with a brave tale to tell us."

"Good-by," I called, and my voice clucked.

I raised my right arm in the Iroquois gesture of parting and farewell. Ta-wan-ne-ars answered in kind, motionless as a bronze statue against the dirty gray expanse of the wall. The sloop dropped her moorings and glided out into the current.

In ten minutes Peter's face was a broad white blotch at the foot of the mast, and Ta-wan-ne-ars was a darker blot beside him. They sailed on into the eye of the setting sun.

"'Tis the very spirit of this land, Orasero!" observed Master Burnet as we watched. "Having finished our adventure, they seek a fresh trial of their resource and daring. Around Orchard

HYBRID DEWBERRY IS RECOMMENDED

(Prepared by the United States Department of Agriculture.)

A hybrid dewberry, all but lost to the horticultural world since its origin in 1905, has been brought into favorable recognition as a result of tests by the United States Department of Agriculture. This dewberry, named the "Young" for the originator, B. M. Young, of Lumberton, bears fruit larger than the popular Lucretia variety, is much sweeter than the Logan, and of an exceptionally high dessert quality. The berry is an attractive deep wine color.

The Young dewberry, according to George M. Darrow, who made the tests for the department, has been found resistant to anthracnose disease and free from the ordinary leaf spot wherever tested. It has been grown at a number of experiment stations and by other co-operators, and no undesirable features have developed. It has been found especially suitable for culture in the southern and southwestern states and is recommended for trial by gardeners and truck growers in these sections as well as in other localities where dewberries are ordinarily grown.

The dewberry first came to the attention of the department in 1921 when some plants were sent to it by a Pennsylvania nurseryman who requested they be tested. At the first fruiting, three years later, these plants attracted immediate attention because of the exceptional qualities of both the fruit and the plant. Mr. Darrow then traced the history of the variety and found that the Pennsylvania nurseryman, who had since died, received his stock from the originator in Louisiana. It developed that Mr. Young had produced the seedling by crossing the Mayes dewberry with the Phenomenal blackberry in an effort to develop a berry similar to the Logan of California. He gave some of the stock to the nurseryman, but discarded the hybrid himself because of other interests, its unusual and desirable characteristics were thus finally rescued largely through feeling under varied conditions.

The department has no plants of this variety for distribution, but it is obtainable from a number of southern nurseries.

Small Fruits to Plant This Season Are Noted

Small fruits that are most likely to succeed are strawberries, black raspberries and blackberries, according to W. R. Martin, horticulturist at the Kansas State Agricultural college. While grapes are not usually considered in the class of small fruits, they are well adapted to Kansas soil, climatic, and moisture conditions.

For home use the Senator Dunlap variety of strawberry is recommended. It bears large quantities of dark-red fruit in midseason.

The two best varieties of black raspberries are Black Pearl and Cumberland. Black Pearl bears about mid-season and several days earlier than Cumberland. Because these plants are susceptible to anthracnose and cane blight diseases, Mr. Martin advises the planting of disease-free plants in soil that has never been planted to raspberries before.

Blackberries will succeed where raspberries will fail because they will withstand more hot, dry weather. Although rust curling blackberry plants are the most expensive, the horticultural specialist states that they will succeed better than the "sucker" plants which are most commonly sold.

Grapevines for planting should be well grown one-year-old plants. The Concord, a purple variety, is the most prolific and hardy and should comprise most of the planting, according to Martin. The best variety of white grapes is Niagara, which is of the same season as Concord and is also quite prolific.

Horticulture Facts

Use no wound dressing on peach tree cuts.

The color of apples depends upon their nitrogen content, the highest colored fruit having the least.

* * *

Order trees from a thoroughly reliable nursery and inspect each tree or plant before planting in order to see that it is free from disease.

* * *

It's time to prune grape vines and shade trees before the sap starts flowing, for if pruned after sap begins flowing the tree is robbed of nutrition and growth is apt to be affected.

* * *

It isn't too early to bind trees and thus prevent insects from despoiling them.

* * *

The American raspberry beetle is seldom severe for any great number of successive years, it appears sporadically from time to time in different sections.

* * *

Dormant sprays for fruit trees may also be applied now. "Dormant" refers to the tree before sap has begun to flow. The prevention helps control fungous diseases of trees.

* * *

Study the best method of controlling the diseases before the trees come into bearing. For example, apple blotch forms small cankers on the twigs which increase in number from year to year, regardless of whether or not the tree is bearing.

* * *

Dormant lime-sulphur spraying for, the control of San Jose scale should be completed in the early spring. Spray should be applied if scales are found on twigs. Such spray will control both the scale and the peach leaf curl in the peach orchard.

Destroy Weeds by Cultivation

Perennial Plant Requires Careful and Persistent Treatment.

Eradication of weeds by cultivation has been practiced for ages. Up to the present time this method has generally proved to be the most economical and successful.

Floating weeds under covers them with a layer of soil that kills most of the living material. Later cultivation destroys a large proportion of the seeds that have sprouted. Still further cultivation provides for the germination of more of the seeds in the soil and at the same time kills the seedlings that have started.

Send Up Shoots Often.

Perennial weeds, however, can send up shoots as often as they are destroyed during the season and require a different treatment. Such weeds are the worst weed pests in Colorado and require more careful, more persistent and more frequent cultivation. During the plowing of the soil the roots that live in the upper layers are broken up, and may be dragged along the furrow by the plow or scraped to the surface by the plow share. When the field is being harrowed the cutting of root fragments is even more profitable because they will be moved to a distance and left to loose and provides an excellent place for growth.

Work Separately.

This makes it necessary to work separately (and infested with weeds by themselves that are free from small pieces. In such places consistent destruction of all weeds as they appear will prove the best remedy. A knife edge passed just under the surface of the soil will cut off the young shoots, or a thick foot cultivator with sharp shovels in the needle-point description of perennial weeds.—Charles F. Rogers, Pogany Colorado State Entomologist for Weed Control.

Yellow Corn Desirable Feed for Chicken Flock

Yellow corn is a more desirable feed than white corn. The yellow corn is rich in vitamine A, whereas white corn is deficient in this essential constituent. Feeding tests have proved that yellow corn in the ratios is conducive to healthy chickens, and that greater egg production is possible, as well as a higher percentage of hatchability. The breeding flock in particular should be supplied with yellow corn.

The Missouri experiment station has conducted tests to determine the relative feeding value of light and dark corn. The light yellow corn when fed white corn were fed one group of chicks, while another group was fed yellow corn. The chicks receiving the white ration developed leg weakness and failed to grow properly, while those receiving the dark yolks developed normally and were vigorous and healthy.

Rape Is Best Substitute Pasture for Hog Family

Rape is one of the best substitute pasture crops for hogs. It should be sown as early in the spring as the seedbed can be well prepared. If sown in rows, from two to four pounds of seed per acre is sufficient; if drilled in solid, from four to six pounds should be used. The Dwarf Essex variety is to be preferred. If possible, divide the field into two parts and pasture alternately.

In securing a seedling of alfalfa only hardy northern grown seed should be used. "The Grimm, Cossack, and Ontario Variegated strains are exceedingly well adapted to Michigan conditions. The seedbed should be well firmed and the soil should not be acid. The land should be well drained.

Shorts Added to Ration for Swine Helps Gains

Hogs that were self fed corn and tankage at the Nebraska station gained about a quarter of a pound more a head daily, when shorts was added to that ration. Gains were also cheapened, and the hogs paid about $2 more profit a head.

Shorts should not be used to replace tankage, however, for it is no higher protein free of that sort. It is more like corn than tankage, but has a higher percentage of protein, and so will save a little of the protein supplement. In the Nebraska test 75 pounds of shorts took the place of 75 pounds of corn and 15 pounds of tankage.

Agricultural Notes

A permanent pasture insures a permanent crop.

Bees have turn fragrant flowers into honey money for thrifty farmers.

* * *

Sunlight is the cheapest disinfectant available around the average farm.

* * *

In sections where acid phosphate can be purchased at as low as $15 a ton it may pay farmers to use twice as much as usual on their corn, or as much as 500 or 600 pounds to an acre.

* * *

One of the most important things to remember in planting young trees, whether forest seedlings or fruit trees, is to tamp the earth firmly around the roots.

* * *

Test the seed corn before you plant it to see if it will grow. Most seed corn grown in New York last year is poor, because the weather was bad and it did not mature well.

Wefers Will Teach Mel Ott How to Run

Bernie Wefers, former Georgetown university sprint star and coach at the New York Athletic club, has been engaged to teach Mel Ott, young New York giant outfielder, the art of running.

Ott, only eighteen years of age, is one of the most promising recruits of McGraw's outfit, but may have his base ball career seriously handicapped unless he changes his style of running.

Wefers hopes to teach Mel to run on his toes more than on the flat of his foot.

HOW MANY BIG LEAGUERS PITCH

Fool Batters by Not Pitching Ball Expected.

If you want to be a great pitcher, get a reputation for a particular ball and then never pitch that ball.

This apparently paradoxical advice is given by H. H. Schlieger in the May issue of the American Boy Magazine. He points out that the surest pitcher-getters are those that never have to be used. Matheson's most effective ball was undoubtedly his fadeaway but the fact that he never used it made it ten times more effective.

"Big Ed" Walsh was the greatest spitball pitcher of all time, but he could fan Ty Cobb four times in one afternoon without ever pitching a spitball. He merely made Ty think such ball was going to be a spitter.

This is merely part of the policy of never giving the batter what he expects when most pitchers follow. Walter Johnson, I. is true, pitches his fast ball practically all the time, but its so fast he doesn't need to change.

Another peculiarity of Johnson's is never to change his pace, to pitch at the same speed whether the bases are filled or empty. This is, of course, effective but very wearing and Mr. Schlieger advises the young pitcher to save himself for the pinches rather than follow Johnson's example.

The most essential thing that a pitcher should have according to Mr. Schlieger is control. He should be able to put the ball within a half of

Eppa Rixey, "Three and Two" Pitcher.

where he wants it. If he possesses control, all that is needed in addition is a fast ball and a curve. But without control all the stuff in the world won't land a hurler in the big leagues.

Eppa Rixey of the Cincinnati Reds has such fine control that he purposely works for three balls and two strikes on a batter in order to make him nervous. He is known as a "Three and two" pitcher.

Other pitchers with great control are Walter Johnson, Herb Pennock, Charlie Ruffing, Pete Donohue, Charlie Root and Lee Meadows.

All these men, concludes Mr. Schlieger, have made a berth for themselves in the big leagues because they never pitched a

Council Proceedings

Council Chambers, May 23, 1927.

The Common Council of the City of Charlevoix met on the above date, with Mayor Bergeon presiding. Ald present, Bridge, Eckinger, Gelken, Howe.

Minutes of the meeting held May 16, 1927, were read and approved.

The Finance committee submitted the following bills aggregating $5,205.02 report the same correct and recommend they be allowed.

To the Honorable: May 23, 1927.

The Mayor and Common Council of the City of Charlevoix:

Gentlemen:—Your Finance committee having examined the following bills, find them correct and recommend they be allowed:

Moved by Ald Bridge, seconded by Ald Howe that the bills be allowed, motion carried by the following aye and nay vote. Ayes—Ald Eckinger, Gelken, Howe, Bridge. Nays—None.

Enter Aid Partridge and Livingston.

Ald Partridge offered the following resolution and moved its adoption, seconded by Ald Bridge,

RESOLUTION.

Resolved by the Common Council of the City of Charlevoix, that the bid of H. D. Marshall, for the construction of a sewer in that part of West Garfield avenue in the City of Charlevoix, lying between Bridge and State street, in accordance with the plans and specifications therefor on file, such bid being in the sum of five hundred and forty dollars ($540.00), we and hereby is accepted and that the Mayor and City Clerk be authorized to enter into contract with such bidder for the construction of such sewer.

Resolved further, that the estimate of cost of such sewer now on file be amended to read in the sum of six hundred and eighteen dollars ($618.00), the same being the total cost of construction of such sewer and including the cost of printing, advertising, inspection, and surveys.

Resolved further, that the total cost of construction of such sewer be borne and defrayed as follows:

First. That one-sixth of such cost, namely-the sum of one hundred and three dollars ($103.00), be borne by and paid out of the general sewer fund of the city.

Second. That five-sixths of such cost, the sum of five hundred and fifteen dollars ($515.00), be borne and paid by a special assessment on the lands and premises included in the district to be benefited by the construction of such sewer, according to such benefits to each parcel of land in such district, as provided by law.

Resolved further, that the Board of Special Assessors of said city, be and hereby are, instructed to make and spread a special assessment of said last mentioned sum of five hundred and fifteen dollars ($515.00), upon all lots, parts of lots, lands and premises included in said district, as hereinbefore described, according to benefits, and that said Board meet in the council rooms in said city on Thursday, the 26th day of May, 1927, at nine o'clock a. m., for the purpose of making such assessment and upon the completion of the same to file it in the office of the City Clerk.

Resolved further, that the district comprising such benefited lands be designated as follows: All lots, parts of lots, lands and premises abutting on either side of that part of West Garfield Avenue lying between Bridge and State streets.

Adopted at a regular meeting of the Common Council held in the council rooms, in said city, on the 23rd day of May, A. D. 1927, by aye and nay vote as follows:

Ayes: Aldermen Bridge, Eckinger, Gelken, Howe, Livingston, Partridge

Nays: None.

Arthur Bergeon, Mayor.

Ray S. Hamilton, City Clerk.

By D. S. Payton, Deputy.

On motion duly made the council adjourned. Ray S. Hamilton, City Clerk.

By D S Payton, Deputy

French Housemaid's Title

The French housemaid is called a "bonne a tout faire," meaning literally, good for doing everything.

400,000 CHECKS QUARTERLY TO STOCKHOLDERS

Record Dividend Distribution List of A. T. & T. Co. Requires Special Handling

On the fifteenth of each January, April, July and October, quarterly dividend checks are sent to more than 400,000 stockholders of the American Telephone and Telegraph Company. No other corporation has so great a task in the preparation of those quarterly dividend checks, for no other corporation has nearly so many stockholders.

First of all, the blank checks are put through addressing machines which print on each check the name and address of the stockholder and the amount of his or her dividend. This job alone keeps nine people busy for about two weeks, and, to make sure that they are correct, the checks, after being filled out, must all be compared with the records of stockholders, as shown in the company's ledgers.

Then, again, each of these 400,000 checks must be signed. Of course, no one person has either the time or the endurance to sign his name 400,000 times. Fortunately, however, this is not necessary. Each check bears a facsimile of the treasurer's signature printed on it. In addition, it also has the written signature of an assistant cashier. It takes five assistant cashiers about nine days to complete this task, and in so doing they are assisted by two other employees who load the checks through a signature machine. This device contains eighteen fountain pens connected in such a way that every time anything is written with one of the pens the other seventeen pens write the same thing. In this way an assistant cashier is able to sign eighteen checks at a time.

After the checks are signed, it then takes several days to put them in the envelopes, and to this task sixty-five employees are delegated. The 400,000 pieces of mail matter are sent to the post office gradually, starting two days before the official mailing date. This early mailing gives the postal workers a chance to get started on the work of sorting so that the whole mass does not have to be handled in a single day.

It is one man did the whole job of getting out these quarterly dividend checks, it would take his entire working time for three years.

Red Crown Ethyl Multiplies Motoring Pleasure

Easy starting—smooth speed—quick pick-up! No knocks—just a rhythmic purr from the engine and a steady flow of power *all the time*—with RED CROWN ETHYL in the tank! It "knocks out that knock".

Touring Suggestions

1—Lake Minnetonka in Minnesota, given national fame through Thurlow Lieurance's beautiful music, "Sprlng Song of Minnetonka." A winding lake of seventy miles, easily reached by State Highway 10 from Minneapolis to Wayzata, a village on the north shore of the lower lake.

2—The Mississippi River running from Minneapolis, home of the three rivers—the world show case—accessible by State Highways 13 and 25.

3—Excelsior Springs, noted health resort, famous among the lakes northeast of Kansas City, Missouri. Famous for its many kinds of mineral water. Much fine, twenty cypress. Highway 10.

4—Fort Trees, Michigan, directly on the Dixie Highway between Michigan Central Forest, containing 160,000 acres of natural beauty, thirty-fifth recreational resource for the summer tourist. State Trunk Line No 48.

5—Grandview Drive, Peoria, Illinois, overlooking the Illinois River Valley. Reached by National Arterial Connection as one of the seven most beautiful views in the United States. State Highways 6, 8, 24, 29.

6—Mammoth Cave National Park, Kentucky, the largest cave in the world, discovered by George manufactured into Kaolene. In September, 1925, a thousand Missourians from Missouri purchased 100,000 acres of land and presented it to the United States as the first Memorable Highway 200.

7—Dickinson, North Dakota, in the heart of the famous Red River Valley. "Dean Basket of the World." Beautiful natural woodlands and tourist camp. Reached by Dixie Highway and Highway 10.

8—Washington State Park, Mitchellville, Iowa. Some of the finest natural scenery in America. Local wonders, "Golden Stairs," the "Palpit Rock" and "Council Cave." Reached from Pilgrim on A. C. P. Trail 5. State Highway 23 north of Mitchellville.

9—Rolling Hoof" southeastern Minnesota, a scenic highway by Michigan Railroad Forest, containing 160,000 acres of natural beauty, thirty-fifth recreational resource for the summer tourist. State Trunk Line No 48.

10—Grand Cave, thirteen miles west of Shawneetown, Illinois. A cave, passage in open to visitors for more than seven miles, Lunch rooms, with flowers on underground streams with water the color of milk. Underground flora Cypher, wildlife on State Highway 45.

LEGAL NOTICES

Order Appointing Time for Hearing Claims

STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the City of Charlevoix in said County, on the 27th day of April, A.D. 1927.

Present: Hon. Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of Franklin M. Sears, deceased.

The above estate having been admitted to probate and Ida C. Sears appointed administratrix thereof.

It is Ordered, That four months from this date be allowed for creditors to present their claims against said estate, and that such claims will be heard by said court on Thursday, the 15th day of Sept., A. D. 1927, at ten o'clock in the forenoon, at the Probate office, in the city of Charlevoix.

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix Sentinel a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
Judge of Probate.

MORTGAGE SALE.

Default having been made in the conditions of a certain mortgage executed by George Ross, an unmarried man, of Charlevoix, Michigan, unto Rudolph C. Korth, of Charlevoix, Michigan, dated the 24th day of August, A. D. 1925, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, on the 28th day of August, 1925, in Liber 56 of mortgages on page 242, the description contained in said mortgage being erroneous by a mortgage executed by said George Ross to said Rudolph C. Korth, dated the 4th day of October, 1926, and recorded in the office of the Register of Deeds, of Charlevoix County, Michigan, on the 8th day of October, 1926, in Liber 63 of mortgages on page 200, on which mortgage there is claimed to be due the sum of one hundred fifty-five and 73-100 ($255.73) dollars including interest computed to the date hereof, and also an attorney fee of twenty-five ($25.00) dollars provided for in said mortgage, and no suit or proceeding at law having been instituted to recover the moneys secured by said mortgage, or any part thereof.

Now, Therefore, Notice is given that by virtue of the power of sale contained in said mortgage and the statute in such case made and provided, notice is hereby given that on Monday, the 20th day of June, A.D. 1927, at the east front door of the Court House, in the City of Charlevoix, Charlevoix County, Michigan, that being the place where the circuit court for the County of Charlevoix is held, the premises described in said mortgage or so much thereof as may be necessary to pay the amount due on said mortgage with seven per cent interest and all legal costs, together with an attorney fee of twenty-five ($25.00) provided for in said mortgage, which premises are described in said mortgage as follows: Commencing at the southeast corner of the southwest quarter of the northeast quarter, Section twenty-three (23), Township thirty-four (34) North Range eight (8) west; thence west 30 rods to a point which is the starting point; thence north 80 rods; thence west 10 rods; thence south 80 rods; thence east 10 rods to place of beginning, situate in the Township of Charlevoix, County of Charlevoix and State of Michigan.

RUDOLPH C. KORTH, Mortgagee.
ROLLIE L. LEWIS,
Attorney for Mortgagee.
Business Address, Charlevoix, Mich.
Dated March 16th, 1927. 47-12t

MORTGAGE SALE

Default having been made in the condition of a certain mortgage executed by Michael C. Birnkrant (a single man) of Detroit, Michigan, unto Llewellyn S. See, of Warrington, Oregon, and Charles E. See, of Charlevoix, Michigan, dated the 1st day of August 25th, 1925, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, October 9th, 1925, in Liber sixty-three of mortgages on page one hundred and sixty-five, on which mortgage there is claimed to be due at the date of this notice the sum of Two Thousand One Hundred Fifty and 39-100 Dollars including the principal sum due with interest, together with an attorney fee of thirty-five and No-100 Dollars as provided for by the said mortgage and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas, the taxes required by the statutes to be paid on said mortgage were duly paid prior to the recording thereof.

Now, Therefore, Notice is given that by virtue of the power of sale contained in said mortgage and of the statutes in such case made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by the said mortgage, at public auction, to the highest bidder therefore, at the front door of the court house in the city of Charlevoix, Charlevoix county, Michigan, (that being the place where the circuit court for the county of Charlevoix is held), on Tuesday the twenty-first day of June, 1927, at eleven o'clock in the forenoon on that date.

The premises described in said mortgage being the lands, premises and property situated in the city of Charlevoix, county of Charlevoix and State of Michigan, described as follows, to-wit: Commencing at the northeast corner of lot one in block six of the recorded plat of the village (now city) of Charlevoix, Michigan; thence south forty-two feet two and one-half inches along the east line of said lot one; thence west ninety-six feet along the south wall line of the adjoining parcel of land on the south and extending to a point in the west boundary line of a public alley running north and south through lot two in said block six of the recorded plat of the village (now city) of Charlevoix, Michigan; thence north forty-two feet two and one-half inches along the west boundary line of said alley to a point in the north boundary line of the aforesaid lot two in said block six; thence east ninety-six feet along the north boundary lines of said lots one and two; subject to an easement of a public alley, fourteen feet in width on the west side of said parcel of land. Also subject to party wall agreement concerning the party wall between the above parcel of land and the parcel adjoining immediately south, together with the hereditaments and appurtenances thereunto belonging or in anywise appertaining.

Dated March 21, 1927.

Moon's Fullness Brief

The full moon, astronomically defined, occurs when the longitude of the moon differs by exactly 180 degrees from that of the sun. As this condition is momentary, the moon is full for an instant only.

Baltimore's Distinction

The first umbrella factory in this country was established in Baltimore, Md., and is still in operation. It is said that the first umbrella to reach America was taken to Baltimore and was first carried in that city.

Volume 58 Charlevoix, Michigan, Thursday, June 23, 1927 Number 9

NEW COTTAGES ON NORTH SIDE

Extensive Improvement Project Under Way—Be Modern

Contracts will probably be made within the next few days for the construction of two or three modern cottages along the street just opened up which extends from Petoskey avenue north to the city limits and making for a continuance of Meech street, a desirable and much needed improvement and one that will add materially to the appearance of the locality and of exceptional benefit to the city.

Every locality in this region has some certain natural beauty and in this respect advantages, but mother nature has been more lavish with her bounties and beauties with this Charlevoix, with its immediate environs than she has with any other territory in this section and for that matter in Michigan. In this regard Charlevoix stands superior, pre-eminently so and so proclaimed not only by local residents, thousands of summer residents and visitors and beyond this openly admitted by residents of other localities who are genuine home boosters.

The original works of nature are too often mutilated by the hand of man, but without some mutilation towns and cities, farms etc., in this region would be non-existent. Forest growth necessarily gives way to progress and with the passing of the timber growth comes new development work and in this the building of the community whether it be urban, town or city makes for progress and this development work more oft vies with nature in an effort to produce the substantial and beautiful; whether it be the building of a farm, a modest bungalow or an elaborate home by individual effort.

Every town, every city has within its confines much vacant property, no small amount of which is more or less of an eye sore to the public and Charlevoix in this regard is no exception to the general rule and regardless so future progress will continue to loom extent in the same class. With growth comes expansion of city limits and with such expansion more vacant lots. Unkempt vacant lots add not one whit to the beauty of any community but rather depreciate the value of improved property by casting a taint of unsanitary slothfulness around the immediate locality.

Possibly it was some thought of conditions which prompts Mr. J. H. Koch to formulate plans and carry out a program of construction and improvement work as mentioned in the first paragraph of this article, and then, too, it may be from an inherent desire on his part, a personal ambition, to add to Charlevoix's beauty through a building program, satisfying to himself as well as a matter of pride to every citizen of Charlevoix.

And then again Mr. Koch has an abiding faith in Charlevoix, its future progress and development, and with such faith stands ready to put his shoulder to the wheel and back his judgment financially to the extent of.

This he has done in the past and his new venture is based upon past endeavor and experience, otherwise he would not have disposed of his Florida real estate holdings and taken the proceeds from such sales for re-investment here. Especially on an extensive building program of which the part outlined in this article is but the initial or introductory part.

Other cottages will be constructed, other development work carried out just as soon as possible after the opening of the new street with its grading completed, this work consisting of cement curbing, sidewalks, main sewer with laterals, water mains and connections.

AUTOMOBILE ACCIDENT--ONE KILLED

Driver Lost Control—Georgia Holben Dead

Three injured, one dead, the result of an automobile accident last Saturday night, when a machine in which four persons were riding plunged over an eight foot embankment on U.S. 131 about three miles south of Kalkaska at a point locally known as Anderson's hill.

The machine was occupied by Mr. and Mrs. Clark Travis, Miss Georgia Holben and Arthur Oldham all of Petoskey, who were making a trip to Grand Rapids. Mr. Travis was at the wheel of the machine when the plunge was taken over the bank.

Miss Holben, twenty years of age, died a few minutes after the accident before help could be summoned. Examination revealed that her injuries consisted of a dislocated neck and that a piece of glass had completely severed the jugular vein. Other members of the party were all severely cut and bruised.

Mention of Petroleum in Biblical Records

Although as a commercial proposition in western civilization petroleum may be said to date from 1859, when Colonel Drake "struck ile" at Titusville, Pa., the substance has been known and used from time immemorial.

Biblical history records many interesting incidents of the use of oil, for instance, in the account of the building of the tower of Babel (Gen. 11:3) we read "slime had they for mortar," and that great historian, Herodotus, writing about the year 450 B. C., speaks of the use of bitumen in building the walls of Babylon, a fact confirmed by recent excavation work.

Again in the Scriptures we are told (Gen. 6:14) that the ark was covered "within and without with pitch." In later times, about 615 A. D., Japanese writings contain numerous references to "Burning Water"; China also records the use of mineral oil, and the ancient Assyrian rites of embalming were carried out with the aid of "Mumia" or pitch (Coptic).

Inedible Dainty

During the celebration of a golden wedding anniversary in Pennsylvania recently, a huge cake was placed on the table and Henry Ponta, the host, undertook to slice it. The first knife failed to mar the beauty of the cake and a carving knife was commandeered from the kitchen. It, also, proved inadequate and finally a hammer and chisel were brought into use. Under these implements the cake collapsed into a heap of lath and plaster. It developed that Mr. Ponta had selected the cake from a confectioner's window and the young woman clerk, new here in the place, had wrapped it and sent it to the Ponta home without knowing that it had been a plaster of paris creation, representing what a wedding cake should be.

OF THE TOURIST

Are Prices High in Western Michigan

SEE RIGHT OR WRONG PRICES

Service the General Public Can Give to The Tourist

Going through a resort community, Clarence V. Sinazel, executive secretary of the Development League of Western Michigan, listened to a summer hotel man's complaint that the grocer of the town was a robber, heard the grocer say that a realtor was holding his lake frontage for prices that were too high, thereby holding up development instead of encouraging it, and the realtor declared that the hotel man charged rates that were too high, therefore interfering with the growth of that sort of business.

"But an investigation showed," the secretary said, "that the grocer had to truck his goods a considerable distance, that, with two additional handlings, adding considerably to his costs; that the realtor had spent a good deal of money getting his property in shape for sale and that his money would be thus tied up for some considerable time; and the hotel man must, in three months, earn enough to carry overhead expenses for twelve months or he could not operate."

"That deomnstrates that unfair prices are justified," Sinazel says, "nor that they are a harm to the resort business. But before we talk about unfair prices on the part of our neighbors, lets find out first if they really are unfair before criticising each other to the detriment of all. West Michigan as a rule can not be accused of unfair dealings with tourists. Here are too many fairly large semi-industrial cities furnishing competition to strictly resort communities to permit anything of that nature. But it is well for West Michigan to remember that many resort communities have killed their resort possibilities with high prices. Resorters can see the right and wrong of prices as quickly as anybody; the communities of reasonable prices will have their support, and vice versa. West Michigan's opportunity to give small services that will "sell" the region to thousands of summer visitors is at hand. Here are a few suggestions:

If you see a tourist stalled along the highway with automobile trouble stop and ask if the whom you to have a service car sent out.

If a tourist stops at a corner, wondering which way to turn, and you may be able to advise him, don't drive on by but show him you are interested in his pleasure and welfare by guiding him on correctly.

If a fisherman going to a lake or stream is on a road that is impassible or extremely troublesome and you know it, hail him and outline to him an alternate route if possible.

Know your community and its attractions; people don't always think of the things they want to know when at regular information bureaus. If you can't answer the question asked say so and advise where it can be answered. Misdirection often only serve to make matters worse.

Dozens of little things of this nature can be done which will make a man go on his way pleased, feeling good toward the individual, the community, West Michigan, and be remembered among the pleasant experiences of the trip, whereas otherwise they might be listed among unpleasant or at least trying experiences of the vacation.

Another May be Added to Vanishing List

Martha's Vinyard, an island off the coast of Massachusetts, is seeing the last remnant piece of "Vanishing Americans." Here is a little band of game birds, the survivors of the countless thousands which once were found everywhere along the Atlantic coast, have found a refuge from the relentless march of modern civilization, and sportsmen's organizations, and state officials are trying to save them from extinction. Unless they succeed, the sage hen will suffer the fate that overtook the passenger pigeon and which once threatened the buffalo, the elk and the prong-horn antelope.

It's a dramatic story, this tale of how these native Americans have been slaughtered until now there are only a comparatively few survivors. Be sure to read the illustrated feature article "Vanishing Americans," by Elmo Scott Watson, in this issue of the Sentinel.

JERSEY SHOW AT ELLSWORTH

Also Picnic and Program in the Forenoon

The second annual Jersey Show and Picnic will be held at the Ellsworth park on June 29, with twenty-five of the leading dairys in this section on exhibit and pitted against each other in the showing. On the same date the North-Antrim Co-op Test Assn. will have their picnic and program in the forenoon.

The "Jersey Day" is sponsored by the Antrim-Charlevoix Jersey Breeders Assn. The Ellsworth Chamber of Commerce is on the job and are preparing by furnishing ribbons to the prize winners, by transporting the cattle to and from Ellsworth and by furnishing coffee to the picnicers. The following program will be presented:

10:00 a. m. Cow-Test Assn picnic. Talks by H. E. Dennison, Jersey field man, and by members of the Assn.

12 to 1:30. Picnic dinner.

1:30. Adress by H. E. Dennison on "The Future of the Jersey."

2:30. Judging and placing Jerseys.

3:30. Sale of several young registered Sires.

Bring your well-filled lunch basket and enjoy the day with us.—B. C. Mellencamp.

RUFUS BOER INJURED

Automobile Accident Near Scottville Wednesday

Rufus Boer of Grand Rapids, representative for A. E. Kusterer & Co. as bond salesman, was seriously injured last week Wednesday when a car in which he was riding with other men collided with another machine at Pelton's Corners, a few miles north of Scottville.

Mr. Boer was thrown from the machine by the impact with such force as to render him unconscious. His injuries consist of a broken nose, deep cuts on face and head and a knee cap badly wrenched. He was taken to Mercy hospital for treatment.

Many friends in northern Michigan where he has traveled for many years as a salesman, are extending their sympathy to Mr. Boer, expressing the hope that he will soon recover from this hard luck experience. Mr. Boer has visited Charlevoix frequently during the past twenty five or more years and has many personal friends here.

CONCRETE ROAD

Uncle George Writes on the Subject

GOES BACK OVER PAST YEARS

What Became of the Three Hundred and Fifty Thousand?

[Read letter from Uncle George H.Van Pelt to the four newspapers in Charlevoix County. Because it is to these four papers that we are indebted for the concrete (13½ miles on the Dixie highway) roads we have in the county. We should have had more but let us be thankful for what we have. Then work for more]

In opening up my memory box of twelve to fifteen years ago I find many memo's in your papers regarding good concrete roads, and through the influence your articles had on the taxpayers our county raised $350,000 with which to build good roads. Then in another memo I find that you dispensed it in the following manner: Boyne City, East Jordan and Charlevoix each $100,000 and Boyne Falls $50,000. Let me ask every taxpayer to stop long enough to ask Him or Herself this question. What has East Jordan, what has Boyne City, and ask Charlevoix, what has she to show for her share? I will answer for the latter. Twelve and half miles of concrete road worth say $250,000 or more. Balance of the $350,000 within $90,000 of all that we bonded for.

Last year a taxi man wanted to charge me $10 to take me to Boyne City. I refused because I was going for the purpose of making a search for all who drive cars. A local man heard of it who gladly took me free. I was then told that the road to Boyne City was so bad that we could not use it. This answers what BoyneCity did with the $100,000 and East Jordan the answer for itself; but we are now working to have route 66 come from Mancelona to Charlevoix via their town.

In order to divert thought and observation from the dirty, black, oily, soft stuff, slidy chuck hole roads, an interest must be forced upon tax payers, mostly by calling their attention to the advantages and saving of tax money by building concrete roads. This can be done by showing roads which have been built fifteen years and which are as good today as the day they were built, while on the same road you find the other eye which have had a sufficient amount of money spent on repairing and rebuilding to have built a concrete road but which are in such deplorable condition that many times it is dangerous to drive over it.

We are indebted to the four newspapers in this county for this road. They have had a hand in it. Some more and some less. There is without any contradiction a necessity for a great change of thought in our county road work. We have inaugurated a lot of county road work on the state, so have all other counties, but the tax comes out of us all the same. The state road tax has to be paid just the same as the county. Well you say the government paid 50% of the 12½ miles of concrete road to Petoskey; so they did,but we all have the government tax to pay just the same.

I am herewith sending a copy of my Christmas card sent to many of you in 1916, and a few remarks concerning same for 1927. ten years later, just to show what we have been doing the last ten years. We must remember that thought or mind, or both combined, is the cause or causation of everything we do, be it good or bad, profitable or unprofitable. Hence the necessity for good or right thinking and for excluding all wrong or bad thinking, for thought is actoin before it is acted. Each and everyone has a full orbed valve opening into our real consciousness which is (Continued on page 8)

To Finish Repairing Bridge

Men with the state highway department returned to Charlevoix early this week and are continuing a line of repair work which was started early in the spring, carried on for several weeks and then abandoned for a period until some repairs needed for the continuance of the work could be obtained. Signs have been placed on the street at either end of the big bridge notifying travelers that construction work is under way with a warning to automobile drivers to drive slow.

M66 TO BE EXTENDED HERE

From Mancelona by Way of East Jordan

M66 according to information from the Highway department, Lansing, will be taken up and improved under state supervision, such decision having been made by the board at a meeting held in Lansing last Monday, with the route extending from Mancelona to Charlevoix via East Jordan, thereby connecting U.S. 131 formerly trunk line M13 with M11.

The route just established is in addition to the 350 miles now designated from the southern part of Antrim county along the east shore line of Torch Lake and connecting with M11 at Eastport.

The new route when opened up will give automobile parties a most direct route to the east side of the state and Detroit and to the latter point a shorter route by one hundred miles between this point and Michigan's largest city.

Freedom in Marriage Makes for Happiness?

In the face of alarming increases in the divorce statistics the American people are rapidly solving the problem of how to be happy though married, is the opinion of Booth Tarkington, the famous American author and publisher. This developing solution of the marriage problem, Mr. Tarkington thinks, may prove to be America's greatest contribution to modern life.

"We can obtain statistics upon divorce, and probably could compile figures estimating the number of millions due to marriage," says Mr. Tarkington in the American Magazine, "but it is more difficult to set forth the true proportion of really happy marriages.

"We only know that, no matter how crazy the contract, most Americans husbands and wives do get along with each other, not always happily, but with more or less harmony, more or less conflict and a great deal of the deepest devotion.

"Freedom is the great essential element in a happy marriage. Without it marriage is a bondage.

"A woman neighbor, shaking her head ominously, said of my friend Sam's wife: 'She lets her husband go out every night!'

"But this was a mistake; Sam's wife and Sam do not 'let' each other do anything—not any more than one lets a stranger choose which road he will follow. They consult each other; they do not ask or grant permissions; they enjoy liberty, equality and fraternity—universal and inalienable ideals actually realized in their happy marriage.

"Marriage is a bond that must not be a bondage. Without freedom marriage cannot be happy."

Grind Feed for Money

Own the feed business with this new kind of feed mill. Every community is new, and will be demanding feed ground quickly in large quantities and very fine. Medium grinding, done by new type mills, is no longer in demand.

This is the latest form of feed grinder. It combines the cutting action of the attrition mill with the hammering action of the hammer mill.

This mill will grind 100 lbs. of ear corn, oats, rye, barley, alfalfa, or anything grindable to any fineness, with 25% to 50% less power than any other type of grinder.

This saving in power alone makes these mills money makers all over the country. They will give you a better profit grinding feed than any other business in which you can engage on the same amount of capital. There should be one in your community.

Send for booklet "THE STORY OF WORLD'S FEED MILLS" which tells you about this mill and the opportunity of making money in the all-year feed business. Complete equipments in capacities from 1,750 to 25,000 lbs. per hour, costing from $795 and up. Can be had on pay for themselves in a few months.

Anglo-American Mill Co.
1400 Kanady Ave. Owensboro, Ky.

Russia Building Churches

In spite of the campaign by the Soviet government to overthrow religion, an increase of religious sentiment has been observed with the building of many new Russian churches, says the Pathfinder Magazine. Such churches are generally built by common contributions from factory workers and others. Soviet newspapers upbraided the various clubs and societies in Moscow for allowing the religious spirit to dominate the people.

Vanishing Americans

END OF THE TRAIL

BUFFALO

PRONG-HORN ANTELOPE

HEATH HEN

A FULL-ANTLERED ELK

PASSENGER PIGEON

By ELMO SCOTT WATSON

ANOTHER native American has almost reached the end of the trail.

From Martha's Vineyard off the coast of Massachusetts comes word that the heath hen is facing the extinction that a few years ago overtook another American bird, the passenger pigeon. Despite all the efforts that have been made to preserve the rapidly decreasing numbers of this species of grouse (for the conservation of which more than $50,000 already has been spent), the heath hen seems to be doomed. Martha's Vineyard is the only place in the world where it can be found and it is believed that there are now only about twenty specimens of the bird left on the island, a decrease of fifteen from last year.

The story of the heath hen is a tragic but by no means an unusual one in a country which has become notorious for its prodigality in wasting its natural resources. In many respects it is similar to the story of the passenger pigeon whose numbers were at one time so countless that no one believed that they could ever be entirely killed off. So an appalling slaughter of the birds went on for years until a passenger pigeon became a rarity and before sportsmen and field lovers realized it, it was too late to save the species from extinction. The last survivor died in the Cincinnati Zoological gardens in 1914. These birds, once so numerous that within the memory of thousands of persons now living their flight literally "darkened the sky," were wiped out of existence in a little more than two decades!

A hundred and fifty years ago the heath hen was one of the principal game birds of New England and the middle Atlantic states. It was distributed from Nova Scotia to Virginia and it was especially abundant in the lowlands of Massachusetts, Connecticut and Long Island. When the early settlers began to cut off the forests the decline of the heath hen started. Its straight unswerving flight made it an easy target for the hunter in the open, and it was shot and trapped at all seasons. The spread of civilization and the increasing number of cats and dogs which killed its young further decimated the heath hen until it was practically extinct on the mainland and not a few left were on Martha's Vineyard. Apparently no measures were taken for its protection until this time, no one dreamed of the scarcity of predatory animals on the island, the strict fire patrol and the legislative measures which were finally taken to save the birds' the heath hen seemed to have a good chance to increase in numbers.

Such has not been the case, however. Twenty years ago there were about fifteen hundred birds on the island. By 1924 that number had shrunk to less than fifty. Last year the census taken by Prof. Alfred Gross of Bowdoin college, one of the foremost ornithologists in the country, showed that there were only thirty-five left, and now bird lovers of New England are alarmed to learn that this pitiful remnant apparently has been still further reduced in spite of all the efforts that have been made to save them.

The heath hen closely resembles the western prairie chicken. It is a light reddish brown above, barred with black and buff. At the sides of the neck there are tufts of black feathers, on each side is an orange-colored sac and over each eye is a small orange-colored comb. Like the prairie chicken it has the curious habit of "booming" early in the spring each year. This call is said to be similar to the whistle of a distant tugboat in a fog. It heralds the mating season and is a preliminary to and a part of what has been described as "the strangest sight ever seen in the woods"—the dance of the heath hens.

At daybreak the heath hens meet on certain dancing grounds, which they have apparently picked out in advance, and there they go through a series of antics which are as curious for human beings to watch as no doubt a charleston contest would be for the heath hen to watch. The birds run, jump, bow, toot and cackle to their unique position. Their short tails are erected forward over their backs, the black neck feathers stand out stiffly at different angles until at last they point directly forward over the crested heads like the ears of a Jack-rabbit. Their breasts are puffed up and the air sacs are distended until the bird looks almost twice his natural size. They prance backward and forward, flapping their wings, and from their throats come a series of squeals, cackles, clucks, chuckles and laughing sounds. Often, two birds will run toward each other until they are almost beak to beak. Then they remain motionless for several minutes. Sometimes they fight, but for the most part, their time is spent in feeding and dancing. The morning dance usually lasts until the sun is high in the sky and then the birds scuttle back into the recesses of the 5,000 acres of scrub oak in the center of the island which they frequent. Sometimes they come out to repeat their dance again just after sunset.

If the efforts to save the heath hen are unsuccessful it will be a tragic recurrence of the fate which overtook the passenger pigeon; although the ruthless slaughter of these birds is a more shameful record to be laid at the door of Americans than will be their failure to save the heath hen. The destruction of the pigeons began within forty years after the first settlers came to New England, and for the next two hundred years the killing continued. Finally, in 1878 the birds, having been driven by persecution from many states, concentrated in a few localities in Michigan, and it was during the next two decades that the wholesale slaughter which wiped them out of existence took place. The last important nesting place of the passenger pigeon was near Petoskey, in Emmet county, Michigan. There, in 1881, an army of five thousand men gathered for civilization's attack on the defenseless birds which had come there to rear their young. For six weeks continued from March until August and during this period of twenty weeks it is estimated that one billion birds were killed and shipped from this and neighboring nesting places.

One morning America woke up to find that the passenger pigeon was virtually extinct. It became so rare that prizes were offered for the discovery of a single specimen. The last individual definitely recorded in a wild state was captured at Bar Harbor, Maine, in 1894. In various zoological gardens a few individuals were preserved. David Whittaker of Milwaukee, Wis., procured a pair of young birds from an Indian in that state in 1888, and during the next eight years these increased to fifteen. By 1908, however, only seven of this number had survived, and at last only one, a female, was left. This bird, known as "Martha," was sent to the Cincinnati zoo and there she became famous as the last of the race.

Since the death of "Martha" persons in various parts of the country have reported from time to time the discovery of passenger pigeons, but in every case it has turned out that the discoverer had seen some other member of the dove family which is easily confused with the passenger pigeon. And so despite the high rewards that are still standing for proof that the passenger pigeon is still in existence, a single authentic specimen is yet to be revealed. So the next time you see a newspaper story stating that one of these birds has been seen, just put it down that some amateur ornithologist has made another mistake. The passenger pigeon (Ectopistes migratorius) IS extinct.

Although the heath hen is the only bird which now seems definitely doomed to follow the passenger pigeon into the sunset, there are several other species which are in danger of extinction. One of these is a close relative of the heath hen, the prairie chicken. Only a few years ago the booming of these birds was still to be heard everywhere in the prairies of the Middle West and the eastern part of the Great Dakotas, but many places this sound is becoming rare, and even though the prairie chicken does not seem to be in imminent danger of extinction certainly its numbers have been so greatly reduced that it can be called a Vanishing American.

Not only in the bird world, but in the animal world as well there are Vanishing Americans. There was a time when the buffalo was so numerous that, just as in the case of the passenger pigeon, Americus would have scoffed at the idea that this noble animal could ever be in danger of extinction. So long as the buffalo was killed only to supply the food needs of the Indian and the first white settlers on its ranges, there was no danger. Then the hide hunter came upon the scene. Again two decades saw another race of native Americans headed for oblivion. By the end of the eighties the last wild herd of buffalo had been killed off, and of all the countless millions that once roamed the plains, only a few scattering herds in private game parks and public preserves were left. Fortunately public sentiment was aroused just in time and, due to the efforts of several conservation societies during the first part of the present century, the bison was saved. There are now enough of these animals in Canada and the United States to guarantee their preservation and to restore their once actually increased to such an extent that there has been no overcrowding on the available space which mankind has graciously allotted to them.

The settling up of the Far West and the increasing number of farms which replaced the open range of the cattle country have threatened the existence of two other species of animals—the wapiti or elk and the pong horn antelope. It must be said to the credit of Americans, however, who waited until it was almost too late before they set about to save the latter from annihilation, that they have taken a lesson from this experience and have taken the necessary steps to prevent the history of the elk and the prong-horn from being a repetition of that of the bison.

Perhaps it is not strictly accurate to include the buffalo, the elk and the antelope, the heath hen and the prairie chicken in the same category as the passenger pigeon as has been done in this article, but the fact remains that they, like the bodies, are vanishing races. Of course, experienced authorities will tell you differently about the Indian and point to the fact that he is not only holding his own, but is actually increasing in numbers. That is true if you take into account the fact that many persons having more white blood than Indian in their veins are called Indians.

But in the truest sense of the word, the oldtime Indian in all his former glory as a picturesque war-bonneted nomad and "Free-born lord of the manor" in the magnificent pageant of the American frontier is a Vanishing American. He belongs to the past, the past of the wilderness era, as do the buffalo, the elk, the antelope, the passenger pigeon, the heath hen and the prairie chicken. What if there still are enough individuals of each to save the conquering white man any pains to them and say "See, they are not yet EXTINCT!" For they are following the Indian into the sunset, and James Fenimore Cooper's "End of the Trail" is symbolical of them all. They are Vanishing Americans.

The End of the Trail

Far to the west the vanished herds they followed
And came at last unto the journey's end;
Naught have they found save bones where bisons wallowed,
Naught now is theirs—nor food, nor fire, nor friend.

Pony and man alike completely weary,
Even the rainbow hope at last long fled,
Sadly they face a darkness cold and dreary,
Broken, they seek the company of the dead.
—M. Beatrice Sumner.

An Inspiration in Bible and Shakespeare

The course of our education is answered best by those joounse and romances where we breathe a magnanimous atmosphere of thought and magnificence and plane characters. Shakespeare has served me best. Few living friends have had upon me as influence so strong for good as Hamlet or Rosalind. The last character, already well received in the reading, I had the good fortune to see. I must think; in an impressionable hour, played by Mrs. Scott Siddons. Nothing has ever more moved, more delighted, more refreshed me.

The next book, in order of time, to influence me, was the New Testament, and in particular the Gospel according to St. Matthew. I believe it would startle and move anyone if they could make a certain effort of imagination and read it freshly like a book, not drearingly and daily like a portion of the Bible. Anyone would then be able to see in it those truths which we are all supposed to know and which are all modestly refrain from applying. But upon this subject it is perhaps better to be silent.—R. L. Stevenson in "Essays on the Art of Writing."

Leap Year Privilege

The belief that unmarried women may propose to leap year has the following basis in fact, points out an answered question in Liberty. Scotland enacted a law in 1288 giving women this right and fixing a fine for men who refused marriage without good reason. France had a similar law a few years later, and Genoa and Venice legalized the custom in the Fifteenth century.

Get Rid of Grudge

There's nothing on earth that gives you more trouble, and less value for your trouble, than a personal grudge. If you have one, don't feed it; starve it.—Youth's Companion.

THE KITCHEN CABINET

(©, 1927, Western Newspaper Union.)

When a man will trust his wife with his cause, his honor, and his children and will not trust her with his purse, it is easy to see on which he put the highest value.

FOODS FOR OCCASIONS

Some time when you want the dessert especially attractive, serve ice cream in an angel food. Bake the cake in a round tin. Remove the top, take out the center and fill with vanilla ice cream. Cover with the cake lid and pour over the top enough crushed and sweetened strawberries to cover.

Chocolate Wafers—Make a paste of one-half cupful each of cocoa and hot water, then add one cupful of milk, two well-beaten eggs, two cupfuls of flour sifted with four teaspoonfuls of baking-powder, one-half teaspoonful of salt, one-fourth cupful of water and two tablespoonfuls of melted butter. Mix all together well, add a half teaspoonful of vanilla and bake on waffle iron. Serve with a chocolate and marshmallow sauce.

Mixed Fruit Salad.—Use one-half cupful each of shredded pineapple, chopped nutmeats, orange pulp, grapefruit pulp, halved maraschino cherries, and one and one-half cupfuls of sliced bananas. Mix the fruit and nuts and chill. Serve with one-half cupful of heavy cream whipped, adding two or three tablespoonfuls of mayonnaise dressing. Serve in nests of lettuce.

Angel Food Marquis.—Prepare an angel food, using one cupful each of egg whites, sugar and flour, a pinch of salt, one-half teaspoonful of cream of tartar and a teaspoonful of vanilla. Beat the egg whites, adding the salt and half of the cream of tartar; add the sugar when the whites are beaten stiff but not dry, adding it gradually, then fold in the flour, to which the cream of tartar that remains is added. Bake in a tube pan for two hours in a very slow oven, browning the last few minutes in a hot oven. When the cake is cool, cut in three layers and put together with whipped cream, chopped banana and pineapple, with a few nuts and raisins if desired. Cover with whipped cream and serve.

Galantine.—Put a pound of steak through the meat grinder, add two eggs beaten, the juice and rind of a lemon, one and three-fourth cupfuls of bread crumbs, a grating of nutmeg, salt and pepper to taste and one teaspoonful of tarragon vinegar. Pack into a well greased pan and steam four hours. Serve with tomato salad. Cut into thin slices when serving.

Eat much lettuce; it is rich in vitamines, lime, magnesia, has some sodium and a generous portion of phosphorus.

Seasonable Reminders.

This is the time of year when we dispose of the things we do not need and which add to our labor or its comfort, by needing care.

A small garden, even a few square feet, will bring to the table the crisp and tender lettuce—so good for us to eat, the easy

succulent radish and green onion, all with very little care and labor.

Save all bits of leftover paraffin from jelly glasses. When well washed it may be used again for another season of jelly.

Those who still use the old-fashioned screw will find a piece of paraffin a great help in keeping the irons smooth and free from rust.

It is wise to remember, when the berry season is on, that fruit picked after a rain will not keep quite as much of its flavor.

Fruit for jelly making should not be too ripe. The pectin which thickens the jelly is found in larger quantity in unripe fruit. Pectin is the thickening agent which makes jelly jell.

Some fruits have more pectin than others. Apple is always a good fruit to add to those fruits which lack pectin, strawberries do not make good jelly alone, but added to apple juice or a commercial pectin, are most desirable as a jelly.

Keep a cork on the spindle in your desk. It may save a scratch or an eye.

Any green vegetable while cooking is of better color if kept uncovered.

Lettuce that has become too old to serve as fresh lettuce may be used in soup or stew.

The uncooked stems of fresh mushrooms cut fine and served with almonds on lettuce with a good dressing make a fine salad.

Save meat and gather the delicious mushrooms now until frost in the fall; they will be found in fields, woods and pastures.

Acute attacks of appendicitis may be relieved at once by feeling strong enemas every two hours, lying on the back and covering the whole abdomen with hot applications, to allay the inflammation?

Now is the time to give away all useless articles of ornament, used clothing, furniture and dishes. This will make living simpler and more comfortable, besides giving some one else pleasure who lives less than we.

Nellie Maxwell

Mythological God

Hymen, in classical mythology, is the god of marriage. The original meaning of the word hymen was "a bridal song." In pictures the god Hymen is represented as a winged youth bearing in one hand a nuptial veil and in the other a torch.

Molasses as Fertilizer

By the use of molasses as fertilizer the production of sugar cane has been increased nine-tons to the acre on plantations on the island of Mauritius.

Need of Sympathetic Understanding in Dealing With Youthful Transgressors

By FRANK X. M'QUADE, New York Magistrate.

WHAT a problem children courts present to the thinking men and women of America! It is my opinion that all first offenders should be freed. But even then, when you release them, if there is nothing better for them to go back to than the street, what are you going to do when they are brought back as second offenders? The problem is not in the courts, primarily. It's in the living conditions, in the playing conditions that send us these children.

The little girls of any city—what a problem! They need understanding—comprehension of their desires to have pretty clothes and good things. They need sympathy—and a place to play in and dance in and be entertained. If they had those things, some of the "kick" would be taken out of wanting to be naughty just for the fun of being naughty, of taking a drink from a hip-pocket flask just because it is smart to do so, of swearing and smoking and wearing indecent clothes, when they should be playing dolls.

What we need is sanity—not fervor. It's a cold-blooded proposition, and it should be studied and solved so, with a deep-lying foundation of sympathetic understanding. These youngsters who land in my court were not born bad; they just had no opportunity to be otherwise. All of them do not come from tenements, either. Some of them come from wealthy homes, but the parents have also took the trouble to see that fun was made sane and the thing that people expected a child to have.

Back of every criminal there is a story of a childhood made unhappy, of a chance that was never given to make that child into a useful citizen. It makes them or breaks them just in proportion to the chance they get when they are youngsters.

"Safety First" Poor Rule for Travelers on the Road to Faith

By BISHOP WILLIAM R. GUERRY.

God doesn't endow the seeker after faith with an automobile map to find his way. He doesn't tell man in advance of the difficulties he will encounter along the road of life. Like Abraham, God lends men through faith through the difficulties and distractions of modern life until the windows of heaven are opened unto him. The great difficulty with many men of today is that they are afraid to make a start toward faith. They think all difficulties must be removed before they start.

In the journey of the soul toward God, remember this, that God never asks us our difficulties in advance. He never removes the possibility of error or mistake. Like Abraham, we must heed the first call of God, being that if we start out to seek Him He will meet us as He did the patriarch at Shechem and at Hebron and give us fresh light upon the journey, until at last He will bring us up some Mount Moriah to test and prove our faith.

Safety first is a good rule for the road, but a rotten rule for life. It awaits some of the romance of life if you put out of the possibility of failure? Every great forward step, every new experience in life, is attended by risk. Why should religion be the only exception? Why should we hesitate in the light of experience to make the great and supreme effort to discover and know God?

The blessings of Christianity and the spiritual rewards which Christ has to offer are worth all the risk, all the toil and hardship which one may endure in coming to know Him as the Way, the Truth and the Life.

Revolutionary Movement in China Merely Demand for Free Country

By WILLIAM GREEN, President A. F. O. L.

THERE is no danger that the revolutionary movement in China will result in the creation of a soviet or communistic government. The movement is the culmination of a growing desire on the part of the Chinese people for the enjoyment of self-government and the blessings of liberty and freedom, and the demand for a free China has been accentuated by the action of certain foreign governments in demanding extraterritorial rights and special concessions in Chinese territory.

The laboring people of the United States would be opposed to our government doing anything more in China than to extend the protection to American lives and property.

The American labor movement believes that the Chinese people should be given the widest and fullest opportunity to establish a government of their own choosing and to exercise its sovereignty without interference from other nations. The great powers which have admittedly been encroaching upon Chinese territory should immediately withdraw from Chinese soil, give up every concession which they had gained through force or otherwise and thus leave China free to work out its own destiny.

Such action would give recognition to the commonly accepted principle of self-determination of the people and the right of all nations, great and small, weak or powerful, to settle their own national, social and political problems in their own way and in accordance with their own ideals.

Woman's Happiness, and Her Greatest Duty, Found by the Family Fireside

By DR. DAVID MARX, Atlanta (Ga.) Rabbi.

Eventually every woman will find out that her happiness lies at the family fireside. There lies her greatest duty. What is the value of a world where children have ceased to honor parents? What is the value of a world where we go out to aid humanity and neglect our duty to our own children?

Judaism stands for values and primarily the value of the home. Judaism emphasizes the hearth and woman's place in the home. She presides at her own table. She is queen of her household. No Sabbath was ever a Jewish Sabbath unless the mother of the family lighted and blessed the candles for the return of her sons and husband from the services. Because the mother blessed the wine and taught that things which are sacred must not be abused, no Jewish household in olden days ever produced drunkenness. The children of such mothers arose and called her blessed.

Old-time religion cannot be brought home but its underlying principles can. Religious values can be perpetuated through the use we make of them. No children can become religious unless their parents practice religion. You possess the power to either bless or curse your children and their children. You curse them if you forget that man does not live by bread alone and if you are thoughtless enough to place material success above religious values.

Little stories which have crept out of the White House relating to the stay of the Lindbergs at the Executive Mansion indicate that the boy flyer fairly warmed the cockles of the President's heart. It was remarked by the listeners at the Washington monument, when the President extended his greetings to Lindbergh that he showed more vim, spirit and enthusiasm than he has ever previously displayed. The President, as is usual, and as custom prescribes, had a prepared manuscript, but it was noted that, he gave less attention to it than ever before. During the reading of the passages which referred directly to the aviator and his mother, Mr. Coolidge turned from the desk to speak directly to them. There was a fine smile on his face, and when the audience before him lifted up its applause, the President beamed at its appreciation and once again turned to the guests. It was for them. He wanted them to feel it.

Lindbergh is a Yes and No man. There is no doubting that this characteristic appealed to the chief executive. Lindbergh's Yes and No is not a development of doubt or suspicion. It is a correct reflection of the way the young man does business. When a question or a problem arises, he sees only two possible answers and plunks them out. On the telephone, in social affairs, it is all the same. Once a question is asked, the machine gun reply of Yes or No is uttered, which is the way he believes all matters should be met. What wonder the President was pleased? What wonder if he saw in this two-handed, full-fisted disposal of problems a reflection of himself. As for Mrs. Coolidge, our First Lady abdicated her title, for the meeting with Mrs. Lindbergh. Instead it was two mothers who sat down and talked. At the memorable Washington Monument demonstration, the crowd owes its thanks to Mrs. Coolidge for its opportunity to see the mother of the flyer. It war her gentle insistence which forced Mrs. Lindbergh to the front of the stand so the anxious audience could see her.

MORE NEW LAWS

It is generally admitted that this is a nation of laws and not of men, and we are all glad to think that this is true. For it means to us that no man is above the law, and that all men must subscribe to it, regardless of wealth or station in life. But there has now come a condition in the country where there are so many laws that it is almost impossible for man to obey all of them.

According to statistics gathered approximately 10,000 new laws have originated in America this year from the mass of 40,000 new bills introduced in the various state legislatures which have been, or are still in session. And the gain in number of our laws has come in spite of the fact that it has been generally recognized for some time by jurists and laymen that the condition of our law books is becoming chaotic and law enforcement very difficult because of the veritable flood of laws which has been sweeping over the country. As one of our exchanges puts it:

"Too many of our lawmakers misinterpret their function by zealously striving to make misdemeanors out of trivial actions, putting absurd restrictions on freedom, burdening innocent people with undeserved punishment and otherwise loading the statute books with unnecessary laws. Let us have a legislature clean-up combined with a cessation of making all but imperative essential laws."

It is reassuring to know that a concerted effort is to be made toward damming the flood of useless legislation and toward a confiscation and simplification of our present laws. It is only by law enforcement that our nation can endure, and in order that it can endure law enforcement must be made practicable.

Baltimore's Distinction

The first umbrella factory in this country was established in Baltimore, Md., and is still in operation. It is said that the first umbrella to reach America was taken to Baltimore and was first carried in that city.

Not a Matter of Age

"Don't you sometimes wish you were young again?" "No," answered Senator Sorghum, "I have been reading the papers. A man can be just as foolish at thirty as he can at sixty."—Washington Star.

Bass Viol Forms Cart

A Berlin musical instrument house uses a double-bass viol of full orchestral size, mounted on a tricycle, for a delivery cart.

Small Ancestor Collection

One hundred and two Pilgrims landed from the Mayflower. They included seventy-four men and twenty-eight women.—Liberty Magazine.

President Calles' Daughter Weds

Mr. and Mrs. Charles C. Jackson, who were married in Nogales, Sonora, Mexico. The bride was Miss Ernestina Calles, daughter of the President of Mexico.

PRESS COMMENT

Prosperity Ahead—Virgil Johnson, chief economist of the national industrial conference board, is authority for the statement that although there may be a slight depression in business for a short time, every indication points to rapid improvement. The news is exceedingly cheering. Even more interesting, however, is his criticism of the so-called "cycle" theory, under which business for many years has anticipated alternating periods of depression. The business cycle, according to Mr. Jordan, "is a mere personification of the ignorance and lack of restraint of business men themselves, and it can be cured only when they cure themselves of these qualities." In other words, there is no reason why there should ever be another panic, and if such a condition ever again comes to pass it will be man-made rather than the result of economic law.—Washington Post.

Home Buying—Secretary Hoover of the Department of Commerce, in a recent address, remarked that he was in favor of the local buying of local products. He argued that money is wasted in shipping charges when people send away a long distance for products created elsewhere when they could buy articles made near home equally well.

If it pays to buy products manufactured in our home localities, it would seem to be good policy also to buy products distributed through local agencies, that is through our home stores. When you buy stuff sold through the stores of Newark where distribution costs are reasonable you avoid the expense of going and sending elsewhere, and distribution costs are higher in the large cities, owing to high living costs there.—Newark Advocate.

BEAVER ISLAND

Pat Lafreniere spent the week-end with friends in Charlevoix.

Earl A. Gallagher made a trip to Benton Harbor a few days ago.

James B. Parsons of Charlevoix spent the week-end here on business.

Andrew D. Gallagher made a business trip to Charlevoix last week.

Deputy Sheriff John Talley made a trip to Charlevoix last Monday.

Capt. Peter O. Gallagher is spending a short vacation at his home here.

Mrs. William Vallier of St. Ignace is visiting her brother, Dan Gallagher.

The ship Rambler made a trip to St. Joseph recently with a load of cedar posts.

Otto Nordrum, representative of the Booth Fisheries Co., spent some time here last week.

Miss Catherine McCann, an Ann Arbor student, is spending her vacation with her parents.

Misses Marsella and Anna McCafferty of Chicago are visiting their mother, Mrs. Bertie McCafferty.

Franklin Left went to Grand Haven a few days ago and will spend the summer in that region.

Mrs. Dennis D. Boyle and niece, Miss Bernardine, have been visiting friends recently in Petoskey.

Ray Reed, agent for the Linen Thread Co., Chicago, is here this week calling on local commercial fishermen.

Jesse Cole returned to Chicago a day or two ago after visiting his parents, Mr. and Mrs. Garret Cole, for two or three weeks

Dennis S. Boyle and James H. Gallagher spent several days at Garden Island last week, guests of Mr. and Mrs. Mads Jensen.

The S. S. James E. Sanford changed her schedule early this week and now leaves Charlevoix mornings instead of afternoons as heretofore.

THE THEATRE

Knockout Reilly—A fight film that is reputed to have all the punch of the real thing, plus the well known Fox brand of humor, comes next Saturday to the Palace theatre for a two day run.

Adapted from a story by Albert P. Terhune, "Knockout Reilly" stars Dix as a young steel puddler who after many vicissitudes attains to a pugilistic championship. Mary Brian and Jack Renault are featured. The film is said to be as exciting as "The Quarterback."

Rilzy—"Wear the clothes that become you most but follow the 'geste' of the prevailing mode," is the advice Elinor Glyn gives to her sex. "If short dresses are becoming and are the vogue, wear them; but if longer skirts are better suited to you wear them as long as prevailing styles permit, she said.

Elinor Glyn is the recognized mistress of feminine psychology. Her books have been built on the basis of understanding of things feminine. This applies to her most recent works "It" which appeared on the screen with Clara Bow, and her newest story "Rilzy" which was filmed as a starring vehicle for Betty Bronson and will be at the Palace theatre next Monday and Tuesday.

Sorrows of Satan—Your correspondent hasn't seen the picture, but some months ago at Paramount's Long Island Studio while D. W. Griffith was producing "Sorrows of Satan," which is to report the following unlooked for things:

Arrived at the restaurant it was necessary to wait thirty minutes in order to get a table. This, in spite of the fact that it was Saturday afternoon. Approximately forty tables were surrounded by beautifully gowned women and frock-coated men. On asking what caused the big crowd, we were told that Griffith was about to film the wedding scene in "Sorrows of Satan."

So grabbing the first available seat and gobbling our food, we ran upstairs to the enormous set on which Ricardo Cortez and Lya de Putti were to take the marriage vow.

It had already started. Bridesmaids, ushers, and flower girls swept down the steep staircase. Miss de Putti followed on the arm of her father, Lawrence D'Orsay. Reaching the minister, Cortez and the best man, took their respective places. Griffith called "Cut!" Lights were turned down. And, to our utter amazement, everyone on the set started cheering gum as though their very lives depended on expressing their jaws. Curiosity overcame us. An electrician was interrogated. "If cigarettes were lit the smoke'd flood the set. Therefore the gum."

"Sorrows of Satan" arrives at the Palace theatre on Wednesday and Thursday.

Whirlwind of Youth—Four hundred veterans of the World War, commanded by one of the most distinguished groups of British officers ever brought together in America, appear in Paramount's startling dramatic production "The Whirlwind of Youth" which appears at the Palace theatre on Friday, July 1st. No no battle scenes are shown, all the bustle and confusion which constantly existed in the area behind the lines is there.

These sequences have been photographed with all the realism and dramatic feeling for which Director Lee is noted. This experience brought back many vivid memories to these men who took part. The title of "The Whirlwind of Youth" is devoted to the war, the storys climax is laid against the sweeping background provided by the great conflict, with the star, Lois Moran, driving a Red Cross ambulance.

First Perforated Stamps

Postage stamps before being perforated, which was first practiced in 1851, in Great Britain, were cut apart by scissors or knife. The British government bought the patent for perforation of stamps from a man named Archer in 1853 for $20,000.

Moon's Fullness Brief

The full moon, astronomically defined, occurs when the longitude of the moon differs by exactly 180 degrees from that of the sun. As this condition is momentary, the moon is full for an instant only.

Great Statesman Fond of His "Little Joke"

Playing practical jokes was a favorite diversion of Otto von Bismarck after that German statesman had turned his back on public service and was farming at Kniephof. His guests now and then underwent strange and startling surprises. One day while he was chatting with his fair cousins in the drawing room, the door suddenly opened and four young foxes rushed in, jumped on the sofas and tore the upholstery to tatters. Even male visitors had need of steady nerves, for it not infrequently happened that when they had fallen asleep, soothed with a comfortable nightcap lined with porter and champagne, they were startled suddenly from their slumbers by a staccato of pistol bullets striking the ceilings above their heads and bringing down showers of plaster upon them. Once when one of his hunting companions became stuck in a bog and begged Bismarck to pull him out, Bismarck said it was a good place to try and that he had better be mercifully shot. Suiting action to the word he aimed his rifle at the companion's head, but it proved unnecessary to "kill" him, for the unfortunate man made such frantic and desperate struggles to escape that he rescued himself.—Detroit News.

"Shook Up" Officeholders

President Andrew Jackson was among the first presidents to reorganize the power of the press and the value of its support in a political campaign. Not long after his inauguration some of his advisers decided that it was highly important to have a newspaper in Washington.

They organized the Washington Globe and started it on an immediate paying basis by the simple procedure of making a subscriber of every federal officeholder whose salary was more than $1,000 a year. The handpicked Globe editors were not the paper and a bill for a year's subscription to the paper promptly came with as good grace as they could summon. A few balked, and these were told they could either pay up or get another job. They paid.—Kansas City Times.

Early Caterpillar

A Hampstead correspondent recalls that nearly seventy years ago he saw in Hyde park a trial of a military train of wagons loaded with soldiers dressed in fatigue jackets and drawn by a steam engine bearing the name Fairy. This engine, he says, could be raised its own track, each "slipper" being apparently about four feet long, mounted, and revolving on rollers much like the modern caterpillar movement. The experiment, records the London Daily Post, appeared to also at improved military transport, and the men hauled would probably number about 200 in eight wagons.

Chaplains' Seal

The device recently approved for the Chaplains' school, Fort Leavenworth, Kan., which is to be used on stationery, diplomas, mural decorations and so forth, has been described as follows: The shield is black, the color of the faclugs of the Chaplains' corps, and displays a torah, the symbol of the old law; over which is a gold cross, the symbol of the new faith. The shield and motto are displayed on a pointed oval, the early shape of the church seals, "produced by the intersection of two equal circles each of which passes through the center of the other, producing that which is true." In the space in the oval above the shield is a ribbon scroll bearing the motto, "The fear of the Lord is the beginning of wisdom." Around the edge of the oval is the legend, "The Chaplains' School of the United States Army."

WANT COLUMN

FOR RENT—Small furnished cottage. Enquire 408 Dixon Ave. tf.

FOR SALE CHEAP—Ford Coach, late 1928 model. For particulars call at Sentinel Office.

FOR SALE—Six room house on Antrim street, No. 404. Enquire of F. S. Myers. tf

Local and Personal Mention

Andrew E. Gallagher of St. James, was a Charlevoix visitor last Friday.

Attorney E. N. Cink of East Jordan was a business visitor here last Tuesday.

Heath & Milligan's paints have stood the test of time—None better. See Staley Brothers.

E. V. Smith piano service in Charlevoix. Leave orders at Holley Gift Shop or with W. C. Bellinger. tf

Edwin Madill went to Detroit last Saturday, where he will visit his aunt, Mrs. Herman G. Tellman.

Miss Myrtle O'Neill went to Detroit last Saturday to spend a vacation with relatives and friends.

James R. Pollock attended the commencement exercises in Ann Arbor Monday, returning to Charlevoix on Tuesday of this week.

Mr. and Mrs. J. W. Keiler arrived a few days ago from Paducah, Ky., and are at their cottage, 407 Michigan avenue, for the summer.

Mr. E. Reinhold returned from Saint James Wednesday where he spent a day or two on a fishing excursion with most satisfactory results.

Mr. and Mrs. John Pollock are spending a few days at Charlevoix before taking up their residence in Detroit, where Mr. Pollock has secured employment.

"Uncle" George H. Van Pelt has been more or less indisposed for some days and since last Monday has been confined to his room in Halletts Inn.

Cecile Louise Pollock returned with her parents to spend the college vacation in Charlevoix. She reports a good year in college and conservatory studies.

Mrs. Wilson will open the Tea Kitchen at 107 Clinton street on Sunday, June 26, with a 75c dinner, beginning at 12:30. Phone number 715 for reservations.

Mr. Andrew Ross went to Ann Arbor last Tuesday, where he will consult specialists relative to an eye trouble that has been developing for some time past.

Miss Marjorie Myers returned from her school work at Ann Arbor a few days ago and will spend the vacation period with her parents, Mr. and Mrs. F. S. Myers.

Supervisor W. J. Gallagher of St. James spent a little time here yesterday afternoon and took the evening train south, in order to be in Lansing today on business.

E. L. Smith of Nashville, Tenn., has taken a position with S. M. Rose for the summer and will work on one of the chairs during the season, possibly longer.

Mrs. Sibyl Garnsey, a guest of her father, "Uncle" George H. Van Pelt, for about three weeks, started on her return trip to her home, Port Orange, Florida, last Sunday night.

Mrs. I. N. Kline and family members arrived from Chicago Wednesday morning and are at their summer home, 204 Park avenue, for the season, the same as for several years past.

Miss Catherine E. MacDonald went to Ypsilanti last Monday and will spend the summer at the State Normal, taking some special work such as will be beneficial in her work as an educator.

Mrs. S. T. Gilbert and mother, Mrs. Flora Bodeman, of Detroit, opened their summer cottage, 210 Park avenue, last week, where they were joined yesterday by Mr. S. T. and son, Julius.

Mrs. George Myler and son, Edward, daughter and grandson respectively of the late Mrs. L. J. Mercier, motored up from Detroit Monday to attend the funeral service held in St. Mary's church Tuesday for Mrs. Mercier.

Gilbert B. Saltonstall and Vincent S. Madison have made arrangements for spending the summer months at Camp Omaha-of-the-Dunes, on Crystal Lake in Benzie county. They left for the camping place early this week.

Mr. E. Reinhold and daughter, Sylvia, arrived at their summer home, 215 Park avenue, last Thursday and at once opened it for the season. Mrs. Reinhold came several days later from Chicago, making the trip with a party of friends.

A demonstrator from Heath & Milligan's Paint Factory will explain the advantages of their product at our store Saturday, June 25, at which time several prizes will be given to parties attending the demonstration.—Staley Brothers.

The largest casting ever made by the East Jordan Iron Works of Malpass & Dietz was recently made. It was the keel for Dr. B. J. Beuker's new sail boat, now under construction at Charlevoix, and weighs 4500 pounds.—East Jordan Herald.

Fred Coon holds the record as a trout fisherman for the season thus far, his catch being made Sunday, the largest one measuring thirty-four inches in length and weighed twenty-one pounds, making the largest specimen taken in local waters with hook and line for some time. Large trout are frequently taken but one the size caught by Mr. Coon on special occasions only.

Superior Paints—that is what you get when you purchase Heath & Milligan's products. We carry the line.—Staley Brothers.

Fourteen acres sweet clover at Cemetery corner for sale.—Ralph Washburn.

Mrs. Raymond W. Faulkner attended commencement exercises, class of 1927, at the U. of M., held last Monday, and returned to Charlevoix the following morning, accompanied by her son, Raymond W., Jr., a member of the graduating class.

A telegram was received this morning from Mrs. Nellie Hinchey of Lansing, conveying the information that her brother Burt Burnett, passed away Wednesday and that the body would arrive here Friday morning, and that funeral service would be held at 2:30 p.m.

The opening of the Betty Tea Shop is announced for Sunday, June 26, with a continuation of the service during the summer by Mrs. Elizabeth R. Emery, at 110 Bridge street, catering to the public, picnic parties, etc., will be given special attention the same as in past seasons.

The S. S. Manitou according to her announced schedule, will make her first sailing from Chicago to Charlevoix, season 1927, this week, leaving Chicago Friday afternoon, entering this port Saturday noon, and continuing the north bound trip touching at Petoskey, Harbor Springs and Mackinac Island.

Contractor William E. Parmelee was a business visitor in Traverse City last Monday and while there closed a deal with George Lather & Sons whereby the Parmelee company will furnish the lumber and finishing material used in connection with the new school building at Central Lake and Charlevoix planning and school building, recently let by the board of education to Lather & Sons.

A new time card became effective over this division of the Pere Marquette system last Sunday and will continue through the summer season as follows: South bound passenger and mail service at 8:31 a. m.; through sleeper via Bay City and Saginaw at 7:07 p. m.; through train to Chicago at 7:56 p. m. Northbound train at 7:14 a. m.; for Chicago at 7:56 a. m.; and local passenger and mail at 4:33 p. m.

According to a recent survey, as of June 1, there are three hundred and fifty-four Indians residing within the confines of this county. Of the entire number, ninety-eight lived on the Beaver Island group, sixty-one in Charlevoix and the others at various points in the county. Several families have moved from other counties into this since making the survey and increasing the number to approximately four hundred at this time.

Mr. and Mrs. A. R. Walker of Superior, Wisconsin, were visitors here yesterday, Mr. Walker was a resident of this county some thirty years ago and is still interested here, owning a farm in South Arm township. They are motoring from Cincinnati, Ohio, in a Hudson machine that was stolen from Superior some time ago, and located by authorities in Cincinnati recently, necessitating a trip from their home to Cincinnati to secure the stolen machine.

Mr. and Mrs. Ernest Staley are at home to their friends in their new bungalow on east Huribut avenue, having taken possession and are now occupying their new home. Prior to Sunday, June 19, Mrs. Staley was Ruby Creamens Case. On that date Rev. Demas Cochlin, pastor of the First Congregational church at Traverse City, performed the ceremony uniting the couple as man and wife, making for a happy event and one that was pleasing to a host of friends.

Mrs. Era T. Kutsche, her mother, Mrs. Tuxberry, and son, William Kutsche, motored up from Grand Rapids early this week and spent some time here making preparatory arrangements for opening the Little French Novelty Shop, the same to be continued as in past seasons and in the same location as last summer. The family members return to Grand Rapids today to attend graduation exercises of the South High School, where William is a member of the class of 1927. They will return to Charlevoix Sunday and will remain here for the season.

Rev. and Mrs. C. F. Pollock returned to Charlevoix Tuesday of this week from southern Michigan where Mr. Pollock has been teaching in the Summer School of Theology at Albion. They attended the Albion college commencement exercises, where Cecile Louise Pollock has been attending school for the past year. They also attended the Commencement and Baccalaureate exercises at the University of Michigan where their son, John Thorburn Pollock, graduated with the degree Bachelor of Science in electrical engineering, on Monday of this week.

Messrs. L. P. Adams, R. W. Paddock O. A. Solomon and Charles Novak motored to Lansing early this week and represented this city at a meeting held with members of the administrative and highway departments, for the purpose of discussing the feasibility of establishing a route to be known as M-88, connecting U. S. 131 and M-11 from Charlevoix to Mancelona via East Jordan. The members of the party, with the exception of Mr. Solomon who stopped at Saginaw to attend a telephone meeting, returned to Charlevoix Wednesday morning, satisfied with the showing made by parties interested in the new route, in-as-much as the route advocated was acted upon favorably by state authorities.

Egyptians Forbidden Wheat

An authority says that the reason the Egyptians did not use wheat, and therefore no traces could be found in their mummified stomachs, etc., was because their religion prohibited its use as a food. Although they knew of the grain, instead they used maize, which they kneaded with their feet into a bread known as spelt.

POETIC FANCY IN LEGEND OF LENIN

How Soviet Leader Earned Love of Allah.

Among the many legends concerning the life and deeds of Nikolai Lenin already incorporated in the popular mythology of the Moslem inhabitants of the soviet union is one passing from mouth to mouth in Turkestan in the form of a song and summarized as follows by Lenold Bolovief, a Russian writer who specializes in collecting Lenin stories, according to the New York Times:

The World war was raging and thousands were being slain because the kings of the earth wanted to fill their treasuries and were forcing their subjects to go to the front and kill each other. The steuch of the fallen men and the noise of the conflict rose to high heaven and annoyed Allah himself, who concluded it was time to call together his most faithful followers and select one wise and strong enough to end all this misery.

In order to find the best man for the job, Allah set up a double test. His elected agent must be able to turn over a huge rock weighing 60 poods (about a ton) and to give the correct answer to the following riddle: "Who is the strongest on earth, who is the happiest, and who is the weakest and most unhappy?"

There were many candidates for the glorious mandate, but none was able to turn over the rock, although they tried so hard that the stone soon bore traces of their fingers. Neither could anyone solve the riddle, despite the variety of answers, most of which made Allah the strongest and happiest and Satan the weakest and most unhappy. Finally, Allah noticed a man of slight figure but with a very high forehead looking intently at the big rock. Maybe this little fellow can do it, thought the Most High.

When the last candidate threw off his coat and stood revealed in all his physical weakness, Allah's heart sank. But what was his surprise to see the man walk away from the rock and return in a few minutes with several beams of wood. One of these he shoved under the big stone. Then the other was placed under the free end of the first, and by means of this improvised lever the rock was easily turned over, revealing the poisonous serpent Oh-Ilec, whose tail, weighing 100 pounds, had helped hold the stone down.

Then the little champion answered Allah's riddle as follows: "The strongest is the most intelligent, who wins every one's love; the happiest is the most honorable, who gives happiness to many; the most unhappy and the weakest is the man beloved by nobody."

Allah saw how wonderful was the talent of this man. So he lifted him up into heaven, where he spent 50 days and 50 nights learning the wisdom of the Most High. Thus equipped the successful candidate was named Lenin and sent back to earth. Lenin strode over the earth and stopped the stream of blood. He brought happiness to humanity. Then he returned to rest in Allah's halls. He left the world purified and happy. His name shall endure while the word "happiness" lives.

So runs the legend.

He Liked Boxing

Paul was quite fond of boxing. Whenever he was with his little pal Frank he never lost an opportunity to deal him a blow. One day Frank, grown weary of being the daily victim of these blows, bolstered up his strength and dealt Paul such a box that he sent him home crying.

Rejoicing over his victory, Frank hurried in and told his grandfather. His grandfather reprimanded him, saying: "Frank, do you think that is anything to be proud of? Don't you know that the good Lord sees all you do? In the day the sun is God's eye and at night the moon shines on all deeds."

"Oh, that's all right," replied Frank, "I hit Paul on the shady side of the house."—Indianapolis News.

Cancer Research

Studying the light given off by ash of tumors burned in an arc light is the latest method of attacking the cancer problem, one which has been applied at the Hahnemann Medical college in Philadelphia by a trio of biologists and a physicist, Donald C. A. Butts, Thomas E. Hiatt and Frederick Palmer, Jr. By means of a spectroscope, which analyzes the light and reveals the elements that cause it, they have found that the yellow lines due to sodium, which appear only momentarily when the ash of normal animal tissue is placed in the arc, persist until it has all been consumed when the ash from tumors is analyzed. This shows the presence of the element sodium in cancerous tissue.

Skyscraper Possibility

New York's recent announcement that it would bust its own sky scraping record in the construction of Larkin tower, more than 1,200 feet high, leads the London Morning Post to comment that the proposed building will be higher than the highest highbrow, and its elevators will give more uplift than the loftiest thinkery even in the United States. Altogether, it will be quite the latest thing in aerial suburbs. "I wonder," says the writer, "if the skyscraper is carried much further, whether the saloons on the top floor will be able to claim they are beyond the three-mile limit."

Best for the Dog

Table scraps form the best food for the dog, says Nature Magazine. Do not feed him either potatoes or chicken bones.

A 5-gallon can of Zinc-O-Lit house paint will be given to someone Saturday, June 25, as a free prize. Second and third prizes will also be given to holders of lucky numbers. Come and watch our demonstrator work.—Staley Brothers.

CHURCHES

Baptist Church

Rev. Herman Burns, D. D.,
—) Pastor (—

A hearty welcome to all who come to services in this church.

Preaching services morning and evening. Bible school at noon, and at 6:30 p. m. B. Y. P. U. expect to study Japan with the aid of the stereopticon.

Today the Ladies' Aid are meeting with Mrs. McFarlin on Bridge street, and the choir, under the leadership of choirmaster Mr. Kelley, will have rehearsal at the M. E. Chew home this evening.

Methodist Church.

C. E. Pollock, Pastor.

The preacher for next Sunday will be the Rev. Dr. William M. Puffer of Kalamazoo, Mich. Dr. Puffer is the superintendent of Bronson Methodist Hospital, and has been for many years a leading minister of the Michigan conference. The public are cordially invited to the 10:30 a. m. and the 7:30 p. m. services of worship, and to all the other services of the church.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "Christian Science."

Mondays and Tuesdays 8:00 a. m.

Saturday 7:00 a. m.

Saturdays and Mondays mass at 7:00 o'clock a. m.

Rev. Fr. Odelo.

Earliest German Settler

It is recorded that the first German in America was Tyrker the German, noted in the Saga of Leif Ericsson's expedition in the fifteenth century. There were several Germans among the settlers of Jamestown, also in the Massachusetts Bay colony.

PETER RODNEY HOGART

was born at Chatterville, Ont., Dec. 9th, 1850, and died at the home of his son, H. J., at New Lathrop, Mich., June 16th, 1927 at the age of 76 years, 6 months, 7 days.

When a child he moved with his parents to Muskoka, Canada, where he grew to manhood and where in 1874 he was married to Katherine Doherty. They moved from there to Charlevoix county in 1883 and located near Barnard. To them twelve children were born; two of whom died in infancy. Four of them were born in Canada and the other eight in the vicinity of Charlevoix.

His companion preceded him to the beyond nearly two years ago, and he is survived by ten children: Mrs. Arthur Vonrenner of Flint, the only one not present at the obsequies on account of illness, W. J. of Charlevoix, H. J. of New Lathrop, E. J.

Given Fortune of Old Friends

Made Heir by Brother and Sister He Met When a Student.

Toronto, Ont.—Romance as highly colored as a fairy tale has gilded the personal fortunes of E. R. Bennett, K. C., who comes into national prominence as a formidable counselor for the leadership of the Conservative party in Canada.

Through his own efforts in the practice of his profession Bennett is credited with having become a millionaire. On top of this he now enjoys a "windfall" which, if it were an episode described in fiction, would be challenged for straining credulity.

When Bennett, nearly 40 years ago, was studying law in Chatham, N. B., along with Max Aitken, now Lord Beaverbrook, among his friends were a sister and brother, Jennie Shirreff and Harry Shirreff, both of whom were a few years his senior. They worked together in church and in the temperance lodge.

Girl Trains as Nurse.

Whether sentiment existed between Jennie Shirreff and the young law student is not known. In any case, their ways parted. The girl went to Brookline, near Boston, to train as a nurse. Bennett went to the new town of Calgary, Alberta, to practice his profession, and grow up with the West.

In 1894 Jennie Shirreff married Ezra Eddy of Ottawa, proprietor and founder of the E. B. Eddy company, paper, pulp and woodenware manufacturers, whose daughter by a former marriage she had served professionally.

When, 12 years later Eddy died, his will declared it to be "one of the great desires of his heart" that his business should be continued. To that end he established a trust with his widow as one of the trustees to operate for ten years, at the end of which period his widow was to inherit five-eighths of the estate.

Thus in 1906 the former nurse came into possession of a controlling interest of one of the great industries of Canada. She brought to her new responsibility an executive capacity which had found play even during her husband's lifetime when she had accompanied him on his daily rounds and had become familiar with every detail of his enterprises.

Meanwhile Bennett had reached Ottawa as a member of the house of commons. He, like Jennie Shirreff, had prospered and they resumed their contact on equal terms.

Names Bennett as Trustee.

In 1921 Mrs. Eddy died. Like her husband, she also established a trust by which was set aside for ten years. She appointed as trustees and executors of her estate her brother, J. T. "Harry" Shirreff, who held an important executive position in the Eddy company, and "my friend for the last 50 years, Richard Bedford Bennett, barrister." As trustees she directed that her brother was to receive $15,000 and Bennett $7,500 a year.

Subject to the provisions of the trust she bequeathed 1,007 shares in the Eddy company to her brother and 500 shares to Bennett. The value of each bequest was in the millions. In addition to the shares in the company which she had inherited from her husband, she was able to bequeath another million dollars to charities, churches, relatives and friends.

Harry Shirreff did not survive the five-year trusteeship. He died on May 20, 1926. Even more surprising than Mrs. Eddy's bequest was the following clause in her brother's will:

"My surviving sister, Edith Jessie Richardson, and my surviving relatives having been amply provided for by my deceased sister, Jennie Eddy, I give and bequeath 1,008 full paid-up shares of the capital stock of the E. B. Eddy company, limited, owned by me by special bequest to Richard Bedford Bennett, on the expressed condition that the said Mr. Bennett shall have paid all estate and succession duties and taxes which may be payable with respect to the said shares, and, further, shall have paid also to the Montreal Trust for the purpose of establishment of the Gulielma Putnling Shirreff trust fund, hereinafter more fully described, the sum of $250,000."

Inheritance Worth Millions.

The trust fund provided for an annuity for the testator's widow, and that provided for, Bennett, the sole survivor of the three young comrades who merrily frequented the debates in Temperance hall in Chatham, N. B., in 1885, finds himself by the resolution of fortune's wheel possessor of an inheritance worth many millions.

Bennett's 1,008 shares give him a majority of the 2,000 shares of the Eddy company. They are not on the market and their value can only be estimated. The plant in Hull, hewn in the river from Ottawa, is assessed at $1,500,000 and the company possesses huge timber limits in the Gatineau valley and elsewhere. As a going concern the business is worth possibly $20,000,000.

There have been rumors that the International Paper company is trying to buy control. But the desire of E. B. Eddy, the founder, that the business should continue as an independent growing enterprise remains in force. And the capable hand of Bennett is at the helm.

Polar Fur Bonnets Lady Eskimo's Choice

Seward, Alaska.—What woman who gets her styles from Paris can boast of possessing in her fur chest baby reindeer pelts as soft as velvet, silver fox, seal, mink, ermine and wolverine? All of these enter into the making of Miliady Eskimo's winter clothing.

The Eskimo maiden labors with the same enthusiasm as her white sister in filling her hope chest. And each garment bears some mark expressive of her dreams. Not only must the fabric be consistent, but color blendings must create harmony.

The little squares which adorn the flounce of her parka are cut from different colored pelts and the coat is made from many furs, ranging in color, yet harmonizing.

Polar bear and wolverine are the most popular for hoods.

New Discovery Will Save Guinea Pigs

Denver, Colo.—Lives of guinea pigs, hitherto known as the "test tubes" of tuberculosis, probably will be saved in the future, thanks to a discovery made in the laboratory of Dr. Denver Jeredith hospital.

For years guinea pigs were the only known medium for producing tuberculosis bacilli for experimental inoculations. Not only were thousands of the animals sacrificed to science, but thousands of dollars were spent in raising them in hospitals throughout the country.

After months of experimentation, Dr. H. J. Carper, director of the Denver institution, was able to produce the tuberculosis germs through the use of a specially treated potato medium.

One hundred tests. Doctor Carper said, now may be made on the white guinea at the cost of one where germs from guinea pigs were used.

He added that the germs from the potato culture are in daily use in the Denver hospital and that he expected their use to become universal within the next few months.

Something in That

Oakland, Calif.—Mrs. G. S. Noble is of the opinion that we hear more about the escapades of young people today because our publicity facilities have been developed

Hen's Eggs Sell at Rate of $300 a Dozen

Vancouver, B. C.—There was told by "Mahlie" world's champion hen owned by the University of British Columbia, that she has been sold to a Texas poultry breeder for $25 apiece or at a rate of $300 a dozen, according to an announcement by Prof. Everett A. Lloyd. The "mahlie" hen recently broke all previous records by producing 351 eggs in a 365-day test.

"This is the highest price ever paid for a hen's eggs," said Professor Lloyd. "If the entire set of 351 eggs had been sold at $25 apiece, the pullet's production for the year would have been worth $8,775.

"Mahlie's record in the egg laying contest was four eggs ahead of the world's previous high mark held by an Australian bird which laid 347 eggs in a year's official test. The former record held in North America was established by a pullet at the Puyallup (Wash.) experiment station, which laid 325 eggs in 365 days."

Scientific poultry breeding, it is pointed out, is improving the standard of Canadian flocks. Some of the finest birds on the continent are said to be owned in the Dominion. Poultry is becoming an important farm sideline in western Canada. Now settlers entering the mixed farming areas find hens profitable. Elimination of inferior and scrub stock from the barnyards is helping to develop the industry.

Propaganda Had Its Birth in Ancient China

Washington.—Although it took a World war to develop it into an element of everyday life, propaganda, like powder and printing, was produced in China long before Europe became aware of its possibilities.

Emperor Chieng Lung, who ruled over China in the Eighteenth century, wanted his people to believe that his domain surpassed the world. So he had printed a book in which 42 European peoples and 231 tribes were represented as paying tribute to him, this being shown not only through the text but with engravings.

His book is included in a Chinese collection on exhibition at the Congressional library, which also embraces a few volumes printed in the Twelfth century, 300 years before the art of printing was developed in Europe.

Spanish Mayor Learns Women Can't Be Bossed

Alsuendrajo, Spain.—The mayor of this mountain town near the Portuguese frontier is determined to save his woman constituents from the taint of short skirts and bobbed hair despite the fact that scientists say they don't wish to be saved.

So he added his name, Senor Francisco Montero de la Barrera, has adopted new tactics. He has abandoned his proposal to fine women who appear on the streets in short hair or abbreviated skirts. Instead he will present this year prizes to the two most charming maidens of his city of 13,000 inhabitants who maintain the old-fashioned long hair and skirts.

President Calles' Daughter Weds

Mr. and Mrs. Thomas A. Robinson, who were married in Nogales, Sonora, Mexico. The bride was Miss Kruschia Calles, daughter of the President of Mexico.

BESIEGED BY CHILDREN FOR LOST-DOG REWARDS

Physician Flees From Farmhouse on Claiming Caning When Faces Appear Everywhere.

Sioux Falls, S. D.—When Dr. Anton Kaufmus set out at a farmhouse in the Marion (S. D.) district to remove the children of a farmer for findiug and taking care of his lost dog he found children to the right of him and to the left of him as well as in front of and behind him. Incidentally, he accidentally discovered what may be the largest family of children in South Dakota. Even now he does not know how many children there were in and about the farmhouse, but he states there were plenty and to spare.

The physician was driving along a country highway in his car with his valuable fox dog occupying a place on the fender. While the motor was traveling at a rapid rate the whole struck a rut in the road and the dog was hurled under the car. Fortunately the wheels did not strike it.

But the animal did not like such rough treatment and upon regaining its feet started off on a run across a pasture. It paid no attention whatever to the whistling and calls of its master.

Several days later the physician learned that his missing dog was at a certain farmhouse in the district. Supplying himself with silver dollars he went to the scene. It was his dog, all right, but he asked himself whom should he reward? George, one of the children, saw the dog in the pasture first. Henry, another of the children, had told the other two about the stray dog. Frank, still another of the children, said them how to surround and capture the dog, so all of them had assisted in "taking up" the stray animal.

Six or seven boys were each given a silver dollar, and then several girl members of the family enquired for their share. The rewarded two little girls with silver dollars and thought he was through. But the door of the farmhouse opened and three or four more little girls appeared. As the physician prepared to take to flight in his car he began to see two other little faces appear in the dining-room window and the rattle of a pail in the chicken house was taken as a hint that still another child wanted some of the reward.

30,000 School Children Die on Roads in 5 Years

Washington. — Thirty thousand school children, most of them less than thirteen, were killed on the highways during the five-year period ending January 1, 1927, the American Road Builders' association stated recently. A survey of accident conditions over this period revealed that more than 3,000,000 persons had been sent to hospitals as a result of street and highway accidents, in addition to the loss of more than 100,000 lives.

Has Grown Up Into Big League

Photograph shows Frank Bowman, eighteen-year-old Hughes high school student in Cincinnati, star pitcher, who thinks he has grown up into big league company, and is anxious to break into the big stuff. Everybody admits Frank has grown up, for he measures 6 feet 6½ inches in his stocking feet. Here he is capable of an average-sized player, and notice the extra foot of pants added to make them long enough.

Followers of Sport Are Hard to Please

Grantland Rice the other day graphically illustrated this interesting situation with respect to sports. He published a letter from a fan saying, "Why don't you cut out all that truck about golf, and give us more on baseball and fighting—that's what the readers are interested in." Just beneath that letter he published another, which said in effect, "Why don't you cut out all that bunk about baseball, and give us more about golf—that's what the readers are interested in."

Escaped Lunatic Wins

Escaped Lunatic ridden by Mr. Fleet Goldsmith, the owner, recently won the College handicap at Windsor, Mr. Goldsmith raised the horse after himself, after he (Mr. Goldsmith) escaped from the lunatic asylum recently. In this photo Mr. Goldsmith is shown taking a jump on Esau, one of the several steeplechases he owns and trains.

Sporting Squibs

• • •

Yachting regattas are held every summer at Grand Lake, 8,300 feet above sea level, on the continental divide.

• • •

Jack Dempsey has gone in for wood chopping to place himself in condition, and if wood chopping works he may be able to saw some.

• • •

An inquirer called up the information editor the other day to ask: "How do you spell 'Jack Dempsey?'" and the editor said: "Badly."

• • •

The contract on Jockey Robert Finnerty, a New Orleans boy, has been purchased by the Dearborn stable of Chicago from W. S. Heaton of Louisville.

• • •

George Veiehl, winner of the recent annual North and South amateur tournament at Pinehurst, never took a lesson in his life from a professional.

• • •

S. J. Sansone, a Detroit boxer, missed entering the "Hall of Fame" recently when, after rolling 11 straight strikes, his twelfth ball toppled all but one pin.

• • •

Harold Hopper likes Mexico City so well he intends to make his home there, and has been selected a member of Mexico's Davis cup team.

• • •

The Oregon state left-handed golf tournament will be held on the Eugene Country and Golf club course June 11 and 12.

• • •

Cash prizes amounting to $200,000 will be distributed to winners of motor speed races held on various tracks under the auspices of the American Automobile association this year.

Live Stock Is Improving Fast

Officials Think Tendency Shows Influence of Educational Work.

(Prepared by the United States Department of Agriculture.)

Particular attention of live stock owners in the systematic campaign to improve domestic animals shown several interesting trends in live stock evolution. During the seven and one-half years that the federal-state plan has been in operation the enrollment of new participants has been continuous, averaging about two hundred a month. Live stock officials of the United States Department of Agriculture consider that this tendency shows the general influence of educational and demonstration work.

Many Breeds Represented.

Another noticeable trend is the many breeds and classes represented. The kind of stock raised by twenty-five owners in Kentucky who late in April officially joined the army of pure-bred ace users, illustrates the wide range of animals involved in this useful work. Among the principal breeds undergoing improvement at the hands of these progressive stock owners are Jerseys, Guernseys, Holsteins, Shorthorns, and Angus cattle; Chester-White and Poland-China swine; and various breeds of chickens from the Leghorns and Plymouth Rocks predominating.

Lithographed Barn Sign.

Persons co-operating with the various state and federal Department of Agriculture receive a lithographed barn sign suitable for display on the premises. The sole requirement is the written agreement to use pure-bred sires for all classes of live stock kept and to follow systematic breeding methods leading to the improvement of breeds and flocks. The agreement furnishes suitable printed matter on the principles of live stock breeding. Subsequent reports show that resulting improvement of the animals raised under such a plan adds greatly to their utility and sale value.

Corn-Belt Farmers Will Keep Out Harmful Borer

Not content with keeping close tabs on the progress of the corn borer and clean-up campaign in their and neighboring states, the corn-belt farmer farther east is seriously taking steps to keep the borer out, according to reports, received by the United States Department of Agriculture.

Iowa has appropriated $200,000 and other corn-belt states have appropriated large sums for corn-borer research within recent months. Engineers are trying to develop machinery that will make it easier to grow corn in the presence of the borer. Plant breeders are trying to develop varieties of corn that will circumvent the attacks of the borer. Realizing that a change in usual farm practice may be necessary, agricultural experts are urging farmers to be prepared to change their methods of growing corn in the event the borer becomes established in their states.

DIAMOND PICK-UPS

Marty Sheu, infielder, has been unconditionally released by Bridgeport.

• • •

Waterbury has released Outfielder Joe Napier and Second Baseman Francis.

• • •

New Haven has obtained Ike Danning, recruit catcher, from the Pittsburgh club.

• • •

It is now 20 years since Ty Cobb first won the American league batting championship.

• • •

Tom Whelan, ex-Indianapolis star, is managing the Lynn team of the New England league.

• • •

Joe Oeschger, formerly of the Robins who joined Mobile this spring, has drawn his release.

• • •

The New York Nationals announce the release of Pitcher Howard Holton to the Newark International as an option.

• • •

Forty-two games will be played by the Waseda university baseball team on their present tour of the United States.

• • •

Rudy Kneisch, southpaw pitcher secured from the Detroit Tigers, has been released by the Toronto club to Wilkes-Barre.

• • •

Richard Coffman, twenty-year-old Washington pitcher, has been released on option to the Jersey City club of the International league.

• • •

Baseball fans will determine the starting pitcher of the United States when the Los Angeles club through a ballot to be conducted in the newspapers.

• • •

Walter Kinney, who deserted the Philadelphia Athletics in 1922, has returned to organized baseball with the Portland Beavers in the Pacific Coast league.

• • •

According to Col. David Starr Jordan, chancellor emeritus of Stanford university, California, Babe Ruth is worth $100,000 a year to the game for services to the world are concerned.

• • •

The Chicago White Sox have purchased Frank Wilson, left-handed outfielder from the Waco Texas league club and released Rudolph Moore, also an outfielder, to Waco under option.

• • •

With Jake Atz having considerable trouble getting his Fort Worth Cats started on the right track, the acquisition of Lefty Johns, veteran pitcher, from Detroit, was greatly welcomed.

• • •

A veteran sport writer recently selected the three baseball managers whom he considers the greatest of all times. They were Jerry Dennty, 1880-1890; Danny Collins, 1895-1900, and Arthur Devlin, 1904-07.

• • •

George Mullaney, Detroit sandlot star, worked out with the Chicago White Sox when they were in the automobile city and looked so good that Roy Schalk took him along. He is an infielder of more than usual possibilities.

• • •

Booth Hopper, who has served some time in organized ball as a pitcher, has been added to the umpiring staff of the Southern league. John D. Martin, president of the league, has announced that Hopper has been signed as an umpire.

• • •

Jack Kiernan, after several weeks of indecision, has again decided to take over the reins of the Haverhill club of the New England league.

• • •

Arthur (Bill) Teachout, star southpaw hurler and slugger of Occidental college, in California, has received offers from five big league teams.

• • •

Mike Menoskey, veteran outfielder, who was in the majors some years back, has been signed by Spartanburg. He was with Greenville earlier in the season and was a free agent.

Horticultural News

ORCHARD SHOULD BE CULTIVATED

The dropping of fruit, both apples and peaches, is largely due to lack of water during the season when the fruit is rapidly increasing in size. An average peach tree, normally to mature its crop, will require in the neighborhood of 3,000 gallons of water in the growing season, according to J. R. Cooper, horticulturist, college of agriculture, University of Arkansas.

"An apple tree will require twice as much water, because of its larger size. To maintain a constant supply of water throughout June and the first part of July, it is necessary to hold the water that is now in the soil, by constant and thorough cultivation.

"Cultivation should continue up to the first of July and should be thorough enough to keep down all vegetation. It is impossible to produce a normal crop of fruit and support a crop of weeds or cover crop of trees during May, June, July and August. The severe checking of growth, even though sufficient moisture is had later, means a partial loss of crop. It may also mean at least a partial loss of next year's crop, due to the formation of an insufficient number of fruit buds. The orchard should never be allowed to stand in the spring until it becomes too hard to plow."

New Early Raspberry Is Developed in Minnesota

Fruit growing stations operated over the state by the University of Minnesota division of horticulture of the University of Minnesota are being supplied with selected seedlings from which an early ripening seedling raspberry known as Minn. No. 250 has been developed. A recent reports show that resulting improvement of the animals raised under such a plan adds greatly to their utility and sale value.

Corn-Belt Farmers Will Keep Out Harmful Borer

Not content with keeping close tabs on the progress of the corn borer and clean-up campaign in their and neighboring states, the corn-belt farmer farther east is seriously taking steps to keep the borer out, according to reports, received by the United States Department of Agriculture.

Iowa has appropriated $200,000 and other corn-belt states have appropriated large sums for corn-borer research within recent months. Engineers are trying to develop machinery that will make it easier to grow corn in the presence of the borer. Plant breeders are trying to develop varieties of corn that will circumvent the attacks of the borer. Realizing that a change in usual farm practice may be necessary, agricultural experts are urging farmers to be prepared to change their methods of growing corn in the event the borer becomes established in their states.

Growth of Bacteria in Milk Can Be Retarded

That the growth of bacteria in milk can be retarded by prompt cooling was strikingly exemplified by some work recently done by the western dairy division of the United States bureau of dairy division in connection with the milk supply of cheese factories. Since the milk from 30 patrons of one factory were pitted and bacteria counts made. Twenty of these patrons cooled their milk in running water and nineteen did not. The cooled milk had an average count of 30,000 bacteria per cubic centimeter, while the others averaged 317,000. The cooling was by used to indicate the best methods of cooling milk, of washing cans, of pasteurizing whey, methods of testing for the milking machine and perhaps other operations. Such data should result in a better understanding among the patrons in regard to the importance of caring for the milk and his delivery to the factory in good condition.

Agricultural Items

The city and suburban garden can harbor the corn borer just as the cornfield can.

• • •

Coccidiosis and bacillary white diarrhea are chick diseases dreaded by every poultryman.

• • •

Grapevines of varieties which grow vigorously usually do best when pruned and trained to the Kniffen system.

• • •

All the good things that can be said about apples apply to silicdity less degree to clover and other legumes.

• • •

Recent estimates of the United States census bureau indicate say that 1,121,000 more people moved away from farms than moved to them in the United States during 1926.

Prevent Maggots From Attacking Onion Sets

The best way to control the onion maggot is to trip the adult flies while lay the eggs. These flies like sweets. About twenty small plates of a little poisoned syrup placed on an acre will do much to control them. The plates should be covered with a wire screen of a mesh small enough to prevent bees from getting in. One-fourth-inch mesh is the most satisfactory. This screen will also prevent poultry and birds from drinking the syrup.

The syrup can be made by dissolving one fourth ounce of sodium arsenite in a gallon of hot water, and then adding a pint of molasses.

Horticulture Notes

Lima is not relished by the straw-berry and raspberry, which rather like an acid soil.

• • •

The demand for McIntosh apples has been better than for most other varieties this year.

• • •

The current issue bears counting considerable damage of late. A heavy late spray just after the petals fall in addition to the scarcity of leaf will be found very helpful.

• • •

Start spraying the currant bushes as soon as the leaves unfold. You will go a long way towards keeping down the worms in the garden as the currants are their favorite nurseries in spring.

• • •

One of the fruit growers in Oregon has found that dead hens make an excellent fertilizer for young fruit trees. He keeps about 800 hens in connection with his orchard, and the loss of hens by death amounts to from 3 to 5 per cent in different years.

• • •

It makes it a lot easier to get the spraying done if the spraying machine is put into shape and everything is ready to go three or four weeks before it is necessary to put on the first spray.

• • •

Plowing in the orchard is not an uncommon practice. Soils with a hard-pan condition are helped temporarily with increased water penetration. Shallow plowing is often practiced in need of disking to increase the efficiency of the cover crop.

CARIB GOLD

By ELLERY H. CLARK

Copyright 1926 by Bobbs-Merrill Co. WNU Service

STORY FROM THE START

In the small New Jersey village of Strathmeath, in the year 1749, Richard Lindsay, who tells the story, is a carefree youth whose chief activities are fishing and hunting. Proud of his marksmanship, he gives an unfriendly look before some villagers and a stranger, with whom they afterward dine at the tavern. The conversation turns on a notorious pirate, whose ship, the Black Panther, is thought to be in the West Indies. Next morning Lindsay, after his ducks, is sitting in a boat on a beach near him. The man buys a gun from Lindsay's watches. The would-be robber, he sees two of the strangers in the third. The actual stayer is the man with whom Lindsay had talked the day before. Lindsay's presence is discovered.

CHAPTER II—Continued

The silence lengthened; from the far distance the whistle of a flock of curlew came to my ears. How strange, I reflected idly, that that should be the last sound I would hear; and then, slowly, deliberately, the dark pirate lowered his weapon until its muzzle pointed toward the ground. Then came the reaction. A momentary faintness and dizziness seized me; I felt myself sway; I threw out blindly an arm for support. Then, with a great fear lest these men should spot my cowardice, I bit my lip savagely, thrust my nails into my palms and by the weakness of pain.

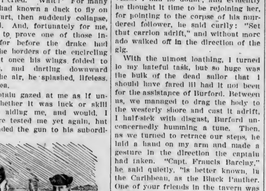
Burford turned laughingly toward the man in the red coat. The captain's face was alight with some conviction that I could not fathom; the dawning of some new idea was there, and whatever it was, it must have pleased him hugely, for all at once he threw back his head openly and heartily; as I was accustomed to see men laugh, but silently, and as it seemed to me, evilly. Presently, since he did not communicate to his companion the cause of his merriment, I decided that yesterday inquired with some sharpness, "What cause for laughter?"

"Cause?" answered the captain, becoming grave again. "Much cause. What if we send this one in place of the other?"

What he meant by this was unknown to me, but evidently Burford understood, for he seemed to ponder for a moment, then queried. "What gain?"

"What gain?" Barclay repeated. "All the gain in the world. It's spare his life; hence he goes as my man. My will to command without scruple; the foiled cull, perhaps, will be killed for him. And at a time especially he does not enjoy into my hand."

What they were talking about I had not the remotest idea, but I could see that what red-coat said impressed his hearer. For an instant Burford



"Go to the Gig, Burford, and Bring Me My Gun."

mate, a flock of about twenty swam ducks, closely massed, passed overhead, but well out of gunshot. With a sudden exclamation, he stooped, seized my rifle from the ground, leveled it and fired. I fairly held my breath; if he made a shot like this, there was in all probability my doom was sealed. And for a second I thought he had been successful, for one of the flock started to fall, then—to my intense relief, recovered and flew strongly on after his companions, while through the cedar, transparent air a single feather floated down.

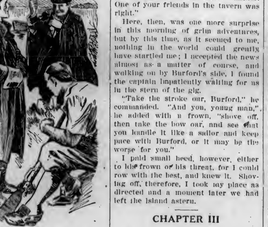
The captain pulled upward, not, I felt, without pride. "A feather, at least," he exclaimed. "Can you better that, my young cockerel?" And he handed me my rifle.

I felt that it was now or never. What might be the humor of this strange man I knew not, but I sensed instinctively that he was boundlessly vain of his skill, and that whatever might be the object of this difficult test, he was most eager to prove that he was a finer shot than a mere country boy. Yet, strangely enough, so keen in most men's minds is this desire to excel, that even now, while my life hung on the result of the next shot, and while I was of two minds whether it would be to my advantage to win or lose, still, illogically enough, while I felt my better chance to be to shoot the captain's pride by missing, and thus perhaps continuing to live, I nevertheless stood ready to do my best, and if I must die, at least to die with the memory of a shot well sped to lighten my pangs.

I had not long to wait. Again a whistle of wings, and a half dozen redheads emerged from the fog. They took no notice of us, but passed directly over our heads in a wide curve, clearly the same range as the flock at which the captain had fired. Two beautiful birds were flying close together and almost directly in line, and as they passed overhead I signaled at the leader, swung ahead, and pressed the trigger. Never in my life have I had a keener thrill than when from out of the flock a beautiful drake dropped onto the sand, and lay there, beating his wings in his dying agonies.

"Fetch it!" cried the captain imperiously; and I obeyed. The bird was dead by the time I had reached it, and, picking it up, I turned it in my hands. The captain looked first at the duck, then at me. "A good shot," he admitted but reluctantly; then, as if realizing that this was inadequate praise, he added, more heartily, "An excellent shot."

I made no answer. It has always been one of my many failings to permit my emotions to show too readily in my face, and this must have been the case in the present instance, for the captain, eying me keenly, abruptly inquired, "Why should you be gloomy?



"Go to the village blacksmith and tell him to bring me a file."

Are you not satisfied with your aim?"

And now, utterly reckless as it was, for no one, I think, could have blamed me for refusing, and kept my face impassive, I answered, "because I missed my bird. They were flying faster than I thought, and they were higher than I thought; the fog deceived me. I held on the leader, of the two; the drake was just behind. I deserve no praise! I missed."

Both the captain and his henchman stared at me as they might have stared at a lunatic; then simultaneously they roared with laughter. "In God's name," cried Barclay, when he could speak, "here at last we have Honesty; rampant, roaring Honesty, the greatest handicap to a man in the whole wide world." And yet he did not seem ill-pleased either, perhaps because he felt that his reputation was restored; but in any event, to my great joy, he had kept clear of his pistol butt. Evidently, for the time at least, my life was saved.

Every moment the fog was thinning beneath the rays of the sun, and now, obeying the captain's curt and quick glance out to sea, I followed the latter's eyes, and perceived that in the distance away, a handsome, black schooner, hove to. That this was his vessel, I had no doubt; and evidently he thought it time to be rejoining her, for, pointing to the corpse of his murdered follower, he said curtly: "Set that carrion adrift," and without more ado turned on his heel in the direction of the gig.

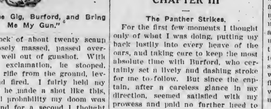
With the utmost loathing, I turned to my hateful task, but, as huge was the bulk of the dead sailor that I must needs lift, how great it not be for the assistance of Burford. Between us, we managed to drag the body to the gunwale, then, as it sank, I let it go. I half-sick with disgust, Burford unconcerned and humming a tune. Then, as we turned to retrace our steps, he held a hand on my arm and made a gesture in the direction in the captain had taken. "Capt. Francis Barclay," he said quietly, "a better man known, is the Caribbean, as the Black Panther. One of your friends in the tavern was right."

Here, then, was one more surprise in this succession of grim adventures, but by this time, as it seemed to me, nothing in the world could greatly astonish me. I accepted the news almost as a matter of course, and walking on by Burford's side, I found that my mind was busying itself not at all in the stern of the gig.

"Take the stroke oar, Burford," he commanded. "And you, young man," he added with a frown, "shove off, then take the bow oar, and see that you handle it like a sailor and keep your head forward, or it may be thy worse for you."

I paid small heed, however, either to the threat that I might now be put to work with the best, and knew it. Shoving off, therefore, I took my place as

"Fetch It!" Cried the Captain Imperiously; and I Obeyed.



"Take the Stroke Oar, Burford," He Commanded. "And You, Young Man."

directed and as a moment later we had left the island astern.

CHAPTER III

The Panther Strikes.

For the first few minutes I thought only of what I was doing, putting my back lustily into every heave of the oars, and taking care to keep the most absolute time with Burford, who certainly set a lively and dashing stroke for me to follow. But since the captain, after a careless glance in my direction, seemed satisfied with my prowess and paid no further heed to me, I settled down mechanically into the rhythm of the steady sweep, and improved the opportunity to take, as it were, account of stock, and to look ahead to see whither this strange adventure was leading me.

For one thing, all was only too clear that I was among men with whom the life of a fellow creature counted for nothing. A word—a blow—a knife thrust or a pistol shot—that was their code, and their only code, and as to my moral as absolutely immoral, without a law of God or man to check their fierce and unbridled passions. If only, by good luck, I could find myself once more armed, then I knew that whether I liked it or not it would be myself for my own hand—my life against that of every other man—and devil take the blindmost.

So much was clear. I could have wished that I had been equally certain of the reasons which had caused the unlooked-for sterling of the captain's hand. Who was this "other" to whom they had referred—no less taller than I, with a scar on his cheek, and a dead shot with rifle or gun? And for what reasons was I to take his place, and deliver the captain's enemy into the captain's hands? There was no use in thrashing my tired wits; I must wait and see.

Curiously enough, though I admit it with shame, in spite of the fact that I was in imminent danger, in spite of the fact that I might never see another sunrise, yet so wayward is youth, so avid of adventure and contact with the world, that I was all eagerness to see this pirate ship, and thrilled with satisfaction every time I looked at the spare, silent figure in the stern, those keen eyes looking straight ahead, those delicate hands resting lightly on the tiller ropes. This man had just committed a heinous murder; and rewarded a follower with the utmost severity, and I felt no pity nor horror cry out against him in revolt. And yet, explain it as you will, there is something so wonderful in the quality of power, something so magnificent in the man who leads, who lords it over his fellows, that even as I admired, so I found myself admiring this ruffian with his high and mighty ways, and marveled as I thought of the seas which he had sailed, the rich vessels he had boarded, of his prowess as a fighter, and of the almost charmed life that he bore.

So meditating, I paid small heed to the passing moments until a curt word of command told me that we had reached our craft, and the next instant we had shot alongside, and the captain had leaped aboard, leaving Burford and myself to follow in his wake. Before I had time even to cast a glance around her decks; Burford, with extended arm, pointed to the pirate, and, in the manner of one addressing a dog, ordered me forward, with extended arm, pointed to the pirate, and, in the manner of one addressing a dog, ordered me forward, with extended arm, pointed to the pirate, and, in the manner of one addressing a dog, ordered me forward, with extended arm, pointed to the pirate, and, in the manner of one addressing a dog, ordered me forward, with extended arm, pointed to the pirate, and, in the manner of one addressing a dog, ordered me forward, with extended arm, pointed to the pirate, and, in the manner of one addressing a dog, ordered me forward, with extended arm, pointed to the pirate, and, in the manner of one addressing a dog, ordered me forward,

Put Faith in Image to Frighten Smallpox

Motoring along a country road in India, the attention of tourists was called to a curious-looking object by the native chauffeur. It was a roughly carved little image, mounted on a small stool, with three legs.

The image betrayed no signs of expert workmanship and was quite clearly the handiwork of some rough village carpenter. They eyes and mouth were roughly carved, and vermillion paint brought these into prominence. The little creature had also its wooden arms.

Stopping the car, the tourists waited until some villager came along the road, and questioned him as to the reason why this image had been left by the roadside. He pointed out that it had been placed a few yards over the boundary line of the village, and that it had been there since the early hours of the morning.

It was an image of the goddess of the village temple, so common in south India, and represented the deity who controls smallpox. The scourge had broken out and had laid low a number of people, and it was felt that unless the goddess could be persuaded to transfer the evil more would fall sick.

So the little image was made and removed outside the bounds of the village. Naturally the people in the next village did not appreciate this attention, and the custom is to move it from village to village. Then, sometimes it is possible to get a Mohammedan, for a small fee, to destroy it utterly.

Thus does the Indian villager deal with the troublesome disease.

Strictly Business

A celebrated Welsh bard, who was also a preacher of fame, returned to his native village in the wilds of Cardiganshire. A charity concert was arranged, and the world-famous virtuoso was given a hero's welcome. "Evan Evans, my old friend and schoolmate, will sing for us," announced the chairman. "Evan Evans, the village blacksmith." Well, I'm telling you now that I am the village blacksmith and I want to say that if by any chawnce you get an encore, will you please to be so extra verse to say that I also let out bikes on 'ire at sixpence an hour?"—Taffy Tales From Welsh Wales."

It Often Happens

"The judge flattered This Lindley today when he was examining him for jury duty."

"How was that?"

"He asked him if he had formed an opinion."

Good Reading

Good literature has a charm in common, but it has also a power immeasurable in the forming or transforming of a nation as of an individual character. The people that have the cleanest, healthiest literature will become the cleanest and healthiest people. A good thought wisely expressed and thoughtfully applied is priceless for its continuance. Throw it on the winds and it will find its bourne; sink it in the deepest water and it will reach its haven, for the noblest thoughts are the breath of Almighty. Such immortalities are beyond the end of time and beyond.—Exchange

Diet and Cancer

The theory advanced by many persons that eating a natural or wild diet will prevent cancer has apparently been contradicted by recent experiments reported Hygeia Magazine. When mice, the type of animals especially suited to cancer experiments, were placed on various diets, those on the wild diet had the highest cancer mortality and those fed on apparently unbalanced diet had the lowest.

There was not the slightest evidence that fried or well-cooked food was associated with an increase in cancer.

Ridiculous Sentences

Imprisonment for 350 year. at hard labor—believed to be the longest sentence on record in the Bahamas—and 10 other sentences of 250 years each have been given a leader of a band of Albanian brigands and some of his followers for the murder in 1925 of 14 Siberian soldiers in a convent near Prisrend.

Not in Tropic Zone

The extreme southern point of Texas is 26½ degrees north of the tropic of Cancer.

SUMMERY GEORGETTE PRINTS; FOR THE VACATION WARDROBE

THE stage is "all set" for about as enchanting a midsummer fashion scene as fancy can picture. For while mistron and flopper the mode has prepared delectable frocks of buttery sheer chiffons, topped with big droop-lipbrim chapeaux whose colorfulness will happily join forces with the tones and tints of growing flowers and summer skies.

The gowns and hats in the picture are typical of the mode whose reign is foretold for this summer. For while these lovely costumes portray the general trend toward hats big of brim and frocks daintily sheer, only the individual ensemble can convey the glory of color which will be achieved throughout dress, headwear, footwear; likewise every accessory.

Long soul-fitting sleeves are an outstanding feature of the unlined, hedowered chiffon frocks as now worn. A charming vagary of the mode is to omit applied trimmings in styling these sheer transparencies, arriving at effect by a most intriguing handling of the fabric, in multitudinous drapes, pleats, tiers and the like.

Side-fullness is becoming quite a factor in styling. This same is put into practice in the instance of each of the gowns in the illustration. Now the dress on the standing figure, a long sash of self-material tied over the left hip answers to the call for ribbons, also shoulder flowers of self-fabric, are favorite trimming details. Of course you are not thinking of starting on that vacation trip without a smart jersey sports frock! If so, be of good cheer, for there is yet time to change your mind, and it's a fact your wardrobe would be sadly lacking without a pretty, becoming jersey one-piece dress or jumper suit. Nothing equal to Jersey for faithful service! A Jersey frock has the faculty of being tucked into any scraps of auto trunk or week-end suitcase, coming forth at the unctitious moment unwrinkled and ready to wear.

The Jersey frock in the picture is a likeable model, because of its extreme

A Simple Jersey Frock.

the now-so-extremely-modish big-bow trimming, at the same time giving the impression of a generous side-fullness. The seated figure displays a different side-slimsy which, while it assures the desired fullness, does attain an even hemline, while in also a matter of outstanding style importance.

As to the printed motif for chiffons and georgettes, fashion runs to extremes from tiny florals to huge flowers, especially roses. Colored velvet ribbon is being used in the making of many printed chiffon frocks as now worn. A charming vagary of the mode is to omit applied trimmings in styling these sheer transparencies, arriving at effect by a most intriguing handling of the fabric, in multitudinous drapes, pleats, tiers and the like.

Elaborate Hosiery for Evening

Stockings to wear with evening slippers of gold or silver kid and brocade are of gossamer sheerness and are made of fine metal threads in a lacy design.

New Silks

Showings of the new silks for spring are especially interesting as they feature designs with motifs inspired by modern life and tendencies. There is one with flat figures bearing the chariteson, another shows airplanes, a third represents the crowds in a huge stadium, and others are of equal timeliness.

Tucks and Plaits

There has rarely, probably never been a season when tucks and pleats were so extensively employed as trimming decorations. In many instances they are the only form of ornament in fashion. Tucks run round and up and down, or across the frock, in diagonal lines, achieving effects that are new and distinctly smart.

Vice President Dawes Opens New Lake Michigan Harbor

Vice President Charles G. Dawes last week, following the official ceremonial salute of 19 guns, raised the flag over Buffington Harbor, Indiana, thus signifying the formal opening to navigation of the first private harbor to be built on Lake Michigan in twenty years, and one of only three such harbors on the Great Lakes. In addition to the vice president, William R. Dawes, president of the Chicago Association of Commerce, E. J. Buffington, president of the Illinois Steel Company, B. F. Affleck, president of the Universal Portland Cement Company, and a number of other notables took part in the ceremonies.

Vice President Charles G. Dawes.

This new deep-water harbor, located at the plant of the Universal company, is said to be one of the most modern on the Great Lakes, there being a large boat-unloading bridge, a million-ton storage yard for raw materials, an electrically operated conveyor belt of a mile long to carry material from dock to cement plant, and an all-concrete lighthouse with one of the brightest beacons on Lake Michigan.

The new improvement adds impetus to the deep-waterway movement and the further enlargement of lake traffic, and enables the cement company to receive by boat and store large quantities of raw materials and to ship cement by water as well as by rail to all points on the Great Lakes and the Mississippi Valley.

New Concrete Lighthouse Lighting Entrance to the Harbor.

The freighter, "Eugene J. Buffington," discharging a 12,000-ton cargo, was one of the features at the formal opening of Buffington Harbor, the first private harbor to be built on Lake Michigan in twenty years and one of only three private harbors on the Great Lakes.

SAYS SCHOOLS ARE ATHEISTIC

University President Denounces Spread of "Four A's" in Secular Schools

Atheism is being promoted in an organized way in the colleges, universities and even in the high schools of the United States, the Rev. John P. McNichols, S. J., president of the University of Detroit, told members of the fourth degree Knights of Columbus, assembled in Convention at Detroit, recently.

Quoting frequently from articles by Homer Croy, published recently in "The World's Work", the speaker showed that a deliberate attempt to spread atheistic doctrines under the guise of "modern" philosophy among students of educational institutions all over the country is being made by the American Association for the Advancement of Atheism. Among the institutions where units of this association exist is the College of the City of Detroit, a municipal institution, he charged.

Further excerpts from Mr. Croy's articles were quoted by the speaker to show how the officers of the association boast of the number of professors in American colleges who are linked with the atheistic movement under cover and how these teachers are gaining in boldness and confidence and consequently are widening the scope of their activities.

Cites Loeb-Leopold Case

Father McNichols held his listeners in close attention while he reviewed the dangers of the atheistic movement today, citing such instance of its effects as the Loeb-Leopold case in Chicago, which, he said, was the outcome of materialistic teachings at the University of Michigan.

"Such men as Dr. Clarence Cook Little and Professor Wenley, both of the University of Michigan, are teaching under what is called 'academic liberty'. But in their cases liberty has turned into license," the speaker declared.

Catholic parents who fail to send their children to Catholic universities or colleges are risking their children's faith, he continued, in giving a short historical resume of the University of Detroit.

New Buildings Ready

"We have the new buildings under way and this fall we will carry out to Livernois and the Six-Mile Road two departments, arts and sciences and commerce and finance, leaving the law school for the present on Jefferson avenue," he said.

Father McNichols emphatically denied that the University of Detroit contemplated discontinuing its Law School. Not only will the Law School continue but it is thought that in the near future the University will be able to announce the openings of departments of medicine, dentistry, and a school of education.

No God—No Country

"There can be no country where there is no God," Father McNichols said. "We obey the laws of the nation because we recognize that God is behind and beyond those laws. Russia is an example of a country trying to get along without a God. The American Association for the Advancement of Atheism, of which I have just told you, has for its purpose the removal of chaplains from army and naval units, elimination of the Bible in oaths, repeal of the Sunday observation laws and removal from coins of the motto, 'In God We Trust'."

The speaker reiterated that the most effective antidote against the rising tide of atheism is the sending of Catholic boys and girls to Catholic schools where they will profit by good example and by teachings which, he said, "are not filled with falsehood and rot."

MEMORIAL SHAFT NEARS COMPLETION

The Memorial Shaft to Mary Immaculate, raised on the campus of the new Marygrove College of the Sisters Servants of the Immaculate Heart of Mary, through contributions from men all over the United States who were students in schools taught by the Sisters, as a testimonial of grateful appreciation to their early teachers, is rapidly nearing completion.

The shaft, 50 feet in height, will rise midway between the liberal arts building and the principal campus entrance. It will be of solid stone on a raised platform the corners of which will support large urns. Surmounting the shaft will be a superlife-size statute of Mary Immaculate, wrought in Carrara marble.

CONCRETE ROAD

(Continued from page one)

always on the top. It is for you to open or close and you to make of yourself what you are by so doing. It is important now that it should be opened, because for years we have been going on in the same old rut in our expensive and non paying road work. I have tried to illustrate or rather go over what we all know is true, and which everyone can go and see for himself.

COPY OF CHRISTMAS CARD 1916

Every mile of gravel road built in Charlevoix county immediately becomes a mortgage on the county, which grows larger and larger each year, because it will have to be repaired all of the time and rebuilt every two or three years. Now when the difference in the cost of a gravel road and a good concrete road is so small, why not build concrete? Note the concrete on Dixon avenue which has already been down six years, and the same as Main street, East Jordan.

Accept my Christmas greeting for the year 1917. Yours truly,

George H. Van Pelt.

Pres. Charlevoix Co. Good Roads Assn.

This is sent you now, June 1927, to prove that my prediction was true, as well as to remind you that the same condition exists today, as did then, and it is up to you to change it. If you wish to progress and increase the value of your property, build concrete roads. If you are satisfied with the kind of mortgaged roads you have been, and still are building, keep on building them.

You will notice that there has not been a dollar expended on the concrete roads already built; also that if our officials had been on the job we could have had the entire twenty miles of road on the Dixie highway built years ago with concrete instead of twelve miles, and no black, dirty, oily substance to drive, skid and spoil your car on. Yours truly,

Uncle George H. Van Pelt.

Chinese Catholic Bishops

On October 28, 1926, Pius XI, in the presence of his court and of the diplomatic body, consecrated as bishops six Chinese priests. They were Chao, Soow, Cheng Chou, Hoo and Twoo. These were the first of that race to be elevated to the position of bishop.

Architectural Secret

Russia's "house of cards" still holds its secret. The magic construction of the old Imperial riding academy's roof at Moscow, which doesn't have a beam, brace or pillar, has again baffled inquisitive architects and engineers who tried to find out how it was put together.

Much Harm Done to Winter Wheat

Losses Nearly as Heavy as Caused by All Other Diseases.

(Prepared by the United States Department of Agriculture)

Winter injury to wheat causes nearly as heavy losses in that crop as do all wheat diseases combined, says the United States Department of Agriculture. The acreage of winter wheat annually abandoned, largely because of winter-killing, averaged 9.3 per cent during the 23-year period from 1901 to 1922, inclusive, according to Department Circular No. 378, "Comparative Hardiness of Winter-Wheat Varieties." Just issued by the department.

During the 14-year period from 1909 to 1922, inclusive, frosts or freezing caused an average loss of 3.5 per cent of the wheat crop and plant diseases 3.9 per cent, according to crop correspondents of the department.

With a view to developing winter-wheat varieties of greater hardiness, investigations were conducted at 26 experiment stations in the United States and Canada during one or more of the six years from 1920 to 1925, inclusive. In the experiments 45 winter-wheat varieties and strains were grown in uniform nurseries.

Data as to comparative hardiness show that the varieties Minhardi, Buffum No. 17, Minturki and Odessa are considerably more cold resistant than the standard Kharkof and as a check Padui, Turkey (Minn. No. 1450), and Beloglina are somewhat more hardy than Kharkof. Kanred and Nebraska No. 60 are generally slightly hardier than Kharkof. Nebraska No. 28 and Blackhull are much less winter hardy than Kharkof. The results obtained in these experiments are being used as a basis for breeding wheats to combine winter hardiness with other good qualities.

A copy of the circular may be obtained free, as long as the supply lasts, by writing to the United States Department of Agriculture, Washington, D. C.

One Work Horse Needed to Care for 35 Acres

How many acres will one horse take care of and how many horses are needed on a 320-acre farm? Those are questions which are now being studied by economists at the Kansas State Agricultural college, reports J. N. Chapman.

"We have generally believed," Chapman says, "that one work horse is required for each 25 to 35 crop acres where no tractor is used, but that on farms having a tractor one work horse is needed for 45 to 55 crop acres."

Farmer co-operators working in conjunction with the department of economics at the college have reported from various counties the number of horses used per farm and the number of crop acres per work horse.

In Lincoln county 14 farmer co-operators reported one work horse to 34 crop acres. Six of the farmers own tractors.

In Dickinson county eight co-operators report one work horse for every 33 acres and five of the farmers own tractors.

Washington county with 30 farmers reporting shows an average of 24 crop acres per work horse with three farmers using tractors.

Free Martins Generally Supposed to Be Sterile

While twin calves of the same sex, as a rule, present nothing unusual in regard to their future fecundity the case is otherwise when the twin calves are of different sex. The bull calves of such births become normal breeders, but the heifer calves commonly turn out to be sterile. Such animals are known as "free martins." In one instance in which the future breeding capacity of 113 heifer calves was studied, only six were found to be fertile, and in another observation only four of 77 such calves bred normally. The rest were nonbreeders.

The phenomenon appears to depend on a connection between the blood vessels of the fetal membranes which are commonly grown together. This enables an exchange of certain substances which play a part in the reproduction function, the substances of the male being predominant over those of the female, and this dominance inhibits the full development of the reproduction organs of the latter.

Chicks Offer Splendid Market for Extra Milk

Baby chicks offer a splendid market for milk. They make a more steady growth and keep in better condition on milk than on any other drink. It is better to give the milk sour. The lactic acid of the milk is a foe to white diarrhea; it is toxic in its effects. Also, the chicks like it better than the sweet, separated milk. The sweet milk has the disadvantage also of giving the eyes stuff if the chicks dip in too deep.

The breeders who dip each tiny beak in sour milk as they take the chicks from the incubator are not offering feed so much as introducing lactic acid, and sweet milk doesn't answer this purpose.

Two Types

Lots of folks who financially aren't worth a cent wouldn't sell themselves for a million; and some millionaires have at some time or other sold out for a song.—Greenville (Ala.) Advocate.

Volume 58 — Charlevoix, Michigan, Thursday, June 30, 1927 — Number 10

DEATH CAME VERY SUDDEN

John J. Fagan, Old Time Citizen, Civil War Veteran

John J. Fagan, old timer and former business man, died suddenly last Monday at the hospital, where he was taken following an attack of dizziness suffered in mid-afternoon. For a long term of years Mr. Fagan was identified with Charlevoix in a business way until about two years ago when he disposed of his business interest and retired from his usual active pursuits.

In earlier years he was a commercial fisherman, actively engaged in such for forty years in this region where he was familiar with the surrounding waters; perhaps moreso than any man of his line. While engaged in the fishing industry he discovered one of the many reefs in Lake Michigan and this up to the present time is down on government charts and known as Fagan's Reef.

He was a native of Ireland, born in 1846, the exact month and date, aside from the year is unknown, nor was it known by Mr. Fagan. He came to America before he attained the age of four years. At seven he was an orphan and from that age on he was thrown upon his own resources and made his way through life.

He was a veteran of the civil war—a man of the navy—served on the gunboat Richmond, under General Farragut and was in Mobile Bay when Fortress Morgan was captured by the Federal forces.

Mr. Fagan usually spent the winter months in the south or west and this he did during the winter just past when he spent the season in California making the west bound trip last fall by automobile, returning to his home here about five weeks ago. He was in his usual health through the early part of Monday, about the street visiting with friends and was about to attend a little tete-tete which was giving an exhibition in the afternoon, when he was taken with an illness which caused his death a few minutes later.

There is no blood relation survivors. With the death of Mr. Fagan this branch of the family becomes extinct. Arthur Fagan a step-son, arrived here Wednesday morning to attend the funeral service which will be at St. Marys church Thursday morning at ten o'clock.

BOYNE CITY THIS YEAR FOR FOURTH OF JULY

Boyne City will be the mecca for a large number of Charlevoix citizens and people from far and near next Monday, in order to observe the sports and events arranged for the regular Fourth of July celebration. Large display bills are out announcing the special features of the day, the program being so arranged as to meet requirements and furnish enjoyable entertainment to the public from early "morn" until the late hours of night.

"HAY DAY" ON THURSDAY

Don't Forget the Day, July 7th, Farm of Will Shepard

All roads lead to the farm of Will Shepard, one mile north of East Jordan, home of the red, white and blue silo, on Thursday, July 7th, at 1:00 o'clock for surely all farmers will want to see the Hay Day demonstration to be conducted there. The demonstration will be in charge of Larry Kurtz, specialist, who has about thirty hay making days in the state.

Three complete lines of machinery will be on display and operated in the field for your inspection and scrutiny. This will be one of the few times that farmers can actually see different makes at work and in boring under the same conditions. The McCormick-Deering rake and hay loader will be shown through Goodman & Bolon, East Jordan; the Massey-Harris by East Jordan Co-ops, and the John Deere line by Boyne City Assn.

The demonstration will show you how to modern machinery the hay can be cut, raked immediately in fluffy loose windrows and without losing its high feeding value by drying quickly; and to put in the barn the second day with favorable weather conditions carrying all its leaves, and fully as important that deep green color that make a fa1fa so valuable.

With the increase of alfalfa acreage and the difficult problem with respect to securing good help this new system of curing and handling hay will no doubt be a life saver.

SIX CANNING CLUBS ORGANIZE

Thirty-Five Girls in Rural Districts of County have Joined

B. C. Mellencamp

Approximately 35 girls living in the rural districts of the county have joined canning clubs for the summer. This is a large increase over last year and gives promise of being a very successful and beneficial project.

The members between the ages of 10 to 14 inclusive can at least thirty quarts of fruits and vegetables using directions from the Michigan State College; while the members of 15-20 years, can fifty quarts. In the second year work in addition to fruits and vegetables, they can jellies, jams, marmalades and vegetable mixtures; while in the third year in addition they will can some form of meat, fish or fowl. The members will also keep records of the cost, time worked, write a story of the project and exhibit their canned goods at the fair.

Following are the leaders who will lead the clubs and communities represented: Mrs. C. Mason and Mrs. S. Straw, Mich; Mrs. Andrew Struthers, Hopyard school; Mrs. Clyde Goll, Boyne Falls dist; Mrs. Henry Hilton, Hilton school; Miss Frances Goodell, North Peninsula; Miss Belle Habel, Chaddock School dist.

The police department of Berlin has been augmented by the addition of policewomen, who are to protect women and children, especially in the parks of the city. Their uniforms have been designed to tie in keeping with those of the policemen, even to tie cap.

CARFERRY WABASH IN PORT

Last Tuesday—The Largest, Best Equipped in the World

Charlevoix harbor was paid a visit last Tuesday afternoon by the new carferry "Wabash" the largest and finest ship of its kind in the world, a recent production from the Toledo Shipbuilding yards for service across Lake Michigan from Frankfort, from which port she hails. The Wabash was launched at Toledo, March 19, 1927 and has been in process of finishing since that date until taken out on her initial trip for active service. Off her trip up the ship headed at Menominee and Manitowoc and from the latter place carried her first load across the lake to Frankfort, then making the run to Charlevoix with various officials of the Wabash and Ann Arbor railroads and several passengers, the latter being members of Charlevoix summer residents.

The Wabash was constructed at a cost of $900,000. She is a mammoth ship, a two stacker, and has a registered length of 380 feet, breadth 57 feet, depth from keel to bridge of 75 feet, rated as a 1300 ton carrier and has trackage for carrying 32 freight cars. Captain B. F. Tullage was in command and his chief engineer is O. Larson; besides mates and engineers the ship carries a crew of forty-five men.

The Wabash carried among others the following officials: Mr. J. E. Tuesday, president of the Wabash and Ann Arbor railroads; Mr. S. C. Gother, vice president and general manager of the Wabash railroad; J. W. Newell, vice president of Wabash and Ann Arbor railroad; George H. Sido, general manager Ann Arbor railroad; J. M. Hayes, secretary to President Tuesday; M. S. Hernet, advertising manager of the Wabash and R. H. Reynolds, superintendent of terminals.

When the Wabash was tied to the wharf passengers for Charlevoix making the trip to this port left the ship were Mr. and Mrs. George Tranet, Chicago; Mr. and Mrs. Frederick Leland, Mr. Mr. and Mrs. Clarence Mack and Mrs. Henry Garneau, of St. Louis, Mo. Thirty-four specially large state rooms with parlors and modern conveniences have been provided for the use of guests and passengers and cabins are elaborately outfitted in such styles as are only found on board the most luxurious liners.

THOMAS RUSSELL PASSES

Lived in Charlevoix these Many Years

Thomas Russell, sixty-nine years of age, and for many years a resident of Charlevoix, passed away at the family home last Monday, June 27th. He was born at Harmon, Canada, April 19th, 1858, and was united in marriage with Miss Sephronia Saulsbury in 1879, by whom he is survived and also by eight children, four daughters and four sons.

Funeral service will be held at the family home this afternoon at two o'clock, Rev. C. E. Pollock pastor of the local M. E. society will officiate.

Emergency Dam for Ship Locks at Seattle

Should an enemy or a flood destroy the gates of the Lake Washington ship canal, the second largest in the world, located at Seattle, this emergency dam, built recently by the government at a cost of a quarter of a million dollars, could be swung in place and effect a temporary repair in less than five hours.

CHARLEVOIX DAIRY CLUB REORGANIZE

With Thirteen Members—Same Rule Govern as Last Year

During the month the Charlevoix Dairy Club has been organized to carry on its activities for the new year, with a membership of 13 boys and girls scattered throughout the county. As in the past they will care for their dairy animal, keep accurate feed and cost records, receive instruction in that of judging, and show their stock at the County Fair this fall. Numbered in the list are three pure bred Jerseys, five grade Jerseys, one pure bred Guernsey, one grade Guernsey and three pure bred Holsteins all of various ages.

Following are the members: East Jordan—Oswald Hosegood, Bruce Sanderson, W. F. Wurn, Alfred Larson, Eddie Omiand, George Johnson, Frank Severance, Luetle Severance.

Charlevoix—Rex Supernaw, Albert Elliott, Arthur Elliott, Burr Handland. Boyne City—Mildred Crowe.

In addition several new names will be added as soon as stock can be selected for them.—Co. Agr'l Agent.

UNCLE TOM'S CABIN

Will Exhibit Here, in Big Tent, on July 12th

Generations of playgoers have enjoyed "Uncle Tom's Cabin," the play that moved the world and made history. While the text of Harriet Beecher Stowe's masterpiece is preserved in its entirety in the Stowe production that will exhibit here July 12, there are other features introduced that makes the entertainment a novelty even to those who have laughed with Topsy and wept with Eva years ago.

Harriet Beecher was born at Litchfield, Conn. in 1811. Her father was Lyman Beecher, a clergyman and his brother, Henry Ward Beecher was one of the preacher orators of his time.

July Fourth is the Day to Honor America's 56 Immortals

Who are America's immortals? They are the signers of the American Declaration of Independence, the men whose history making deed one hundred and fifty-one years ago we celebrate on the Fourth of July. But how much do YOU know about them? What kind of men were they and why was their signing of this memorial document such an important event? How many of the signers can you name? These and other questions which your children may ask you on this great national holiday you can answer more readily if you read an article in this issue of The Sentinel. Its called "America's 56 Immortals,"—written by Elmo Scott Watson. Be sure to read it.

FINED FOR USING ILLEGAL MESH

Deputy GameWarden Smith Gets One

Enterprise, St. Ignace.

C. M. Smith, deputy game and fish warden, who has been with the department for many years, was in the city Saturday. Mr. Smith has been patrolling the waters in this section making an examination of the nets being used by commercial fishermen, and found some of those in use by August Johnson of a slightly undersized mesh.

Mr. Johnson said he purchased the nets for a four-inch mesh, and his invoice so shows, but admitted, after they had been measured by the warden, that they were slightly under.

Johnson appeared in justice court where he pleaded guilty and upon the recommendation of the warden was given the lowest fine possible under the law, $25 which, together with the costs, was paid.

FISHING CASE UNDER INVESTIGATION

States Attorney Generals Force Making Investigation

From Lansing comes an echo of the James J. Martin case that was in the Charlevoix circuit court during a recent term, when the respondent drew a fine of $300 and cost. Assistant Attorney General M. M. Larmouth now makes the claim that the fish taken belonged to the state; that the catch was illegal, therefore the proceeds received from the sale of same belonged to the state and not to Mr. Martin.

The threatened action if carried out will be for recovery of the value of the fish illegally taken and sold—an amount that is slightly in excess of $1000. The state's contention is that the fine assessed was purely a penalty for having committed an illegal act and that respondent Martin is further held responsible for the value of the fish taken for which the state should be reimbursed.

AUTOMOBILE ACCIDENT

Brother and Sister Killed, Friend Injured, Friday

A roadster leaving the highway at a curve a few miles south of Elk Rapids turned over and caught the three occupants underneath last Friday, resulted in the death of Ruby and Ernest Cunningham, brother and sister, and the serious injury of Charles P. Ferlinghan.

They were young people, all residents of Cheboygan where the young men were members of the coast guard crew and at the time of the accident were motoring to Cheboygan, their home, after making a visit with friends at Traverse City.

DISCONTINUE PASSENGER SERVICE TO ELK RAPIDS

Passenger service according to reports, has been discontinued on the Williamsburg-Elk Rapids branch of the Pere Marquette system and that too without being required in the near future, making for more or less annoyance to residents of Elk Rapids and contiguous territory.

Service for the past few years over this branch road has caused much unfavorable comment. The recent action of discontinuing passenger service between the two points necessitates the patronizing of the bus line, some taxi service or owning an automobile by parties desirous of going to or from Elk Rapids to the main line, Traverse City or points north. At any rate as the situation now rests it makes for a wholesale inconvenience for resorters who occupy cottages in that region and all local citizens.

STORY FROM THE START

In the small New Jersey village of Straitsmouth, in the year 1749, Richard Lindsay, who tells the story, gives an exhibition of his marksmanship before some villagers and a stranger, with whom they afterward dine at the tavern. The conversation turns on a notorious pirate, whose ship, the Black Panther, is thought to be in the offing. Next morning Lindsay, after sighting Sandy Hook, sees a strange land on the beach near him. They bury a chest and then one of them, Bartford, recognized by Lindsay as the man he talked with the day before, kills one of his companions. Lindsay's presence is discovered. The third man is Captain Bartley of the Black Panther. The three go aboard.

CHAPTER III—Continued

What I saw gave me no great liking for the discipline on board a pirate ship; for I could think only of animals gorged and glutted with slaughter as I observed the score of villainous figures sprawled about the decks, drinking and carousing, and exhausting searches of rifled sea stores. To my relief, all traces of carnage were absent, whether they had butchered their victims outright, or had imprisoned them in the cabin of the hurricane-decked boat in the offing. I could only conjecture. From the looks of these men, with their colored handkerchiefs bound round their heads, their savage unshorn faces, their clothing an odd mixture of rags and tattered finery, I could see, unless the captain gave me his protection, that I should have small chance of surviving the first drunken brawl.

Walking off, the captain, as he passed me, indicated by a gesture that I should follow him. After what I had seen of the state of affairs forward, I was only too happy to obey, and had reached the companionway when the captain turned to Bartford with the curt command, "Bring Mc-Allister below."

A moment or so later, when my eyes became accustomed to the altered light, I perceived that the captain's cabin was much in keeping with the man himself, adorned as it was with silks and satins and the sables of magnificent wild beasts. One thing in particular, as I remembered afterward, caught my eye at once, and that was an ugly looking whip, hanging near the door of the cabin and suggesting all sorts of tortures to my mind; but all of this I saw, as it were, mechanically and without comprehension, my thoughts all lying in the direction of my own affairs and of what I felt might well be my imminent fate. Meantime the captain, somewhat to my surprise, stepped to a sideboard and with his own hands set out upon the table a huge slab of beef, a loaf of bread and a great flagon of wine. Then, absent-mindedly, he seated himself, motioned to me to do likewise, and waited, his eyes brooding, as if busy with thoughts which took him far from the Black Panther and her savage crew.

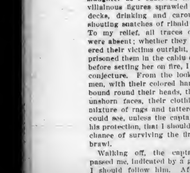
Presently the companionway was darkened and Bartford entered, followed by a taller figure with his arms strapped securely behind his back. I looked up as they advanced; then, forgetting all else in my astonishment, I fairly leaped from my chair and stood staring at the newcomer, while he, in equal amazement, stared back at me. And now indeed much of what my captors had said became plain as day, for barring the fact that this youth was a trifle taller than I, and that he had a shrewd scar on his left cheek, I might almost have been looking at my reflection in the glass. He was, to be sure, better dressed, as befitted a station in life evidently somewhat above my own; but otherwise, as far as face and figure went, we might have passed not only for brothers but for twins.

The voice of the captain broke the silence, and little as I care to pay him compliments, I must acknowledge that the courtesy with his cabin transformed him, at least for the time being, into a courteous and considerate host. "Mr. Robert McAllister," he said slowly, "I wish to introduce to you Mr. Richard Lindsay. Mr. Lindsay, Mr. McAllister. Bartford, kindly release Mr. McAllister's arms. Thank you. Gentlemen, I pray you to be seated and to accept my humble hospitality."

Completely pazzled, and yet with a great dread of what was to come, I again seated myself at the table, was handed a generous portion of meat and bread, and being by this time exceedingly hungry, I improved the occasion to the utmost and I dare say ate somewhat the best trencherman of the four. Presently the captain poured us wine, and bowing in turn to the three of us said courteously, "To your good health, gentlemen, and to your continued prosperity."

As he spoke, his face was grave; no sneer curved his lips; yet I could have sworn that he was taunting himself, as a cat does with a mouse, and that beneath his words lurked a meaning now hidden from us, but which we should shortly understand.

We set down our glasses, I, for my part, feeling a slight revival of courage with the welcome draught. The captain, I remember, leaned back in his chair, one hand toying absently with the flagon before him. It was a strange scene. I knew, from the gentle motion of the vessel that outside the waves were dancing in the sunlight and that the seagulls were soaring idly in the blue; yet here, by some whim of Fate, this other youth and myself, who had only a few hours ago been free and happy, were now sitting in this cabin, our lives depending on the mood of this dark-faced, inscrutable captain, this "Black Panther" of the deep.



He Seated Himself and Motioned Me to Do Likewise.

My meditations came abruptly to an end as I realized that the captain was speaking, and that as he spoke he looked at me. "Mr. Lindsay," he observed, with what seemed to me an unfeeling coolness, "I must needs venture, with Mr. McAllister's permission" —and now I felt that this ironical politeness included the other young man as well as myself—"must needs venture to tell you something of his personal affairs. Letters, you must know, though carefully dispatched, do not always reach their mark. They may sometimes be intercepted, and much information of value may come into the hands of those for whom it was never intended."

He paused, moistened his lips with wine, and continued, with the air of a man who feels certain of the attention of his audience, "Such a misfortune has happened in the case of Mr. McAllister. And although I was never meant to know it, I am now aware that Mr. McAllister has an uncle who lives on the island of Jamaica, that this uncle is named—let me see"—he affected to reflect—"as if his features somehow gave him pleasure—"Ah yes, now I recollect; the uncle's name is Capt. Andrew McAllister. He is a man of wealth, of position, of large interests; like the centurion, in Holy Writ, he saith to this man 'go' and he goeth, and to this man 'come' and he cometh." He paused again; then added with a sharp change of stern fierceness, "Am I not right in what I say?"

The young man, somewhat unwillingly, I thought, and as if aware that the captain was somehow trifling with him, admitted that he had an uncle in Jamaica by this name, and that he understood little, if anything, of any consequence there.

The captain sullied blandly. "Too modest," he cried, "too modest by half. Your uncle himself, with all his modesty, would scarcely rate himself as so low. And why, then," he went on with a sudden change of manner, "why then, under such circumstances, should not Capt. Andrew McAllister be happy and free from care? Alas! no man is entirely blest. It seems that he has an enemy, cruel and vindictive, who seeks to do him harm. He does not write this to his nephew, but from other sources I know it to be so. Thus it is his misfortune to live in dread on an island, in what is practically a fort, garrisoned by a little band of devoted followers. And also since none of us can stay young forever, Andrew McAllister has the further misfortune to grow old, and hearing of the talents of his nephew in America, he writes to him to come and join him. He learns"—and he bowed low to the young man—"much good of him; that he is young, strong, brave, and—your pardon—ave for a scar upon his cheek, a handsome youth. He hears also that he is a wonderful shot with rifle, pistol or fowling piece. Also Captain McAllister has an adopted daughter of rare beauty; perhaps the nephew and she may wed and succeed to the wealth of the uncle. And thus Mr. Robert McAllister, hearing of all these things, and having seen the young lady's picture, decides—perhaps unfortunately for him—to try the venture. He starts out, but scarcely has he begun his voyage when he has the ill luck to fall in with pirates, and is captured. I believe, Mr. McAllister, I state the truth."

"Yes," the young man assented, and it seemed to me that he bore himself manfully and with dignity, "that is the truth, except that, as you say, I had no knowledge of an enemy of whom my uncle lives in fear. Of that I know nothing, for in his letters he has made no mention of it."

The captain smiled a sardonic smile. "Doubtless," he answered with suavity, "your uncle had the best of reasons for not communicating the fact. And now," he added, again turning to me, "having explained those facts with regard to Mr. McAllister, I fear that I must trespass still further on your kindness, and tell you something of an incident in my own life."

Again, with that same hateful irony, he paused, looking around him as he rapidly begging our permission to proceed. And yet all the time he must have known that we would hang breathless on his every word. Since, in spite of his talk of hospitality, we were virtually his prisoners. If "was only too evident that he was not talking to amuse us, but that his words bore directly on our fortunes, and in all probability on our lives. And thus we sat staring while he, quite casually, turned and glanced at the door leading from the cabin. The movement was so unstudied that at the time I paid no heed to it; but later I was to remember and understand.

At length he resumed: "Do not fear that I shall weary you with my adventures; it is of one incident only that I shall speak, and that, believe me, not because its memory is pleasant to me, for it is the blackest in my life, but rather because, as you will shortly see, you have a right to know of it. Three years ago I ranged these seas in the company of another vessel, whose captain I called my friend. Like two gray wolves we hurried our prey, one on either flank, and lucky was the merchantman who escaped our fangs. Ours, of course, was the fortune of war; sometimes we made rich captures; sometimes our gains were not worth the loss in killed and wounded, and only the sharks would profit by our enterprise. But on one great day we captured and sacked a real treasure ship, a prize as rich as those which fell to the lot of the old buccaneers. There was spoil and to spare——for once our crews were glutted with gold —but of the bulk of the treasure and of the jewels only four persons really know, the captain of the consort ship and his mate, and I myself—and one other—"

He paused, and over his face stole an expression I had never before seen there—a yearning. I would have said, for something that had gone from his life forever, but of which even the memory could almost bring back to him past joys. Then the light faded from his eyes again, and he went on: "A lady sailed with me in those days, the most beautiful lady in all the world. Not a lady of the court, too fine to soil her dainty fingers or dirty the lip of her silver shoe, but a daughter of the sea and of the storm, one who could wield cutlass and pistol, one who was all life and fire and daring and who feared not man nor devil—do, our God Himself!"

Once more he paused, and his hand went to his throat as if to ease its constriction. I would have said that he had forgotten us, and that for the first time I saw the man's mask off his face. But in another instant he had recovered himself, and went on: "There was trouble aboard my vessel at the time—a grumbling mate who dreamed of commanding in my place. He may indeed be commanding, but if so it's in another world. Yet just then he was in my power, and, for the sake of my consort persuaded me and my lady to board his vessel while we gave my mate his head and sent him away, proud of his clumsy, to capture another prize. His prize was a knife thrust in the throat. And in the dark of the night, near a lonely island in the Antilles, far off the track of ships, the four of us rowed ashore and over that heavy chest we covered together with one another, to come back as soon as might be in a vessel of our own, and there to leave the sea and spend the rest of our lives at ease. Those were the days of the Spanish treasure, and there—a mighty roaring in my ears, and all was dark. It was the sun on my face that awakened me, to find that I lay on the islet in a great pool of my own blood, and by my side my dear lady looking up at the sky with sightless eyes, shot through the heart. We had not made sure of one, I of my consort, the other of my lady. Treacherous friends! So we mortals, and left me for dead. And indeed I should have died, but that I had the wit and strength to plant a stick with a rag on it; some fishermen, passing, found me raving for water, and took me with them and nursed me back to life."

Again he paused, and drank with wine, and again went on: "One thing in the world is stronger than love, and that is hate. Hate was a powerful medicine for my body, meat and drink for my soul. To live to revenge myself on that false-hearted craven; to make up to him one-tenth of what he has made me suffer; to see him, if possible, his breath going out in his throat under my grasp—that was the thought that kept me alive. If I could go through hell with him side by side, suffer each pain that he suffered if he wrenched my heart apart—every second of that agony would be like balm, if only I could see his every torment, watch his every pang."

There was no mistaking his terrible earnestness; the man was taking from the depths of his being. Yet why, I wondered, did he tell all this to me, for he did not give the impression of one who would waste breath, or even time, even to those whom he knew best, much less to strangers so youthful and inexperienced as Robert McAllister and myself. But my unspoken question was to be answered in the words of the captain. "That," he said, "is my story, save for one detail. I have not told you the names of the captains of the mate. The mate is a bald-headed scum of the earth named John Shirley; the captain's name"—and he turned to the youth beside him, then distinctly and with deliberation added—"the captain's name is Andrew McAllister."

In spite of myself, I started as though I had been struck; and, indeed, the whole affair became extraordinary in the extreme. That Robert McAllister was even more pronounced, for it was his own uncle whom he heard accused, and unflinchingly from his seat, with crimsoned face, he cried boldly, "You lie!"

I drew an involuntary breath of dismay at the words, for I deemed them his death warrant, and indeed, for an instant, the captain's hand sought his belt; but immediately he mastered himself, and with shrugged shoulders muttered to himself the words of a proverb, "Let all men beware of an ominous silence. Then the captain spoke again. "You would naturally speak so of your uncle, but I speak the truth. Now I shall ask you one question, which I presume you will answer in only one way; but I must ask it in fairness to you, for on your answer depends your future."

There was purpose in his words; to me it seemed that they were a threat, scarcely veiled, of death. Yet young McAllister, whatever his feelings, carried himself carefully, and sat motionless, with no sign of flinching upon his face, awaiting the question. At last it came.

"Will you, believing that I have told the truth, become an inmate of your uncle's household, learn his secrets, and at the proper time deliver him and his treasure into my hands?"

There was not a second's hesitation. The young man's quiet "Never!" betokened inexorable resolution.

Capernaum Holy City to Early Christians

Naturally, Capernaum was a place dear to the early Christians, who loved to plant there where Jesus had once trod. A church was built there which was enlarged several times and went on. When Hadrian permitted Jews to re-enter the Holy land (about 117 A. D.) Capernaum was one of the cities granted to them, though its name was changed from Nefta by Hadrian to Tell Hum, the Hill of Hum. Hadrian is said to have given some assistance to the rebuilding of parts of the city destroyed by the invading Romans. By the year 200 A. D. the church had been enlarged into a basilica, and was said to cover the site of the house where Peter entertained the celebrities of family life.

But the city never recovered from the destruction that Mosteinus brought up on the once fertile plain of Gennesaret, a strip of land on the northwestern side of the sea of Galilee (really a fresh-water lake) five miles wide by six miles long, on or about which were when Jesus lived on earth thriving cities, Chorazin, Bethsaida, Tiberias and Capernaum. To this day Mosteins hold the sea and

Pleasure in Hot Dishes

"One of the delights of a summer in a country boarding house was getting meals piping hot," said a city woman. "I had about forgotten how delicious a dish was when it was served smoking hot, for so long I have had dishes brought to the table by the maid only warm or at the best merely hot. Now, the last few days we have noticed a difference in a wide difference between a dish of piping hot dish and a hot dish, a difference which may make a meal a huge success or an indifferent affair.

"But in these days of gas stoves it is not a simple matter to keep vegetables hot, and so one has almost become accustomed to them just past the warm stage. But when a smoking meal is dished up right from the coal stove into a waiting covered dish there is a heartiness, a geniality about the entire meal which makes for good digestion and sociability."—Springfield Union.

Some men are gluttons for work; others may be called workers.—Boston Transcript.

DETROIT NEVER FINISHED LAST

Each Other Team in American League Been in Cellar.

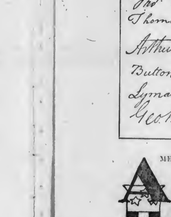
None of the teams representing Detroit in the American league in the last 27 years has finished in the cellar. There are no other clubs in the history of the circuit that escaped hitting the lower regions at least once.

Chicago White Sox tripped along for 24 years before one lit its teams landed in last place. The lot fell to the team of 1924.

Cleveland club slipped down only once. In 1914 the club, in a body, inspected the basement and remained there until the finish of the season. It didn't look good, so they haven't been there since and are not particularly stuck on going back.

In 1908 and 1912 the Yanks slid into the cellar, while St. Louis Browns hit the last rung four times—1906, 1910, 1911, 1918. Since then the club has steered clear of that place, although finishing on the brink several times.

The Athletics sulked along for 14 years before the club commanded by Connie Mack struck the rocks. Only twice during that 14 years did the club sink below fourth place. Then came the storm. For seven consecutive years the teams of Mack held an ironclad contract on the eighth floor down. For those seven years the Athletics of Philadelphia had head-



Manager Connie Mack.

quarters in the lower regions of the American league. It seemed as if they would never give up the lease. Up until 1931, a month of 11 years, the Washingtons occupied the lower floor four times; seventh place four times, and the other three years they were ninth. In 1911 the club has steered clear of eighth position.

The Boston club in its first 21 years in the American league touched the bottom only once. In 1906. Most of these years the club hovered above the second division, having left it once in six different years.

In 1922 the team hit the cellar. It struggle to gain a stick with a rag on it; some bitterness, passing, found me raving for water, and took me with them and nursed me back to life."

Again he paused, and drank with wine, and again went on: "One thing in the world is stronger than love, and that is hate. Hate was a powerful medicine for my body, meat and drink for my soul. To live to revenge myself on that false-hearted craven; to make up to him one-tenth of what he has made me suffer; to see him, if possible, his breath going out in his throat under my grasp—that was the thought that kept me alive. If I could go through hell with him side by side, suffer each pain that he suffered if he wrenched my heart apart—every second of that agony would be like balm, if only I could see his every torment, watch his every pang."

There was no mistaking his terrible earnestness; the man was taking from the depths of his being. Yet why, I wondered, did he tell all this to me, for he did not give the impression of one who would waste breath, or even time, even to those whom he knew best, much less to strangers so youthful and inexperienced as Robert McAllister and myself. But my unspoken question was to be answered in the words of the captain. "That," he said, "is my story, save for one detail. I have not told you the names of the captains of the mate. The mate is a bald-headed scum of the earth named John Shirley; the captain's name"—and he turned to the youth beside him, then distinctly and with deliberation added—"the captain's name is Andrew McAllister."

There was not a second's hesitation. The young man's quiet "Never!" betokened inexorable resolution.

(TO BE CONTINUED.)

ANSWERED:

three vital questions you have asked about used car allowances

1 "What is my present car worth?"

Answer: Your used car has only one fundamental basis of value: that is what the dealer who accepts it in trade can get for it in the used car market.

2 "Why should dealers in different makes of cars offer me allowances that differ materially?"

Answer: Your used car has seemingly different values because competitive dealers are bidding to sell you a new car.

3 "Is it true that the largest allowance offered means the best deal for me?"

Answer: The largest allowance is not necessarily the best deal for you. Sometimes it is; sometimes it is not. An excessive allowance may mean that you are paying an excessive price for the new car in comparison with its real value.

First judge the merits of the new car in comparison with its price, including all delivery and finance charges. *Then* weigh any difference in allowance offered on your used car. Remember that after all you are making a *purchase*, not a *sale*.

Husband, 9, Is Divorced

One of the first cases heard under Turkey's new divorce law was that of a seventeen-year-old girl who divorced her nine-year-old husband to whom her parents had wed her eight months under the old law, says Capper's Weekly.

Never hesitate to ask for advice everybody likes to give it.

Studied Under an Expert

Hercules had just cleaned out the Augean stables. "That was easy," asked his amazed companions, "did you ever manage such a job?"

"Pshaw, it's nothing," returned the hero lightly. "You ought to come and see my wife cleaning house."

Custom becomes second nature.

"Bucko" Bedbug, burglar, starts his night's work

Millions of others are starting, too! Be ready for them!

MAKE NO MISTAKE! There's only *one way* to exterminate bedbugs. That's with a liquid. Don't waste time shooting a spray at them. No spray can possibly reach their young and eggs.

Bedbugs are in the woodwork, along the base-boards—*not in the food clothes, as you may have thought.* Don't waste time using a powder. Bedbugs don't eat. They suck. That's why only a liquid can exterminate them.

Peterman's Discovery is the *right liquid.* It soaks down into their nests. It will exterminate *all* bedbugs, *all* their young and eggs *in any* house in 48 hours.

Here is the right insecticide for each insect:

PETERMAN'S DISCOVERY, Liquid—exterminates bedbugs.

PETMAN, Aerosol *Spray* — kills flies and mosquitoes.

PETERMAN'S ROACH FOOD — exterminates cockroaches.

PETERMAN'S ANT FOOD — exterminates ants.

PETERMAN'S MOTH FOOD — protects against moths.

You must have a specific insecticide for *each* insect. No single insecticide will exterminate them all. We have had nearly 50 years' experience. We *know* that is true.

Peterman's has the right insecticide for each insect. Or, ask dealer. Drugs are sold.

Peterman's 200 Fifth Ave., N. Y. C.

Leading Batter Seen

The indications are that Detroit, which has had the leading batter in the American league in 16 of the last 20 seasons that the league has been in action, will again produce a leader this year in Robert H. Fothergill. In 1926 it was Manush who led and in 1925, Heilman, both Detroit players. Cobb won the honors for Detroit from 1907 to 1910, inclusive, with the exception of one season. Fothergill got away to a good start this year and fans are pulling for him.

America's 56 Immortals

By ELMO SCOTT WATSON

AMERICA'S 56 Immortals—who are they?

They were the men whose autographs are shown above, but you don't have to be a collector of autographs to be interested in them. If you are a real American you have Independence day means something more than taking a holiday from your everyday job or enjoying the opportunity of engaging in an annual noise-making orgy. You have a part of Independence day means something more than taking a holiday from your everyday job or enjoying the opportunity of engaging in an annual noise-making orgy. You have a part in the history of America, you should be interested in them and what they stand for.

Foremost a certain handwriting activity which took place 151 years ago and which, it is safe to assert, changed the whole course of human history. For these are the autographs of the signers of the American Declaration of Independence and these signers are America's 56 Immortals, whose deed we commemorate on the Fourth of July.

Considering the importance of what they did, it is a bit strange that we Americans know so little about these signers. Of course, the names of some of them are familiar. From our school histories we know John Hancock, who put down his name in such a "bold handwriting that even King George the Third could read it without his spectacles," and who has given us the by-word of "put your John Hancock on that" as a synonym for "sign on the dotted line." From our school histories, too, we know Thomas Jefferson, the "author of the Declaration of Independence," whose original draft of it, bearing also his corrections in the handwriting of Benjamin Franklin and John Adams, is one of our most precious national heirlooms. We know the names of some of the others who were prominently connected with Revolutionary events and with the founding of the new nation—Samuel Adams, Robert Treat Paine, Richard Henry Lee, Robert Morris, Philip Livingston, Francis Lightfoot Lee, Elbridge Gerry, Roger Sherman and Charles Carroll of Carrollton.

We also know Button Gwinnett, but not for the same reason. His rise to fame has been a more modern development and has come about because his signature is one of the greatest rarities known to autograph collectors. Two years ago Button Gwinnett, dead these 150 years, won a place in the newspapers' headlines because a New York collector had paid $22,000 for his autograph. Last November another specimen of his signature was sold for $28,500, and this fact was widely heralded as the highest price ever paid for an autograph. Then, in March, 1927, it was announced that when "the only known example of a letter with a Button Gwinnett signature attached" came to auction, it "was expected to bring" a figure that the signers of the Declaration of Independence also appeared on this letter may have had something to do with the high price, but the principal reason was the scarcity and rareness of the "bold handwriting." The Continental congress delegate from Georgia who was killed in a duel a year after he had placed his name on the Declaration of Independence is the rarest autograph, is worth a fortune today, because it is the rarest of all of those of the signers, once saw his property sold to satisfy an indebtedness of $1,000!

So Button Gwinnett's name at the present time is probably the best known of any of the signers, even though many of the others had longer and more distinguished careers. But take out the dozen or more names which everyone ought to be kept secret and that if any member shall violate this agreement he shall be expelled from this Congress as enemy to the liberties of America" shall be held as fixed. Not every member signed by his own hand. Some, as the above facsimile shows, signed by proxy. Others, as the facsimile below shows, signed after they had left Congress. Some signed in the name of their state, as the facsimile at the top of the next column shows. Others signed as individuals

American Women Not Militaristic, but Realize Need of National Defense

By MRS. ALFRED J. BROSSEAU, President General D. A. R.

I have found in my travels about the country since I became president general of the Daughters of the American Revolution that our women have a growing interest in civic, state and federal institutions. They want to vote intelligently and thoroughly and to take their full share of responsibility of the national housekeeping.

In my service of one year as president general of the D. A. R. the outstanding thing we have accomplished, in my opinion, is the Woman's Patriotic Conference for National Defense held in co-operation with thirty-one other woman's organizations in Washington in February.

There is no militaristic spirit in the hearts of American women, their every reaction is toward peace. But with fine intuition they know that the sense of the need of protection and the right to defend by arms has not yet been eradicated from the heart of man. So long as that is true; so long as other nations show visible evidences of aggression, women have a right to insist upon certain principles of defense in order that possible warfare may be made for them less of a torture rack.

The Daughters of the American Revolution, well established as they are in practically every city and town of the country, are in an ideal position to drive home the splendid lessons of our history with a force that will leave no doubt in the minds of youth that our founders and patriots were truly great men and that they had courage, sagacity, a vision of the future, godliness and what is most important of all, a pure and unselfish love of country.

Value of High-School Education Figured Out in Dollars and Cents

By EVERETT LORD, Dean Boston University.

The untrained man goes to work as a boy of fourteen and reaches his maximum income at the age of thirty. This maximum averages less than $1,200 a year. As his income depends largely on physical strength, it falls off at fifty, or earlier, to a point below the level of self-support. His total earnings from fifteen to sixty are about $45,000. Not more than $2,000 is earned during the four years that would have been given to high school education.

The high-school graduate, on the other hand, rises steadily to his own average maximum of $2,200 at forty years, and continues on that level for the rest of his active life. His total earnings would have been $78,000. The $33,000 above the earnings of the average man who is untrained represents the cash value of his four-year high school course.

If this $33,000 is divided by 800, the approximate number of school days, in a four-year high school course, we find that each day is worth more than $41 in earning capacity to the student. Any boy not forced by immediate necessity to earn his own support who gives up a high school career to go to work is shortsighted.

Leadership means more than financial success. Leadership means service to others. The boy who expects to be among the leaders of his generation must get an education; and while only one person in 150,000 reaches eminence with less than grade-school education, about 800 in 150,000 reach eminence with a college education.

Mussolini Theory of Government Challenge to Democracies of the World

By NICHOLAS MURRAY BUTLER, President Columbia University.

The theory of Mussolini's government in Italy constitutes a challenge to democracy which can be resisted only by making our democratic doctrine efficient by retaining civil and individual liberty.

The already fading communism in Russia in time will be replaced by a form of government based upon the teaching of Jefferson. Thomas Jefferson is even more important in 1927 than he was in 1787.

Can it be possible democracy has become an obstacle to human happiness and progress? Democracy has been challenged from within and without, but at no time in memory were the challenges as emphatic as at the present.

The moment the state becomes absolute, somebody must be absolute. If we are to resist the return of the doctrine of the absolute state under the guise of efficiency, we can only do it by making our doctrine efficient by retaining civil and individual liberty.

Jefferson was on the side of individual liberty and popular responsibility, which must be the beginning and the end of all institutions which are to be permanent.

AIRCRAFT'S FUTURE

Has aircraft a future? What will be the concrete results following the airplane flights of Lindbergh and Chamberlain to Europe? May significant accomplishments in the increased use of the air for travel be expected in the way that has been predicted by the boy hero?

There will undoubtedly be a big drive in the next congress in favor of aircraft for national defense. Aeronautic enthusiasts, especially those who agree with Colonel William Mitchell, will aggressively champion their views which favor larger appropriations for aeronautics for the Army and Navy. Colonel Mitchell's explosive letter to the press criticising "unaircraft" of the Navy because of their alleged partianship for battleships is apt to be but a forerunner of such criticism, and it will be aimed at Congress in the hope of swinging larger appropriations for aeronautics at the expense of water-craft.

The Post Office department, backed by the declaration of Lindbergh in one of his addresses in Washington in which he stated that our air mail service was regarded as marvelous throughout Europe, is increasing its efforts to expand and improve the air mail service. Postmaster General New facetiously admits that he is "a nut" on this subject. The department is withdrawing all government operated planes and turning the routes over to private contractors. Department of Commerce bulletins show that cablegrams and mail inquiries are being received from foreign countries asking for information regarding American planes, particulary of the type that have been used for trans-Atlantic flights.

The business opportunities that will be developed in American aircraft will be very extensive.

ANTI-MARINE PROPAGANDA

Occasionally we hear some complaint to the effect that the United States has no shipping policy or that the policy is changed too often to be effective. This might lead a thoughtful person to ask just what is the matter. The Washington Post makes the inquiry and then answers it by suggesting that perhaps there are alien influences behind some of the criticism of our merchant marine and the way it is developing. The Post says:

"From all that can be learned, the real trouble lies back of the shipping board and its members, all of whom are doing their best to establish and maintain American shipping. The trouble comes from without. It is a studied effort by agents and friends of foreign shipping lines to weaken and break down the American lines in the hands of the shipping board.

As far back as 1821 Senator Jones, of Washington, called attention to this in a public address. Commissioner Plummer, of the shipping board, also has echoed the charges of the Washington Senator. Paid agents of the foreign shipping lines, able writers and publicity men are employed to fight the American lines and to circulate false stories calculated to undermine confidence in the United States in the matter of building up a merchant marine. Recently a dispatch was published reflecting upon the seaworthiness of the Leviathan. Representatives of the shipping board promptly denied these stories false, and a part of the program of enemies of American shipping on the outside"

Now if alien interests are seeking to disrupt our merchant marine policy and to prevent the development of the marine itself, it can of course be taken for granted that these interests are not doing this with any view of helping the people of the United States. We all realize the power of propaganda. We heard it and felt it during the European war. Since then the foreign propagandists have not let us entirely alone. They still see in the United States the most fertile field for their endeavor. Small wonder, therefore, that the alien propagandists should seek to strike at our merchant marine.

But such efforts ought to arouse in America a real sentiment for an active merchant marine and a real determination to see that a definite policy is adopted and carried out. The question will be threshed out in the next Congress, and it is every American's duty to do what he can to see that it is settled right.

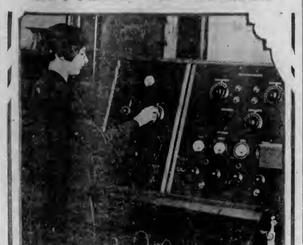
THE RED PURPOSE

Everyone who basstudied current Russian affairs knows something about M. Bucharin. He is one of the leading communists, a man whose voice carries weight and authority at Moscow. Some significance may be attached therefore to the following words which he uttered recently in a communist conference:

"Our revolution is a component part of the mighty international revolutionary movement throughout the world, which includes all colonial wars, national revolutions, proletarian risings and future revolutions, because we have entered an epoch of wars and revolutions. We here as a matter of fact, are international revolutionaries. Have we no, said so two thousand times? Who can doubt it? Does our practical policy prove the reverse? No, it proves exactly what I say. No one more than we gives moral support to revolutionary China, no one offered greater assistance to British miners than did the Russian trade unions; none can deny that the Communist party of the Soviet Union is, was, and will continue to be, the bulwark of the world revolution. This is known to all, and to argue against it would be ridiculous. Our revolution is a part of a vast process likely to extend over an enormous period and following tortuous and circuitous paths, is marching to its final consummation."

Here is good evidence as to the present purpose of communism. The reds are eager to "get at" the United States, too, which they recognize as the great bulwark of society as at present constituted. At present they see no chance of success here but they are constantly at work boring from within and seeking in every way possible to embarrass the so-called capitalistic nations. By using every method and trying everywhere they hope sometime, at least to break through. Yet there are thousands of complacent Americans who dismiss these efforts with a grin. In England, however, bolshevism is no longer a grinning matter.

She's Familiar With Microfarads



Miss Mary A. Brooks, who has just been appointed an expert in the radio laboratory of the bureau of standards, speaks the language of kilocycles, microfarads, and microhenries, instead of "permanent waves" and other fads of the modern flapper. She has been a scientist of the bureau of standards for seven years.

PRESS COMMENT

Military Drill—It is unlikely that any of the young men now taking military training in schools and colleges will be called upon to fight in a war, for as the number of men trained in military fundamentals increases the likelihood of war decreases. But wars sometime come even to a people that does not wish for war. A prepared nation has an advantage. The young men who are giving their time to military drill and studies in the schools are bringing this advantage to the United States. It is especially valuable because it is voluntary. There is no force of military training in the United States, no such thing as a citizen army in the European sense. The American land defenses—regular army, guard and reserve—are made up of men voluntarily pledged to a program of national defense in keeping with this country's world position. These men deserve the thanks and praise of the country. They should be encouraged, as the high school cadets were encouraged by tangible evidence of an appreciative citizenship.—Indianapolis News.

An excited communist writes: "A hostile European nation could send a thousand or two bomb-dropping air machines across the Atlantic today, and within forty-eight hours New York, Boston and Washington could be wiped out." This seems to be anticipating a bit. No European aeroplane has as yet made just such a trip, and no airplane as yet built could carry a load of bombs across the Atlantic; besides no European or other nation has a thousand bomb-dropping planes. And by the time the machines, the bombs and the flyers are ready to start they might face a little bombing from as many airplanes arising on this side of the Atlantic.

THE THEATRE

Casey at the Bat—Is the mortgage due? Has your best girl turned you down? Is the mother-in-law coming to pay a visit? No matter what your ailment or grievance, "Casey at the Bat," which arrives at the Palace theatre Saturday and Sunday, seems certain to make you forget.

Coming with tons of advance praise and following Beery's remarkable success in his two previous comedies, there was a tendency to wonder if he could do it again. However, any lingering doubt will be wiped into obscurity because for sheer out-and-out comedy, "Casey at the Bat" is said to surpass anything that's been seen here in many a day.

Hotel Imperial—Some of the most unusual war scenes ever filmed are shown in Pola Negri's current Paramount production, "Hotel Imperial" which appears at the Palace theatre next Monday and Tuesday. In this drama of love, war and intrigue, which gives Pola the finest vehicle of her career, greater even than "Passion," an entirely new conception of drama has been contained with the most extraordinary camera technique ever used.

Having as its fundamental purpose the portrayal of the reactions of war upon individuals, the battlefields are suggested rather than pictured. Through the unusual methods employed, Erich Pommer, former head of UFA, has given a swift, mental picture of the inferno of conflict, with a sweep of limitless fighting fronts, that leaves an indelible impression,—one that is retained throughout the dynamic drama. As a result, "Hotel Imperial" is unlike any war picture ever attempted.

The Orchid Lady—"The World at Her Feet" seems destined to do exactly that for Florence Vidor as those who have already seen the film are still engaged in heaping lavish adjectives on it. "The Orchid Lady of the Screen" appears as a woman lawyer. She and hubby are quite happy until a sudden abundance of money gives him an urge to retire. However, Jane decides to continue her career. So engrossed does she become in legal problems that thoughts of home and husband disappear. He finds himself drifting further and further away from the woman he loves. In despair, he finally hits upon a plan to win her back. What it is and how it works will be disclosed at the Palace theatre next Friday.

Local Boy Is Competent to Work on Dairy Farm

Robert E. Lee established the first Boy Scout Battalion in the United States at Washington and Lee university in 1860.

Time During Equinoxes

The Naval observatory says that the equinoxes are the times when day and night have the same length, if the sun and the sunset are defined as the moments when the center of the sun is apparently in the plane of the horizon. But in the tables published by the observatory sunrise and sunset are the moments when the top of the sun appears to be on the horizon, refraction which makes the sun appear higher than it is, being taken into account. According to the observatory's tables therefore, the two 12-hour days come a little before the vernal equinox and a little after the autumnal, the number of days in each case depending on the latitude of the station.

Idleness Has Value

Certainly work is not always required of a man. There is such a thing as a sacred idleness—the cultivation of which is now fearfully neglected.—G. Macdonald.

Beaver Island

Walter O'Donnell of Detroit, is here for the summer.

Mrs. Myrtle Bradley is a business visitor in Charlevoix this week.

Jack Roddy and two daughters of Milwaukee, are visiting friends here.

Joseph Left is spending some time this week in Charlevoix on business.

Andrew E. Gallagher spent several days in Charlevoix on business recently.

Anthony Malloy of Chicago, is visiting his son Lawrence Malloy in St. James.

Misses Margaret Gallagher and M. Belly were Charlevoix visitors early this week

Mrs. Garret Cole returned from Charlevoix Monday, where she spent some days with relatives.

Miss Bell, one of the teachers in the Detroit schools is spending her vacation at the Bundy cottage.

Misses Sarah, Clara and Edith Gallagher spent Monday in Charlevoix, returning on the Sanford Tuesday.

Miss G. Cole of Chicago, is spending her vacation at Nomad with her parents, Mr. and Mrs. Garret Cole.

Arthur Larson is spending some time and incidentally some money with Charlevoix dentists this week.

Mr. and Mrs. H. Ray of Chicago, arrived here recently and will spend the summer at their cottage at Nomad.

Miss Mae Gallagher of Chicago, is visiting her parents, Mr. and Mrs. W. J. Gallagher, other relatives and friends.

George McManus of Petoskey, is at the south end of the island this week superintending some construction work on his dock.

Mr. and Mrs. HarryW. Bundy and daughter Jean of Detroit, came Tuesday and will spend their vacation at their St. James cottage.

Supervisors W. J. Gallagher and John Greene spent several days this week attending the July meeting of the Board of Supervisors.

On to Stay

"See if you can laugh that off," said the fat man's wife, wiring a button onto his vest.

Improved Roads

Although we spend millions annually in improving roads, only about one farm in twelve is located on a hard-surfaced or paved highway. A much larger proportion are near enough to paved thoroughfares to make considerable use of them, but even an intervening mile of muddy road often makes the use of farm automobiles impossible. Good roads used to be classed as luxuries but such is no longer the case. When the loss of time incurred by rough or muddy unimproved roads is considered, together with the wear and tear on vehicles, paved or hard surfaced roads are essential and should be built as rapidly as possible. The Dept. of Agriculture says:

"For the movement of every vehicle over a road there is a certain cost, which is less if the road is improved. Logically, therefore, the only limit that should be on expenditures for road improvement is the amount that can be saved in vehicle operating cost. The country loses more in increased cost of operating vehicles by not improving roads than it does to improve them. In other words, it pays for improved roads whether it has them or not, and it pays less by having them than by not having them."

A thin waterproof wearing surface is being placed on existing gravel and macadam roads in farming communities with great success and at moderate cost.

E. V. Smith piano service in Charlevoix. Leave orders at Holley Gift Shop or with W. C. Bellinger. tf

Sunday dinners 75c, other meals 50c at the Fountain City Hotel.—Adv. 1t

C. E. Kimball of Petoskey was a business visitor in Charlevoix last Saturday.

Mr. and Mrs. Harold Salmon of Detroit are guests of Miss Phila Armstrong this week.

Murley Plum and family motored to Bellaire Sunday and spent the day with relatives.

Mrs. Marion Judd of Saginaw, is visiting her sister-in-law, Mrs. Ida C. Sears, for a short time.

Mrs. Genevra Green, Evanston, Illinois, is at her summer cottage, 419 Antrim street, for the summer.

B. G. Mattson, D. D., motored to Oshoo-the-Dunes Monday where he spent the following three or four days.

Mr. George H. Jamison of Old Mission, spent the week-end here with his nephew, Dr. Frank H. Wilkinson and wife.

Mr. and Mrs. Fred H. Wilson of Charleston, South Carolina, spent Friday and Saturday with Charlevoix friends.

Miss Helen Armstrong came up from Chicago recently and will spend her vacation with her parents, Dr. and Mrs. R. B. Armstrong.

Mr. S. T. Gilbert spent the week-end with his family at their summer cottage, 210 Park avenue, returning to Detroit Monday evening.

Mrs. Mary Barney, daughter Marie, Miss Ruth Ann Bedford and Miss Eleanor Bates of Grand Rapids, are guests of Mr. and Mrs. Harrison Bedford.

Mr. O.H. Simons of Central Lake, was a Charlevoix visitor Wednesday accompanied by his son, Cadet Winfield W. Simons, of the West Point Military Academy.

James Wilkinson and family motored up from Detroit Wednesday and for a few days will visit his brother, Dr. Frank Wilkinson, and other relatives and friends.

Mr. and Mrs. Harold A. Kenyon motored up from Grand Haven last Sunday and spent a short time with relatives and friends here and drove home the following day.

FIREWORKS—Fessenden the Druggist.

R. F. Sloan, Jr., and brother, Paul, motored up from Muskegon Tuesday, spending a short time with Charlevoix friends and then continued their trip north to Sault Ste. Marie.

Mr. and Mrs. H. R. McCloud and daughter, Louise, and Mrs. Patrick Burke of Detroit, are spending a two weeks vacation with relatives, Mrs. Laure Neff and Oscar Nelson in Charlevoix.

H. Cory of Chicago, arrived a few days ago and has opened his place of business, 103 Bridge street, and offers to the public a splendid line of laces, linens, white goods and many nice novelties.

Mr. A. W. Graham leaves for Mooresfield, Canada, this Thursday morning, in response to a message carrying the information that an elder brother residing at Mooresfield passed away Wednesday.

Mrs. Wilbur A. Cline, daughter Helen Rose and son, George, of Chicago, arrived here Wednesday and will spend the summer with Mrs. Cline's parents, Captain and Mrs. O. E. Wilbur, 102 Dixon avenue.

J. J. Koboza of Grand Rapids and Albert Goetz of La Crosse, Indiana, are at the P. M. Station as telegraph operators again this season. Both young men were here during the summer of 1926 and in the same capacity.

Kenneth Widdefield, connected with the Literary Digest, one of the most popular magazines published, arrived here Wednesday and will spend his vacation with his parents, Mr. and Mrs. Harry W. Widdefield, 102 Upright avenue.

Mr. and Mrs. Oscar Nelson and Otto Nelson, accompanied by their guests, Mr. and Mrs. Volney Breeden of Madison, Wis., and Mr. and Mrs. H. E. McCloud and Mrs. Patrick Burke of Detroit, motored over to Mancelona and spent the day with friends last Monday.

Mr. and Mrs. A. R. Stumer, daughter Mary Jane and son Alfred M. of Chicago, motored in last Saturday and will occupy the Frank Wood cottage, 107 Petoskey avenue for the season. They were accompanied by their friend Harvey Epstein, who will remain some time as their guest.

Mrs. Grace Redpath arrived here Tuesday from Chicago and will probably spend the summer months in Charlevoix. Mr. Redpath has taken a position with a bond and trust company, which will prevent his making an extended visit here before September, according to Mrs. Redpath's understanding of business conditions.

Hallett's Inn was rendezvous for members of the Tri-County Realty members, a large number of whom were in attendance and participated in an interesting meeting. Their next session is scheduled for July 21 at Wequetonsing, at which prominent realters will make special addresses of interest and beneficial to their cooperative work.

FIREWORKS—Fessenden the Druggist.

Lieutenant Commander Herbert E. Paddock and daughter, for the past month guests of the formers parents, Mr. and Mrs. R. W. Paddock, left for Newport News, L. I., last Saturday where the lieutenant enters the Naval War college for one year, after which he will probably return to active sea service with some one of the government war ships.

Miss Phila Armstrong received her A. B. degree from the U. of M. last week. The commencement exercises of the graduating class were attended by her mother, Mrs. R. B. Armstrong, and brother, R. B. Jr. Following the exercises the members of the Armstrong family, accompanied by Miss Helen Mason, visited friends in Saginaw before returning to Charlevoix.

About one hundred excursionists from Ramona Park were Charlevoix visitors last Thursday, making the trip from Ramona on the S.S. America. There was something of a sea running during the afternoon, such as was unpleasant for some members of the party, a few of whom made the return trip by automobile in preference to the water route.

Fourteen acres sweet clover at Cemetery corner for sale.—Ralph Washburn.

FIREWORKS—Fessenden the Druggist.

Mr. Leland Cram and family of Flint, spent some time here with friends last week. Saturday accompanied by Mrs. R. O. Cram of this city, they motored to Houghton Lake, where they were joined Sunday by Mr. R. O. Cram, Mrs. Mary E. Miller, Mrs. Jason Price and "Billy Cram" where the entire party enjoyed a picnic dinner. Later the members of the Charlevoix party returned home. Mr. Leland Cram and family continuing their trip to Flint.

Renaming and rechristening of Captain John Roen's steamship, the Crayeroft will be carried out some time next week at Muskegon if present plans are carried out, at which time it is expected that Governor Fred W. Green will attend the christening ceremonies as the ship when she sails under her new name will operate under the name "Governor Fred W. Green." The ship is at present at Muskegon where she is having some new equipment installed, machinery for loading and unloading.

Mr. George C. Coverdale and L. C. Hannah drove to Cheboygan last Sunday and attended the funeral service held for Mr. Ernest Cunningham and sister, Ruby, both of whom were killed in an automobile accident near Elk Rapids last Friday, when their machine left the road and turned over, instantly killing the brother, the sister passing away a few minutes later. Another friend was in the roadster at the couple at the time but escaped death by a small margin, but was seriously injured.

FIREWORKS—Fessenden the Druggist.

Editor C. H. Reed, owner-manager of the Clio Messenger, was a Charlevoix visitor early this week and spent a pleasant two hours with the Sentinel force. Mr. Reed is also a member of the state legislature, where he has served two terms. During this time he has associated to no small extent with Representative J. M. Harris of this district, and he pays high tribute to Mr. Harris for his thorough, consistent work for the good of the public, without regard to personal affairs, in his activities at Lansing, and for this regard considers Mr. Harris as most loyal, a man of ability, such as should represent every district in the state. Mr. Reed was accompanied by his son, C. T. Reed, who will be a frequent visitor in Charlevoix during the next few months.

Mr. and Mrs. Volney Breeden and daughter, Louise, motored back to their home, Madison, Wis., early this week after spending ten days with Mr. and Mrs. Oscar Nelson. During the world war period Mr. Nelson and Mr. Breeden were "buddies" and spent sixteen months together, the major part of that time in the trenches. It was in the trenches that they met and formed a friendship that has been continuous from that period. During the intervening years they have kept in touch with each other through correspondence, until they met at the Nelson home a few days ago, where they found ample opportunity to live over their trench and war experiences and enjoy the time under vastly different conditions than those by which they were surrounded during the time their acquaintance and friendship was formed.

Unfortunate That He Backed "Short Horse"

When Conan Doyle was in St. Louis on his visit to the United States he met some congenial souls—"cinema men" he says they were—"who would, I should imagine in a less dry climate, have been a lively crowd."

"One genial fellow," says the creator of Sherlock Holmes, in his book, "Our Second American Adventure," "who had been a jockey at some period, gave us some funny experiences on southern race tracks, especially the adventures of some negro tout who used to get his information 'out of the onta box,' to use his own expression, and pass on for a fee the pluns of the horse to his fellows.

"When the information proved wrong he had to invent excuses to avoid trouble.

"'Yes, sir, your horse was beat by six inches, sir. But it really wasn't beat at all. It was just unfortunate. Did you see the race, sir?'

"'See it? I had $2 on it. You bet I saw it.'

"'Well, then, if you saw it you would notice the rumps of them horses was dead on a line when they passed the post. It was a dead heat at that end, but you backed a short horse. That was all that was the matter.'"—Kansas City Star.

Ancestors in Seats of Honor at Feasts

Entertaining the spirits of ancestors and conversing with them is as real an actual affair of this world to the natives of some of the small Japanese villages in the neighborhood of Tokyo.

Signal fires are kindled by the village before the graves of their ancestors and the spirits invited to come home with them to partake of the feasts spread in their honor. When the fires go out, torches are lighted to show the way home for the departed souls. As they walk it is not at all unusual for old folk to talk about to the spirits and often these simple folk point out a mud puddle to their spirit guests, warning them to be careful.

When a family reaches home a tub of water is found at the entrance, in which the spirits are invited to wash their feet. At the table, the living members talk to the spirits, usually about incidents that took place while the ancestors were alive. The following night, the spirits are escorted back to the graveyard and hidden farewell until the following year.

Glutton for Punishment

A news item from Chicago reads: "One man is knocked down every ten minutes in Chicago." One would think it would wear him out.—The Outlook.

New Palace Theatre

ATTRACTIONS FOR THE WEEK

Saturday and Sunday

JULY 2-3—Wallace Beery in "Casey at the Bat," with Ford Sterling, Zazu Pitts. The New York Giants of 1890; the old Polo Grounds; Coney Island Beer Gardens; the big game against Pittsburgh; the Metropole Bar! They're all in this screaming tale of a baseball team and Casey! Extra—An Educational Comedy, "Sure Fire."

Monday and Tuesday

JULY 4-5—Extra special! Poli Negri in "Hotel Imperial," with James Hall and George Siegman. The greatest Poli Negri picture of all time! The story of a girl's tempestuous romance behind the lines of the world war. Extra—Our Gang Comedy "Ten Years Old."

Wednesday and Thursday

JULY 6-7—"Rolled Stockings" by popular demand, the stars of "Fascinating Youth," featuring Chas. Rogers, in another big special. Added Attractions—"Felix the Cat" and Fox News.

Friday

JULY 8—Florence Vidor in "The World at Her Feet." A love-comedy with class and laughs; of a pretty wife who finds that business and marriage just won't mix. Extra—An Educational Comedy "Break Away."

Coming—Lou Chaney in "Tell It to the Marines."
Coming—Bebe Daniels in "Senorita."
Coming—Thomas Meighan in "Blind Alleys."
Coming—Lou Chaney in "The Unknown."
Coming—John Gilbert in "Twelve Miles Out."

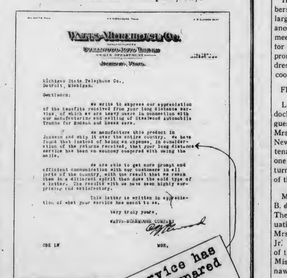
Long Distance Is Better and Costs Less than the mails, Watts-Morehouse Company says



Notice Tennis Players

All local persons desiring to enter the eliminations for the July 4th tennis tournament must register and get their number at the Post Office before noon Thursday, June 30th.

There will be five classes as follows:
1. Juniors—Boys under 15 years.
2. Intermediate—Boys 15 to 18 years.
3. Seniors—Men 19 years or over.
4. Ladies' Class—14 years or over.
5. Mixed Doubles.

Players for men's doubles will be picked from class 3.

The elimination will start Thursday June 30th, at one p. m., and no other games will be played on the court until after July 4th.

Other cities in the county will hold their own eliminations and send one only for each class. These entries for the finals must be registered by noon July 2nd, at Boyne City Postoffice—Give classification.

Badger a Fighter

The American badger's ability to carries from nine forests or dry tropical lowlands to the northern plains, wherever there is to be found an abundance of mice, gophers, ground squirrels, prairie dogs or other small mammals. It is a powerful digging machine and can capture any of them at will, says Nature Magazine. Although a member of the weasel family, the badger is not nearly so agile as its relatives, so must make up by strength and courage what it lacks in quickness. It is short-legged and squatty, so slow-footed that a man may overtake it, but when brought to bay it fights viciously.

Danger From Insects

Dr. Leo Nemy of the Entomological society of London, has stated that insects destroyed at least 10 per cent of all the plants which man cultivates for food or clothing, and it has been calculated that if the insects, natural and artificial on the increase of the many species of grass-fly, for example, were removed, the whole of the vegetable growth of the globe would be destroyed in six months.

Should Get Them In

The only favorable crop-estimate we have to show St. Peter will be the allotment.—Marion County (Ala.) News.

CHURCHES

Methodist Church.

C. E. Pollock, Pastor.

Next Sunday is Near East Relief Day in Charlevoix churches. Dr. Andrew M. Brodie will speak at the morning worship hour at 10:30.

Church school is held at 9:30 a. m. each Sunday during the summer.

A Pre-Independence Day service next Sunday at 7:30 p. m. The pastor will speak. Unusually excellent features will make this a profitable and spiritual service.

The Epworth League meets at 8:30 p. m. each Sunday during July and August. This is to convenience those who are busied in summer homes and hotels during the day. An invitation is extended all purposeful young people to attend each Sunday.

One hour of Gospel fellowship, song and service each Thursday evening at 8:00 o'clock sharp. "Eight Thursday evenings with the parables of Jesus," is the special idea. This will be a regular devotional and preaching service for one hour only. "Something big and something different. We expect a large attendance.

The Tuesday evening young people's prayer meeting will begin at 8 o'clock and last one-half hour. It will be followed by an hour of acquaintanceship.

Congregational Church

Rev. B.G. Mattson, D.D., Minister

The Sunday services begin with the Sunday school at 9:30 a. m. Dr. A. M. Brodie of Washington, D. C., will visit us at this session, and will tell of the work of the Near East Relief.

The pastor will preach at the morning service of worship, 10:30; subject: "Individual Differences and International Dependence." Evening service at 7:00.

Mid-week meeting Thursday at 7:30.

Services at Ironton, Sunday at 2:30.

Church of God

Sunday services at 10:30 a. m. and 7:30 p. m.

Young peoples' meeting at 6:30.

Sunday school at 11:45.

Everyone is urged to be present as we are expecting something special from C. B. Chew, who has just returned from the great International camp meeting in Anderson, Indiana.

Prayer meeting Wednesday at 7:30, led by Bro. A. B. Chew.

Our second American Adventurer," "who had been a jockey at some period, gave us some funny experiences on southern race tracks, especially the adventures of some negro tout who used to get his information 'out of the onta box,' to use his own expression, and pass on for a fee the pluns of the horse to his fellows.

"When the information proved wrong he had to invent excuses to avoid trouble.

"'Yes, sir, your horse was beat by six inches, sir. But it really wasn't beat at all. It was just unfortunate. Did you see the race, sir?'

"'See it? I had $2 on it. You bet I saw it.'

"'Well, then, if you saw it you would notice the rumps of them horses was dead on a line when they passed the post. It was a dead heat at that end, but you backed a short horse. That was all that was the matter.'"—Kansas City Star.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "God."

Sunday School 12 o'clock.

Wednesday evening service 7:45.

Reading room, Tuesdays and Saturdays, 2 to 5 p. m.

The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church

Sundays 8:00 a. m., and 9:00 a. m.

Saturdays and Mondays mass at 7:00 o'clock a. m.

Rev. Fr. Odelo.

Intelligent Rattler

That a snake can show gratitude is the moral of this tale from Comanche, Texas. Jim Curtis found a rattlesnake caught beneath a boulder, and instead of killing it, released it. The snake followed Jim home and took up residence in Jim's bachelor quarters. Affection developed between the two and Jim prepared a place at the foot of his bed for the snake to sleep. One night he missed the rattler and, lighting a taper, found a burglar in an adjoining room caught in the coils of the snake, which had the end of the tail out the window and was rattling for the police.—Boston Globe.

Their Omission

Audrey's mamma had taken her to the picture show, and as the preliminary explanations began to unroll the child evidenced increasing interest. After she had read, "Story by Pendally, directed by Puffer, photographed by Stupp, assisted by Shott, titles by Begad and Begash, criticisms by Grimm, costumes by Scant and Short, passed by the national board of censorship," she began to laugh.

"Mamma," she gaily said, "they haven't told who removed the gentleman's Appomattox or why."—Kansas City Star.

Earth's Bed Rock

Wild Life Rides River Torrents

Common Danger Causes Animal Enemies to Fraternize During Escape.

New Orleans—Side by side with the rush to safety from the flooded area of hundreds of thousands of human beings there is being enacted in the Lower Mississippi valley another and perhaps more desperate struggle for life. State and federal governments and relief organizations are cooperating in efforts to care for the people whose homes on farms and in settlements are under water. But the wild animals and birds of that part of Louisiana west of the Mississippi, which includes the greatest game preserve in the country, for the most part have had to shift for themselves, says the New York Times.

Common danger has thrawn together hunters and the hunted. Mutually hostile species have been observed floating downstream together on the same logs and rafts. The oldest of animals, the Louisiana muskrat, has looked to man for help.

The Louisiana muskrat supplies 55 per cent of the fur used by the government trade of the United States. Add to this "pillar of the fur trade" the otter, the mink, the beaver, the raccoon and even the humble possum that have Louisiana habitats. The result is that, in quantity production, the fur crop of Louisiana is almost twice that of Canada, nearly fifteen times that of Alaska and greater by hundreds of thousands of pelts than that of any other section of the country.

Extermination of this trade would be a terrific economic loss for thousands of Louisiana trappers. There are signs, however, that when the floods subside the wild life of Louisiana will by no means be extinct.

This is the view of Stanley C. Arthur, director of the division of wild life of the Louisiana State Conservation commission, and few are nise to discuss the birds and animals of the state more intelligently or sympathetically than he.

Sportsmen's Paradise.

"As all sportsmen know," he said, "the lowlands and the virgin swamps of Louisiana teemed before the flood with deer, bear, wild turkey, quail, marsh hens, foxes, muskrats, bears, opossum, mink, raccoons, squirrels, otters, weasels, and, to a lesser extent, such predatory animals as the cougar, the wildcat and the wolf. In the jungles of the northeastern parishes on the right bank of the Mississippi the late Theodore Roosevelt used to hunt bear and turkey, and I might mention other hunters whose names are household words in the world of genuine sport.

"When the flood crests swept down on the state few thought, naturally, of wild creatures. Hundreds of thousands of our people had to be saved. That was the first duty; wild life had to await its turn. Now that the desolation is about complete we can begin to take stock as to what has happened to the wild inhabitants of our jungles and marshes. I am hopeful that a very large proportion of them have survived, and I'll tell you why.

"I am sure that we will find most of the Louisiana deer alive when the floods have passed. Large numbers of them are, safe on the red hills of Mississippi, and the very fact that so many of them are in that state now gives an ample reason to hope that most of the other deer are still alive on high land in the flood zones.

"I also believe that we will find most of the bears alive. But they are not in Mississippi. Some of the cubs probably were drowned, but I think that the older ones had more than an even chance. We all know that the bear is no fool—he is one of our wisest animals—and it is more than likely when the flood waters have gone that we will find Brother Bear peacefully treading his way back to his old haunts in the Singer reserve and the other jungles in the northeastern parishes and in the basin of the Atchafalaya. Moreover, the mother bears are such wonderful mothers that I am hopeful that a lot of little fellows will be saved, too; if the cubs can be saved, trust the mother bears to do it."

Big Game Safe.

Mr. Arthur is sure that foxes, like the bear and deer, are above water somewhere. As for the cougars, wolves, wildcats and other predatory animals, few tears would be shed over their loss. There appears to be a good chance, however, that a very considerable proportion of them have successfully evaded the deluge and that in the course of time they will be as numerous as ever in the jungle fastnesses of the game section of Louisiana.

Muskrat casualties, Mr. Arthur believes, will be higher than other species of wild life in the state, with the possible exception of the rabbit.

"I have just returned," he said, "from an inspection of the muskrat territory in the parishes of St. Bernard and Plaquemine. From these marshes-cum-a majority of the muskrat pelts which mount more than $5,000,000 sagacity to Louisiana trappers. I found that at least 50 per cent of these valuable little creatures have perished.

"With J. C. Durham, one of our special deputy wardens, I covered much of the muskrat country south of New Orleans—a country which is today little more than a great lake, a sharing their haven with raccoons and rabbits, and, now and then, even snakes.

"It is quite possible that some of the muskrats succeeded in the lowlands of the Bayou Biloxi marshlands, but they were a very small proportion of the vast number to whom the low lands of St. Bernard and Plaquemine was home. The great majority of the survivors are still clinging to the rafts, the logs and whatever else there is that floats on the flood waters that crashed down upon the trapping grounds through the man-made crevasse south of New Orleans.

Lost Shyness.

"When the dynamite charges that cracked the Caernarvon levee were set off there was no animal, big or little, more shy than the muskrat. But with the flood it seems the customary fear of mankind largely disappeared. As Durham and I paddled our canoe through the flood waters of St. Bernard and Plaquemine some of the rats—the big strong ones, who still had a lot of pep and dish left in them—would dive and swim away. Others, however, weakened by the long struggle for life in the water, headed straight for our boat. They would climb up on the paddles, cling to the side of the canoe, and wait for us to take them in our hands and drop them in the bottom of the canoe.

"Once safe on board the muskrat began to make his toilet. When the toilet was complete, the little fellow would lie back and snooze away for an hour or more. Later on, when we sighted a raft, we would set him adrift and off he went to board the craft the trappers have launched throughout the flood zone as a haven for him in his hour of distress. And this may sound a bit fantastic, but it so happens it is the truth.

"These rafts are proving a partial solution of the problem created by the flood. If we save 50 per cent of the animals the raft will have to be credited with a very large part in that achievement. Of course, we are going to lose practically all the baby and the very young rats, but we are going to save a lot of the old fellows and their mates. On many of these rafts the nest-making activities of many of the females indicate that it won't be long before these will be a lot of baby rats on board.

"Nevertheless, the fraternization of wild life in moments of grave peril is always a wonderful thing. In my tours of the St. Bernard and Plaquemine desolations I have seen snakes, raccoons, mink and rats all on the

"Noah's Ark" of Gassed Veterans

Here is the "Noah's Ark," as it is called by its owners, it, reterson and G. Wood, both of Sausolito, Calif. It has a tag from every state in the Union, as well as lots of funny quips marked on it. The owners are World war vets, gassed in the Argonne, and they had not long to live, when they set to see the world. So far they have been up and down the coast and across the United States five times, and their health has improved so that they no longer feel the ill effects of the Argonne gas.

"HUMAN CLOCK" BAFFLES BRITISH MEDICAL SOCIETY

Bill Jenney, Clock Winder, Develops Uncanny Ability to Tell Time at Any Hour.

London.—Just how far a human being can be transformed into a living clock has been demonstrated in London by members of the British Medical and Psychical association. Their findings have caused widespread interest in medical and lay circles in England.

For the last 32 years Bill Jenney, a sixty-two-year-old clockwinker, has been winding and tending the 1,050 clocks of the Savoy hotel, London—the winding alone of which has occupied him four days of every week. Many years ago Jenney claimed that at any hour of the day or night he could tell the time within half a minute. He claimed that in seven times out of ten he could estimate the time correctly within thirty seconds.

Recently Bill Jenney was put to exhaustively thorough tests by members of the British Medical and Psychical association. They did everything in their power to dislodge what they called Jenney's "acute psycho-astral poise."

It is stated that about one person in 500,000 is generally found to have peculiar faculties for gauging the passage of time, which means, of course, the changing juxtaposition of the sun and the earth, and Jenney's faculties have been highly developed owing to his vocation. Jenney has found that, like a clock, his ability depends largely on his health. Some days he might be a minute fast; at other times it would be the reverse.

Their tests to try to make him oblivious to time included attendance at one of the most dramatic plays in London, enjoyment of an operatic meal—and they also tested to see if Jenney's time-guessing faculties were affected by alcohol. The greatest divergence he made was one of only three-quarters of a minute.

London Dietitians Plan Perfect "Square Meal"

London.—"The perfect square meal" was on display here at the Nursing and Midwifery exhibition, Central hall, Westminster, and attracted such crowds that queues formed to get a glimpse of it.

All three vitamines—A, B and C—are included in the perfect menu, which included cod chicken and egg sauce, new potatoes, salad, cress-flower mold, fruit salad with cream, whole-wheat bread and butter and lemonade.

By adding or subtracting vitamines the "perfect square" may be made just the thing to alter fat or thin persons.

Automobiles Aid Alfalfa Growing

Legume Becoming Popular as Market for Timothy Hay Is Dwindling.

Automobiles aid the production of alfalfa, because they have replaced horses, the market for timothy hay, which was once a major cash crop on many New York farms, dwindles and in its place farmers in some sections are producing the legume, says the New York State College of Agriculture at Ithaca, N. Y.

Best Cash Crop.

As a cash crop, alfalfa is better than timothy, because the demand for alfalfa is good whereas the demand for timothy is poor. As alfalfa is used more and more by feeders in regions where it cannot be produced cheaply, the demand probably will increase.

Aside from the chances of marketing it at a profit, alfalfa has other advantages, the college says. It is high in protein and therefore can be substituted, in part, for high-protein concentrates in feeding dairy cattle. The college points out that alfalfa prices were good and New York growers found it a profitable field crop even when the prices of mill feeds were low. Since it is possible to grow alfalfa then, it should be still more profitable to grow it when the prices of mill feeds are higher, for this should stimulate the use of alfalfa.

Sell Good Product.

Farmers who plan to produce alfalfa to sell, however, should be careful to offer only that which is free from weeds and other grasses and which is well cured. Much New York alfalfa that is marketed usually has to be sold at a low price because it has poor quality. The college advises farmers in sections where the yield of crop to grow more than they need at home and plan to sell only a good-quality product.

Live Stock in Wood Lot Hinder Timber Growth

The farm wood lot is more valuable as a producer of wood than as a pasture for live stock, according to C. H. Tillotson, forester of the United States Department of Agriculture. A year's forage production in the average wood lot is estimated to be worth from 25 cents to $1.25 an acre. In the same time a well-managed wood lot will add from one-half to one cord of wood. In addition there is the convenience of having a supply of cord wood, poles, posts and lumber near at hand.

Live stock eat and break down the young growth, bind it, strip it of bark, and trump it out. Also by tramping the soil around the roots of older trees they pack it so tightly that air and water are excluded from the roots, and the trees gradually die. Hogs eat the seeds of oak and beech and thus interfere with the establishment of seedlings. Heavily pastured woods are easily recognized; they are almost entirely devoid of bushy undergrowth, a sod grass has begun to creep in, and the old trees are beginning to die in the tops.

Live stock undoubtedly benefit from the shelter afforded by woods. Two or three acres, however, with ordinarily give them all the shelter they need; the remainder of the woods had better be fenced off to grow wood crop.

Quack Grass Is Killed by Covering With Paper

Patches of quack grass are most easily killed by covering them with tar paper, says Matthew Fowlds at the South Dakota Agricultural college. Several experimental fields have been cleared by a four-year rotation of corn, oats, wheat and sweet clover or a similar combination. As soon as the sweet clover crop was harvested the stubble was plowed under. Throughout the balance of the summer the ground was frequently disked and cultivated. Alfalfa has kept the weed from spreading but will not kill it in that state.

In Michigan J. F. Cox at the agricultural college advises very shallow plowing in August where whole fields are infected. Then disk and cross disk to cut the sod into pieces. The roots can then be raked together and burned. As soon as rain calves the ground run over the field with a spring tooth harrow or disk, repeating every ten days. The next spring plow as early as possible, seven to nine inches deep, and plant a cultivated crop.

Agricultural Facts

Horse sense is needed for success with any kind of live stock.

• • •

A wild wheat that is spreading as a weed in Kansas wheat fields has recently been given the popular name of "goat grass."

• • •

Worms that eat holes in fruit and truck crops also eat holes in the profits.

• • •

To keep the loafer hens from eating up the profits, why not eat up the loafer hens?

• • •

Keep the poultry house clean and the birds are more likely to keep healthy.

• • •

Club boys and girls, in living up to their slogan, "Make the best better," are setting a fine example to their parents.

• • •

Horses have tender mouths, which are sometimes made sore enough by coarse stiff hay to keep them from eating freely. When such hay is cut pretty fine it is much less apt to cause this trouble.

• • •

A ewe that has lost her lamb can be made to claim another ewe's lamb if the skin of the dead lamb is placed on the other lamb and the ewe is tied up and watched a few days while the new lamb nurses.

PRINT SILK ENSEMBLES FOR BEACH; MATCHING CAPES AND CHIC TOUCH

"A PLACE for everything and everything in its place"—and that goes according to Diana Fashion is the sandy beach with its background of sky and sea, when it comes to a perfect setting for apparel which is startlingly bizarre, spectacular and subtly colorful. Wherefore stylists have taken their cue, playing up to their limit the charms of vivid printed silks, fancy satins and figured crepes, as mediums for beach and swimming costumes.

There is an interesting diversity to bathing and beach suits this season, so much so, they give the aspect of a style pageant staged to display every

A Stunning Beach Costume.

phase of the costume mode. In this gay panorama, one has the satisfaction of seeing humble gingham, yet not so humble according to the latest verdict of the mode, holmobding with satin and silk, with never an appearance of clowning the event. Indeed the gingham bathing suit has been taken up with alacrity by the elite. The quaintness and youthfulness of a checked gingham bathing suit is proving of widespread appeal.

Beach beauties are destined to phenomenal in marvelous ensembles this summer, featuring printed silks of every description. A charming beach costume is shown in the picture, which goes to show to what extremes the mode is trending both as to color and design.

Two outstanding items in beach attire are the square wrap or gay patterned fabric, also the tunic of vivid print topping black sateen pajamas. These short slips which look like an abbreviated day-time frock are also worn over black satin trunks.

The "square wrap" above referred to is simply a large square developed of rubberized gay print bonded with a plain material. It is fashioned exactly as are the lovely evening shawls made of metal cloth and georgette or brocade. What's more, the smartness of the beach square, as is also true of the evening square shawl, depends largely upon the manner of wearing it. It requires a cunning knack to wrap it around "just so," but the result is worth practicing before the mirror to attain.

The new woo-patterned silks, which are so gayly highlighting the fabric mode, seem to call for quaint and cunning fashioning. And they get it. One cannot imagine a stylist here tuned to these naive silks than this illustration sets forth. It is one of fashion's latest.

Cleverness and modishness under-

Silk Dress With Cape to Match.

score this little frock, as viewed from every phase of the style question. The dingsout movement of the plaited ruffings, arranged as they are in tiers, is very new. The use of grosgrain ribbon for binding the edges of the cape and trimming the accordion is trending tendency.

Of course the first thing one notices about this arresting frock is its cape of self material. Capes to match the summer silk frock are one of the foremost features of the later modes.

Capes also distinguish many of the handsome silk coats which are at this moment so favorably accepted by women of fashion. Often a coat of black faille silk will have a cape attachment finely plaited. Then, too, a flood of gay silk carries a plaited skirt with a short plaited cape-wrap to match. Such an ensemble developed in black or navy blue is very distingue.

Speaking of capes, they are entering the costume mode from every angle, for evening as well as daytime. Just now it is the pleasure of the mode to add to the dainty pastel chiffon frock a cape of the same material. These transparent capes are indeed charming, especially worn with the sleeveless gown.

Newest French fashions include long capes of allover lace. Of black chantilly the wrap serves with every evening frock. However often the lace cape is in matched coloring to the sheer frock. Leading shades for the lace cape include gray, beige and soft modulated green.

Peasant Frock

A new version of the peasant frock for the younger set is of a heavy rough silk with gay embroidered motifs on the full sleeves, gathered into a cuff.

Chic Boleros

The elaborate new blouses with embroidered sleeves and front, have established the short boleros as smart. The bolero sleeves are full and short, thus revealing the blouse

New Jewelry

The newest and most charming jewelry designed to fit in with informal costumes is made of dull silver set with semiprecious stones and wrought into exquisite designs of flowers and foliage.

Elephant Motifs

Elephants, small sailboats and Japanese pagodas are used as motifs for the decoration of heavy silks for evening wraps.

THE KITCHEN CABINET

(©, 1927, Western Newspaper Union.)

Oh! if the berry that stains my lips
Could reach me the woodland chat,
Science would bow to my scholarship,
And theology doff the hat.

WINSOME DELICACIES

To dine regally and well, try some of these dishes occasionally:

Ham With Mushrooms, Shrimps and Peas.—Fry a half-inch slice of ham for about ten minutes over a slow fire. Turn the ham and cover the cooked side with a dozen shrimps which have been boiled and cleaned and one-half dozen mushrooms cut into thin slices. As soon as the second side of the ham is cooked (shout seven minutes) take it out and place on a warm dish in the oven. Cook the shrimps and the mushrooms about two minutes in the hot fat, then turn them onto the ham and surround the whole with cooked fresh peas.

Coddled Steak.—Take about two pounds of round steak cut an inch thick, season well with salt and pepper and flour. Have ready one small onion chopped fine, two tablespoonfuls of butter or beef dripplings heated very hot. Put the meat into a hot pan to brown evenly on both sides, then add enough water to cover well. Season with salt and pepper and worcestershire sauce to taste. Cover tightly and simmer steadily until the steak is tender. The meat must be basted and turned frequently. Serve on a hot platter with some of the gravy. Garnish with parsley or water cress.

Iron Mountain Muffins.—Take one-fourth of a cupful of sugar, one third of a cupful of butter, two cupfuls of flour, four teaspoonfuls of baking powder, one egg well beaten, three-fourths of a cupful of milk and one-half teaspoonful of salt. Cream the butter and sugar. Add the well-beaten yolk, the flour sifted and sifted with the baking powder, then add the milk and the egg white beaten stiff. Bake in a quick oven. This makes one dozen muffins.

Salmon Souffle.—To one can of salmon, remove the skin and bones and flake, add the yolks of two eggs, one cupful of rich milk or cream, then seasoning desired and fold in the stiffly beaten whites of the eggs. Bake 20 minutes in a well-buttered pan set in hot water. Serve at once when nicely puffed.

Something to Eat.

It is the everyday food which we are most interested in, as that is a daily

problem. For the occasions when we entertain are countless. g o o d things which are limited only by the purse.

Those who enjoy the palatable eggplant may like to try this method of cooking and serving it:

Eggplant Pot Pourri.—Boil an eggplant, without peeling, for 20 minutes, or until nearly done. Drain, cut into half lengthwise and scoop out the centers and chop fine. Simmer one-third of a cupful of chopped green pepper and one cupful of chopped onion in two tablespoonfuls of butter about 12 minutes. Add one cupful of chopped fresh tomatoes and the, egg plant. Season well and cook for ten minutes, add one cupful well beaten, stir and cook until thick. Fill the eggplant shells, sprinkle with buttered bread crumbs and brown under the broiler flame. This dish is rich in vitamines A, B and C, and can be eaten by one wishing to reduce or to maintain weight. It is also a good luxurious because of the vegetable fats.

New Carrots.—Wash and scrape carrots and cut into finger-sized pieces. Put on to cook in a thick aluminum dish tightly covered with no water. Add butter, a tablespoonful or two, seasoning of salt and pepper and cook for an hour. Serve as a garnish for mutton stew. This dish is rich in iron and vitamines.

Lemon Sauce.—Cook together one tablespoonful of cornstarch well mixed with one cupful of sugar, then add two cupfuls of boiling water. Cook slowly ten minutes, then add the grated rind and juice of a lemon; lastly one tablespoonful of butter.

Pineapple Salad With Honey Dressing.—Arrange slices of fresh pineapple on lettuce and pour over the following: Beat together three tablespoonfuls of olive oil, two tablespoonfuls of honey, a tablespoonful of lemon juice, a dash of salt and cayenne. Serve at once.

Bermuda Salad.—Cut into fine cubes a small southern onion, add twice the quantity of tart apple also cubed, season well with salt and add a little minced green pepper. Mix well with salad dressing and serve on lettuce.

Stuffed Dates Salad.—Stuff dates with nuts and cover with finely cubed apple on a nest of lettuce. Serve with a mayonnaise dressing.

Coconut, Apple and Onion Salad.—To prepare two cupfuls of cubed apple, add a tablespoonful or two of finely chopped onion and a tablespoonful of finely minced fresh red pepper, mix with a cupful of grated, fresh coconut and add enough dressing of any kind to moisten. Serve on lettuce.

Nellie Maxwell

Mythological Satyrs

In Greek mythology the satyrs were a race of woodland deities who roamed the hills in the time of Bacchus, whom the Greeks also called Dionysius. They are represented with long ears, flat noses, a man's body and the legs and hoofs of a goat.

Statistics

If all the serial stories were placed end to end in this world, they would have to be continued in the next.—Kansas City Times.

Mrs. Owens—I am the victim of nerves.

Mrs. Ole—You are?

Mrs. Owens—Yes. I need a new outfit, and when I asked credit of the dressmaker and milliner they had the nerve to refuse.

"Fly and by" bears no date.

NOT REAL THING

Jennie—"Did she marry money?" Maggie—"If she did, she got a counterfeit bill."

Signals Off!

Broune—What! You lost $26.25 at bridge this afternoon? How did it happen?

Mrs. Broune—It wasn't my fault. My partner scratched her nose with the wrong finger.

Right Dress

"Have you seen Norah's new evening gown?"

"No, what does it look like?"

"Well, in most places it's very like Norah."

She Could Do It

A boarding house servant left to get married, and her sister, a big, strapping girl of seventeen, fresh from the country, came as a "temporary" in her place.

"Do you think you will be able to attend to the gentlemen all right?" the landlady asked her.

"Oh, yes," she replied readily. "At home I helped mother to look after 143 cows and 107 pigs."

Life is a mirror. Try smiling at it.

HIGHER ALL THE TIME

Jones—"What is high finance?" Brown—"Figuring the cost of living."

THIS WOMAN FOUND RELIEF

After Long Suffering by Taking Lydia E. Pinkham's Vegetable Compound

In a little town of the middle West, was a discouraged woman. For four years she had been confined to her home with troubles such as only women know. Unable to do her work, unable to go out or enjoy a friendly chat with her neighbors, life seemed dark indeed to Mrs. Daugherty.

Then one day, a booklet was left at her front door, idly she turned the pages. Soon she was reading with quickened interest. The little booklet was filled with letters from women in conditions similar to hers who had found better health by taking Lydia E. Pinkham's Vegetable Compound.

"I began taking the Vegetable Compound," Mrs. Daugherty writes, "and after I took the third bottle, I found relief. I am on my eleventh bottle and I don't have that trouble any more, and feel like a different woman. I recommend the Vegetable Compound to everyone I see who has trouble like mine, and you can use these facts as a testimonial. I am willing to answer letters from women asking about my Vegetable Compound."—Mrs. Ed. Daugherty, 1305 Orchard Ave., Muscatine, Iowa.

Are you on the Sunlit Road to Better Health?

Not What It Seemed

The dancers stopped and watched as a sunburnt man crossed the floor toward the band. His whole frame shivered and shook. Then suddenly his tremors ceased and he was surprised by a burst of applause from the guests.

"Welcome, old man," cried his host, seizing the newcomer's hand, "and congratulations. I never expected to see an ex-sufferer from shell shock or charleston straight out of central Africa."

The traveler gasped.

"Charleston?" he echoed. "What wasn't the charleston, but was ague."

Vanity is often the unseen spur.

Grind Feed for Money

Own the feed business with this new kind of feed mill. Every community is now, or soon will be demanding feed ground quickly in large quantities and very fine. Medium grinding, also by making blanks of mills, is no longer in demand.

This is the latest form of feed grinder. It combines the cutting action of the stones with that of the hammering action of the hammer mills.

This mill will grind 100 lbs. of ear corn, oats, rye, barley, alfalfa, or anything grindable to any fineness, with 25% to 50% less power than any other type of grinder.

This saving in power alone makes these mills money makers all over the country. They will give you a better profit grinding feed than any other business in which you can engage on the same investment. You should be also in your community.

Send for free booklet "THE STORY OF A WONDERFUL FEED MILL" which tells you about this mill and the opportunity of making money in the all-year feed business. Complete equipment for operating, including power lost, costing from $200 and up. Many mills pay for themselves in a few months.

Anglo-American Mill Co.
1440 Kennedy Ave. Owensboro, Ky.

Green's August Flower

For Indigestion, Dyspepsia, etc. Relieves Distress after Hurried Meals or Overeating. Being a gentle laxative, it helps the digestive tract working normally.

Council Proceedings

Council Chambers, June 27, 1927.

The Common Council of the City of Charlevoix met on the above date, with Mayor Bergeon presiding. Ald present, Bridge, Gelken, Livingston, Partridge.

The minutes of the meeting held June 13, 1927 were read and approved.

The question of water main for Mr. Newstner was referred to the Water committee.

Alderman Bridge offered the following resolution and moved its adoption:

RESOLUTION.

West Garfield Ave. Sewer—1st Extension.

Resolved by the Common Council of the City of Charlevoix, that the roll of the special assessment for defraying the amicable cost of construction of a sewer in that part of West Garfield avenue lying between Bridge and State streets, as made and presented by the Board of Special Assessors, having been duly reviewed by the Council and said Board of Special Assessors, as near as provided by law, and no person interested therein having appeared in opposition or objection thereto, the said roll be and hereby is approved and confirmed.

Resolved further, that the special assessment appearing on said roll be divided into five equal installments to be due and payable as follows:

The first installment shall be due and payable on the First day of September, 1927, and shall be collectable directly from the said special roll, without interest if paid on or before said date. If such first installment is not paid before such date such installment shall bear interest at the rate of six per cent per annum payable annually, computed from the 1st day of July, 1927.

The remainder of such installments shall be due and payable annually thereafter, on each year for the years 1928, 1929, 1930 and 1931, at the time of the maturity of the City taxes for such years as carried into the July tax roll for said years, with interest at the rate of six per cent per annum, payable annually, computed from July 1st, 1927.

Resolved further, that the City Clerk shall annually, during said years, certify to the City Assessor the amount of all unpaid installments of said special assessment on the 1st day of June of each of said years, and the City Assessor shall cause the amounts so certified to be spread on the July tax roll of the said years respectfully, as a lien against the respective lands described in said roll, together with interest at the above rate: Provided, that any and all unpaid first installments shall also be certified by said City Clerk to the City Assessor and by him spread on the 1928 July tax roll, in the proper column, as a lien against the respective lands, together with interest at the above rate computed from July, 1st, 1927.

Resolved further, that the owner or owners of any lands described in such special assessment roll shall have the right to pay the whole of any assessment levied against his lands, at any time before August 1st, 1927, without interest, whereupon the City Treasurer shall enter payment on the special assessment roll and give receipt.

Resolved further, that to defray the assessable cost of construction of such sewer, the City borrow the sum of Five Hundred Fifteen Dollars, in anticipation of the collection of the aforesaid special assessments and evidence such loan to issue its serial coupon bonds to bear date July 1st, 1927, and bearing interest at the rate of five per cent per annum, payable annually, and in denominations, numbered and maturing as follows:

Bond No. 1, in the sum of $140.00, maturing July 1, 1928.

Bond No. 2, in the sum of $120.00, maturing July 1, 1929.

Bond No. 3, in the sum of $125.00, maturing July 1, 1930.

Bond No. 4, in the sum of $125.00, maturing July 1, 1931.

Which said bonds shall pledge the full faith and credit of the City of Charlevoix for the prompt payment thereof with interest as the same shall mature, and shall bear interest coupons evidencing such interest payments as herein prescribed.

Resolved further, that the Mayor and City Clerk be, and hereby are, authorized and instructed to execute said bonds and affix the corporate seal thereto, and the City Clerk to sign said interest coupons for and in behalf of the city.

Resolved further, that the Mayor and City Clerk be, and hereby are, authorized to negotiate for the sale of and to sell said bonds on the best terms obtainable, not less than par, and to deliver the same to the purchaser or purchasers thereof, depositing the proceeds of such sale with the City Treasurer to the credit of the General Sewer Fund of said city.

Adopted at a regular meeting of the Common Council held in the Council Rooms in said city, on the 27th day of June, A. D. 1927, by aye and nay vote as follows:

Ayes: Aldermen Bridge, Gelken, Livingston, Partridge.

Nays: None.

A. Bergeon, Mayor.

Ray S. Hamilton, City Clerk.

By D. S. Payton, Deputy.

The Finance committee submitted the following bills ag regating $9,614.94 report the same correct and recommend they be allowed.

To the Honorable: June 27, 1927.

The Mayor and Common Council of the City of Charlevoix:

Gentlemen—Your Finance committee having examined the following bills, find them correct and recommend they be allowed:

Come and Have a Good Time

THE CHARLEVOIX SENTINEL

Volume 58 Charlevoix, Michigan, Thursday, July 7, 1927 Number 11

"Uncle" George

Uncle George H.VanPelt writes another letter to the newspapers which have done much towards educating the people of Charlevoix county on good roads, for without these newspapers it would not have been done.

Building concrete roads is like building a good business. You have to advertise in the home papers to get it. If you advertise your business, you get it. If you advertise good roads, you get them. If you don't advertise, you don't get either. That's what the newspapers are for, so why don't you use them.

Any person who has made a study of any question for over twenty-five years should know more about it than one who has given it no attention, or one who possibly has been influenced to be prejudiced against it for various reasons.

You know I could not write a letter without saying something about concrete roads, and you all would be disappointed if I did not. I say this advisedly because I receive so many letters from people who have ridden over the concrete roads and who have used my cards and letters.

Possibly there is no other one thing that is causing as much earnest cussing and disgust as the mud and sand and dirty, black, oily substance on our streets and roads.

It would be impossible to compute the vast amount of loss and depreciation done to cars and tires, due to driving them over this awful mixture. In fact, but it is safe to say that it would run into a huge sum in the course of a year. If the money that is spent annually for gravel and dirt roads with this stuff put on it, was spent for good concrete roads, the county which did it would be hundreds of thousands of dollars ahead every year.

Now what are you going to do about it? That's the question.

While at the annual dinner at Fisherman's Paradise on June 12, no less than twenty to twenty-five drivers told their stories, and in no mild manner; and since then at Hallett's Inn I hear it daily, and as I meet my old friends on the street they ask, what can be done about it; all claiming great damage to their cars. Which, of course, we all know is true. They all say "they would rather take the dust than get their cars so covered with the d—n mushy, oily stuff."

Education is useless without common sense, which applies particularly to road and road building, and no matter how much you have, you've got to have education to put it into effect.

I think it is safe to say that every one of us have a desire to get increased wisdom and understanding in more ways than one, and this increase can only come constant study of the subject in question; be it farming, trucking or good roads.

P.S. Do you want a good concrete road around Lake Charlevoix? If you do work for it. So far as I personally am concerned, it will make no difference to me, but of one thing you can rest assured and that is: That such a road would pay for itself in less time than you know it, just the same as it has on the Dixie highway.

Uncle George says: This may be my last letter, but I hope to finish my fourteen years getting the balance of the Dixie highway covered with concrete—as well as the road around Lake Charlevoix.

Sincerely,
Uncle George H. Van Pelt.

Ornamental Designs

Vignette is a small picture, engraving or design without borders. Originally vignettes were small conventional designs of vine leaves and fruit. A vignette is often placed on the title page of a book.

TWO NEW COTTAGES

Contracts Let Early this Week—Work Commenced

Contracts were signed early this week for the construction of two new cottages in the northeastern part of the city byMr. Ivan H. Koch, owner of the location on which the cottages will be erected and Contractor Wm. E. Parmelee. Excavation work opened up Wednesday, and building material will soon be on the ground, with construction work under way as soon as possible.

The two cottages are the initial part of a building program planned and to be carried out in the same locality wherein several more cottages will be added to this part of the city in which Mr. Koch is the promoter.

The cottages now in process of construction will be built by the W. E. Parmelee Company at a contract price of six thousand dollars each. Mr. Parmelee secured the contract in competition with several other contractors placing bids for the proposed buildings. In this the bid made by the Parmelee company was but a garrett cale, labor ..... 62 50 little more than a difference between the high and low bidder.

TO PROBE NEEDS OF INDUSTRY

Big Employers Will Treat With Workers at Detroit Conference

Co-operative relationships in industry will be discussed by Catholic workers and employers at the fifth annual meeting of the Catholic Conference on Industrial Problems, to be held in Detroit July 1 and 2.

J. M. Larkin, assistant to the president in charge of industrial relations of the Bethlehem Steel Co., will describe his company's plan of industrial relationships. Charles F. Wills, of Chicago, a district representative of the Machinists' Union, will discuss "Union Management and Co-operation". The Rev. Fr. J. B. Culemans, of Moline, Ill., will speak on "The Social Effects of Machine Industry."

The Rev. Fr. William A. Cummings, director of Catholic charities in the Archdiocese of Chicago, will present the case of the family of the unskilled worker. The discussion will be led by employers, employees and students of Catholic social teaching.

A paper on "American Economic Radicalism" will be read by the Rev. Fr. R. A. McGowan, assistant director of the department of social action, National Catholic Welfare Conference. Judge Philip H. Donnelly, of Rochester, N.Y., a representative of the American Federation of Labor, who has been active in the recent Communist investigation in New York state, will lead the discussion.

Among those who will lead in the discussion on unskilled workers and their families are: Prof. James E. Hagerty, dean of the sociology department of Ohio State University; the Rev. Fr. Francis J. Haas, S.J., of Marquette University, and the Rt. Rev Msgr. Patriek J. Dunigan, of Flint.

The president of the conference is Frederiek P. Kenkel, of St. Louis, Mo., and the Rt. Rev. Peter J. Muldoon, of Rockford, Ill., is honorary president. All sessions of the conference will be open to the public.

CONVICT SHIP "SUCCESS"

Due to Tie Up at the Port of Charlevoix Sometime Today

Charlevoix is to be visited by the most ancient ship afloat in the world, according to Chas. H. Emery, president of the Association of Commerce, who has been in communication with Captain D. H. Smith, commander of the old British convict ship "Success," with the purpose of having that vessel placed on exhibition in this city.

It is now reported that the prison ship is cruising Lake Michigan from Green Bay, Wis., her recent port of entry, and that Capt. Smith plans to return the old craft to her home port, at Melbourne, Australia, after leaving the lakes. Charlevoix it is understood, will be the last port of her cruising on Lake Michigan. She is due to tie up at the city docks sometime today.

That the old vessel, whose story is told in the darkest chapters of England's penal history, is to be brought to Charlevoix, is largely due to the efforts of Mr. Emery and Mayor Bergeon, who recently met with Capt. Smith on his visit here, and discussed its advantages over other ports considered.

With no motive power other than her sails, this firtlish convict hulk, is capable of sailing to any port in the world. In recent years she has made several voyages. First, sailing from Port Adelaide south Australia, to London, England; second from Liverpool to Boston. The latter voyage required 94 days, making a total of 261 days under her own canvas from the continent. Since her arrival in this country, the "Success" has been shown in practically all the practically all the principal ports, from Boston to Seattle from Atlantic to Pacific, and as far inland as Pittsburgh, Pa.

The convict ship has been in turn the most infamous and the most famous ship afloat. She is the sole survivor of England's fetus fleet. One of a fleet of vessels that carried 167,000 men, women and children from Great Britain and Ireland, to the crowns penal settlements established in Tasmania and Australia in 1789.

The history of the convict ship is one of the most tremendous romances of the seas. Built in 1790, at Moulmein, British Burma, East India, she was sailed the seas as an armed merchant vessel, felon flag ship, floating jail and women's prison ship; boys reformatory and veritable "ocean hell."

For the first twelve years of her career, from 1790 until 1802, she was considered one of the finest merchant ships ever built for the East India trade. Traces of her former grandeur are still discernable in the cabins, where hand-carved teak symbols of Hindu mysticism superimposed those stately appointments of her former glory. In fact, the old ship is constructed massively throughout of burmese teak, a wood that excels in durability any timber on earth.

The Success however, became too slow for that service, and in 1802 was sold to the British government. Thus she was stript of her queenly possessions and enslaved into the convict traffic, penal settlements having been established by England in her newly acquired colonial continent.

From 1802 until 1851 the Success carried her burden of wretched beings many of whom were unjustly convicted of fabled crimes; among those were many Irish political prisoners and the thousands who could not be hanged under the 145 capital offences, threatening the lives of men, women and children and unadorning the British statutes. Yet, in instances immumerable, resultant in suffering worse than death, on the hulks of her monstrous felon fleet, when she became a floating jail anchored in Hobson's bay, near Melbourne, Australia. Aboard he are now shown in their original state, all the airless dungeons, torture chambers and cells of the doublemued; flogging frames, manacles, brandling-irons and punishment bails; leaden-tipped cat o' nine tails, the coffin bath and other fiendish inventions of the period.

No wonder citizens of Sydney, survivors of the convict system, years later scuttled and sent the old ship to the bottom of Sydney harbor; from her aged hulk were cast shadows on the original of the Australian Commonwealth. Five years submerged, she raised to be sent on a tour of the world. In time to become a famous craft, to tell at once a mute and vivid story of her wrongs, under the command of Capt. D. H. Smith, her American owner.

FURNISH THE INFORMATION

Extend Proper Service to the Summer Visitor at all Time

"Any fish in this lake?"

"I don't know; never go fishing"

"What kind of bait do they use?

"Don't know. Minnows are best I guess."

"Where can I get some bait and a boat?"

"I don't know."

That was a conversation between a tourist and a hotel owner and manager of one of West Michigan's leading resorts, reported by a leader in West Michigan tourist and resort activities. This result from the hotel looking the business of a party of three tourists at least over night and possibly for a few days or more. If that was all to it. West Michigan as a whole might not care, but the tourist got the impression that perhaps he was not wanted around, at least as a fisherman.

Every hotel man and anybody else in Western Michigan who comes in contact with the tourists and resorters should not only be able to give such information, but should know the principal highways, be ready to direct people on pleasant and beautiful drives through the community and perform a dozen and one other similar services that would help to make the vacation guest feel that he wants to see him, have the best possible time while here.

A Beulah lad who sold angleworms to fishermen last summer made $150; his dad made $300 from the minnow which he carried on as a side line. They will pay for such services at any West Michigan lake shore and when these services are not supplied, hotel and lodge men and others interested in the advancement of a community should see that they are. It is just as essential to sell a man anglemorum if he wants them as it is to sell him a summer home if he wants it—and we have plenty of both in West Michigan to meet all demands.

1,200 PRIESTS AND NUNS AT EDUCATION MEET

Catholic Association Conferences Bring Leading Teachers to Detroit

Over 1,200 priests and nuns, from all parts of the United States, met in Detroit at the twenty-fourth annual conference of the National Catholic Educational Association, held in the new Sacred Heart Seminary, of that city.

Every division of Catholic education, from the parochial grade school to the major theological seminary, was represented at the meet, which brought to Detroit leaders in educational fields from almost every state in the Union.

A reception held at the Hotel Statler in honor of the Rt. Rev. Michael J. Gallagher, D.D., Bishop of Detroit, and the Rt Rev. Thomas J. Shahan, D.D., rector of the Catholic University of America at Washington, and president of the Educational Association, was attended by hundreds of interested clergy and laymen.

Under the auspices of the faculty of the University of Detroit an open meeting was held in Orchestra Hall, at which the Hon. Dudley G. Wooten, A.M., LL.D, former superior court judge and now professor of law at Notre Dame University, spoke on "Religion and Education from the Standpoint of a Layman".

In connection with the conference an exhibit of the latest developments in the way of aids to teaching, ranging from blackboards to scientific instruments and from uniforms to architectural drawings, was held. Fifty-three booths were occupied by leading publishers and school supply manufacturers of the country.

Old-Time Embroidery

Petit point embroidery became popular during the Fourteenth and Fifteenth centuries. It was much practiced in France, where it was known as "au petit point."

Steady Increase in Pure Breds

"Better Sires-Better Stock" Campaign Shows Increase in Members.

(Prepared by the United States Department of Agriculture)

One hundred and fifty new members a month is the average number of livestock owners joining the "Better Sires-Better Stock" campaign fostered by the bureau of animal industry, United States Department of Agriculture. The members have adopted the use of pure-bred sires for all kinds of live stock on their farms, including poultry. This increase in membership is believed to be a good index of progress in live stock improvement in this country.

During the three months, January 1 to March 31, as shown by the report just issued by the bureau of animal industry, 450 live-stock owners signed enrollment blanks, thus affiliating themselves with the better-live-stock movement and bringing the total number of persons so enrolled to 16,500. Persons participating in this work receive from the department educational literature on animal breeding and feeding and also a lithographed sign, "Pure-bred Sires Exclusively Used on This Farm." Many other agencies, also, are at work stimulating the same goal, but in most cases their influence is not so easy to measure.

Leading Counties.

In the report just issued a list of 43 counties shows that each of these areas has more than 100 persons who are using pure-bred sires exclusively for the improvement of their herds and flocks. In each of the three leading counties the number of persons active in this work exceeds 500. The relative standing of these counties follows:

County and County Agent	Pure-bred Sires Used
Jackson—R. C. Grinsteiner	1,000
New Haven, Conn.—Raymond C. Cheney	1,000
Dallas, Ky.—R. G. Wilson	1,000

Special activity in livestock improvement during January, February and March of this year centered in New Haven, county, Connecticut, though participants were listed from 13 counties in 8 states.

Development of Movement.

The development of the better-sires movement during the last six years has been marked by a steady increase in the number of participants, by excellent support from the agricultural and city press, and by direct efforts of live-stock organizations and extension workers. County agricultural agents, representing the various states and the United States Department of Agriculture, have conducted most of the work in their respective counties. The Department of Agriculture keeps records of progress and furnishes suitable educational literature and information.

A recent development in the department's service is that of lending county newspapers electrotype cuts and furnishing illustrations and text matter for special editions devoted to live-stock improvement.

Plan for Success With Caponizing Operation

To be successful with capons and caponizing, it is absolutely necessary to keep the chicks free from vermin. Chicks infested by mites will not withstand the shock of the operation, while a vigorous chick will scarcely notice it.

While caponizing may be done successfully almost any time of the year, May and June are the better months for it. These, with proper care, should make eight or ten-pound capons by the holiday season. The latter ones must be kept over till the latter part of the winter or early spring.

The correct weights for caponizing depend upon the breed—the Mediterraneans at about one pound, the American breeds at from one and three-quarter to two pounds, the Asiatics and English from two and a half to three pounds.

The chicks must be kept without food or water for 24 or 30 hours before the operation. This makes the operation more successful and is better for the birds.

Simeon S. Burke Dies at Rock Island, Ill.

Information reached Charlevoix last Thursday of the passing of Mr. Simeon S. Burke at the home of his son, Benjamin F., at Rock Island, Illinois, on Wednesday, June 29th, age 92 years, and that funeral service would be held and interment made July 1st at Des Plaines.

Mr. Burke was for many years connected with the old Northern Michigan Transportation company, working in various capacities, and was in command of the Steamships Lawrence and Champlain when they were first brought out by the company, and before his retirement, on account of age, was general manager of the Transportation company.

In the early history of Charlevoix Mr. Burke was a frequent visitor here and will be best remembered by citizens of that period, particularly by such as were interested in shipping and sailing.

First School Gardens

In America the school gardens movement had its beginning in the city of Boston in 1891, when Henry L. Clapp, principal of the George Haven Putnam school, established a wild-flower garden at his school.

MICH-EDEN RESORT

A New Proposition Located on Carp Lake

A new resort is being opened and lots offered for sale at Carp Lake to be known as "Mich-Eden" by the J. H. Wagner Lumber Company of Cadillac. This resort is located along the wooded shores of Carp Lake and by the promoters, pronounced one of the finest resort locations in the interior part of the state.

This issue of The Sentinel carries an advertisement for the company relative to their proposition and readers of this paper will note that July 10th, next Sunday, has been designated as Charlevoix day at which time no doubt, many will take the drive to this new location and see the advantages noted by the promoters. As part of this advertising program the company has organized a band of fifty-five members which will visit and give concerts in many of the cities in the lower peninsula. Each Chamber of Commercial organization will visit Charlevoix sometime this month, the date to be announced later.

Tattoo Marks on Hogs Tell Owner

Simple Method Devised to Identify Owners After Animals Are Killed.

(Prepared by the United States Department of Agriculture)

A simple method for placing tattoo marks on hogs so that they may be readily identified after slaughter has been devised by Dr. F. E. Murray, veterinarian of the United States Department of Agriculture. The principal area for such identification is for detecting the origin of any diseased hogs found at the slaughtering places and to trace the channels through which infection spreads.

Uses for Instrument.

A description of the instrument, methods of using it, and various practical uses for such identification marks, are described in Miscellaneous Circular Number 57, just issued by the United States Department of Agriculture.

The form of the instrument considered most suitable for tattooing hogs consists essentially of a useful holder about eighteen inches long, adapted to receive five blocks of babbit metal in which phonograph needles are embedded with the points protruding about a quarter of an inch. The needles are arranged in Arm numbers and letters.

Ordinary black automobile enamel is used as a tattooing pigment. It is applied to the needle points with a brush. The mark is applied by merely striking the hog smartly with the instrument, usually on the fore part of the back. Tattooing causes no injury to the meat or inconvenience to the hogs.

Work Is Permanent.

A tattoo mark, properly applied, resists all attempts to remove it and, after death, is as permanent as the skin itself. It is a definite means of preserving the identity of hogs between farm and market. Extensive tests have demonstrated the practicability of the device in tracing the origin of animal diseases and in identifying the ownership of diseased animals in mixed shipments. Numerous other practical uses suggest themselves, such as tracing the source of animal parasites, experimental work involving the study of dressed carcasses and identifying ownership in co-operative marketing.

A copy of the circular may be secured as long as the supply lasts by writing to the United States Department of Agriculture, Washington, D. C.

OBSERVED SANE FOURTH

Crowds Everywhere—Day Fine for Outing and Pleasure

The celebration and festivities at Boyne City July 4th drew a large number of local citizens over to the point of celebration, nearly all making the trip by automobile. As a result the routes on either side of Lake Charlevoix were crowded with automobile travelers throughout the day and well into the night.

Most business places in Charlevoix were closed for the day after the early morning hours, thereby giving themselves, managers and salesforce an opportunity to spend the day away from their regular vocation, and nearly all took advantage of the opportunity offered and spent the day mainly at Boyne City, with a small percentage visiting friends at nearby points.

During the day a large number of automobiles passed through Charlevoix, some northbound, others going south, a seeming endless procession, while the usual number of autos were occupied the parking space in the down town section, regardless of the fact that business houses were closed.

Local machines were in the minority with a heavy percentage of cars bearing licenses issued at points distant in the state and a large number from other states.

National colors were displayed in large numbers in all quarters of the city, both the residential and business sections but huge flags and pennants on every automobile was decorated with one or more banners.

There were no accidents locally to interfere with the days festivities. Automobile drivers worked on the lines of "safety first" and celebrations generally proceeded with their activities safely, sanely, not only for themselves, but the public as a whole.

Celebration at Beaver Island Well Attended

Two Steamers, the James E. Sanford and America, carried good sized crowds over to St. James last Monday, in order to accomodate the public desirous of spending the day with friends, witness the athletic contests and enjoy the program arranged for the day.

The S. S. James E. Sanford made her regular trip and carried a full passenger list. The America, which left this port about ten o'clock, carried a large number of passengers and also members of the Charlevoix City Band, the latter being engaged to furnish music for the day. The return trip was made late in the evening.

Weather conditions were very favorable for those making the trip, which, taken with the entertainment provided at Saint James, made for an enjoyable outing.

Great American

On March 2, 1793, Sinmuel Houston was born at Timber Ridge Church, Va. He was a great soldier and statesman and was the leader against Mexico in the Texas rebellion. His birthday is observed as a holiday in the state of Texas.

Landscape Gardening Demonstration Here

Mr. O. I. Gregg, Extension Specialist in Landscape Architecture will be in Charlevoix County on July 21st, for the purpose of making planting plans for beautifying five different farm homes. These plans will be personally supervised by Mr Gregg, and the actual work will start next spring.

Your county agent will be glad to receive requests for these demonstrations as soon as possible from farmers who wish to make their homes more attractive and to bring out the natural beauties that sometimes are there but remain hidden.

If at all possible we hope to select these demonstrations in various sections of the county, in order to make it convenient for all interested parties to attend.

This work to be carried on will be the first of its kind and we hope that the interest displayed will be great enough to insure more of it in the future.

Don't forget to get in touch with County Agent Mellencamp at once and receive the benefit of Mr. Gregg's experience in making your landscape plans.

HOW MRS. WEAVER WAS HELPED

By Taking Lydia E. Pinkham's Vegetable Compound

As Mrs. Weaver herself says, "I was never very strong." This is a mild statement describing her condition, for, according to her letters, she was subjected to no small amount of ill health. Fortunately, however, her sister was familiar with Lydia E. Pinkham's Vegetable Compound and begged Mrs. Weaver to try it. "After three or four works," writes Mrs. Weaver, "I felt a great difference in myself. I would go to bed and sleep sound, and although I could not do very much work, I seemed stronger. I kept on taking it and now I am well and strong, do my work and take care of three children. I sure do tell my friends about your wonderful medicine, and I will answer any letters from women asking about the Vegetable Compound."—Mrs. Lawrence Weaver, East Smithfield St., Mt. Pleasant, Pa.

If you knew that thousands of women suffering from troubles similar to those you are enduring had improved their health by taking Lydia E. Pinkham's Vegetable Compound, wouldn't you think it was worth a trial?

In some families, the fourth generation is learning the merit of Lydia E. Pinkham's Vegetable Compound.

Freak Deer Has Horn Much Like the "Rhino"

During the last winter Yosemite valley, in the national park of that name, had an exclusive little side show, in addition to the usual wild animal circus. The main exhibit of the side show was a "rhino deer," a deer that by some curious, freakish prank of nature, had a horn similar to that of a rhinoceros projecting through the roof of its upper jaw, halfway between its nose and eyes. Altogether he was like any other deer, and tame as the tamest. Daily he made the rounds from house to house, seeking dainty tidbits to give variety to his diet. Like a pet dog he enjoyed having his neck stroked, until an attempt was made to touch the curious horn growth. Even the best of his friends were not permitted to do this. Then the park deer began to shed their antlers, and speculation was rife in the valley as to whether the antlerless deer on the upper jaw of Old Henry would disappear when he shed his horns. Soon he disappeared into the forests, to return without antlers and without rhino spike. Now his antlers are starting to grow again, and there seems to be evidence that the spike is coming back.

To Honor a Great Fur Trader

JAMES BRIDGER

INDIAN MOUND WHERE ASHLEY IS BURIED

THE TRAPPERS RENDEZVOUS

JIM BECKWOURTH

By ELMO SCOTT WATSON

IF PRESENT plans are carried out, the state of Missouri will soon pay long-neglected honor to one of her greatest citizens, Gen. William Henry Ashley. For nearly a hundred years Ashley's body has lain in an unmarked grave in an Indian mound near the confluence of the Lamine and Missouri rivers in Cooper county, his name and fame almost forgotten. Now, thanks to the initiative of a Missouri country editor, Edgar Nelson of the Boonville (Mo.) Advertiser, whose suggestion has been taken up by the Boonville D. A. R. chapter, a movement has been started to locate his grave and place there a memorial in keeping with the importance of his services, not only to the state, but to the whole country as well.

For there was a time when Ashley was a national figure even though it was then little suspected, perhaps, by his fellow-Missourians and even though his significance in the annals of the American frontier has been unappreciated until comparatively recent years. Virginians can claim with Missourians an equal pride in his achievements for he was born in Powhattan county in that state in 1785. At the age of eighteen he came to Missouri territory, or upper Louisiana, as it was then called, and settled first at Cape Girardeau. He was even then a man of considerable education and property and added to the latter by acquiring a large land grant which included what-is-now Jackson, the country seat of Cape Girardeau county. Ashley next moved to Potosi where he engaged in the manufacture of gunpowder, and later to St. Louis, where he was one of the promoters of the old Bank of St. Louis.

During the War of 1812 Ashley, whose forceful personality had apparently impressed itself upon the community, was made a brigadier general of the state militia. Later when Missouri entered the sisterhood of states he was to become her first lieutenant governor and was barely beaten in the race for governor by Frederick Bates. In 1831, he was elected as a Whig to the Twenty-second congress, to fill out the unexpired term of Spencer Pettis, who was killed in a duel with Maj. Thomas Biddle, and he was re-elected to the Twenty-third and Twenty-fourth congresses. But it is Ashley the pioneer, the fur trader, the explorer, and the patron of other explorers, rather than Ashley, the holder of state political office, whose importance extends far beyond state boundary lines, makes him a national figure and gives to his proposed memorial nation-wide interest.

From the earliest days the fur trade has been an important factor in American history. During the long series of Colonial wars England and France wrestled for the control of the interior of the North American continent because it was a vast reservoir of valuable furs. The fur trade was one of the contributing factors which brought about the American Revolution and later the contest between British and Americans to determine who would control the fur trade, was again a factor in embroiling the two countries in the troubles which resulted in the War of 1812. In the period of national expansion which followed this war men still thought in terms of beaver, but by this time their eyes were turned to the vast expanse of the trans-Mississippi west. Especially was this true in St. Louis which stood at the gateway to this virgin wilderness and which had been the jumping off place for the Lewis and Clark expedition and for several fur-trading expeditions, such as those headed by Manuel Lisa and Maj. Andrew Henry, who as early as 1809 had trapped the northern Rocky Mountain streams. Fur packs valued at from ten thousand dollars to fifteen thousand dollars had been brought back to St. Louis by various individual trappers and traders and it was plain to see that great opportunities awaited those who went into the business on a large scale.

So with the time ripe, the man with the imagination and business acumen to seize the opportunity was on the scene. On March 20, 1822, the following history-making notice appeared in the Missouri Republican, a St. Louis newspaper:

"To enterprising young men: the subscriber wishes to engage one hundred young men to ascend the Missouri river to the source, there to be employed for one, two or three years. For particulars enquire of Maj. Andrew Henry, near the lead mines in the county of Washington, who will accompany and command the party; or of the subscriber near St. Louis.

Signed, WILLIAM H. ASHLEY.

So the Ashley-Henry company or the Rocky Mountain Fur company, as the organization was later to be called, came into existence and brought into the limelight among its 100 "enterprising young men" such names as James Bridger, Etienne Provot, Thomas Fitzpatrick, Milton Sublette, William L. Sublette, James Beckwourth, Edward Rose, Louis Vasquez, Jedediah S. Smith, David E. Jackson and Hugh Glass. There you have a veritable Who's Who of the Missouri fur-trading nobilities, the "long-haired mountain men immortalized by the brush of Frederic Remington and the pen of John G. Neihardt!

On April 15, 1822, the expedition embarked at St. Louis on keel boats which were to ascend the Missouri to the three forks in Montana, trip the streams on both sides of the Rockies, perhaps penetrate to the mouth of the Columbia river, and return before the expiration of the three-year contract with the men. The expedition was commanded by Major Henry but the adventurous Ashley accompanied it. After a series of adventures with treacherous and fickle Indians and with the even more treacherous river whose floating snags wrecked one boat and caused a loss of $10,000 worth of merchandise, the expedition reached the mouth of the Yellowstone river and decided to halt there for the season. Leaving Henry in charge, Ashley returned by canoe to St. Louis to recruit another trapping party and obtain supplies for the trading activities of the next three years.

So important was this company that to write a history of the fur trade without mentioning it would be another example of playing Hamlet without the melancholy Dane. It was Ashley who established the now famous institution of the trapper's summer rendezvous as a means of conducting the fur trade. The summer rendezvous was an annual gathering of trappers and Indians where took place not only those affairs of barter but also Homeric scenes of drinking, carousing, fighting and primitive love-making between white men and red maidens—the sum stuff of which Nellardt has made such a fine epic. The personality of Ashley was so indelibly stamped upon the fur trade of that period that after a time the "Ashley Beaver" became a trade mark of the best brand of beaver fur.

It is Ashley, the explorer and patron of other explorers, however, rather than Ashley, the fur trader, who is most entitled to a national memorial. This is because he was the leader of the first overland expedition to the Pacific coast by a different route to that followed in general by Lewis and Clark. According to Harrison Clifford Dale of the University of Wyoming, who became a large land owner by the purchase of a tract of 80,000 acres (an old French land issuance which varied widely, according to the locality), an area ten miles long and six miles wide. This was the famous "Chouteau-Lamine" claim, given originally by the Osage Indians in 1792 to Maj. Pierre Chouteau, a brother of Auguste Chouteau, one of the founders of St. Louis. Chouteau's title was confirmed by the Spanish lieutenant-governor of Upper Louisiana, Charles DeHault Delassus, in 1799, but when this country came under the flag of the United States by the Louisiana purchase, there was some dispute as to whether or not the new rulers would recognize the title. Ashley was then a member of congress and through his efforts the title was confirmed by an act of congress on July 4, 1836. Chouteau later sold the entire tract to Ashley for $1.25 an acre.

Ashley made his home on this grant on a high bluff overlooking the Missouri and Lamine rivers, surrounded by a number of Indian mounds. He was married three times but at the time of his death in 1838 he left no descendants. According to tradition, when he felt that death was near, he walked along the river bluffs looking for a site for his last resting place. His selection was the top of one of the Indian mounds in a bend of the river, overlooking the wide sweep of the Missouri, against whose muddy stream he had set forth upon his "magnificent adventures" and down which had come the boatloads of furs to bring him his vast fortune. There he was buried.

Although the school histories have neglected him, Ashley's deeds have been recorded in Capt. Hiram Chittenden's monumental "History of the American Fur Trade of the Far West," in Professor Dale's scholarly study, in J. Cecil Alter's fine biography, "James Bridger," in Nelhardt's poems and in the writings of that appreciative historian of the Old West, Emerson Hough. Missouri now proposes to erect in his honor a more enduring memorial than the printed page and it is a project in which all Americans can have a sympathetic interest.

Would Bar Children From Seeing "Movies"

Or stimulants to the emotions neither pictures are one of the most violent known to the modern world, according to the French psychiatrist, Doctor Toulouse. In the course of long researches he has studied the reaction on the breathing and on the blood circulation of healthy adults during the projection of various sorts of films. From his findings Doctor Toulouse draws attention to the dangers presented to the health, particularly of children, by films which are too exciting. A report issued by a Japanese physical culture and health committee is much commented on here, as it sets forth even more forcible conclusions. Children up to twelve years, says the report, are extremely fatigued after only a few minutes of watching a film. The fatigue is not so marked in comedies as in big dramatic films and reaches its maximum when there is musical accompaniment. Hence it is advised that no children under thirteen should be allowed to attend the movies.

Peculiar Rocks

A series of sandstone cliffs, 200 feet high, stretching along the shore of Lake Superior for about five miles, are given the name "Pictured Rocks." They are about 45 miles east of Marquette.

Art in America

Art-mad America can be said to have three main divisions; those who write poetry; those who practice on the saxophone, and those who plan to go into the movies.—Genevieve Taggart, in the Century.

If It Could Be Harnessed

The enormous energy stored in the winds of the world could run all the factories in the United States for more than 400 years.

A BATH TUB that tests automobiles

S-P-L-A-S-H through the bath tub goes the General Motors car. Out onto the slippery road it dashes. On go the brakes!

What is the reason for such torture of an innocent automobile?

The answer is that the engineers at the General Motors Proving Ground take nothing for granted. They want to know what happens when a car ploughs through water. They insist too on measuring, with special machines which they have built, just how quickly the car can be stopped and just how much pressure of the foot is required to stop it.

Altogether General Motors has 136 different tests by which cars are proved as they never have been proved before; nothing is left in doubt. All of which means that you are buying doubly assured safety, reliability and comfort when you choose a General Motors car.

Recognition of Human Element Highly Important Factor in Industry

By F. V. LARKIN, Lehigh University.

WITHIN the last few years there has been a decided movement on the part of big industries to enrich the social, educational and spiritual lives of the working man and his family. Laborers in the steel industry, for instance, now receive advantages of playgrounds, schools, clubs, medical care, gardens and other activities provided by the heads of this vast industry.

It has taken the steel industry about twenty-five years to evolve this program. In that time production has increased 300 per cent, average wages 250 per cent, productivity for each worker about 150 per cent, and the number of wage earners 167 per cent.

On the other hand, strikes and lockouts have decreased from seventy-two in 1916 to seven in 1925, accidents have decreased 50 per cent, and there are fewer hours of labor than twenty-five years ago. A forty-four-hour week is now the standard toward which the industry is striving.

The industrial heads also have profited by this humanitarian movement. Dividends consistently have shown an increase year after year, and now special dividends are not at all uncommon.

Economists, politicians and religious leaders have claimed the credit for this advancement in recognition of human welfare, but the fact remains engineering research, with its scientific, accurate, painstaking analysis and experiments, must, in the end, be credited with having laid the foundation stones of personnel administration within the steel industry four years before enactment of the first workmen's compensation law. Engineers have learned to apply scientific management to men, and the result has been a success.

Wealthy Parents Too Prone to Spoil Their Children by "Coddling"

By DR. JOSEPH COLLINS, Author.

Why is it that America is the only country in the world where good blood peters out in one or two generations? Why, today, in the United States do our mental equipment and emotional endowment compare unfavorably with that of our parents or grandparents?

The answer is that the past generation brought its children up better spiritually and materially than we do now.

There is only one way to keep a line of good blood good and that is to provide the adolescent offspring with cares and responsibilities. On the other hand, the most effective way to destroy good blood is to wrap the budding emotional offspring in the cotton wool of paternal-overobleitude.

One of the reasons this country had a Washington and a Lee, an Emerson and a Thoreau, a Poe and a Whitman, a Vanderbilt and a Vail, is that they were not brought up in hothouses—they were not swaddled in silks and furs. They were not rushed to the mountains or the sea when the sun grew hot, or to Florida when the days grew cold. They were allowed to meet the hazards of life, and made to rely in a measure on their own invention to surmount them.

But today we solve them for our children, and then we wonder or weep when our children cannot solve those problems which present themselves after they have flown from the nest, or are making ready to fly.

Remember that parental love of the wrong kind kills off many a potential man.

School System Fails in Not Providing for Equality of Opportunity

By J. C. WRIGHT, Director Vocational Education Board.

Equality of opportunity in the educational system in this country is not afforded the mass of children, especially the large group that finds it necessary to leave school for economic reasons before completing the entire course.

A study has revealed that of every hundred children entering the first five elementary grades, only eighty-three reach the sixth grade, seventy-one the seventh grade and sixty-three the eighth grade. Of this original number, only thirteen finally graduate from high school.

Only seven of the original hundred enter colleges and universities, not including normal schools and teachers' colleges, and of these seven only five reach the second year, 3.9 the third year, three the fourth year, and 2.3 finally graduate from college. This is declared to be 6.8 per cent of those entering high school and 33.2 per cent of those entering college.

And yet the major objective of the elementary grades has been to meet the entrance demands to high school, and that of the high schools to meet the entrance demands to colleges and universities.

An educational system which provides the same course of study, the same subject matter, the same objectives and the same school atmosphere for a group of 100 children, of which but 2.3 carry through to the end is unfair to the other 97.7 pupils, and it is evident that equality of opportunity in our present system of education is not afforded to the mass of our children.

Colleges Must Have Better Knowledge of the Needs of Modern Youth

By DR. HERBERT E. HAWKES, Dean of Columbia College.

Colleges today must learn to understand the "jazz age" before they can provide a useful education to the present generation. Unlike Dean Gauss of Princeton, who was quoted recently as saying the salvation of the modern college lay in a return to "scholastic seclusion," I contend that with the campus of Columbia fronting on Broadway there can be no seclusion for this institution, and that seclusion is not necessary.

An appeal to a student's ambition is a better thing than a seclusion from temptation. A man has got to grow up. He may as well grow up in college.

Some colleges have lost a definite aim. There is no motivation for good work. The aim is merely to turn out a type of man. They maintain a narrow, traditional appeal.

The day is past when a teacher can read the same notes to a docile class year after year. If the teacher does not have life enough to progress or recognize that his subject is alive and developing, his students will certainly take the initiative in making progress along some other and more vital course.

The fact that students' interests are up-to-date, be they jazz or philosophy, is mental independence rather than "flubbiness." The colleges are all doing their best to provide a useful education for our youth. But until they better know the youth whom they are trying to serve, their efforts must often be poorly directed.

PRESS COMMENT

The Primary—"What," asks a paragrapher in one of our exchanges, "has become of the old fashioned politician who seemed to care for political principle?" The old fashioned politician who put principle above personality is not extinct. His number is still legion, but he is temporarily "in a corner" so to speak. And the country has suffered from the fact that he has been compelled to take to his corner.

The time was, not so many years ago, when political principles were the guiding star of nearly every man who ran for office. But that was in the day when there was party responsibility. The shift from the delegate to the primary system has brought about the changed condition—personality has taken the place of principle in far too many elections. The ambitious candidate, responsible not to his party, but to the minority of the voters who nominated him in a light primary, and that minority, perhaps made up in part of the voters of the opposition party, is in reality responsible to nothing but his own conscience, if any, or of his own personal ambition.

The temptation therefore to disregard party principles and to play to what he regards as the will of the organized minority which supports him, is often too great to be overcome. As a result of this party lines become disorganized and constructive programs of party government are made very difficult to accomplish.

And the far-seeing citizen, politician or not, sits in the corner realizing what has happened but unable to do anything about it. And until we greatly modify or get rid of our primary system entirely there will be little chance for improvement.

Courtesy—Our idea of the best every day example of courtesy and controlled feelings is the average telephone girl. When one watches the busy fingers of one of these girls as she makes and breaks connections he wonders how on earth she can keep up with it and make no more mistakes than she does. Often mistakes are due to the party calling, but few people like to admit they make mistakes, if they can lay the blame on someone else, so it is easy to say something mean to a girl at central—over the wire, of course. Often a girl would be justified in saying some sharp things to one of these irate gents, but she is supposed to keep her temper and be polite to one and all. It would be very difficult to find a man who under similar circumstances, would be half as efficient or even-tempered.—Gilbert, Minn., Herald.

THE THEATRE

"Tell It To The Marines"—Filming a typhoon, most terrible of tropic storms, was a huge achievement carried out in the screen's latest spectacle, "Tell It To The Marines," Metro-Goldwyn-Mayer's epic of the Marine Corps at the Palace Theatre Saturday and Sunday.

A terrific tropical storm, with wind approaching tornado proportions and rain in cloudbursts, was filmed in the midst of a tropical jungle, in which with dogged determination, the Marine Corps pitched its camp in one of the most vivid scenes ever photographed.

The picture was filmed with the sanction and co-operation of the Government, the actors accompanying the Marines on battleships in fleet maneuvers, in action in the field, and in a gigantic sham battle, staged partly for the picture and partly as a practice maneuver, in which the Marines capture a Chinese village from bandits and rescue a mission.

Lon Chaney plays a veteran sergeant in the new picture, with William Haines in the leading romantic male role as a recruit in the service and Eleanor Boardman as the heroine.

While the background is the Marine Corps in service and the government assisted in the production, the picture is not a propaganda picture, but a vivid romance designed for entertainment only. Like "The Big Parade," it seeks to show the intimate life of a branch of the government service in terms of entertainment bringing out the romance and adventure of "The soldiers of the sea."

"30 Below Zero"—According to pretty Eva Novak, who plays the feminine lead in "30 Below Zero," Fox Films thriller of the North, starring Buck Jones, which will show at the Majestic Theatre, Saturday and Sunday, she never feels at least uneasy when doing the most difficult stunts with Buck.

"You see, it all depends upon the man you are working with," Miss Novak explained to Director Robert P. Kerr. "I have been with actors who proved, the moment they called into a scene, that they did not know how to handle themselves in an emergency. I was always afraid in cases like that.

"But Buck is different. He's so dependable. His strength seems to go out to one. He seems to anticipate just a thrilling chase on a horse, or hanging over the edge of a plane, and I always feel safe the moment he gets his hands on me. Once I worked with him in a chase and he scooped me off the ground when other horsemen were trampling all around. After this I always felt very much at Buck.

In "30 Below Zero" Miss Novak is the daughter of a trading post owner, who finds the two New Yorkers when they take a spill out of a monster airplane and land in front of her dog team.

Idleness Has Value

Certainly work is not always required of a man. There is such a thing as a sacred idleness—the cultivation of which is now fearfully neglected.—G. Macdonald.

Local and Personal Mention

Mrs. Ira A. Adams was a visitor in Traverse City Tuesday and Wednesday.

Isaac Gilbert of Detroit, spent the early part of this week with friends here.

Mrs. Guy Eidenheimer, and son, Guy Jr., of Chicago, are here for the summer.

Miss Ruth Turpin spent last week in this city visiting her sister, Miss Mabel Turpin.

Attorney J. M. Harris of Boyne City, spent Monday evening with friends in Charlevoix.

Mrs. C. L. Judd, who have been visiting relatives for ten days, returned to Saginaw Sunday.

Miss Mable Turpin returned to the city Tuesday morning after spending the Fourth in Manistique.

Attorney C. C. Coultier of Detroit, spent the early part of the week with Charlevoix relatives, leaving for Detroit Tuesday.

Mr. and Mrs. W. B. Jenkins of Harbor Springs, spent Monday here with their daughter, Mrs. R. O. Cram, and family.

R. F. Sloan Sr. came up from Muskegon Saturday and spent several days at his office here attending to business interests.

Miss Helen Campbell of Jackson, is spending the summer with her two grandmothers, Mrs. P. D. Campbell and Mrs. John Cook.

Harry Marshall and Lee Allard motored to Niles Tuesday, and expect to continue their trip to Detroit before making their return home.

Theodore Erickson, formerly a Charlevoix resident, came up from Holland last Saturday and spent several days here with friends.

A. A. (Burt) Wilbur spent the week-end with his parents, Captain and Mrs. O. E. Wilbur, and motored back to Chicago early this week.

Mrs. Frank A. Kenyon returned to Mackinac Island last Tuesday after spending about three weeks here attending to business interests.

Wilbur A. Cline spent the early part of of the week with his family at the home of Captain and Mrs. O. E. Wilbur, returning to Chicago Tuesday evening.

Mr. and Mrs. Phil Beaudain, former residents of Charlevoix, now and for some years past living at Gloucester, Mass. accompanied by their son Clyde, arrived here Wednesday of last week to spend a month with relatives and friends.

Married—Friday evening, at 6 o'clock, at the Baptist parsonage, in this city, by the Rev. Herman Burns, Clarence E. Feltenberger, of Antrim county, to Miss Katheryn McClanahan, daughter of Mr. and Mrs Henry McClanahan, of Charlevoix.

Mr. and Mrs. Charles C. Mavis and son, Ira, of Snoven, Mich., are spending a two weeks vacation here, guests of Mr. and Mrs. Gordan S. Parker, 819 State street

Robert Luedke drove from Glenellen, Ill., to Charlevoix last Saturday, and the following day went to St. James where he is spending the week with relatives.

Mr. and Mrs. Rudolph Pick and son, Dolph, motored up from Glenellen, Ill., early this week, spent the Fourth with relatives here and returned to their home Tuesday.

Grant Squires, now engaged in business at Dansville, formerly with the P. M. Railroad here as manager of the freight department, was visiting friends for several days here recently.

Mr. and Mrs. A. F. LaChance and family and Mr. and Mrs. Thomas Hoffman motored up from Chicago and spent independence day with Captain and Mrs. John N. Chambers.

Mr. and Mrs. John Kendall and two sons, Larry and Jimmie, and Mrs. Fred Perry, returned to Detroit Monday after spending a week or two here, guests of Mr. and Mrs. R. O. Cram.

Mr. and Mrs. E. Reynall, the latter a sister of Mrs. Chas. E. Sterrett, are spending this week at the Sterrett home. They motored from their home, Royal Oak, during the letter part of this week.

Mr. and Mrs. Baron Callen and son "Bill" of Columbus, Ohio, motored in last Saturday and will spend the summer here. Mr. Callen is getting his studio reconditioned and will have the same opened within the next few days.

The new Lyric Theatre at Harbor Springs was opened to the public for the first movie show last Saturday night, and the claim put forth by the owner and the public, places the new show house in the highest class of like buildings in this region.

The Charlevoix State Savings Bank, as shown by its financial statement published in this issue of the Sentinel, passes into the honor class of Michigan State banks. This classification is attained by state banks having a surplus equal to or greater than its capital stock, and the statement published as of June 30, shows that this local financial institution has a position in the class designated, with a few other Michigan State banks. It also shows that the bank is financially strong and that the men in charge of its affairs are progressive, substantial, conservative; such as are capable of handling financial matters safely for the bank, and with absolute responsibility and protection to depositors.

Winter sports, the development of which is of prime importance to Charlevoix and this entire northern region, has been under advisement and study for months past by local citizens, and some progress has been made in furthering the project. At the same time other towns and cities in near by territory are actively engaged and preparing a winter program such as will attract persons from a distance to take part in and enjoy the winter sports in conjunction with local citizens. With this in view, a regional meeting of winter sports enthusiasts has has been called and will be held in Petoskey with headquarters at the Cushman House, Monday, July 11, at ten o'clock a. m. An invitation is extended to everyone interested to attend this meeting.

The withdrawal of financial support for some years past, extended by the State Health department for Beaver Island residents, is the cause of annoyance to St. James citizens and the Island inhabitants generally. Unless the decision of the department is reversed the Beaver Island group will be left without a physician to administer their needs, leaving them in the same position relative to medical attendance as they were before the state administration extended aid. Dr. R. E. Palmer has been the resident physician at St. James for a term of years, but withdrawal of state aid will probably cause the doctor to abandon St. James, discontinue the work on the Island and seek a new location in which to continue his professional service.

Saturday and Sunday proved to be disastrous days for automobile owners and drivers with five machines placed in the discard or more or less demolished, due to collisions. One head on, one side swiped and one taking a ditch in order to avoid a head on collision with another heavy high powered car, both moving rapidly, with the machine taking the ditch it also took a header, rolling over endwise and finishing the flight a badly demolished car. Two or three persons escaped with several cuts and bruises while one was less fortunate sustaining severe injuries, the extent of which has not been fully decided. One of the accidents took place on Dixon avenue, one at the intersection of State and Clinton streets and one several miles south of Charlevoix on M 11.

The new Palace Theatre at Harbor Springs was opened to the public for the first movie show last Saturday night, and the claim put forth by the owner and the public, places the new show house in the highest class of like buildings in this region.

New Palace Theatre

ATTRACTIONS FOR THE WEEK

Saturday and Sunday, July 9-10

A super-special—Lon Chaney in "Tell It To The Marines." Broadway's great $2.00 Central Theatre sensation, with Eleanor Boardman, William Haines, Carmel Meyers. Here at last, the true story of the Marines! The glorious film epic of the "Devil Dogs" is here, immortalizing the most colorful body of fighters in the history of the world. The story of a boy who finds himself in the Marines after a series of hilarious mishaps, and of his amazing adventures in love and action after that. A never-to-be-forgotten picture of the humors and pranks and perils of the hard-boiled leathernecks, with Lon Chaney in the greatest role of his career. *Made with the co-operation and indorsement of the United States Marine Corps.* Extra—A Fox Animal Comedy, "Lyon Tamer." Special prices—Adults 50c, children 25c.

Monday and Tuesday, July 11-12

"Rubber Heels." Ed Wynn, America's leading stage comedian in a big stage success, supported by an all-star cast of film favorites. Extra—An Educational Comedy, "High Sea Blues."

Wednesday and Thursday, July 13-14

"Ten Modern Commandments," with Esther Ralston, the blonde goddess, in a startling expose of the modern flapper's love code. Added Attraction—Hodge Podge and Fox News.

Friday, July 15

Raymond Griffith in "Time to Love." A breezy love-comedy written especially for him by the author of "The Grand Duchess and the Waiter." Extra—Educational Comedy, "Here Comes Precious."

Coming—John Gilbert in "Twelve Miles Out."
Coming—Thomas Meighan in "Blind Alleys."
Miss Helen Strohm of Kansas City, Mo., at the Pipe Organ.

MAJESTIC THEATRE

Saturday and Sunday, July 9-10

Buck Jones in "30 Below Zero." Buck Jones rides the winds of adventure in a gale of laughter and a storm of thrills. Extra—Educational Comedy "Funny Face."

THE PARK AVENUE CLUB

On the Bluff Overlooking Lake Michigan

No. 209 PARK AVENUE

Dinners and Luncheons *Meals by Day or Week*
Special Attention to Steak Dinners

MRS. E. REINHOLD, Manager

Essex Coach Wrecked Wednesday Afternoon

Either through extreme carelessness or direct intention, the driver of a truck forced the driver of an Essex coach off the road a few miles south of this city on Wednesday afternoon, in which the lives of the two occupants of the Essex machine were endangered. Fortunately both escaped injury, but the machine in which they were riding was demolished and now a total wreck and loss to the owner. Nor did the driver of the truck stop his machine to render assistance to the unfortunate parties, but deliberately continued his way from the scene as speedily as possible, utterly without regard of the damage inflicted or as to whether or not the parties in the wrecked machine were seriously injured or killed outright. That they were not killed was but little short of miraculous. The wrecked car was loaded on a truck and brought back to this city. This morning the two men continued their trip in another machine.

On the Square

People who sit in the grandstand or stand near a race track in any position other than directly opposite the judges' box should not criticise the decisions of the judges in close races, because they cannot obtain a proper view of the horses as they cross the finishing line, says Science and Invention Magazine. The judges are so placed that they can view the horses nearly in line as they finish, whereas spectators on either side of the finish line get but a misleading pictorial impression of the race perspective.

If, for instance, two horses finish neck and neck, people watching them from a point ahead of them will think the horse nearest the rolling has won. From other hand, spectators viewing the horses from the rear are likely to swear that the one furthest from the rail is in the lead. Only the judges can determine a winner accurately if the race is very close at the end.

Relieved His Feelings

"Had a good lecture on Alaska, didn't we, Zeb?" asked one of Mr. Dotson's neighbors, meeting him the next morning. "To sit there by the radio powerful an pie for two hours bearing him read off the information was a grand rest for me, 'cept out with cramps an' I be."

"It was a good enough talk," admitted Mr. Gorton, grudgingly, "but it didn't rest me any to speak of. Having to sit stock still without a chance to get in a word for two mortal hours, I was pretty well worn out afterward. But I took the lantern out in the woodshed and by the time I'd split up a week's kindling I felt kind of rested and calmed down."—Kansas City Star.

Electricity to the Rescue

Visitors to the cathedral of Milan never fail to admire the beautiful reddish Arzo marble decorations of the Baptistery chapel. This famous marble was beginning to run short a year or two ago, although the demand for it is always growing.

The director of the quarries persuaded the engineers to supply him with electricity from the water-power of Tessin, close by, and electric saws now slit the marble into much finer pieces than could be made by the handsaws worked by the quarrymen. The result is that facings with the Arzo marble are actually cheaper than before, and a trade centuries old has been saved.

Skeleton in Salt Found

A lidless coffin filled with salt and containing a human skeleton was found recently by a farm hand on the shore of the Black Isle opposite Dingwall, Scotland. Appearances indicate that the drift of the tide had uncovered the gruesome objects only a short time before. There is a tradition in that vicinity of burials outside of the churchyard in olden times, and it is believed by the police that the find is the remains of one of them.

"Lightless" Tail Light

For the protection of vehicles on the public highways against rear-end collisions with automobiles, a unique tail light has been perfected. This light, it seems, does not require oil flame or electricity and is always ready for service. Numerous accidents occur on account of tail lights being extinguished from various causes, but with the "lightless light" attached to the rear of wagon, carriage or other vehicle, this ingenious little mechanism gives forth a bright red light when the rays from an oncoming headlight strike its focal surface and the driver is warned of the presence of the vehicle ahead.

BEAVER ISLAND

John M. McCauley is here from Chicago on a visit.

Mrs. W. A. Schied and family, of Chicago, are at their cottage for the summer.

Mrs. Annie O'Rogers and son, of Chicago, are the guests of Mrs. J. B. Mallory.

Mr. and Mrs. Fred Zalusky and daughter, of Ludington, are visiting Mrs. Zalusky's parents, Mrs. W. J. Gallagher.

Harry W. Bundy and two daughters, his brother and two sisters, have returned to Detroit after spending several days at the Bundy cottage.

Dr. and Mrs. Charles E. McCann and daughter, of Grayling, spent the Fourth at St. James with the Doctor's parents, Captain and Mrs. John McCann.

The ball game July 4th, between the Maple Block company of Petoskey and the Beaver Island team, was won by the former by one score.

Charlevoix, Harbor Springs and Petoskey were well represented in St. James July 4th, making the trip on the Steamer James E. Sanford, America and some smaller ship.

How to Torture Tourist

The Maid—Yes, sir, your suitcase looked so untidy with all those old labels on it from Japan and America and Egypt and Africa that I thought I'd clean them all off.—The Passing Show.

Fourteen acres sweet clover at Cemetery corner for sale.—Ralph Washburn.

Bury Child's Clothing to Be Rid of "Spirit"

It has taken half a century for peace officers in the hard-coal fields to learn what motive inspires those who bury the clothing of children. This practice in the anthracite districts has mystified state police, as well as officers of the cities, boroughs and townships. Often wild goose chases after murderers have resulted only in the discovery of clothing, but with no body thereto. Sometimes the bundles have been buried deep and have been uncovered through the settlement of the mines or by the caving of the sides of breaches in the workings.

Ever since the collapse of the 1875-76 strike, which saw the English, Welsh, Scotch, Irish and German miners gradually displaced by Slavs, Poles, Russians, Italian and Mongo negrina, who now predominate in the collieries, these murder scares have occurred in the hard-coal fields until now the hurry-up call from some person who tells of the discovery by boys of a bundle of clothing usually is discounted by the officers.

Some one last winter took it upon himself to delve into the mystery, and his inquiry into the practice has revealed that the burial of children's clothing is an overseas custom, used by the peasantry where youngsters are subject to convulsions. The old idea that a child is "possessed" still prevails in some families, with the belief that to bury the entire clothing outfit of a little boy or girl will mean that the spirit goes along with the garments and is buried with them.

This discovery adds another quaint idea to coal region customs. The oddest one is that related by Dr. Mallory in the treatment of hernia. The belief prevails in certain quarters that hernia can be cured by a rupture. A treatment is followed in the spring. A tree in the woods is found that shows signs of the sap starting to flow after the winter period of inertness.

It is here that a split and a binding is placed across the gash, the bindings being clothing of the person who suffers from the hernia. The belief is that as the new growth bridges the cut the muscles of the abdomen of the sufferer grow together and the rupture is cured.

Surprised Mother

Kelvern Krause is a ten-year-old boy who attends school. At a parent-teacher association meeting the other day the statement was made by a speaker that at least 30 per cent of the 70 per cent of the pupils asserted they would keep the money if a street car conductor failed to relieve them of their fare.

When his mother arrived home from attending this meeting she put the question to him as to what he would do if the street car conductor failed to take his fare. He knew nothing of what had been said at the meeting. His reply was that he would give the conductor his fare.

The mother said to him in a somewhat surprised tone: "You would? Why?"

"Don't you think it takes money to make the electricity that runs those cars?" was the retort.—Indianapolis News.

Boys' Educational Tours

Boys in parts of Australia have been touring their country in an educational campaign that has been declared a success. They are members of the Young Australian league, which was organized to develop the youths of Australia. One party of 300 from west Australia has just completed a trip to Adelaide and Melbourne, and another composed of 270 from Sydney and 180 from Queensland toured Canberra, Geelong, Ballarat and Melbourne. The special trains carrying the lads arrived in Sydney at the same time, and the travelers headed by a twelve-year-old drum major marched to the town hall to be welcomed by the mayor, partake of a dinner and listen to an organ concert. Similar entertainments were given in other cities. The government paid the trans portation costs.

Our Hero

A statue is soon to be unveiled in France to the man who invented Camembert cheese. It brings up the question whether we in this country also should not honor the discoverers of our famed native viands with permanent memorials. The genius, man or woman, who compounded the first flapjack surely deserves as well of us as if he had won a battle. The one who created country sausage benefited the country. And the discoverer of New England pie will never have his due until that whole region is crowned by an image of him on the summit of Mount Washington, done in some everlasting native material, such as granite or unshortened crust.—Detroit News.

Wolf's Killers Rewarded

Frequently the visitor to one of the Indian mountain villages may see a strange procession. On a cart, drawn by a tiny donkey, is the carcass of a magnificent gray wolf, twice as large as an ordinary police dog. Tacked to the cart is a placard, indited in lyrical language: "What will you give as recompense to the brave huntsmen who, facing the terrors of night and the rigors of the elements, risked their lives to deliver you from the wolf that has been preying upon your sheep?" Beside the cart march the brave huntsmen, hat in hand. They receive the emotional congratulations of the townsfolk—and many good round "solidi."—Chicago Daily News.

Purely American Bird

The humming bird is found only on the American continent. It is closely allied to the swift, and there are several hundred species native from Labrador to Patagonia. The humming bird does not exactly move backward, but by the use of the pectoral muscles of the wing beats the air with a rapidity which enables the bird to remain stationary and to make such darting movements that apparently the flight may be backward.

CHURCHES

Baptist Church

Rev. Herman Burns, D. D.
—) Pastor (—

Rev. E. G. Leisman of Gaylord will be the speaker at 10:30 Sunday morning. Bible school will meet at noon, B. Y. P. U. will meet at 6:30 and 7:30 p. m. Bro. Newton H. Carman, of Lombard College, will lecture to a Union congregation on China. Mr. Carman has spent several years in research work in China and will explain many of the causes of the present civil strife in that country. Try to hear him.

The services last Sunday were greatly enjoyed. The solo by Miss Edna Carey was a message in melody, and "One Sweetly Solemn Thought" as rendered by Mr. Chenk of Flint, will be loved in memory for a long time. We are grateful for the brief vacation that brought them to us. The impromptu address of Mr. Lee Wilson of Ripley, Penn., did us good.

A cordial invitation to all to worship with us.

Congregational Church

Rev. R.G. Mattson, D.D., Minister

The morning service at 10:30 will observe the Midsummer Communion to which all our members and all friends and visitors of our own or other christian fellowship are cordially invited. Dr. Mattson will preach a sermon entitled "There is a River."

For Sunday evening we will unite with the Baptist church at their place of worship to hear a stereopticon lecture on China by Prof. Carman of Lombard college.

Sunday school at 9:30.
Services at Ironton Sunday at 2:30.

Methodist Church.

C. E. Pollock, Pastor.

"The Great Relief," sermon subject at 10:30 a.m. next Sunday. The pastor will preach.

President John L. Seaton, Ph.D., of Albion College, who preaches at Bay View Assembly next Sunday morning, will speak next Sunday evening at 7:30 in the local M. E. church. This will be an opportunity for Charlevoix people and their guests to hear this popular educator and religious leader. It is expected that he will also speak in the Epworth League service at 6:30. The public is invited.

Keep July 20 open for a great musical event at the church.

Church school is held at 9:30 a.m. each Sunday during the summer.

Midweek prayer each Thursday evening at 8 p.m. at the church.

Young Peoples prayer service each Tuesday evening at 8 p.m., followed by a social hour.

Church of God

Sunday services at 10:30 a. m. and 7:30 p. m.

Young peoples' meeting at 6:30.

Prayer meeting Wednesday at 7:30 p. m., Byron Chew, leader.

We are glad to see the young people taking a more active part and hope they will increase more and more.

Next Sunday, July 10th, is the day set for the election of a trustee to fill vacancy caused by Bro. Knox moving out of town.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "Sacrament."
Sunday School 12 o'clock.
Wednesday evening service 7:45.
Reading room, Tuesdays and Saturdays, 3 to 5 p. m.

The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church

Sundays 6:00 a. m., and 9:00 a. m.
Saturdays and Mondays mass at 7:00 o'clock a. m.

Rev. Fr. Odelo.

Named From Bird

Halcyon days means a calm peaceful time. Halcyon is the ancient Greek name for the kingfisher. This bird was reputed to build its nest upon the sea, and lay and hatch its eggs during 14 days, about December 21. The sea was said to be calm during this period. They were halcy

Codfish Livers Rival Sun Rays

Scientists Point Benefits to Be Derived From Use of Sea Food.

Philadelphia.—Shades of Apollo and Izaak Walton! Here is science claiming that the only rival of the sun is found in "a poor fish."

We know that Sir Walter Scott sang once to the effect that "It's no' the ye're leaping—it's sun's lives." We remember also the lines of an old Scotch song, a fishmonger's cut in which a similar prophetic note was sounded. "Wha'll buy my caller herrin'?" the cry runs. "Ye little ken their worth."

"O, you may call them vulgar farin'; Wives and nithers maist despairin' Ca' them lives of men."

One hundred years after these words rang out in the chill, foggy air of Scottish markets, scientists step from their laboratories long enough to tell us that, next to the sun, "desperate wives and mithers" must depend upon a fish to maintain the stalwart limbs and stout backbone of the nation's youths.

In those few remaining regions of the earth where clothes are incidental, if not negligible, where the sun is given its chance to feed the bodies of men, we find, as a rule, that the natives of such Edens are straight as an arrow, well formed, strong, and happy. It is when we reach civilization that we encounter frequent deformities, bowed legs, gawky knees, bulging wrists and ankles.

Clothes Rob Man of Sun.

The fact that we free to the sun only the few square inches of our face and the backs of unglazed hands is a primary factor in the general tendency in this and other civilized countries toward rachitic conditions. The average infant is too much overclothed when lying in the sun to derive its full benefits. Sun porches are light, cheery, and warm; but unless their glass is of a special type none of the helpful ultra-violet rays of the sun make their way inside.

Without sufficient sunlight or without sufficient supply in another form of the factor that is conveyed by the sun's rays, our children develop rickets, that starvation of bone structures that leaves them soft and flexible, producing various forms of deformity, including soft teeth, misshapen skulls, jaws and skeletal structures, and even constricted chests.

The elements that give proper strength to bones and teeth are calcium and phosphorus. These two elements cannot be utilized in bone growth, however, unless a third factor is present, just as a pile of coal is useless without ignition to convert it into heat.

Like Bones Made of Rubber.

This factor is vitamin D. Without this vitamin, calcium phosphate cannot be deposited sufficiently in the bony structures of the body. Although bones keep right on growing, the unfortunate child to whom they belong might as well have a rubber skeleton if the vitamin deficiency is not corrected.

The action of the ultra-violet rays of the sun upon one of the fatty components of our skin produces vitamin D or, its physiological equivalent, according to researches conducted by Huldschinsky, Hess, Shipley, and other scientists.

Sunlight, then, is the natural protection against rickets.

But civilized man does not lead a natural life. Our mode of dressing and dwelling does not permit natural living. And it is not likely that we shall emulate the Polynesian soap by discarding our clothing for bared existence under a beneficent sun.

When it is known how important vitamin D is to life and health, it seems an odd prank of nature that this factor is absent in practically all foods used for human consumption except the liver of codfish. Probably nature felt that she was taking ample care of us by giving us sunlight. Then she permitted man to discover for himself how prodigally she provides for his welfare by storing this valuable factor in one of his commonest sources of food.

One Theory of Scientists.

Just how the cod manages to distinguish himself above all other animals of earth, sea and sky by monopolizing the storage of vitamin D is not clearly determined. One theory of scientists has it that the ultra-violet rays of the sun penetrate below the surface of the ocean and so irradiate the cod. This would presuppose that the cod's skin is especially sensitized to those rays as man's skin seems to be, just as if both cod and man were photographic negatives which, upon exposure to ultra-violet rays, produce a positive effect when developed in the chemistry of the body.

It is more likely, however, that the cod gets his sunlight by eating it. Study of the habits of the cod in Norwegian waters and in the waters off Newfoundland, Nova Scotia and Maine have strengthened this theory. F. F. Berg of the Squibb laboratories watched the early spring surge of thousands of cod to the shallower, warmer waters near the Lofoten islands, where they come to spawn.

At this period of a cod's life he develops a ravenous appetite. And it is what nature provides to satisfy that hunger that offers another theory in explanation of the fact that cod liver oil is the most prolific source of vitamin D known to man.

Piscatorial Drama.

This piscatorial drama is very much like the "house that Jack built." Great shoals of herring are loosed by nature into the waters near Norway and our northeastern coast just as the cod feels these pangs of hunger. So here is the cod that gives us vitamins. Here are the squid that are eaten by the herring that are eaten by the cod that gives us the vitamins. Here are the nouses and sea plants that are eaten by the squid that are eaten by the herring that are eaten by the cod that gives us vitamins.

Day after day, week upon week, the sun pours its rays down upon these sea plants. The squid themselves do little more than float around near the surface of the sea, absorbing still more ultra-violet rays. From that point on it is obvious how, theoretically, the codfish acquires his vast store of vitamin D by literally eating sunshine.

It has been only a few years since the existence of vitamin D was recognized. In fact, its identification came about through experiments by Prof. E. V. McCollum of Johns Hopkins university with cod-liver oil. From that moment, the medical profession armed with reinforced courage against the threat of rickets. The late Dr. Emmet Holt, at the time of his death, was stressing the importance of dependence of sound teeth in adult life upon building bones, blood and muscles in childhood.

Should Reduce Teeth Ills.

It is claimed that, if the perfect condition of bone, blood and muscle in ever-born children had been attained in the last century through sufficient vitamin D supply, dental statistics would not show that 98 per cent of the people of the United States have imperfect teeth. There would have been less excuse for rheumatism and heart and kidney troubles, which are, in fact, after-effects of some local infection.

Authorities are urging that the growing generation of children be granted the heritage that is their right under the sun. Plenty of sunlight is advocated, but, at best, the sun alone under modern living conditions does not assure sufficient vitamin D for a stout-limbed posterity.

Dr. Morris Fishbein, editor of the Journal of the American Medical Association, states in a recent article:

"One of the greatest discoveries of the last five years has been the establishing of the fact that cod-liver oil has specific properties in preventing the development of bone diseases of infancy and in aiding proper growth. Under the unfelgned encouragement of the medical profession, child welfare agencies have preached the doctrine of liberal administration of cod-liver oil in infancy." Doctor Fishbein's article also stated that the council on pharmacy and chemistry of the American Medical association agreed upon advising "routine administration of cod-liver oil to all growing infants provided the product had been standardized as to its actual potency."

Every Wharf Had Its Keg.

Long before we had knowledge of vitamin D, cod-liver oil was used. Coast dwellers and seafaring folk drank it in quantities as a means for withstanding the rigors of cold weather and as a tonic. Their method of extracting it was crude. Every wharf had its keg sitting in the sun, the barrel full of cod livers, the oil separating and rising to the top where it was skimmed off.

Modern methods of rendering oil include establishment of plants near enough to the fishing banks so that livers may be received fresh from the catch with a minimum of vitamin loss through exposure to the air.

From a modest position as a by-product of the fishing industry, the securing of livers for their oil is assuming an important and valuable major position. It is estimated that the world's output of cod-liver oil in 1925 was approximately 2,800,000 gallons, or 94,000 barrels of 30 gallons each. When it is known that it takes about six tons of codfish to yield enough liver to produce one barrel of cod-liver oil, some idea can be gathered of the gain that thousands of fishing families experience as a result of the lubsontary discovery of vitamin D.

More Vitamin A Than Milk.

While cod-liver oil is essential chiefly for its content of vitamin D, the fact that it is also a rich storehouse of vitamin A is by way of being a bonus that nature has thrown in for good measure. Vitamin A promotes growth and builds resistance against pulmonary infections, colds, pneumonia, tuberculosis, and the like. It is as essential as vitamin D, and the suspected absence of one or the other generally results fatally. Vitamin A, unlike vitamin D, is present in other foods, principally in butter from cows that have been fed on green food, in milk and cream, and in green vegetables such as spinach.

When it is known, however, that one pint of cod-liver oil is as rich in vitamin A as at least 1,200 pints of the best grade A milk, the greater concentration of the factor in oil becomes apparent.

Knowing that only two sources of the vital vitamin D exist, how truly we may say that a poor fish is entrusted to a position where it alone vies with the sun in the service that both render mankind. It is in this service that hundreds of thousands of men are risking their lives far better babies. With the promise of a sturdier race through ample access to the essential vitamin D, we may well sing along with Sir Walter Scott, "It's no' fish ye're buying; it's men's lives."

Can Do All but Act, So She Runs Shows

Hartford, Conn.—Miss Marion Tullar, one of the few American women who are professional stage managers, has a record many young women would envy.

She was on her way to success as an artist, but her desire to act interfered with her studies, so she turned to the stage. Then the war came and she became a Red Cross worker, in which capacity she won the Croix de Guerre and other decorations. After her war experience she says:

"Acting was the one thing I just couldn't do, so I turned to stage managing."

What of It?

New York.—Twenty couples who have celebrated golden weddings seem to disagree with a statement that wrecking was unknown 50 years ago.

To Give Away Beams From White House

Washington.—Sections of timber from the White House roof probably will be scattered as relics to all parts of the country. Various organizations are writing in, asking pieces for use in making gavels.

The large beams are of long-leaf Georgia pine. Those unearthed in the southern are described as in excellent preservation. Mansions also have requested bits of the wood.

President Coolidge has given no instruction about what shall be done with the wood and mills talked from the old attic, but it is assumed that requests of museums will be granted and that permission may be given for turning some of the timber into gavels.

High Requisite for Marketing

Standardization Affords a Basis for Pooling of Various Products.

(Prepared by the United States Department of Agriculture.)

Standardization of farm products as a fundamental factor in successful marketing was stressed by Lloyd S. Tenny, chief of the bureau of agricultural economics, United States department of Agriculture, addressing the One-American Standardization conference at Washington.

"Standardization," Mr. Tenny said, "is the definite foundation on which rests most of the individual functions which make up the whole process of marketing. It is essential to the maintenance of the bureau's nationwide market news service; it is basic to the use of credit; it is the one safe basis for advertising.

Facilitates Settling Disputes.

Standardization facilitates the settling of disputes at between shippers and dealers; it is the only safe basis upon which equitable inspection services can be built at shipping points and markets; it is especially useful in co-operative marketing by affording a basis for pooling the products of various growers; it is a prime requisite in administering the United States warehouse act."

Mr. Tenny described the development of the bureau's standardization program since 1914 when a market news service and a number of standards was established. Standards for more than 50 different farm products have been established by the bureau and are in wide use, the cotton and wool standards being applied international-ally.

Certificate of Quality.

The grading of carcasses of beef at leading slaughter markets so that consumers may know what is practically a government certificate of quality stamped on commercial cuts, is the bureau's latest step in standardization. Prime and choice grades of beef are stamped by the bureau's inspectors, and though the system prove practicable it may be extended later to other grades of meat.

Delegates to the standardization congress visited the bureau's laboratories as an important and valuable major position. It is estimated that the world's output of cod-liver oil in 1925 was approximately 2,800,000 gallons, or 94,000 barrels of 30 gallons each. When it is known that it takes about six tons of codfish to yield enough liver to produce one barrel of cod-liver oil, some idea can be gathered of the gain that thousands of fishing families experience as a result of the lubsontary discovery of vitamin D.

Highest Feeding Value of Alfalfa When Cutting

According to Prof. C. J. Willard, of the dairy department of the college, claims that alfalfa is injured if the shoots at the base of the crowns are cut by the mower, have just proved.

He thinks that little attention should be paid to these shoots, and they have no need of cutting alfalfa high—use your mower close as it's industrially set.

The right time to cut, in Professor Willard's opinion, is when the field is from a tenth to one-fourth in bloom. "You can't have the best hay and the longest-dived field, he adds. "The man who wants the highest feeding value will cut somewhat earlier than one who is particularly interested in maintaining his original 5or 6 year period."

Agricultural Items

Sunshine should be mixed liberally with the ration for growing chicks.

* * *

Duck eggs are larger than hen eggs and a higher price may be obtained for them in a commercial market.

* * *

In the early days destroying the forests was a problem, now destroying the forests creates a problem.

* * *

Direct sunlight will help the hens to lay strong-shelled eggs as well as eggs with a high degree of fatebability.

* * *

Hogs require more minerals than horses or cattle or sheep, because they are fed largely on grains, because they make such rapid growth, and because they are confined and fed in dry lot and deprived of pasture.

* * *

Skim milk, next to pasture, is about the best feed known for pigs in a dry lot. Skim milk is high in protein and mineral matter; therefore it is fine to go along with corn, which is low in both protein and mineral matter.

* * *

The value of the pasture an average woodlot produces varies between 25 cents and $1.25 an acre. But if the woodland is not pastured and is otherwise well managed, it will produce a cord of wood a year, year after year; if it is pastured it cannot.

More than 1,000,000,000 tons of soil is carried into the sea every year.

A fog in the Atlantic ocean is generally about 20 miles in diameter.

Fifteen of the 96 members of the United States senate have women secretaries.

Tornadoes are more frequent in central and southeastern United States than in all the rest of the world.

Sprays Not Practical to Use on Perennial Weeds

Chemical sprays, because of the apparent ease of application, have for a long time attracted attention and aroused the interest of farmers as a control for weeds. Up to now, however, the cost of application, when in with a number of different arsenical compounds sprayed, has proved that they are practically useless against the root systems of perennial weeds. The cost of repeated spraying with the possible damage to the soil gives the disadvantage, or at least, to the mechanical means of weed eradiction.

Salt in large enough quantities will kill any weed, but owing to Mr. Rogers. It can be used profitably on small patches of a mille, the greater concentration of the factor in oil becomes apparent.

Knowing that only two sources of the vital vitamin D exist, how truly we may say that a poor fish is entrusted to a position where it alone vies with the sun in the service that both render mankind. It is in this service that hundreds of thousands of men are risking their lives far better babies. With the promise of a sturdier race through ample access to the essential vitamin D, we may well sing along with Sir Walter Scott, "It's no' fish ye're buying; it's men's lives."

Can Do All but Act, So She Runs Shows

Hartford, Conn.—Miss Marion Tullar, one of the few American women who are professional stage managers, has a record many young women would envy.

She was on her way to success as an artist, but her desire to act interfered with her studies, so she turned to the stage. Then the war came and she became a Red Cross worker, in which capacity she won the Croix de Guerre and other decorations. After her war experience she says:

"Acting was the one thing I just couldn't do, so I turned to stage managing."

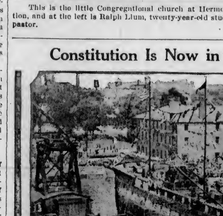
What of It?

New York.—Twenty couples who have celebrated golden weddings seem to disagree with a statement that wrecking was unknown 50 years ago.

President's Summer Church and Young Pastor

This is the little Congregational church at Hermoss, S. D., where President Coolidge worships during his vacation, and at the left is Ralph Linn, twenty-year-old student in Carleton college, Northfield, Minn., who is serving as its pastor.

Constitution Is Now in Dry Dock for Restoration



The frigate Constitutuo for which a fund was raised to carry on the work of restoration was recently put in dry dock. Many notables watched the famous ship dock for repairs.

Feminists Gather for Convention

Noted feminists from all parts of the nation are gathering in Colorado Springs, Colo., where the convention of the National Woman's party will be held July 7 to 10. This photograph shows three of the best known feminists in Washington about to leave. Left to right, Miss Mabel Vernon, national executive secretary of the party; Miss Margaret Whittemore, vice president of the party, and Miss Rebecca Hourwich, vice chairman and national organizer.

Our First Iron Ship Is for Sale

The navy's first iron ship, the gunboat Wolverine, which is to be mustered out of service, is offered for sale by the Navy department. This boat did all her service on the Great Lakes, being built in sections at Pittsburgh and assembled and launched at Erie in 1842.

FROM FAR AND NEAR

Nectarines are peaches with a smooth skin.

Arizona can boast the greatest daily change of temperature to be found on the earth's surface.

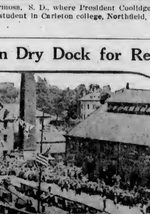
The man who gets shaved in a French barber shop must wash the lather off his face himself.

A German chemical company reports that it has perfected a method of producing 100 per cent pure tin.

WROTE BEST ESSAY

Miss Rose Gertrude Schmidt of Moorestown, N. J., whose essay entitled the "Silent Parade" won for her a university scholarship and $150 in cash as national champion of the fourth national meat story contest which has just come to a close in high schools of the United States. Announcement of the winners was made by the National Live Stock and Meat Board, sponsor of the contest, after selections had been made by a committee of prominent home economics women. Nearly 14,000 girls competed in the contest.

JOINS BYRD'S CREW



Lieut. Bernt Balchen, formerly of the Norwegian navy, selected by Commander Byrd as the fourth man to make the flight to Europe in the plane America. It was stated that Balchen, though a qualified pilot, would go as a passenger. Byrd made his acquaintance in Spitsbergen.

Paradoxical

Paradox literally means that which is "against opinion." It is a statement or proposition contrary to commonly received opinion. It also means a statement that seems on the surface contrary to common sense, but in reality is perfectly true, the word being used in a special sense.

On Getting Along

You can get along without effort—if you are satisfied merely with getting along in years.

STORY FROM THE START

In the small West Indies Dependency of Stratsmouth, in the year 1749, Richard Lindsay, who tells the story, gives an exhibition of his marksmanship before some villagers and a stranger, with whom they afterward dine at the tavern. The conversation turns on a notorious pirate, whose ship, the Black Panther, is thought to be in the vicinity. Next morning Lindsay, after wild duckes, is sitting in a "blind" when three strangers land on the beach near him. They bury a chest and chart one of them, Burford, recognized by Lindsay as the man he talked with the day before, kills one of his companions. Lindsay's presence is discovered. The third man is Captain Barclay of the Black Panther. The three go aboard. Lindsay there a youth to whom he bears a remarkable resemblance, Burford tells Barclay he thereby cheated of his way to his uncle's plantation in Jamaica. Barclay has sworn to kill the older McAllister. Dobda asked to act as spy in his uncle's household. He refuses.

CHAPTER III—Continued

The captain gazed at him grimly. "You would die first?"

The tone was low like an echo. "I would die first."

There fell silence. Instinctively my eyes sought Barclay's face, and I seemed to read there, not only bafflement, but a certain admiration, perhaps, at meeting an adversary as steadfast as himself, and yet, withal, a satisfaction to have my pens to stubborn young men. I am

"The Captain Wishes Speech With You."

warning you. You doubtless think you're right in the world and wrong in the world, and that you must do what is right. But I tell you that whatever there is no right or wrong except my word. What I wish is right; what I do not wish is wrong. You are not, I think, an over-bright young man, but I hope that at least you can see that."

Now I did not take this conclusion kindly, for though the world is my oyster and has, I fear, seemed to share that idea of my abilities which the captain had just expressed, I myself have always felt that I was brighter than supposed, barring perhaps, as I admit, a certain slowness at times in grasping a situation quickly. Yet mindful of what Burford had said to me, I kept my temper and answered quietly enough, "Yes, I understand that."

He looked at me with that curious gleam in his eyes which was often there, and which I hazard was a kind of amused, contemptuous glance that made you feel his delight in his cleverness and his scorn for your stupidity—and then all at once he said: "Well, Mr. McAllister—"

He stopped with these words, as if to see if he could catch me inspring, but for once he did not, though I was on my own account. I thought he had made a slip the next second I perceived first that he was too clever a man to do that, and secondly that if it was not a slip there was a point I rose in it. And what that purpose was it was not hard to guess. And so, to surprise him, and to show him that he had underrated me, I answered roundly, as he paused: "Yes, Captain, that's my name."

And indeed he was surprised. At first I think he could not believe in my quickness I had shown, but presently, perhaps from a smile which I could not restrain, he saw that I understood him, for he laughed and fetched me a clap on the back, crying, "Well, well, I thought you were simple, and here I find that you are deep and subtle—yes, a d—d dangerous rogue."

Now, although this should not have pleased me, I saw that it did, and after a little he went on, "Now then, as man to man"—and I own that I liked this tone—"I am going to tell you my whole plan. There is that blockhead Andrew McAllister, rich and prosperous with the revenue that was half mine—and what has he done? He has bought a great plantation on the southern coast of Jamaica, and there he is raising sugar cane and growing richer still. Where does his labor come from? Why, it's slave labor, of course. And he doesn't have to buy his slaves from others; he has a ship that does nothing but trade, back and forth, in a kind of circle, and every port she touches makes him richer. Look now, while I make it plain to you. This vessel he has; one a brigantine, the Shark, that sails the Caribbean, a pirate out and out. But it's the other that's his steady, respectable trader; she's the bark Ashantee. That bark he loads in Jamaica with sugar and molasses, and up the coast she goes to New England. What happens to that sugar and molasses? It's made into rum—the best New England rum. And where does that rum go? It goes out to Bonny and Calabar. And what is loaded in exchange for that rum? Some gold and some ivory, but mostly niggers—prime niggers, worth fifty pounds a head; and back comes the bark to Jamaica, and the slaves are landed at Andrew McAllister's plantation, and there arise more sugar and molasses, and that makes more rum, that brings more slaves to Jamaica again. Around and around in a circle; can you improve on that for a damnable way of getting rich? Isn't that a game to make the devil rub his hands and laugh?"

I could only nod assent. And I could not help thinking what my father would say if he could hear of this wicked trade. Of the horrors of the "middle passage" I had heard bits tell, of the dead bodies flung over to the sharks; aye, and sometimes, when winds baffled and food and water ran low, of live men buried to their deaths under the shadow of the midnight sky, with no one to know of their murder and avenge it. Surely, as the captain said, this sailing in an evil circle was a game to make the devil laugh.

So vividly, indeed, did he present to my mind, that I must have had my own that for the moment I did not see the incongruous side of a man of his profession thus discussing McAllister; for it was a case of the pot calling the kettle black, and while the captain's fine show of indignation would have come well enough from the mouth of any gentleman, it fell oddly from the lips of a professed pirate, a murderer, and a destroyer of the seas. Yet, as I have said before and as I say say again, Capt. Francis Barclay was the strangest mixture of a man I have ever known—at one and the same time, thought it sounds, and doubtless incredible—a pirate and a murderer, a murderer and a philosopher, a fiend unleashed and a man who could yet charm you, with his subtle speech, into thinking that black was white, and no one could have seen into, or managed to fill me with resentment against Andrew McAllister and his nefarious trade.

Undoubtedly, indeed, he could see by my face, which I was not too openly reveals my emotions, that I was justly indignant, for he continued, "And who, pray is my plantation for him? That hold-headed spawn of Satan, Jack Calvert; his precious mate. Which is the worse of the two, you ask me?—though I had not asked him at all, and had neither the wish nor the school to appreciate his rhetorical skill—Well, that's hard to say. But I'd answer you this way. Give me McAllister for wholesale villainy, for working out schemes on a big scale. But for downright petty cruelty there's no one to beat Shelvey. I've seen him torture a prisoner to death, and laugh while he was doing it. And he's the man, if you owe me a grudge, to put in charge of McAllister's great plantation. Why, boy, it's a very kingdom of the damned. There's only one ruler—the rule of the whip—and whether he be in the room or out, wherever the whim takes him he singles out a slave and has him—or her, he treats the women the same—tied to a post and lashed to the quick. Then he goes on to the next, and laugh while he does it. And he's the man you owe me a grudge against, is he? Well, that's right enough, and you must do what is right. But I tell you that whatever there is no right or wrong except my word. What I wish is right; what I do not wish is wrong. You are not, I think, an over-bright young man, but I hope that at least you can see that."

Now I did not take this conclusion kindly, for though the world is my oyster and has, I fear, seemed to share that idea of my abilities which the captain had just expressed, I myself have always felt that I was brighter than supposed, barring perhaps, as I admit, a certain slowness at times in grasping a situation quickly. Yet mindful of what Burford had said to me, I kept my temper and answered quietly enough, "Yes, I understand that."

He looked at me with that curious gleam in his eyes which was often there, and which I hazard was a kind of amused, contemptuous glance that made you feel his delight in his cleverness and his scorn for your stupidity—and then all at once he said: "Well, Mr. McAllister—"

He stopped with these words, as if to see if he could catch me inspring, but for once he did not, though I was on my own account. Now—A New Race of Motor Cars!

Thanks to RED CROWN ETHYL GASOLINE

CHRYSLER has just announced a new high compression engine.

Undoubtedly other manufacturers will do the same thing. That means a new race of motor cars—swifter—more flexible—more powerful!

Now that Red Crown Ethyl is on the market, high compression engines can be built and operated. Red Crown-Ethyl Gasoline is a high compression fuel.

For years engineers have wanted to build high compression engines. They could not because there was no fuel to feed them. The usual type of gasoline knocks and loses power when compressed beyond certain limits.

Red Crown Ethyl "Knocks Out That Knock".

You'll hardly recognize your old car if you feed it Red Crown Ethyl! Power when you need it—speed when you want it—get-up and go every mile! An engine lively and eager and quick!

Red Crown Ethyl "knocks out that knock"—*uses carbon.* Carbon deposits raise the compression of your engine. That's why—with old type gasoline carbon causes knocks. With Red Crown Ethyl it's different. Red Crown Ethyl is a high compression fuel. The more carbon—the higher the compression—the better Red Crown Ethyl works.

This remarkable gasoline gives you the benefits of high compression. That's the scientific reason back of its remarkable performance. That's why hundreds of thousands of motorists in the Middle West will use no other gasoline!

Community Building

Advantages in Tree Planting for Future

A dozen villages in three valleys of the Vosges meet all their taxes and church expenses besides paying a dividend to the citizens out of the forests they own, according to a press dispatch.

The village forest is operated as a continuing enterprise and is not slashed down and abandoned, according to American procedure. The result is that the forsighted Alsatian residing in one of these villages is not confronted with one of the great problems of the times—rising taxes.

The best authorities in the United States declare that this sort of thing could be done in this country at small expense. The conservation commission, under expert guidance, has been urging cities, counties, towns, and districts to plant trees upon cheap lands which are available to thousands of communities.

Little Falls, Curtiuge, the town of Watson in Lewis county and a few other places have made substantial starts in such an enterprise, but, considering the opportunities open to so many communities and the predicted timber famine, the indifference to the future is really appalling.

Foresters estimate that a planted acre of white pine in 40 years, at present prices, would be worth over $500. But who expects white pine lumber to be at present prices 40 years from now? The chances are that an acre of white pine planted now will be worth $1,000 in the next generation.

The community fathers can pay their children's taxes by planting them a forest.—Rochester (N. Y.) Times Union.

Community Judged by the Individual Home

Just what do you really owe to your community? Is the query made by the Buffalo Courier-Express. Is it enough to pay taxes and be a "good citizen" in a moral sense alone?

Streets are made up of individual homes. A pretty street can be irreparably marred by houses and yards which are run down, neglected. An unpainted house is harmful to your streets. It lowers property values.

And streets, in the aggregate, make up cities, towns, villages. Too many neglected homes, therefore, can give the impression of a neglected community.

Fathers and mothers are shouldering their share of the national responsibility in this respect. It is fast becoming "the American way."

Smile through! When something about the place begins to look a little run-down-at-the-heel attend to it promptly. Leave nothing undone that should be done. And all working together will produce the city beautiful.

Best Use of Paint

Paint used on the northern exposure should be harder, and it should be spread out thinner. More turpentine and more drier should be used on the north side, then the first coat will set up quickly and be thoroughly dry when the second coat is put on. If the second coat is thinned with oil alone, it will still be tacky long after the paint on the other exposures is dry and hard, and dirt will stick to it. Considerably more turpentine can be used in the finishing coat on the north side of a house than on the other sides without killing the gloss or causing the paint to chalk prematurely, for it is protected from direct sunlight and linseed oil will not lose its binding power so rapidly.

Fire-Stopping Essential

One of the most useful safeguards against fire hazards in dwelling construction is the fire-stopping of walls, partitions and floors. Fire tends to spread upward. Hollow walls and partitions, hollow spaces back of furring on masonry walls, and even low floors offer inviting runways for the rapid communication of fire from cellar to attic and from side to side. The remedy lies in adequate fire-stopping, which will make an all-lumber residence considerably safer against the spread of fire, than masonry wall and lumber floor construction without fire stops.

Slaves of Builder

The man who builds in the small home class today is a monarch of rank beyond the aspirations of the feudal baron, with his armored castle and his army of retainers. The home builder of today has, entering to his needs, a host of eager slaves inconceivable and impossible in feudal days—the myriad manufacturers of building products.

Service Above Self

Make up your mind that if you are called upon to serve during the year that you will give freely of your service, willingly and that you will do your share in every civic proposal that means good for your cities.

Omaha Leads in Ownership

Of American cities Omaha is first in home ownership. More than 55 per cent of Omaha families live in homes of their own. Here is a record every city may aspire to.

Clothing Trade Term

A bushelman is a man employed to "bushel" or repair and alter men's garments. The word is stated in Webster to be connected with the German "bosseln."

First Journalistic School

Robert E. Lee established the first school of journalism in the United States at Washington and Lee university in 1869.

Inspection of Butter Is Improving Its Quality

Federal-state shipping point inspection of butter is having a marked influence in improving the quality of the product, the United States department of Agriculture has announced, publishing figures on the expansion of the service.

Beginning with one inspection in July, 1924, the department says, the federal-state butter inspection service in Minnesota has increased until at present five inspectors are required. The quantity of butter inspected during the year ending January 31, 1926, reached 80,416,087 pounds. The service is available at Duluth, St. Paul, Minneapolis and Chicago.

At the end of the year more than 80 per cent of all butter inspected in Minnesota was 92 score or higher, as compared with less than 76 per cent at the beginning of the year. A marked decrease is shown also in the percentage of butter scoring 90 or less, the quantity in this class at the end of the year being 8 per cent of all butter made, compared with 19 per cent at the beginning of the year.

Sire Is of Importance

It pays to breed a mare to a good stallion or jack. Good young horses and mules are scarce and consequently they are bringing better prices this spring than for several years past. Indications are that during the next few years prices for good horses and mules will continue to advance because not enough have been raised to supply the demand. This scarcity is being felt this spring and will be more evident in the years to follow.

FARM FACTS

As you exclude burglars from the home, keep weeds out of the growing crop.

* * *

Before the grass gets too high is the time to go over the hayfields for their annual crop of small stones.

* * *

It is highly advisable to give baby chicks fresh ground to grow on. Plowing and liming the ground will help much.

* * *

Spring-time is nursery-time on the farm. Chicks, pigs and lambs all pay big returns for time spent on them while they are getting their start.

* * *

The Jersey Black Giants are considered very excellent for general farm flocks as they have the size which makes them excellent for the purpose of roasters and capons.

* * *

Soy beans are a good late pasture, seed crop and soil improvement crop for most sections. The crop may be grown successfully on acid soil, but if the field has not grown this crop previously, it is necessary to inoculate for best results.

LEGAL NOTICES

Order Appointing Time for Hearing Claims

STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the City of Charlevoix in said county, on the 30th day of June, A. D. 1927.

Present: Honorable Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of Charles R. Bellinger, deceased.

The above estate having been admitted to probate and Adaline Bellinger and William C. Bellinger appointed executors thereof.

It is ordered that four months from this date be allowed for creditors to present their claims against said estate, and that such claims will be heard by said court on Thursday the 3rd day of November A. D. 1927, at ten o'clock in the forenoon, at the Probate office in the city of Charlevoix.

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, once each week for three successive weeks previous to said day of hearing, in the Charlevoix Sentinel a newspaper printed and circulated in said County. SERVETUS A. CORRELL,
Judge of Probate.

"We Serve Michigan"
What Better Railroad Service Has Meant to Business

Agricultural commodities have shown an upward tendency in prices during the current year, while the course of industrial and raw material prices has taken a downward trend. We have been going through a period of price re-adjustments—always a critical time for business—but, in this instance, there were not the usual accompanying shocks to business peculiar to such periods.

The major reason for this absence of disturbances in business is that smaller inventories are being carried nowadays since the railroad service of the country assures certain and speedy delivery. Traders carry smaller stocks, and business, therefore, is carried on with less capital and with fewer hazards.

More stabilized business conditions are assured American business, and with these, consequently, failures become less likely and less frequent.

What the workings of the Federal Reserve Act proves to be to business, through the stabilizing of credits, the improved steam railroad transportation service is accomplishing through its regular and its prompt deliveries. So the large outlays to better the service have justified themselves. Both expedients work to the same end in their respective spheres. They avert the shocks.

In Michigan, this is particularly true. Vast sums, in recent years, have been expended to achieve this new standard of service. Seven of the nine railroads serving Michigan alone are expending this year nearly $26,000,000 in new engines and cars and in improvements and betterments which will continue these stabilizing forces.

These expenditures, too, were made right at home, and at a time when the lull in industry, *through which we have just passed,* was at its low ebb. Therefore, these $26,000,000, going largely to labor, raw materials and manufactured commodities, served appreciably to *buoy up* conditions.

Michigan railroads have, therefore, been more than local common-carriers. They have, through their service, removed some of the hazards inherent in business in former years.

HOLD SWIMMING CONTEST FRIDAY

Sponsored by Captain D. H. Smith and Association of Commerce.

A swimming contest has been announced for Friday afternoon at three o'clock, with the course across Round Lake, the initial point being at the railroad bridge and the finish at the city wharf where the Convict Ship "Success" is tied up.

Considerable interest is being taken in the event and it is quite probable that an unusual number of aquatic performers will enter the contest, competing for the prizes offered, one a loving cup and two other prizes.

Captain D. H. Smith of the "Success" and the Association of Commerce are sponsors of the event, which no doubt will attract a large number of persons to the course to witness the contest.

Many Odd Forms of Home Savings Banks

From Manila comes the information that the Filipinos believe in growing their own coin banks. The two most popular forms are a section of bamboo with a slit and firmly sealed on both ends, and the latter is a carefully hollowed and polished coconut. The bamboo bank is called on "Arlanette" and the coconut a "Tabo." Both are pretty good at defying the attempts of children to get at the contents, because they are very difficult to break.

Although coin banks are not widely used in the Argentine there is one form which serves a double purpose, particularly in the interior of the country. This is an artistically decorated gourd which though primarily intended as a receptacle for tea drinking is sometimes converted into a coin bank. The tea drunk in the Argentine is known as "mate." It is sipped from the gourd by means of a metal tube called a "bombilla." The gourd of tea passed from one to the other at table is considered a gesture of real friendship and regard.

Dolls and animals, attractively colored, are very popular as designs for children's coin banks in France. Singapore uses no design typical of that section of the world, the favorite receptacle being a tin can with a slit at the top.—Exchange.

BARBERRY OFFICIALS IN COUNTY

Department Heads Checking Up on Work Done Here

Dr. Humphrey, head of the investigational work for the U. S. Dept. of Agriculture, accompanied by Mr. Powell, Commissioner of Agriculture of this state, R. J. Baldwin, head of the extension department of M. S. C. and W. F. Reddy, state leader of the barberry eradication campaign, will visit Charlevoix county Thursday of this week. This party is making a tour of the counties in which the campaign for the eradication of the common barberry is being carried on.

They are checking up on the work which was done last year and looking over the new territory to be covered. Charlevoix county is of particular interest to them as some of the most heavily infested area in the United States are found here

Fast Cinema of Romance and Adventure

Coming to the Palace theatre next Wednesday is Bebe Daniels newest picture, "Senorita" in which Miss Daniels is presented in an entirely new type of role. In this colorful story of romance and adventure in South America, the fascinating Bebe Daniels of "The Campus Flirt" and "A Kiss in a Taxi" appears in the role of a dishing caballero, a swashbuckling,high spirited, hot-tempered son of the pampas. The masculine characterization is but a masquerade, however, a masquerade that leads her into all sorts of adventures and many amusing situations out of which she emerges in true Daniel's style.

ELK RAPIDS BOY LOST ON FRIDAY

Mystery Surrounds Disappearance of 6-Year Old Youth

There is a great deal of mystery surrounding the disappearance of Douglas Holmes, six and one half years of age at Elk Rapids. The lad was last seen about five o'clock last Friday afternoon, since which time a thorough search has been made for him throughout this region, following the theory that the disappearance of the lad is due to abduction.

He is described as being a fine looking boy, unusually bright and a decided blond. Hair in front fluffy and recently trimmed. Another theory regarding his disappearance—that of drowning has been under consideration and measures followed which has included a complete search of local waters, but in this no clews of the missing lad have been discovered.

Members of the family scout the drowning theory and are fully imbued with the abduction feature of the case and are making strenuous effort to locate the little fellow, hoping to find him alive and well and once more at the home fireside.

"The Silent Rider" at Majestic Saturday

"The Silent Rider" Hoot Gibson's latest picture, which comes to the Majestic theatre Saturday and Sunday, is the fastest moving and most thrilling western of the year. Gibson himself is excellently cast as a hard-riding cowboy who falls in love with a mysterious girl who comes to the Bar Z ranch to wait on table.

Blanch Mehaffey as the girl displays histronic talents hitherto unknown, and the rest or the featured cast is correspondingly good. Several thrilling stunts, new even to Gibson, are enacted in "The Silent Rider" and the action is fast moving throughout with a logical end pleasing ending.

Summer Visitors Married Here Last Saturday

A wedding service was solemnized by the Rev. C. E. Pollock last Saturday morning, uniting Dr. Charles H. Jennings of St. Petersburg, Florida, and Miss Sally Rieves of Washington, D. C., in holy wedlock. The bride and groom are making their summer home in Bay View, and will return to Florida at the close of the summer season. Their many friends are extending best wishes and prosperity.

"Moaning Ghost" Said to Have Become Bore

Bermuda would seem to offer an inviting field for the Society of Psychical Research. Several old houses on the islands are reputed to be haunted, and one of them, owned by a well-known American writer, has for its particular wraith the ghost of a notorious pirate who frequented the spot in the picturesque olden times. Another spectre haunts an ancient mansion now serving as the winter home of a wealthy American family. This is said to be the ghost of Dorothy Tucker, an aged colored woman who toiled on the surrounding estate in slavery days, and who, for some misdemeanor, was locked in a cellar, where she was forgotten and thus starved to death. Since then, as a spook, old Aunty Tucker has often appeared, severely ing to local stories and as she always moans and wrings her hands, she is popularly known as the moaning ghost. She is said to have appeared on occasions to former tenants of the house that they became accustomed to her presence and were even bored by her repeated visits.

Illinois National Guard in Camp Near Grayling

Seven hundred members of the Illinois National Guard are in camp at the State military reservation near Grayling this week, where they will engage in their annual training activities. They arrived late last week and will continue their work and military activities for a few days longer before returning to their home state.

Meighan's Latest "Blind Alleys" Here Saturday

"Blind Alleys" Thomas Meighan's latest production, at Palace theatre Saturday and Sunday, is an exciting melodrama of two people who became separated on the first night of their honeymoon. All sorts of thrills, including a second woman, enter into it before the final fadeout. Evelyn Brent and Greta Nissen are featured

CAMP CHARLEVOIX

ITEMS OF INTEREST OF EVENTS

"CIRCUS DAY" AUGUST SIXTH

Located on One of the Finest Spots on Lake Charlevoix

Lewis C. Reimann, governor of the Michigan district of Kiwanis International and director of Camp Charlevoix, the Character Camp for Boys, will fly via Buhl airplane from the camp at Ironton, to attend a large inter-city Kiwanis meeting in Port Huron July 19th. He will be the guest of the Port Huron club on this flight, and will speak at a banquet that evening on the program with Gov. Fred W. Green and Rev. William Johnson of Montreal.

A visit to Camp Charlevoix, reveals the boys camp which at once impresses one with its beauty, its air of wholesome activity among the thirty or more boys gathered there and a sense of earnestness among the counsellors.

The camp is located on one of the finest spots on Lake Charlevoix, the old Sweet Briar farm, and its equipment of buildings is very complete. Tennis courts, diving tower, athletic grounds, a recreation hall and a number of other additions have been made at the place this spring, so that Charlevoix is favored by one of the finest camps in Michigan.

The activities at camp consist of horsemanship, handicraft, art, Indiancraft, athletics, swimming, seamanship, woodcraft including forestry, conservation and woodlore, first aid, dramatics and scouting. Uniformly trained men are instructors in these various activities. One of the features in camp that is proving popular is the presence of Chief Donatus of the Ottawa tribe at Cross Village. The chief teaches Indian crafts, consisting of birchbark work, canoe making, bird house making and Indian lore. He also stages Indian dances around the campfire in the evening and will assist in the staging of Hiawatha under the direction of Prof. J. Raleigh Nelson of the U. of M. during August.

A full-time medical man and "camp mother" are on the staff and special-lists along different lines of interest are brought into camp to speak to the boys. On August 5 a big "Circus Day" will be held at which the trained horses will perform, Indian dances and pow-wow will be staged as well as tumbling, Arabian dances and songs and athletic stunts.

Many "Day Campers" of Charlevoix are taken to camp at 8:30 each morning where they are given the regular program of instruction and recreation as the regular campers. They have dinner at noon at the camp and are returned by auto to their home at 5:30 each evening. The camp can accommodate a few more day campers. Director Lewis C. Reimann welcomes visitors to the camp any afternoon.

BRAZILIAN BEAUTY

A charming addition to the younger diplomatic set in the national capital is Marie de Lourdes Miller, daughter of the new naval attache of the Brazilian embassy.

ENROUTE TO ATLANTIC OCEAN

Convict Ship at Charlevoix —Will Close July Eighteen

Dramatic scenes are portrayed with vivid and startling effect on the old British convict ship "Success" most aged of all ships afloat in the world, now docked at Charlevoix. With the first step over the gunwales of this historic vessel, one is returned in resistless amazement to the early eighteenth century. One moves in an environment thoroughly realistic of the past—the present in the hollow of his hand—unnoticed.

To view the exterior of this ancient craft—the floating tomb of East India ship-workers of three quarters of a century ago—is indeed sufficient to inspire the curiosity of the most prosaic soul. The hull of the old ship is seamed and pocked with age and scarred by ocean waves of three centuries. With countless grotesque, to the modern mind, with bulging and yellowed sides, the "Success" bears the construction marks of a true vessel. Yet, craftsmen in ships of steel are quick to pay tribute to her builders.

Launched at Moulmein, in Burma, British East India, in 1790, this old craft is built thruout of Burmese teak, massive timber of incomparable strength and durability. In early days the "Success" considered a queen ship of her type. Designed as a square rigged and armed East Indian merchantman, carrying wealthy Europeans and Indian nobles as her passengers, she rode the vast seas that separated East and West, and made her ports at London, England and Calcutta, India. Notwithstanding her successful career in conquest of waves and ever lurking pirates of the Indian Ocean, she became unsuited to the requirements of mpatient commerce and in 1802 was sold to the British government. Thus to sink into abysmal depths of historic iniquities.

From 1802 until 1851, the Success served as a convict transport under the British ensign. During this period, 167,000 men, women and children were banished from Great Britain and Ireland to the penal settlements in Tasmania. Voyaging back and forth from London to Melbourne, the convict ship unloaded England's human rubbish into prison camps. In 1851, she commenced her career as a prison receiving ship, with permanent station in Hobson's Bay, an ocean hell indeed, with all the fiendish purposes of her anothema,there.

However, in time these infamies passed away by popular demand. The general indignation of the Australian public against this system, brought about the abolition Inhuman laws moved into the limbo of useless things Today the convict ship is a mere reminder of past horrors. But the one tangible thread binding the pages of her own hideous history. Now touring the world and making her last showing in the Great Lakes at Charlevoix; later to be returned to the Atlantic coast, to Halifax, and the Australian government.

On board today, are exhibited ponderous log irons, hanging on the rails as mere relics of the long departed dead. Relegated within the sombre chambers of this wonder of floating museums are numerous torture devices. One sees uncompromising iron straight jackets; crouch irons; leaden-tipped cat o' nine tails; sirious dungeons; branding irons; condemned cells; and the execution arm that mercilessly struck death.

Editors and writers have devoted their pens to the story of that awful period and the convict ship, owned and directed by Capt. D. H. Smith, her American commander.

BARBERRY FIGHT

TO CONTINUE IN COUNTY THIS YEAR

SQUAD NOW IN THE COUNTY

Largest Growth of the Barberry in the State Found Here

The fight against the common barberry will be continued in Charlevoix county this year. The campaign will be carried on by the U. S. Dept. of Agriculture in cooperation with the Michigan State Department of Agriculture and M. S. C. Last year the progress made in this county was very satisfactory, the city of Charlevoix and all the surrounding coutry being scouted. Included in this scouted area was one of the largest growths of the weed found in Michigan.

The common barberry against which the campaign is being staged is the host plant for the black stem rust of wheat, oats, barley, rye and other grains and grasses. This black stem rust should not be confused with the leaf rust which is so very prevalent at the present time. The eradication of the common barberry will not do away with the leaf rust which fortunately is not as devastating as the black stem rust.

At the present time the squad located in this county are making their headquarters in East Jordan but will move to Boyne City next week.

SCHOOL MEETING MONDAY NIGHT

H. A. Craig and E. L. Dawson Eleoted Board Members

School meeting held last Monday night was attended by about sixty Charlevoix residents who listened to the annual report submitted and attended to such business as was presented for action.

Two members of the Board of Education were elected. H. A. Craig, whose term expired, was reelected, without opposition, and Ernest L. Dawson, the latter a new member, was elected by a good majority with two or three others receiving support for the position.

With a reorganization of the board Mrs. Arthur Ilergeon for several years a member and president of the Board of Education retires from service, she being succeeded as a member by Mr. Dawson.

The general public as shown by the attendance, apparently took but little interest in the meeting, otherwise there would have been many more voters present to take part in district affairs.

Romans First to Make Fine Art of Bathing

Historical writers mention people in early times as bathing and cleansing themselves in some manner or another. Although the time of the first bath-tub is fixed on or about 200 B. C., it was not until several centuries later that general use was made of tubs for bathing.

The Greeks are said to have been the first to use what we might term a bathtub, but which was really only a bowl not large enough to hold a bather and which necessitated dipping the water out of the vessel and pouring it over the body. The practice of bathing flourished and the Greeks made luxurious use of it, but it took the early Romans to develop the practice almost into a fine art.

Some of the largest Roman baths covered areas of a square mile and could accommodate over 3,000 people. For over 600 years Rome used no other medicine than her baths.

The swimming tank in the city of Mascerras was the first to use warm water. No mention is made as to how the water was heated. The earliest method was to place heated stones in the water and later using drucones, or coils of this brass pipes, which passed through large jars heated by flames of fire.

Bathing spread to the English and in 1127 Henry I forfeited bathing in the initiation ceremony accompanying the knighting of 600 commoners into the "Order of the Bath."

Spiritualists Hold Camp Meeting at Snowflake

The Spiritualists of northern Michigan will open their Camp Meeting at Snowflake, July 17th to Aug. 14th inclusive. Good speakers and mediums will be present. Something doing every day, either afternoon and evening. Two lectures on Sundays. Snowflake is located three miles south of Central Lake on M-88.

Lesher Reunion.

The Lesher family will hold a reunion at Snowflake, July 30-31. Pot luck dinner each day. Saturday afternoon devoted to getting acquainted. 7:30 pm. social evening. Sunday morning,10:30, symposium. All Lesher's and their kin are cordially invited to attend.

Boys in Town Friday from Camp Charlevoix

Camp Charlevoix was well represented in Charlevoix last Friday afternoon when Director Lewis C.Reimann, several Counsellors and about fifty lads of various sizes and age invaded the city, spending the afternoon by visiting the Convict Ship Success, points of interest, business houses, etc. Judging from activities the party was out for a good time and unless appearances are deceitful all were having just the kind of a time that young lads enjoy; just a snappy, happy afternoon, not boisterous but lively every minute of the time.

CRADLE SNATCHERS VERY FUNNY

Palace Theatre, Friday July 22nd—Stage Hit a Big Success

This is the play which the critic of the New York Times said provoked "gales of hysterical laughter" and the Journal proclaimed as "magnificently funny," while the Sun said of it, "A hit! A funny American play, with the spice of a French farce."

"Cradle Snatchers" is the story of three wives, whose husbands take a fishing trip. That is, they go fishing, but as a matter of fact they take three blonds on a day excursion.

The wives discover the deception and hire three college boys to play the parts of sheiks to arouse their husbands' jealousies. The boys are rabbit-eared swains, but make love to the wives for purely monetary considerations, each having a sweetheart of his own. The husbands return to the wives and discover what has occurred during their absence, believing it to be real unfaithfulness on their wives parts. And while they are at the height of their accusations and fine wives and their hired lovers frightened out of their wits, the husbands' blondes turn up. The resulting situations are hilariously funny.

DRIVE CAREFULLY, AVOID ACCIDENTS

The wrecking of several automobiles within the range of a few miles during the preceding week proved something of an object lesson to drivers in local territory as is evidenced by no wreck reports for several days. Due care on the part of drivers will eliminate a large percentage of accidents, so called, in every community. Automobile traffic during the balance of this month and through August promises to be exceptionally heavy, with main thoroughfares crowded to the limit, some accidents naturally will be recorded. Those of automobiles are in daily use and one driven recklessly, carelessly, can quickly accomplish a vast amount of financial damage and what is of more importance serious personal injury and possible loss of life. The one sure way to avoid accidents is for each individual driver to strictly observe the rules of the road and this too, whether driving moderately or at a high rate of speed, but whether driving fast or slow there is no pleasure when a tragedy is enacted—and this is not liable to happen when due caution is used.

NOTICE—Visit the Charlevoix Antique Shop, 1228 State street. Hours: 1 to 5 daily, except Sundays.

HIGH SCHOOL BAND FRIDAY

Musical Treat in Store for Our People Friday July 22nd

A musical treat of exceptional calibre is coming to Charlevoix Friday, July 22 and will appear about 2:30 in the afternoon. The Wagner Lumber Company of Cadillac, whose advertising recently appeared in this paper, is sponsor for this rare treat.

This high school band of fifty-five pieces, have been engaged to travel for one week, calling on some thirty-six Michigan cities as part of the very extensive publicity effort in behalf of "Mich-Eden," the summer home site on Cadillac Lake, M-11, seven miles south of Mackinaw City.

This band is from a town of 800 people though one of the seven class A high school bands of Michigan, ranking with Detroit, Flint and Grand Rapids, yet the only band in this class employing girls of which 27 will appear here. Of 32 Michigan high school bands in all classes, this band is recognized as playing the highest class selections. The instrumentation is identical with those of the greatest professional bands in the country. The instruments are the best money can buy, total value of such reach $8,000.

With the band on this trip are several former members now playing with U. of M., Albion, Kalamazoo and Ypsilanti normals bands and orchestras. The band carries cornet and trombone soloists also vocal soloists as well as quartettes for boys' and girls'. The band will appear in evening concerts at Petoskey Friday and Sunday evenings. The Sunday evening concert to take place on the Chairman House veranda. On Saturday and Sunday the band plays day programs at "Mich-Eden" and huge crowds are expected to hear the band at its best on these occasions.

FERRY CHIEF WAWATAM RECONDITIONED AT DETROIT

The Sainte Marie Takes Her Place Between Mackinaw City and St. Ignace

The Sainte Marie was placed in commission a few days ago and will continue between Mackinaw City and St. Ignace as a carferry until such time as the big car Carrying ferry Chief Wawatam returns from Detroit after being reconditioned and made ready for winter operations over the route for the transportation of passengr and freight cars and general business connected with the three railroads having their terminals at Mackinaw City.

Yacht Sylvia on Cruise in Northern Waters

The Yacht Sylvia cleared this port last Friday morning for an extended cruise, with the owner Mr. Logan G. Thompson and a party of friends on board. The party will confine their trip to northern waters, spending no small part of the trip on Lake Superior.

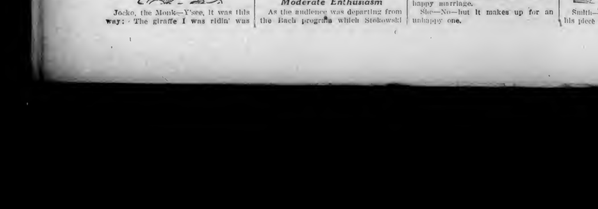
HOW IT HAPPENED



Jocko, the Monkey-Yarn, it was this way: The giraffe I was ridin' was headin' in the stretch by a neck when the elephant comes up from behind, sticks out his trunk and wins by a nose.

Cheaper

Florist—These roses are $5 a dozen. Sandy—I—er—think I'll just send her some flower seeds and let her plant them herself.

Moderate Enthusiasm

As the audience was departing from the Bach program which Stokowski and his Philadelphia orchestra gave at Carnegie hall recently, an enthusiastic young miss asked her male escort, "Didn't you just love the concert?"

"Well, I didn't love it, exactly," he replied, "but I respected it."—Musical Courier.

Power of Money

He—Very well, then. But I'll tell you one thing—money doesn't make a happy marriage.

She—No—but it makes up for an unhappy one.

A LANDED PROPRIETOR

Smith—As soon as Jones bought his piece of ground he climbed a tree to look it over, fell out and—" Brown—"And became a landed proprietor, eh?"

The Other Way

"He knows his business from the ground down."

"You mean the ground up, don't you?"

"No, he happens to be a miner."

Please

There had been a train wreck and one of two traveling authors felt himself slipping from this life. "Good by, Charlie," he groaned to his friend. "I'm done for."

"Don't say that, Jim, old boy," gasped the other in horror. "It's heaven's sake, don't end your last sentence with a preposition!"—Path finder.

Even as You and I

Davis—Did you love words with your wife?

Parks—Yes, I had words, but no opportunity for using them.

Famous Flop-scenes #4-8-40.

Fulton's Tin Jaw Brings Him $50,000

Fred Fulton, the "Minnesota plasterer" of the prize ring, has the questionable distinction of having been knocked out more times in the ring than almost any other boxer.

He insists upon the last laugh, however, for he has reaped a $50,000 fortune from his unimpressive career. Invested in a northern Minnesota summer resort, it earns him a handsome living, together with his plastering work. Every winter finds him at work with his trowel in Chicago.

GIANT SUNFISH IS BOON TO FISHER

Expert Says New Species Will Supplant Bass.

"Did you ever have a sunfish, a wee "pumpkinseed," grab your hook with such force that you thought you had a large fish?" asks H. C. Fearnow of fishermen in the June issue of Field and Stream. "Suppose a sunfish weighed two or three pounds," continued Mr. Fearnow. "What a fight he would put up and the delicious dinner he would make."

According to Mr. Fearnow such a fish has been discovered in Georgia—a giant brother of the scrappy little "sunny" weighing from two to three pounds. He writes in Field and Stream: "A specimen weighing over [illegible] pounds was recently sent to New York to be mounted, while another specimen of over two pounds was forwarded to the bureau of fisheries. It is the opinion of the experts that a new species has been found, one that has apparently been overlooked by ichthyologists, or confused with the blue gill.

"Commissioner O'Malley of the bureau of fisheries has issued instructions for the collection of a brood stock for propagation at one of the bureau's hatcheries, and the new species will be held in a separate pool in the hope that an output of young fish can be obtained. While it is evident that the new fish belongs to the genus of sunfishes, it will not be possible definitely to classify the species until specimens of various ages are available for examination.

"For some years," continues Mr. Fearnow, "there has been an urgent need of a fair-sized food fish possessing some qualities and not so predatory in its habits as the black bass for stocking our ponds, lakes and streams. The carp was introduced for this purpose but this species has not met requirements. The sunfish has a good reputation and it is very prolific; so if the weight can be brought up to that of the bass it will mean a great deal to every fisherman."

Dundee New Champ

Photograph shows a smiling closeup of Joe Dundee of Baltimore, the new welterweight champion of the world. He defeated Pete Latzo for the title.

Whistling Unforgivable Sin of Baseball Player

An unforgivable sin of baseball is the act of a player whistling a ditty after his team has lost. One of the little boners in this connection happened in the Texas league a few years ago. Jakey Yeargan, then of Worth Cats were in the thick of a hot pennant fight. On this particular day, his team was handed a 3 to 2 defeat and it was a bitter pill for Jake to swallow.

As the athletes wended their way toward the clubhouse, Pilot Ez, who is not a smiling loser, heard an unmistakable jazzy refrain being whistled by one of his players. Ez quickly covered the intervening space between himself and the whistler, a young pitcher who had dared to break one of the immutable laws of baseball after dropping a tough game.

The annoyed Ez immediately interrogated as follows: "What do you think this is—a minstrel troupe? Cut out the solo!" To which the young soul convict-like players, Ez said: "It's a free country, Mr. Ez, I'll whistle if I care to." "You win," shot back the Fort Worth leader, "but you'll remember that you whistled yourself off this ball club." The warbler left Fort Worth that evening.

Uses Eight Portsiders

When Manager Nick Williams of the San Francisco Seals set out to build up a team which would have a chance to win the Pacific league pennant this year he wasn't figuring on a left-handed complex. But the team has it. Opposition right-handed pitchers some days consequently face the problem of throwing to eight men who swing from the left side of the plate. All that is lacking is a catcher and a team of southpaws would be complete.

John Stark and the Green Mountain Boys

BY ELMO SCOTT WATSON

MONG the many sesquicentennial celebrations which have already been observed or which are yet to take place there is none more interesting than the one which will be held at Bennington, Vermont, on August 16 of this year. It commemorates the victory of Gen. John Stark and his forces of patriots over the British troops commanded by Colonel Baum, which had been sent by General Burgoyne to capture the large stores of supplies that had been placed in this little Vermont village. The sesquicentennial celebration of this American victory is of particular interest for more reasons than one. It is a high spot in the history of the Green Mountain state but its historical importance is far greater than that of an event in the history of one state, for the Stars and Stripes, Vermont, New Hampshire and Massachusetts, all of which have a share in the glory of that victory.

For one thing, Bennington was an important event in the campaign which proved to be the turning point of the American Revolution. The defeat of Baum and the failure to capture the supplies which Burgoyne so sorely needed was the second blow that had been struck at the ambitious plan of this British general to split the colonies by cutting off "the head" of the rebellion, New England, from the rest. The first blow had been struck ten days earlier when the expedition of Col. Barry St. Leger failed before Ft. Schuyler in western New York. Sesquicentennial celebrations of this part of the campaign—the Battle of Oriskany and the successful defense of Ft. Schuyler—will also be held this summer. These celebrations will take place at Rome, New York, a preliminary to the one which will be held in October at Saratoga where was fought one of the Fifteen Decisive Battles of the World, and where the final downfall of Burgoyne took place. Since Bennington was one of the steps which led to Saratoga, the celebration there this summer has unusual significance.

In recognition of that fact there was formed some time ago a United States-Vermont sesquicentennial commission of which President Doolidge is a member and this commission, co-operating with the Vermont State Sesquicentennial commission, headed by John Sparge, who is also president of the Vermont Historical society and of the Bennington Battle Monument and Historical association, will have charge of the final sesquicentennial anniversary, that of the independence of Vermont, and of the Battle of Bennington. In honor of these events the United States government has issued a commemorative half dollar and early in August will issue a commemorative postage stamp.

In addition to these, the local association has issued another medal, designed by Charles Keck, reproductions of which are shown above. Five hundred of these medals in bronze have been struck off and they have already taken a high place among the curiosities and are much sought after by numismatists.

On the medal shown above appears Fay's Tavern, which was the headquarters of the Council of Safety at the time of the battle, and there General Stark held his most important councils of war. The victory wreath of laurel surrounding the Tavern bears the names of some of the patriots prominently identified with the battle. Three names are especially notable since they represent the states of New Hampshire, Vermont and Massachusetts. New Hampshire is represented by the name of General Stark since that state had given him the rank of general and placed him in command of its militia. Vermont is represented by Col. Seth Warner, commander of the Vermont forces and said to be the real victor at the battle. The name Allen at the bottom in the center, stands for Parson Allen of Massachusetts. The other names are those of the captains of the local companies of militia and the local citizens who perished on the field. On the reverse side of the medal is a green Mountain Boy with his trusty rifle, guarding the Stars and Stripes. Remember that you whistled yourself off this ball club." The warbler left Fort Worth that evening.

Including Most of the Crowned Heads of Europe, and received the Patronage of the Leading State, City Officials and Clergy Since Her Arrival in America

The Oldest Ship Afloat [Launched in 1790]. Raised from Bottom of Sydney Harbor and Now on a Final Tour of the World

A RELIC OF THE BARBARIC DAYS, WHEN FOR A MINOR OFFENSE A MAN COULD BE SENTENCED OVERSEAS

for THE TERM of his NATURAL LIFE

What Better Recommendation than This:

R. H. L. in his daily "Line O' Type or Two" in the Chicago Tribune said:

"One of the biggest four bits' worth of value we ever got for our money was a visit to the Convict Ship at the State street dock. It's like turning back the clock, and after you see the way men and women were herded on the ship taken for a voyage of thousands of miles, the paths they made in the hard teak deck, the whipping post, the airless dungeons, the branding iron and the laden cat-o'-nine tails as punishment for people who had stolen perhaps a piece of pie, one gets the idea humanity is getting on."

When the Convict Ship was Launched in Far Away India in 1790—

1—Charlevoix did not exist.

2—Buffalo was the western frontier of America.

3—George Washington was serving his first term as President of the United States.

4—The Battle of Waterloo was still 25 years in the future.

Romance! To view her massive yellow hull, stamped with the sinister black, broad arrows of the British penal system; her tall and mighty spars, which formerly flew her arrow-marked sails in many latitudes; her graceful lig reload, reminiscent of the days when fine deep sea ships were loved as women; and her stately quarter decks and broad stern, is to whiff the great salt water ocean and realize something of ships and men of other days. For she has sailed the Seven Seas, plowing the waters and winds in many climes, with cargoes ranging from precious jewels of the Orient to wretched and suffering human beings being herded between her decks like cattle. Nabobs of India and Siam have sipped tea on her quarter deck. Dusky princesses of the East have been entertained in her cabins. Hundreds of pitiful prisoners have died in her dungeon cells. Pirates have chased her and more than one desperate battle has been fought across her solid decks. Her massive hull and her mainmast still bear the marks of pirate shots fired at her by black flagged ships in the Indian Ocean. Today she is the last vivid reminder of the master sea fictionists of another day, authors like Clark Russell and John Boyle O'Reilly, whose pen pictures antedated the red-blooded, blue-sea stories of London, Melville and Conrad. She forms your only chance to see a ship like those of which you have read.

Pathos! She is a floating monument of the most pathetic human drama ever played; a startling reminder that 100 years ago, and even less, women and children, as well as men, were punished with life long suffering and agony for trifling offences. Aboard her may be seen the ringbolts and chains to which were fastened beautiful girls often convicted wrongly, but nevertheless compelled to helplessly endure the terrors of a voyage of six months or more, completely under the domination of brutal warders. While young women became gaunt and wrinkled, boys and girls of eight and nine years of age, transported for stealing apples or a two-penny pie, became hardened criminals from the sights they saw and the punishments they endured. For age and sex did not spare the victims of the convict ships from the heavy irons, the cat-o'-nine tails, the whipping posts, the branding and the tiny airtight dungeon cells below the water line to which they were thrust for the slightest infraction of the rules. There is shown the figure of Elizabeth Stott and her child, transported for life, after death sentence had been commuted by the king, to the penal settlement of far off Australia, for the alleged forging of the equivalent of fifteen dollars. What became of them after she boarded ship and was placed in irons, God only knows. The records are mute. No story ever written, no sermon ever preached, no drama ever acted, no scene ever thrown upon a silver sheet can vie in pathos with the silent testimony of this ancient vessel and her original cells and tortures, every one of which you may see and feel.

History! The Convict Ship teaches more strikingly than a thousand-page volume or hundreds of photographs the story of human progress thru three centuries. She was a link between the Orient and the Occident in the days when, as the pride of the vast East India Co's fleet, she carried wealthy and noble passengers from England to India, and returning, brought invaluable cargoes of tea, spices, silks and jewels from Calcutta to London. As a dread felon transport, she carried miserable and often innocent men, women and children from England to VanDiefman's Land and the penal colonies at Botany Bay, Australia, starting the growth of a new continent. She was an outcast from all the civilized world, from humanity itself, when, moored in Hobson's Bay, Australia, she was a hulk or floating prison used for the torture of those condemned to a living death in a prison which, as can be vividly seen, makes the Bastile, the Kremlin and the Tower of London at their worst seem habitable. She created maritime history when, under her own canvas and unescorted, she sailed from Australia to England, and then from England to the United States, crossing the broad Atlantic in 96 days. Since her arrival in this country she continues to make history, the number of her visitors ranging into the millions, far outstripping that of any exhibit ever shown here.

This Wonderful Vessel Has Made History Through Three Centuries

She is the oldest ship in the world and the only convict ship left afloat out of the dreadful fleet of ocean hells which sailed the Seven Seas in 1790 A.D.

She is unchanged after all these years, nothing being omitted but her human freight and their sufferings from the cruelties and barbarities practiced upon them.

She has held lurid horrors and dreadful iniquities besides which even the terrible stories of the Black Hole of Calcutta and the Spanish Inquisition pale into insignificance.

A Child of the American Revolution

The American Revolution putting an end to the transportation of convicts and white slaves to the Virginia colonies, brought about the settlement of Australia and the creation of the dread fleet (of which the Success was flagship) as carriers of convicts to Botany Bay.

About her are now shown, in their original state, all the airless dungeons and condemned cells, the whipping post, the manacles, the branding irons, the punishment balls, the leaden-tipped cat-o'-nine tails, the coffin bath and the other fiendish inventions of man's brutality to his fellow man. She marked the beginning of the end of England's monstrous penal system.

From keel to topmast she cries aloud the greatest lesson the world has ever known in the history of human progress.

Eighth Wonder of the World

Today the old vessel, sole survivor of that awesome fleet spared by the relentless Hand of Time and the fury of the seas, is often called by educators, thinkers and clergymen, the Eighth Wonder of the World, less ancient, but of tremendously more human interest than all the other seven combined.

THE CONVICT SHIP WILL NEVER AGAIN BE SEEN ON LAKE MICHIGAN

Your opportunity to visit her is NOW. If you do not seize it, yours will be the regret at not having seen the greatest and most extraordinary exhibition that ever visited this state. When you walk her decks, grooved with the chains of her miserable victims, the past will speak to you as sad, mournful lesson, but you will leave feeling better because you live in a better age. Wealthy Americans spend millions annually in visiting Europe's old castles and their prisons dungeons. Today you can walk alongside the oldest and most notorious floating prison the world has ever known. Do not miss this profound illustration of one of the most vital factors in the betterment of the age. During the period of the ships stay in Charlevoix the public will be admitted aboard daily from 10 a. m. to 11 p. m.

ADMISSION: 50C. CHILDREN UNDER 10, 25C

Open Daily, Including Sundays, 10 a.m. to 11 p.m. **Guides Explain Everything.** **New Electrically Lighted Throughout.** **Can be Inspected Night or Day.**

Local and Personal Mention

Mr. and Mrs. Robert McConkey of Lansing, Tuesday last in this city.

James E. Richards of Bellaire, was a business visitor here yesterday.

Mr. and Mrs. Robert Greenfield were visitors in Charlevoix last Monday.

A community Charaupqa program is now being carried on in Central Lake.

George Hockridge of Elk Rapids, was a business visitor in Charlevoix Tuesday.

Attorney E. N. Clink of East Jordan, was a business visitor in Charlevoix last Thursday.

James J. Bogart was in St. James Wednesday on business for the Argo Milling company.

Mr. and Mrs. George W. Moore of West Baden, Indiana, were Charlevoix visitors yesterday.

Mrs. Carrie Farrar of Cadillac, is spending a few weeks here, a guest of Mr. and Mrs. R. S. Faulkner.

One wonderful Albion College Glee Club Quartette at the First Methodist church, next Wednesday, July 20th, 8 p. m.

Mr. and Mrs. Fred Wilson moved down from Mackinac Island last Wednesday and spent the day with friends in the city

Mr. and Mrs. Phil Beaudoin, wife and mother, made the trip to St. James last Tuesday to spend a few days with friends.

Lou Briggs, after spending several days on business and visiting friends in Charlevoix, returned to St. James early this week.

Miss Minnie Dagenhardt of Brooklyn N. Y., a cousin of Mrs. Howard Thorman, is a guest at the Thorman Country Club.

Mrs. Ray Gilden, owner-manager of the Beaver Hotel at St. James, was a business visitor here for a day or two early this week.

Thomas Burke of Chicago spent a little time here during the first part of the week, continuing his trip to St. James Tuesday.

Nassau Burns came up from Plainwell last Friday to spend a few days with Charlevoix friends and to attend to business matters.

Don't miss hearing the College Glee Club Quartette of singers, Instrumentalists and readers, next Wednesday, July 20th, First Methodist church.

Mr. F. H. Yount, Special Agent of Customs with the department at Washington, D. C., with Detroit as his headquarters, has been a Charlevoix visitor since Tuesday, and with a party of friends is trying to make a record catch—of fish—in this locality.

Captain Owen Gallagher of St. James, was a visitor last Monday and spent some time with friends in Charlevoix during the early part of the week.

Miss Georgia Garnsey came up from Port Orange, Florida, last Saturday, and will remain for some time with her grandfather, "Uncle" George H. Van Pelt, at Hallett's Inn.

James O'Donnell and wife, and Ben O'Donnell of Detroit, made the St. James trip last Tuesday and will spend some time with friends on the Island before returning to their ho me .

Mrs. Nels Lafreniere, who has been visiting friends in Charlevoix and East Jordan for some time, returned to her home, St. James, last Tuesday, accompanied by her niece of East Jordan.

Members of the Women's Missionary society of the Congregational church will entertain with a Chauffers tea and program in the church parlors, Wednesday afternoon, July 20.

Miss Calla Travis and mother, of Grand Rapids, are at their cottage, 213 on the Belvedere grounds. A little later in the season Miss Travis will conduct classes for the young in dancing the same as in past years.

Mr. and Mrs. J. W. Harris of Oak Park, Ill., are at their cottage near Ironton. Mr. Harris arrived Friday morning and will spend the week. Mrs. Harris came on the S.S. Manitou Saturday and will remain for the season.

Mr. and Mrs. Louis Huffman of Detroit spent last Monday with Charlevoix friends. Mr. Hoffman formerly lived in this part of the state, but for upwards of twenty years has resided either in the west or in Southern Michigan.

Mr. and Mrs. W. S. Petty and son, the former Special Agent of Customs, Washington, D. C., with headquarters at St. Paul, Minn., are spending their vacation motoring through Northern Michigan, and at present are Charlevoix visitors.

Miss Evelyn Travis of Pasadena, California, has been secured by the Beach management and will act as director of dancing throughout the season. Special attention will be given to the younger persons in recreational games, story and social dancing classes. The season program opens with registration at the Beach Friday morning at ten o'clock.

Mr. and Mrs. C. W. Pollock of Cleveland, Ohio, are spending a few days in Charlevoix. Mr. Pollock is connected with the Department of Customs, as assistant-Washington, D. C., and with Mrs. Pollock is spending a short vacation motoring through this region.

Edward Pokorney and wife, and Alfred Pokorney, wife and two daughters of Detroit, are being entertained this week by Mr. and Mrs. Charles Novak. The party motored in from Detroit Monday. Both gentlemen are prominent factors in their home city, the former holding an official position as friend of the court in Wayne county and the latter engaged in building contracts.

Spanish War Veterans of Northern Michigan will meet at the home of Mr and Mrs. Richard O'Reilley, located on U. S. H., July 17, for the purpose of enjoying a picnic planned and sponsored by McCabe Camp U. S. W. V. Auxiliary. All veterans of the Spanish-American War are invited regardless as to whether or not they are residents of this part of Michigan. The O'Reilly home is north of Leveaing.

Mr. and Mrs. Charles R. Munyon spent the week-end at Cadillac, where they attended a birthday party out of the ordinary, wherein Mr. Munyon's brother, brother's daughter and daughter's son celebrated the anniversary of their birth, all of whom were born in the month of July, and on the same month date. The several members of the families held a re-union in the city park in which a large number of relatives participated, making for a most happy event.

Charles Parrish of Jackson, Mich., was forced to swim about one mile in Little Traverse Bay last Monday afternoon when his thirty-foot sloop in which he was sailing went wrong and began to fill with water, due to an unexpected break in her planking. Parrish reached the shore safely but in an exhausted condition. Later the sloop drifted on shore badly damaged. An effort will be made to recondition the little sloop. If this can be done the ship will be transferred to the inland chain of lakes for future service.

DEFORMED HEAD TO SAVE INFANT'S LIFE

Beauty Not First Idea of Disfigurement.

Although not so common as it was in years gone by, there are still numerous places in the world where deformities are manufactured for various purposes. This forms the theme of an interesting article which recently appeared in the Popular Science Magazine by Victor Raymond.

The deliberate flattening of the human head, for instance, says the article, continues to enjoy something like universality among savage and semi-barbarious people. Naturally, the operation is carried out during childhood of the subject, when the skull is still soft and malleable. The effect is to make the skull long, or short and broad, according to the particular method favored.

Nowadays, the head so disfigured is regarded as an object of beauty, but beauty was not the initiatory cause of the practice. Indeed, the flattened head was not originally a deliberately arranged result at all.

The custom dates back to the time when the man-pack still wandered from camping place to camping place. During such treks the head of the new-born babe must often have lolled in a dangerous manner, and, no doubt, sometimes resulted in a broken neck. To prevent this it became customary to secure the infant's head by some means during the trek. The flattened head was an unlooked-for product. Time passed, man gave up his nomadism and acquired settled habits, but the flattened head had become a tribal characteristic, and so was perpetuated.

The method employed to flatten the head varies with the district, in some places the child's head is strapped against the headboard of its cradle. In other places the necessary pressure is applied by bandages. Some tribes employ a contrivance made up of two boards. By the Kleinatans of Borneo a device is used which flattens the forehead, the object being to give the face, as near as possible, a half-moon shape.

The device, known as Tudul, is secured firmly to the infant's head when it is a month old, but the pressure is applied only when the child sleeps. Contrary to what one would expect, this deformation does not appear to have any injurious effects.

Many savage peoples render the faces of their womenfolk hideous by grotesquely disfiguring their lips. As with the artificial deformation of the head, the operation is carried out during childhood.

The girls' lips are pierced, straws being inserted in the holes. Next day another straw is added, and, when the holes have been sufficiently enlarged, pieces of wood with the thickness of a pencil are plugged in. This process continues until eventually the holes are capable of containing large disks. Filled thus, the lips at first project horizontally from the face, but as the disks grow in size, the facial muscles become unable to support them, and the lips droop.

In the Lake Tchad district of central Africa, the disk in the lower lip eventually reaches the size of a dinner plate, the whole hanging like a shield on the breast. The disk in the upper lip attains the dimensions of a saucer, and droops similarly.

Old-Time Embroidery

Petit point embroidery became popular during the Fourteenth and Fifteenth centuries. It was much practiced in France, where it was known as "au petit point."

New Palace Theatre

ATTRACTIONS FOR THE WEEK

Saturday and Sunday, July 16-17

Thomas Meighan in "Blind Alleys" with Evelyn Brent, Greta Nissen. Come, follow your favorite star through "Blind Alleys." To thrill-packed entertainment! To rousing adventure! To love and happiness at last!

Also a Fox comedy, "Dizzy Dancers."

Monday and Tuesday, July 18-19

John Gilbert in "Twelve Miles Out." Its positively the greatest picture of the year. Als an Educational comedy, "Drama De Luxe."

Wednesday and Thursday, July 20-21

Bebe Daniels in "Senorita," with James Hall, William Powell. Star calls "Senorita" greatest story ever. For she is my gay Senorita, plunk! plunk! As romantic as a moonlight serenade. More laughs from Bebe than ever before.

Also Felix the Cat, and Fox News.

Friday, July 22

"Cradle Snatchers," with Louise Fazenda. The smartest and sauciest comedy-drama ever written by an American. Holds the world's standing laugh record—two years on Broadway.

MAJESTIC THEATRE

Saturday and Sunday, July 16-17

Hoot Gibson in "The Silent Rider." Hoot Gibson, greatest horseman on the screen, in a story chuck full of action and romance. Also a Fox animal comedy, "Napoleon Jr."

THE PARK AVENUE CLUB

On the Bluff Overlooking Lake Michigan

No. 209 PARK AVENUE

Dinners and Luncheons *Meals by Day or Week*

Special Attention to Steak Dinners

MRS. E. REINHOLD, Manager

Boat Club Elect

At a meeting held Wednesday which was well attended, officers were elected to carry on the activities of the Pine Lake Boat Club, the meeting resulting in the election of officers as follows: Commodore, John R. Wineman; Vice Commodore, George A. Shwab; vice rear Commodore, Gerald Hollingsworth; 2nd vice rear Commodore, Julius Gilbert; secretary, Mrs. M. Roy Brady; treasurer, Robert Bridge.

The officers with members of committees will arrange a program of events for which trophies will be offered to winners of events at the annual regatta scheduled for August 5-6-7. A joint meeting is called for today between the Boat Club officials and members of the Charlevoix Association of Commerce at which a tentative program will be considered and such action taken as will insure success of the annual regatta.

Gave Thrifty Farmer Lesson in Reverence

A country minister, who has a keen sense of humor, tells of this instance. It was in the hills of Pennsylvania and a farmer noted for his thriftiness and industry asked the minister to come out to his place on a certain day to marry him.

When the minister arrived at the designated time he found the farmer in his work clothes and bare feet, plowing, and leaving his team standing in the middle of the field he approached the minister. At the same time the bride, likewise no more gayly garbed, approached the pair.

The minister asked the groom if he had not better tie his team before the ceremony began.

"O," replied the man, "it won't take long, and they will be all right."

The minister thought he would give the man a good lesson in reverence and so he chose the longest service he knew and prolonged the prayer to almost endless length. Needless to say, the neglected team had in the meantime plowed a furrow that was not consistent with a careful farmer's rule, and the minister enjoys his little joke to this day.—Chicago Tribune.

Some Figures Lie

Figures don't lie; you can prove anything by statistics, according to a New York statistician. We wish the professor would provide us with the figures that prove $30.50 is too much for a piece of felt with a feather in it just before Easter. . . . Among the early Greeks the wearing of breeches was a mark of slavery. But now the ladies are starting to wear the breeches, and if they're slaves then Nero was a cousin of Uncle Tom.

. . . The amazing revelation has just been announced that an intelligent man has a vocabulary of 5,000 words. Proving that even a smart man occasionally misses a three-inch putt. And, perhaps that certain large fishes in the tropics climb trees. —Exchange.

Pets Drink Gas and Die.

Drinking gas was fatal for pets of L. Roberts of Marcus Hill, Australia, recently. Roberts is employed at the gas works, and took home a small tank which had been at the works for some time. On the way home he filled it with fresh water, which he put into the troughs for his pet pigs and ducks. Next morning six pigs and many ducks were dead and other animals were ill. The tank contained gas fumes that the pets consumed as they imbibed.

Fact Generally Admitted

One of Britain's popular blond beauties, a London actress, received in her dressing room a feminine admirer who had called to "talk art." The conversation had fallen flat, due largely to the fact that the beautiful blond would talk of nothing but herself. Finally the visitor turned in desperation to an old standby.

"I suppose," she said, "that your great ambition is to play Shakespeare?"

"Well," said the actress, "he has written some nice parts."

Head Adapted to Habitat

The bizness of beauties says that the shape of the head of the halibut fish is quite different from other species, as its shape conforms to the depth at which it is found. This fish is elongated and rather thick in form and lies on its left side, which is white, while the right side, uniform dark brown in color, with very small smooth scales, is uppermost and bears both of the large eyes. The capacious mouth is symmetrically placed, as also are the ventral fins.

Antiquity of Concrete

Prof. Duff Abrams, the well-known American scientist, has recently drawn attention to the fact that concrete is older than the Christian era. It is, indeed, one of the most ancient of the world's industries. The Romans were skilled in the use of concrete, and the dome of the Pantheon at Rome is of concrete. There is, too, a fresco at Thebes which shows the process of manufacturing concrete.

Information

Mother was asking her son about the fine points of hockey. Question after question she asked him, and he answered glibly, for, like all youths, he was well versed in sports at least. The small youngster was listening round-eyed to all these questions. Finally she said in amazement: "Why do you ask brother all these questions? You're older than he is and you must know more than he does. Sides I thought you knew everything anyway."—Springfield Union.

Color for the Home

The selection of an exterior color scheme requires sober thought. A good rule to follow is good taste, which is always a safer standard than a mere fad. It outlasts any passing fancy and is never freakish. Good taste rests on simplicity by the use of paint of one color for the body and a darker or a lighter shade of the same color, or white, for the trim.

BEAVER ISLAND

The Rays are at their cottage at Nomad

Ben O'Donnell of Detroit, is here on a visit.

Pat Lafreniere and Fred Nackerman are in Detroit.

Lou Briggs spent several days in Charlevoix last week.

Capt. C. Denny of Grand Rapids is here again for the summer.

Mrs. Nels Lafreniere Sr. of Detroit, is visiting her son, Nels.

Mrs. Gladys Pelltiere is visiting friends in Charlevoix this week.

Miss Edith Gallagher is visiting friends in Ludington for a few days.

Dr. and Mrs. Ruth of DesMoines, Iowa, are at their cottage for the season.

Miss Christine Larson of Detroit, is visiting her brother, Arthur Larson.

Mrs. Elzie Jucker and son, Jack, of Kalamazoo, are guests at the Hotel Beaver.

Clarence LaChance of Chicago has been visiting St. James friends for some time.

Ed B. Gallagher and daughter, Clara, spent the week-end with Charlevoix friends.

Mrs. J. F. Maloney and family of Chicago, are at the Burke cottage for the summer.

Mrs. Ray Gilden and sister, Mrs. Dennis D. Boyle, spent the week-end in Charlevoix.

Mr. and Mrs. Veral Ruth and family of New York City, are spending the summer at their cottage.

Mrs. John McCann arrived home Tuesday from Charlevoix. George, her grandson, came with her.

Mrs. Earl Miller and daughter, Jane, of Charlevoix spent several days with St. James friends recently.

Mrs. Adolph Pellitiere spent several days with friends in Charlevoix, returning to St. James last Monday.

James D. O'Donnel, wife and daughter, of Detroit, are visiting his parents, Mr. and Mrs. Daniel O'Donnell.

Phil Beaudoin, wife and son, of Gloucester, Mass., are here on a visit. It is thirty years since he left the island.

Mr. and Mrs. Fred Zaluski, who spent about ten days here with relatives, returned to their home at Ludington last Saturday.

Mr. and Mrs. John Quinlin, visitors for some days at Detroit, are at their home again.

Thomas Malloy is making his brother, L. J. Malloy, an extended visit. This is his first trip to St. James in a score of years. He resides in Chicago.

James Wyers of Charlevoix spent a little time here last week and sold several cars to local citizens, the same to be delivered through the Wyers-Smith agency at Charlevoix.

After spending some time on the west shore of Lake Michigan, the ship Rambler returned to St. James from Marinette, Wisconsin, early this week and will sail from her home port, St. James, again.

BISHOP ORDAINS EIGHT SEMINARIANS PRIEST

Eight seminarians were ordained priest recently by the Rt. Rev. Michael J. Gallagher, D.D., Roman Catholic Bishop of Detroit, in SS. Peter and Paul's Cathedral. Three of the new priests were ordained for the Detroit diocese and the others for dioceses in various parts of the country.

The new priests are: the Rev. Frs. Alfred J. Feldpausch, of Fowler, Mich.; William L. Shaw and John Miller, of Detroit; Stanislaus Czerniawski, for Burlington, Vt.; Anthony Glaudell, for the Archdiocese of Philadelphia; Stanislaus Libold, for Duluth, Minn.; Theophil Wloblewski, for Scranton, Pa., and Anthony Zapora, for Pittsburgh, Pa.

The first diocesan retreat for priests of the Detroit diocese will open on Tuesday, July 5, at 6 p.m. and close Saturday morning, July 9. The second retreat will open Monday, July 11, at 6 p.m. and close Friday morning, July 15, according to a recent announcement by the Rt. Rev. Michael J. Gallagher, D. D., Bishop of Detroit. The retreats will be held in the Sacred Heart Seminary, Detroit.

Scours in Lambs Caused Usually by Carelessness

Experience has caused many breeders to believe that scours in lambs, like the sore eye trouble, is generally the result of carelessness. Heavy feeding of grain, soon after lambing, may cause scours, but the main trouble is caused by failure to keep the ewe's udder milked clean while the lamb is small, too small to use all the milk. This old stale milk will poison the lamb and affect its digestive organs. It is easier to prevent than to cure. When a ewe brings a lamb, feed grain sparingly until the lamb can use all her milk; and keep the excess milk stripped from her udder, during this time, and you will seldom have scours in your lambs. In the first ten days of a lamb's life, it either gets a good start in life or a set-back. A lamb well started is about half made. About 90 per cent of the time a sheep is just what its master made it, but that covers a lot of ground and is another story.

"While There's Life—"

Life in this old vale of tears and brighter, especially the former, is discouraging in some ways and we have devoted twenty-five years, handpanning, to trying to cultivate sufficient tact to convince wife's relatives in a nice way that it wouldn't be convenient to have a visit from them at the time mentioned, and look at us now.—Ohio State Journal.

CHURCHES

Baptist Church

Rev. Herman Burns, D. D., —) Pastor (—

Pastor E. G. Leisman of Gaylord was the very acceptable supply last Sunday morning, and Prof. Newton Carman of Lombard College, Galesburg, Ill., gave a very instructive lecture on China, in the evening. To both of these we say: "Come again." A good congregation greeted each.

The pastor will speak at each service next Sunday at 10:30 in the morning and 7:30 in the evening. Bible school at noon and B. Y. P. U. at 6:30 p. m.

Tourists are especially welcome.

It requires real character to be in the church services when there is so much to divert attention, but eventually that kind of character wins in the race of life.

Methodist Church.

C. E. Pollock, Pastor.

Church program for July 17: Church school meets at 9:30 a. m. "Dynamic Belief," subject, 10:30 a. m. "Something About 'All Things'" 7:30 p. m. "Institute Echoes" 8:30 p. m.

The Lord's supper sacrament will be served at the closing of the morning worship.

The Lodeeson orchestra from the Inn will play at the evening services.

Young peoples' prayer meeting begins each Tuesday at 8:00 p. m., and lasts a half hour, followed by a social hour. All young people, especially those here only for the summer, are cordially invited.

Bay View programs may be obtained from the pastor, who has supplied himself with a liberal supply to accomodate all who wish them.

Congregational Church

Rev. B.G. Mattson, D.D., Minister

The service of morning worship is at half past ten, preceded by the Sunday school session at 9:30. The subject of the Pastor's sermon will be "Unto the Mountains."

The evening service at 7:30 will devote a half hour to song and worship and thirty minutes of interpretive conversation dealing with books of inspiration and value for living.

Summer visitors are cordially invited to all services.

The Ironton church service is held at 2:30 p. m.

Church of God

Rev. G. H. Pye, the new pastor, is expected here for next Sunday, July 17. Come and get acquainted.

We are glad to have Brother Walter Willis and wife among us again for a while and enjoyed a good message from him last Sunday evening.

Don't forget the prayer meeting and Sunday school. Both are very important. Time for services as usual.

Sunday services at 10:30 a. m. and 7:30 p. m.

Young peoples' meeting at 6:30.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "Life."

Sunday School 12 o'clock.

Wednesday evening service 7:45.

Reading room, Tuesdays and Saturdays, 3 to 5 p. m.

The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church

Sundays 6:00 a. m., and 9:00 a. m.

Saturdays and Mondays mass at 7:00 o'clock a. m.

Rev. Fr. Odelo.

Danger From Insects

Doctor Nonvy of the Entomological society of London, has stated that insects destroyed at least 10 per cent of all the plants which man cultivates for food or clothing, and it has been calculated that if the checks, natural and artificial, on the increase of the many species of green-fly, for example, were removed, the whole of the vegetable growth of the globe would be destroyed in six months.

On to Stay

"See if you can laugh that off," said the fat man's wife, wiring a button onto his vest.

"Lost Dauphin" Bobs Up Again

Libel Suit in Paris Court Revives Mystery of French Heir.

Paris.—Once more across the scene in France there passes the tragic figure of the "Lost Dauphin," the pathetic uncrowned Louis XVII, who died a prisoner in the Temple and around whose personality a score of legends have been woven. Still the tale persists that the unfortunate prince escaped; still recollections are brought forth of the dozens of pretenders who have claimed that they were the authentic heir to the fourteen throne of France. Only the other day in a Paris court there was certain an echo of the famous Naundorff case when Louis Charles Jean Phillippe de Bourbon, calling himself the rightful king of France, brought to unsuccessful action for libel on account of statements published about Naundorff, his grandfather, says the New York Times.

Who the last-period Dauphin rescued from his prison tower by royalists and taken to Guelnarf Fort to make his way to America and end a long life there, as some have asserted? Eminent historians have lasted themselves for years producing proofs of the prince's death and abolishing the reports that he was seen in other countries long after the date of his burial.

No less than 23 "lost Dauphins"—the foremost of them Naundorff—have appeared before French courts to prove their claims. Hergevault, Frochard, Marmaire, Mathurin Bruneau, Dufresne, Persat, Auguste Mevas, Fontolive, Richemont—these are only a few of the "missing princes" who each in his day collected enthusiastic partisans and disturbed the government of France.

The little Louis XVII who saw the royal father and Marie Antoinette, his mother, go from the Temple to the guillotine has not been dead long enough before there were signs that the tale that he was still alive was finding its way to posterity. In a work by a certain Hegmardi-Warin it was declared that the Dauphin was smuggled from the Temple tower in a wooden hobbyhorse and a dumb and elderly child left in his place. This was the child, it was asserted, that died in the prison. The Dauphin himself, according to the romancer, was hailed as king at Fontevo and later ascended a throne in America. The ship was seized by a republican frigate and the Dauphin died between its decks.

Wide Variety of Claimants.

The Regnaud-Warin column inspired many claimants to the throne. Startlingly alike are the tales narrated by the various "Dauphins" as they were brought before the court. Hergevault, the son of a tailor, sprang into notice from the dust claimant, gathering a small court about him and declaring that the elder Hergevault had provided the substitute in the tower, while he himself was the real prince. Hailed for a time in Spain as the authentic Dauphin, Hergevault was arrested on his return to France and sent to prison for four years. But no sooner was he free than he collected once more his circle of follower and resumed his role of royalty. Frochard, a Marseilles cobbler, declared that he was the son of a Parisian dress maker and the Dauphin. Persat, a Paris lawyer, declared that he was the son of a clockmaker. A third contestant pointed to the mark of a four-petalled crown and the Dauphin initials on his thigh as proof that he was the prisoner of the Temple. Both found adherents who were loyal to them.

The regular ranks refuses to believe that romantic figures pass away. So finally had the tale of the substitution child gripped the public that it became the foundation of every "missing Dauphin" claim that appeared. Matthurin Bruneau, the son of a stonemason, returned to France from America to press his claim to the throne. He went further than his fellow-claimants, issuing a series of proclamations in the name of the king of France which promptly landed him behind prison bars.

Up to the time of the fall of the monarchy the "missing Dauphins" had uniformly been persons from the lower ranks of society; but now a family different even from the individual of natural gifts with the ability to command influential circles even about to appear. In this classification are listed Naundorff and Richemont, the two men who gave the government of France the most to think about in connection with their representations.

It was in 1810 that Richemont made his last bid with the publication of his "Memoirs of the Duke of Normandie, Son of Louis XVI." The work was impressive, seemingly well authenticated claim, backed by many documents and signed by some important persons.

Facts of Richemont.

Unfortunately for Richemont, however, he seems to have been possessed of a natural liking for intrigue of all varieties. Following on his memoirs with a volley of pamphlets and letters enthusiastically in a host of political intrigues, he rapidly became such a thorn in the side of the government that the police made a descent on his lodgings, where they unearthed papers of a treasonable character. One more "Dauphin" went up trial, this time charged with conspiracy against the life of the king and the safety of the state.

He created a sensation by declaring that he had disclosed his identity as the Dauphin to Louis XVIII, but had refused to press his claim to the throne at the time, feeling that it would precipitate a civil war. He told a tale of being rescued from the Temple in a basket of laundry and carried lightly, according to Richemont's account, to Fontevo and later to Spain and Portugal. Finally he ended a life of hardship and poverty in the various "Dauphins" as they were brought before the court. Hergevault, the son of a tailor, sprang into notice from the dust claimant, gathering a small court about him and declaring that the elder Hergevault had provided the substitute in the tower, while he himself was the real prince. Hailed for a time in Spain as the authentic Dauphin, Hergevault was arrested on his return to France and sent to prison for four years. But no sooner was he free than he collected once more his circle of follower and resumed his role of royalty. 'Very Touched' French Rival of 'Delighted'

Paris.—"Very touched" is President Doumergue's equivalent for "I. D." "Delighted."

Every time any visiting sovereign, statesman or delegation pays a tribute to his nation or himself, the French President encounters with that phrase. Sometimes he declares himself "infinitely touched" by the compliment, sometimes only "very," sometimes again "extremely," but the occasion warrants it. But always there is that word "touched"—"touché"—for M. Doumergue pronounces it with the inimitable lingering, carressing Southern accent.

Methods Used to Control Yellows

Disease of Cabbage Is Caused by a Fungus Which Persists in Soil.

(Prepared by the United States Department of Agriculture.)

Yellows of cabbage, through injury to the fibrous root system, stunts the plants, giving them a lifeless, yellowish green color. It may usually be detected in two to four weeks after transplanting, but may appear in the seedbed. Yellows is caused by a fungus which persists in the soil for many years. The disease greatly retards the growth of the plants, death resulting, in the worse cases, within two weeks or so after transplanting. Most of the plants, however, continue a sickly existence for a month or more, and a few live through the summer, heading imperfectly.

Only Safety Plan.

While various methods are employed to control the yellows, the only safety lies either in planting the crops on disease-free land or in using only yellows-resistant varieties. The Volga and Hoosier are the most resistant of the other domestic varieties. The Wisconsin Hollander is a disease-resistant selection from the standard Wisconsin All Seasons and Danish Ballhead, and should be planted wherever the late crop is grown on yellows-free soil. All Seasons and Brunswick, two of the leading midseason varieties used for sauerkraut, are now known to be vulnerable to the disease in Holland in connection with a "discovery" was permitted by the Dutch government to visit that land. Stricken by a sudden illness, he died just after his wife and daughter had been separated from England. The "Nansdorff the inventor," who had brought Napoleon down and started a legion of other historic figures into his testimony and who had told of imprisonments, persecutions, exercise and wild adventure as the lost prince, the Dutch government accorded a great funeral. Soldiers bore the bier and public men followed it to the grave.

The most picturesque and important claimant had passed. It was Naundorff who asserted that acid in which he had been carried to the top of the tower and hidden there by republicans while another child was put in his place. When the substitute died, in late June, the body was removed from the coffin and, arranged with aplomb, he was smuggled into it. On the way to the cemetery by a carriage he was removed and the empty coffin was buried.

Among the theories advanced and given wide credit in connection with the death of the Dauphin is the one that states that the unfortunate prince was murdered in the Temple in August, 1794, and that a feeble child was substituted in his cell. Then this child in the course of time succumbed. It was given out that the Dauphin had died a natural death and the substitute was interred as Louis XVII. Not even the tale of Kaspar Hauser, France's other pathetic prince, can compare with that of the Dauphin in its bold on the imagination. Many a drama pretenders have sprung up in history, but never in such numbers as those who have aspired to be hailed as Louis XVII.

Floating Girls' School

New York.—A floating Adanless Eden is being arranged. A girl's floating university is to start next fall on a six months' trip around the world

Check Depredations of Different Garden Pests

Some insects are beneficial in their diet. They will devour almost any of the vegetables. Of this type are cutworms, the adult moth, but the leaf-hopper flies chiefly upon potatoes, tomatoes, cucumbers and beans. A mixture of calcium arsenate dust will control this pest, and also plant lice.

Favorite foods of the flea beetle are radishes, cabbages, turnips, tomatoes, cucumbers, potatoes, and beans. It usually feeds on the underside of the leaves, and can best be destroyed with nicotine dust or bordeaux mixture. About the only way to check the depredations of the cabbage worm is by hand-picking the worm and the grasshopper, is with arsenical poisons.

Asparagus has a beetle of its own. Spraying from both sides with lead arsenate will put a quietus upon this red, black and yellow feeder.

Sudan Grass Is Favored for Live-Stock Pasture

Sudan grass has proved to be the most satisfactory summer pasture for all classes of live stock in Kansas, according to the report of L. E. Call, dean of the division of agriculture at the Kansas Agricultural college and director of the Kansas experiment station. It retains its sweetness in dry weather and withstands drought better than any other pasture crop under observation by the experiment station.

Sweet clover is less valuable for hogs than alfalfa but is satisfactory for cattle and sheep.

Orchard grass has proved to be one of the most satisfactory permanent pasture grasses. It is easy to start, stands grazing well, and all classes of live stock relish it throughout the entire grazing season.

Agricultural Facts

Forcing yields up forces costs down.

• • •

Honey bees seldom live more than six weeks.

• • •

Every farmer who does not keep his soil built up should be run down for robbery.

• • •

Labor-saving equipment is the broom that helps to sweep drudgery out of farm houses.

• • •

Alfalfa seed imported from South America will be mixed with an orange red color on and after July 2, 1927.

• • •

Thinning the fruit on trees which set heavily will improve the fruit and will greatly increase the size and general quality of the crop.

• • •

One of the big secrets of success in raising lambs is to get them to market as early as possible. Two things that hasten development are plenty of rich protein feed and shelter in cold, rainy weather.

• • •

The voluntary clean-up by farmers in the county fever control area in western New York has been so effective that it seems that little or no compulsory work will have to be done by state or federal authorities.

• • •

Farmers have equally as good selection doing research work for them as does industry. The point where in the farmers or agriculture fail short is that it does not carry the discovery power with which to put into effect the results of experimental work.

Hobees Fatten on Good Nature of Housewives

New Britain, Conn.—Any goss lobo with a hard-luck story can make from $12 to $15 a day, in the opinion of Prof. W. R. Bailey, formerly of Yale, who lived the life of a tramp three summers and then for ten years conducted a hobo's lodging-house. "Thanks to the American housewife, the easiest thing a tramp does is to eat," he said in telling of his experiences at a Lottary club's dinner. "The only objection he has to the American housewife is that she insists on feeding big hiu cake and pie when what he wants is a slice of meat between two pieces of bread."

GOVERNMENT COSTS PEOPLE 11 BILLION DOLLARS YEARLY

Figures Represent the Aggregate Expenditures of Federal, State and Local Governments.

Washington.—The total cost of government, the United States for the fiscal year 1925 was $11,124,000,000, compared to $10,883,000,000 for 1924 and $2,919,000,000 for 1913, according to the national industrial conference board, as announced recently. These figures are the aggregate expenditures of federal, state and local governments, including capital outlays and debt requirements.

The increase over 1924 was despite a $395,000,000 decrease in the federal government's disbursements. Federal expenses increased again in 1926, however.

"Although the federal government in 1925 succeeded in checking the rising tendency of its expenditures through a consistent policy of economy and judicious debt retirement there is little hope that departmental expenses can be much further reduced owing to the increasing demand for necessary public service of all kinds," said Magnus W. Alexander, president of the conference board. "State and local governments have recently felt bound to satisfy the opposite policy, spending more and more from year to year and borrowing whatever they needed to make up the discrepancy between tax collections and expenditures."

Local agencies in 1925 expended $5,-320,000,000, according to the board's figures, as against $5,121,000,000 in 1924 and $5,035,000,000 in 1923. State governments spent $1,330,000,000 in 1925, $1,311,000,000 in 1924 and $1,-284,000,000 in 1923. Federal expenditures for the fiscal year 1925 were $3,-705,000,000; for the two preceding years, $4,021,000,000 and $3,582,000,000. In 1926 they increased to $3,936,000,000.

The increase in population has been more rapid than that of expenditures, however, as the per capita cost of government decreased slightly in 1925. The per capita expenditures in 1925, according to the board's computation were $96.14; for 1924, $93.38; for 1923, $91.06; for 1918, $30.21.

EXOTIC SHAWLS FOR EVENING; MILLINERY FOR SUMMER TIME

"SEE the new moon, make a wish and it will come true." Here's guessing the wish made by thousands of star-gazing women—Spanish shawls! Friend husband asks the "better half" to choose the gift she wants most—"Spanish shawl!" her eager reply. Daughter of the household is about to carry the "ollos bonos." What shall devoted mother and father bestow upon their loved one as a graduating gift—Spanish shawl! Mr. and Mrs. Newlywed are on their honeymoon, are lovely crepe de chine squares. In white or pastel color, unadorned save for long hand-knotted fringe. Silk squares with wide bands of color or gold cloth bordering them are the smart thing in Paris. The centers are hand-painted or embroidered. This sort are fringeless.

Yes, we believe in evolution, speaking of course from a fashion standpoint. For proof, we cite certain tidbits lists as created, this season, by renowned Parisian modistes. See in the picture how several of these models, the original creator of the fashion's lovely log-cabin patchwork and other quaint quilt patterning into a smartest Twentieth-century millinery.

Perhaps it is Italian art—wouldn't mind flood the world therefore for the intricately interworked taffeta also ribbon hats which are glorifying present-day millinery models. Come the inspiration from what source it may, one thing is supreme—not twenty note has been sounded by the milliner who is using taffeta in such unique and alluring ways as created and fled in the huts in this group.

Taffeta is a very important medium for the making of the better class of millinery this season. Many of our loveliest hats are built patch upon patch, fold upon fold of taffeta, displaying not only a fine workmanship but also revealing color schemes which furnish subject matter for artist and poet.

Note the hat in the center of the group. It is the reminiscent of the silk log-pattern patchwork you have been treasuring for years in that cedar chest of heirlooms? The mirror ribbon work out a delicate rainbow coloring, while the contour of the hat is the "very latest." Especially consider the stylish model, a side-back view of which is here given below to the left. The darker stripes are navy blue, introduced into a medley of old rose, pale green, nasize and gray tat fets.

The first hat shown stitched taffets combined with sitrous grosgrain ribbon. Folds of taffeta are crisscrossed into an artful design for the hat in the top to the left. The group is concluded with an all-taffeta bun with markings of fine podathine straw. The tiny roses about the crown are formed of multicolored taffeta.

Spanish Shawls Are Popular.

What shall the proud groom buy for his happy bride—"Spanish shawl" it says she.

An exotic shawl for evening wear is the imaginative thought every luxury-loving woman this season, and fashion is giving every encouragement to this ambition. Better one elegant evening frock plus one gorgeous Spanish or Italian shawl than a whole wardrobe of pretty dresses minus the shawl, when it comes to beautifying the summer moonlit scene.

"It's in the play," this keeping the frock intensely simple so as to give all glory to the shawl. And how valuably gloriously nilnaby enwraps herself in its silken draperies! Yes, indeed, there's art and artlessness required in the wearing of these lovely colorful befringed and embroidered silken shawls.

This vogue for the evening shawl is getting "more so." Not only the priceless Spanish or Italian genuine article is bringing joy to the exclusives who can afford them, but demand is in the ascendency for allken squares of every type and color befringed and embroidered in many interesting ways.

Either the new shaw are heavily embroidered, or they're not. Competing with the flower-covered types

Hints on Flavor.

Flavor is a subtle, alluring thing, and yet it is of utmost importance

In cookery, as food must please the eye before it gives pleasure as well as nourishment. Flavor is that something which distinguishes really artistic

home cookery from the nondescript, boarding house variety, and it is what makes French cookery seem so very unique and delicious to the average American who goes abroad.

The simplest of seasonings is salt, but to still more properly is an art. Food too salty is flat and tasteless. The same thing is true of the peppers we use in seasoning; too much is annoying; just enough enhances the flavor.

The European cook not only uses onion and leeks freely, but knows how to use them in that suggestive manner with skill and delicacy that shows her artistry. A clove of garlic rubbed on the inside of the salad bowl will give that touch of flavor, and this is not considered by her too much trouble.

Spices and condiments are used by the European with great freedom, thereby gaining piquant flavors, so blended, that no one can be distinguished.

It is more a matter of taking infinite pains in cookery that produces these tasty foods than an extravagant expenditure of money for rare foods and flavors.

The careful cooking of meats, closely covered to hold in all the flavor, the cooking down to make the delicious brown sauce with which to serve it—all small details—but so important in food and flavor.

Puddings, custards, sauces, cakes and baked apples are all made a more mellow flavor if made with sugar that has been caramelized. Place the desired amount in a heavy saucepan or iron frying pan and stir over the heat until the sugar is melted and of the color of maple sirup. It is well to remember that caramelized sugar is less sweet, so more sugar should be used with it or more of the caramel used.

Nellie Maxwell

Fine Attributes

The love of moral beauty and that retention of the spirit of youth which is implied by the indulgence of the poetical taste are evidences of good disposition in any man and argue well for the largeness of his mind in other respects.—Leigh Hunt.

Hard Situation

It's a wise father who knows what his own son is doing and can check the young scamp without arousing suspicion as to how he got so wise.

NECKLINES SOFTENED

The necklines of this season have been perceptibly softened. Usually a flower or a bow is perched at the shoulder to relieve any austerity.

TWO IN ONE

Two slips with one georgette dress —one stiffcolored, the other puffy petticoated—make the one frock function as two.

FEATHER BOUQUETS

Bouquets of ostrich feathers, or combinations of French flowers and ostrich feathers give a very airy touch to the chiffon dance frock.

VELVET FLOWERS

A simple gown of plum-covered flat crepe has for trimming only a girdle of flat velvet flowers in the simili shades of red, cerise and purple.

THE KITCHEN CABINET

(©, 1927, Western Newspaper Union.)

"The best aristocracy of which any man can boast is a long line of healthy, honest and industrious ancestors.

He who prides himself upon his ancestry is like potatoes—all that is good of him is under ground."

SUMMER MEATS

The perishable meats supply us a variety for summer which are enough to keep us from monotony. Sweetbreads, tongues, liver, brains, are all good foods when nicely cooked and served. Some people enjoy kidneys, even these may be so cooked and dressed that the unhabituated may dare to try them.

Sheep's Kidneys en Brochette.—Take six sheeps' kidneys, cut through the center, remove the white core and pull the kidneys apart. Season with salt, pepper, and a few drops of lemon juice. Run a skewer a piece of kidney and a piece of bacon alternately, until the kidneys are on the skewer. Place on a broiler, baste while cooking and serve when cooked five minutes.

Smoked Beef Tongue.—Wash and soak the tongue over night. In the morning put on to cook in a kettleful of water, simmer gently for four hours or until perfectly tender. Add more water if needed. Let stand until cold, remove the skin from the tongue and serve sliced and garnish with parsley or serve sliced, heated in any well-seasoned sauce.

Beef's Heart Stuffed With Veal.—Soak the heart three hours in cold water to draw out the blood, wipe dry and season with salt and pepper. Take one pound of uncooked veal chopped fine, one-fourth pound of salt pork also chopped fine, four tablespoonfuls of bread crumbs, one tablespoonful of onion juice, one teaspoonful of salt, one-fourth teaspoonful of pepper, one egg slightly beaten. Mix all these ingredients and stuff the heart. Wrap in a cloth and set in a kettle of boiling water and let simmer for three hours, then remove the cloth and place in a baking pan in the oven for an hour, basting frequently with the juices left in the pan.

Potted Chicken.—Take the meat from cold roast chicken, rejecting the skin and gristle, pound in a mortar, put allow a half-cupful of chopped tongue or ham. Put the bones in a saucepan and cover with a pint of cold water, cook to less than a cupful, season and remove the fat. Pound the chicken to a paste with the tongue or ham, adding a little of the liquor in which the bones were cooked, and melted butter. Put into glass and cover with melted butter. Cover with a paper cover and keep in a cool place.

CARIB GOLD

By ELLERY H. CLARK

WNU Service

COPYRIGHT 1926 by BOBBS-MERRILL CO.

STORY FROM THE START

In the small New Jersey village of Straitenough, in the year 1742, Richard Lindsey, who tells the story, gives an exhibition of his marksmanship to Harold Mc-Allister and a stranger, with whom they afterward dine at the tavern. The conversation turns on the notorious pirate whose ship, the Black Panther, is expected to be in the vicinity. Next morning Lindsey, after will power, sets out to sea in a boat with three strangers and on the beach near him. They land on Coral Key and find Mr. Crawford, recognized by Lindsay as the man he talked with the day before, kills one of his companions. Lindsey escapes. He discovered. The third man is Captain Barclay of the Black Panther. The three go aboard. Lindsay meets Barclay's wife and hears he bears a remarkable resemblance. Robert McAllister, whom Barclay captured on his way to his wedding. Lindsay and Barclay has sworn to kill the other before he will consent to act as a spy in his uncle's household. He refuses and is killed. Lindsay is asked to take his place.

CHAPTER IV—Continued

I was silent, unable to give a direct and immediate answer. To be stripped and lashed to the mast, and to hear those drunken ruffians pelt me with cake that would break and silver on my naked flesh—that, indeed, as I had expressed it, would be dying like a dog. But the like a mule there was the rub. To pass myself off for another, to the, either by speech or action, a hundred times a day, to gain a man's confidence and then basely to betray him—was this living like a man? And at length, with a great feeling of resentment, I turned upon him.

"It's a fine choice to give me," I cried. "God knows I have no wish to die, but to be a traitor, a sneaking spy—how can I do that?"

To my surprise (for I never got over being surprised by the very wonder of this man) instead of being angry, he gave me a hearty clap on the back. "Well spoken," he cried, "and heliver me, lad, if Andrew McAllister were a decent man I'd be proud to call him friend now, if I knew one good thing to say for him. I'll not ask you to do what I propose. But you don't seem to understand. If I asked you to kill a rat, a snake, a cockroach, would you hesitate? And if I told you that it was your duty, and that by any stratagem, would that native any difference? Of course it wouldn't, I've called Andrew McAllister a rat, but apologize—to the rat, I mean. He's rat and snake and cockroach all in the picture how several of these models, the original creator of the fashion's lovely log-cabin patchwork and other quaint quilt patterning into a smartest Twentieth-century millinery.

Perhaps it is Italian art—wouldn't mind flood the world therefore for the intricately interworked taffeta also ribbon hats which are glorifying present-day millinery models. Come the inspiration from what source it may, one thing is supreme—not twenty note has been sounded by the milliner who is using taffeta in such unique and alluring ways as created and fled in the huts in this group.

It is more a matter of taking infinite pains in cookery that produces these tasty foods than an extravagant expenditure of money for rare foods and flavors.

The careful cooking of meats, closely covered to hold in all the flavor, the cooking down to make the delicious brown sauce with which to serve it—all small details—but so important in food and flavor.

Puddings, custards, sauces, cakes and baked apples are all made a more mellow flavor if made with sugar that has been caramelized. Place the desired amount in a heavy saucepan or iron frying pan and stir over the heat until the sugar is melted and of the color of maple sirup. It is well to remember that caramelized sugar is less sweet, so more sugar should be used with it or more of the caramel used.

Nellie Maxwell

Fine Attributes

The love of moral beauty and that retention of the spirit of youth which is implied by the indulgence of the poetical taste are evidences of good disposition in any man and argue well for the largeness of his mind in other respects.—Leigh Hunt.

Hard Situation

It's a wise father who knows what his own son is doing and can check the young scamp without arousing suspicion as to how he got so wise.

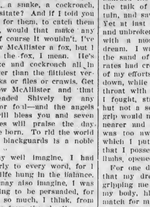
CHAPTER V

Two of a Trade.

Two weeks had passed since I had first boarded the schooner, and in that time, with favoring winds and under cloudless skies, we had passed from the waters of the North Atlantic into those of the Caribbean.

It took some time for the cut on my cheek to heal (leaving, to the delight of the captain, a crooked scar), but when I had once regained my customary vigor, I found little enough to do; for the captain kept me aft, away from the quick-fisted crew, and though nominally an officer, I was, as a matter of fact, as almost the sense footing as a prisoner.

It must be said, however, that no prisoner could have had a more delightful jailer. I realize, of course, that since I had contrived to save me for life, this statement sounds incredible; but the fact remains that this man possessed for me the same strange fascination that he had for all with whom he came in contact. I despised myself for admiring him and yet, in spite of everything, I could not help it. In the first place, he was the most vivid talker I have ever known, and in the privacy of the cabin would



My Lungs Seemed Choking. I Drew Deep Breaths.

narrate countless tales of his various voyages and adventures. And from these tales I gathered somewhat that Barod was of great service to him, a right-hand man who, with his placid and gentle ways, would quell any mutiny or set plans afoot where a less capable person would have failed.

Nor were the captain's powers of conversation limited to narrative; his philosophy of life was equally fascinating. I realize now that he must have tried deliberately to shock me by setting up the most impossible standards of proper conduct, but though he was wrong, and I knew he was wrong, with his brain was so much more subtle than mine, and his learning so much greater, that I was always out-argued and put to shame. I heard him with fascination and reluctance, but I could not answer his arguments, and was fast getting into a sulky and defiant mood, so that it was with immense relief that I heard a hustling upon deck, and then a cry "Sail ho!"

After the inaction of the past fortnight, it did not take the captain long to gain the deck. There, sure enough, a couple of points off our weather bow, was a distant sail. We had been running with starred sheets, and now, by other a sponge which in spite of my struggles he thrust under my nostrils in such fashion that I inset breathe or die. Through my wearied brain flashed the thought, "Why all this trouble to kill me when a simple thrust would have done the trick?" And then all at once the answer came to me: McAllister has a scar. My lungs seemed choking; I drew in a great breath of the pungent liquid on the sponge; then—blackness.

CHAPTER VI

Mother-in-Law Gives Voice to Reflections

"I thought for a while that Harold was going to get out to the golf course this time, but just as he was leaving Minnie's new trousers were delivered.

"Lauson and I were happily together many years, but he never played a game of any kind after we were married except once. We went to the volunteer fireman's picnic and he played baseball for two or more minutes. He was laid up four days.

"Minnie's husband works harder at his play than he does his job. Lemuel used to watch the weather signs to keep from losing his crops. Many's the time his rheumatic knee has given him warning to get the hay in off the south forty. The more I study about my lad, even in those few hours we've known each other, I've bared my heart. For two reasons I ask you to do this for me. For your own sake; you are young, on the threshold of the world, you don't want to go out yet into the eternal dark. And even more for my sake. Help me rid the earth of this cruel tyrant, who feeds and batters on the sufferers of others. Come, give your word, and there's no more to be said. Your fate is your own again, and you shall cruise to Jamaica with me as my guest, one word—that's all you have to speak."

Now if ever there was a cunning rascal, always ready to find the weak joint in your armor, Capt. Frosby Barclay was the man. Even in the few hours he had known me, he had discovered that I was not to be driven, but that by flattering me and asking for my aid, he stood a better chance of winning me to his side. Yet I was vain enough to think that even his persuasion would not have influenced me, if I had thought that I was doing wrong; for though the prospect of death by torture was far from pleasing, still we can die but once, and there is one thing more life, and that is honor. But I reflected that while the Black Panther and those who lay down their lives for a friend, the present case was altogether different. For here, on one side, was a bloodthirsty pirate who valued no one's life, not even his own, and who fought only for over against him were two other men, according to his statement even worse than himself. And why I should lay down my life for the sake of a villainous old scoundrel was more than I could see. In my event, I was not called upon to make a decision now. Later, if Barclay decided to act, I could refuse. So, with a sigh of relief, I turned my face to the sun, and filled my lungs with the fresh breeze on my face, to gain even a few weeks' respite from death seemed a most desirable thing. And so I answered: "I'll do as you say, but on one condition; if I find McAllister and Shively to be honest men, so that it goes against me to betray them and I would rather die myself, then I have the privilege of that option. Otherwise, I'll be faithful to you, and play the part of Robert McAllister until the time comes when I feel that I am acting wrong."

"Fair and just," he cried quickly. "I could ask nothing fairer. If you take a fancy to McAllister and Shively, I'll quit the sea and turn preacher. And now, lad, as I've told you, I need you and I must guard your life with care. I can't trust you to mount watch my gentle darlings; their play is too keen. You will share my cabin, and you had better begin by turning in and getting some sleep, for your face is white as chalk at this moment."

To tell the truth, I was ready enough to go, for often, under a strain continues, we may brace our nerves to meet it, but when it is over, then we realize what we have been through. So now the idea of rest was delightful, but auldeing one other thought struck me. "Ha!" I cried, "McAllister had a scar."

He shrugged his shoulders. "Never fear," he assured me. "We'll invent a story for that. Go below now, and turn in."

Once stretched out in comfort in his cabin, I tried my best to slumber, but for some time I lay brood awake. Over and over again, in strange confusion, the events of the day whirled through my brain. Again I was pounded by the reeks, again I saw the giant sailor plunge headlong to the ground; again I trained my gun on the pirate's midriff; again I boarded the schooner, and listened to talk of McAllister and his uncle, and then suddenly filled with a most terrible and realistic dream. I was, as it seemed, lying on the bow of the island, and two pirates had crept upon me, and in spite of my efforts to rise, were holding me down, one of them kneeling on my chest with a knife. In my anguish I fought, struggled, tried to scream, but not a sound would come. Their grip would not loosen; the blade came nearer and nearer to my throat; it was too awful; with an effort into which I put every atom of strength that I possessed I stirred my tender limbs, opened my weary eyes—

For one dreadful second I thought that my dreams was true. Burford, gripping me by the arms, lay across my body, his strength more than a match for mine. Over my head I saw the face of the captain, in one hand a most murderous looking knife, in the

Wife Christens Leviathan Named for Her Husband

Launching of million-dollar freighter: Mrs. B. F. Affleck, who sponsored vessel, and her husband in whose honor it was named.

Toledo, Ohio.—Launching the million-dollar 12,000-ton freighter, "B. F. Affleck," one of the largest boats in the Pittsburgh Steamship company's fleet of 90 vessels, marks another notch in the career of a man who left school at the eighth grade, entered a machine shop at 13, studied nights and rose to an outstanding figure in industry with a lake levitation named for him.

A. R. Kuhlman, president of the Toledo Chamber of Commerce, Horace S. Wilkinson, chairman of the Board of Directors of the Crucible Steel Company of America and president of the Toledo Shipbuilding company which built the vessel, A. F. Harvey, president of the Pittsburgh Steamship company, which operates the largest fleet of freighters on the Great Lakes, and other notables took part in the ceremonies. Interest in the event was increased by the official christening by Mrs. B. F. Affleck of the new freighter named for her husband who is president of the Universal Portland Cement company and former president of the Portland Cement Association.

To build the "B. F. Affleck" required, among other things, 4,500 tons of steel, 785,000 rivets and 11 tons of paint. From top of pilot house to keel the vessel measures 60 feet. Launching this huge new freighter which will carry coal, iron ore and limestone on the Great Lakes, completes another link in the large deep-water program of the Universal company, a feature of which was the recent formal opening by Vice-President Charles G. Dawes of the cement company's new Buffington Harbor, the first private harbor to be built on Lake Michigan in twenty years and one of only three such harbors on all the lakes.

Advise Shippers to Candle Market Eggs

Especially Urgent During Spring and Summer.

(Prepared by the United States Department of Agriculture.)

Candle all eggs before shipment, and especially during the warm spring and summer months when spoilage is most likely to occur," is the advice given to egg shippers by the bureau of chemistry, United States Department of Agriculture, which is charged with the enforcement of the federal food and drugs act. The loss resulting from spoilage of eggs shipped to distant markets may be greatly reduced by this precaution," say the officials. Candling as near as possible to the source of production will not only save transportation charges but will prevent waste of a valuable food product."

Federal inspectors have been instructed to be on the watch for interstate shipments of adulterated eggs. Under the food and drugs act eggs which have yolks stuck to the shell, moldy eggs, black spots, mixed with added eggs and any other eggs that are filthy, decomposed or putrid are adulterated. When such shipments are found they may be seized and the individuals responsible for shipment prosecuted under the law.

Many eggs that are suitable for human food are consumpted will not stand shipment to distant markets. By candling, these eggs may be taken out and sold for food consumption, leaving only those that have a good chance to reach the market in edible condition.

A bulletin on candling eggs tells just how to candle, how to determine a good egg and one that is likely to spoil in transit. Write to the Bureau of Chemistry, United States Department of Agriculture, Washington, D. C., for a copy.

Wide Variations in the Cost of Producing Pork

Wide variations in the cost of producing pork are shown in a survey made by the Department of Agriculture of farms in Henry county, Iowa, and Warren county, Illinois, said to be typical of corn-hog farms throughout the corn belt.

The gross cost of producing 100 pounds of marketable pork on 34 farms in one year ranged from $8.09 to $12.77, with an average of $8.63. The selection costs on 29 farms in another year ranged from $4.83 to $10.02, with an average of $6.32. The figures are for the years 1921 and 1922 and are presented merely as showing the variation in costs.

The variation, the department says, indicates the influences of care and management in the hog lot. The farms were within a short distance of each other; it was possible to follow very similar methods within the region, and yet some farms shipped hogs to market costing more than twice what they cost other farms.

Detailed results of the survey have been published in Department Bulletin No. 1381, "Cost of Producing Hogs in Iowa and Illinois," copies of which may be had free, as long as the supply lasts, upon request to the Department of Agriculture, Washington, D. C.

Sudan Grass Found Best Emergency Crop for Hay

At the Iowa experiment station sudan grass has proved to be the best nonleguminous emergency hay and pasture crop. It may be seeded after corn planting, as it is very drought resistant. About 15 to 20 pounds of seed per acre sowed broadcast or drilled is the general practice. The shelled is prepared as for corn. If a seed crop is wanted, drill in rows wide enough to permit of cultivation and use 5 to 10 pounds of seed.

The crop is not available for pasture until about July 1 and ceases to be productive after the first frost. There is no advantage in seeding before the middle of May or later than July 20.

Two cuttings gave higher yields on hay of better quality but there was great difference in performance in drying. The better way is to cut when the seed is in the soft, dough stage and remove the afternoon. Cut with a mower and cure in the swath. A binder may be used successfully when only one hay crop is made. Sudan and soy beans grow successfully when mixed.

Calendar Curiosities

The calendar offers certain curiosities which are little known. No century can commence on a Wednesday, Friday or Saturday. The month of October commences always on the same day of the week as the month of January; February, March, and November commence on the same day of the week; May, June and August commence on different days. These rules do not apply to leap years. The ordinary year always finishes on the same day of the week as it commenced.

WHAT DO YOU WANT?

If you want to buy or sell a going business, buy or sell or rent a home or summer cottage, sell or rent a farm hire help or get a job—then go to the biggest and best market available—Chicago.

You can reach this market without leaving your home —through a Chicago Daily News want-ad. The Chicago Daily News has an average circulation of over 400,000 copies daily, over 95% of which are sold in Chicago and suburbs. It is an evening paper and is brought into the home at night.

If you want to buy or sell, hire help or get a job, ask your local newsdealer to place an ad for you in

Council Proceedings

Council Chambers, July 11, 1927.

The Common Council of the City of Charlevoix met on the above date, with Mayor Bregeon presiding. Ald present, Bridge, Geiken, Livingston, Partridge.

The minutes of the meeting held June 27, 1927 were read and approved.

The petition of L. P. Adams and seven others for curb and gutter on Hurlbut street between Bridge and State street, was referred to the Street committee.

The Finance committee submitted the following bills aggregating $5,623.24 report the same correct and recommend they be allowed.

Enter Alderman Howe.

To the Honorable: July 11, 1927.

The Mayor and Common Council of the City of Charlevoix:

Gentlemen:—Your Finance committee having examined the following bills, find them correct and recommend they be allowed:

CONTINGENT FUND

Arthur Bergeon, salary	31 25

Moved by Ald Geiken, seconded by Ald Partridge that the bills be allowed, motion carried by the following aye and nay vote. Ayes—Ald Bridge, Geiken, Livingston, Howe, Partridge. Nays—None.

Moved by Ald Howe seconded by Ald Livingston that the city notify the P. M. Ry co. to put 12ft. opening under R.R. at end of Bryant ave. Carried by following aye and nay vote. Ayes—Bridge, Livingston and Howe. Nays—Partridge and Geiken.

Moved by Ald Howe seconded by Alderman Partridge that Mrs. Leghie Hammond be elected to the office of City Treasurer, to fill vacancy. Carried.

Moved by Ald Bridge seconded by Ald Geiken that Mr. Joseph R. Cooper be elected to the office of Justice of the Peace to fill vacancy caused by the resignation of Carlton S. Dodge. Carried.

Moved by Ald Bridge seconded by Ald Livingston that the clerk be instructed to transfer from the Interest and Sinking fund $1500 to the Electric fund, and $2000 to the General fund. Motion carried.

On motion duly made the Council adjourned. Ray S. Hamilton, City Clerk.

By D. S. Payton, Deputy

Community Building

Evergreens Have Wide Range of Usefulness

Every home grounds should contain some trees, either fruit or shade, unless the owner purposes a formal arrangement and will include evergreens as a part of the decorative scheme.

In any case, trees have a valuable place both as moisture conservers and usefulness as fruit bearers or for landscape effect.

There need be no attempt at formal arrangement if the landscape of a tree or side or porch is to be hidden, and a specimen tree to break the monotony of front or back lawn needs no expert to place it properly.

Evergreens lend an exceptionally wide range of usefulness, they are so seldom attacked by disease or pests and, if planted well and properly, they soon become established and live indefinitely. Some of the ornamental firs and spruces can be shaped, if necessary, to some extent, but an natural their beauty is pronounced.

When evergreens are once established a little pool, lime meal and a small quantity of nitrate of soda, worked into the surface of the ground around them, will increase speed of growth if growth is desired. Moderately rich soil at time of planting will not produce excessive growth. A good garden soil put into the hole dug for each evergreen should carry along growth at a fair rate for four or five years. If at the end of that time additional growth is wanted, food must be supplied. Cultivation need be slight; a gentle raking of the surface is about all that is required after the first year. After planting it is best to stir the ground only on fine days, but frequently, to prevent escape of moisture, particularly in dry weather.

Character of People Shown by City's Looks

As a man's face indicates his faults and virtues, so the spirit of a city is to be seen in its physical appearance, William Estep, psychologist, declared in an address to members of the Detroit Civic Spirit society.

"The character of a city's people is reflected in the city they have builded for themselves," he said. "If it is shaped by dumbness, order, and excellences a desire for constant improvement, then we know immediately that it is a city of energetic people neither we wish to invest in its future by building a home, founding a business, or buying an estate.

"That is simple and quite useful psychology—minding the bumps-reading of the man with money and ambition," Estep went on. "Also it would be well for the disinterested people to remember its truth in their campaigns to boom their home cities. All the funds of publicity and advertising will not yield so influential an appeal as the city—instinctively felt—of its streets and houses and buildings will present."

Beautify Rights of Way

Railroads anywhere can with profit emulate the example of the Pennsylvania system in planting trees along its right of way in New Jersey to eliminate unsightliness on the thoroughfares. Some of the roads, as well as the interborough electric lines, are making considerable progress beautifying their rights of way and their stations, particularly in New York, Pennsylvania, New Jersey and Massachusetts, and the investment seems more than justified from the standpoint of patrons, who are this provided with another reason to bolster up the "home town pride." But it is not only to the rural and to the home owner that the credit is reflected just to the stranger within the gates who is used and more made aware that "soulless corporations" do not exist.—Christian Science Monitor.

For Beautiful Highways

The more beautiful a highway is, the greater will be its attraction for tourists, all other factors being equal, or nearly so. It should be the desire of every one who is not a heedless and hellalot to prevent the erection of unsightly buildings at before-unsafe and elsewhere, and of objectionable signs. "A thing of beauty is a joy forever," reports the poet. A road that is also a road and nothing more may put bottom into the pockets of many people, but it will put nothing whatever into their souls.

Home Affects Person

People reflect their environment. Those who live in shabby, down-at-the-heels houses are likely to feel depressed and discouraged. We borrow much of our confidence and spirit from our surroundings. If they have nothing to give—we hope or could deserve, no pride in home or joy in living—then they become a liability of such proportions that only the most Herculean strength can resist them.

Good Manners

"Manners are not idle, but the fruit of loyal nature and of noble mind."—Tennyson.

The Charlevoix Hardware Company

Getting Ready for the Summer Vacation

There is always SOME ARTICLE for the Cottage that will pay BIG DIVIDENDS IN COMFORT.

Is it an OIL STOVE? The NEW PROCESS and NEW PERFECTION are leaders in wick stoves.

Would a REFRIGERATOR, KITCHEN CABINET, ELECTRIC or COAL RANGE take away a care and make the weeks happier?

Perhaps just a little piece of furniture, an added touch to the GUEST or LIVING ROOM, an ELECTRIC CONTRIVANCE for the table or kitchen is the needed article.

Nothing makes the entire household more harmonious than plenty of good COOKING UTENSILS.

We can supply you with the necessary thing.

The Charlevoix Hardware Company

Northern Michigan's Finest Store

Three Departments—HARDWARE—FURNITURE—ELECTRICAL

Use Brush on Floors

The occasional use of a weighted floor brush will assist in keeping the finish of your oak floor in the best condition. At least once a year the floor should be given a dressing of wax, well rubbed. Do not neglect your floors until the finish is worn down to the wood. A little attention at the right time maintains "the perfect floor" indefinitely.

Egyptians Forbidden Wheat

An authority says that the reason the Egyptians did not use wheat, and therefore no trices could be found in their mummified stomachs, etc., was because their religion prohibited its use as a food. Although they knew of the grain, instead they used maize, which also was used in the manufacture of moonshine.

SHEET-ROCK TIME TESTED

and proved *fireSafe*, high insulating, strong, enduring, vermin-free, superior for decoration (no joints showing). The ideal wallboard for remodeling or new construction. Made of pure gypsum rock, between tough fibre. Let us show you a sample of SHEETROCK.

CONVICT SHIP LEAVES PORT

Monday Morning for Mackinac Island—Her Next Stop

Captain D. H. Smith, crew and Convict Ship Success cleared this port for Mackinac Island after a stay in Charlevoix of more than two weeks during which period the old ship was visited by many thousand persons, a large number of such traveling long distances to view the ship famous on account of its age, the distance it has sailed, the number of foreign countries entered for exhibition purposes.

Authentic records carried on board the Success gives the date of her launching as of 1790—one hundred and thirty-seven years ago and with the exception of a few years, when resting in Sydney harbor, Australia, a maker of history at first famous as a merchantman, later infamous as a convict ship, and the last few years, the same as while in this port an exhibition ship upon which is carried and displayed to visitors the various barbaric implements of torture used for inflicting punishment upon even her frequenters or upon persons justly or unjustly, whenever they incurred the displeasure of officers and keepers.

The Convict Ship Success without question was the greatest attraction ever exhibited in this city. Likewise in this country where it has been exposed to the public along the Atlantic and Pacific oceans, Gulf of Mexico and the Great Lakes chain, where it has been inspected by millions of the American people.

Visitors from great distances drove from distant points to view the old ship daily from the date of its arrival while it was tied up and ready for visitors in the local harbor, the number of visitors being far in excess of the number expected, with the last day Sunday making a record for the stay when thousands viewed the historic vessel, inspected the ship, examined the implements of torture used for punishment, old relics and curios, and heard the lectures delivered by some one of the several persons engaged in imparting information relative to the ship and equipment, all of which are relics of a bygone age.

Famous Gold Field

Witwatersrand is a low ridge of hills extending about 40 miles from east to west. In the southwestern part of the Transvaal, South Africa. Here are the famous goldfields and at the eastern end of the Rand is Johannesburg. Indications of gold were found there in 1885, and in the following year the district was proclaimed a goldfield.

C

Dye From Fruit

Pomegranate is the fruit of a tree which grows in Syria, northern Africa and southern Europe. It is frequently mentioned in the Bible. The fruit, which is about the size of an orange, contains a large number of reddish seeds, each contained in a separate cell. The rind contains tannin, which is used in the manufacture of morocco leather.

Instinct Without Rudder

A wonder if we can differentiate between the mind and the instincts of the mind? If we can, I should prefer to say that instincts of the mind are discernible in the works of the great masters. But I am always apprehensive of metaphysical quicksands and inlets, and before putting down the helm I will remark that the artist's instinct is the sail that carries the boat along, and his reason the rudder that keeps the boat's head to the wind; without the rudder the sail loses the wind. The simile seems to hold good. An instinct will carry the artist some distance, but if he have not reason he will drift like the rudderless boat, making no progress at all. — From "Avowals" by George Moore.

DAIRYMEN HAVE PICNIC

At Whiting Park, on Friday July 29th—Public Invited

This years annual Dairyman's picnic will be held on Friday, July 29th, at the Whiting Park. A. C. Balzer, specialist in dairying from M.S.C., will be the speaker and will discuss the latest problems that are constantly confronting the dairymen.

The program will start promptly at 1:30 p.m., fast time, and will consist of the main talk by A. C. Balzer. Several short talks will be given by some of our leading dairymen of the county, a discussion by one of our leading bankers on" Why Banks Think Dairying our Best Bet," and best of all there there will be a lively contest of baseball games between two teams of selected talent. Think farmers can't play professional ball? Just come and see.

Bring your well filled lunch-basket. Have a real outing. Remember the dairymen will be there and you deserve a real vacation. Learn how our leading dairymen are making real profits. A cordial invitation is extended to the entire public to be present.—B. C. Mellencamp.

JURORS, AUGUST TERM OF COURT

The following is the list of Petit Jurors drawn to serve at the August term of Circuit Court, Charlevoix county:

Roy Cadwell, Boyne City, 1st ward.
Al Goodrich, " 2nd ward.
F. C. Barden Jr., Boyne City, 3rd ward.
W. P. Vought, Boyne City, 4th ward.
Joe Foster, Charlevoix, 1st ward.
Charles Emrey, Charlevoix, 2nd ward.
Richard O'Neil, Charlevoix, 3rd ward.
Herman Goodman, East Jordan, 1st w.
Lenard Duffe, East Jordan, 2nd ward
Ora Holly, East Jordan, 3rd ward
Andy Witherill, Bay township,
Harry Dutcher, Boyne Valley township
Alvin Durance, Charlevoix township
Ray Kennedy, Chandler township
Cash Brooks, Evangeline township
William Walker, Eveline township
Lee Sneathen, Hayes township
Tony Kuzmik, Hudson township
Louie Greiner, Marion township
Fred Seelbach, Melrose township
Howard Gornell, Norwood township
Hugh D. Gallagher, Peaine township
Fleury Bros., James township
James Murray, South Arm township

NUN DEFENDS MODERN GIRL

Dr. Molloy Says Flapper Is Sound at Heart Despite Her Faults

A defense of the modern girl was made by Sister Mary Aloysius Molloy, A. M., Ph. D., dean of St. Theresa's College, Winona, Wis., during the recent conference of the National Catholic Educational Association, in Detroit.

"The girl of 1927," said Dr. Molloy, "is more genuinely likeable than her sister of 1907. With all her faults, and she has many of them, her sophistication and her pose of worldly-wiseness, she is absolutely frank. Strange as it may seem, she is more idealistic than her sister of earlier and more romantic days. The girl of today has a deeper appreciation of the things of the spirit, and a genuine craving for what may be called, for lack of a better term, the religious sense.

"She wears dresses that are too short and too transparent; she is pert and slangy; she is sadly deficient in the general graces that in an earlier generation characterized the gentlewoman. But she does most of these things because she is without the understanding sympathy and special direction which is her greatest need.

"There is no charge with the instruction of the modern girl must neither shirk the duty of disciplining nor fail to report their pupils' ideals. Dr. Molloy declared. Consecrated to the service of religion and education, these women cannot afford to compromise the standards to which they themselves are committed, she said.

"The greatest compliment I could pay to the girl of 1927, and at the same time the truest thing that could be said about her, is that down deep in her heart she approves of discipline when it is administered without fear and reacts readily to inspiration."

CATHOLIC CENTRAL HIGH SCHOOL ESTABLISHED

Will Relieve Strain on Individual Parishes, Says Bishop Gallagher

Establishment of the first Catholic central high school in Michigan was announced recently by the Rt. Rev. Michael J. Gallagher, D. D., Bishop of Detroit. The school, which will be the first of several units, will open Sept. 7.

The new plan, according to Bishop Gallagher, was adopted in order to relieve the individual parishes of the financial burden of operating their own high schools. Centrally located, it will be accessible to several Detroit town parishes now maintaining high schools of their own; Transference of pupils from these schools to the new central school will, it is said, remove many teachers for work in the grammar grades.

"The central school is not intended in any way to interfere with the larger parish high schools" the bishop said. "But it will provide higher educational facilities for graduates of those parishes where the attendance is not sufficient to be practicable or is a burden beyond the strength of the parishioners. Pupils from any part of the city may enroll in the new school."

The building of the former Cathedral Parish grammar school will house the new institution. It is fully equipped with technical, physical and biological laboratories and facilities for teaching domestic science and other specialized subjects.

BODY IS FOUND NEAR ELK RAPIDS

Mystery concerning the loss of Douglas Holmes, six years of age, is gradually clearing up and what was considered by many, particularly relatives of the lad, as a case of abduction, proves to be a case of drowning, this being fully established by the finding and recovery of his body last Sunday on the shore of the bay near Elk Rapids, following a thorough and persistent search of about ten days' time out the state for the missing boy.

The finding of the body of the little lad exploded the kidnapping theory which was pronounced, and closely adhered to from the time the boy was found to be missing until the discovery of the body about ten days later.

An investigation is under way to ascertain if possible just how Douglas happened to be near the waters of the bay and as to whether or not he had companions with him at the time,and thereby clear up the mystery that prevails concerning the tragedy.

Hardly Worth Figuring

"What is half of one-third?" said the teacher to Ted, and the boy, unaccustomed to such vague things and obscure, said: "I don't know for sure; but it can't be so awfully much."—Boston Transcript.

First School Gardens

In America the school gardens movement had its beginning in the city of Boston in 1891, when Henry L. Clapp, principal of the George Haven Putnam school, established a wild-flower garden at his school.

GOVERNORS' CONFERENCE

Next Week at Mackinac Island with Many Notables Present

The Governors Conference scheduled for next week at Mackinac Island, with the Grand Hotel headquarters for the notables and their friends places this noted resort of Michigan prominently before the entire public of this nation, and in a position second only to that of the summer home of President Coolidge in the Black Hills country.

With the appearance of the several governors and their followers Mackinac Island has the distinction of having as guests the most august assemblage of public men in the history of the state and of this celebrated company, some thirty persons will be governors of their respective state, while many others will be men of special note, both national and international, perhaps the most prominent of whom will be U. S. Secretary of Commerce, Herbert Hoover.

An invitation extended to President Coolidge as "guest of honor" has not at this time been accepted, neither has the invitation been declined, therefore the committee in charge are hopeful that the President can arrange to be present some time during the conference sessions.

Another person prominent in the eyes of the public who it is expected will be at the meeting is Mayor William Hale Thompson of Chicago, also spoken of as a presidential possibility, several ex-governors, men of unusual celebrity.

An elaborate program of entertainment will be carried out before the session closes a part of which will be a trip by automobile or steamship to Sault Ste Marie and thence by rail to Houghton,where a day will be spent visiting mines and in study of the great industry.

Saturday next members of the Governors' party following their arrival in Detroit will board one of the big passenger steamers and make the trip to Mackinac Island where the conference will open with Governor Fred W. Green extending an address of welcome to the distinguished guests.

The entire trip will be maintained at the island during the conference those coming from Selfridge field, and will be guests at the dinner given by the Detroit Aero club.

During this period the manager of the Grand Hotel has arranged and established schedule's of flights between Mackinac Island and Chicago and Mackinac Island and Detroit. According to present plans Mayor Thompson will fly from Chicago to the place of meeting and Mayor Smith of Detroit will also make the trip by air transportation. Arrangements have also been made for having all government ships on the Great Lakes in the straits region at the time of the governors' meet when a series of maneuvers will be carried on as a part of the set program.

Mob Rule Brought Disaster at Orishany

Two revolutionary battles, the sesquicentennials will be celebrated soon, and monuments to the fact that mob rule brings disaster. At Oriskany, the New York called wise old General Herkimer a coward and rushed on to their doom. At Blue Licks the rashly courageous Kentucky frontiersmen disregarded the counsel of Daniel Boone and their other leaders and suffered the same fate. There is an interesting article by Elmo Scott Watson in this issue of the Sentinel which tells striking parallel between these two famous engagements where the headstrong folly of undisciplined men resulted in defeat and death. Be sure to read "Oriskany and Blue Links" this week.

Got Back at Toastmaster

A. A. Borland of Pennsylvania when called on for an extemporaneous speech at a banquet is said to have remarked that he had somewhat the same feeling for the toastmaster that a certain thief had toward a church bell. This thief had robbed a small town bank, and had apparently made his get-away in good shape by hiding in a church belfry.

After a time he grew weary of his surroundings, and thinking the coast clear, undertook to slide down the nearby rope to safety. No sooner had he started down than the bell began to peal, and almost immediately he found himself surrounded by a good share of the village population. Seeing that he had no hope of escape, he looked up at the bell and snarling an angry fist remarked: "If it hadn't been for your long tongue and empty head, I wouldn't be in this mess."—Exchange.

VISITORS SEE DAIRY HERD

Dairy Day Held at Traverse City State Hospital on July 29

Dairymen from the Grand Traverse region will meet at the Traverse City State Hospital July 29, to see the herd of cattle judged for type and to hear prominent dairy specialists, according to a statement from the dairy department of M.S.C.

The herd of pure bred Holsteins at Traverse City was established in 1880 and individuals from the herd have carried the name Traverse to all corners of the United States. At the present time the cows of this herd have an average annual production of milk of over 10,000 pounds.

The cattle will be judged for type at 10:00 a.m. by Prof John Burnett, M.S.C. An all day program has been arranged and weather conditions will not interfere with its completion.

One of the features for the day will be a baseball game between inmates of the Institution and a selected team from attendants and visitors.

The Traverse City hospital will furnish ice cream, coffee and lemonade, and a basket dinner will hold the visitors attention at noon.

Traverse City and Northern Michigan prominently before the entire public of this nation, and in a position second only to that of the summer home of President Coolidge in the Black Hills country.

With the appearance of the several governors and their followers Mackinac Island has the distinction of having as guests the most august assemblage of public men in the history of the state and of this celebrated company, some thirty persons will be governors of their respective state, while many others will be men of special note, both national and international, perhaps the most prominent of whom will be U. S. Secretary of Commerce, Herbert Hoover.

An invitation extended to President Coolidge as "guest of honor" has not at this time been accepted, neither has the invitation been declined, therefore the committee in charge are hopeful that the President can arrange to be present some time during the conference sessions.

Another person prominent in the eyes of the public who it is expected will be at the meeting is Mayor William Hale Thompson of Chicago, also spoken of as a presidential possibility, several ex-governors, men of unusual celebrity.

An elaborate program of entertainment will be carried out before

STORY FROM THE START

In the small New Jersey village of Straitsmouth, in the year 1745, Richard Lindsay, who tells the story, gives an exhibition of his marksmanship before some villagers and a stranger, with whom they afterward dine at the tavern. The conversation turns on a notorious pirate, whose ship, the Black Panther, is thought to be in the vicinity. The morning Lindsay, after wild duck shooting, is "blind" when three strangers land on the beach near him. They bury a chest and then, one of them, Burford, recognised by Lindsay as the man he talked with the day before, kills one of his companions. Lindsay's presence is discovered. The third man is Captain Barclay of the Black Panther. The three go aboard. Lindsay meets there a youth to whom he bears a remarkable resemblance, Robert McAllister, whom Barclay captured on his way to his uncle's plantation in Jamaica. Barclay has a scheme to kill the uncle, and Lindsay is asked to act as a spy in his uncle's household. He refuses and is killed. Lindsay is asked to take his place. Realizing his helplessness and under threat of a lingering death, Lindsay agrees to assume young McAllister's name and take his place in Andrew's household. The Black Panther comes upon a plundered ship, with all on board murdered.

CHAPTER V—Continued

—8—

The men, after vociferously signifying their acceptance of this plan, went forward, while the captain and Burford, descending into the cabin, began poring over their charts of the Caribbean, debating whether to lay to, or to keep way on the schooner during the night. For reasons which they did not reveal, they seemed sure that the Shark had headed south, and accordingly we laid our own course in that direction.

With the first dawn of day, the lookout at the masthead lustily announced the presence of a sail. I had never before seen the captain so excited, as he peced the deck with an air so vengeful and so savage that I was glad to stay as far from him as I could. Yet as the day advanced his mood gradually altered to one of grim mirth, for everything appeared to favor our fortunes, and to injure those of the enemy. When the breeze sprang up, as it presently did, it came light and puffy from the north and east, and we, in the sailor's phrase, "hrofgit the wind up with us," drawing steadily nearer and nearer to our foe, until the captain, gazing through his spyglass, announced that she was without doubt the Shark, and at once ordered the white flag, with the sable panther, to be displayed at the peak.

Presently, however, the wind increased to a steady whole-sail breeze, and I, being totally ignorant of our surroundings, thought of the old adage that a stern chase is a long chase, and expected every instant to see the captain's mood change again. But to my surprise, he remained as cheerful as ever, and as soon as the opportunity offered I asked Burford the reason for the captain's good humor, and learned that directly to the south'ard, in the shape of a crescent moon, stretched a line of low banks, resembling the famous Caymans, so close to the surface that to be once among them meant certain shipwreck. Into this bay we were now driving the Shark; it was no longer possible for her to escape us; she would have to fight.

"But why did she walk into such a trap?" I asked.

Burford shrugged his shoulders. "Perhaps," he answered, "they counted on their fuse burning true. Perhaps all hands, from the captain down, were rearing drunk. And they have one chance yet, though it's a long one. There is a channel through the banks, but there aren't three men in Jamaica who know it, and it's not likely that they have one of those three on board the Shark now."

All this time we were drawing closer, and now at last we made ready, in anticipation of our adversary's suddenly altering his course and showing flight. Surely, I reflected, I was to have a taste of real fighting now; and at the thought of the women and children I had seen lying dead on the Sea Gull's deck, I welcomed the conflict. My companions, to be sure, were vile enough, but they could not be worse than their foemen, and I was ready to risk my life to strike one good blow in revenge.

Yet still the Shark did not alter her course; still she bore on to the south; and I could see, from the look on the captain's face, that he did not understand her maneuvering. "She can't be going to try the channel," he cried. "Look at the color of the water; they're almost on the shoals now." But the next moment, leveling his glass, he exclaimed: "They are going to try it. I know that nigger at the wheel; it's Brown Mose, the best pilot in Jamaica. D—n them, they'll give us the slip after all."

He was half frantic with the violence of his rage. His swarthy face was flushed almost purple, and he ground his teeth in the extremity of his passion. Then, by ill luck, his eye happened to fall on me. "Here, you sharpshooter," he cried suddenly, "pick me off that helmsman. And quick, too, or we'll be aground ourselves."

I had my rifle in my hands, in readiness for the expected battle, and thus I had no alternative but to carry out, or rather to try to carry out, the captain's command. At once, therefore, I stepped to the rail, dropped on one knee, and making, in this new attitude, the best allowance I could for the different courses the two vessels were steering, I calculated my distance and let drive. And yet, as I did so, I was conscious that something hindered my aim; and while at the time, perhaps, I could not have put it into words, I know now what the trouble was. When I aimed at a squirrel in a tree top, or at a black duck feeding in the sound, I aimed to kill; every nerve and sinew was bent to that one purpose; all was concentration, and I was aware of nothing else in the world. But now, shooting at a negro who had never done me harm, in spite of myself I aimed halfheartedly, not really wishing to hit the mark. And then I scored a clean miss, though the bullet, indeed, could not have gone so far astray, for the pilot, not lacking courage, instantly turned and waved a hand at us, while holding the Shark true to her course.

The captain exploded in angry wrath. "D—n you, I thought-you were a marksman," he cried, and seizing a rifle from Burford's hand, he made as if to shoot in his turn; then, as if not caring to endanger his bold crew by men by exposing himself to their derision if he missed, he thought better of it and handed the piece to me. "Try again," he said; and to Burford he commanded: "Load the boy's rifle as quick as you can."

I could ill but admire the quickness with which his mind worked. To load my own arm again was the best possible judgment, for to dedicate work like this the thorough knowledge of one's piece is essential. And accordingly, though I held as true as I could with Burford's rifle, I had not great expectation of dropping my man. What the result of the shot really was, I shall never know, if the negro were hit, he gave no sign; but I have always imagined that the bullet struck him, though not in a vital spot. In any event, he remained erect at his post, and the Shark continued to glide down the entrance of the channel.

And now, at this second miss, I realized, for the first time, that the negro's was not the only life in danger. The captain's dark face turned actually livid, and quick as a flash he whipped a pistol from his belt and leveled it at my head. "You kill that man on your next shot," he said in a tone of the most dreadful and ominous calm, "or so help me God, I'll scatter your brains over this deck."

At the same instant Burford handed me my rifle. Once more I dropped to my knee; once more I took a moment to calculate distance, velocity of wind, the allowance that must be made for the different angles at which we sailed; and then, according to my custom, I banished from my mind all thoughts of ships, of men and sky, and of everything in the world save that broad brown back, gleaming in the sun's and forming, against the background of the white mainsail, a magnificent target. "His life or mine," I thought grimly, and pressed the trigger. This time there was no sunbeam; simultaneously with the report the negro's hands loosened their grip on the wheel, his arms flew upward, and then in a crumpled heap he slid headlong down the deck.

"Well shot!" roared the captain. "Well shot, my bully!" And then, savagely and exultingly, "Now let them find the channel; they won't have two men on board that know it. In five minutes by my watch, they'll be aground."

He did not exaggerate; in fact, the catastrophe occurred sooner than any one anticipated. There was confusion on the decks of our ninnagoula; no one, I dare say, in view of what had just happened, cared to be the man to stand a trick at the wheel. Driven with good headway, and with just sufficient depth of water not to check her too soon, we saw her bow rise suddenly, followed by half the length of her hull; then, all headway ceasing, she hung poised for an instant, settled slowly to leeward, and there hung fast.

The captain's face was transfigured with an unholy joy. "Look at her!" he cried. "Look at her! Her starboard guns pointed at the bottom of the sea, and her port guns pointed at the sky. Here's the end of the Black Panther's trade; we can knock her to pieces at we please."

It was evident that he spoke the truth. Heeled over as she was, her guns were rendered useless. The boy remained for us to begin, at our leisure, what would be not a battle but a slaughter. Deeming down a trifle closer to make sure of our range, and paying no more heed to her scattered musketry fire than to the buzzing of so many hornets, we gave her our port broadside, then luffed, came about, and followed suit with our starboard guns, while Burford incessantly handled our long Tom with deadly aim. Both masts came crashing down; splinters flew from her hull; huge holes gaped through her exposed and unprotected hull; what a few moments before had been a trim and beautiful vessel was now a hopeless wreck.

Presently Burford cease running after. "Those first are left," he cried, "are manning the boats. They're going to run for it." And to prove the truth of his words almost at once we saw three boats put off from the Shark, endeavoring as best they could, to keep the bulk of the wreck between themselves and us. Yet with each succeeding stroke that they took, the difficulty of avoiding our fire became greater. Burford's deadly aim with our long Tom shattered one, leaving those of its inmates not killed outright struggling in the water; while a second boundering trained on the second reduced her to a like plight. The third, however, managed to get out of reach, and I imagined that the captain would let her go, trusting to the elements to try rival freebooters to finish them in a fitting manner. But I had not yet plumbed the depths of his hatred for McAllister or any one connected with him, and to the shout of "Boarders away" our fastest longboat was lowered and manned, rigged forward with a contrivance new to me, a V-shaped piece of wood, narrow end forward, and with an opening like a loophole on either side of the apex. What this was for I realized when the captain ordered Burford and myself to take our seats behind it, armed with our rifles and a plentiful supply of ammunition. Then the captain himself took the tiller ropes and we were off. It was grim enough to pass among the few survivors were dispatched in one fierce rush. The captain, cool and businesslike as ever, store in their hoot with an ax, and let the bodies of the dead float free for the scavengers of the ocean. Two of our own crew lay quiet with upturned faces, and with small round holes in their foreheads; they also were tossed over, to join the grim fleet of the floating dead.

"And now, my hailties," cried the captain, "we'll lay alongside and see what this shark has towed in her maw. Plenty of rum, I'll warrant, and plenty of gold. And all for us. Give way, lads, and tonight we sup like kings."

"Here's the End of the Shark, Lads. Let Her Knock Her to Pieces as We Please."

CHAPTER VI

Port of the Devil.

Four days later, on a bright and cloudless evening, a light breeze brought us within landing distance of Jamaica. I was gazing over the hill, straining my eyes toward the island, when the captain approached to give me my parting instructions. "In a very few moments," he told me, "Burford will set you ashore. As soon as you land, make your way to the nearest town, which lies about two miles inland. Port of the Devil, they call it, and it deserves its title. There is an inn there, named—or rather misnamed—the House of Delight, where all the young bloods, aye, and the old ones, too, meet to drink and gamble, to match their race horses and to make love to the girls. I advise you to do none of these things; any one of them may fasten a pretty quarrel on your hand. Spend the night at the inn and have a care that you bar your door. Tomorrow press on to the plantation; and bluntly and tell him you are McAllister's nephew. He will ferry you over to the island in the lagoon. Tell your uncle your story thus. Your vessel was captured by pirates and burned to the water's edge. You yourself, after performing prodigies of valor, leaped overboard in the darkness and the next morning were picked up by a trading schooner which brought you to the island. Invent any details you please, but I advise you not to be more talkative than you can help. As matters stand, the less said the better. In two weeks' time I'll meet you at this very point, as soon after sunset as you can get here. And you must have the whole story for me. Don't bother your head with plans; I'll attend to those. I want the facts; all about McAllister, the house, the garrison; if possible, where he has hidden the treasure. Here are a brace of pistols and a knife, and here is your rifle, and here is a purse with a score of doubloons in it. And here is Burford, so farewell."

I took the arms, delighted to have my rifle once more in my possession. And a moment later I was in the gig, not rowing this time, as when I had first set out for the schooner, but seated in the stern with Burford, while two of the crew sent the light craft dancing over the quiet waters of the ocean. As the boat grew grounded on the sand, I took leave of Burford, cleared the distance from bow to shore in one flying leap, and watched the men shove off, turn the gig's stern about, and go speeding away again out to sea.

Presently, however, I forgot all else in the beauty of the tropic night. For some time I stood—absorbed in the contemplation of the scene and in my own thoughts, until I finally came to myself with a start. The sun was certainly not advancing toward the Port of the Devil, and with one last look at the sea, and at the faint outline of the schooner far in the distance, I turned my face inland.

(TO BE CONTINUED.)

Simple Device Made Revolution in Music

According to manuscripts, the playing of the steel guitar, which has made Hawaiian music famous throughout the world, was originated by a Hawaiian boy in 1883, who found that by placing an article on the fingerboard of the guitar while playing a chord could be produced. The boy Joseph Kekuku, then a student at Kamehameha school, first got the idea when he placed a pocket comb on the fingerboard and brought a new twang from the instrument. This was followed by experiments with the blade of a pocket knife and resulted in the use of a piece of thick steel for the purpose. The "new music" took the islands by storm and later spread over the entire world.

"This invention of the Hawaiian schoolboy," says survey, "is the most significant contribution of Hawaii to modern music, the introduction of an entirely new technique for the playing of stringed instruments, at least as far as the western world is concerned, although the Japanese employ a similar technique with one of their stringed instruments and some African tribes north and south of the Congo do the same with the musical bow, using a shell on a knife blade."

The Cat

The cat would make an excellent diplomatist; he is seldom ruffled, never loses his head, is usually polite, has admirable manners, and great aplomb, and there is that sharp claw concealed in the velvet glove to resent any intrusion upon his interest, or felicity. But, above all, he has the diplomatic virtue of concealing what he thinks. Whereas, the dog opens out his whole soul, the cat keeps it as close as an oyster. There is certainly nothing of the "new" or "open" diplomacy about the cat. He looks wise and maintains a grave and dignified silence. He may be cold, he may be selfish, but it must be said in justice to the cat that he does not make a business of ministering to human egoism—like the dog. His own dignity is to him of very much greater importance. he lives his own life, and goes his own way.—London Morning Post.

Music Is Swinging

The northern races are coming into their own in music. Music has swung into the fields of the less effete races in recent years. With this I associate the increased use of wind instruments, as opposed to strings. These are able to portray the wilderness, the primitive spirit and also the lonely musings of shepherds; the grandeur of the Himalayas. Nobody would think today of describing a mountain in string tone; but a mere oboe solo could do it very impressively.—Percy Grainger, in Musical America.

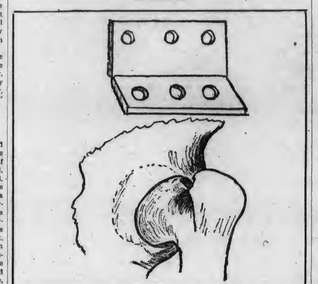
YOURSELF and YOUR BODY

By WILFRED T. GRENFELL

THE FRAMEWORK

The Arm.



A Hinge Joint (top) and the Joint of the Hip. The Joint of the Hip is a Ball and Socket. This is the Strongest Kind of Joint to Carry the Weight of the Body.

The Same Kind of Frame, Fitted for a Dog, a Monkey, and a Man.

"LEGS again today, isn't it?"

"No, arms, father."

"Same thing, just front legs."

"Oh, father!"

"Man must stand erect. He can see better that way, and turn quicker. So he had better have arms on the top instead of four legs, hadn't he? Can you guess why?"

"To eat with?"

"No, he could eat without hands, like a pig or a dog. It is in order to enable him to use weapons so as to give him greater strength against other animals, and to use tools so as to become the real master of the world. Otherwise he could never have killed a lion or an elephant. They would have killed him every time they saw him. If you lose your arms it is far worse than losing your legs."

"Just as the body sits in the basin on the top of the legs with its spine up the back, so the arms hang from a cap on the top of the body.

"Now we will take the same number of bones as we took for the foot, and lay them out as they ought to be to hold instead of to walk. Now you see we have got the hand laid out. Isn't it like the foot? Only we do not want a heel in the hand to stand on, so those bones have grown small.

"Now for the arm. Get two bones like the leg, and we will lash them together in the same way as before, except that we will let them turn round on one another, and not strap them so that they cannot move, like the bones of our leg. You fetch them, and I will carry the big bone of the upper arm. Isn't it exactly like the thighbone? Only as it has to twist about so much more than the thigh and leg we will not make the socket of the joint so deep.

"Now come the arch or arm girdle. As you see, it is made up of the top bone of the chest, the collarbones, and the shoulder-blades. But where will you hang the girdle up? It is absolutely necessary for our body to have a pump to keep driving the blood all over the body day and night, because in the blood are all the workers swimming to their work; in every corner of the body. If that pump breaks down once (as our motor sometimes does), for more than even a minute or two at the outside, the whole body dies and goes to pieces. So it has to be ever so carefully protected, and the box to hold it must be strong, as well as elastic, in case anything hits it. We will join the ribs of this box onto the spine, and hang the arm girdle around the top. Here is the box. You know it quite well."

"Why, it is the chest."

"Certainly; a box is a chest, and a chest is a box. People call it the chest. Everybody should try to make his chest as big as ever he can."

"What else is in the chest?"

"That is a secret for later on. All we want the chest for now is to hang the arms on. This is how we will make it. It must be full of joints or it would be broken up in a few minutes. The joints make it elastic, and so save shocks from breaking it, and also help to make it possible for us to move our arms in every direction. This picture shows it a little more clearly. Where the ribs of the box are fixed to the chest bone they all have elastic cartilage like rubber. You can call it gristle. You cannot break it by hitting it. It just bends and then comes back to the same shape.

The Motors.

"The world thinks a lot of itself nowadays because of the way we can travel about so nicely and so quickly. But you remember the trapeze men, the horseback riders, and the 'broncobusters' at the circus, don't you? You will soon see that our bodies are still by far the most wonderful 'moving' machines on earth—so marvelous are they that many of the motors in them are at work day and night, from the day of our birth to the day of our death, and never stop; and yet we do not know that they are working, and we cannot stop them, and we cannot order them about. They repair themselves while they go on working, and though the force which works them is probably very much the same as the force that we call electricity, there is never any spark-plug trouble, or any short-circuiting that strips the gears from working one single moment.

"The old Romans called these motors 'muscles.' There is one kind which we cannot control, and fortunate for us it is, for we get tired, and they never do. They arrange to rest while they work. They are called involuntary muscles, but we have to control the largest, the quickest, and the most powerful, and we like slaves, they soon get tired. For example, you will—that is, it is your wish—to pick up a spoon and scoop up some porridge from your plate and carry it to your mouth. Framework alone cannot do that—it must have a motor to move the joints, such as the fingers or elbow, and move them as they are directed. If you didn't command these motors, as you do, they might put the porridge in your pocket, or your nose. These motors are therefore called voluntary muscles, since you can order them to do your wishes.

"But the most important of all the muscles, those that drive the great pump, or heart, have all the advantages of both kinds.

"Each muscle consists of thousands of motors, all united together, and all working together. There are 600,000 in one muscle of the arm.

"These motors work and muscles suddenly become short, either when you yourself tell them, or when anything tells the nearest office that to save accident or to prevent damage the motor must act instantly. There are special cells always on duty in local offices which tell them to shorten up at once, without waiting for you to be consulted, lest you should be too late. We call this reflex action.

TOLEDO, OHIO

For your protection be sure the Champions you buy are in the original Champion cartons.

More Eggs—Less Shell

"More eggs—thinner shells" is given as the cause of a steady increase in claims for breakages experienced by enrriers of imported eggs, who have been authoritatively informed that it is due to the increased productivity of the foreign hen. A poultry expert says that the speeding up of production by foreign poultry keepers has resulted in loss of thickness in the shell.

Time and patience will enable a person to conquer almost any obstacle.

Factors in the Proper Relationship Between Employer and Employee

By ELBERT H. GARY, United States Steel Corporation.

THERE are many things the employee is justly entitled to. There is due him a fair and reasonable compensation, depending upon all the circumstances surrounding the employment. Necessarily and properly the question of supply and demand is and always will be a factor in determining prices of labor as it is in dealing with commodities. This is elementary and healthy; but there are other things of equal importance. When there is a well-grounded doubt in regard to wage rates it should be resolved in favor of the employee.

Of equal consequence is the safety and health, moral, mental and physical, of the employee and so far as practicable, his family, if he has any. Medical, surgical and hospital facilities should be adequate. Sanitary arrangements should be as near perfect as business conditions permit. Approved systems for voluntary relief in case of accident, and pensions in case of old age or other disability should be in force. Habitable working quarters and houses, schools, churches, wholesome amusements and exercises should be provided; and, in fact, everything practicable in the management of business affairs, from the highest sense of propriety and obligation, should be available. In times of great temporary stress the employee and family ought not to be permitted to suffer for lack of the necessaries of life. It pays big, in dollars and cents, for the employer to maintain working conditions which are beneficial to the health and the disposition of the employee.

Only in Personal Hygiene Can Be Found the Real Key to Youth

By DR. HUGH S. CUMMING, Surgeon General U. S. Army.

The key to youth is personal hygiene. Rejuvenation is a myth and the inevitability of old age must be fully realized, but prolongation of life, with reasonable retention of physical and mental vigor may reasonably be expected to follow carefully lived life.

The unattainable state known as rejuvenation may be approximated when right living is substituted for faulty habits. The changes wrought by substitution of wise for improper habits of sleep, diet and exercise afford a clue to the acquisition of uniformly good health and longevity.

An enjoyable condition of life and health may be maintained by the average man or woman at the present time for much longer period than at any other time in history of the human race. Scientists have been zealous in their efforts to replace the burnout glandular elements, hoping rejuvenation might result. These experiments have been interesting and suggestive, but at the present time there is no evidence to warrant the assumption that glands from outside sources will cause rejuvenation of the entire human body.

So long as the natural longing on the part of mankind for eternal youth and perpetual life cannot be gratified it becomes necessary to turn to the less spectacular means of approximating the desires. With reasonable attention to certain well defined and readily accessible principles *of personal hygiene it is possible* to keep pace with Father Time.

Need for Determining and Correcting Causes of Scholastic Failures

By H. GLICKSMAN, Assistant Dean, University of Wisconsin.

Principal causes of scholastic failures are: Outside work, poor health, mental disquiet, extra-curricular activities, social diversions and the lure of college life in general, noisy surroundings and undesirable associates, inadequate methods of study, meager naturnl endowments and plain indifference and neglect.

There are no two failing students in whom these various causes operate in the same combination. In educational science, as in the other sciences, we need to draw farther away from the once popular doctrine that disorders are referable to single and separate causes.

More intimate contact between teachers and officials on the one hand and students on the other would help to detect causes of undergraduate failures, and also help us to find and apply remedies.

We need more and more to determine what students have come for an education and what students have come merely to "go to college." If a freshman is found to have the enthusiasm, perception and industry with which to thrive and rejoice over a program, let us say, of English composition, elementary foreign language, medieval history and general chemistry, he is a hopeful risk and deserves careful development. We must not be afraid to say to a student singularly lacking in such enthusiasm and perception and industry that he is not promising college material."

Allowing Children to Use Own Judgment Best Possible Preparation for Life

By DR. R. A. SCHWEGLER, University of Kansas.

Home to the boy of the "teen-age" seems a prison. And it frequently is. Another town looks romantic to him. There he may have freedom, while at home his parents are attempting to live his life for him.

If the boy leaves home he begins in good time to learn how to live his life, and because he is in new surroundings, opportunities he failed to recognize at home because of their familiarity impress him and he grasps them.

The wise parents stand aside at this time of their son's life and suggest procedures of action without forcing him to carry them out.

He is literally driven from home by the wailings of his parents, who call him ungrateful, and explain they are willing to become floor mats for his happiness.

He does not want floor mats. He wants to live his life. The only way to learn truth is by telling it, and the only way to prepare children for life is to let them use their judgment.

Educational Systems Are Incomplete Without Department of Pre-Parental Study

By ALMA K. BINZEL, American Child Study Association.

The man who wishes to manage a hotel successfully goes to Cornell university and takes a four-year course. The most packer studies at Chicago and gets a bachelor's degree. The hair dresser has to take a course in training. But people undertake the biggest job in the world, the rearing of children, with no preparatory training whatsoever.

Our nation is waking up to the evil of untrained parenthood, and I believe it will not be many years before the school system of every city, as well as of the state and the nation, includes a department of pre-parental education, as well as a center where puzzled parents can bring their children and get advice as to their proper care, mental and physical.

Control of Bee Disease Is Seen

American Foul-Brood Can Be Controlled by Water-Formalin Solution.

(Prepared by the United States Department of Agriculture.)

Widespread interest has been aroused throughout the beekeeping industry by the apparent success of some recently discovered disinfectant methods in the treatment and control of American foul-brood. Disinfectants such as an alcohol-formalin solution are being used with fair success, and eliminate to a great extent the large losses previously caused by the necessary destruction of all combs infected with this disease of the brood of bees.

The use of the alcohol-formalin solution as a disinfectant is a step in advance in the control of the disease, says the United States Department of Agriculture, but apparently there is still room for improvement which will eliminate the danger of occasional cases of failure. For that reason, and because of the great interest in the subject, the bee culture laboratory started preliminary work early in 1924 for the purpose of making an exhaustive study of the efficiency of various disinfectants, including the commercial alcohol-formalin solution as well as water-formalin solutions.

Results of Tests.

A discussion of the results of the tests conducted to date has been published in Department Circular 284, which is now ready for distribution. It was hoped when the results of the preliminary laboratory methods would form a basis for practical work in the apiary. As the work has developed, numerous difficulties have been encountered which indicate that the problem of the perfect sterilization of American foul-brood combs is neither simple nor yet fully solved.

The results obtained with various strengths of alcohol and of 8 alcohol-formalin solution as the carrier for 10 per cent of their volume of formalin are not sufficiently complete to warrant conclusions as to their relative efficiency. All of these solutions are unsatisfactory, in that they do not completely sterilize all sealed cells in 48 hours. A 20 per cent solution of formalin in water, without alcohol, is slightly less efficient than the alcoholic solutions in sterilizing in 48 hours the contents of sealed cells, because of its failure to penetrate many of the cappings; but it sterilizes all open cells in that period.

Satisfactory Results.

In view of the cultural results obtained, however, a 20 per cent solution of formalin in water was found the most satisfactory disinfectant for sterilizing infected combs, with regard both to germicidal action and low cost, provided the proper precautions are taken. All honey should be extracted; all brood cappings should be completely removed, and the combs should be treated at least twenty-four hours, or forty-eight hours if it is found desirable to wash them in water after treatment.

Care must be taken not only with the process of disinfecting combs infected with American foul-brood, no matter what solution or method is used, but equal or greater care must be exercised in the treatment of the diseased colonies themselves to eliminate the danger of recurrence of disease from that source. The successful sterilization of the combs will otherwise be of little avail.

A copy of the circular may be secured, as long as the supply lasts, by writing to the United States Department of Agriculture, Washington, D. C.

Poison Bait Effective in Control of Cutworm

An inexpensive poison bait is usually very effective in controlling the cutworms in a newly planted strawberry plantation. The following formula is enough for about five acres and you can make up smaller quantities according to the same proportion:

Bran, 20 pounds.
Paris green, 1 pound.
Cheap syrup, 2 quarts.
Three lemons.
Three and one-half gallons water.

The bran and paris green are mixed dry. The juice of the lemons is squeezed into the water, and the peel and pulp is chopped to fine bits and added to the water, then dissolve the syrup in the water and fruit mixture and stir the liquid into the bran thoroughly in order to dampen it evenly.

It is suggested that the poison bait be applied in the evening, since cutworms are night feeders, and the bait will thus be fresher than if it is applied earlier in the day.

Raising Orphan Lamb

If the orphan lamb cannot be given to another ewe, it can generally be raised satisfactorily on a bottle. Of course it is better to get another ewe to adopt the lamb if possible. When necessary to raise a lamb on a bottle, it will need to be fed several times a day at first. The number of feedings can be reduced until, by the time the lamb is six weeks old, three or four times a day will be sufficient. A lamb creep should be provided where some ground grain can be kept for the lambs. They will soon learn to eat grain and this will help a great deal in getting faster growth.

Buried in Loved Ones

In Halleck's life of Stonewall Jackson, the following statement appears: "It (the body) was enveloped in the new flag of the Confederacy and the first use that was ever made of it was thus to enwrap the remains of the departed chieftain."

Good Manners

"Manners are not idle, but the fruit of loyal nature and of noble mind."—Tennyson.

Gets Baton From King Alfonso

Vice Admiral Guy H. Burrage, United States navy, commander in chief of the European squadron, presenting Rambmaster William L. Lawrence with a gold-tipped baton awarded him by King Alfonso, as well as the Spanish "Order of Naval Merit and Efficiency," aboard the U. S. S. Memphis. The baton bears a miniature of the royal crown of Spain.

THE THEATRE

Lon Chaney in "The Unknown"

...to be shown at the Palace Theatre Saturday and Sunday, July 23 and 24.

"The Unknown," Metro Goldwyn Mayer's newest Chaney vehicle, is a thriller, a mystery and a wonderful love story, all in one, with Lon Chaney, master of wierd disguises, in what is undoubtedly the strangest role in his career.

Chaney plays an armless sideshow freak, using his feet as his hands in all the ways the human hands can be used—a thing in itself that took months of practice. He throws knives, fires rifles, and does other tricks before an audience in his "act"—and in private life, eats, drinks, smokes—and even shaves, with his pedal extremities. His facial disguise is amazing—but his uncanny use of his feet, after what would seem an incredibly brief practice, sets this role apart from any he has ever done.

The story is a grim mystery tale, thru which, like a golden thread, runs a delicate romance and a remarkable story of sacrifice. Chaney plays an underworld leader, masquerading as a circus freak and working a series of criminal agencies from this strange hiding place. He comes to love Estrellita, the dancer in the circus (played by Joan Crawford), and this arouses his jealousy for Malabar, the strong man, a role handled by Norman Kerry.

"The Telephone Girl," Paramount's version of William C. De Mille's stage success "The Woman," reaches the Palace theatre Monday and Tuesday. Herbert Brenon, a man who knows directing as do few others, won the enviable task of bringing the play to cinema audiences. Holbrook Blinn, Madge Bellamy, Warner Baxter, May Allison and Lawrence Gray are featured. The story is a tale of politics. It tells how one man almost attained the heights, was about to be forced down and then, through the artifice of a young telephone girl, finally triumphed. All this is said to be told with infinite artistry and dramatic intensity.

"The Callahans and the Murphys" will be shown at the Palace theatre Wednesday and Thursday, July 27-28.

The screen's first great feminine comedy team and a "concentrated character cast"—these are the novelties presented theatregoers in "The Callahans and the Murphys." Kathleen Norris' famous novel in which every every character was a principal one—and which idea has been cleverly developed in Edward Sedgwick-Mayer's filmization of the book.

Marie Dressler and Polly Moran are teamed in a series of the most comical incidents ever portrayed on the screen.

Each player in the hilarious new comedy was "hand-picked." Thus Miss Dressler, famous stage comedienne, whose "Tillie's Punctured Romance" launched Charlie Chaplin to fame, was sought all the way from New York for the role of the redoubtable Mrs. Callahan. Miss Moran, well known for her inimitable character roles, was chosen to play the diminutive and irascible Mrs. Murphy.

"Quicksands"—The clash between a band of desert outlaws and the U.S. army, exponents of law and order on the frontier of the west, will be seen as a chapter in the march of progress when "Quicksands," starring Richard Dix, comes to the Palace theatre, Friday, July 29.

Dix plays the role of the dashing young army officer stationed in an isolated army post, who finds himself embroiled with a gang of smugglers. The girl in the case, (Helene Chadwick) causes him no end of worry, since on the face of it she appears to be in a league with the outlaws.

Noah Beery is seen as the worst of the bad men.

Old-Time Embroidery

Petit point embroidery became popular during the Fourteenth and Fifteenth centuries. It was much practiced in France, where it was known as "au petit point."

Boat for the Dog

Table scraps form the best food for the dog, says Nature Magazine. Do not feed him either potatoes or chicken bones.

See and hear the new Automatic Orthophonic Victrola at the Sugar Bowl, George Gladon, owner. This musical instrument furnished by Grinnell Brothers, Traverse City.—Adv. 12-2t

"UNCLE" GEORGE

Two essential points in road building are—that concrete roads wear, and that all other kinds wear out. The age of concrete roads is not known; as yet none have worn out, and I very much believe one hundred years from now this same statement will be true.

I never did suppose that the whole United States would immediately take up the building of good concrete roads; but I did think that Charlevoix county would—and then after our adjoining counties had witnessed the beauty and permanency of these roads, that they, too would. But this I do say, That as a result of the object lessons which have been so forcibly given us in our building these roads 15 years ago—as d all the newspapers in the county preaching and publishing them. I did expect more concrete roads built.

Remember, Uncle George says, "Every householder in every county should subscribe for one newspaper at least in his own county—and every business man should advertise his business. Show me the man in business who does not advertise, and I'll show you a dead or a dying one. If you will compare the articles in your own county papers with those of many other counties, you will admit that you have a superior class of home papers.

It is absolutely a crime to spend our money for building the kind of roads we are. Especially since we have so many miles of concrete roads which have not cost us a dollar for upkeep since they were built, and all the others have cost us hundreds of thousands of dollars, with no permanency in any of them, nor can there be. The whole world has ever been looking for something according to the system of their times—while Charlevoix county has sat still for the past ten years with folded hands apparently satisfied with what they have done. Now the time has come to wake up and devise ways whereby we can get the balance of our twenty miles of the highway finished, and a complete concrete road around Lake Charlevoix.

I feel very proud of the following poem which was written some twelve years ago. It has been copied by several papers and seems to have made a good impression:

WHERE THE ROADS?

Hordes of autos now remind us,
We should build our roads to stay,
And departing, leave behind us,
Kind that rains don't wash away.
When our children pay the mortgage,
Fathers made to haul their loads,
They'll not have to ask the question,
Here's the bonds,where are the roads?

Uncle George H. VanPelt.

Excavators Rewarded

New light on the life of ancient Carthage is thrown by the discovery of the foundations of a sanctuary dedicated to Astarte, or Tanit, Phoenician goddess of fecundity and love, in whose honor the Carthaginians used to immolate children. This find is the more significant to archeologists and historians in view of the unearthing in its vicinity several years ago of a magnificent winged statue representing the goddess Tanit. It is now in the Peres Blanc museum in Carthage. Excavations among the Carthaginian ruins usually have to content themselves with epigraphical discoveries such as epitaphs, dedications to gods and other inscriptions.—Chicago News.

Kongo to Have Aviation

Commercial aviation has just invaded the Belgian Kongo and is giving transportation speedier than ever dreamed of by residents there. A company which has secured the exclusive franchise for operation of aircraft services has established regular aerial service between Boma and Elisabethville, covering the 1,280 miles in two days instead of in 50 by any other method. Flights are made every eight days to connect with mail steamers from Belgium. Hydroplane boats will provide transportation between the small towns and settlements along rivers.

TO THE TAXPAYERS OF THE CITY OF CHARLEVOIX:

Notice is hereby given, that the July Tax Roll of the City of Charlevoix, has been delivered to us, and that the Taxes therein levied are payable at my office at any time on or before the fifteenth day of September, without charge for collection.

On all Taxes remaining unpaid after the fifteenth day of September, a collection fee of four cents on the dollar will be charged and collected.

ELMA H. COOK,
City Treasurer.

Office hours: 8:30 a. m. to 12:00; 1:00 to 6:00 p. m. 12-2t

Danger From Insects

Doctor Nenve of the Entomological society of London, has stated that insects destroyed at least 10 per cent of all the plants which man cultivates for food or clothing, and it has been calculated that if the insects, natural and artificial, on the surface of the many species of green-diy, for example, were removed, the whole of the vegetable growth of the globe would be destroyed in six months.

"While There's Life—"

Life in this old vale of tears and laughter, especially the former, is diversifying in some ways and we have devoted twenty-five years, handrunning, to trying to cultivate sufficient tact to convince wife's relatives in a nice way that it wouldn't be considered a treat to visit from them at the time mentioned, and look at us now.—Ohio State Journal.

WANT COLUMN

FOR SALE—30-ft Cruiser in good condition; mahogany finish. Apply to Sam Hamilton, Belvedere ave., Charlevoix. 11-tf

FOR SALE—6 drawer Singer Sewing Machine. Inquire C. S. Dodge, 220 Antrim street. 11-pd

Uncle Sam Gets Houdini's Books

Handcuff Expert Spent Fortune Accumulating Noted Works on Legerdemain.

Washington.—Enriched each year by the addition of 100,000 volumes, the Library of Congress now possesses among other treasures, what is undoubtedly the greatest collection of books on magic ever assembled. It is the library of the celebrated magician and handcuff king, the late Harry Houdini, who gathered material from all corners of the earth, writes John J. Daly in the Chicago Tribune.

"When I die," said Harry Houdini to a newspaper man between performances in a vaudeville theater, "I shall leave behind me, as my proudest contribution to posterity, a collection of books on magic the like of which has never been seen before."

He did. He gave, in toto, some 5,137 books and pamphlets to the Congressional Library, some of them the rarest books on magic to be found anywhere. The lot cost Houdini a fortune. It took him the better part of a lifetime to accumulate.

Close Student of Magic.

Looked upon merely as an entertainer, Harry Houdini studied the art of magic as most men delve into their favorite subject, be it philosophy, psychology, medicine, or the law. He went as deep in legerdemain as any man who ever lived—and it is said, by those who should know that Harry Houdini had no master when he died; that he was the last word in magicry. All told, he was master of more than 10,000 tricks—some of which he learned from the books now recorded in the Library of Congress, some of which he got first hand from men who never read a book—Indian conjurers, and the like.

The collection of books on magic given the American public by Harry Houdini marks the first step in the development of a lore of this kind in the United States. Heretofore, any one interested in the intricacies of an art that has come down from the time of the Exodus had, preforce, to find out by practice; by apprenticeship to a master. That, of course, in a measure, must be the case today; but with the Houdini collection where it can be studied publicly, the road is made somewhat easier for those boys and girls who would devote their lives to baffling their fellows.

Books of Famous Magicians.

In Houdini's collection, now being assorted and catalogued at the Library of Congress, are books on magic once owned by the two Stends, the Davenport Brothers, Heinberg, Harrigan, Hagan, Platt, Robinson, Alexander Herman, the Great, and a host of others whose names have become legion in legerdemain.

Of books particularly devoted to magic there are in this collection 1,727. There is only one missing, a book on magic that has been lost to collectors for all time, it seems, since no trace of it could be found even by Houdini in his world-wide search. This volume is the celebrated "Hocus Pocus Junior, the Anatomy of Legerdemain," a treatise on the gentle art of conjury by Johann Baptista Porta, the famous Neapolitan magician who held forth in the Seventeenth century.

Though "Hocus Pocus" is not in the list, there is another work by this same author that is worth its weight in gold. This is "Magiæ Naturalis," a rare, clumsy volume in German text that contains a fantastical woodcut showing the original methods of securing magical aid. Porta began this book in 1658, after he had written the lost volume, "Hocus Pocus," and therein he shows the first method of producing the famous candle trick, by which many candles are lighted simultaneously—a baffler in the old days but now quite tame beside some of the more modern tricks.

Describes Pristine Method.

In an elaborate detail Porta describes the pristine method. Linen thread was boiled in oil with brimstone and orpiment and, when dried, bound to the wicks of several candles. When one candle was lighted it ignited all the others, much to the mystification of spectators. "Magiæ Naturalis," indicentally, is one of the earliest works on conjury.

Harry Houdini had a great time collecting these books. When he was not appearing in a theater, or accepting the challenge of some police department to break from iron cells, and the like, he spent most of his time in the cities he visited searching shelves of old book shops. The imprints on the fly leaves of the books show they came from far and wide, from almost every country in the civilized world.

Most of the books are in a rare state of preservation despite the fact that some date back more than 200 years. There is one, for instance, published in 1602. This is the work of Simon Witgeest of Amsterdam, who wrote "Natuurlyk Tover-Boek oft Nieuw Speel-Tonneel der Konsten," a volume filling almost 4o dust on the shelves of the Library of Congress; but one that contains a variety of information of interest to all students of magic.

Hauber's Works in Collection.

Hauber, the German, published an extravagant treatise in three volumes under date of 1736, a book known as "Bibliotheca Magica," and this finds a favored spot in the collection. Eighteen volumes from the pen of Johann Christian Wiegleb, "under the title "Natürliche Magia," were published from 1780 to 1804 and these are intact; probably the only complete set in this country. Houdini had quite a difficult time amassing these. They constitute the first monumental work on magic and were an attempt to completely cover the field—a library in itself.

While three earlier books give a good insight into the field of magic, not one of them contains the great tricks of the masters; for these were preserved with infinite secrecy. Probably the first great expose of stock tricks in magic came when a book called "Les Petites Aventures de Jerome Sharp," issued in 1733 from the pen of a young Frenchman, M. Descremps, a frank volume that enjoyed quite a popularity in its day. This, Houdini captured early in his career. It is now safely preserved in the Library of Congress along with the other rare volumes.

Conjury Fathered by Italians.

Thus runs the earlier collection—from Porta, to Wiegeest, to Hauber, to Wiebleb, to Descremps. They constitute the earlier essays in the modern school of conjury. Italy, it is said, by the Italians, Andrioletti and Antonio Carlotti.

Houdini added himself on his knowledge not only of magicry, but of the psychic—and his books on spiritism research outnumbered those he gathered on the first subject. There are 1,200 volumes bequeathed by him to the Library of Congress, books that deal with a subject which interested him more and more in his later life.

Leader of His Profession.

Only fifteen years of age when he died—his death occurred October 31, 1926—Harry Houdini had conquered the world about him; at least in so far as his particular subject occupied the attention of that world. He believed, with others, that no form of entertainment compared with magic; that, after all, theatergoers do "pay their money" and little children and love to be amused by the deftness of the hand, the quickness of movement that deceives the eye. He was probably right, since no career in which he excelled in the last twelve or fifteen years was ever large enough to accommodate his following.

In the vernacular of the theater, "He packed 'em in." His remuneration reward was the highest given any entertainer of his time, with the exception of such outstanding singers and stars as Caruso, John McCormick, Gulbert, and a few others of that like.

Houdini Collection Prized.

That such an austere institution as the Library of Congress, containing as it does practically all the known books on magic, now should be the proud possessor of the Houdini collection is no little to tell the inner workings of the celebrated Hindu needle trick—a trick that Houdini mastered only after seven years' study. In the Nasmuni Press club, at Washington, the famous magician, returned that year from abroad, first unfolded this trick in 1912. It consisted of a relatively simple operation; the swallowing, in succession of two packages of gold-beaded needles, a hundred feet of thread, and the drinking on top of all this a glassful of water. Careful examination of the mind's mouth, a search conducted by fingers aided by flashlights, failed to reveal any traces of thread or needles.

When a committee was thus convinced that the steel needles and the cotton thread had thoroughly disappeared, Houdini, his hands behind his back, motioned for a member of the committee to release a knotted piece of thread lodged between the magician's teeth. This done, he instructed the committeeman to draw forth the thread, warning against carelessness as, he explained, "You might tear my throat."

Out came the needles, at regular fintervals, all threaded. How he did it, no one ever knew. He learned the trick, he said, from an old Hindu magician. He was afraid it was too delicate to be used successfully on the stage because of lighting difficulties, but in later years it found favor among the masses. The secret died with him. It is not to be found anywhere in his collected books.

Harry Houdini, born Eric Weiss, the son of Rev. Dr. Mayer S. Weiss of Appleton, Wis., April 6, 1874, came by the name Houdini in this way. As a boy he was interested in the career of what he thought the greatest magician of all time, the famous French conjurer, Robert Houdin. In 1857, Houdin, at the request of the French government, journeyed to Algeria to overshadow the influence of Marabouts who were then exerting a superstitious influence on the Arabs by means of magic. Houdin in Tunis managed to rout the Marabouts, destroying their prestige; so that the Arabs came back to normalcy. For this he was honored by the French government. If a man could do that, thought Eric Weiss, afterwards Houdini, he was worthy of emulation. So Weiss had his name changed legally to Houdini.

Houdini Unmasks Houdin.

The irony of it is that in after years Harry Houdini, making a study of Houdin's methods, found his idol to be so much clay and wrote a book called "The Unmasking of Robert Houdin," a heartbreak to Houdini, who said: "My investigations brought forth only the bitterest disappointment and saddest disillusionment. Stripped of his self-woven veil of romance Robert Houdin stood forth in the uncompromising light of cold historical facts, a mere pretender, a man who waxed great on the bralswork of others—a mechanician who boldly stole the inventions of the master craftsmen among his predecessors."

Harry Houdini, whatever may be said or thought of him, was honest in his work and in his beliefs. In the latter he was known as a showman par excellence; because, as those in that world love it, he knew how to put over his act."

He first appeared in 1882, a young trapeze performer. Around the late nineties he began to be recognized. Under the guidance of Martin Beck he gained his early fame as the "handcuff king." From then on he occupied the center of the stage in this and other countries, having at one time or another appeared before most of the rulers in every country on earth.

Chokes Snake

Savannah, Ga.—Drawn back ready to strike, its rattlers whirring a warning, a deadly diamond-back threatened the life of Sidney Hulbert, standing two feet away. J. B. Simmons, seeing the snake, feared to hit it as it would have gone toward his friend. So he grabbed the rattle about the neck and choked it to death.

MOTHER'S SHEETS

AS

(©, 1927, Western Newspaper Union.)

Undoubtedly, we believe that spiritual virtues should concern us more nearly than material ones; but equally do we believe that if a thing be done it had best be well done, except it be a canvas-back duck; and no housewife ever lost her title to future bliss through the heaping of a good table while she was here upon earth.—Gwen Wister.

EATING HINTS

An Englishman in this country for the first time recently remarked that chocolate seemed to be much more than our national flavor—it seemed to be our national vice.

It is certainly true that nine out of ten persons at soda fountains are drinking chocolate. Chocolate cake is the one most often seen at any average tome or church supper. Chocolate ice cream, chocolate bars and hot chocolate as a drink are just as common.

The really versatile housewife, however, will realize that there are any number of good things which may take the place of, and give chocolate a rest. Caramel, maple, coffee, raisin and nut icings are all delicious and easy to make.

White Cake.—Cream one-half cupful of butter, add one cupful of sugar, gradually, and yolks of three eggs beaten until thick and lemon colored. Add alternately one-half cupful of milk and one cupful of sifted flour sifted with two teaspoonfuls of baking powder and a pinch of salt, adding alternately with three-fourths of a cupful of milk. Add a bit of vanilla flavoring and fold in the stiffly beaten whites of the three eggs. Pour into two greased and floured pans and bake until brown. When cool cover with—

Orange Icing.—Soak the grated rind of an orange in two tablespoonfuls of orange juice for half an hour. Strain into one well-beaten egg. Add confectioners' sugar to make a thick paste, then spread on the cooled cake. One may use an orange filling for the cake and cover with the icing.

The hostess who likes to serve something novel will be interested in this simple recipe, which makes a delicious flavoring to be used in iced tea.

Wash and dry the ensemble is found unused in the bottom of glasses and cups; this is a good way to economize.

Blueberry or huckleberry pies are much enhanced in favor if a little lemon juice is added to the fruit.

Sour Cream Pie.—Take one cupful each of chopped raisins, sour cream and sugar, add one egg well beaten, one-half teaspoonful each of cinnamon, nutmeg and salt, one-fourth of a teaspoonful of cloves and a teaspoonful of vinegar. Bake with two crusts.

Summer Desserts.

Everybody, young or old, loves the old-fashioned lemon meringue pie. The meringue is not always a success —too hot an oven toughens it, not stirring the meringue into the filling and have no further worry. Prepare the filling as follows:

Lemon Pie Filling.—Two egg yolks, one cupful of sugar, one and one-half tablespoonfuls of flour, one lemon, the juice and grated rind, one cupful of water, one tablespoonful of butter and a pinch of salt.

Mix sugar, flour, salt and grated rind in a saucepan. Add the well-beaten eggs, cold water and lemon juice. Cook in a double boiler until smooth, add the butter and remove from the fire when the mixture is clear. Add the stiffly beaten whites of the eggs and pour into the baked shell. Cool and cover with meringue pie is prepared in the same way, using orange instead of lemon, with a tablespoonful of lemon juice added to give it zest.

Cup custard served with sliced pineapple, bananas or peaches is delicious. Use a dessert always well liked. Add freshly grated orange rind to the custard sugar for orange cup custard when served plain.

Apple Custard.—Add a cupful of sugar to a cupful of grated apple, salt, two eggs well beaten, one cupful of sweet cream and the juice of one half lemon. Pour into a pastry-lined plate and bake.

Rich Frozen Pudding.—Scald one pint of rich milk or thin cream. Beat the yolks of three eggs with one cupful of sugar and half a teaspoonful of salt and beat again. Cook the egg and milk until a smooth custard is formed. Cool, add a teaspoonful of vanilla and a cupful and a half of cream. Freeze. Have ready one and one-half cupfuls of Sultana raisins, candied cherries and pineapple with a small amount of citron, all finely minced. Stir these into the frozen mixture after they have stood over night with orange juice to cover. Serve with the following sauce:

Beat the yolks of three eggs and one-fourth of a teaspoonful of mace or nutmeg until light and thick. Add one-half cupful of sugar, cook over hot water until thick. Cut and fold in the whites of the eggs well beaten, then let stand to cook the egg. When the mixture is chilled, add one-fourth cupful of lemon juice and one cupful of cream beaten stiff. Serve very cold or pack in ice and half freeze.

Nellie Maxwell

Regarding Cosmetics

It is curious that a woman will insist on paying extra for strictly fresh eggs, but will be perfectly willing to trust her face to people and preparations which promise things her common sense should tell her they can't fulfill.—Woman's Home Companion.

Nineveh Bulls in London

The five-legged bulls of Nineveh are gigantic granite sculptures, formerly guardians of the Syrian palace gates, and now in the British museum.

LACE COATS COMPETE WITH SILK; DANCE FROCKS OF SHEER WHITE

YOUR choice, a summer coat all of lace or of delicate-toned silk—which shall it be? Or perhaps you have made up your mind to own one of the new hand-backed linen coats whose patterns bespeak East Indian inspiration, or how about a colorful velveteen wrap or one made entirely of ribbon, row upon row? It adds zest to the mode for such delightfully whimsical materials to enter the list of popular medleys for the summer wrap. Furthermore, these prettily frivolous cloakings are yet another proof that a Paris creation fashioned of beige crepe fallip. It is stunning for daytime wear, as are the nanny coats which the haute couture are designing of light-colored crepes and moires.

Seen in Paris also are myriads of little velvet tuxedos worn with pleated crepe de chine skirts. The latest Parisian sensation is the separate jacket of moire silk in black, white or in color.

Filthe and bonny youth captures the heart of the world this summer, as it dines and dances in very sheer frocks, which are all white and possessed of many flounces and flirs. Needless to say, the fashionable must eat hobby of the mode. Again and again, billowy white tulle or filmy net, posed over under-drapes of white satin or taffeta, strike a note of refreshing artlessness in the midst of sophisticated styling. Organdie also holds sway in youths' realm. Indeed the mode is contributing to the re-organdie theme at this moment, playing it in every fascinating way. White generally, too, is quite a favorite for evening wear. Which all goes to show that this is very much of a "white season."

The lovely white evening frock in the picture typifies the trend toward sweetly simple effects. Alluring transparency distinguishes this model of white tulle which is so charmingly posed by Hillie Dove, a screen artist who is fairly typical of the air of worship her clothes with distinction. In its general styling it is quaintly picturesque. A dream of a gown is this, with a rather long skirt contrasted by its attractively full fluffiness. Especially dainty is the narrow waistline girdled with a wide pearls, white satin slippers, with flesh-colored hose and the dainty ensemble completed by a host of unaffected loveliness.

Sometimes one simply permits just a touch of color. Perhaps a huge flower of chiffon sprawls its diaphanous petals at the hip. Or it may be that an enormous bow of tinted malines with streamers finds placement at the waist, dipping its voluminous streamers to accentuate the fashionable hip regular beauline.

Here's a fetching idea if one is a broiders-work flowers in colorful yarn or white organdie. Try it! So simple to do, so inexpensive—yet, one of the prettiest items of the season for the summer frock.

JULIA BOTTOMLEY.

Two Stylish Summer Wraps.

Dance Frock Features Simplicity.

Necklines Are Collarless

Each week as new and interesting costumes make their appearance one realizes how definitely in the mode is the collarless neckline. It may be square, it may be V or it may be oval, but in every instance there is a conspicuous absence of collar.

Doeskin Gloves

New gloves are of soft doeskin in neutral tones stitched in color and handed with leather in a shade to match the stitching.

Belt Buckles

Belt buckles assume new significance with the belting growing more and more important each day. Jewel effairs, smart leather buckles in novelty skins, and odd-shaped metal ones are all good.

Tones of Beige

Several tones of beige are skillfully combined in the smartest street and sports costumes for spring. The color effect is carried out through the entire costume, from hat to shoes.

Orchard Information

PRESSURE TESTER IS OF BIG VALUE

(Prepared by the United States Department of Agriculture.)

In determining the proper date for picking apples the adherence of the fruit to the tree, the ground color or color of the unblushed portion of the fruit, and the firmness of the flesh are all important considerations, says the United States Department of Agriculture. Under some conditions and with many varieties the time of blooming largely determines the picking date.

These facts have been proved by tests and observations by the department carried on simultaneously in experimental orchards at. Amherst, Mass.; Ithaca, N. Y.; East Lansing, Mich.; Wooster, Ohio; Council Bluffs, Iowa; Hossyn, Va., and in commercial orchards at Wenatchee, Wash. The results of the studies have been published in Department Bulletin No. 1406-D, "The Ripening, Storage and Handling of Apples."

The rate of softening of apples as they approach picking maturity varies greatly under different growing conditions. Apples from regions with a long growing season were, on the whole, softer at picking time than those from districts having a shorter growing season. The mechanical pressure tester, a device to determine when certain varieties are becoming too soft on the tree, will probably be of value as a measure of picking maturity.

It was observed that when apples ripen under warm conditions, such as prevail during an early ripening season, the unblushed portion of the fruit is greener when the fruit is in prime picking condition than during normal seasons.

The bulletin contains a great deal of data on changes taking place in apples before picking and during storage, as well as information relative to handling apples.

Peach Borers Destroyed by Paradichlorobenzene

The use of paradichlorobenzene for killing peach borers has come to be a standard practice. There has been some trouble about selecting the proper dose of this long-named chemical, and some damage has resulted from using an overdose. It seems that Frank H. Beach of the Ohio experiment station has found a dependable gauge for the chemical:

It is quickly used by cutting a piece of smooth paper 4 1-10 inches long and 2⅞ inches wide. Draw a line exactly through the middle of the long way. Mark it ½ ounce. Now draw a second line dividing one end of the paper exactly along this line ⅜ ounce.

Put the larger into a cylinder, lines marking the ounces inside, and paste it into place. Overlap the ends exactly. Chief Among these will be fold an ounce of paradichlorobenzene, place in the tree cylinder.

Place the cylinder on any hard surface and fill with PDB to the line indicating the quantity you have. Your the fine crystals of the chemical into a sack, wide-mouthed bottle and gauge the various amounts on it. A file may be used to cut a mark.

Portions prepared by Mr. Beach may will find the gas evolving from the chemical most effective if applied after September 15. Begin where he left off October 10; in southern Ohio from October 1 to 25.

Use a half to three-fourths ounce of PDB on trees three to five years old, one on younger trees. Mature trees six years old and over may be treated with an ounce.

Horticulture Facts

Never spray fruits of any kind when they are in bloom.

* * *

In spraying apples the practice is much the same as for plums.

* * *

Spray cherry trees with lime-sulphur to prevent leaf spot disease from defoliating the trees. Use one gallon of concentrated lime-sulphur to forty gallons of water.

* * *

Omit none of the first three regular sprays; some years the first is the most important, some the second and some the third. Each spray helps to make the next more effective and each must be given to insure clean fruit.

* * *

The codling moth is the common worm that infests apples; while the curculio is a worm often found in cherries and early plums; and the gouger is a bug that prefers the later plums.

* * *

Pure ground limestone or oyster shell, or both, should be available for the hens at all times.

* * *

Black raspberries are reproduced almost entirely by the tips or ends of their branches covering and rooting in the ground at the end of the growing season.

* * *

Where it is practical to thin fruit, care should be taken to pick and destroy all wormy fruit. This is especially important for the first brood of worms.

* * *

Do not use large openings in the discs of either nozzles or spray guns unless you have 225 pounds pressure or more. They are wasteful, make it difficult to maintain high pressure, and give too coarse a spray.

* * *

The custom of piling the manure around the tree trunks has little to defend it and often results in serious damage to them. The manure should be spread directly over the feeding roots mainly, away from the trunk and under the spread of the branches.

Powerful Poison in Bitter Cassava Root

Tapioca is known as a mild and delicate food but in its native state it contains a poison so deadly as to kill within a few minutes the person who should eat the root of the bitter cassava, from which tapioca is made. The poison found in the juice of the root, says a writer in St. Nicholas Magazine, is called hydrocyanic acid and its flavor and odor is familiar to those who have eaten a bitter almond or the kernel of a peach-pit, since both of these contain it in small quantities. This dangerous acid is easily driven away by heat. The cassava plant, or manioc, as it also is called, is a native of South America and furnishes a staple food for the Indians there. There are two varieties, the bitter and the sweet. The latter is not poisonous and can be eaten raw or used as a fresh vegetable. But it is the bitter cassava that is more valuable, for it is from this one that tapioca is made from the starchy part of the roots.

First Iron Rails

Although the United States, as everybody knows, is the country with more railroad mileage than any other, it is surprising that the first iron rails for the building of the first of these miles were imported from Europe. It was in May, 1829, that the ship Alexander arrived at Baltimore from Liverpool with 50 tons of iron and equipment for the construction of the first railroad in the United States.

White-Crowned Sparrow

"Next to the mockingbird, no doubt, most people will vote the white crowned sparrow the most fascinating singer of the Northwest. Often through the darkest night in the Virginia creeper or honeysuckle around the porch he utters his plaintive song —seeming to say . . . 'Sweet, sweet, listen to me, won't you?'"—William Rogers Lord.

Oriskany and Blue Licks

GENERAL HERKIMER AT THE BATTLE OF ORISKANY
From Stuart by Alvin Peterson. Courtesy Chief's Library

By ELMO SCOTT WATSON

ONE hundred and fifty years ago this summer there was fought on the frontiers of New York one of the most hotly contested battles of the American Revolution. This was the battle of Oriskany on August 6, 1777, where a force of New York militia, led by Gen. Nicholas Herkimer, marching to the relief of Ft. Schuyler, won a victory over a force of Tories and Indians, commanded by Sir John Johnson and the great Mohawk chief, Joseph Brant. Five years later on into the wilderness of Kentucky a similar battle was fought between an army of Kentucky frontiersmen, led by Cols. John Todd, Stephen Trigg and Daniel Boone, and a force of Canadians and Indians, commanded by Maj. William Caldwell, who had with him the renegades Alexander McKee, Mathew Elliott and Simon Girty. This was the battle of Blue Licks, often referred to as "The last battle of the Revolution," fought on August 19, 1782.

Although there is no direct connection between the two engagements, they exhibit a striking parallel of the circumstances which brought them about that is worthy of more than passing notice. In both cases the headstrong folly of subordinates overruled the cooler judgment of the commanders, thereby bringing upon themselves the disaster which could have been averted.

The battle of Oriskany was a part of the campaign which centered around Ft. Schuyler on the present site of Rome, N. Y., in 1777. The stirring events of that year are to be recalled this summer in a series of sesquicentennial celebrations which will be held at various places in the Mohawk valley. Chief among these will be the Oriskany celebration where the memory of the men who fought in this dramatic and bloody engagement will be honored by their descendants and hundreds of visitors from all parts of the country. The events leading up to the battle of Oriskany were these: As a part of the British plan to coerce a defiance during the summer of 1777 and to crush the Revolution, Col. Barry St. Leger had been sent to sweep through the Mohawk valley from Oswego where he was to join the army of General Burgoyne who was coming down from the north. But there was one obstacle to St. Leger's success. This was Ft. Schuyler, held by a force of Continentals under the command of Col. Peter Gansevoort and Col. Marinus Willett. On August 2, St. Leger appeared before Ft. Schuyler with a force of some 1,700 British regulars, Hessians and Tories—led by Sir John Johnson, John Butler and his son, the notorious Walter Butler, and Iroquois Indians. Colonel Gansevoort had appealed to the Committee of Safety in Tryon county for help and the chairman of this committee, Nicholas Herkimer—"Old Houlkol Herkimer" was the affectionate nickname for him—(who had been appointed a brigadier general the previous year) immediately raised the militia of Tryon county and set out to the relief of Ft. Schuyler. Herkimer's army, a force of about eight hundred men, was divided into four regiments. The first was led by Col. Jacobus Dox and was from the district of Canajoharie. The second from Palatine was commanded by Col. Jacob Klock, the third from Mohawk was under Col. Frederick Visscher, and the fourth, from German Flats and Kingsland, was commanded by Col. Peter Bellinger. This force assembled at Ft. Dayton near the mouth of West Canada creek, and on August 4 started out, reaching the Mohawk near the present site of the city of Utica and reached Whitesboro on August 5.

At this point Herkimer sent an express to Colonel Gansevoort to arrange for co-operation in moving against the enemy. Gansevoort was to fire three cannon shots as a signal that a force from the fort was ready to make a sortie, whereupon Herkimer was to advance with his army. He was then about eight miles from Ft. Schuyler and it would be easy to march the report of the big guns at that distance. But his messengers were delayed in getting through the enemy to the fort and Herkimer's men waited impatiently for the sound of the cannon. Finally, chafing at the delay, they demanded to be led against the enemy. Herkimer steadfastly refused. Then some of his officers, notably Colonels Cox and Paris, began to reproach him and even went so far as to accuse him of being a coward and a Tory. But the wise old commander resisted their taunts until they became unbearable. Finally, stung to madness by their unjust accusations, he gave the command to advance.

It was more of a disorderly mob than an army that streamed out of the encampment. At Oriskany creek the road led across a narrow causeway of logs over a marsh with thick woods on either side. St. Leger had sent a large body of Tories, many of them neighbors of Herkimer's men in Tryon county, the noted "Johnson's Greens," under Major Watts, accompanied by a body of Mohawk Indians led by the famous Joseph Brant, who prepared the ambush for Herkimer's men. Just as the head of the column marcheil onto the causeway the Indians impetuously opened fire. Herkimer's rear guard retreated almost immediately, but the rest stood their ground and returned the enemy's fire. They at once sought shelter behind trees and immediately there took place one of the fiercest battles in American history. For the most part it was a hand-to-hand fight. Colonels Cox and Paris, whose rashness had precipitated the fight, were among the first to be killed. Herkimer was disabled early in the fight by a bullet which shattered his knee. His officers urged him to retire to safety, but his reply has become a historic byword in the Mohawk valley—"I will face the enemy."

During the battle, Herkimer's messengers reached Gansevoort, who had been wondering what the distant firing meant and who fired the three signal cannon. Herkimer's men heard them, but they could not advance now. They were fighting for their lives. So great was the slaughter in both armies that the Indians finally raised the cry of retreat—"Onenah, Onenah!" and left the field. The Tories, seeing this and being alarmed at the sound of the firing made during the sortie from the fort which had been led by Col. Marinus Willett, also retreated. Herkimer and his men held the field on which they had won their dearly bought victory. The losses inflicted upon the enemy and Willett's sortie which had fallen upon St. Leger's camp compelled a portion of the British force and captured a great store of supplies, resulted in St. Leger's giving up the siege of Ft. Schuyler. So vicious was the fighting at Oriskany for Ft. Schuyler was saved and the threat of St. Leger's invasion of the Mohawk valley collapsed. Herkimer died a few days after the battle.

Five years later occurred the other battle in which the Iroquois confederacy of Indians was brought about another disaster equal to that of Oriskany. On August 19, 1782, a mounted messenger dashed up to Boone's Station, a small frontier fort which this famous pioneer had built across the Kentucky river about fifteen miles from Lexington—with the news that Bryan's Station, an important point further west, about five miles from the present city of Lexington, had been attacked by an overwhelming force of Indians and Canadians. The men of Boone's Station immediately galloped to the aid of their brethren, and the next day found Boone, who happened to be at Boonesborough at the time, on the way to Bryan's Station, with all the men of the vicinity that he could collect. When they arrived, they found that the enemy had already retreated, but since, by the evening of August 17, the Kentuckians assembled at Bryan's had numbered more than 180, and as many more under Col. Benjamin Logan were expected hourly, they determined to observe the principle of border warfare—that no savage foray should go unpunished. So, without waiting for Logan, they decided to pursue the enemy at once, even though they realized that the enemy, composed of Iorce Wyandottes and accompanied by the renegades McKee, Elliott, and the infamous Simon Girty, greatly outnumbered them. Early the next morning the party, commanded by Cols. Todd, Trigg and Boone, set forth. They found that the enemy had left a plain trail, but heedless of this indication that the allies invited pursuit, the Kentuckians dashed on rapidly. On the morning of August 18 they came to the Licking river at a place called Blue Licks. A few Indians were seen on the ridges across the river. Boone was certain the natives were lying in ambush and advised his men to select a strong position on their side of the river and wait there until Logan and his men arrived.

But this wise counsel was disregarded by the impetuous Kentuckians who were anxious to strike a blow at the enemy who had defeated their stations. Boone then proposed that a party be detached, march up the river and fall upon the rear of the enemy at a prearranged signal, while the main attack was delivered in front. While the proposition was being discussed, a decision was forced by a Major McGary, who had supported Boone in the proposal to await the arrival of Logan and had been taunted with cowardice by some of his fellows for doing so. McGary suddenly broke up the council by spurring his horse to the ford and dashing across it, shouting "Let all who are not cowards follow me!"

It was just the sort of an appeal which would influence such rash, impetuous men as most of these Kentuckians were. They streamed across the river in disorderly fashion and there was nothing for Boone to do but to lead the host to follow, and to try to restore some order in the struggling mob. They crossed the river safely and advanced up a buffalo trail to the top of the ridge beyond. By this time some semblance of order had been restored around Ft. Schuyler and advance party of twenty-five. As they approached the top of the ridge a rifle shot rang out as a signal for the crashing volley which then followed. Twenty-three of McGary's twenty-five men went down at this first fire. The bewildered McGary who had precipitated the fight was one of the two who escaped. After this first volley, the Canadians showed themselves on the ridge and from the ravine on either flank, the Indians opened a deadly fire. The Kentuckians broke and fled, some of them returned the fire. Instantly the Wyandottes, always noted as reckless and desperate fighters, came bursting like a whirlwind with tomahawk and tomahawk. There was a short hand-to-hand conflict until the Kentuckians, greatly outnumbered, were surrounded and in imminent danger of being slaughtered where they stood, broke and fled back toward the river. Nearly every officer of rank was killed. Boone escaped across the river.

The Kentuckians hotly pursued, streamed back across the river. There Major Netherland rallied his men and offered resistance, ending the pursuit and preventing a massacre.

Of a force of approximately one hundred eighty men, sixty-seven had been killed outright or were murdered as they lay wounded on the field of battle, and seven had been captured, four of whom died at the torture stake. Nearly every man who escaped was wounded in some way. Half-way back to Bryan's Station, the survivors met Colonel Logan with 400 men, coming to their support. How bitter must have been their regret when they realized how different the result might have been if they had heeded Boone's advice and awaited Logan's coming, and had not been swept into action by McGary's rash appeal. Blue Licks was perhaps the greatest defeat ever suffered by the pioneers of the Blue Grass state, but it was also a high-water mark in her history. For the Indians came no more to Kentucky and Blue Licks marked the end of the frontier period.

Oriskany and Blue Licks—two names which afford a striking illustration of the injury which a body of undisciplined men may do to themselves and those dependent upon them. But in the memory of the desperate valor of the men who fought these battles, History forgives them their indiscretion and in these sesquicentennial years remembers only a nation's gratitude to the men who helped in the winning of the West.

Horse and Mule Shortage Seen

Impending Shrinkage of Vital Interest to Farmers All Over.

(Prepared by the United States Department of Agriculture.)

Work stock—horses and mules—is the one class of animals in which practically every farmer is concerned whether he is a stock grower, crop and planter, wheat grower, or cane raiser. The approaching shortage of good work stock is, therefore, of vital concern to all farmers, says John O. Williams, in charge of horse and mule investigations for the United States Department of Agriculture.

Decrease in Animals.

Estimates of all horses and mules on farms the first of this year showed a total of 21,013,000 head, a decline in work stock population of 17 per cent since 1920. It is practically certain that the next five years will show a reduction of the present numbers by 30 or 40 per cent unless breeding is resumed. This rapid reduction is expected to develop into an acute shortage in those states where the animals on farms are the oldest and where fewest colts are coming on as replacements. There are more horses over ten years of age in the northeastern and southeastern states than elsewhere. The southeastern states have the largest percentage of mules over ten years of age.

Although the average age of horses has increased considerably the average value during the past three years has not changed much. The present low prices may not be expected to continue indefinitely. In fact, there is a definite market demand at present for high-class draft geldings and saddle horses of merit at good prices.

Make Type Fit Demand.

Farmers in the corn belt, where surplus work stock has previously been raised should consider the possibility of increasing the production of the types of horses and mules that are suitable to meet the expected demand from the eastern and southern states. Furthermore, says Mr. Williams, it is important that farmers thoroughly study the relative advantages of animal and mechanical power for their own conditions in order to convince themselves of the necessity of planning to raise colts for productive purposes before the inevitable shortage in desirable work stock occurs.

Common Salt and Iodine Used to Prevent Goiter

Frequently one hears some one claim that salt is "dead" and not "real" stuff. The man who makes such a claim is ignorant of the animal body and of its requirement. All farm animals need salt—and must have it. In addition, pestra lodine should be supplied to prevent goiter—big neck in calves—and baldness in pigs. There are some firms in the United States producing iodized salt for farm stock. When salt is thus iodized, it needs to be sold at a price above that paid for good farm salt, but where goiter, hairless pigs, and other such troubles exist, this method of securing iodine is economical. One pound of iodized salt is usually only twice as expensive as ordinary salt. One hundred pounds of such salt would last on head of cattle—two ounces of salt for each individual daily—approximately three months.

Hints for Farm Success

Given by Dean Mumford

Dean Mumford of the University of Illinois gives the following pointers:

1. Adjustment of production to effi ciency and activity to demand.

2. More satisfactory means of selling the seconds and the changes both in kind and quantity of agricultural production.

3. Increase of efforts to reduce cost of production by use of scientific and improved methods.

4. Attention to the problem of the reduction of the use of marginal land and utilization of labor of marginal farmers.

5. More careful study of business organization on the farm.

6. Co-operation on an ever-increasing scale among farmers, more specifically to organization in production and marketing.

Agricultural Items

The mowing machine is the natural weed eradicator.

* * *

Only the farmer himself, not legislators, can make farming safe for the farmer.

* * *

Watch for bugs. This is their best season and once they get a start they are hard to eliminate. Use arsenate of lead and dusting sprays freely.

* * *

You cannot spray well without a good outfit which will give you plenty of pressure.

* * *

Doing the essentials only never made a man successful. It's the details that count.

* * *

Chickens will utilize a lot of fruit if they can get it. Watch them eat the melon rinds about the yard.

* * *

The lumber who favors the tree-at-home diversifying farmer shows patriotism as well as business acume.

* * *

A shade tree is the best possible attainable shelter during hot days. It cuts off the hot sun, but allows the winds to sweep along unmolested.

* * *

Barium carbonate is one of the easiest and most effective poisons to use in killing a farm of rats. Ask your druggist how to prepare and use it.

* * *

If you look around you will see many places where our trees can be grown without interfering with the farm crops. Nuts are getting valuable.

World's Deep Debt to Finder of Astigmatism

A centenary of peculiar interest to many sufferers from defective eyesight is that of the first spectacle lens to correct astigmatism, which was made just a hundred years ago.

The inventor of the lens was an Iyes which optician named Fuller, but the discovery of astigmatism, and the suggestion as to its remedy, were the work of Sir George Biddell Airy, then a Cambridge professor and still considerably under thirty years of age.

Airy afterward became astronomer royal, a post which he held for 26 years, in which he completely revolutionized the British Royal observatory with instruments of his own designs.

Thousands of astigmatic spectacle lenses are now sold every week, so that the centenary must have come to bless Airy's researches. But he never saw a single penny raised for his discovery.—London Answers.

STATE OF MICHIGAN — The Circuit Court for the County of Charlevoix. —In Chancery.

Nina Hughey, by William Bowman, her next friend, Plaintiff.

vs.

Frank Hughey, Defendant.

Order for Publication—Defendant's Residence Unknown.

Suit pending in the Circuit Court for Charlevoix county, In Chancery, on the 23rd day of May, A.D. 1927, at the City of Charlevoix, in said county.

It satisfactorily appearing to the Court by affidavit on file that a chancery summons has been duly issued out of and under the seal of said court, for the appearance of said defendant therein, and that the same could not be served on said defendant because that diligent search and inquiry it could not be ascertained in what state or county the said defendant resides, or the whereabouts of said defendant learned, and that said chancery summons has been returned by the sheriff of said county with his certificate thereon endorsed that after diligent search and inquiry he was unable to find the said defendant within the state of Michigan on or before the return day of said summons, on motion of Clink & Williams, attorneys for said plaintiff,

It is Ordered, That the said defendant, Frank Hughney, cause his appearance to be entered in this cause within three months after the date of this order, and in case of his appearance that he cause his answer to the plaintiff's bill of complaint to be filed, and a copy thereof served upon the plaintiff's attorneys, within twenty days after service on him of a copy of said bill and notice of this order, and that in default thereof said bill to be taken as confessed by said defendant.

And in like motion, It is Further Ordered, That within twenty days after the date hereof, the plaintiff cause a notice of this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in said county of Charlevoix, and that such publication be continued at least once in each week, for six weeks in succession, or that he cause a copy of this order to be personally served upon said defendant, at least twenty days before the time above prescribed for appearance.

And on like motion, It is Further Ordered, That the said plaintiff cause a copy of this order to be mailed to said defendant, at his last known postoffice address, by registered mail, and a return receipt demanded, at least twenty days before the date herein prescribed for his appearance

WORLD WIDE TRAVELER HERE

Visits Charlevoix for the First Time in Four Years

"The Gyrene Kid" internationally known hobo and soldier of fortune, has been in Charlevoix for the first time in four years. He dropped off a south bound freight one night last week and called on many of his old friends in the city. The "Kid" claims he has visited every port and city in the world and has shaken hands with more notables than St. Peter himself.

He has seen action in two wars, and was a fighting marine at Belleau woods and at Chateau Thierry. Around his neck he wears a string of medallions that have been given him on various occasions and for various reasons, among them, acts of heroism, snelling tests, marksmanship and a number of other things.

He is everything from a psychiatist to a philologer and reads the future as readily as the past. His bag is crammed full of clippings from various newspapers around the globe bearing his name and telling of his adventures. Last year at this time he was in South Africa. He is gone now, where, we aren't sure, He says the brisk northern air is helpful to his imagination.

LAST SUNDAY WAS BUSY CHURCH DAY

Last Sunday was a busy day for the pastor of the local Methodist Episcopal Church. At seven in the morning he delivered an address at the church dedication services in East Jordan, on the subject "Facing Forward." At 10:30 he preached in the local Methodist church in Charlevoix, his theme being a discussion of the "eternal qualities." At 12:30 this afternoon he met the third quarterly meeting at the Indian Mission church, preaching at this service on the subject "Dynamic Faith." At 2:30 the great climax service of the day was held in the Charlevoix Methodist church, when he preached on the subject "Under New Management." At this evening service the Singer Quartette from Albion college assisted with the musical program, singing several appropriate selections and rendering a song story based on the parable of the Prodigal Son. The pastor's sermon emphasized the bible idea that under the new management of Christianity a life is cleansed spiritual, right motived, glad and useful. None of religious duties, forgetfulness of God and Sabbath desecration are due to ignorance rather than to Christianity, and are deplorable.

Fishing for Dog Biscuit

On the British Columbia coast the dogs of both white men and Indians are well known to roam the beaches and fairly live on salmon, which they seem to prefer in the sundcooyed state. No ill effects result unless the animal gorges, as would occur from overeating of any other food.—B. H. Symns in Adventure Magazine.

Building Up Millions

Anything is attainable, if one only starts in a small way and increases daily, say in his savings. None doubts he could save one cent a day, and there's the secret of wealth, says Popular Mechanics Magazine. To become a millionaire, all you have to do is to save one cent the first day, two cents the second day, four the third day, eight the fourth day, and so on, doubling the amount each day, and in 30 days you'll be a multimillionaire. The total will be nearly $10,750,000. The final day's savings, however, must be more than $5,000,000.

HAVE INDIAN CAMPMEETING

Date Set for August 21-28—Entertainment To Raise Fund

There are a large number of Indians in Charlevoix county and the surrounding counties, who desire very much to hold a campmeeting for a week in a near by grove. The date has been chosen for Aug. 21-28 inclusive. Indian preachers who are bilingual have been secured and plans are nearly perfected for this meeting. One item that always disturbs the Indian's plans and is frequently embarrassing to his white brother, is the item of finance.

Where to get the money to finance such a program as the meeting requires for the Indian, is a present item of consideration for our local Ojibwa tribe. They think to solve their problem by giving a unique entertainment in the local Methodist church, the proceeds from which they hope will reach at least four hundred dollars.

The entertainment will consist of five acts, depicting the natural Indian method of training a boy to be a brave, training a girl to be a good squaw, an Indian courtship, an Indian wedding and a native Indian christening of the new baby. Indian costumes and new red sale, most beautiful, Indian music and ancient Indian troubles will help to make the entertainment a great occasion.

Rev. Dr. J. O. Randall of Traverse City, has general oversight of these Indians as their District Superintendent, while the local Methodist pastor will devote some careful consideration to the entire program. The date of the entertainment will be about Aug. 12. Ticket sellers, with proper credentials, will visit the people and give everyone an opportunity to make the Indian campmeeting a possibility.

Famous London Prison

Newgate was long the chief prison of London. It was a gloomy building standing east of Holborn viaduct. Its history went back to 1218. It was destroyed by the great fire of 1666, and rebuilt, but partially destroyed during the Gordon riot of 1780. In 1902 Newgate prison was pulled down, and on its site was erected the Central Criminal court.

Immense Lava Deposit

In the northeastern part of the United States there is an area of almost 200,000 square miles of solid lava due to prehistoric volcanic eruptions.

1905 1927

GROWTH

When an institution shows a healthy growth over a period of years, the reason is apt to be found in the character of the service it renders its clientele.

It is somewhat significant that the deposits of this Bank have grown from $461,420.00 in July 18, 1922, to the total of $724,494.00 on July 18, 1927, or an increase of 57 per cent.

These are facts that tell a story of satisfied depositors; of clients well served.

In soliciting your business, we offer ourselves not simply as a depository for your funds, but as a service-giving institution, able and willing to co-operate with you in the promotion of your own business activities.

Capital $25,000.00 *Surplus $25,000.00*

MR. DAVID MAY

DIED FRIDAY AT SUMMER HOME

BODY SHIPPED TO ST. LOUIS

Sunday, by a Special Car, Funeral Held There on Tuesday

David May of St. Louis Mo., died at his summer home here Friday afternoon at 3 o'clock. A special car carried his body to St Louis Sunday night where the body remained at the May home until Tuesday. Funeral service was held at Israel temple on that afternoon.

David may has been afflicted with asthma for some forty years. Of late attacks of heart trouble developed which was the direct cause of his death, according to Dr. R. B. Armstrong of this city, who attended Mr. May. Within the past six months his condition has been somewhat critical.

Failure of Mr. May's health was the cause of his departure from Los Angeles for the home of his daughter, Mrs. Martin Strauss of Chicago, late last winter. Some two weeks ago the May family opened their summer home here where it was hoped that Mr. May would recuperate. For a time it seemed as if the brisk northern Michigan climate would improve his health.

At two o'clock Friday David May was joking and talking with his family and seemed in excellent spirits. At 2:30 an attack of heart trouble caused the family to call the local physician. Mr. May was resting easy at 2:40 and was apparently sleeping. At three o'clock, however, he passed away. At the bedside at the time of his death were his wife, Mrs. Ross May, his son and daughter-in-law, Mr. and Mrs. Morton May, his daughter and son-in-law, Mr. and Mrs. Martin Strauss.

The David May family are among the prominent summer visito.s of this city. Their cottage on Michigan avenue is one of the most spacious in Charlevoix. Michigan, backed by the bluffs that rise some fifty feet above Lake Michigan. Next door to the May home stands the colonial mansion of Col. Sidney Schwab of St. Louis, a lifelong friend of Mr. May's, who died last winter. This year is the first time either of the cottages have been occupied for two years.

CIRCUS AT CAMP CHARLEVOIX NEXT

The boys at Camp Charlevoix are staging a circus to be given at their grounds at Ironton, on Lake Charlevoix next Thursday afternoon at three o'clock.

The entertainment will consist of horse drills and trained horse exhibitions under the direction of Dr. Aldrich; war dances by the boys supervised and participated in by Ottawa Chief Do-no-tous, of Good Hart; tumbling and various other acrobatic stunts by the boys.

An Arabian party will be given by Rajah Howard, a native Arabian student at U. of M., who will demonstrate the social customs of his people—dances, eating, smoking, drinking, etc.

The final stunt will be life saving and fancy diving, in charge of Karl Oldham. The show will be under the general supervision of Louis Riemann and C. R. Huntley. Public invited and no charge.

Ways of Women

"It seems to me," remarked the small boy who had been thoughtfully reading the paper, "that it must be dangerous to marry women. I get the idea that in the first place they marry you for your money; if they don't manage to take all of it, they leave you and sue you for alimony; and if they fail at that, then they outlive you and get your life insurance."—Detroit News.

Malayan Snake God

On Penang, an island off the east coast of the Malay peninsula, there is a temple in honor of the snake god worshiped under the name of Chor Su Kong. Inside the temple is crowded with snakes, ranging from 5 inches long to monsters as large as sea serpents. They are said never to harm the worshipers.

Appreciation

The first time that one sees a glorious thing, one's heart is lifted up towards it in love and awe; till it seems near to one—ground on which one may freely tread; because one appreciates and admires; and so one forgets the distance between its grandeur and one's own littleness.—Charles Kingsley, in "Two Years Ago."

MAY HEAD ROTARY

Arthur Sapp of Huntington, Ind., who it is expected will be proposed by the Rotary of Leeds, England, for next president of Rotary International at the organization's annual convention in Ostend, Belgium.

BIG PROGRESS

BARBERRY CAMPAIGN IN COUNTY

CHECK THE BLACK STEM RUST

Many Areas Located in Territory Around East Jordan

Good progress has been reported thus far in the barberry eradication campaign which is being conducted in Charlevoix county this year. The territory around East Jordan has been completed and the squad has moved on to Boyne City. Many areas of escaped areas were located in the territory around East Jordan.

The campaign is being carried on by the United States department of agriculture. The common barberry against which the campaign is waged is the cause of black stem rust on oats, wheat, barley, rye and other grains and grasses. It is interesting to note that there has been a noticeable check of black rust in the last two years, over the entire area in which the campaign is being carried on.

This is largely due to the fact that over fifteen million common barberry bushes have been killed which means that there are just that many less places for original inoculation to spring from. Thus the black stem rust cannot get started in a big enough way to do any great damage as it has in the past. The common barberry is a tall, erect, spiny bush. The leaves are purple or green in color and have saw toothed edges. The spines are usually in groups of three or more. The red berries which are borne in clusters, like currents are quite conspicuous. The bark is grayish and the wood yellow.

TELLS AMUSING TALE OF MILITARY LIFE

When a sergeant and a private, under his command, fall in love with the same girl, there is excellent chance for comedy. This riotous situation is the invention of Byron Morgan, who wrote the story of "Rookies" a farce comedy, which will be at the Palace Theatre Saturday and Sunday.

The tale is laid against a background of life at Uncle Sam's citizens' military training camps, and while it depicts life at camp with its drills in all branches of the service, athletics and range contests, these are made a background for the comical situations and laughs, which naturally are evolved.

Entries Growing in Tennis Tournament

Entries to the Western Michigan Open Tennis Tournament are growing daily in both size and importance, according to Mr. G. L. Ash, city sports manager.

Among them are Carl Hodge, fourth ranking player in the Missouri valley and a native of St. Louis; Mrs. Ruth Reise, Michigan state champion; Miss Marion Leighton, Western champion and holder of the Chicago City title; Teddy Joslyn, star Grand Rapids player; and many others including the winners of the recent City open tournament. Mrs. S. P. Frankel, city title holder, will be among the leaders in the women's single running.

TENNIS TITLE

GOES TO W. GORDON PARKER

CAPTURES CITY MEN'S SINGLES

This Years Tourney Fastest Ever Staged in the City

Once again W. Gordon Parker, pioneer of northern Michigan tennis, has captured the city open tennis title in the men's singles. "Obie" Smith of Indianapolis, Ind. was the last victim to go down before the clay court patriarch. Mr. Parker defeated him in 3 straight sets, 6-4, 8-6, 6-2. Mrs. S. P. Frankel of New York City, is the winner of the woman's singles title defeating Mrs. H. S. Lion, 6-2, 6-3.

Miss Freda Birge of St. Louis Mo., captured the girl's title after a fast match with Miss Jane Finn in sets 6-3, 7-9. Another St. Louisian, William Connett, is the holder of the boys city open tennis title. He defeated Edward Rosenberg of Detroit, 6-2, 6-3. Seven entries were paired off in the junior boys brace. M. d'Alexander of Chicago, won the title after defeating Harry Begley of Poplar Bluff, Mo., in sets 8-6, 6-0. The men's doubles were played off Monday afternoon with Johnny Knight and Leland Mandell ed against "Obie" Smith and J. Lehigh.

This years city open tourney was one of the fastest ever staged in the city according to the judgments of many local fans who attended the matches. The clay courts at the Inn have been lined with spectators since last Monday and everyone in northern Michigan has been aware of the activity at the local courts. Entries from all over the United States were listed in the brackets with the resorts round the state of Michigan contributing their share of players to the lists.

With the approach of the Western Michigan Tennis Tournament many players of importance will turn to Charlevoix as the entry list now in the hands of L. G. Ash, sports manager of the city, will show. A champion of the Mississippi valley has already notified Mr. Ash of his intention of playing in the local events.

ENTRIES ARE PILING UP

Second Annual Regatta of Charlevoix Boat Club.

Entries are piling up for the second annual regatta of the Charlevoix Boat Club, Aug. 5-6-7. All three classes of outboard motorboats are well filled with such entries as M. Roy Brady's "Baby B," "April Fool" from Traverse City, and George Oserafi's "Baby Stepper" from Mullet Lake in class C. Five entries are listed in class B for outboard motors at the present time, most of which hail from Traverse City.

Ben Samuelson's "Dynamite" of Traverse City will offer stiff competition for Ed Olson's "Alert" of Spider Lake in class A. In the free-for-all hydroplane race there are two boats entered: M. Roy Brady with his famous "Miss Charlevoix." M. C. Jewett's "Star" of Traverse City will be matched against him. Other entries may make this race more competitive.

There are many boats in local waters such as Julius Gilbert's "Jay-Gee" and George Stwab's "Miss Tennessee" which have not as yet listed their boats. It is expected that Harbor Point and Wequetonsing will come down to Lake Charlevoix with a lot of sailing craft. According to present arrangements the races will fill out a full schedule for Friday and Saturday afternoons and all day Sunday. Beside the sailing and motor craft events there will be competition for row boats, canoes and war canoes.

The committee in charge of the regatta is composed of John Whiteman, chairman, Chicago; G. L. Ash, managing director; John Wilson Jr., Chicago; George Schwab Jr., Nashville, Tenn.; Julius Gilbert, Detroit; and Charles Emrey Ray Hamilton, and Mrs. M. Roy Brady of Charlevoix.

Language All Their Own

The wandering tinkers of the north of England speak "Shelta," a survival of the Anglo-Saxon language entirely unintelligible to the average Englishman.

GOVERNORS AT MACKINAC

Island Agog Over Famous Assembly Honoring Her Shores

With the arrival of Gov. John H. Trumbull of Connecticut, by seaplane, a group of twenty governors are digging deep into state problems at Fred Green's enclave on Mackinac Island. Among the guests at the conference is Mr. Ira A. Adams, editor of the Sentinel, member of the Mackinac Island State Park Commission.

The Island is all agog over the famous assembly that is honoring her historic shores. Schoolboy bands, special sight-seeing tours behind antediluvian carriages punctuate the activity of the Island. It is the most historic incident in the fiction-like history of the island that has occurred since old Fort Mechillmackinac was stormed by the French and Indians in a century that has all but been forgotten.

There are many conjectural conclave opened on the spot where the summer White House would have been established had the president accepted the invitation of the Wolverine state. In opening the meeting Monday, Gov. Fred Green said to his guests:

"In the ninety years of Michigan's history no governor of this state has enjoyed the privilege of welcoming a distinguished a group as we have here today. My predecessors have welcomed princes and kings and the incumbent of that higher office, the president of the United States, but I have the honor today not only of welcoming the highest officers of the great states of the union but several future presidents of the United States. The welcome that I convey to you is from all the people of Michigan. Through their legislature our citizens have directed me to extend to you every courtesy that Michigan and this historic resort can offer.

I shall not endeavor to detail upon all the wonders our state boasts, because, as I understand it, this conference is limited to a week and the address of welcome is not supposed to consume the whole time. I could easily spend a week telling you about our hunting and fishing. That would slight our industrial development, our mines and agriculture, and I should be criticised."

You to Torture Tourist

The Maid—Yes, sir, your suitcase looked so untidy with all those old labels on it, from Japan and America and Egypt and Africa that I thought I'd clean them all off.—The Passing Show.

Her Wonderful Eyes

It was between dances. They were sitting in a dim corner.

"You have wonderful eyes," he murmured.

"Yes?" she inquired, expectantly.

"They are like stars," he went on.

Her little brushed him as he murmured, "They are so very bright."

His hand fumbled in his pocket and he drew forth a glittering object. "They are so very bright," he repeated. He threw this watch before her. "See if you can see the time in the dark."

HOT FIRE HERE LAST MONDAY

Meat Market and Cafe Partially Destroyed—Insured

Losses estimated at over $5,000 resulted from a fire which throttled the Washburn building on Bridge street, at seven o'clock last Monday night. The origin of the fire is unknown breaking out in the rear of the building and gaining a considerable start before it was discovered. The Van Alsburg meat market is perhaps the most severe loser as it was well stocked with meats and vegetables which were damaged partially destroyed.

Nell's Cafe next door was also badly damaged. Both places were opened up Tuesday, and although somewhat handicapped are doing business. According to Arthur VanAlsburg, his books and accounts are not damaged and his cooler escaped the flames unscathed.

Insurance covers a loss of $2000 which is far short of what it will cost to reestablish the business.

ARTISTIC MINIATURE OF ISLE OF PINES

One of the most attractive window displays seen in Charlevoix in recent years is shown this week in the corner window of the Charlevoix Abstract and Engineering Co. office

It is a very artistic miniature of the Isle of Pines, which is located in the South Arm of Lake Charlevoix. The island was formerly known as Isle of the Holy Island, and has been owned by I. B. McLean for many years.

The miniature is built on an exact scale of 25 feet to the inch and shows the several hundred trees, the brluge, lake and boats and in fact everything but the large artesian well near the McLean cottage.

It is a fine work of art and worth stopping to see as you pass.

Water Carnival to Follow Local Regatta

Following the local regatta on Lake Charlevoix, the scene of aquatic activity will shift to Harbor Springs where plans for a three day water carnival have been made. This event will start Saturday, August 11, and last for three days, according to an announcement made by the Harbor Springs Chamber of Commerce.

There will be competition between all classes and kinds of sailing craft; outboard motor boats, speed boats, sailing crafts of all varieties, rowboats and canoes. Swimming events of various descriptions are on the schedule. The summering guests on the string of resorts which line Little Traverse Bay are expected to furnish an abundance of swimming talent as well as dozens of sea crafts of every description.

Concerning Truth

You need not tell all the truth unless to those who have a right to know it all; but let all you tell be truth.—Horace Mann.

THE OLDEST BANK IN CHARLEVOIX COUNTY

STUDYING ART

Friend—Yes, you have talent. You may become a Whistler in time." Student—"But I'm not going in for music—I'm studying art."

Slipping

Friend Passenger (to owner of small car in heavy wind)—What are you reversing for?

Owner—(Dolefully)—I'm not.

True

True Story Writer—Truth lies at the bottom of the well.

Editor—Well, surely not at the bottom of your inkwell.

Still Saving

Brown—Yes, I'm saving up to buy a car.

Smith—When are you going to get it?

Brown—Get it? We've had it for eighteen months now.

Quite Handicapped

Gentleman—Have you any modern fiction?

Clerk—Sorry, sir, but we haven't. Our book buyer has been sick for a couple of days.

THE LIMIT

George—He has a mean disposition, hasn't he?" Tom—"I should say so. He's the kind of a man who'll rake in a Jack-pot on a bluff, and then, after he's stacked up the chips will spread out four hearts and a spade for every body to look at."

Limited Time

Maid (at door)—No, I haven't any money to give you; you'll have to come around again after five o'clock when Mrs. Jones is at home.

Beggar—I can't, madam; I only work from ten to four.

SHE WENT FROM BAD TO WORSE

Down to 98 Pounds—Finally Restored to Health by Lydia E. Pinkham's Vegetable Compound

Cleveland, Ohio.—"After having my first baby, I lost weight, no matter what I did. Then a doctor told me I would be better if I had another baby, which I did. But I got worse, was always sickly and went down to 98 pounds. My neighbor told me about Lydia E. Pinkham's Vegetable Compound, as it helped her very much, so I tried it. After taking four bottles, I weigh 116 pounds. It has just done wonders for me and I can do my housework now without one bit of trouble."—Mrs. M. Rissstrom, 10004 Nelson Ave., Cleveland, Ohio.

If some good fairy should appear, and offer to grant your heart's desires, what would you choose? Wealth? Happiness?

Health? That's the best gift. Health is riches that gold cannot buy and surely health is cause enough for happiness.

Lydia E. Pinkham's Vegetable Compound may be the good fairy who offers you better health.

Constipated?

Take NR—NATURE'S REMEDY—tonight. Your stubborn system will respond gently, properly by morning and your constipation will end with a bowl movement as free and easy as nature at her best—no pain, no griping. Try it.

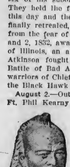
AUGUST—Month of Battles

By ELMO SCOTT WATSON

T WAS August that Julius Caesar, Roman emperor and great military leader, because it had been a lucky month for him, this month which we now know as August. Although the United States has never prided itself upon imperialism we did this ancient conqueror—the name itself means "Imperial"—the fact remains that August has been an important month in American military history. It is doubtful if there have been in any other single month in the year as many important engagements with the enemy as there have during this one. Heitman's "Historical Register and Dictionary of the United States Army—1789-1903" lists no less than 200 major battles, skirmishes and other actions in which troops of our regular army have been engaged during August. Add to this number the number of important engagements during our colonial history and it is easy to see why the characterization "August, Month of Battles" is an apt one. Every day in the month is the anniversary of some stirring military event, as witness:

August 1.—In 1813 this day saw an army of 3,200 British and Indians, led by General Proctor, surround Ft. Stephenson or Lower Sandusky, on the present site of Fremont, Ohio. It was defended by 160 men of the Seventeenth and Twenty-first Infantries, commanded by Capt. George Crogan who had just passed his twenty-first birthday, and six of his subalterns as youthful as himself. They held the fort against repeated assaults on this day and the next and when Proctor's army finally retreated, the state of Ohio was delivered from the fear of a British conquest. On August 1 and 2, 1832, away up in the northwestern corner of Illinois, an army commanded by Gen. Henry Atkinson fought the engagement known as the Battle of Bad Axe river, with the Sac and Fox warriors of Chief Black Hawk, and virtually ended the Black Hawk war.

August 2.—Out on the plains of Wyoming, near Ft. Phil Kearny of tragic memory, in the year 1867, 32 white men, commanded by Col. J. W. Powell of the Second Cavalry, had themselves crouched down behind the scanty shelter of some wagon boxes arranged in the form of an oval. Around them raced a torrent of howling, blood-mad savages—Chief Red Cloud's Ogilala Sioux, 3,000 in number. Charge after charge of these Indians, the finest warriors of the western plains, was hurled back by the steady stream of rifle fire which wreathed the inclosure in a cloud of smoke. When the battle was over, the 32 defenders had lost 2 killed and 2 wounded. The loss of the Indians is killed and wounded was 1,137. No wonder the Wagon-Box fight has come down in history as "an account that rends like a story of Cortez"!



Black Hawk.

August 3.—On this day in 1862 Companies E and F of the Twenty-second Infantry and a group of Indian scouts fought an engagement near Ft. Stevenson, in North Dakota, with the hostile Sioux who were swarming about that post. From ills founding Ft. Stevenson was in an almost perpetual state of siege, and the white man who ventured out from its walls went in certain death. The only exception to this rule was the case of the famous scout "Yellowstone" Kelly, who acted as mail carrier between the Missouri river posts in those days, whose hairbreath escapes were more thrilling than anything which can come from the imagination of a Wild West dime novelist.

August 4.—One hundred and fifty years ago on this date an army of British, Tories and Indians, commanded by Col. Barry St. Leger, appeared before Ft. Schuyler (the former Ft. Stanwix) on the present site of Rome, N. Y. It was defended by Continental troops commanded by Col. Peter Gansevoort and Col. Marinus Willett. If St. Leger captured the fort he could sweep down the Mohawk valley and ravage this "Granary of the Revolution," join Burgoyne at Albany and with him march south to join General Howe in the stroke that would put an end to the Revolution. But Ft. Schuyler held out throughout the siege and the patriot cause was saved.

Red Cloud.

August 5.—Out in the wilds of western Pennsylvania one hot summer night in 1763 a little army of British regulars and Colonials, commanded by Col. Henry Bouquet, a Swiss soldier of fortune, found themselves in a desperate predicament. They were marching to the relief of Ft. Pitt, a frontier outpost which was besieged by Indians. A large force of warriors had been sent to intercept Bouquet's troops. They were surrounded and there was no hope for relief. They must fight their way out. Defeat meant massacre. Fight their way out they did. The next morning by a brilliant stroke of strategy, which should give Bouquet a place with the great captains of American history, the Indians were overwhelmingly defeated, and his soldiers continued their triumphant march to Ft. Pitt. The battle of Bushy Run was one of the most decisive ever secured by white man over red. On this day also, August 5, in the year 1861, Admiral David Farragut won his great victory at the Battle of Mobile bay during the Civil war.

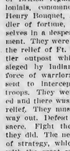
Marinus Willett

August 6.—While Col. Barry St. Leger was laying siege to Ft. Schuyler, an army of New York militia was marching to its relief. It was commanded by Gen. Nicholas Herkimer who had arranged with Colonel Gansevoort for a sortie from the fort at the same time that Herkimer advanced with his troops to attack St. Leger. Unfortunately the well-laid plans were upset by the rashness and impatience of Herkimer's officers and men, who demanded to be led against the foe immediately. And so they fell into the ambush and on the bloody field of Oriskany August 6, 1777, they won a victory, but at the fearful price of one-fourth of all their number.

Red Jacket.

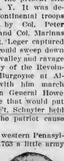
August 7.—In the fastnesses of the Sierra Madre mountains in Sonora, Mexico, on this day, in 1885, detachments of troops G, H, I, and K, of the Fourth cavalry, accompanied by a party of Indian scouts, killed 5 hostile Chiricahua Apache Indians and captured 15 women and children. This may not sound like an important victory, but to anyone who knows of the hardships suffered by American soldiers in their campaigns against these "human tigers," the warriors of the notorious Geronimo, it was a victory of no mean proportions. It proved that the American soldier COULD run to earth these hostile Apaches and it sounded the knell to the last important Indian uprising in the West.

August 8.—On this date began a campaign by a detachment of Companies A of the Twenty-third Infantry and a group of Indian scouts in the Juniper mountains in Idaho which did not end for nearly a month. During it did end the soldiers had rounded up the last stragglers of the hostile Bluten upon whom General Crook had inflicted the crushing defeat earlier in the year.



David Farragut.

August 9.—Fifty years ago, August 9, 1877, the Big Hole river in Montana was the scene of one of the hardest fought engagements in the history of the West. Chief Joseph, the matchless leader of the Nez Perces starting his epic flight from his home in Oregon to Canada, was attacked at this place by Gen. John Gibbon and his troops of the Second cavalry and Seventh infantry. Despite the surprise of the attack, Joseph quickly rallied his warriors, handled them so skillfully that he best off Gibbon's attack and continued his flight. It was here that this Indian leader proved once more how well he deserved the title of "The Indian Napoleon."



Marinus Willett

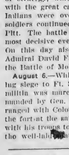
August 10.—This is the anniversary of the Battle of Wilmot's Creek in Missouri, one of the few important Civil war battles fought in that state. It was both a victory and a defeat for the Union army. They drove the Confederates from the field, but could not hold it and were forced to retreat. They lost their leader, Gen. Nathaniel Lyon, who was shot from his horse, near the close of the battle. But they won a moral victory, for after this battle thousands of Missourians who had been wavering decided to stand by the Union.

August 11.—This is the anniversary of two important Indian battles in the West. In 1823 Col. Henry Leavenworth ascended the Missouri river with a force of 400 soldiers and trappers and 700 Sioux allies to punish the Arikaras for their treacherous behavior toward representatives of the Rocky Mountain Fur company. The campaign ended on August 11, when a treaty of peace was signed. Fifty years later the banks of the Yellowstone river, in Montana, saw a war party of Sioux attacking Lieut. Col. George A. Custer's Seventh cavalry. Custer with small detachment was far in advance of the regiment when the Indians attacked, and only the speed of his horse and the quick wit of his brother, Capt. Tom Custer, saved him from the fate which overtook him less than three years later on the Big Little Horn in Montana.

Tom Custer.

August 12.—On this date in 1670 the first great Indian war in America came to an end, when King Philip, the Indian leader, was slain by a man of his own race who had led Capt. Benjamin Church to Philip's hiding place in a swamp near his old home, Mt. Hope, Massachusetts.

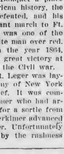
August 13.—New England has reason to remember this date because in 1724 Lieut. Jonathan Lunan, a Maine veteran of the French and Indian Wars with 16 of his comrades, armed only with flintlock muskets, caused fire upon a British warship off Gost Island with such deadly effect that 17 officers were killed before the British commander gave orders to weigh anchor and sail away.



King Philip.

August 14.—On this date in 1900 the allied armies entered Peking, China, and when the Stars and Stripes was carried through the gates of that city with the flags of other nations it meant the end of the Boxer uprising and safety for the whites who had been in such deadly peril for so long.

August 15.—In 1812 on this day a little army of whites was marching along what is now Michigan avenue in Chicago. Out of the sand hills along the lake shore dashed a war party of fierce Pottawatomies, who opened fire upon the column. There was a short, sharp struggle, and when it ended more than half of the whites had been killed. The remainder were prisoners and the Ft. Dearborn massacre was history.



Frank North.

August 16.—Up in the hills of Vermont, 150 years ago, on this date, August 16, 1777, Gen. John Stark won a brilliant victory over the force of British and Hessians, led by Colonel Baume, a victory which contributed to the downfall of General Burgoyne. Three years later, near Camden, S. C., General Gates, who had conquered Burgoyne, suffered defeat at the hands of the British Lord Cornwallis. Thus did Gates' "northern willows turn into southern weeds."

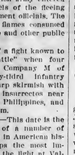
August 17.—This is the anniversary of the one occasion when the Indian won a victory over his enemy the "Iron Horse." On this date, in 1807, a war party of Cheyennes wrecked a train near Plum Creek, Neb., and plundered the contents of the cars. But in the midst of their exultant dance a force of the famous Pawnee scouts led by Maj. Frank North and his brother, Capt. Luther North, appeared on the scene and put an end to their rejoicing.

Anthony Wayne

August 18.—The streets of the sleepy old town of Santa Fe, N. M., resounded to the hoof beats of American cavalry on August 18, 1846. Gen. Stephen W. Kearney and his dragoons entered the city and raised the Stars and Stripes, proclaiming the Southwest American territory.

August 19.—This is the anniversary of two famous engagements. In 1782 it saw Daniel Boone and his Kentuckians disastrously defeated by the Indians and a few British at the Battle of Blue Licks, Ky., a defeat caused by the same rashness upon the part of headstrong men that brought disaster to General Herkimer's army at Oriskany, five years earlier. In 1812, it saw one of the greatest victories ever won by the Constitution when her guns bombbed the British ship Guerriere.

August 20.—"He put the whole loaf on the mocassins" and at the Battle of Fallen Timbers, in Ohio, on August 20, 1794, Gen. Anthony Wayne, the "Mad Anthony" Wayne of Stony Point fame, inflicted a crushing defeat upon the warriors of the confederated tribes in the Old Northwest and brought peace at last to the United States frontier.



Quantrill.

August 21.—Of all the individuals whom the title of guerilla has made famous—or rather infamous—the name of Charles Quantrill leads all the rest. During the Civil war Kansas suffered from the

Israel Putnam.

scourge of war in many ways, but its most appalling disaster was Quantrill's raid on Lawrence on August 21, 1863, when 150 citizens fell victims to his ferocity, making 80 widows and 250 orphans.

August 22.—The last great uprising of the Indian tribes of the Southwest took place in 1874. On August 22 of that year there was a hot engagement at the Wichita agency participated in by troops G, F, II, and L, Tenth cavalry and I, Fifth infantry. Eventually, however, the uprising was quelled by Gen. Nelson A. Miles and his "fool cavalry," the Fifth Infantry, in a brilliant campaign in the staked plains of Texas.

August 23.—One of the most serious Indian uprisings in American history was that which occurred among the Sioux of Minnesota under the leadership of Chief Little Crow in 1862. Hundreds of citizens were killed before the Indians were defeated and one of the ringposts of this war was the attack upon New Ulm, August 23, 1862.

August 24.—Once in history the capital of our country was captured by the enemy. This occurred on August 24, 1814, when a British army entered Washington, close upon the heels of the fleeing President and other high government officials. The invaders applied the torch and flames consumed the capitol, the President's house and other public buildings.

John Sullivan.

August 25.—This is the date of a fight known to history as the "Four Men Battle" when four privates of Company M of the Twenty-third Infantry fought a sharp skirmish with a force of insurrecto near Cebu in the Philippines, and defeated them.

August 26.—This date is the anniversary of a number of engagements in American history. Perhaps the most important was the fight at Valley Grove, Long Island, in 1776, preliminary to the great battle of Long Island which began on

August 27.—Gen. Israel Putnam was in command of the Continental forces on Brooklyn Heights and it was the attempt of the British to drive him from this position which led to the Battle of Long Island. The British captured General Sullivan and would have captured the whole army, if it had not been for Washington getting them across the river that night.

August 28.—On August 28, 1854, Lieutenant John L. Grattan, a Lieutenant Carnahan, Lieutenant Gleason, Lieutenant Hamilton, Lieutenant Bush, Lieutenant Clark, Lieutenant Bullock, Lieutenant Hannon, Lieutenant Sturgis, Lieutenant Hannon, Lieutenant Sturgis, Lieutenant Hannon, Lieutenant Sturgis

New Theories of Life Really Based on Common Consciousness of God

By BISHOP G. G. BENNETT, Duluth.

ON EVERY hand, we see evidence of the theory that the individual is an end in itself. The church today is being acclaimed as an end in itself. It is not; it is merely a means to an end. Behavioristic psychology is simply a symbol of determinism which is prevalent in business, in religion and in society generally.

The ability to reason is not the chief distinction between man and lower types of animal life. Reason is but a part of consciousness which is the greatest factor distinguishing the human being from lower animals.

Consciousness is the common inheritance of mankind. At the basis of this common consciousness is God. The search for him in this modern age is carried on by many so piteously and hopelessly. Men think that they must find God in some other way and channel than the ordinary avenues of life. As a matter of fact, God must be at the elbow of our every necessity, and the sooner we realize this, the sooner will we understand the mysteries of life.

New psychological and scientific theories may be conjured to the little child, who at an early age tries to run away down the street and thinks it can get along by itself. Eventually the child must realize that it depends upon its elders for sustenance and livelihood. So the many new theories of life all lead eventually back to the basis of a common consciousness and a common God.

Existing Agricultural Depression Matter of Vital Importance to Nation

By CHARLES NAGEL, Ex-Secretary of Commerce and Labor.

A general agricultural depression exists and calls for consideration as a national economic question. The evidence which has been given is practically unanimous upon the fact of depression, but is varied, and at times contradictory both as to cause and to remedies. Some of the difficulties are regional and, it is hoped, ephemeral. Those who have been consulted practically agree that the country's heritage of fertile land is being impaired and that for some, if not many, years we have been living on our agricultural capital.

Some rural sections of the country, we are told, are virtually bankrupt as communities and are for the time carried by the more prosperous urban areas of the state in which they are located. Even the most efficient farmers seem of recent years to have done little better than hold their own by cutting their expenditures below their accustomed standard.

Youth of Today No More Radical Than Those of the Preceding Generations

By DR. ERNEST M. HOPKINS, President Dartmouth College.

Youth is not irresponsible. The younger generation is more responsible than its elders and no more radical than the youth of past generations. Youth has always been radical. Fenelon's "History of England" says: "The most sterile periods in the world's history have been those in which youth trod in the footsteps of its elders."

We are too much concerned today with what Washington and Hamilton did in their day without regard for what they might do if they were part of this age. Those men cut new channels in their day and if they were alive today they would cut still newer channels.

Student suicides are not proportionately greater than in other years. One cause of suicide among students is too much stewing in their own juices, too much introspection and morbid psychology.

DON'T SELL U. S. SHORT

It has long been a sort of axiom in American financial circles that it does not pay to sell Uncle Sam "short." In these days when we occasionally hear from the professional gloom spreaders it is well to keep this truism in mind. Uncle Sam is not going to the bow-wows. If he is, then what is going to happen to the rest of the world first? For the economic condition of the U. S. is so much better off than any other country that there is hardly any comparison. So that if Uncle Sam is going to be submerged in depression, which so the pessimists tell us, is to be world-wide, then the rest of the universe is going to be in over its head before the waters get to Uncle Sam's knees.

As a matter of fact, despite unsatisfactory local conditions in a few parts of the country, the nation is forging steadily ahead on the path of progress and prosperity. The National Association of Manufacturers recently published its annual mid-summer survey, and the report show that there is no indication of any slump in employment in the United States for the next few months at least. It is stated that industries are operating on 81 per cent of their maximum employment capacity, which is regarded as a remarkable record for mid-summer business. Ninety per cent of the factories in the country it is estimated, are now operating on a high scale.

In commenting on the report President Edgerton of the Association said: "Analyzing the reports that have come to us from all sections of the country, I believe the whole nation can be made happy in the employment and business outlook for the summer and early fall. The situation is healthy. The survey covered twenty-three classifications of industry."

The condition of the American producer is so much better than the condition of the producer in any other country of the world that we ought to be more than thankful for prosperity and the high standard of living which has come to us, and to see that nothing is done to interfere with the application of the economic principles which have brought this condition about.

Save Pennies—Waste Dollars

¶ Some users of printing save pennies by getting inferior work and lose dollars through lack of advertising value in the work they get. Printers as a rule charge very reasonable for some of them get rich although nearly all of them work hard.

Moral: Give your printing to a good printer and save money.

Our Printing Is Unexcelled

"CAN'T EAT YOUR CAKE—

Unnecessarily high taxes, perhaps more than any other one thing, have a deterring effect on development and growth of any community. After all is said and done, the people themselves, or through their chosen representatives in legislative bodies, city, state and nation, fix the rate at which taxes must be levied and collected. There is an old saying that "you can't eat your cake and have it too." It isn't possible to have everything under the sun in the way of public improvements, without paying for it with taxes.

COMMENT

An Example—It is generally admitted by economists of standing and a sense of responsibility that the federal government has gone as far as possible in the reduction of national taxes—a reduction which has worked to the advantage of farmers, among others.

A drastic and effective reduction in the local taxation of farm lands is a fundamental of real farm relief and this fundamental has been respected in the tax policy of the Coolidge administration. But, in many states, the increasing burden of state and local taxation has worn heavily on the shoulders of agriculturalists. It may be said that the remedy lies in the hands of the farmers themselves, but unfortunately a man with plowed fields has little time in which to originate or conduct propaganda for local tax relief. We do not speak of a situation prevailing to affect the Fort Wayne area, or even very severely the state as a whole, but rather in a national sense.

Everybody is agreed that state and county and city taxes should be reduced in a great many loc lities. Governors, mayors, councilmen, county commissioners, tax collectors and supervisors all agree that the tax burden on farm lands in the nation as a whole is oppressive, if not, indeed destructive. But even as they wonder with the victims they continue to present new schemes for the expenditure of public funds working for increased tax levies.—Ft. Wayne News-Sentinel.

Old Glory—The Stars and stripes as the standard of the republic has been for one hundred and fifty years the symbol of liberty and union, of freedom of thot and speech, of justice and all democratic high ideals. It is to be cherished in our heart of hearts. It is respected and highly honored among the flags of Christendom. Each star in its field of blue is a star of glory. It breathes of valor, hope and truth, of loyalty, sincerity and justice. We doff our hats to its splendor and majesty. It is beautiful. It stirs the soul. It stands, distinct and distinguished among all other flags. It is the emblem of the greatest nation in the world. It commands our reverence. It symbolizes the Constitution, the greatest constructive political work of man. It is both battle and peace flag. We are ready to defend it, to follow it wherever it may lead in the cause of justice and righteousness.—Cincinnati Enquirer.

Should Stand Pat—The naval conference at Geneva was Uncle Sam's own idea and England and Japan accepted his invitation to participate. Now they want to run the conference as it best suits them, and it happens that their way is one that will leave the United States with an inferior navy and helpless to put its navy on anything like a 5-5-3 basis as compared with England and Japan.

Well, the Americans stated their "big stick" policy when the conference opened and if England and Japan are not willing to be reasonable they should come home and let the country live up to it. It is a safe bet, however, that that is just what England and Japan do not want America to do and they will change their tune if the American delegates at Geneva remain firm and call their bluff.—Dubuque Telegraph-Herald.

Kings—These be parlous days for kings and other potentates. When King Alfonso of Spain wants a new sedan he must ask Dictator Riviera. King Victor Emanuel of Italy gets his picture in the paper only by Mussolini's sufferance. King Boris of Bulgaria, Europe's only bachelor king, was bowled down when he tried to address his own parliament. King Boris says he has never married because he cannot afford it. His salary amounts in American money to $30 a week. So the commoner should not repine. The workman in his comfortable bungalow and with his automobile and radio has the edge on almost any living king.—Washington, D. C. Herald.

Danger From Insects

Doctor Neave of the Entomological society of London, has stated that insects destroyed at least 10 per cent of all the plants which man cultivates for food or clothing, and it has been calculated that if the checks, natural and artificial, on the increase of the many species of green fly, for example, were removed, the whole of the vegetable growth of the globe would be destroyed in six months.

Shocking Affair

Ostriches may have fine feathers but they have bad tempers, so a device has been invented to conquer these birds. It consists of a limulo six feet long, with a fork at the top which carries a strip of brass. When pushed against the neck of a charging bird, an electrical contact is made and the bird is given such a shock that docility results.

Best for the Dog

Table scraps form the best food for the dog, says Nature Magazine. Do not feed him either potatoes or chicken bones.

BEAUTIFUL BACK

Trude Bristow is Vitaria, a notable figure, in the dramatic world, who was recently picked by prominent sculptors and artists as having the most beautiful back.

THE THEATRE

Palace—New York! Vibrant, rushing, complex, gigantic, colorful New York! Times Square on a rainy night as frantic theatre-goers hail loaded taxicabs.... Moonlight on the East River.... Starched nurses showing mothers babies the animals in the Central Park Z'oo.... Norman Trevor in his latest Bond street suit.... The Woolworth Building towering over downtown Manhattan.... Orchard streets teeming pushcart market.... The Plaza Hotel, residences of debutants.... Ricardo Cortez and Lois Wilson taking the air on top of a Fifth avenue bus.... Broadway and its electric signs.... The gilded rooster on the Heckscher Building tower.... A patient crowd waiting to catch a glimpse of celebrities. August 1-2.

Majestic—"The Canyon of Light," starring Tom Mix, is based on Kenneth Perkins' story of the same name published recently in one of the nation's largest magazines. It will be shown at the Majestic theatre on Saturday and Sunday.

Palace—"The Prince of Headwaiters" a drama of the powerful feature photoplay at the Palace theatre, August 3-4. It is one of the really exceptional pictures of the season, with Mr. Stone in his most dramatic role of the year, as the head waiter at the Ritz. The photoplay is based on the Garrett Ford story recently published in Liberty magazine.

Priscella Bonner has the part of Faith, Pierre's fiancee. Ben Lyon, Elliott, is Robert Agnew, and E. Radcliffe has the part of Faith's father, who adopts Elliott as his own when Faith dies.

With Elliott grown up, Pierre learns for the first time that he has a son. It is the Ritz with three other college boys and their "party girls" that Elliott and his father learn to know each other. It is through Pierre that the son is saved from a gold digger, Lilyan Tashman, and her giglo, the comic John Patrick. And it is through Pierre's efforts that Elliott and Beth are brought together.

SAGINAW NUNS TRANSFERRED, SUCCESSORS ARE APPOINTED

Saginaw.—After 30 years of service at St. Mary's hospital, the last of which were spent as superior, Sister Eugenia Gill, has retired to the motherhouse of the Sisters of Charity of St. Vincent de Paul, at Emmsburg, Md. She is succeeded here by Sister Vincent, who for 12 years has been at Providence Hospital, Detroit. Sister Eugenia's request for retirement was granted because of ill health which in the past year has grown increasingly serious.

Sister Marie, for 12 years head of St. Vincent's orphan asylum, Saginaw, has also gone to Emmitsburg, where she will receive a new assignment. Her successor is Sister Dalphine, who for some years past has headed an orphanage at Troy, N. Y. The transfer was necessitated by a recent law of the order fixing three years as the term of a superioress with six years as a maximum at the same institution.

YOUNG OWOSSO PRIEST SINGS FIRST HIGH MASS

Owosso.—The Rev. Fr. Francis Cavanaugh, this city's only native son to be ordained a priest of the Roman Catholic church, celebrated his first mass in St. Paul's church here, recently. Assisting Father Cavanaugh were Rev. Fr. J. W. Courtney, archpriest; Rev. Fr. Thomas Beahan, deacon; John Cavanaugh, a brother who is preparing for the priesthood, sub-deacon and James Stotenbur, another theological student of Owosso, master of ceremonies. The Rev. Fr. Jages Cavanaugh, C. S. C., former president of Notre Dame University, delivered the sermon. Father Cavanaugh is not a relative of the newly-

Old-Time Embroidery

Petit point embroidery became popular during the Fourteenth and Fifteenth centuries. It was much practiced in France, where it was known as "au petit point."

Community Service

Experiment in Cities in New South Wales

Following the example of the United States in setting aside the District of Columbia, the Australian parliament, carved out of the state of New South Wales a federal district 1,000 miles square which is to be governed by a commission. There is one important difference between the District of Columbia and the District of Canberra. In the latter there can be no freeholding of property. The commission leases land to private individuals but does not sell it. In this way it is enabled to keep its land on the development of the property.

And this is where the city planner received his boost. He is able to say that this part of the city shall be an industrial district, and it is an industrial district; he says that another section shall be a fine residence district, and it is that way. Another area be designates as a district for moderate priced homes. And so on. He views the city, and nothing can be put into the respective zones that is not authorized, and which is not compatible with the surroundings.

Canberra is now in the process of construction. During the past quarter of a century it is expected to become one of the greatest cities in Australia. City planners throughout the world will watch the experiment of this city carefully to be formed in a custom-made city, and will learn much from this great enterprise, the first of its kind in modern times.

"Neglect Tax" Heavy Burden on Property

The neglected tree is the greatest single destroyer of our wealth. The nation's big bill, losses caused by insect pests, is about $1,200,000,000 a year. We lose much of the bull weevil, Japanese beetle and corn borer, and the government spends large sums to help farmers combat these pests. Yet we hear little of neglect losses, which are greater than insect losses. Insects destroy potential wealth. Neglect destroys invested capital and reduces the interest earned by money invested in property.

The neglect tax is more than double the first loss, about which so much is written. The matter of neglect cost tion is not given the dramatic attention which is accorded the fire loss because its slow accumulation leads people to overlook it.

Neglect taxes reach $1,410,000,000 a year. Of our standing property worth approximately $101,600,000,000, only about 20 per cent is adequately protected, the balance is deteriorating at the rate of about 2 per cent a year.

Planning for Own Home

If a certain family pays a sixth of its income for rent, it may be able to save enough for down payment on a home, by buying and maintaining a house, for the amount thus used may include both rent and savings. Rent, or payments on a home, may require anywhere from one-sixth to one-fifth of the family income, depending on the special circumstances in each case. In addition to interest payments and installments on the principal of a loan, provision must be made for renewals and repairs, taxes, special assessments, insurance, water tax and various accessories and improvements. Families accustomed to living in apartments sometimes fail to allow for the cost of fuel for heating purposes.

Lighting Country Roads

Country road lighting is getting a tryout in this country. A nine-mile section of the highway between Canandaigua and East Bloomfield, N. Y., for the past three months has been illuminated by electric lamps at intervals of 200 and 250 feet. Automobile clubs, chambers of commerce, local granges and other such organizations are backing the plan because drivers see their routes so much more readily and because pedestrians get much more protection along a highway.

Home Owner's Advantage

The family owning a comfortable, attractive home has twice as much standing in the community as one that merely rents. A property owner has much greater stability for public office and for positions of honor; business positions are two to one in favor of the man who owns his home. Maybe you have never thought of it, but one of the first questions a business man asks when considering a man for a responsible position is, "What sort of a chap is he; does he own a home?"

Consider Neighbors

While a family may think that it would like to live close to relatives and friends, this factor should not be given too much weight. Nevertheless, the general type of people living in the neighborhood is important, especially if there are children in the family, who should be brought up in the right kind of surroundings.

Town Improvement

Don't forget to beautify Tuscumbia by taking care of your own premises, and don't forget that now is the time to start.—Tuscumbia (Ala.) Times.

Great American

On March 2, 1793, Samuel Houston was born at Timber Ridge Church, Va. He was a great soldier and statesman and was the leader against Mexico in the Texas rebellion. His birthd y is observed as a holiday in the state of Texas.

On to Stay

"See if you can laugh that off," said the fat man's wife, wiring a button onto his vest.

Go Far Back to Find Idea of Steam Engine

Dr. Frank D. Vlastally, managing editor of the Standard dictionary, says the original steam engine was the collins at Nero, which was exhibited in the Serapeum of Alexandria in the year 130 B. C. The Serapeum is the great temple of Serapis, that stood near Memphis and was built over the subterranean tomb of the Apis, or sacred bull, published in Liberty magazine.

"The first steam engine equipped with a cylinder and piston was invented by Denis Papin, in 1690. He was a French physicist, who invented a condensing engine, siphon and safety valve. Not until 1705, however, did Newcomen and Calley make the piston engine a practical engine, but just to give you an idea of what an international thing the steam engine is, let me say that, although there is no record of the use of steam expansion as a propulsive power prior to the Seventeenth century, with the dawn of the century an Italian, Giovanni Battista della Porta, in a work of his on pneumatics, suggested the principle of steam condensation and consequent suction, incorporated in his water pump, in 1608, by Thomas Savery, an English military engineer, who lived from 1650 to 1715 and wrote on paddle wheels.

"It was, as I have said before, in 1690 that Newcomen improved on the pumping engine, adopting the principle of cylinder and piston found in Papin's invention, but this became entirely obsolete when, in 1700, James Watt added a condenser separate from the cylinder, and this made an enormous saving in the expenditure of fuel. City planners throughout the world will watch the experiment of this city carefully to be formed in a custom-made city, and will learn much from this great enterprise, the first of its kind in modern times.

WANT COLUMN

FOR SALE—30-ft Cruiser in good condition; mahogany finish. Apply to Sam Hamilton, Belvedere ave., Charlevoix.

FOR SAEE—6-drawer Singer Sewing Machine. Inquire C. S. Dodge, 220 Antrim street. 11-pd.

FOR SALE—Attractive Torch Lake year round residence. Best location on scenic east shore. 150 feet lake and M-66 frontage. $6,500. Terms. More frontage if desired. Mile south of Camp Fairwood. Owner, Victor's Arbor. 13-2t

FOR SALE CHEAP—Ford Coach, late 1926 model. For particulars call at Sentinel Office.

Local and Personal Mention

Herbert Fox went to Flint last week.

George Sanford of Bellaire, was in the city Monday.

Lee Scroggie and family, of Detroit, are visiting at the Wm. Scroggie.

B. L. Severance and Al Warda, of East Jordan, were in the city Tuesday.

Mrs. Wm. Donohue, of Hancock, arrived here Friday, to visit her father, R. A. Emrey.

Misses Alice O'Neill, Marie Clark and Catherine Barton of Detroit, are guests at the Bartlett.

T. R. Goley, of Columbia, S. C., arrived in the city Tuesday for a visit with Mrs. Thomas Howell.

Mrs. Cornelia Bailey entertained a party at Bridge Tuesday afternoon at her Clinton street home.

Mrs. A.L. Sugarman with her son Charles, of Pittsburgh, are visiting her mother, Mrs. Lena Levinson.

R. A. Emrey has been confined to his home by illness for the past week. He is improving and able to be out.

About fifty boys from Camp Fairwood on Torch Lake boarded the Manitou here Tuesday to take in the Soo trip.

Mrs. George Finucan and son Thomas, of Grand Rapids, are guests at the home of Mr. and Mrs. George Weaver.

Miss Emily Prussing, of Traverse City, was a week end guest at the Eddie O'Neill home, returning home Tuesday.

Prof. J. Raleigh Nelson, of U. of M. will direct a play for the benefit of the Ironton church. Watch for announcement.

Dr. and Mrs A. L. Baxter and daughter Charlotte, of the Baxter Farms in Antrim county, were Charlevoix visitors last Friday.

To us it seems that a prominent citizen is the householder who can convince his wife it's poor policy to buy from peddlers

Mr. and Mrs. R. A. Paddock have rented their Michigan avenue home and will spend the rest of the summer at their levolix.

Watch for the announcement of the Ladies Aid Society of the Congregational church at Ironton—annual dinner and sale of fancy articles.

Mr. and Mrs. J. J. Carscadden of Flint, for the past month living at their summer cottage in Bellaire, spent Thursday of last week with friends here.

Miss Minnie Payton, who has been confined to her home for several weeks on account of illness, has resumed her position at the public library.

Mrs. A. L. Crimmins, of Grand Rapids, who is spending the summer at her cottage on Crystal Lake, near Beulah, was in town a few hours Monday.

Mrs. Thomas Barry Jr., with her young son Thomas, who has been visiting Lest aunt, Mrs. John H. Koch, for three months, returned to her home in Toronto, Monday

Wm. H. Loutit, chairman of the Committee on Commercial Fisheries, State Conservation Department, visited this city Wednesday to inspect the fish hatchery.

George and Benjamin Rassieur of St. Louis, Mo., arrived in the city Tuesday to spend a short vacation with their parents, Mr. and Mrs. Theodore Rassieur, who arrived here Tuesday afternoon via automobile, and will be at their summer home near the Inn for the balance of the season.

John McCabe, an old time resident of Charlevoix, is in town today calling on his boyhood friends of half a century ago

Dr. Barney and family, of Grand Rapids, who have been visiting Mrs. Barney's parents, H. Bedford and wife, at the Fountain City House, returned home yesterday.

Mr. and Mrs. J. M. Card of Eaton Rapids, accompanied by Dr. C. J. Winder drove up last Saturday and spent the week end with Mrs. Winder at the Hotel Charlevoix.

Regular meeting of the Odd Fellows' Lodge, Wednesday evening, August 3rd. Installation of officers. All members are requested to be present. Refreshments served.

We have just heard from the Michigan man who vowed last year to take a walk every time his wife got angry—continued putfoot exercise is making him as healthy as a bear.

Mrs. R. D. Agosa, for many years a resident of Traverse City, but formerly of Charlevoix, has returned here and will reside at her recently rebuilt home on the north side.

For the third time since its organization 61 years ago, the Grand Army of the Republic will hold its national encampment in Michigan. On Sept. 11 to 16 at Grand Rapids.

Mr. and Mrs. Ira A. Campbell of N.Y.City, arrived here yesterday to visit Mr. Campbell's mother, Mrs. Lois Campbell. They were accompanied by Jack, son of Harvey Campbell, of Jackson.

A. F. Wentz, of Alpena, was in the city Wednesday on official business connected with the State Department, and to visit Mrs. Wentz, who is with her mother, Mrs. Ben Campbell on Park avenue.

Steve Thompson is serving time in the Charlevoix county jail for being drunk and disorderly at East Jordan. He beat up the housekeeper where he was boarding, 'tis said.—Mancelona Herald.

Mr. and Mrs. Russell Leavenworth and Mr. and Mrs. M. W. Shepard and daughter, Amy Lou, have returned to Lansing, after spending a week with Mr. and Mrs. I. B. McLean on the Isle of Pines.

Rev. James McGhee, pastor of the First Baptist Church of Flint, arrived in Charlevoix Tuesday morning and will remain in our midst until September. The pastor is convalescing from a major operation performed recently.

Frank L. Baumgardner of Toledo, arrived in town Saturday morning to spend the week end with his mother, who is in Charlevoix for the summer, at 201 Burns street. Mr. Baumgardner returned to Toledo Sunday evening.

O. H. Sisson, Walter F. Carpenter and Andrew J. Dunsmore of Central Lake, were Charlevoix visitors last Friday, accompanied by Mr. Val Savage, a resident of Central Lake in earlier years, now living in Cleveland, Ohio.

One of the principal actors in W. Fields' new comedy "Running Wild," is Rex. Though he displays almost human intelligence, Rex is only a dog—a white fourlegged actor, and comes to the Palace Theatre Friday, August 5.

Mrs. A. A. Swinton and daughter, Marjory, went to Mt. Clemens Sunday to visit Mrs. Eugene Wolfman, (formerly Miss Jean Swinton of this city). They accompanied H. A. Craig, who drove through to Ann Arbor to visit his mother.

Mr. and Mrs. Clarence Royer and Mr. Royer's mother, returned home, Bucyrus, Ohio, Tuesday. They have been visiting the family of Earl Cook at the Frieberg cottage across from the Isle of Pines in South Arm of Lake Charlevoix.

The annual meeting of the Northern Michigan Road Commissioners' association will be held at Petoskey August 5 and 6. Among others of note Governor Green and Frank Rogers, state highway commissioner, will be present.

The East Jordan band is distinguishing itself at the Governor's conference at Mackinac Island this week. This band took first prize at the state band tournament, for appearance, and their music is pleasing large crowds at the Island.

A genuine Indian canoe is being made at Fisherman's Paradise from a large pine log that alone cost $75. Pete and John Wabiqua, Indian canoe makers, who are respectively 75 and 81 years of age, are making the canoe.—Mancelona Herald.

From nurse for a boxcar full of horses to Mayor of Steer City, Texas, is the rise Gary Cooper covers in "The Last Outlaw" which will be shown at Majestic theatre, August 3 4. It is Cooper's second starring vehicle, and a fitting successor to "Arizona Bound" his first.

The senior group of the Charlevoix summer academy had a most enjoyable overnight hike, July 27, to Cemetery Creek. The hike was under the supervision of Bert Wallenstein, the director of the academy, and ten boys participated.

More than 1,100 young Michigan men from every community in the lower peninsula are being taught at Baltle Creek, in the Citizens' Military Canyn, American citizenship, loyalty to country and parents, discipline and many other things that will help make a young man a leader in life.

"While There's Life—"

Life in this old vale of tears and laughter, especially the former, is discouraging in some ways and we have devoted twenty-five years, handrunning, to trying to cultivate sufficient ilect to convince wife's relatives in a nice way that it wouldn't be convenient to have a visit from them at the time mentioned, and look at us now.—Ohio State Journal.

New Palace Theatre

ATTRACTIONS FOR THE WEEK.

Saturday and Sunday, July 30-31

Karl Dane, George H. Arthur in "ROOKIES." A laugh-smash; the world's funniest comedy, with Marceline Day. Aerial tricks in "Rookies" thrill. Scenes above clouds lend laughs and terror to this comedy.

Extra—Our Gang comedy "Telling Whoppers."

Monday and Tuesday, Aug. 1-2

"NEW YORK," with Ricardo Cortez, Lois Wilson, Estelle Taylor, William Powell, Norman Trevor. A love melodrama that runs its thrilling course through Bowery dives, Broadway night clubs, Fifth avenue mansions. Extra—Our Gang comedy, "Love My Dog.

Wednesday and Thursday, Aug. 3-4

"THE PRINCE OF HEADWAITERS," with Lewis Stone. Only once in a great, great while comes a picture so universally appealing. It's a drama of father-love, of sacrifice in the extreme. Is human; its real living; its more than written words can tell. You must see it." Added attraction—Fox News and Felix the Cat.

Friday, Aug. 5

W. C. Fields in "RUNNING WILD," with Mary Brian. I dedicate this picture to the brow-beaten benedicts of the world. W. C. Fields—and when Fields gets going with his fast and furious fun, then the animals take to the woods! Extra—An Educational comedy, "The Draw Back."

MAJESTIC THEATRE

Saturday and Sunday

Tom Mix in "THE CANYON OF LIGHT" with Tony the wonder horse. From plains to trenches in a blaze of action and thrills. Extra—An Educational comedy, "Peaceful Oscar."

Wednesday and Thursday, Aug. 3-4

"THE LAST OUTLAW," with Gary Cooper. Double-barrelled action! And there's no getting away from the spinal tingling thrills. Also Educational comedy, "Listen Lena."

Coming—"Beau Gesti."
Coming—"The Rough Riders."
Coming—"Chang."

MRS. E. REINHOLD, Manager

TRAVERSE CITY NINE DEFEATS CHARLEVOIX

Traverse City administered a defeat to the local ball club last Sunday in spite of the excellent exhibition shown against the East Jordan team the week before. Traverse City was almost a cinch winner over the local nine, piling up five runs in the first two innings and thwarting all attempts of the Charlevoix boys to even up the score in the latter part of the game.

The final count stood 10 to 6 which indicates a rather successful comeback in the later innings. Grisby caught an excellent game for the locals and the outfielding was errorless. The weakness of our team, according to John Knight, manager, lies in the pitching. Charlevoix has lacked a high-powered battery since the beginning of the season.

Something new in the line of baseball diamond activity is in store for the team this coming Sunday, according to Mr. Knight. Along with a game against Kalkaska City, there will be auto polo matches. This will be the first time that such an exhibition has ever been staged at Charlevoix, although the sport has been gaining popularity at East Jordan and points south.

Later in the season the local ball team will stage its lacrosse against a girls' baseball nine which is making a tour of the northern resort towns. This team has been giving the men's aggregation stiff competition all over the state, and it is rumored that the Knight outfit will have to step some to make sure in order to take the female ball tossers into camp.

Sounds That Soar

In connnoi with an investigation of city traffic noises in London, interesting tests were made to determine how high some of the sounds are carried, says Popular Mechanics Magazine. Three Sunday afternoons were made from a balloon, as an airplane would have drowned out all other noises than that of its engine. Rumble of vehicles was heard as high as 2,500 feet, while the whistle of a locomotive was audible at an altitude of a mile and a half. A gunshot carried 5,400 feet high, and music was distinguished at a height of 4,200 feet. The investigators were surprised to discover that the croaking of frogs could be heard over half a mile above the ponds.

Fox and Terrier Battle

Followers of the Bloomsbury foxhounds witnessed a unique incident when, in New Crag, in the Saddle valley of England, a hard-pressed fox took refuge on a rock ledge in the face of the precipitous crag out of reach of hounds and men. The whipper, however, crept to this fastness, and for fully two minutes fox and dog indicted punishment on each other. The fox, crouching against the wall of the rock, suffered most, and leaped out of the crag. The terrier following, missed his footing and fell 40 feet, but, alighting in deep snow, escaped serious injury. The fox was afterward killed by members of the hunting party.

World Map in Concrete

American boys attending a school near Paris are laying out one of the most ambitious maps ever attempted, a huge plat in concrete, with real water for rivers, smoking volcanoes and other features. The seas are deep enough for the pupils to ride by boat from one part to another, tiny railroad trains are drawn by steam engines and the Hawaiian archipelago is represented in cement, with mountain ranges and other points indicated.—Popular Mechanics Magazine.

Sure Earthworms Sing

If you don't believe that earthworms have voices and use them, tiptoe into the garden some warm summer evening, says Dr. Rudolph Ruedemann of the New York State museum, Albany, in a statement in Popular Science Monthly, combining observations of the German scientist, Prof. O. Mangold.

Listening one evening in the garden, Doctor Ruedemann observed "a chorus of almost imbelievably small voices." Aided by a flashlight, he caught several worms in the act of "singing." The worms, he thinks, make these noises by dragging their minute bristles over the edges of their holes in the ground.

Mule Long Imprisoned

When his mule disappeared, Dan Darling, pioneer farmer of Nixon, Texas, started a farflung search for him. Without avail, even putting out postcards with a reward for his return. Two weeks later, he happened to cross a dry creek in the middle of his pasture, and found the mule entangled in brush between two banks in such a way that he could not get out. Darling uncovered help, and released the mule, which had not suffered much in spite of his long stay without food or water.—Indianapolis News.

Money in Old Silver Foil

The so-called "silver" foil is really tin or aluminum foil and a great deal of it is used and much of it wasted by being discarded after once having served as a wrapping. A Welsh chemist who took the form of a collection of this material for the period of one year and the amount collected represented a value of $10,000, which was expended in endowing hospital beds. During the "drive" other money and valuable material was collected which brought the total up to $20,000.

Automatic

One of the Los Angeles furniture stores has a new davenport that they call "Cupid's Retreat." It looks very much like most other davenports but unwary hasbeens are warned.

"Why do you call it 'Cupid's Retreat?' a visitor ventured to inquire.

"The upholstery is quite thin," explained the salesman, "and by the end of a year it is sure to be worn through, thereby displaying the sign: 'It's time to go.'"

Get Cleaners Nagsha at North Side Service Station, Petoskey avenue.

BEAVER ISLAND

E. C. Kartonhoff and wife, of Jackson guests at the Beaver Hotel for two weeks returned home Tuesday.

Wm. H. Loutit, Chairman of the committee on Commercial Fisheries, visited the Island Wednesday on the State Conservation patrol boat No. 3.

Mrs. Harry Mosher and daughter, of Chicago, is visiting her mother, Mrs. Dan T. Gallagher.

Miss Mae Gallagher is home after a week end visit with friends in Petoskey

Mrs. Ray Gilden and her niece spent several days in Charlevoix on business.

In the base ball game last Sunday between the Rex Michigan and the Beaver Island teams, the local team won 3 to 1.

W. J. Gallagher went to Charlevoix and Mackinac Island on a visit.

A large crowd from Nonad went to High Island last Sunday.

Mr. and Mrs. W. J. Carns and family, of Chicago, are visiting here.

George McManus of Petoskey, spent several days at his camps on the south end of the Island.

Mrs. John Floyd is visiting friends in Charlevoix.

Mrs. Ava Smith returned to her home in Chicago after a visit of several days here.

J. Hines, postoffice inspector, was in St James for two days on official business.

John McCabe, wife and three daughters, returned to Chicago Wednesday.

Carl Marine and daughter, of Chicago, returned home Wednesday.

Indian Chief Clings to Wilderness Home

Near the spot where the Siarx and Stringes was first surprised in Washington, Long Jim, last of a great Indian war chief family, is making his stand against civilization.

The wilderness home of the war chief of the Chetlas, Methow and Okanogan Indians, has changed little since the first visit of Astor fur traders in 1811. Virtually the only concession Long Jim has made to advancing civilization has been the education, in the white man's schools of his daughter, Princess Jessie Jim. She was proclaimed Princess Aneeica II at the national Indian congress at Seattle last July and later su honor guest at Atlantic City.

Long Jim took his present home along the Okanogan river on the Colville reservation after years of bitter struggle against early settlers and United States Indian agents. The old chief desired to live and die on the land of his fathers at the mouth of Lake Chelan, in north central Washington.

One of his great fights ended when Indian agents put him in jail for nine weeks for refusal to give up tribal lands on Lake Chelan to white men. Long Jim was released when courts ruled he was entitled to a square mile of his tribal holdings. But having controlled a vast territory from the Cascade mountains to the Columbia river, he refused to accept the allotment.

Bitter against the white man, he left the ancient Indian home and moved to an old camp ground on the reservation, 50 miles east. He paid his cousin, Columbia Jim, to move and leave him in solitary possession of the wild tract. He still refuses to accept the settlement involving his relinquishing the Chelan holdings or to accept any money accrued from it.

High Cost of Dying

A colored man came into a ticket office and asked for two round-trip tickets to Charleston. The agent knew him and asked who was going with him.

"My brother," said the colored man.

"Your brother?" asked the agent. "Where is he?"

Flyers Risk Death to Deliver Mail

U. S. Air Pilots Constantly Beset by Dangers, Archives Reveal.

Washington.—Everyone entering or leaving Washington cannot help being struck by those words carved high on the pediment of the United States Post Office building:

"Neither snow, nor rain, nor heat, nor gloom of night stays these couriers from the swift completion of their appointed rounds."

These lines, written by Herodotus, probably describe better than any contemporary the glory which every American attaches to the air mail service since Col. Charles A. Lindbergh made his flight. Yet they were not written with any New York-to-Paris flight in mind, but as a compliment to the couriers of Cyrus the Great hundreds of years before the birth of Christ, writes H. Colnet Lodge, Jr., in the New York Herald-Tribune.

Colonel Lindbergh has shown us that they are not an overstatement, but how many of us realize that hidden in the yellowing archives of the Post Office department are reports of air mail flyers who by their thoughtfulness justified that tribute before Colonel Lindbergh became the cynosure of all eyes?

The reports of air mail pilots in the Post Office department reflect that very human, heroism and modesty which every one now exists in Colonel Lindbergh. The corps to which he belongs is a magnificent background for him, and should he known should of the storm, with fuel low and darkness coming on. He landed in an open space covered with six feet of snow. He suffered injury to himself. He started out in the storm to the mining camp at Lost Chance.

Spends Night in Snow.

"Making little headway, he decided to conserve the energy of his dogs, therefore, started a fire between two fallen trees and spent the night there in the snow. At daybreak he started for the mining camp and reached it about 7 o'clock. Accompanied by miners, he started back to the ship with pack mules, for the mail, which was definitely of great importance, but which he left that night. Meanwhile all planes in the vicinity were searching for him, but there are no telephone facilities at Last Chance."

A veteran of the Salt Lake City-San Francisco loop, Pilot C. Eugene, "Johnny" Johnson, had a harrowing experience last February, and this he describes in the following terms:

"Across Snowmass mountain I had a ceiling of about 2,000 feet, with light rain most of the way. Troy and Reno weather reports not unfavorable and what I could see mountain tops on the loop (this means the Sierra Nevada), just before landing at Mather field.

"Was forced onto the railroad two or three miles east of American canyon, at which point the rain had turned to snow. The dark leeward sides of the snowsheds made a good mark to follow in the monotony until I reached a point about Troy. Where I lost sight of everything.

"Circled several times trying to get on, but gave up. Decided to return to Mather, but was only able to return a mile or two. It had closed in behind me and the going was not too good between those points. Was gradually forced to the floor of the canyon, much below the level of the railroad, but finally was limited to a right spiral, in order to see the ground at all.

"By this time the lower wing was just clearing the trees and the rocks and could see considerable ground. Was thinking quite impossible. Saw a cleared space of perhaps a hundred yards between the trees and tried to park the wreck in this space, but due to rough air and rotten visibility I was unable to judge my turn so that I could head into it. Missed it three times.

Parked in the Trees.

"Was in practically a vertical bank at the time and being delayed that incidence space or not, I had to get down. Cut out switches and parked in the trees. Engine ceased at the end of the snow-line about 18 inches in diameter. Apparently in the air when I struck it, for the ship piled up a washout 10 feet beyond the tree in one mass."

When a plane "piles up a washout" it means in ordinary English that it has been completely wrecked.

It had lost my sense of direction," Johnson continues, "so with the aid of a pocket compass I headed south. The snow was 10 to 15 inches deep and I was told later that 40 inches of it had fallen in the preceding 24 hours. My compass seemed to be in for at least a foot every step. This, added to the fact that there was a 45 to 50 degree slope covered with crevasses, made the going pretty tiresome. It was five this run that it took me so long to get word to them.

"After four hours of climbing I picked up the railroad and started hiking west—down grade. Found a telephone in a snowshed about a mile away."

There are many more fascinating tales in the archives of the Post office department, all showing a similar picturesqueness and insouciance. Some get killed and many take mortal chances, but the mail is delivered regardless of risk.

Entering Poorhouse, Meets Deserted Wife

Lancaster, Ohio. — Charles Trotter, seventy-six, traveled "over the hill to the poorhouse" here and at the door of the institution met his wife, Bertha, seventy-three, whom he deserted 56 years ago.

The woman, who says he deserted her as a child-wife, has been an inmate of the institution since 1871, when she became ill from worry over her abandonment and the death of her infant child.

During the 56 years Trotter wandered the five of the earth. While seeking his fortune in the West he was falsely informed of her death and never returned until, broken in old age and destitute, the poorhouse became the reality end for him.

His bride of more than half a century ago recognized him. When asked by the matron if she still cared for him she replied: "No, he left me when I needed him the most—he need not have returned."

Huge Lumber Savings by New Inventions

Washington. — Derives which the National Lumber Manufacturers' association says will save 10,000,000,000 feet of timber annually by elimination of waste have been perfected as the result of an invention contest sponsored by that organization.

The first prize of $1,000 was for an invention known as the "multiple girdle dimension silk." A second of $500 was for an automatically operated sesle and indicator attachment for saw mill edgers; three awards of $100 each and four of $50 also were announced.

Staked Tomatoes May Lose Money

Except in Wet Weather Vines Pruned and Tied Do Not Thrive Better.

Many vegetable growers believe that they can get an earlier crop of better tomatoes if they prune each plant to a single stem and tie it to a stake than if they allow the plants to grow naturally on the ground.

Sometimes this is true, but sometimes it works the opposite way, say vegetable growers at the New York State College of Agriculture at Ithaca, for experiments which they have conducted show that the results depend on the weather during the growing season.

Early Products Wanted.

Growers who supply the general market are more interested in an early product that is uniform and attractive than in a high yield. In a wet season, especially when it is cloudy and wet when the plants bloom and the fruits set, vines that are pruned and trained may produce earlier and plider acres. On the other hand, in normal or dry seasons, vines that are pruned and trained produce considerably less marketable tomatoes and the crop is not much earlier. In very dry seasons staked vines have more sun-scald and more blossom-end rot than pruned and unstaked ones if they are unpruned.

Ordinarily the yields of tomatoes are reduced by pruning the distance between plants in the row. Pruned plants may be set 10 to 15 inches deep and rows three feet apart produced more than similar plants set two and one-half feet apart. In fact at least unpruned plants set three feet apart in rows three feet apart did better than those set four feet apart in the row.

Cost Increases.

Since pruning and staking greatly increase the cost of growing tomatoes, the returns from each acre and for each bushel must be considerably higher. The higher cost of growing staked tomatoes is due to the larger number of plants needed for each acre, for 2,500 to 3,000 more are needed; the cost of 5,000 to 6,000 stakes; cost of tying; labor; and the cost of labor required to set the stakes and to prune and tie the plants to the stakes.

The additional cost, which usually exceeds $100 an acre, may be partly offset by the smaller saving in labor in preparing the ground for setting. Tomatoes grown on unstaked vines come in contact with the soil and often cause decay of the fruit and blight. This, of course, adds to the cost, but it is usually much cheaper to the ingrowned cost of growing the crop by the pruning and staking method.

Protect New Pastures by Eradicating All Weeds

Cows do not like weeds, and newly planted pastures, particularly where the stand of grass and clover is poor, should be mowed to destroy these pasture pests.

"Weeds are considerable harm to pastures," says C. J. Kirby, extension agronomist at the North Carolina State college and student of pastures. "It is a mighty fine compliment to the grass pastures where there is a poor stand to say that the cows pick even where there is a good stand in one and two-year-old pastures, it is not uncommon to find cows eat all the weeds. While the weeds are mowed over or two-three times during the pastures, the sod gets ahead and the weeds give little or no trouble thereafter."

Mr. Kirby points out that probably the best time to get pastures free from weeds comes from the choking and shading done to the grasses. However, the pests may come up the moisture and plant food and if all of these influences are not checked by mowing, the weeds take the pasture and little grazing is obtained.

Mowing is the time to get rid of the weeds. Those grasses and clovers which were retarded by the late spring and subsequent drought will quickly come into their own if the weeds are kept down. Many pastures are properly protected from weeds by close grazing and bushes they will give heavy production of pasturage for many years.

Agricultural Facts

Keep all the stock and poultry well watered.

• • •

Good equipment makes good farmers better.

• • •

Lemons and lime are the gold dust twins of agriculture.

• • •

A good farm record book accurately kept will enable a farmer to really know his business.

• • •

A soil that is well supplied with organic matter will retain more moisture than one with a low supply.

• • •

Green grass, new oats in the straw or some other succulent feed may lose the much bulk (water) in it to be used in feeding work stock.

• • •

A silo increases the producing capacity of a farm at least 30 per cent, and will often increase its stock-carrying capacity 25 per cent.

• • •

Now is the time to see that work stock get clean, pure water to drink. If you water from many times during the day, give them a little at a time.

• • •

When sweet clover makes a good growth so that it will yield a fair crop of hay early in the fall, it is perfectly all right to cut a crop or hay the first year.

• • •

To keep wolf silage must be thoroughly packed. In fact, forage is cut into small pieces just so it may be packed. The better it is packed the better it will keep.

ABOUT BEACH ENSEMBLES AND MATCHING PARASOLS

WHEN madam or mademoiselle hits so happily, lightly under her vivid beach garmsd or promenades in the warm sands or perhaps prettily poses upon the pier-ks she does in this picture, she is expected to do so in gorgeous array.

In the selection of her bench robe, be it coolie coat or one of the large new shawl squares, her headgear, her sandals, likewise her bright parasol and gay cushions and all the accessories must which goes to make up a perfect ensemble, milady of fashion ex-

Silk in Vivid Stripes Popular.

ercises as fastidious taste as she does in the choosing of her most formal and fetching fullbrous attire. And when she does just so, behold! a radiant picture of decorative display on the beach, such as this illustration sets forth.

For this "motif as well as ornamental" beach robe striped khaki kool is the preferred medium. The cap is also of this homespun-striped material.

At every step of the way along this sandy shore one meets these skreens of the sun clad in spectacular beach array. Among the most popular beach coats which offer the pleasingness in color are many of smart linen crash dashingly printed, then bordered by way of contrast with black satin.

Of all the interesting beach styles none are perhaps more interesting, at least from the point of novelty, than are the capes and coats made of bevy shade of scenic print silk to match the scarf and hat which mildly chooses to perfect her ensemble such as is shown in this picture.

The latest is for handling and parasol to show super-relationship, perhaps in color, perhaps in material. Sunkeshie trimmings are finding their way into the resins of women's fashions most successfully. A new idea is the sunkeshin handing, with an interworking of the sunkeshi in an accompanying umbrella. The illustration shows clever parasol and handing sets, such as would add smartness to the sister costume. Often a belt of sunkeshin accompanies a parasol and handling trimmed with the same.

Ribbon plays an important part in relating the hat to the parasol in that the identical kind used to trim the former also borders the latter. Ombre grosgrain ribbon is mostly favored for this.

Parasols and Other Accessories.

artful all-enveloping cape with scarf ties at the throat is bordered to a considerable depth with a large cocard fish at a sensheli design.

This new fashion of handpainted unshenelle in lastic for resort were bids fair to assume the proportions of a widespread vogue before the summer is past. One can make such clever coolie coats of the unshenelle painting them in an amusingly and gorgeously gay as one chooses.

Sunkeshin, too, is reacting in stories or notice for beach apparel and bathing suits. Crestones, aidd, countenance oulirds the beach style, as it appears made up in robes, parasols, handbrew, neckwear, footwear, gloves, handbag, parasol, jewelery, boutonnieres and other items down to the minutest detail. Especially is this so, since fashion has become so arbitrary on the subject, accepting as an evidence of correct dress, nothing less than a perfectly appointed—a unified ensemble.

This demand for harmony in dress has resulted in a genuine "get up esther" spirit among couturier, milliner, bootmaker, jeweler and others who contribute to the costuming of the fair sex. It is quite the proper thing to buy one's silk hose at one's favorite hosiery, in order to insure a perfect match to one's slippers, and it is likely as not the salesman will insist on showing you a bundling made of the selfsame feathers as the shoes you are considering.

This summer, matching parasols and bundles are the rage. Some, in making, parasol, jewelery, boutonnieres and other items down to the minutest detail. Especially is this so, since fashion has become so arbitrary on the subject, accepting as an evidence of correct dress, nothing less than a perfectly appointed—a unified ensemble.

Bridesmaid's Frocks

Very charming are bridesmaids' frocks fashioned on robe de style Hous. They are of old blue taffeta with a wide hand of rose color taffeta brought around the shoulders and down the front to the waistline where it ties in a huge bow with long ends.

Tortoise Shell and Gold

A trifle of exquisite daintiness is a tiny rouge box with a top and bottom of real tortoise shell held together with bands of finely etched gold.

Tulle Dance Frocks

Frocks of tulle in two shades of a single color are very charming and are being worn by very smart debutantes and the younger girls. Skirts are very full, while waists are long and emphasized by swathed hip sashes.

Black Lace and Flesh Satin

Black lace in a filmy design is used with great success for frocks mounted over a foundation of flesh color satin.

THE KITCHEN CABINET

(©, 1937, Western Newspaper Union.)

In everything you do aim to excel for what is worth doing is worth doing well.

WNU Service

HOUSEHOLD HINTS

Meats are our expensive foods and they may be extended, or pieced out, by using vegetables, cereals, well-seasoned sauces as well as dumplings and stuffings to make the most go further and lessen expense. It really is the meat flavor (the extractives in the meat), that makes it palatable. This flavor is added to other foods when cooked with them, thus making all well flavored.

Try keeping a tabulated list of dishes liked by the family and friends who are often entertained, increasing the list to avoid repetition. Serving the same foods in the same old way, day in and day out, engulfs the family in a rut deep enough to swamp and ruin a household.

A glass of hot milk taken just before retiring is a good sleep producer.

A hard boiled cold may be cured in a night by greasing the chest well with lard and turpentine. Use one part turpentine to two parts lard. Use rare about heating as it is highly inflammable.

A wholesome dish to serve for luncheon or supper is broiled ham with bacon. Put a layer of thinly sliced potatoes in a buttered baking dish and pour over them a thin white sauce. Lay over the top a few slices of bacon, season the potatoes and add bake until they are meedr in a slow oven.

When whole wheat, right from the farm, can be purchased for $2.00 a pound, why buy cereals that are not as good and at least a dime as much? Cook all in slow heat until the wheat is cracked and tender. Serve with top milk and thick cream or sugar. This is an ideal food for children which they will thrive upon and like but by plunge boldly in. I took my time, picked up my with care, and had just begun to see light ahead, when I struck more difficulty.

While carrots are young and tender, made some marmalade. Wash and scrape carrots, then cooked well-washed carrots cut in cubes or strips, when they are nearly done add sugar. To same weight of sugar and two lemons cut fine, excluding the seeds. Simmer until thick, then put into glasses and seal for winter use.

A most delicious spiced pudding is made with canned pears or with fresh peaches. A few prunes or cherries are also a possible addition.

When making pastry handle as little as possible and with as little moisture as possible.

Remember to wipe the top of the milk bottle before pouring it from the cleat. Hands are often far from clean that have handled it.

Lace curtains may be mended most satisfactorily by dipping a piece of the same lace from one to over the place to be mended. Trim the rough edges and the worn spot will be unnoticed.

Fire in a building, drop down and crawl, cover the head with a wet cloth if you can. Remember that the air is purest near the floor and there one may breathe best.

Cold Dessserts.

This is the time of year when ices, frozen dishes and refreshments are most popular.

Currant Nectar.—Put a quart of water add two cupfuls of currant jelly or sweetened currant juice. Strain and put the jelly is dissolved. add the juice of two lemons and three oranges. Serve very cold with a slice of orange and cracked ice to chill the beverage.

Cherry Mousse.—To one pint of double cream add three tablespoonfuls of canned sweet cherry juice and a cherry juice and a drop or two of almond extract; whip the cream until stiff. Turn into a mold, cover closely and pack in ice and salt. Serve in glasses.

Baked Alaska.—Place a brick of ice cream on an inch-thick sponge cake, cover with a meringue, place on a board and brown quickly in a hot oven. Serve sliced

Pears Gateaux.—Cook six whole pears in a heavy strup until tender but not losing their shape. Cool, then chill and fill the cored cavity with chopped figs and walnuts with a pinch of salt. Set on ice and when serving time comes place each on a round of cake, pour over the strup and serve.

Devonshire Cream.—Place a quart or two of fresh milk in a shallow pan and keep in a cool place for twenty-four hours. Then place over slow heat and bring to the scalding point. Set away to chill, then serve the clotted cream with strawberries or other fresh fruits.

Strawberry Ice Cream.—To one quart of cream, cake can espfol or pound, why buy cereals that are not as good and at least a dime as much? Cook all in slow heat until the wheat is cracked and tender. Serve with top milk and thick cream or sugar. This is an ideal food for children which they will thrive upon and like but by plunge boldly in. I took my time, picked up my with care, and had just begun to see light ahead, when I struck more difficulty.

Serve with top milk and thick cream or sugar. This is an ideal food for children which they will thrive upon and like but by plunge boldly in. I took my time, picked up my with care, and had just begun to see light ahead, when I struck more difficulty.

While carrots are young and tender, made some marmalade. Wash and scrape carrots, then cooked well-washed carrots cut in cubes or strips, when they are nearly done add sugar. To same weight of sugar and two lemons cut fine, excluding the seeds. Simmer until thick, then put into glasses and seal for winter use.

A most delicious spiced pudding is made with canned pears or with fresh peaches. A few prunes or cherries are also a possible addition.

When making pastry handle as little as possible and with as little moisture as possible.

Remember to wipe the top of the milk bottle before pouring it from the cleat. Hands are often far from clean that have handled it.

Lace curtains may be mended most satisfactorily by dipping a piece of the same lace from one to over the place to be mended. Trim the rough edges and the worn spot will be unnoticed.

Fire in a building, drop down and crawl, cover the head with a wet cloth if you can. Remember that the air is purest near the floor and there one may breathe best.

Cold Dessserts.

This is the time of year when ices, frozen dishes and refreshments are most popular.

Currant Nectar.—Put a quart of water add two cupfuls of currant jelly or sweetened currant juice. Strain and put the jelly is dissolved. add the juice of two lemons and three oranges. Serve very cold with a slice of orange and cracked ice to chill the beverage.

Cherry Mousse.—To one pint of double cream add three tablespoonfuls of canned sweet cherry juice and a cherry juice and a drop or two of almond extract; whip the cream until stiff. Turn into a mold, cover closely and pack in ice and salt. Serve in glasses.

Baked Alaska.—Place a brick of ice cream on an inch-thick sponge cake, cover with a meringue, place on a board and brown quickly in a hot oven. Serve sliced

Pears Gateaux.—Cook six whole pears in a heavy strup until tender but not losing their shape. Cool, then chill and fill the cored cavity with chopped figs and walnuts with a pinch of salt. Set on ice and when serving time comes place each on a round of cake, pour over the strup and serve.

Devonshire Cream.—Place a quart or two of fresh milk in a shallow pan and keep in a cool place for twenty-four hours. Then place over slow heat and bring to the scalding point. Set away to chill, then serve the clotted cream with strawberries or other fresh fruits.

Strawberry

DAY THAT MARKED DOWNFALL OF GERM

August Is Notable in Annals of Surgery.

On August 12, 1865, a youngster, whose name survives only as James G., was run over by a cart in Glasgow and gained undying fame, for his leg. If not for himself. Some one carried the injured lad to the Glasgow Royal infirmary, where presided an eager young surgeon, newly come from London, and possessed of an idea. His name was Joseph Lister and his idea was that those mysterious living germs which Pasteur had just been investigating had something to do with the suppuration then considered inevitable after any surgical operation, as well as after bone fractures in which the skin also is broken, fractures which surgeons class as "compound" ones. Young James had suffered that kind of fracture of the leg. Most surgeons of the day would have said, as probably some of them did say, that James was likely to go o'er legged through the rest of his life.

Young Doctor Lister thought differently. He tried on the wound in the leg the new germ-discouraging methods which he had been thinking out and testing. The result was magical. No suppuration followed; the leg healed. On March 16, 1867, Lister used the case to illustrate the first publication of his methods in the London Lancet. Antiseptic surgery, perhaps the greatest of all the gifts of medical science to mankind, had begun.

A world in which the miracles of painless and geruiless surgery has become a commonplace finds it difficult to realize how short a time has passed since its invention. The centenary of Lister's birth has just been celebrated by the world's physicians. It is less than half as long since his methods of combating the germ became common knowledge and common practice. Of all the surgical operations now classed as major ones more than three-fourths could never have been attempted so long as germ invaders were admitted with the knife. Nowadays, thanks to Lister and to anesthesia, surgery is perhaps the most advanced of all arts. Indeed, it is far in advance, as Sir Berkeley Moynihan said at one of the Lister celebration, "of all the sciences upon which its future progress depends." Another Lister is needed to open some new field to its conquering, perhaps another James to lend his leg to some renewed advance.

Studying Street Noises

In an effort to bring about the elimination of many street noises, a survey is being made in the streets of Chicago with an instrument recently devised for recording and comparing the volume of different sounds. According to this instrument the average human voice records 40 and the streets noises on the level of one of Chicago's busiest corners is 67. The volume of noise encountered at the top of a tall building is about one-third that at the street level below. A steam engine pulling up a grade makes 10 or fifteen more noise than an electric motor doing the same amount of work on the same grade.

Pocket Flask Revived

Americans have revived the pocket flask. Flasks are made here today in more than 100 different designs. The present forms are the outcome of endless experiment.

Man discovered the need of a container for carrying refreshments at a very early period, long before he had acquired the necessary skill to construct them. The first flasks were doubtless made from horns, by plugging the open end. When man learned to use metal and make glass he applied the materials to the construction of flasks to fit into holsters or saddles, leather or wicker cases, safeguarding them against breakage. Flasks were often made of leather in the Sixteenth century.—New York World.

Alfalfa Weevil in a New Picture Film

General Idea of How to Combat the Insect.

(Prepared by the United States Department of Agriculture.)

"Alfalfa Weevil Control," a new motion picture of the United States Department of Agriculture, gives a general idea of how to combat the insect and is of particular interest in the western states. Alfalfa is described as the foundation of agriculture in the West—"a hog's dream of heaven"—and as one of the world's most valuable forages. About 1904 or 1905 the alfalfa weevil, which belongs to the same family as the cotton boll weevil, was discovered in Utah. Since that time it has spread slowly but steadily until now it is found in seven states. Because of the importance of the alfalfa crop the alfalfa weevil constitutes a serious menace. Several states enforce quarantine restrictions to prevent further spread of the insect, and the luggage of automobile travelers is often examined.

Two measures of control are shown in the picture. Dusting with powdered arsenates is still in an experimental stage, but appears to have promise of proving effective. The use of poisonous sprays has proved its worth and is particularly recommended. Several types of sprayers are shown, including one with a very wide boom. Several scenes showing sprayed and unsprayed fields, side by side, are particularly interesting in depicting the benefits of this method of control. One spraying is usually considered sufficient to permit plants to make new growth, and protects the second crop as well as the first.

The film is one reel long and is a contribution from the bureau of entomology. It will be circulated through the film distributing system of the Department of Agriculture and the cooperating state institutions. Copies may be borrowed for short periods, or may be bought by authorized purchasers at the laboratory charge.

Free Scouring Tests on Wool Samples Are Made

Wool growers may have samples of their wools graded and scoured, free of charge, by filing an application with the bureau of agricultural economics, United States Department of Agriculture, Washington, D. C., where a wool-scouring laboratory is now available for conducting such tests as facilities will permit. Applications should be mailed to G. T. Willingmyre, in charge of wool standardization. The applicant will be sent a parcel post mailing sack and instructions as to the proper method of drawing a sample so that it will be representative of any large lot of raw wool in the grease.

Experiments conducted in the laboratory during the past year have yielded valuable information on scourloss or "shrinkage" of a large variety of domestic raw wools. The results have proved of great interest to many wool growers and their practical application will enable any producer to obtain a reasonably accurate estimate of shrinkage of his wool.

Wool samples submitted to the department will be returned scoured, together with a report of the shrinkage and the grade in which the wool has been classified according to the official wool grades of the United States.

Grass and Grasshoppers Good for Young Poults

The Rhode Island experiment station demonstrated pretty completely that turkeys could stand all the green food and milk they would eat, but should be fed pretty sparingly on grain, given perhaps half or so of what one would naturally think they needed.

Turkeys should be kept in in wet weather, at least should not be allowed to get wet, but allowed as great range as possible as soon as they are old enough to take it safely. It is best to feed them round home so as to have them back every night, but the greater range they can have the more nutrient the food becomes, as in that case they eat greens and insects. Where grasshoppers abound, turkeys usually do well.

It is important to select healthy stock.

Farm Hints

The best grapes grow from pruned vines.

* * *

Lubricating oil is cheaper than machinery. Drain the crank case of your tractor often.

* * *

Potatoes may be kept in good condition for late planting by greening or sun-sprouting.

* * *

Sweet clover that was seeded this spring should not be pastured until the plants have made a growth of at least a foot.

* * *

Sweet clover requires as much lime as alfalfa on soils tested and found sour. It may be seeded in wheat like cowpeas, clover or with oats in the spring.

* * *

The care of trees is quite similar to the care of domestic animals. As a cow must be fed, housed, and doctored, a tree must be planted in a well managed soil, pruned and sprayed.

Buried in Loved Flag

In Hallock's life of Stonewall Jackson, the following statement appears: "It (the body) was enveloped in the new flag of the Confederacy and the first one that was ever made of it was thus to enwrap the remains of the departed chieftain."

Weakness in Ignorance

The weakness of human reason appears more evidently in those who know it not, than in those who know it.—Pascal.

Electricity and Bananas

Among the many extensions of the use of electrical machinery attention may be called to the employment of motor-driven "marine legs," a machine to unload bananas from the holds of fruit-carrying vessels at New Orleans. Not only is there a great saving of labor, but it is said that the fruit is much less damaged than when unloaded by hand. At Louisville electric radiators have been employed to ripen bananas for local consumption. The fruit is hung in ripening rooms and subjected to a temperature of from 70 to 80 degrees during a period of 48 hours. Afterward it is kept in storage at a temperature of from 60 to 70 degrees.—Washington Star.

Old Dances Revived

Old-time dances of the days of Merry England are being revived in London and vicinity. An all-England festival of folk dancing and singing was held recently and nearly 9,000 people stepped the figures that once were popular on the village greens. Times that were familiar in the old-fashioned inns and sung by the old-fashioned orchestra and sung by the crowd. One feature was a display by two teams of traditional sword dancers from Durham and Yorkshire. At the time of this festival 1,000 dancers attended a folk song and dance school in another hall in London. Similar events are being given in other parts of England.

LEGAL NOTICES

Order for Publication—Probate of Will STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the City of Charlevoix, in said County, on the 9th day of July, A. D. 1927.

Present: Hon. Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of John J. Fagan, deceased.

Geic C. Geiken having filed his petition, praying that an instrument filed in said Court be admitted to Probate as the last will and testament of said deceased and that administration of said estate be granted to petitioner or some other suitable person.

It is Ordered, That the 3rd day of Aug. A.D. 1927 at ten a.m. at said Probate Office is hereby appointed for hearing said petition.

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix Sentinel a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
12 3t Judge of Probate.

STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the City of Charlevoix in said County, on the 27th day of July, A. D. 1927.

Present: Honorable Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of Hiram Van Dorn Rifenburg, mentally incompetent.

Samuel Alexander, having filed in said court his final administration account and his petition praying for the allowance thereof and for his discharge.

It is Ordered, That the 15th day of Aug., A.D. 1927, at ten o'clock in the forenoon, at said Probate office, be and he is hereby appointed for hearing petition;

And it is Further Ordered, That public notice thereof be given and that a copy hereof be published in the Charlevoix Sentinel, a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
14-3t Judge of Probate.

Order Appointing Time for Hearing Claims

STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the City of Charlevoix in said County, on the 7th day of July A.D. 1927.

Present: Hon. Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of Maybelle M. Russell, deceased.

The above cause having been admitted to probate and Rollie L. Lewis appointed administrator.

It is ordered that four months from this date be allowed for creditors to present their claims against said deceased and that such claims will be heard by said court on Wednesday the 5th day of October A.D. 1927, at ten o'clock in the forenoon, at the Probate Office in the City of Charlevoix.

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix Sentinel a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
12 3t Judge of Probate.

STATE OF MICHIGAN — The Circuit Court for the County of Charlevoix. —In Chancery.

Nina Hughey, by William Bowman, her next friend, Plaintiff.

vs.

Frank Hughey, Defendant.

Order for Publication—Defendant's Residence Unknown.

Suit pending in the Circuit Court for Charlevoix county, In Chancery, on the 23rd day of May, A.D. 1927, at the City of Charlevoix, in said county.

It satisfactorily appearing to the Court by affidavit on the date a chancery summons has been duly issued out of and under the seal of said court, in consequence of said defendant therein, and that the same could not be served on said defendant because that after diligent search and inquiry it could not be ascertained in what state or county the said defendant resides, or the whereabouts of said defendant learned, and that said chancery summons has been returned by the sheriff of said county with his certificate thereon endorsed that after diligent search and inquiry he was unable to find the said defendant within the state of Michigan on or before the return day of said summons, on motion of Clink & Williams, attorneys for said plaintiff,

It is Ordered, That the said defendant, Frank Hughey, cause his appearance to be entered in this cause within three months after the date of this order, and in case of his appearance that he cause his answer to the plaintiff's bill of complaint to be filed, and a copy thereof served upon the plaintiff's attorneys, within twenty days after service on him of a copy of said bill and notice of this order, and that in default thereof said bill to be taken as confessed by said defendant,

And in like motion, it is Further Ordered, That within twenty days after the date hereof, the plaintiff cause a notice of this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in said county of Charlevoix, and that such publication be continued at least once in each week, for six weeks in succession, or that he cause a copy of this order to be personally served upon said defendant, at least twenty days before the time above prescribed for his appearance.

And on like motion, It is Further Ordered, That the said plaintiff cause a copy of this order to be mailed to said defendant, at his last known postoffice address, by registered mail, and a return receipt demanded, at least twenty days before the date herein prescribed for his appearance.

Business Address: East Jordan, Michigan.

Order for Publication—Probate of Will STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the city of Charlevoix, in said county, on the 18th day of July, A. D. 1927.

Present, Hon. Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of Will H. Hull, deceased.

Fred G. Hull having filed his petition, praying that an instrument filed in said Court be admitted to Probate as the last will and testament of said deceased and that administration of said estate be granted to petitioner or some other suitable person.

It is Ordered, That the 11th day of Aug. A. D. 1927, at ten o'clock in the forenoon, at said Probate office, be and he is hereby appointed for hearing petition.

It is Further Ordered, That Public notice thereof be given by publication of a copy hereof for three successive weeks previous to said day of hearing in the Charlevoix Sentinel, a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
13-3t Judge of Probate.

STATE OF MICHIGAN—The Circuit Court for the County of Charlevoix.

Alva Yeider, Plaintiff,

vs.

O. A. Bennett and one "Carter" whose first or given name is unknown, both of the State of Illinois, Defendant.

Notice is hereby given that on the 15th day of April, A.D. 1927, a writ of attachment was issued out of said court in favor of Alva Yeider, as plaintiff, and against the lands, tenements, goods and chattels, moneys and effects of O. A. Bennett and one "Carter" whose first or given name is unknown, both of the State of Illinois, as defendants for the sum of Six Hundred Thirty Five and 30-100 Dollars, which said writ was returnable on the 30th day of May, 1927.

Dated July 21st, 1927.

LISLE SHANAHAN,
Attorney for Plaintiff.
14-6t Business Address, 108 Clinton Street, Charlevoix, Michigan.

STATE OF MICHIGAN — The Circuit Court for the County of Charlevoix. —In Chancery.

Suit pending in Circuit Court for the County of Charlevoix. In Chancery.

At the city of Charlevoix, Charlevoix county, Michigan on the 21st day of July A.D. 1927, Hugh K. Boyle, Plaintiff vs. Margaret McCormick Boyle, Defendant.

In this cause it appearing that the defendant, Margaret McCormick Boyle is not a resident of the State of Michigan, but is a resident of the State of New York; therefore on motion of Lisle Shanahan, attorney for the plaintiff, it is ordered, that the defendant enter her appearance in said cause on or before three months from the date of this order to defend the said plaintiff's action for a decree of divorce; and that within forty days the plaintiff cause this order to be published in the Charlevoix Sentinel, a newspaper published and circulated in the said county of Charlevoix, Michigan, said publication to be continued once in each week for six weeks in succession.

And it is further ordered, That the said plaintiff cause a copy of this order to be mailed to said defendant, if her last known post office address can be ascertained, by registered mail, and a return receipt demanded, at least twenty days before the date herein prescribed for her appearance.

PARM C. GILBERT,
Circuit Judge
Attorney for the Plaintiff.

Red Crown Ethyl Will Give You a Thrill

There is a thrill to driving when your car is eager to go—alert to obey—steady—powerful—smooth—when it slips over hills with a smooth ease—creeps through traffic with a quiet purr—is quick as lightning to pick up speed.

Use Red Crown Ethyl and know that thrill. It knocks out that knock.

When touring demand Red Crown Ethyl—everywhere—and everywhere the same.

Touring Suggestions "Highways Are Happy Ways"

1—Kenosha, Leavenworth on the bluffs overlooking the Missouri River, is entered by Interstate Highway 73. Established 1827, Fort Leavenworth is one of the oldest military posts in the West. Many historic relics, Disciplinary Barracks, Federal Prison, Kansas State Penitentiary and eastern branch of the Home of Disabled Volunteer Soldiers are located here.

2—Troy, Clear Lake derives its name from the crystal blue of its waters. Spacious groves of native oak line the shores. Varied recreational opportunities. U. S. Interstate Highway 36.

3—North Dakota, Merricourt. Nine Stone Hill Bauleyard where General A. H. Sulley defeated the last of the North Dakota Indians, Sept. 30, 1865. Located on U. S. Highway 13 at Kulm or Highway 11 near Colebrater.

4—Missouri, At Nevada, Missouri, is a park historically interesting to visitors. Within its boundaries stands what was used medicinally by the Osage Indians. Many interesting relics were attributed to the healing waters flowing from this spring. Now owned by Osage Nation. Highway 54.

5—Michigan, Frankfort situated in Benzie County, the county of 10 lakes, noted for its fine fruit. State Highway 22.

6—South Dakota, The famous Pine Ridge and Rosebud Indian reservations. Pine Ridge is the home of Red Cloud, who made their last stand against the white man on Wounded Knee Creek. Here the Indian Chief Sitting Bull lies in unmarked graves. State Highway 40 interstate Highway 18.

7—Minnesota, Hackensack is in the midst of Minnesota's Ten Thousand Lakes district, on the Paul Bunyan trail, a scenic highway open to Hackensack and two fun farms in the vicinity. State Highway 19.

8—Illinois, At Rantoul in Champaign Field, location of the U. S. Air Service Technical School. State Highway 45.

9—Wisconsin, Near Prairie du Chien is Nelson Dewey State Park. Covers more than 16 hundred acres. Contains the largest group of conglomerate Indian Mounds in the United States. Of unusual interest are Black Hawk Natural Monument and Effigy Mound Group, from which may be seen the junction of the Wisconsin and Mississippi Rivers. Short distance off Highway 18.

10—Illinois, Lincoln Trail Memorials Tells in Tree Marker, one of educational institutions established in the year 1840 when a statehood from France made a land deal with the Indians. Planted four miles west of Lake Wabash River at a spot they named St. Marye of the Woods. Interstate Highways 40 and 41.

SLOOP NABOB GOES ASHORE

Entry in Chicago-Mackinac Race Wrecked on 9 Mile Point

Caught in the grip of a fifty-mile an hour northwester a Chicago entry in the Chicago-to-Mackinac race was wrecked on the rocks of Nine-Mile point, last Monday morning at four o'clock.

Captain Andrew Smith, George Barker and Paul Straubel, all of Chicago, manned the ill-fated "Nabob" and were heading well up into the lake when the gale carried away their canvas and sent them skimming with the waves and surf in Little Traverse Bay.

Distress rockets were picked up by the employees at the Petoskey Portland Cement company and coast guards were notified. The sloop and crew were towed to Harbor Springs, where, after an overhauling she is reconditioned

Alfalfa Weevil in a New Picture Film

General Idea of How to Combat the Insect.

(Prepared by the United States Department of Agriculture.)

"Alfalfa Weevil Control," a new motion picture of the United States Department of Agriculture, gives a general idea of how to combat the insect and is of particular interest in the western states. Alfalfa is described as the foundation of agriculture in the West—"a hog's dream of heaven"—and as one of the world's most valuable forages. About 1904 or 1905 the alfalfa weevil, which belongs to the same family as the cotton boll weevil, was discovered in Utah. Since that time it has spread slowly but steadily until now it is found in seven states. Because of the importance of the alfalfa crop the alfalfa weevil constitutes a serious menace. Several states enforce quarantine restrictions to prevent further spread of the insect, and the baggage of automobile travelers is often examined.

Two measures of control are shown in the picture. Dusting with powdered arsenites is still in an experimental stage, but appears to have promise of proving effective. The use of poisonous sprays has proved its worth and is particularly recommended. Several types of sprayers are shown, including one with a very wide boom. Several scenes showing sprayed and unsprayed fields, side by side, are particularly interesting in depicting the benefits of this method of control. One spraying is usually considered sufficient to permit plants to make new growth, and protects the second crop as well as the first.

The film is one reel long and is a contribution from the bureau of entomology. It will be circulated through the film distributing system of the Department of Agriculture and the cooperating state institutions. Copies may be borrowed for short periods, or may be bought by authorized purchasers, at the laboratory charge.

Free Scouring Tests of Wool Samples Are Made

Wool growers may have samples of their wools graded and scoured, free or charge, by filing an application with the bureau of agricultural economics, United States Department of Agriculture, Washington, D. C., where a wool-scouring laboratory is now available for conducting such tests as facilities will permit. Applications should be mailed to G. T. Willingmyre, in charge of wool standardization. The applicant will be sent a parcel post mailing tank and instructions as to the proper method of drawing a sample so that it will be representative of any large lot of raw wool in the grease.

Experiments conducted in the laboratory during the past year have yielded valuable information on scourlosses or "shrinkage" of a large variety of domestic raw wools. The results have proved of great interest to many wool growers, and their practical application will enable any producer to obtain a reasonably accurate estimate of shrinkage of his wool.

Wool samples submitted to the department will be returned scoured, together with a report of the shrinkage and the grade in which the wool has been classified according to the official wool grades of the United States.

Grass and Grasshoppers Good for Young Poults

The Rhode Island experiment station demonstrated pretty completely that turkeys could stand all the green food and milk they would eat, but should be fed pretty sparingly on grain, given perhaps half or so of what one would naturally think they needed.

Turkeys should be kept in in wet weather, at least should not be allowed to get wet, but allowed as great range as possible as soon as they are old enough to take it safely. It is best to feed them ground bone so as to have them back every night, but the greater range they can have the more natural the food becomes, as in that case they find more insects and seeds. Where grasshoppers abound, turkeys usually do well.

It is important to select healthy stock.

Farm Hints

The best grapes grow from pruned vines.

* * *

Labelcutting oil is cheaper than machinery. Drain the crank case of your tractor often.

* * *

Potatoes may be kept in good condition for late planting by greening or sun-sprouting.

* * *

Sweet clover that was seeded this spring should not be pastured until the plants have made a growth of at least a foot.

* * *

Sweet clover requires as much lime as alfalfa on soils tested and found sour. It may be seeded in wheat like cowpeas, clover or with oats in the spring.

* * *

The care of trees is quite similar to the care of domestic animals. As a cow must be fed, housed, and doctored, a tree must be planted in a well managed soil, pruned and sprayed.

Buried in Loved Flag

In Hollock's life of Stonewall Jackson, the following statement appears: "It (the body) was enveloped in the new flag of the Confederacy and the first use that was ever made of it was thus to envelop the remains of the departed chieftain."

Weakness in Ignorance

The weakness of human reason appears more evidently in those who know it not, than in those who know it.—Pascal.

Electricity and Bananas

Among the many extensions of the use of electrical machinery attention may be called to the employment of motor-driven "marine legs," a machine to unload bananas from the holds of fruit-carrying vessels at New Orleans. Not only is there a great saving of labor, but it is said that the fruit is much less damaged than when unloaded by hand. At Louisville electric railfitters have been employed to ripen bananas for local consumption. The fruit is hung in ripening rooms and subjected to a temperature of from 70 to 80 degrees during a period of 48 hours. Afterward it is kept in storage at a temperature of from 60 to 70 degrees.—Washington Star.

Old Dances Revived

Old-time dances of the days of Merry England are being revived in London and vicinity. An all-England festival of folk dancing and singing was held recently and nearly 9,000 people stepped the figures that once were popular on the village greens. Tunes that were familiar in the olden times were played by a well-schooled orchestra and sung by the crowd. One feature was a display by two teams of traditional sword dancers from Durham and Yorkshire. At the time of this festival 1,000 dancers assembled a folk song and dance school in another hall in London. Similar events are being given in other parts of England.

LEGAL NOTICES

Order for Publication—Probate of Will
STATE OF MICHIGAN—The Circuit Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the City of Charlevoix, in said County, on the 9th day of July, A. D. 1927.

Present: Hon. Servetus A. Correll, Judge of Probate.

STATE OF MICHIGAN—The Circuit Court for the County of Charlevoix, —in Chancery.

Nina Hughey, by William Bowman, her next friend, Plaintiff,

vs.

Frank Hughey, Defendant.

Order for Publication—Defendant's Residence Unknown.

Suit pending in the Circuit Court for Charlevoix county, in Chancery, on the 23rd day of May, A.D. 1927, at the City of Charlevoix, in said county.

It satisfactorily appearing to the Court by affidavit on file that a chancery summons has been duly issued out of and against the defendant in favor of the complainant and that defendant therein, and that the same could not be served on said defendant because that after diligent search and inquiry it could not be ascertained in what state or county the said defendant resides, or the whereabouts of said defendant learned, and that said chancery summons has been returned by the sheriff of said county with his certificate thereon endorsed that after diligent search and inquire he was unable to find the said defendant within the state of Michigan on or before the return day of said summons, on motion of Clink & Williams, attorneys for said plaintiff.

It is Ordered, That the said defendant, Frank Hughey, cause his appearance to be entered in this cause within three months after the date of this order, and in case of his appearance that he cause his answer to the plaintiff's bill of complaint to be filed, and a copy thereof served upon the plaintiff's attorneys within twenty days after service on him of a copy of said bill and notice of this order, and that in default thereof said bill to be taken as confessed by said defendant.

And in like manner, it is Further Ordered, That within twenty days after the date hereof, the plaintiff cause a notice of this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in said county of Charlevoix, and that such publication be continued at least once in each week, for six weeks in succession, or that he cause a copy of this order to be personally served upon said defendant, at least twenty days before the time above prescribed for his appearance.

And on like motion, It Is Further Ordered, That the said plaintiff cause a copy of this order to be mailed to said defendant, at his last known postoffice address, by registered mail, and a return receipt demanded, at least twenty days before the date herein prescribed for his appearance.

Alva Veider, Plaintiff,

vs.

O. A. Bennett and the "Carter" whose first or given name is unknown, both of the State of Illinois, Defendant.

Notice is hereby given that on the 18th day of April, A.D. 1927, a writ of attachment was issued out of said court in favor of Alva Veider, as plaintiff, and against the lands, tenements, goods and chattels, moneys and effects of O. A. Bennett and the "Carter" whose first or given name is unknown, both of the State of Illinois, as defendants for the sum of Six Hundred Thirty Five and 30-100 Dollars, which said writ was returnable on the 30th day of May, A.D. 1927.

Dated July 21st, 1927.

ISLE SHANAHAN,
14-6t Attorney for Plaintiff.
Business Address: 108 Clinton Street, Charlevoix, Michigan.

STATE OF MICHIGAN—The Circuit Court for the County of Charlevoix, —in Chancery.

Suit pending in Circuit Court for the County of Charlevoix, in Chancery.

At the City of Charlevoix, Charlevoix county, Michigan on the 21st day of July A.D. 1927, Hugh R. Boyle, Plaintiff vs. Margaret McCormick Boyle, Defendant.

In this cause it appearing that the defendant, Margaret McCormick Boyle is not a resident of the State of Michigan, but is a resident of the State of New York; therefore on motion of Lisle Shanahan, attorney for the plaintiff, it is ordered, that the defendant enter her appearance in said cause on or before three months from the date of this order to defend the said plaintiff's action for a decree of divorce, and that within forty days the plaintiff cause this order to be published in the Charlevoix Sentinel, a newspaper published and circulated in the said county of Charlevoix, Michigan, said publication to be continued once in each week for six weeks in succession.

And it is further ordered, That the said plaintiff cause a copy of this order to be mailed to said defendant, if her last known postoffice address can be ascertained, by registered mail, and a return receipt demanded, at least twenty days before the date herein prescribed for her appearance.

Road Commissioners to Meet at Petoskey

According to plans arranged, members at the Northern Michigan Road Commissioners Association, which embraces twenty-five counties, will hold a two-day meeting in Petoskey this week, with the date of opening set for Friday, and continuing the following day, along lines laid down in a pre-arranged program.

Several state officials have signified their intention of being present at this meeting. This list includes Governor Green, who will deliver an address; Secretary of State John S. Haggerty; Treasurer Frank D. McKay; State Highway Commissioner Frank Rogers and others.

TAG DAY SET FOR AUGUST THIRTEEN

Drive for Benefit of Local Hospital—Date Set for Saturday

Saturday, August 13th has been selected for a tag day drive, the receipts of which will be turned over for the benefit of the Charlevoix hospital, an institution established a few years ago and one that has repeatedly proven its worth to both local citizens and summer visitors.

The local hospital is of inestimable value to this city. It has always been well patronized and is highly spoken of by the public generally and especially so by individuals requiring special attention and treatment for either sickness or accidental injuries.

That the hospital is not self sustaining is generally understood; that it would not be self supporting from the start was equally as well understood and so discussed from the first inception of the Charlevoix hospital idea, prior to the construction and equipment of the present institution. It has been operating for years of its existence upon financially supported annual assistance annually and mostly by always generous public all of whom are friendly to the local institution.

Funds are needed to maintain and carry on the project, hence the "Tag Day" drive scheduled for Saturday, August 13th, at which time the public will have an opportunity to donate for the benefit of those who unfortunately may require treatment in an institution of this character.

Mr. M. A. Levinson, chairman of the board of trustees, will be pleased to furnish information relative either to the hospital or the scheduling tag day drive to all parties interested.

Its the Limited, Boys! She's Doomed!—Majestic

Dashing at break-neck speed along the gleaming rails, the runaway express hurtled toward the washout trestle to certain destruction. Hubbled passengers clung in frightened groups awaiting the appalling impact—catastrophe—and then the famous climax! That is but part of the thrills in "The Runaway Express," the picture which will be the attraction at the Majestic next Wednesday and Thursday.

Malayan Snake God

On Penang, an island off the east coast of the Malay peninsula, there is a temple in honor of the snake god worshiped under the name of Chor Soo Kong. Inside the temple is a pool filled with snakes, ranging from 5 inches long to monsters as large as sea serpents. They are said never to harm the worshipers.

1905 1927

GROWTH

When an institution shows a healthy growth over a period of years, the reason is apt to be found in the character of the service it renders its clientele.

It is somewhat significant that the deposits of this Bank have grown from $461,400.00 in July 18, 1922, to the total of $724,494.00 on July 18, 1927, or an increase of 57 per cent.

These are facts that tell a story of satisfied depositors; of clients well served.

In soliciting your business, we offer ourselves not simply as a depository for your funds, but as a service-giving institution, able and willing to co-operate with you in the promotion of your own business activities.

SLOOP NABOB GOES ASHORE

Entry in Chicago-Mackinac Race Wrecked on 9 Mile Point

Caught in the grip of a fifty-mile an hour northwester a Chicago entry in the Chicago-to-Mackinac race was wrecked on the rocks of Nine-Mile point, last, Monday morning at four o'clock.

Captain Andrew Smith, George Barker and Paul Straubel, all of Chicago, manned the ill-fated "Nabob" and were heading well up into the lake when the gale carried away their canvas and sent them skimming with the waves and surf in Little Traverse Bay.

Distress signals were picked up by the employees at the Petoskey Portland Cement company and coast guard was notified. The "Nabob" sloop and crew were towed to Harbor Springs, where, after an overhauling and repairing, the craft may be sailed back to its mother port. The Nabob is the only one that suffered from the northwester and the only mishap that has occurred in the race this year reste across her bows. None of the crew were in the least way harmed though they believe it to be the most exciting incident that has ever come into their lives.

WORKS OF ART AT CALLEN STUDIO

Their Second Exhibition, at 204 Bridge Street

For their second exhibition, the Barron Callen studios, 204 Bridge street, are having a collection of fine and rare books from the library of Mr. E. S. Stern of Chicago. The collection embraces first editions of standard authors, and interesting examples of engravings, biographies, histories and belles letters. Most of the books are in superb bindings, the greatest masters of bookbinding.

There is no charge for admission and all lovers of fine books are cordially invited. Mr. Stern himself, will be present to greet his many friends and to put his expert knowledge at the service of all who may call during the exhibition of portraits by Harry Solon of New York City, just closing, and circulated in the summer colony. Mr. Solon is in Charlevoix this summer, having been commissioned to paint several portraits here. Mr. Callen hopes to arrange several other exhibitions of note, among which may be the work of Mr. Will Hannels, the famous dog portrait painter.

ENTRY LISTS ARE HEAVY

Many are Listed in the Several Events for Annual Regatta

Proportions never before equalled in a water event around northern Michigan will be assumed in the annual regatta August 5-6-7, according to the entry lists and plans at hand. The affair is being staged by a joint committee from the Pine Lake Yacht Club, Charlevoix Boat Club and Association of Commerce.

There are over seventeen entries in the outboard motor-boat race and a fast pair lined up in the hydroplane event. "Star" owned by M. S. Jewett of Traverse City will be matched off against M. Roy Brady's "Miss Charlevoix." Entries in other classes include "Miss Tennessee II" owned by George Schwab Jr. of Nashville, Tenn.; the "Jay-Gree" owned by Julius Gilbert of Detroit; the "Holly-Hoo" owned by C. E. Hollingsworth of Rensselaer, Ind., and the "James W." owned by John Webb of Oak Park, Ill.

The "Baby Bandit," holder of the Colonel Gresham trophy, most coveted of outboard motor prizes, has entered. This boat holds the outboard record to date and took most of the big speedern regattas last winter. She has been officially beaten twice this year in the north—once at Traverse City by "April Fool" and once by "Mary Louise" at Fishermen's Paradise. With all three of these boats entered some new official records ought to be established.

The Resmar Third, a yacht belonging to R. E. Olds, will act as the judges boat during the regatta. On this floating craft an equally imposing group of officials will judge the events. They are J. W. Sackrider, official starter and a member of the Mississippi Valley Power Boat Assn.; S. J. Shwartz of New Orleans, Arthur Ilergeon, mayor, Charles Emrey, Robert Bridge, Archie Livingston, Charlevoix; A. L. Creamer, Southern Pines, N. C. and A. J. Page, of the Johnson Motor Co.

In the sailing events some nationally known crafts will compete. There are four entries in the six metre, 19.68 sailing yacht event, four in the S class 16.9 class, and three in the X class.

Twenty eight beautiful cups will be awarded to winners. This is the first regatta under the sanction of the Inland Water Power boat Association ever held in north Michigan.

SUMMER VISITORS HERE IN NUMBER

Local Hotels Have their Full Quota and But Few Cottages are Vacant

Northern Michigan is full to overflowing with summer visitors according to statistics gathered at a number of colonies in this part of the state. The Belvedere is full and every cottage is occupied. The Inn and the Beach also have full registers and there are but three unrented cottages on the north side of the river.

The weekend has gained the largest proportions of any resort along the north bank of Little Traverse Bay. This little colony has become very largely a Louisville, Ky., watering place. For-ard Time, 40 or so much thereof as may be necessary of the land and premises hereinafter described, to raise the amounts due to said plaintiff by the terms of said decree, together with principal, interest and costs due said plaintiff at the time of said sale.

The premises to be sold are described as follows, to-wit: All of that certain piece or parcel of land situate in the City of Charlevoix, County of Charlevoix and State of Michigan and more particularly described as follows, to wit: Lot Seven in Block Seventeen of Bee Village (now city) of Charlevoix, Michigan, together with all buildings, improvements and appurtenances now standing on said premises, or any part thereof, including all window screens, door screens, curtain fixtures, furnaces, gas and electric light fixtures, and steam and other heating apparatus, and any and all other fixtures that may be placed in any building now standing upon said premises, together with all rents, issues and profits which shall hereafter accrue from said premises

Dashing at break-neck speed along the gleaming rails, the runaway express hurtled toward the washout trestle to certain destruction. Hubbled passengers clung in frightened groups awaiting the appalling impact—catastrophe—and then the famous climax! That is but part of the thrills in "The Runaway Express," the picture which will be the attraction at the Majestic next Wednesday and Thursday.

Malayan Snake God

On Penang, an island off the east coast of the Malay peninsula, there is a temple in honor of the snake god worshiped under the name of Chor Soo Kong. Inside the temple is a pool filled with snakes, ranging from 5 inches long to monsters as large as sea serpents. They are said never to harm the worshipers.

GROWTH

When an institution shows a healthy growth over a period of years, the reason is apt to be found in the character of the service it renders its clientele.

It is somewhat significant that the deposits of this Bank have grown from $461,400.00 in July 18, 1922, to the total of $724,494.00 on July 18, 1927, or an increase of 57 per cent.

These are facts that tell a story of satisfied depositors; of clients well served.

In soliciting your business, we offer ourselves not simply as a depository for your funds, but as a service-giving institution, able and willing to co-operate with you in the promotion of your own business activities.

Capital $250,000.00 *Surplus $250,000.00*

SLOOP NABOB GOES ASHORE

Entry in Chicago-Mackinac Race Wrecked on 9 Mile Point

Caught in the grip of a fifty-mile an hour northwester a Chicago entry in the Chicago-to-Mackinac race was wrecked on the rocks of Nine-Mile point, last, Monday morning at four o'clock.

Captain Andrew Smith, George Barker and Paul Straubel, all of Chicago, manned the ill-fated "Nabob" and were heading well up into the lake when the gale carried away their canvas and sent them skimming with the waves and surf in Little Traverse Bay.

Distress signals were picked up by the employees at the Petoskey Portland Cement company and coast guard was notified. The "Nabob" sloop and crew were towed to Harbor Springs, where, after an overhauling and repairing, the craft may be sailed back to its mother port. The Nabob is the only one that suffered from the northwester and the only mishap that has occurred in the race this year reste across her bows. None of the crew were in the least way harmed though they believe it to be the most exciting incident that has ever come into their lives.

WORKS OF ART AT CALLEN STUDIO

Their Second Exhibition, at 204 Bridge Street

For their second exhibition, the Barron Callen studios, 204 Bridge street, are having a collection of fine and rare books from the library of Mr. E. S. Stern of Chicago. The collection embraces first editions of standard authors, and interesting examples of engravings, biographies, histories and belles letters. Most of the books are in superb bindings, the greatest masters of bookbinding.

There is no charge for admission and all lovers of fine books are cordially invited. Mr. Stern himself, will be present to greet his many friends and to put his expert knowledge at the service of all who may call during the exhibition of portraits by Harry Solon of New York City, just closing, and circulated in the summer colony. Mr. Solon is in Charlevoix this summer, having been commissioned to paint several portraits here. Mr. Callen hopes to arrange several other exhibitions of note, among which may be the work of Mr. Will Hannels, the famous dog portrait painter.

WOMEN OF MIDDLE AGE

Praise Lydia E. Pinkham's Vegetable Compound

Mrs. Annie Kwinski of 622 1st Avenue, Milwaukee, Wis., writes that she became so weak and run-down that she was not able to do her housework. She saw the name Lydia E. Pinkham's Vegetable Compound in the paper and said to her husband, "I will try that medicine and see if it will help me." She says she took six bottles and is feeling much better.

Mrs. Mattie Adams, who lives in Downing Street, Brewton, Ala., writes as follows: "A friend recommended Lydia E. Pinkham's Vegetable Compound and since taking it I feel like a different woman."

With her children grown up, the middle-aged woman finds time to do the things she never had time to do before —read the new books, see the new plays, enjoy her grand-children, take an active part in church and civic affairs. Far from being pushed aside by the younger set, she finds a full, rich life of her own. That is, if her health is good.

Thousands of women past fifty, say they owe their vigor and health to Lydia E. Pinkham's Vegetable Compound, and are recommending it to their friends and neighbors.

Kill All Flies! THEY SPREAD DISEASE

Placed anywhere, DAISY FLY KILLER kills all flies. Neat, clean, ornamental, convenient, cheap. Lasts all season. Will not spill or injure anything. Guaranteed not to soil or injure anything. Guaranteed to satisfy. Sold by dealers or sent prepaid for $1.25.

"On to Paris!"

Why I Want to Go Back to France

(First Prize Essay in the American Legion's Essay Convention Contest. Written by Robert McGinnis of New Britton, Pa.)

I want to go back to the land of romance once more—to march down the sweltering roads again with the memory of a carefree gang of doughboys tramping along to the songs of "Hinky Dinky, Parley Voo," "Good-by, Broadway, Hello France," and dear old "Madelon."

I want to be part of that dust-covered column once more; to live again the things that made it hell, yet made us love it, too—lines of sweat streaking down dusty necks, dangling hands swelling up to numbness as pack straps tighten across the shoulders, noisy mess wagons with clanking pans rolling along in the rear, a passing outfit of Frogs trudging out of the lines for a rest, ambulances jammed with muddy, bloody, grinning Yanks going back to Blighty—and the distant boom of big guns banging away over the hills in front of us.

I'd like to crawl back into a certain cramped and water-soaked dugout up near Toul, and watch it rain, rain, rain. I want to lie once more in a wheat field below the old chateau in Conde-en-Brie, and watch for Jerry hengs popping up and down in the trenches across the Marne. I want to live again the night of July 14, when they passed up through that field to wipe us out, and to see it the same little trench is still there when we found Ed and Charley four days later, leaning over their rifles on top of the parapet just as the Jerries had knocked them off.

I want to live all the nights again; to see the bursting shrapnel and to hear it whistling for its victims; to hear the frantic cries of "gas" repeating down the line; to lie listening to the dismal moan of O. I. cans going over to wake up the boys from Berlin. I want to crouch there in my dugout listening and wondering. Listening to the dull heavy boom of far-away cannon rumbling through the night. Listening to the drip, drip, drip of the everlasting rain out in the darkness. I want to lie there again, and always wondering what I'll die about.

I want to see French villa, French fields, French sky, French people once again. I want to see the kiddies—to know that I've returned smile since the war. I want to go back to France once more—not to seek new joys or thrills, but to revive the dreams of old that are fading with the years.

By ELMO SCOTT WATSON

THE A. E. F. is meditating again. But it is the second A. E. F. which is planning a trip abroad and this time the slogan is "On to Paris!" instead of "On to Berlin!" All over the United States, members of the American Legion are making their plans to revisit the land over which they fought ten years ago and to attend the annual Legion convention, which will be held in Paris September 19 to 24.

It's a very different A. E. F. that is going over in this year 1927 from the one that went over in the year 1917. Then its members crossed the Atlantic in crowded troop ships, their smiling clouded with the premonition of mercy, every mile of their journey beset by the dangers of the submarine-infested water. For the folks at home there was a long anxious wait and then finally word came back that those boys of theirs had arrived safely "Somewhere in France." This year they'll be going on palatial steamers like the Leviathan, the Republic and the President Harding, and instead of the folks back home waiting anxiously for word from them, some of these folks will accompany them on this gala trip. For the sweethearts of 1917 are the wives of 1927, and they're going to, too. And some mothers are going.

And when they get to Paris how different it will be from 1917 and '18! Then it was a matter of only a few hours' leave and even those hours were spent under the watchful eyes of the M. P.'s This year they are going back with the knowledge of seven days of glorious freedom in the French capital, of living at some of the best hotels at moderate prices. American Legion officers in charge of the arrangements for the convention have engaged the classes of hotels, and will give the boys a week in Paris at prices ranging from $10 to $40 for room only, for the seven days.

As for the matter of M. P.'s, there won't be any. No passports will be required for members of the Legion attending the convention, and they will enjoy complete freedom. Identification certificates have been accepted by all European countries, instead of passports, thus avoiding visas or charges of any kind. Since such certificates are heretofore unknown to the Paris police, the boys will have only to flourish them to get past any French authorities. Although the Legion authorities will appoint special units in each group to assist the French police forces in handling the crowds, Legion officials are counting upon the fact that at least one-third of the 30,000 delegates who are going will be the wives or other female relatives of the men. They will be the real M. P.'s of this A. E. F. while it is in Paris!

For that is the reason that most of them are heeding the slogan "On to Paris." Robert McGinnis, the winner of the prize essay contest, whose reason for going is given above, has expressed it for all of them, when he indicated that they are going back to revisit the scenes of the greatest adventure of their lives. And they're going back, too, to read certain names on the walls of cafes which stand in long rows at Romagne-sous-Montfaucon, at St. Mihiel, at the Somme, at Suresnes and at the Marne. For these are the names of their buddies, certain members of the first A. E. F. who went to France to stay!

♦ Some Familiar Scenes in France That Await the Second Coming of the A. E. F. ♦

1. CHAMBOURD—Madame Mathilde Cospen, the Washerwoman of Chambourd, it was Madame Cospen who peddled out hundreds of shirts and socks and suits of underwear for hundreds of American soldiers who passed through Chambourd on their way to the Front. She's standing on a ladder which points to the temporary abode of those hundreds of men.

2. OH, POOR RAT THEY CHOR—Such is the warning to the approaches of the Arch de Triomphe in Paris. Americans in the French capital for the American Legion convention must heed it, too. There are plenty of "picture" signs which are larger than they themselves. A "picture" is a person who does an "effet a pied," in other words, a person who goes through fancy dancing steps. Such is the case with the Arch de Triomphe and reason the latter is known as the "Cheese-rat" to the Parisian shore. "Allonez! Pictons! And make it snappy no matter how much your 'old dogs' are creaking!

3.—ROMAGNE—Abbe Ernest Decoutte, Cure of the church at Romagne-sous-Montfaucon. The road to the right, following the direction of the arrow on the tree leads to the American military cemetery where rest the bodies of at least 15,000 American dead. The Cure was ordered shot as a spy, but about an hour before the time set for him to face the firing squad an aide, who was a German prisoner of war, recognized him and he was saved.

4. LE FOER DE PARIS—Once upon a time LePoer de Paris was quite a village, having a population of 700. Here it is today, nothing except the base of a road marker at the right. A new standard has been erected, just to the right of where the old one stood. A monument, too, has been erected and may be seen in the picture.

5. ALLIEPOINT—Buy some maps before you start out looking for Alliepoint, is the advice given any members of the Eighth-th (Blue Ridge) division, going back to revisit the town which stood along the banks of the Agron river. Alliepoint didn't have a chamber of commerce, but it was a respectable place and was about as much heard of as its sister-municipality villages of Verpel and Passegues. Then it took the role of chief stopper of shells, fired by the Eighth-th, and this is what you can see of Alliepoint when you go back today.

6. LAHARAIZE—Until last summer the shaft in the German cemetery in the Argonne forest, near the Kaiser's old headquarters, prince of Hercula, was surmounted by a marble eagle. Now the eagle is somewhere in the United States. As ex-American army officer, who fought his way through the Argonne in 1918, carried it off as a souvenir.

Crack Shots Were Out for Records

A remarkable record was made by one company of the artillery corps at a Western post. Four shots were fired from a battery of two 10-inch guns at a target 30 feet high by 90 feet long which was moving at the rate of eight miles an hour at a distance of about five miles away. All four shots were fired in a period of 1 minute and 20 seconds, and passed through a rectangle 9 feet high by 42 feet wide, three of them striking the target and the fourth passing four yards to the left of it. The remarkable accuracy of this firing can be appreciated when it is realized that a circle with a radius of 11 yards at the target would include all the shots.

Another company fired four shots from an 8-inch battery at a 30 by 60-foot target which was moving at the rate of five miles an hour at a distance of about four miles from the battery firing. All four shots were hits, and the first shot cut the raft of the material targets in two. A circle with a radius of 15 yards at the target would include all the shots. The interval between the shots was 30 seconds.

Controlling Temper

If you wish not to be of an angry temper, do not feed the habit; throw nothing on it which will increase it; at first keep quiet and count the days on which you have not been angry. I used to be in a passion every day; now every second day; then every third; then every fourth. But, if you have intermitted thirty days, make a sacrifice to God.—Epictetus.

Scottish Law Term

Fee is a Scottish law term defining the sale of land for a rent in perpetuity instead of a capital amount. The notice, "Land to Fee" is as common in Scotland as "Land for Sale" in England.

Horticultural News

SIZING MACHINES NEED GRADE BELT

Although a mechanical grading machine is not an essential in packing apples, yet for a large crop of good quality, such a machine may be an economy, especially if it has a grading belt attachment, according to Prof. Joseph Oskamp at the New York State College of Agriculture at Ithaca, N. Y. The term "grading machine" is a misnomer, according to Professor Oskamp, for they are really sizing machines, and for this reason merely relieve the operator of any concern about the size of the fruit being graded. The grading belt attachment is thus one of the most important factors of running these machines, because it speeds up the sorting out of the defective fruit in the process of packing and makes it more accurate.

High quality fruit not only brings more money but is more quickly and cheaply packed. Therefore, if there is a large percentage of culls it is often wise to sell the crop orchard run without grading it. Where the crop runs 85 per cent A grade, it can be packed for about one-third less than where there are 70 per cent or less of A grade fruit, he says. Proper care in orchard management and proper spraying should produce a crop which will run 80 per cent or more A grade.

It is very important that the fruit in the barrel should be packed tightly, and to accomplish this the barrel should be shaken several times to settle the apples. Overfilling will not take the place of racking, and, at the same time, it results in needless bruising of the fruit. In a properly racked and packed barrel the fruit need project but slightly above the chime.

Diseases Causing Pear Tree Branches to Die

There are many diseases which might cause branches to die on a pear tree. The disease which is most often the cause is bacterial blight. This disease starts by causing the tips and ends of the branches to die. Gradually the disease works its way down the limbs and finally it may kill entire limbs and even the tree itself.

The best way to treat trees infected in this manner is to prune off all of the branches and twigs which are badly infected. In all probability one will find a considerable number of cankers on the trunk and branches. It is in these places that the bacteria or spores of the disease multiply, and, spreading from such places, they are continuously infecting new and healthy wood. Such cankers should be carefully trimmed out until apparently healthy tissue is reached. Such wounds should then be painted with a good antiseptic solution. A good solution is made by dissolving one tablet of bichloride of mercury in a pint of water and a tablet of cyanide of mercury in another pint of water. The two solutions should then be poured together and stored in a glass jar. Apply the material with a swab or brush.

Such trees will usually be weak. In addition to giving the above treatment, it is a good thing to cultivate the ground and apply a good quantity of manure or nitrate of soda in the spring. Furthermore, a good spraying schedule should be practiced so that insects and diseases will be reduced to a minimum.

Horticulture Squibs

Use only the spray materials recommended in the spray calendar.

* * *

The peach appears to be directly benefited by applications of limestone.

* * *

The best materials to use in spraying fruits is arsenate of lead and lime-sulphur.

* * *

Crown gall may be easily recognized by very rough black outgrowths on the crown, roots or main stem of the tree.

* * *

It is all right to set raspberries below the trees providing they are not allowed to interfere with the growth of the trees for a few years.

* * *

Do not spray when it happens to be convenient, but spray at the times the spray calendar says. The time of spraying is of vast importance and the times given in the spray calendar are based on years of study.

* * *

In the North, where seasons are not so long, there are not so many broods of insects, so a less number of times spraying answers the same purpose as a greater number does farther South.

* * *

While the same mixtures of sprays may be used on both plums and apples, yet it is not always practical to spray both at the same time, on account that many sorts of plums blossom earlier than apples do.

* * *

Be sure the spray reaches right through the trees. To secure this, do it, if necessary, underneath the tree and spray the part beyond the trunk first, then step back to the outside and spray the remaining part. Do this from both sides.

* * *

If you can't spare a little piece of land exclusively for raspberries, don't start. One hundred plants give a good start, fifty will do if you are willing to wait a year for the remainder to grow in your own patch.

* * *

In preparing for spraying it is best to buy some good type of sprayer. The five-gallon size of knapsack sprayer will answer the purpose in the first years, while trees are small; and it is often convenient to have this size on hand for small jobs, even if one has a larger size.

Pecans

The bulk of the commercial production of pecans is at present in Texas, Oklahoma, Louisiana, Mississippi, Georgia and Florida. But the tree is native to river bottoms from Indiana and Iowa southward into Mexico. Southeastern states and California have taken up pecan growing to some extent, but there has been little commercial success with these trees north of latitude 40 degrees.

The tree attains a height of 75 to 170 feet. The crop is harvested when the great majority of the nut husks have opened. As a rule it is disposed of before Thanksgiving.

Such trees will usually be weak. In addition to giving the above treatment, it is a good thing to cultivate the ground and apply a good quantity of manure or nitrate of soda in the spring. Furthermore, a good spraying schedule should be practiced so that insects and diseases will be reduced to a minimum.

Appropriate Decorations

A South Bend youngster, age three, was helping his mother make gingerbread. Molding it in the shape of a man, he placed raisins for the nose, eyes, mouth and a row of buttons. He began to decorate the figure's legs also with raisins.

"Why do you put raisins on his legs?" asked the mother.

"Well," the boy explained, "him got the lives."—Indianapolis News.

A New Way to Make Jellies

Without Staining Fingers—Without Long Hours of Boiling—Without Depending Upon Berries or Fruit Being in Season.

One of the most interesting and yet one of the simplest new products in the food field is called minute jelly. It is pure fruit or berry juice already boiled down and concentrated. To this concentrated juice, fruit pectin in the right amount has been added. The pectin is that part of fruit which makes jelly "jell." It is as pure and wholesome as the fruit juice.

To make the jelly take the little bottle of concentrated juice, pour in a sauce pan, add water and sugar according to directions on the bottle and boil a few minutes. Then pour into jelly glasses and when it has become cold you have the most delicious pure fruit jelly you ever tasted.

A few bottles kept on hand, selected according to your taste for jellies, and you can make up a few glasses just as you want it. One small bottle makes two glasses of jelly. If you wish to try two bottles send us twenty-five cents and we will give you your choice of grape, mint, pineapple, orange, raspberry, strawberry or blackberry. For four bottles—all different—for fifty cents. Address Department WU, General Packing Corp., Cranford, New Jersey.—Adv.

"Why didn't Tommy come?" "Oh, his mother's making Monarch Cocoa and Teenie Weenie Peanut Butter sandwiches." "Let's all go down to Tommy's house."

K-R-O may be used freely in the house, barn or poultry house with absolute safety. Actual tests have proved that it kills rats or mice and nothing else. Not a poison. Not a poultry spread. Ingredients plainly printed on the original sacks.

NOT A POISON

K-R-O does not contain arsenic, phosphorous barium or squills. Mixed equally well with balls—the new safe way urged by government experts. At your druggist 75c. If he cannot supply you, a sack will be sent direct from us prepaid; he cannot supply you. Satisfaction guaranteed.

K-R-O Co., Springfield, Ohio

W. N. U., CHICAGO, NO. 31-1927.

Such a Bust

Mrs. Green—And whom does this statue represent?

Mrs. Hills—That is Diana, executed in terra cotta.

Mrs. Green—Oh, the poor thing! How cruel they are in those outlandish countries.—Dashing Show.

Impatience dries the blood sooner than age or sorrow.—Cheno.

Bugville's Richest Citizen—

But Flyosan will get him too!

HE'S SEEN burying flies and millions.

Flyosan floats through your rooms, killing every single fly and mosquito—getting into corners and crevices you could never see.

But use Flyosan itself—the *first* liquid insect spray on the market (non-poisonous). Flyosan not only kills every fly and mosquito in your house, but also kills the millions of deadly, disease-bearing germs on the body of each.

And "swatting" only scatters these germs into the air you and your family breathe.

Peterman's has the right insecticide for each insect. On sale wherever drugs are sold.

Here is the right insecticide for each insect:

FLYOSAN, *Liquid Spray*—kills flies and mosquitoes.

PETERMAN'S ANT FOOD—exterminates ants.

PETERMAN'S DISCOVERY, *Liquid*—exterminates bedbugs,

PETERMAN'S ROACH FOOD—exterminates that cockroach army.

PETERMAN'S MOTH FOOD—protects against moths.

You must have a specific insecticide for each insect. No single insecticide will exterminate them all. We have had nearly 50 years' experience. We *know* that is true.

Peterman's

200 Fifth Ave., N.Y.C.

Economic Problems That Can Be Solved by Application of Proper Principles

By WILLIAM T. FOSTER, Economic Research Official.

OVERPRODUCTION and unemployment are problems subject to human control without any radical change in government. A first step is to recognize a fact long ignored by economists, that producing goods does not automatically furnish buyers. Once we recognize the existence of the problem we are nine-tenths of the way toward a solution.

The last 12 months manufacturers turned over goods in excess of $6,000,000,000 to buyers who did not have the money to pay. Of this, $3,000,000,000 is not yet paid for. Yet the price level has steadily declined. The Simple Simons of our day do not have to face many Pipmen who demand "first your penny." They say rather, "Take your goods and pay us you can." This situation is merely an indication that business faces overproduction. It forecasts business without a buyer. It is postponing a recession of business that it cannot postpone very long.

No nation has yet studied consumption. Every national system is organized to finance production on the principle that the people will have the money to buy what they have worked to manufacture.

We could leave all this as it is, allow every individual to act as he sees fit, make no changes in our monetary system and still solve the problem. We could do this by so ordering our vast government expenditures and receipts that they could serve as proper and adequate corrective measures to periods of too much production or not enough buying. This is all that is necessary for business to go forward with confidence.

"Catch Them Young" if Childish Emotions Are to Be Properly Trained

By DR. BIRD T. BALDWIN, University of Iowa.

The way to train children's emotions and build up desirable character traits is to "catch them young" and use modern psychological methods. Use modern methods of analyzing their temperamental differences and emotional trends, follow direct scientific methods of training desirable traits through daily activities, and provide abundant association with other children.

Undesirable emotions can be readily eliminated through the substitution of desirable emotional attitudes, interest and habits, integrated into the daily activities of the schoolroom or home. Nagging has no place in this program.

Illustrative character studies from the Iowa preschool laboratories, where children are admitted at the age of eighteen months and have been studied daily for nearly six years, demonstrate how the ordinary fears of childhood and adult life had been eliminated or avoided, how undue self-consciousness and timidity had been overcome, and self-confidence and self-control developed.

Pronounced egotism and selfishness have been thwarted. One study was used to a bright child's intelligence rating through a period of six years of daily observation and training.

Character, emotional, esthetic and social training should form an integral part of every modern elementary school curriculum.

Greater Sympathy Should Be Shown Toward Less Favored Nations by America

By REV. GEORGE CHALMERS RICHMOND, Detroit Religious Forum.

America's attitude toward China during the next four years will be an important factor in our industrial expansion and success. If we, as a nation, expect to do big business throughout the world ten years from now we must show a far greater sympathy for those nations which today are in the midst of political turmoil and industrial revolution. The old-time American leaders of industry showed greater sympathy and broader vision than those of today.

Big business should consider the needs of the smaller nations as well as the opportunity for commercial exploitation. The lack of effort to promote world peace and the failure of industrialists to recognize religion as a factor in promoting international good will are to be deplored.

The young men who spend their Saturdays nights gambling, in destructive orgies and in breaking laws, will never rise to leadership in the American business world, or in any other domain of life where character is of consequence.

Provision for Recreational Facilities Important in Any Community

By TOM H. WELCH, Detroit Building Authority.

Adequate recreational facilities for children are an important factor in a community program for the prevention of juvenile delinquency. We all are of the opinion that the pace of the city is too fast. Nothing else can be expected if home life is limited to the four walls of an apartment. The child seeks outside interests and in many cases becomes a victim of the wrong kind of associates.

Usually the home life is no higher than the level of the surrounding neighborhood. How necessary, then, it is to build in a community where every precaution has been taken to assure a high class of neighbors and recreational facilities that are clean and near the home. It is important that parents recognize the existence of behavior problems in the home, the school and in the community and that recreational developments must be planned to deal with the conduct disorders of its youthful members with special emphasis on preventive work.

Issues Between Fundamentalism and Modernism Are Vital and Clear

By REV. JOHN ROACH STRATON, New York.

Modernists, rationalists and so-called liberals do not concede any external religious authority, but say the final authority is in the individual consciousness. Every man, they say, is conscience-bound to obey only the inner voice. This conception, when logically followed out, leads inevitably to religious anarchy. It flows out of the evolutionary philosophy, which is the real foundation of modernism.

Modern educational principles flowing from the false teachings of Freud and others, which carry with them the exalting of the individual judgment as the real seat of authority are what are doing most of the mischief today. The foolish idea is given to our children that they can cut loose from the teachings and traditions, restraints and inspirations of the past and do as they please in their so-called "search for truth," "quest for reality," "self-expression," "personal right to happiness," etc. The motto today seems to be "Nothing old is true and nothing new is false."

AMERICAN IDEALS

That there is growing sentiment in this nation against unnecessarily high taxes, the constant passage of innumerable laws and ordinances, the establishment of new boards,bureaus and commissions and extension of government control over the individual and private business, is evidenced by comment appearing all over the country.

At recent elections the people cast a decided "No" vote against measures which pile up expense or restrict individual activity. Editorial comment on the situation is widespread. Public officials openly express opinions on the subject which would have been deemed political suicide a few years ago. The underlying thought seems to be that there has been a tendency to drift away from our original form of government which gave us the spiritual and individual freedom that made possible our enormous material prosperity. Commenting on the situation, Collier's magazine says:

"Not many people believed in the creed written by Thomas Jefferson 151 years ago. His principles became the ferment that for good or evil made us what we are. The rules of conduct laid down by the idealistic Virginian form a doctrine which cannot be forgotten or ignored. They are simple and but two in number:

"1. All men are created equal and are endowed with inalienable rights to life, liberty and pursuit of happiness.

"2. Governments derive their just powers from the consent of the governed.'

Brief and plain, but all the libraries of political philosophy could have said nothing more moving. The importance of the initiative you show cannot be underestimated, but bigger than any man is the America which liberates every child to go as far as his native talents will carry him. A century and a half have demonstrated the worth of freedom to us and to our country."

DEVIL DOGS

The United States Marines are sometimes called "Devil Dogs" and take great pride in this nickname. Brigadier-General Smedley Butler, who has long been famous as a marine officer is the same man who tried to suppress crime and bootlegging in Philadelphia. He is now at the head of the United States Marines in China. The China Press has reached Washington and it contains articles concerning the review of marines by General Butler. This Chinese paper said:

"Came then the first batallion, every button glistening, uniforms polished to immaculate cleanliness, bayonets shining and 'tin hats' newly Duced. Following—the color guard; then the machine gun units, the second battalion, machine guns and other regimental detachments."

General Butler is quoted as saying: "I have never seen a finer regiment. I have never seen 2,000 cleaner, finer men, presenting a better appearance, than these boys."

THE THEATRE

Palace—The screen version of one of the most popular romantic action novels in recent years, "Beau Geste" will make its first appearance here on Saturday and Sunday. This thrilling story of romance, mystery and adventure in the French Legion with the theme of the devotion of three brothers powerfully depicted, has been transferred to the screen on a scale never surpassed by any previous production. For the filming of this novel, the director led an army of 2,000 men into the Great American Desert for months during which the exterior scenes were made. The smallest part in the picture was filled with the same care that was given to casting the featured roles.

Ronald Colman plays the title part,that of the eldest of three brothers who each leave home without telling the others, to enlist in the French Foreign Legion under assumed names in order to shield each other for the blame for the theft of a famous sapphire.

Purely American Bird

The humming bird is found only on the American continent. It is closely allied to the swift, and there are several hundred species native from Labrador to Patagonia. The humming bird does not exactly move backward, but by the use of the pectoral muscles of the wing beats the air with a rapidity which enables the bird to remain stationary and to make such darting movements that apparently the flight may be backward.

Decatur's Victory

On March 3, 1815, war was declared on Algiers. Commodore Stephen Decatur was in command of a squadron of ten warships sent to the Mediterranean. The bey of Algiers, after a bombardment, surrendered on June 30.

How to Torture Tourist

The Maid—Yes, sir, your suitcase looked so untidy with all those old labels on it from Japan and America and Egypt and Africa that I thought I'd clean them all off.—The Passing Show.

Communication

Uncle George has a Queer Coincidence.

A queer coincidence happened this morning. I have a business transaction to perform today which may possibly be unpleasant, and as I was thinking to it,or how to proceed and what to say,I picked up my little book 'Daily Strength for Daily Needs" which I have been reading for about 45 years. I turned to August and there read as follows:

"Be not hasty in thy spirit to be angry; for anger resteth in the bosom of fools."—Eccles. VII 9.

"Let not the sun go down upon your wrath."—Eph. IV 26.

"When thou are offended or annoyed by others, suffer not thy thoughts to dwell thereon, or on anything relating to them. For example: 'that they ought not so to have treated them, who they are, or whom they think themselves to be,' or the like: for all this is fuel and kindling of wrath, anger and hatred."—L. Scupoli.

"Struggle diligent against your impatience, and strive to be amiable and gentle, in season and out of season, towards everyone, however much they may cry or annoy you, and be sure God will bless your efforts."—Francis DeSales.

While the business end of the transaction was not all that it should have been, the interview was sufficient to show me that the morning lesson was well filed with good—as has been those of preceding years.

To be able to possess my soul with patience on occasions of this kind is accomplishing much. You will observe that I have said nothing about concrete results this time. Well, it is not necessary for there is not a man, woman or child in the county who does not know that they are the best, and the cheapest in the long run and also that they should be built, but there is still another road which everyone is traveling, to which little or no attention is being paid until they run up against a snag or something as I have.

This lesson does not belong to any church or creed. It is only a commonsense every day business proposition. None are so good that they can afford to turn it down and none so bad who would not be made better for reading it, even if only momentarily.

The bible tells us that the Kingdom of Heaven is within you and every good you do is a taste of it. Sincerely yours,

UNCLE GEORGE.

Hard to Stop Cock Fights

How to clear the Philippines of the increasing number of cock fights is a problem puzzling those who wish to stop the sport that is now flourishing in many parts of the islands. One plan recently advanced is to introduce counter sports to draw the interest of the young from the cockpits. Those who have investigated say that cock fighting is the only form of amusement in the rural communities, and that those who follow it do not do so for the sake of gambling so much as for the association with other men, and that the cockpit is really the community club.

Defect in Mental Tests

Doctor Binet, the French psychologist, is called the father of intelligence tests, now so much in vogue in American schools and colleges. Binet, after prolonged experiments, is quoted as having cautioned educators that tests are never absolute and cannot be wholly depended upon to give a pupil's true mental rating. Teachers, he urged in effect, should rely to a large extent on their own judgment, using intelligence tests not as a crutch but rather as a convenient guide of departure in any effort to help youth find itself.

WANT COLUMN

FOR SALE—30 ft Cruiser in good condition; mahogany finish. Apply to Sam Hamilton, Belvedere ave., Charlevoix.

FOR SALE CHEAP—Ford Coach, late 1926 model. For particulars call at Sentinel Office.

FOR SALE—Six room house on Antrim street, No. 404. Enquire of F. S. Myers. tf

ANTIQUES—Bought and sold. Write or phone Miss S. Dawson,1228 State St., Phone 164-R, Charlevoix, Mich. July 7-21-Aug. 4

Well-Known Constellation

The Southern cross is a brilliant group of stars in the southern hemisphere, first reckoned a constellation in 1679. The four principal stars form a sort of cross. The upper and lower stars serve to indicate the south pole. It cannot be seen in the northern hemisphere except from very near the equator.

Named From Bird

Halcyon days mean a calm peaceful time. Halcyon is the ancient Greek name for the kingfisher. This bird was reputed to build its nest upon the sea, and by and bateh its eggs during 14 days, about December 21. The sea was said to be calm during this period. Hence were halcyon days.

$100,000 in Prizes for Michigan's best

Bigger and better than ever before the Michigan State Fair of 1927 offers thousands of prizes for the BEST in hundreds of different classifications.

There are prizes for cattle, for produce, for horses, for pets, for poultry, for horticulture, for floriculture—for needlework, for preserves and even for babies. Cash prizes, trophies and blue ribbons. Prizes for almost everything and every prize worth competing for. Applications pouring in daily. If you have not already done so send in at once for the Premium List and note the prizes you may win.

And save the days Sept. 5 to 10 to see this great spectacle: horse races, exhibitions, fireworks, auto races, six different bands, contests, free shows, novelties by the score and new and unusual Midway attractions. Big auto show and special features daily. The biggest Michigan fair ever—one you'll never forget!

Special trains. Auto routes specially marked to avoid Detroit traffic congestion.

MICHIGAN STATE FAIR

DETROIT-SEPTEMBER 5-10

Local and Personal Mention

E. N. Foster of Bellaire, was a business visitor here last Friday.

Hugh Boyle of St. James, is spending a few days here on business.

George A. Sanford of Bellaire, was a business visitor in Charlevoix Monday.

Mr. and Mrs. William Stringer of Detroit arrived in the city Thursday to visit Miss Maggie Colter.

Mr. and Mrs. Irving Hallett and family, of French Lick, are spending a vacation with relatives here.

Mrs. George Wantz and two children, of Indianapolis, are visiting the former's parents, Dr. and Mrs. R. B. Armstrong.

Harry Alcox and Sam King motored up from Chicago and will spend a two weeks vacation with relatives and friends in this city.

Mr. and Mrs. John T. Scofield of Flint arrived in this city Monday, where they expect to remain during the month of August.

Mr. and Mrs. Harry Olmstead, of Lansing, are spending a ten day vacation with relatives and friends in Charlevoix and vicinity.

Mrs. Carrie Farrar, for some weeks past a guest of Mr. and Mrs. R. N. Faulkner, returned to her home, Cadillac, last Saturday.

Mrs. Frank A. Kenyon returned to Mackinac Island last Tuesday after spending the early part of the week with relatives here.

Miss Kathryn Bergen, Mrs. Adeline Kerr and Miss Marie Seiwert arrived here Tuesday from Chicago, being passengers on the Manitou.

Miss Emily Maude Hooper, who for some days past has been visiting her sister, Mrs. W. W. Mitchell, returned to her home, Alma, today.

Miss Elizabeth Higman returned to Frankfort last monday after spending the week-end here with her parents, Mr. and Mrs. William Higman.

Mrs. Irving Leventon, Mrs. Ira A. Adams and Miss Virginia Parker motored to Frankfort last Monday and spent the day with friends at Camp Ossha.

Mrs. William E. Wright is entertaining Mrs. Edward R. Litsinger and Miss Edewina Litsinger, Chicago friends, at her home on Clinton street last Sunday, accompanied by her sister, Mrs. Frank A. Kenyon.

Donald Emery, for some weeks past in the employ of Fred S. Myers, has retired from the position held in the store and will engage in other work for the balance of the season.

Due to high wind and unusually rough weather the S. S. Sanford did not make the trip to St. James last Monday, but returned to this port after making an effort to negotiate the route.

Mrs. E. W. Baumgardner, is entertaining four guests over the week end at her cottage, 201 Burns street, Mesdames Watt, Coglin, Plumbach and Radcliffe,who arrived from Toledo this morning.

Lawrence Ackert, accompanied by his wife and son, Larry, of Milwaukee, are guests of Mr. and Mrs. John M. Ackert, 933 State street, for a visit and a two weeks' vacation from business cares.

Mrs. Karl Kohler and son, of Springfield, Ohio, with Mr. Kohlers' mother, of Boston, arrived here Tuesday and will spend the next few weeks here as guests of the former's mother, Mrs. L. B. Bartlett.

Miss Elizabeth Harris of Oak Park, Ill, recently a guest of friends at Marquette arrived in this city last Saturday and will spend the next few weeks with Charlevoix friends and at the Harris cottage near Ironton.

Several Charlevoix citizens motored to Old Mission and visited various points on the peninsula last Sunday. Included in the number were: Mr. and Mrs. W. E. Parmelee, Mr. and Mrs. Frank F. Bird and Mr. and Mrs. Charles Jeffery.

There will be a Spiritualist lecture at Moose hall Thursday evening, Aug. 4th, at 7:30, by Rev. Percy Caspenline, followed by messages by Mrs. Spaulding, both of Grand Rapids. All questions answered by L. D. Parent of Saginaw.. All welcome.

Hon. Andrew B. Dougherty of Lansing, was a visitor in the city Friday accompanied by his sister and niece, Miss American, the latter of Chicago. Mr. and Miss Dougherty were formerly residents of Charlevoix and have many friends in this region.

Franklin C. Sears attended a meeting of the Michigan Black Fox Breeders' Association, held in Traverse City Wednesday. He was accompanied on the trip by his mother, Mrs. Frank M. Sears, and sister, Miss Marion, who spent the day with friends.

The Charlevoix Circus and Horse Show will take place this afternoon at 3 o'clock, at the camp site near Ironton. The circus will include performances by trained Indian dances, Arabian desert scenes, athletics and tumbling, clowns, sideshows and many other features. No charge will be made for the circus.

Frost did some damage to crops in Muskegon and Oceana counties last Monday night, according to reports received from that region, causing considerable damage to corn, peas beans, etc; particularly plantings on low ground and making for a heavy financial loss to growers."

The "Cobie" and "The Eagles' Nest," two fine cottages, the first owned by Mr. Orphis C. Avans of Chicago, and the second by Mrs. J.G. Trimble of St. Joseph, Mo., located on the Bay View Resort, together with the contents of the cottages, were totally destroyed by fire last Tuesday morning.

Mr. and Mrs. William Higman and family, accompanied by Miss Mable Turpin, motored to Mrs. Mattson's camp on Crystal Lake, "Camp Ossha of the Dunes," Sunday to spend the day with their daughter, Miss Elizabeth Higman. Miss Elizabeth returned to the city with them, returning to camp early Monday morning.

Mrs. Edward E. Allen, for some days past a vacation motorist, making a trip to and from the south part of the state, returned to Charlevoix two or three days ago. When in Detroit she visited her sister, Mrs. Clarence Rieke, and also enjoyed an extensive trip to "Bob-Lo" Island with Keystone chapter No. 52, O. E. S.

Mr. A. J. Gibson, for upwards of a quarter of a century a resident of Central Lake, and for the past few years postmaster in that village, died last Tuesday, his death being preceded by a long and continuous illness. For some weeks and until recently Mr. Gibson was a patient in the Charlevoix hospital. He was 68 years of age.

Don C. Gaffney met with a heavy financial loss due to fire which ruined his general home and stock Wednesday noon of last week at Charlotte. The fire was well advanced and burning fiercely when first discovered, giving but little opportunity to save either the structure or its contents. Mr. Gaffney is a son-in-law of Captain and Mrs. George W. Weaver.

A message received here last Thursday night carried information to Mr. O. S. Richardson that his sister, Mrs. William Wilmington, fifty-two years of age, had passed away at her home in Toledo, Ohio, her death being due to an incurable and malignant throat ailment from which she has been troubled for some months. She is survived by one sister, Mrs. Jane Pennock of Harbor Springs and two brothers, O. S. Richardson of Charlevoix and Charles Richardson of Toledo. The body was taken to Harbor Springs where funeral service was held and interment made

Snow scenes, which for sheer beauty have rarely, if ever, been equalled on the screen, are said to be a dominant feature of Adolphe Menjou's latest comedy-drama "Service for Ladies" which will be at the Palace theatre next Wednesday and Thursday. Winter sports in the Swiss Alps afford the background for an intensely human story of the romance of a Lead waiter and his love for an American heiress. Of course, the fact that he is a head waiter, even though such a position carries much more dignity in Europe than it does over here, complicates the love affair and thereby lies the story.

Ask for Sugar Puff Waffles at ice cream parlors. 15-3t

Get Cleaners Naptha at North Side Service Station, Petoskey avenue.

New Palace Theatre

ATTRACTIONS FOR THE WEEK

Saturday and Sunday, Aug. 6-7

Wednesday and Thursday, Aug. 10-11

"THE RUNAWAY EXPRESS," with Tom O'Brien. Sensational railroad story, "The Nerve of Foley." Extra—Fox comedy, "It's a Pipe."

THE PARK AVENUE CLUB

On the Bluff Overlooking Lake Michigan

No. 209 PARK AVENUE

Dinners and Luncheons — *Meals by Day or Week*

Special Attention to Steak Dinners

MRS. E. REINHOLD, Manager

Warren Corning, who assisted in the rescue work when the excursion steamer Favorite foundered during a gale in Lake Michigan near the Chicago Municipal pier last Thursday, causing the loss of at least twenty-seven lives, is well known throughout this region and has been a frequent Charlevoix visitor in past years. Mr. Corning was with a party of friends aboard the yacht Doris near the scene of the disaster and rendered valuable assistance in the rescue work as soon as the gale, which lasted but a few minutes, subsided to a point where they could approach the sunken boat with safety. The yacht Doris owned by William A. Hoffman is also seen in this port, usually making trips to Charlevoix during each summer season.

HOLY CITY SCENES ODD TO WESTERNER

Visitor Must Remember It Is an Oriental Town.

The first impression which Jerusalem gives the visitor depends not largely on the visitor's previous familiarity with oriental towns. If he comes from the East he will find many customs and here for the first time looks upon the East he will find many strange sights, sounds and smells to which to adjust himself. Some will shock him.

The uncleanliness, the negligence of sanitation, the existence of filth and vermin as a matter of course; the appalling poverty, blindness and disease; these are the sights, sounds, figures that bestrew the streets; the shameless beggary, aided by all the fifty-and-one artifices that can be devised; the bizarre marks of racial and religious distinction, such as the straggling, unkept forelocks of the Polish Jews or the knotted-back hair of the Greek priests —scores of such things will smite his eyes and nose.

If he is incapable of overpassing these strangenesses he may as well return where he can feel the congenial familiarity of Broadway or the boulevards of Main street anywhere. If, however, he has learned to look with generous eyes on all sorts and conditions of men he soon will see light upon Jerusalem. The conditions as to sanitation are infinitely better under British rule than they have ever been before, and they are constantly improving. Anyway, the idea that cleanliness is next to godliness is western; in a country like Palestine where, even in Jerusalem, there is barely enough water to drink, it is a bit absurd; and admirable personalities can develop under conditions where such an idea is as yet an unnaturalized alien.

As for happiness, there is probably as much per capita in Jerusalem, or even in these poverty-stricken, mud-brick Arab villages, with all their squalor, as there is in the city of New York.

In the end even the traveler who at first is shocked discovers the real Jerusalem. Its narrow, winding, climbing streets; its thronged bazaars packed along the traffic ways or crowded under colonnades built by Crusaders to house pilgrims; its endless riot of color in costumes that represent many faiths and races; its fascinating kaleidoscope of strange faces, strange animals, strange clothes and strange accents—all these fill the eye until the Strand or Fifth Avenue seems by contrast very dull, drab, standardized and monotonous.—Dr. Harry Emerson Fosdick in the Ladies' Home Journal.

On the Watch!

A bank in Portland, Maine, has applied the well known principles of the periscope for the protection of its underground vaults. A long tube has been built into the outer wall of the building, one end of it terminating in a mirror facing the door of a big safe down in the vault, and the other in a similar mirror at shoulder level above the street. A policeman or other guard, patrolling the sidewalk in front of the bank, peers occasionally through a secret peephole in the side of the building, so that he can observe the whole scene in the cellar vault, explains Science and Invention Magazine.

Electric lamps and reflectors illuminate the vault so that the policeman above can see everything clearly. Any obstruction placed in front of the mirror in the cellar immediately betrays the presence of intruders.

Bacteria in the Movies

Deadly bacteria took their turn as movie actors in amazing films recently exhibited by Dr. H. J. Oerstenberger of Cleveland. "Child light," developed expressly for this form of microphotography, made possible his remarkable pictures, according to Popular Science Monthly.

Motion pictures of bacteria hitherto have been impossible because the intense heat of the ordinary moving picture light source instantly killed all germs in its path. In taking the new pictures, a current of ice water was arranged to flow beneath the glass slide bearing the living bacteria, to filter out the heat from the powerful light.

Big Event

Harry Pollard, who is directing "Uncle Tom's Cabin," had called for several hundred colored people for one of his big scenes. When the time for shooting arrived, only half a dozen darkies had put in an appearance.

"Where's the rest of the bunch," asked the perturbed director.

"Reckon doy couldn't resist goin' to dat big dance we done heered about," said Rastus uneasily.

"What dance? Where is it?"

"Ah don't jes perzactly know, but we done heered two trains was goine to Charleston."—Los Angeles Times.

Buried in Loved Flag

In Hallock's life of Stonewall Jackson, the following statement appears: "It (the body) was enveloped in the new flag of the Confederacy and the first use that was ever made of it was thus to enwrap the remains of the departed chieftain."

Club Boys Keep Farm Accounts

Organization Has Proved Quite a Success in County.

(Prepared by the United States Department of Agriculture.)

The organization of a junior farm accounts club among the older farm club boys in Tillamook county, Oregon proved a successful solution for the problem of stimulating the interest of those boys, who have already completed several years of club work in other lines. The state farm management demonstrator co-operated with the county club agent, and all members except one have now finished a year's work, according to a report received by the United States Department of Agriculture.

A boat builder was found as leader, and only boys over fourteen, with three years' club experience, were accepted for membership. The program included making a plan of the layout of the farm buildings and fields, the question of depreciation and how it is recorded in farm accounts, profitable practices in connection with the management of a dairy farm, and banking and business methods. "How I took my farm inventory," "Making the farm layout," "Cost of producing a heifer from birth to two years of age," and "What we expect to learn from keeping our farm records," are typical subjects presented by demonstration teams from club to club at the state fair and at the annual meetings of bankers' associations. A tour was arranged by means of which the club members could see different farm layouts and observe certain recommended practices profitable in dairying.

Tree Bark Beetles Are Menace in the Orchard

Fruit tree bark beetles are worse on trees which are in a weak condition due to low fertility or damage from some other insect or disease.

One of the best methods of combating the beetles is to put the trees into vigorous condition by means of good cultivation,fertilization and spraying for other insects and diseases. All dead and diseased wood should be pruned out and burned. Trees that are in vigorous condition are rarely infested seriously by fruit tree bark beetles. In the event that infestation has become unusually severe, the trees should first be cut back severely and then fertilized and cultivated liberally. Such treatment will stimulate growth and help the trees to overcome the damage. A thick coat of good whitewash, to which is added a handful of table salt to each bucketful of wash, should be applied at least three times during the season, once in the early spring, once in midsummer and once in the fall. This wash will practically prevent the laying of additional eggs.

Do Not Overstock Early Native Grass Pastures

Do not be in a hurry to turn the cows out on native pasture. There isn't enough grass on most farms now to supply even one cow and the whole herd will do more harm in trampling over the soft pasture than is usually estimated. The man who does not pasture early nor overstock the native grass usually gets more pasture per season than through any other system. Secondly, the cow that gets a very little taste of pasture this time of year is likely to get very little else. A good milk cow cannot keep up her milk flow on early April native pasture without other feed being fed. The farmer with sweet clover pasture has none of the above difficulties.

FARM FACTS

Fertilize small fruits in the spring before they blossom.

A little oil and grease now may save a lot of sweat later.

At a cost of half a cent an acre sorghum seed can be treated by the copper carbonate method. This treatment is certain to prevent smut.

Chicks need green feed and especially do they need it when white instead of yellow corn is fed in the ration. White corn contains no vitamin, but green feed does.

Baby chicks need no feed for the first 24 hours of their life. And during time they must be carefully fed and tended if a large percentage of the chick crop is to be saved.

The beef cattle man, for many years the most picked on of farmers, is looking happy again with the increased prices for all classes of beef stock and with even better prices in prospect.

As a rule when the majority are disgusted with a business it is a good time to buy, but when most of the farmers are declaring that prices never again will be low—then it is a good time to sell.

Do not turn the cows out to pasture too early. Pastures are injured by the trampling of the cattle when the ground is soft. Better wait until the grass is well started before opening the pasture gate.

Mustard as Emetic

Mustard and water is an easy and mild emetic. A little mustard rubbed on the hands will at once remove all smell of fish. To obtain the full flavor of mustard it should be mixed with a little salt and milk.

Immense Lava Deposit

In the northwestern part of the United States there is an area of almost 200,000 square miles of solid lava due to prehistoric volcanic eruptions.

CHURCHES

Congregational Church

Rev. B.G. Mattson, D.D., Minister

Dr. Mattson will invite the congregation to accompany him on a tour of discovery in the Gospels. For August 7th he will explore the Gospel of St. Matthew as a source book for the modern business world. The best available music will be sought from Sunday to Sunday to enrich these summer services of worship which are attended by many visitors of many different church affiliations but who are one in their sincere Christian faith and appreciation of the Christian church.

Sunday school at 9:30 a. m. and the evening service at 7:30.

Ironton service at 2:30.

The repairs and improvements on the Ironton church have been completed with the outside painting and the freshening and painting of the interior. This very attractive rural church building now opens its doors wide to all the region. The church was crowded to capacity last Sunday at the special services conducted by the Sequanota Club in commemoration of the 25th anniversary of the founding of the club. The sermon was by Dr. Settle Vance of Pittsburgh and Sequanota. A generous offering was given to the church.

The next great event will be the re-dedication of the church at a special afternoon service at 2:30 August 14; at which Dr. J. W. Sutherland, superintendent of the Michigan Congregational Conference, and Rev. C. H. Harger, state missionary, will give an address. Another crowded house is assured.

Meantime a crowded house is asked for the coming Sunday to enable us to prepare fittingly for the following Sunday.

Baptist Church

Rev. Herman Burns, D. D., —) Pastor (—

The usual services will be held the coming week. "The pastor will preach Sunday morning at 10:30 and in the evening at 7:30. Bible school at noon and B. Y. P. U. at 6:30 p. m.

O . congregations last Sunday were made large by the presence of many tourists. We bade them welcome in the name of and for Charlevoix. Their attendance at church here marked them as among the worthwhile citizens of their home town. They are the kind we specially desire as visitors, and whose coming is a blessing.

Methodist Church.

C. E. Pollock, Pastor.

Sunday services for August seventh: Church school at 9:30 a. m. Sermon, music, good fellowship at 10:30 a. m. "The Plus Quality," 7:30 p. m. Epworth League, 8:30 p. m.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "Spirit."

Sunday School 12 o'clock.

Wednesday evening service 7:45.

Reading room, Tuesdays and Saturdays, 3 to 5 p. m.

The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church

Sundays 6:30 a. m., and 9:00 a. m.

Wednesday evening and Mondays mass at 7:00 o'clock a. m.

Rev. Fr. Odelo.

Good Manners

"Manners are not idle, but the fruit of loyal nature and of noble mind."—Tennyson.

Save Pennies—Waste Dollars

Some users of printing save pennies by getting inferior work and lose dollars through lack of advertising value in the work they get. Printers as a rule charge very reasonable prices, for none of them get rich although nearly all of them work hard.

Moral: Give your printing to a good printer and save money.

Recalls Tragedy of Allen Family

Virginia Judge and Others Slain by Mountaineers 15 Years Ago.

Charlotte, N. C.—Sidna Allen, one of the group who took part in the Hillsville (Va.) court tragedy 15 years ago, when the presiding judge, the prosecuting attorney, the sheriff and a juror were killed, and for which two of his clan answered the penalty in the electric chair, and who, since his release from the Virginia penitentiary on a conditional pardon, has taken up life residence at Leaksville, is preparing a manuscript of a book which he declares will throw new light on that desperate adventure.

Allen is now engaged in making a tour of North Carolina and adjacent states, giving exhibitions of lifelike woodwork craftsmanship, which vocation he learned while a prisoner in Virginia, the finest example of which is a small table containing 75,000 pieces of wood of 70 varieties, worked together into an intricate pattern of his own designing. The authorities at the penitentiary at Richmond were very kind, he says, securing for him every possible type of wood it was possible to acquire in Virginia. He uses no glues or varnishes. All of the articles are in the natural grain of the wood.

Turns to Religion.

Allen is a modest, retiring man of medium height, about sixty years of age, although he does not appear to be over forty-five. He is intensely religious, and since taking up his residence in Leaksville has been active in church work. He does not like to talk about the tragedy that scattered his people to the four winds, but nevertheless readily answers questions. Allen's friends are insistent that he is innocent of any deliberate intention of taking part in the shooting up of the court. On the one side was the courthouse ring and on the other side the Allen family. Allen claims that the bullet marks on the dead proves that they were killed by wild shots from the courthouse ringside.

Attorney Foster has been in other ever since the recent history of the section which has attracted so much attention as the dramatic gesture of the Allens on March 14, 1912, when, in an effort to release one of their number from the toils of the law, they shot up the Carroll county (Va.) court, and the little courthouse at Hillsville ran red with blood of officials, jurors and bystanders.

Fled Scene of Crime.

The Allens, with the exception of Floyd, the leader, who was injured, and his son, Victor, who remained with him, fled from the scene, three of them remaining at liberty for a long time. A girl was killed in the confusion of the battle on the courthouse lawn.

Judge T. L. Massie and Sheriff I. F. Webb, the high sheriff of Carroll county, fell dead in the first rain of bullets, the judge standing forward in his seat without a word. Augustus Fowler, a juror, received a bullet in the head and expired two days later. Andrew Howlett, another juror, was shot through the chest. Clerk of Court Dexter Goad was wounded in the face. W. M. Foster, commonwealth's attorney, received his death wound, and Stuart Worrell, a juror, was shot through the leg. Miss Elizabeth Ayres, a witness, received a death wound. Sidna Allen got a bullet through the muscles of the arm, which entered his body, but it was not serious. Floyd Allen received a bullet in his knee.

The beginning of the trouble dates back to May, 1911, when Garland Allen, one of several brothers, who was a Primitive Baptist preacher, went to the door of his meeting house to quell a disturbance in his yard. He found a party of his nephews, Wesley and Sidna Edwards, among the trouble makers. He was hit with a stone said to have been thrown by one of these boys. Papers were served on the Edwards brothers, accusing them of disturbing public worship. They left Virginia, going to Mount Airy, which is just across the line in this state, where they secured employment. They were later arrested and turned over to the Virginia authorities. As the officer in charge attempted to cross over the mountains with his prisoners he was attacked, allegedly by Floyd Allen, and the youths released, while the officer was beaten over the head with the butt of a revolver. The boys were later recaptured, tried and made to serve six months.

In the sensational charges were preferred against Floyd Allen for interfering with an officer in the discharge of his duty. He was scheduled to be heard at Hillsville, March 15, 1912.

Judge Instructs Jury.

In charging the jury Judge Massie admonished them that it was their duty, not only to say whether or not the accused was guilty but to fix the penalty, which, under the law of the state of Virginia, could not be more than five years nor less than one year for this offense. The report of the jury was to be made on the morning of March 14. Court convened at eight o'clock. The little courthouse was packed. Allen relatives and sympathizers were present in large numbers.

There was a tenseness in the air many had predicted that there would be trouble. It was known that Floyd Allen had said that he would "die and go to h—l" rather than that any of his blood should go behind the bars. Judge Massie had been warned that the Allens might attempt to release Floyd if he was convicted. He had been requested to search all members of the Allen clan attending the trial. Attorney Foster in alluding to have expressed his conviction that it was his last day on earth. Perhaps it did. At those present the presiding judge was the only person without a feeling of fear. He had sentenced other so-called desperate men. There was no quiver in his demeanor as he announced the verdict on that memorable morning.

The Shooting Begins.

After two verdict had been rendered, sentencing Floyd Allen to serve a year in the penitentiary, the judge announced the verdict.

"Mr. Sheriff, take charge of your prisoner."

Floyd Allen is said to have leaped to his feet exclaiming:

"You'll never do it, you'll never do it, you'll never do it!" at the same time fumbling in the front of his sweater as though to draw a gun.

Sidna and Claud Allen are said to have drawn weapons in the front of the court officials. At the third exclamation, "you'll never do it," a volley of shots was loosed from all points around the room in the direction of the judge and the bar.

Miss Jemhel Goad became the heroine of the tragedy when she rushed from her place in the clerk's office to the courtroom, and pushed her way through the maddened throng to the side of her father, who looked to be mortally wounded. Blood was running all over his face, but he refused to lie led away to a place of safety. With the sounds of her own danger, the young woman threw herself on one of the desperadoes who was guarding the outer door, shoving and pushing him out of the way so that the terror-stricken people might escape. She then seized a pistol from the hands of one of the gangsters, with the help of a man who had come to her aid, and herself took part in the balance of the fighting.

By the time the crowd reached the lawn the Allens were there also, shooting at the fleeing jurymen. They reloaded their weapons on the lawn, and as the others reached places of safety the firing was turned back toward the courthouse steps, where Dexter Goad then stood. In this outdoor fighting Goad received a bullet in the thigh. It was here that Miss Ayres was killed. Sidna Allen also received his wound at this stage of the fighting, but he was not incapacitated.

Think Floyd Wore Breastplate.

Many thought that Floyd Allen wore a steel breastplate, but none was found on him when he was arrested. It was generally claimed at the time that four bullets had struck him in the breast without effect. Floyd Allen, quick-tempered and quick on the trigger, on this occasion struck his in the knee. The Allens retreated to a livery stable, where they had left their horses. Here Floyd became very sick, and was unable to mount. They left him with his son, Victor, a quiet, peaceable sort of fellow, who was not supposed to have participated in the fighting. Floyd and Victor were arrested at a hotel at Hillsville, where the elder son had been taken for treatment. They were removed to the jail at Roanoke.

They delighted to tell the story of a fight he had with his brother, Jack, years before, when they both fell at the first shot from the other's weapon, continuing to fight as they lay on the ground. Five of the thirteen or more bullets in Floyd Allen's body were planted there by his brother, Jack. Each of them swung very near to the other world, but both were restored to health and strength again.

Such was the life these people lived, and yet they were men with more than average education, and with more property than the average mountaineer. They were kind and clever in their dealings with their friends, honorable in matters of debt. They were no cabin mountaineers. Sidna Allen's home was worth approximately $20,000. It was covered with slate and equipped with water and sewerage systems and acetylene lights.

Here's How Drowning Deaf Mutes Call Aid

Delaware, Wis.—How does a deaf and dumb drowning person call for help?

"By calling 'oohs, oohs'," says Miss Helen M. Kent, physical director of the North Carolina state school for deaf and dumb, who has been attending the Red Cross life-saving institute at Lake Lawn, Delavan, Wis.

"Of course," Miss Kent explains, "almost all of the so-called deaf and dumb persons are able to hear a little, and can make themselves heard. They have a keenly developed vision, and are always on the alert for water accidents. But they have no fear of the water at all, simply because they are not told of deaths due to drowning."

THIEF STUDIES AS HOTEL CLERK TO PLUNDER GUESTS

Hollander Becomes Favorite as Attendant in Paris While Learning Habits of Patrons.

Paris.—The use of a hotel clerkship as a school for thievery is one of the latest novelties of the underworld of Paris, and it occurred in one of the foremost hotels of this city. The clerk in question was a Hollander, named Hemming, who assumed the name of Caroline Benner. For some time he performed the duties of the clerkship with much efficiency and grace and was a favorite with most of the guests of the hotel. His salary was a generous one, and he received rich "plums" from guests who appreciated his untiring attentions.

All the time, however, he was diligently studying the guests, their ways and manners, so as to be able to judge of their means and to determine whether they had many jewels or other valuables in their possession, and whether they kept these in their trunks or in their rooms or intrusted them to the safe deposit vault of the hotel.

When at last he felt himself able to feed human nature, he resigned his clerkship and took to stealing from the guests of hotels. In this he was for a time successful, securing much loot and avoiding arrest. One day lately, however, the occupant of the room which he was robbing returned unexpectedly, and the thief crawled under the bed to hide. He was not quite quick enough, however, to escape the eye of the guest, who summoned the police. A wild chase ensued through the corridors and some of the rooms of the hotel, rivaling the fantastic scenes of a motion picture melodrama, which ended with the capture of the thief as he was hiding behind the draperies in the room of an elderly English woman. A sentence to two years in prison was the epilogue to the play.

Fairy Flowers Are Fad Among Women in London

London.—Finding a fairy in flowers is the latest fad of the fashionable woman, and a most charming fad it is. At a West end restaurant a fairy-haired woman in a leaf-green dress displayed an example of the new mode. On her right shoulder she wore a silken mauve orchid, but it wasn't an ordinary orchid at all. In the flower's center was a golden-haired fairyiet, and the stem was the fairy's slim green-clad limbs.

Another example of this fashion was displayed in a pink chiffon frock worn by an American girl at Covent Garden recently at the premiere of "Turandot." On either side of her swathed waistband was a flat flower of palest pink velvet; in the flowers' centers were fine silken beads of fairy dolls with crisp curling golden hair resembling stamens.

Insect Damages Red Clover Crop

Root Borers May Be Killed by Plowing and Harrowing in Summer.

(Prepared by the United States Department of Agriculture.)

The clover root borer, which does extensive damage to red clover wherever that crop is grown, is one of the principal factors limiting the life of a clover stand after the first crop year, says the United States Department of Agriculture. The most noticeable damage is observed in the second-crop year, when the stand may be badly thinned, according to L. P. Rockwood, associate entomologist, in a new bulletin entitled "The Clover Root Borer," just issued by the department. Ily late summer frequently the stand is practically killed out unless there has been abundant rainfall.

Where Eggs Are Laid.

The eggs of the borer are laid in niches in the walls of burrows in the clover roots beginning late in April or May, and hatch in 17 to 20 days. The total development period of the insect is from 30 to 90 days or longer. It spends the entire winter in the roots of the clover where it matures. There is but one generation a year.

Clover root borers can be killed in large numbers by plowing up badly infested clover roots and harrowing them to the surface of the soil at any time between April 15 and June and beginning of August. Many of the borers may be destroyed by plowing and harrowing the clover soon after the seed crop or second cutting of hay. Thorough plowing of clover rotation, together with a general practice of early fall plowing, will, under ordinary conditions, greatly reduce the number of the pests. Clover should not be allowed to stand more than two years in the rotation. It was found that a rotation of corn, wheat, clover two years and timothy one year greatly reduced the number of borers.

Agricultural Facts

Use home-grown plants to avoid bringing in new diseases.

* * *

Keep a sharp lookout for the Mexican bean beetle on your beans.

* * *

Cultivate the garden frequently to save moisture and destroy weeds.

* * *

The first commandment of farming: Thou shalt not let thy land get poor.

* * *

There is no limit to the demand for the best in farm products.

* * *

Start the hog right early and diminish severe injury that would be caused later.

* * *

The use of binder twine in tying a fleece of wool will lower its selling value.

* * *

Don't be afraid to use a drag harrow across the corn rows. It will kill a lot of grass and not hurt the stand.

* * *

On land that is too sour for the common legumes soy beans will grow and produce good yields of hay or grain.

* * *

Have you written your state college of agriculture for its latest bulletins on hay and forage crops for your section? You should have them.

* * *

An increase of 55 bushels of potatoes per acre has been the average difference in a comparison of certified and common seed in 156 demonstrations carried on by the Missouri College of Agriculture.

Handling Alfalfa With Little Loss of Leaves

That the best system for handling alfalfa hay is to put it in the shock south for a few hours and then cure it in the windrow, is a fact discovered by Professor T. A. Kiesselbach and Arthur Anderson, of the Nebraska experiment station. Such a plan insures a favorable rate of curing and the least possible loss of the leaves.

Experiments showed that alfalfa left in the swath until field cured lost nearly 30 per cent in weight through the shattering of the leaves. When cured entirely in the windrow or with three to six hours' additional swath curing, followed by windrowing, the loss in weight through the shattering was only from 1 to 2 per cent.

Tests made to determine how long it would take for alfalfa hay to be reduced to a moisture content of about 20 per cent, which is the upper limit in moisture content at which hay may be put in the stack or barn, brought out facts of interest. These tests showed that when the hay was left to dry in the swath it was ready for windrowing in from one to two hours, which is the newest star in the milinery firmament. They are nothing short of a midsummer sensation, these pasted feather caps, coming in so unexpectedly just as a fashionable clientele had been converted to the wearing of brims of the widest.

Maybe you are one who has always believed that if ever there was a hat brond of brim to interpret the

pictoresque. Catch a fleeting glimpse of one of these new pasted feather toques as worn with fluttering garden party frocks of flowery print and —well it's a woman's privilege to change her mind. As the elite in Paris wears the pastel pasted feather skullcap, it is always in tones to match the frock.

There's another number on the midsummer millinery program which is electing much favor. It is the latest toque of white violets—so called because of the artists models who created it. The moment you look at it as shown in this picture you will not doubt in saying "it's lovely." And so it is; perfectly adorable—made more so because of the huge cluster of matching violets which are always worn with it.

This white violet chapeau lends itself beautifully to the season's all-white ensembles which are so deflective, or exotic flowers, or if your taste runs that way, amusingly symbolistic motifs. And would you believe it, some modern milliens there are who, doting on milaye and pretty underthings, are decorating their straws and their nightdrobes with butterflies, birds and flowers.

If there is one place more than another where bizarre hand painting finds placement it is on the back of one's cootie coat, which, by the way, is extravagantly popular either for boudoir or beach. Students at the art schools, too—what delight they are taking in wearing cootie coats which are enlivened with gay paintings a la chinoise. The picture shows two such pretty coats adorned in this way.

Now that wide ribbons trim so many hats, they are frequently hand painted with garlands of flowers or quaint figures. It is also quite the fashion to have them made on the straw, felt or crochet visca-hat.

THE KITCHEN CABINET

(©, 1927, Western Newspaper Union.)

To him who chooses sacrifice for his fate there often come the best gifts, to see deep into the inscrutable and smilingly to build as though within a pleasure circle, upon the boundary of the ideal.

COMMON FOODS

Our common foods are those which are the oftenest served in a hap-

hazard manner, when they should be served with the greatest care, to make them attractive. The real ingenuity of the cook is shown in the manner she serves all the year.

STORY AND THE STARS

Fleming Stone, famous detective, and his friend Richard Hindway, who tells the story, given an exhibition of his uncanny skill before some of the guests at the Ritz-Carlton, in which they afterward dine and sup, in the tavern. The conversation turns on a mysterious crime, in whose ship, the Black Panther, is involved. The ship is owned by Noel Jeremy Lindsay, after wife and ducks, is sitting in a "blind" when three strangers land on the beach near him. They bury a body, which Lindsay, who is afterward recognized by Lindsay as the man he talked with the day before, kills one of his companions. Lindsay's presence is discovered by Jack Barclay, the wife-beater of the Black Panther. The three go aboard. Lindsay meets there a youth to whom he bears a remarkable resemblance, Stephen Lindsay, who had formerly captured Lindsay's wife, the uncle's plantation in Jamaica. Barclay, the wife-beater, is sent ashore McAllister. Bob is asked to go ashore in his boat, and is killed. Lindsay is asked to take his place. Suiting of clover cuttings, together with a general practice of early fall plowing, will, under ordinary conditions, greatly reduce the number of the pests. Clover should not be allowed to stand more than two years in the rotation. It was found that a rotation of corn, wheat, clover two years and timothy one year greatly reduced the number of borers.

Tailored Chiffon

The new chiffon dresses are exquisitely tailored, with all the little touches that used to belong to heavy materials.

STORY FROM THE START

In the small New Jersey village of Strathmarsh, in the year 1749, Richard Lindsay, who tells the story, gives an exhibition of his marksmanship before some of the guests at the Ritz-Carlton, which, they afterward dine and sup, in the tavern. The conversation turns on a mysterious crime, in whose ship, the Black Panther, is involved. The ship is owned by Noel Jeremy Lindsay, after wife and ducks, is sitting in a "blind" when three strangers land on the beach near him. They bury a body, which Lindsay, who is afterward recognized by Lindsay as the man he talked with the day before, kills one of his companions. Lindsay's presence is discovered by Jack Barclay, the wife-beater of the Black Panther. The three go aboard. Lindsay meets there a youth to whom he bears a remarkable resemblance, Stephen Lindsay, who had formerly captured Lindsay's wife, the uncle's plantation in Jamaica. Barclay, the wife-beater, is sent ashore McAllister. Bob is asked to go ashore in his boat, and is killed. Lindsay is asked to take his place. Suiting of clover cuttings, together with a general practice of early fall plowing, will, under ordinary conditions, greatly reduce the number of the pests. Clover should not be allowed to stand more than two years in the rotation. It was found that a rotation of corn, wheat, clover two years and timothy one year greatly reduced the number of borers.

If there is one place more than another where bizarre hand painting finds placement it is on the back of one's cootie coat, which, by the way, is extravagantly popular either for boudoir or beach. Students at the art schools, too—what delight they are taking in wearing cootie coats which are enlivened with gay paintings a la chinoise. The picture shows two such pretty coats adorned in this way.

Now that wide ribbons trim so many hats, they are frequently hand painted with garlands of flowers or quaint figures. It is also quite the fashion to have them made on the straw, felt or crochet visca-hat.

JULIA BOTTOMLEY.

New Colors

"Mexico-tint harmonies" is what the new compose colors are called. Pinks tint into soft creams, orchids into blues, greens into tea-rose yellows and so on. Chiffons, georgettes and voiles usually exemplify the new shades.

Tulle Dance Frocks

Tulle frocks in pastel shades and in black are much worn by younger women. They are charming dance frocks and are usually made with tight waists and full ruffled skirts.

Tailored Chiffon

The new chiffon dresses are exquisitely tailored, with all the little touches that used to belong to heavy materials.

Famous Racing Meet

Derby is the name of the famous horse race of one and a half miles, run at Epsom, England, usually on the last Wednesday in May but sometimes on June 1. It is named after Lord Derby, who instituted it in 1780.

"Be Yourself"

It is the vain endeavor to make ourselves what we are not that has strewn history with so many broken purposes and lives left in the rough. —James Russell Lowell.

STORY FROM THE START

In the small New Jersey village of Strathmarsh, in the year 1749, Richard Lindsay, who tells the story, gives an exhibition of his marksmanship before some of the guests at the Ritz-Carlton, which, they afterward dine and sup, in the tavern. The conversation turns on a mysterious crime, in whose ship, the Black Panther, is involved. The ship is owned by Noel Jeremy Lindsay, after wife and ducks, is sitting in a "blind" when three strangers land on the beach near him. They bury a body, which Lindsay, who is afterward recognized by Lindsay as the man he talked with the day before, kills one of his companions. Lindsay's presence is discovered by Jack Barclay, the wife-beater of the Black Panther. The three go aboard. Lindsay meets there a youth to whom he bears a remarkable resemblance, Stephen Lindsay, who had formerly captured Lindsay's wife, the uncle's plantation in Jamaica. Barclay, the wife-beater, is sent ashore McAllister. Bob is asked to go ashore in his boat, and is killed. Lindsay is asked to take his place. Suiting of clover cuttings, together with a general practice of early fall plowing, will, under ordinary conditions, greatly reduce the number of the pests. Clover should not be allowed to stand more than two years in the rotation. It was found that a rotation of corn, wheat, clover two years and timothy one year greatly reduced the number of borers.

If there is one place more than another where bizarre hand painting finds placement it is on the back of one's cootie coat, which, by the way, is extravagantly popular either for boudoir or beach. Students at the art schools, too—what delight they are taking in wearing cootie coats which are enlivened with gay paintings a la chinoise. The picture shows two such pretty coats adorned in this way.

Now that wide ribbons trim so many hats, they are frequently hand painted with garlands of flowers or quaint figures. It is also quite the fashion to have them made on the straw, felt or crochet visca-hat.

VAUDEVILLE OF THE BETTER CLASS BETWEEN ACTS. BOTH PLAY AND VAUDEVILLE CHANGED NIGHTLY.

Bring your Wife, Mother, Sweetheart and the Children.

Doors Open at 7:30—Curtain at 8:20 sharp.

JACK MULHALL IN "THE POOR NUT," PALACE

Jack Mulhall comes to the Palace theatre Saturday and Sunday in an entirely new characterization. Jack has been the smiling Irish lad and the tough "egg" in so many pictures that the fans will hardly recognize him in "The Poor Nut," his latest.

In this story of college life, Jack plays the part of a student who suffers from an "inferiority complex" that gives him the title of the "poor nut." Through the influence of a beautiful girl and his ability to run on the cinder path Jack gains his proper equilibrium and becomes the idol there.

Charlie Murray in the role of an athletic trainer lends a big along to splendid shape with the comedy, as do Jane Winton and Jean Arthur, the two principal feminine players in the cast.

That Settled It

Mrs. MacMasters was in a quandary. A pair of Russian calf and a pair of elegant shoes looked equally attractive, and as there was no difference in either the fit or the price the poor woman did not know which to choose.

For a long time she hesitated, wavering between the two kinds of footwear. Then she turned to her husband with the question.

"Well, mither," he answered cautiously, "if ye choose yon Russians ye'll aye be buyin' bleckin'."—London Answers.

Caught

"No such a thing!" retorted Mrs. Johnson. "You wasn't there a-tall. You're just telling me another whopper, no you are!"

"Hush!" sourly returned Gap Johnson of Rumpus Ridge. "Whist's the use of arguing a body excuse on a feller's wife, nayhow?"—Kansas City Star.

Earth's Ittlera Come First

When village babies other arts follow. Tree farmers, therefore, are the founders of civilization.—Daniel Webster.

LEGAL NOTICES

MORTGAGE SALE

DEFAULT having been made in the conditions of a certain mortgage executed by Martha J. Ayers of Charlevoix, Michigan, to Frederick W. Mayne of Charlevoix, Michigan, dated the 29th day of May, 1922, and recorded in the office of and the Register of Deeds for Charlevoix County, Michigan, on the 29th day, of May, 1922, in liber 56 of mortgages on page 35, which mortgage was afterwards sold, assigned and transferred by Charlotte A. Mayne, as Administratrix of the Estate of Frederick W. Mayne, deceased, unto Charlotte A. Mayne of Charlevoix, Michigan, by assignment of mortgage dated June 20th, 1925, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, June 27th, 1925, in liber 50 of Deeds on page 414, on which mortgage there is claimed to be due at date of this notice the sum of NINE HUNDRED TWENTY AND 65-100 DOLLARS, including the principal sum due with interest, together with an attorney fee of thirty five dollars as provided for by the said mortgage, and no suit or proceeding at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas, the taxes required by the statutes to be paid on said mortgage were duly paid prior to the recording thereof, now therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by the said mortgage, at public auction, to the highest bidder therefor, at the front door of the Court House in the City of Charlevoix, Charlevoix County, Michigan, (that being the place where the Circuit Court for the County of Charlevoix is held), on Saturday, the 29th day of October, 1927, at TEN o'clock in the forenoon on that date.

The premises covered in said mortgage being the lands, premises and property situated in the City of Charlevoix, County of Charlevoix and State of Michigan, described as follows, to-wit: Lots Seventy-eight, Seventy-nine and the East ten feet of Lot Seventy-seven of Upright and Hurlbut's Addition to the Village (now City) of Charlevoix, Michigan.

Dated August 3rd, 1927.

Charlotte A. Mayne,
Assignee of Mortgage.

Lisle Shanahan, Attorney for Assignee of Mortgage. 108 Clinton Street, Charlevoix, Michigan. 15-12t

STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the City of Charlevoix in said county, on the 27th day of July, A.D. 1927.

Present: Honorable Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of Hiram Van Dorn Rifenburg, mentally incompetent.

Samuel Alexander, having filed in said court his final administration account, and his petition praying for the allowance thereof and for his discharge,

It is Ordered, That the 18th day of Aug., A.D. 1927, at ten o'clock in the forenoon, at said Probate office, be and is hereby appointed for examining and allowing said account and hearing said petition;

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, once each week for three successive weeks previous to said day of hearing, in the Charlevoix Sentinel a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
14-3t Judge of Probate.

STATE OF MICHIGAN—The Circuit Court for the County of Charlevoix.

In Chancery.

Nina Bugbey, by William Bowman, her next friend, Plaintiff.

vs.

Frank Bugbey, Defendant.

Order for Publication—Defendant's Residence Unknown.

Suit pending in the Circuit Court for Charlevoix county, in Chancery, on the 22nd day of May, A.D. 1927, at the City of Charlevoix, in said county.

It satisfactorily appearing to the Court by affidavit on file that a chancery summons has been duly issued out of and under the seal of said court, for the appearance of said defendant therein, and that the same could not be served on said defendant because that after diligent search and inquiry it could not be ascertained in what state or county the said defendant resides, or the whereabouts of said defendant learned, and that said chancery summons has been returned by the sheriff of said county with his certificate thereon endorsed that after diligent search and inquiry he was unable to find the said defendant within the state of Michigan on or before the return day of said summons, on motion of Clink & Williams, attorneys for said plaintiff.

It is Ordered, That the said defendant, Frank Hughey, cause his appearance to be entered in this cause within three months after the date of this order, and in case of his appearance that he cause his answer to the plaintiff's bill of complaint to be filed, and a copy thereof served upon the plaintiff's attorneys, within twenty days after service on him of a copy of said bill and notice of this order, and that in default thereof said bill to be taken as confessed by said defendant,

And in like motion, It is Further Ordered, That within twenty days after the date hereof, the plaintiff cause a notice of this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in said county of Charlevoix and that such publication be continued at least once in each week, for six weeks in succession, or that he cause a copy of this order to be personally served upon said defendant, at least twenty days before the time above prescribed for his appearance.

And on like motion, It is Further Ordered, That the said plaintiff cause a copy of this order to be mailed to said defendant, at his last known postoffice address, by registered mail, and a return receipt demanded, at least twenty days before the date herein prescribed for her appearance.

FARM C. GILBERT,
Lisle Shanahan, Circuit Judge

Attorney for the Plaintiff.
Business Address, 108 Clinton Street, Charlevoix, Michigan. 14-6t

Notice of Chancery Sale

STATE OF MICHIGAN—In the Circuit Court for the County of Charlevoix —In Chancery.

Walter S. Baer, as Trustee, Plaintiff vs. Estate of Harry L. Oldham, deceased; Grace L. Oldham, executrix of said estate; Grace L. Oldham; Grace L. Oldham, trustee under the will of the said Harry L. Oldham, deceased; Grace L. Oldham, guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., minors and Robert Bridge, Defendants.

In pursuance and by virtue of an order and decree of the Circuit Court for the County of Charlevoix, Michigan, in Chancery, dated the sixth day of April A. D. 1927, in the above cause in said Court pending, wherein Walter S. Baer, as trustee is plaintiff and the Estate of Harry L. Oldham, deceased; Grace L. Oldham, executrix of said estate; Grace L. Oldham; Grace L. Oldham, trustee under the will of the said Harry L. Oldham, deceased; Grace L. Oldham, guardian of the Estate of Morella Oldham, Marcia Oldham and Harry L. Oldham Jr., minors and Robert Bridge are defendants, said suit having been filed to foreclose a mortgage on which, by the terms of said decree, there was due on the date of said decree for principal and insurance premiums the sum of Sixteen thousand three hundred fifty-four and 40-100 Dollars, and a further sum of Thirty-eight and 80-100 Dollars costs of the said plaintiff by him about his suit in this behalf expended together with an attorney fee of five hundred dollars, making a total of Sixteen thousand eight hundred ninety-three and 20-100 dollars with interest at the rate of seven per centum per annum from date of said decree.

Notice is hereby given, that I shall sell at public auction to the highest bidder at the East front door of the Court house in the City of Charlevoix, County of Charlevoix and State of Michigan, (said Court house being the place for holding the Circuit Court for said County), on the third day of September A.D. 1927, at ten o'clock in the forenoon of said day, Central Standard Time, all or so much thereof as may be necessary of the land and premises hereinafter described, to raise the amount due to said plaintiff by the terms of said decree, together with principal, interest and costs due said plaintiff at the time of said sale.

The premises to be sold are described as follows, to-wit: All of that certain piece or parcel of land situate in the City of Charlevoix, County of Charlevoix and State of Michigan and more particularly described as follows, to wit: Lot Four in Block Seventeen of the Village (now city) of Charlevoix, Michigan, together with all buildings, improvements and appurtenances now standing on said premises, or any part thereof, including all window screens, door screens, curtain fixtures, furnaces, gas and electric light fixtures, and steam and other heating apparatus, and any and all other fixtures that may be placed in any building now standing upon said premises, together with all rents, issues and profits which shall hereafter accrue from said premises

Dated at Charlevoix, Mich., July 20,1927.

DAVID VAUGHAN, Sheriff,
Appointed Special Commissioner in above cause to make the above sale

SECULAR PRESS PRAISES NUNS

Muskegon Paper Asks Support For Good Shepherd Fund of Grand Rapids

Muskegon—In the leading editorial of a recent issue of the Muskegon Chronicle, the campaign for $442,000 being conducted by the Sisters of the Good Shepherd for the erection of a new home in Grand Rapids is enthusiastically praised. The editorial urges citizens of Muskegon, regardless of creed, to support the campaign.

The editorial is in part:

"Ministering to the misled, wayward and incorrigible girlhood of Michigan during the past 22 years, the House of the Good Shepherd, at Grand Rapids, has given an exemplification of Christian healing of damaged souls, of social reclamation as a method of dealing with society's wards who have gone astray.

"These girls to be taken care of, somehow. And society has to pay the bill. The Good Shepherd sisterhood, inspired by the rebuke given by the Man of Galilee to those who were about to stone an erring woman, not only has shown the world the least expensive way, but the most productive way of assets that restore social liabilities to the world as social assets.

"The work of the House of Good Shepherd is founded on a beautiful order of women who have consecrated their lives to this task, who exhibit sacrificing devotion that challenges the admiration of an all too selfish world. But the service is non-sectarian. Nearly half the wards of the home are non-Catholic. Proselytism is studiously avoided.

"Demand for the service rendered by this institution has far outgrown its capacity. The Sisters who are giving their lives to the work have been housed in a wretchedly agonized old road house. The capacity of the home is for 125 girls but 200 more than that are accommodated, with a long waiting list. There has been no provision for incarcerating the young erring girls from older and embittered offenders. There is no place for housing girls who have given birth to which they can return. The usual commitment is for one year, sometimes two.

"With the cordial approval of the Grand Rapids Association of Commerce and Grand Rapids Civic Round Table of service clubs, the Sisters have launched a $442,000 project for providing adequate building facilities for the work. Grand Rapids, with less than half the population of the home from that city, was asked to raise half this amount. It oversubscribed that sum by several thousand dollars. The other half has been asked from the State of Michigan, on the basis of one dollar for every dollar raised in Grand Rapids.

"Muskegon, which has found in the House of Good Shepherd a refuge for years for its wayward girls, will want to give its share in the project."

PADDOCK RESIDENCE DAMAGED BY FIRE

Fire just before the noon hour Tuesday, was discovered in the Paddock residence, 308 Dixon avenue. An alarm was promptly turned in and members of the department with their fire fighting equipment were soon in action, were efficiently and soon had the flames under control, but not until a heavy financial fire loss had been suffered.

The residence is one of the fine structures on this prominent street and for the summer season was under lease and occupied by the Frank Sutberger family of Cincinnati, Ohio.

"Drums of Desert" Majestic Sat.-Sunday

"Drums of the Desert" adapted from Zane Grey's "Desert Bound" will be shown at the Majestic theatre Saturday and Sunday. The picture deals with those same Navajo Indians who played so large a part in the Richard Dix vehicle. Only in this production, however, it is the redskin who finally comes out on top.

A romantic story has been skillfully woven in to the struggle of red man and white. Warner Baxter and Martha Milliner are said to make as pleasing a pair of lovers as has ever been seen. Ford Sterling holds up the comedy end.

WILLARD B. JENKINS PASSES

Father of Mrs. N. O. Cram of Charlevoix—Funeral Service Here

Funeral service under the auspices of I.O.O.F. members was held for the late Willard B. Jenkins of Harbor Springs, at the home of his daughter, Mrs. N. O. Cram, 108 E. Hurlbut avenue, in this city. Mr. Jenkins was born at Pinckney, Michigan, September 25, 1853, therefore at the time of his death nearly 74 years of age.

He has resided in this region about forty three years, the first twenty years of which he resided at Walloon Lake and the following years, until his death last Sunday at the family home at Harbor Springs.

Mr. Jenkins was united in marriage with Miss Lizzie E. Taylor July 4,1871, by whom he is survived and also by two daughters, Mrs. F. S. Wooden of Owosworth, California; Mrs. N. O. Cram of Charlevoix, and one son Nelson Jenkins of Niagara, Wisconsin.

Mr. Jenkins has often visited his daughter in this city during past years and has a large number of local friends who will regret his passing.

He was a member of long standing of the I.O.O.F. and prominently identified with this fraternal order.

Rev. C. E. Pollock pastor of the M. E. church officiated at the services.

Ox Used in South America

In Venezuela and Colombia oxen still are widely used as beasts of burden. They are slow, but they are sure and will pack more than a mule. In Ecuador as many as 32 oxen are yoked together for pulling especially heavy loads.

LIBERAL EDUCATION IN FILM PLAY "LONDON"

She left home to escape a love she did not want. Then taken into a fashionable Mayfair dwelling, she was happy—for a short time. It seemed that all the men who wore dress clothes weren't exactly gentlemen. So she returned to Limehouse where, to live temperance was the most of her dreams. That's a sketchy outline of "London," Dorothy Gish's current production, which arrives at the Majestic theatre on Wednesday and Thursday. In addition to a dramatic story, the director has taken most of the scenes right on the locale called for in the author's manuscript.

GET IN ON THIS --A TREE FREE

Annual Inspection Day Aug. 25, Charlevoix Co. Nursery:

People in general are not acquainted with local enterprises that are of sufficient importance that people come miles to inspect and to make purchases. The Charlevoix County Nursery, located at Ironton, just east of the ferry, operated by Mr. George Hemingway of Oak Park, Ill., is this kind of an enterprise and yet many people have not availed themselves of the opportunity of driving through the extensive grounds and viewing the beautiful flowering shrubs and ornamental trees.

The Nursery specializes in home landscaping and is always glad to offer their service to beautify homes either in city or country.

The Nursery consists of large and small specimens of evergreens, flowering shrubs and ornamental trees. There are some sixty varieties, hardy all of them, which have stood the winters of this section for at least two years.

The Nursery plans to give free to each family, inspecting the grounds on the 28th, a choice of a hard maple (sugar) tree, or a mountain ash tree, or a Persian lilac bush. Trees will be tagged as selected and may be taken during planting season this fall.

TENNIS TOURNAMENT VERY SUCCESSFUL

Johnny Hennessey Win's Men's Singles—Will Irwin the Junior Singles

Johnny Hennessey is once again the men's singles champion of Western Michigan. For an entire week he romped over his adversaries seldom encountering as much as a threat on the part of opponents. His final match with George O'Connell of Chicago, Sunday, was one of the most exciting of the tournament. O'Connell gave Hennessey a harder run than any other player unless it was Dr. Dubbin of Miami, Fla., whom the champion eliminated in the quarter finals. It was the consistent steadiness of his playing that brought him his title. O'Connell is a tricky player with a sharp eye for placements and an unnerving drop shot over the net, a shot that cost Hennessey several points. The score was 6-2, 6 8, 6-2, 6-3.

Junior Men's Singles

Young Will Irwin of Grand Rapids, schastic and junior men's titleholder of that city, added another laurel to his already brilliant collection, when he annexed the West Michigan Junior Men's title by defeating Dell Lebson of Cedar Rapids, 6 2, 6-3, 6-2. Irwin played a fast game and carried away the match before the Iowan was quite aware of what was going on. Irwin is, perhaps the most brilliant player for his age that has ever played on the Inn Courts.

Women's Singles

Clara Zinke of Cincinnati, wrested the women's title from Ruth Reise of Saginaw in sets 6-1, 3-6, 6-1. Miss Zinke was undoubtedly the most scintillating woman player in the tournament. The women's matches were played off with the manner of elimination in perfect accord with the seedings. Miss Reise defeated Miss Helen Gannsfield of Detroit in the semi-finals 6-3, 7-5 to win the opportunity of facing the Cincinnati star in the final round.

Women's Doubles

A duo composed of Miss Clara Zinke of Cincinnati and Miss Ruth Reise of Saginaw defeated Miss Josephine Consable of Kalamazoo and Miss Helen Cansfield of Detroit, to annex the doubles trophy. The two singles finalists had little trouble with their more amateurish opponents taking the game in straight sets 6-1, 6-4.

Men's Junior Doubles

Will Irwin and his compatriot Colby Ryan, took away another trophy when they defeated Winston Hathaway and Bill McCall in the junior men's doubles 6-3, 6 2, 6-3. Although the match was not as easy as the gallery anticipated Irwin and Ryan were clinch winners.

Men's Doubles

No decision was given in this. Hennessey and Jack Harris playingWalter Hayes and Jay Chappell had each annexed two games when Hennessey had to catch train

The tournament this year was one of the most successful ever staged in Northern Michigan according to gate receipts and publicity. Hennessey may return for the event next year as he has expressed a fondness for the Inn Courts.

School Music One Answer to Menace of the "Jazz Age"

It happened in a city in Iowa. Fifteen hundred high school students, members of high school bands from all parts of the country, were there taking part in a national contest. And when at the close of the contest, in which the fellies, 31, boys barely nosed out a Council Bluffs outfit, all of the 1,500 massed together under a single leader for one final outburst of stirring melody, one of America's foremost musical educators declared: "The jazz age can't do anything to a nation that can muster youngsters like these. Their music will doom the so-called 'flaming youth' and will put strength into the social fabric of America."

There is an interesting article about all this in this week's issue of The Sentinel. It is called "School Music and the Jazz Age" Be sure to read it.

ELECT NEW OFFICERS FOR YEAR

Charlevoix Cow-Testing Association Reorganize--Cecil Dobbin, Tester

After completing four years of highly successful work the members of the Charlevoix County Cow Testing Association have reorganized for the new year, which started August 1st. Officers were George Meggison, Charlevoix, president; Elmer Murray, East Jordan, vice president; E. J. Edwards, Charlevoix, sec.-treas. Edgar Miteen, who has very efficiently and satisfactorily done the work of testing and keeping records of some 300 head of dairy cattle, has resigned and the services of Cecil Dobbin of Fremont, have been engaged for the new year.

During the past year 84 unprofitable cows have been sold, for beef, including many purebreds; 16 grade purebred sires were purchased; 22 out of 27 members are using purebreds of know production. Also 3 members run into clover and alfalfa acreage have been noted.

Members have had their cream separators tested and three discovered their cows losing 85.90 per month on theirs. The following are the members of the association with a few additions to be made later.

Charlevoix—Irene Point Farm, Al Baich, Orchard Bay Farm, Elmer Inscho, Geo. Meggison, Louis Brown, Floyd Black, Lawrence Rose, Henry Potter, E. J. Srigley, Geo. VerSnyder, J. H. Strachern, Cornelius Vandenburg.

East Jordan—Vernon Vance, Fred Wurn, John Craig, Elmer Murray, Murphy Bros., Pat Ulvand, Irving Crawford, Orville Bennett.

Ellsworth—Nicholls Farm.

POLITICS AND BUSINESS

The legislature of a Western state put on what is called a state survey of the telephone service; through a legislative committee. Both the state and federal public service commissions have already carried away the notion that telephone property as a basis of rate making. But an inexperienced group of politicians was not satisfied and wanted the work done all over again.

These same politicians that had mismanaged state affairs so that there was no money In the state treasury to meet state obligations, would assume to manage the state's telephone business. Can politicians who have run a state deeply in debt and created enormous deficits by their mismanagement, manage telephone, railroad, and other public service corporations.

FAMILY GATHERING HELD LAST SUNDAY

The beautiful home of Dr. and Mrs. F. F. McMillan, 219 Park avenue, was a lovely setting for a family gathering held last Sunday. Twenty were present to enjoy the beautiful buffet luncheon served at one thirty. Guests from out of town were: Miss Ella Link of Burr Oak; Mrs. Edwin E. Cluff, of Chicago; Dr. L. D. McMillan and family, Onaway; Mr. and Mrs. J.C. Knowles, Vincennes, Ind; Mr. and Mrs. Frederick Dagwell, Cheboygan, and Mrs. Fred DeSteki and son of North Carolina. Mrs. Cluff will return to Chicago this week and will be accompanied by Misses Freda and Lyla McMillan.

Fishing for Dog Biscuit

On the British Columbia coast the dogs of both white men and Indians are well known to roam the benches and fairly live on salmon, which they seem to prefer in the semidecayed state. No ill effects result unless the animal gorges, as would occur from overeating of any other food.—B. H. Syrnns in Adventure Magazine.

LAST SUNDAY VISITORS DAY

Thousands Visit the Military Camp at Grayling That Day

The military reservation with its encampment of state troops and army manoeuvres held the center of the stage in Michigan last Sunday and the encampment grounds was visited by many thousands of persons who made the trip to the reservation mainly by automobile, with the thousands at the ground representing the entire state, while some came from adjoining states, all making possibly for the largest attendance, both soldiers and civilians, ever seen at the new famous reservation.

The day was ideal for motoring and this condition no doubt was the reason for the large number of machines and vast number of citizens at the grounds, all making for a crowd which cannot be accurately or even closely estimated from a numerical standpoint; as they were distributed over the thirteen thousand acres of reservation ground, all of which was covered with war paraphernalia, soldiers, visitors and conveyances of various types.

There were many notables on the ground, high state officials, big business men. Last Sunday was heralded as visitors day and from the number of citizens at the camp the invitation to visit the grounds was freely accepted. In past years when twelve or fifteen thousand visited the reservation it was thought that the limit had been reached. This year the figures will be much larger, double at least, possibly three times as large as in any season since the camp was organized and opened to the public.

Pyramid Built Eight Thousand Years Ago

Perhaps the oldest monument in America is Cuicuilco (Meeting Place for Singing and Dancing), a three-tier pyramid, which is only half an hour by motor from Mexico City. Prof. Byron Cummings of the University of Arizona recently undertook the excavation of this mound at the request of Dr. Manuel Gamio and with the assistance of the Mexican government. The original pyramid was a truncated cone 412 feet in diameter and 52 feet in height, surmounted by a dancing platform and an altar in the shape of a horseshoe. It was built at a period when men knew only how to heap one stone upon another. The inclination of the pile at an angle of 45 degrees and the weight of the blocks of andesite and basalt have preserved the monument amazingly.

When the diggers began the mound lay buried beneath fifteen to seventeen feet of sand, clay and rock, under which again was a deep layer of lava, covering the platform at the summit to a depth of eighteen feet. The eruption of the volcano Ajusco in some forgotten era served not only to preserve this ancient monument but to date it. The Pedregal, a flow of lava some fifteen miles long and three miles wide, which occurred in this neighborhood and which is declared by geologists to be 7,000 years old, is not to be found on Cuicuilco, but rather lava from an unquestionably earlier flow. Doctor Cummings believes that the mound was reared by Americans who lived at least 8,000 years ago. On reaching the summit of this mountain, made by the labor of primitive man, one finds the ancient altar of rough, unchiseled stones, calling up a vision of a circle of naked, hairy savages squatting, with their bodies swaying to the rhythm of their tuneless hymns of worship.—Martha B. Allen in Current History.

Legion Meeting Will be Held at Petoskey

According to reports the annual meeting of the American Legion for the year 1928 will be held at Petoskey. A decision to this effect was reached by the committee Monday, and was brought about largely by James A. Reid, president of the Petoskey Chamber of Commerce, and William McManus, president of the Michigan Hotel Association, who met with their local friends.

Benton Harbor was prominently mention as the place for holding the 1928 three-day meet, but the committee in charge decided to come to this region and picked Petoskey for their next meeting which probably will be held early in September.

Danger From Insects

Doctor Neave of the Entomological society of London, has stated that insects destroyed at least 10 per cent of all the plants which man cultivates for food or clothing, and it has been calculated that if the checks, natural and artificial, on the increase of the many species of green-fly, for example, were removed, the whole of the vegetable growth of the globe would be destroyed in six months.

Exhibition of Rare Books Continues

The exhibition of fine and rare books from the collection of E. S. Stern two weeks ago in the Barron Ualien studios, aroused so much interest that Mr. Ste.n was persuaded to repeat the display Wednesday, Thursday and Friday, Aug. 17-19.

A large new consignment just received from London, will be on exhibition. There will be many First editions of Dickens, Stevenson and Kate Greenway in original contemporary bindings, as well as superbly bound specimens representing the finest work of the greatest masters in the art of binding.

Admission is free and all book lovers are cordially invited.

TAG DAY NETS $953.00 SATURDAY

Proceeds Raised for the Benefit of the Charlevoix Hospital

According to reports made tag day drive of Saturday last $953.00 was the sum raised from various sources for the benefit of the Charlevoix hospital. The major part of this fund was raised through the sale of tags by girls and boys who were on the streets throughout the day.

The amount collected through the sale of taks were made as follows. Girls:

Sybil Levinson	$179 54
Alice Usher	74 41
Igna Isaacson	26 60
Kate Sulberger	25 55
Betty-Jane Shroeder	22 58

Prizes being awarded to them.

Alfred Stumer	$137 76
Frank Stern	64 70
Albert McMillan	43 26
Edward Loeb	27 06
Richard Cohen	19 97

These the same as the girls were also awarded prizes for their efforts.

Some other collectors were out as solicitors but the amounts received from this source was smaller in each instance than those who won prizes.

The pictures now on display is made upon a request of Mr. Herman who had seen the collection at an earlier date and through his importunities induced Mr. Winternitz to place the same on exhibition at his store.

SOUTH SIDE BARN BURNS —TOTAL LOSS

A farm building located out near the south end of May street and owned by Henry Clocha, was totally destroyed by fire last Monday night, together with the major part of its contents consisting of a quantity of hay, farming implements, some live stock and an automobile.

The building was some distance from the business district and the fire had gained such headway before the members of the fire department arrived at the scene that but little opportunity was offered for saving the property.

Her Intellectual Crown

Principal—And what gave you the idea of becoming a teacher?

Fair Young Thing—Well, I thought the blackboard would set off my blond hair so beautifully.—Journal Amusant (Paris).

Expensive

Mike—I sure gave my wife some thing on her birthday.

Tony—How much did it cost?

Mike—Ten dollars and costs.

GOT THE OLD MAN'S

She—Did you ask Jessie's father for her hand last night?

He (woefully)—Yes, but got the old man's instead.

Literally

"Oh, Bess, why did you get such a close shingle?"

"I didn't intend to. I tried to tell the barber what I wanted, but—"

"I see; he cut you short."

Obliging

"Here we have a fine old Queen Anne mirror," cried the auctioneer.

"A genuine antique. What am I offered for it?"

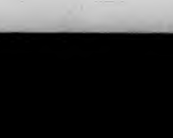
"Is it cracked?" inquired a near-sighted old woman.

"No, madam," he replied, "but we can crack it for you."

Less Expensive

Wife—John, dear, when I go to Palm Beach I shall dream of you every night.

Hub—I'd rather you stayed here and dreamed of Palm Beach.



LIGHT OPERA

Reggie—My voice isn't lawt bad, you know. I think I'll go into opera.

Miss Sharpe—Miss Sharpe—"Light opera, I suppose, Mr. Sappe?"

The Only Answer

"Are you sure you love the man to whom you are engaged?"

"Perfectly," answered Miss Cayenne. "He is silly in conversation, absurd in conduct and inexcusable in his ostentations of wealth. And in spite of all these things I tolerate him."

THE KITCHEN CABINET

(©3, 1927, by Western Newspaper Union.)

I think that I shall never see
A poem lovely as a tree.
A tree whose hungry mouth is prest
Against the world's sweet flowing breast.
A tree that looks at God all day
And lifts her leafy arms to pray;
A tree that may in summer wear
A nest of robbins in her hair;
Upon whose bosom snow has lain;
Who intimately lives with rain.
Poems are made by fools like me,
But only God can make a tree.
—Joyce Kilmer.

HOUSEHOLD HELPS

If a trip to the cellar or storeroom is necessary carry a basket to save time and strength.

Keep on your desk a list of things to do—calls, letters to write, mending and other household tasks that one may forget or slight. As the task is finished cross off the list. This is a most satisfactory way of knowing what has been accomplished during a week or a month. It is also an incentive to hurry up and leave a clean slate. This method is a good one for the kitchen, too; various things are forgotten that will, with a list, keep things running smoothly.

A camp chair or stool which can be slipped under the table when not in use is a great convenience in a small kitchen. Sit down as much as possible when working; save your legs for walks in the open air.

Before taking disagreeable medicine, hold a piece of ice in the mouth for a moment—it dulls the sense of taste.

Grease the cork of the glue bottle, then it will open easily.

Keep old rubbers to set on ice when dishes are to be placed on the ice to cool. They keep the dish from slipping.

When relining drawers with paper, use a small sticker to hold them in place.

A fresh blood stain may be removed by rubbing with dry starch. The starch absorbs the blood and when dry it may be rubbed out, leaving no mark.

Anyone who has tried it knows that in housekeeping one cannot follow a schedule invariably. However the housekeeper is greatly assisted by a system which is carefully followed when possible. A slate or tablet hanging on the wall with an outline of the week's meals and extra duties will prove to be a wonderful step-saver as well as time-saver.

Transplant a few flowers like asters, snapdragon or cosmos in the garden between the rows of lettuce, radishes or onions. When they are pulled the plants will flourish and bloom.

A roomy market basket with a handle is a fine bed for a small child while traveling and in it may be carried its belongings. No books may be picked up and carried without disturbing the baby or exposing him to the weather.

Kitchen aprons made of unbleached cotton make most satisfactory aprons as they are easily kept free from stains by boiling.

"Dressy" Dressings.

In warm weather there is no food more appetizing, wholesome and attractive than a good salad. Almost anything edible may be used in a salad, as there is no excuse for throwing away any small amounts of left-over vegetable dishes.

When serving salad for a company dinner it need not be especially nourishing, for the menu is usually a full one. Something piquant, appealing and crisp and green is most desirable. The following are a few to be served as a simple green, varied by the different dressings:

Thousand Island Dressing.—Take one-half cupful of mayonnaise, juice of one-half a lemon and half an orange, one teaspoonful of onion juice or grated onion, three teaspoonfuls of chopped parsley, one-fourth teaspoonful of mustard, eight olives chopped fine, one teaspoonful of worcestershire sauce, one-half cupful of mayonnaise, one-fourth teaspoonful of salt and the same of paprika. Mix the dry ingredients, dissolve them in the fruit juices, put all together into a fruit jar. Adjust the rubber and top and shake until the mixture is smooth. Set in the ice-box to keep cold until the time come to serve. Another shaking and pour over the salad, or crisp lettuce.

A good way to serve French dressing, which is the simplest of all salad dressings, is to put the ingredients in a bottle, set in the ice chest after shaking well, then shake again before serving. The dressing is usually liked with three parts of oil to one of lemon juice, a pinch of salt and sugar, cayenne and dry mustard if liked. One may vary this recipe by the addition of different seasonings, and foods.

East Indian Dressing.—Add one-fourth teaspoonful of curry powder and one-third of a cupful of chutney or chopped pickle to one cupful of mayonnaise or French dressing.

Roquefort Cheese Dressing.—Grate or crumble a two-inch square of Roquefort cheese into a cupful of French dressing. Serve on lettuce or endive.

Nellie Maxwell

Talking About Noise

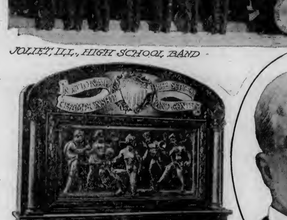
Notes-merely-relative paragraph in McPherson Republican: "If you think that a hen makes a lot of noise after she lays an egg, just come in contact with a man after he has laid a carpet."—or beaten a rug—Capper's Weekly.

A Good Extinguisher

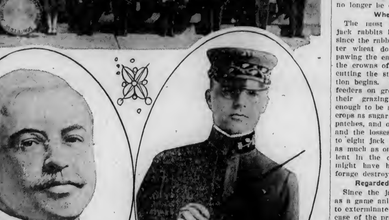
Sand is excellent for extinguishing burning liquids, but sawdust is better, for it packs closer and thus prevents air from getting to the burning stuff.

School Music and the Jazz Age

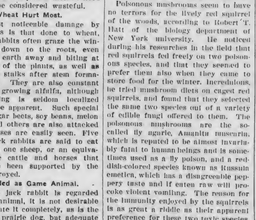
JOLIET, ILL., HIGH SCHOOL BAND



THE TROPHY



OSBOURNE McCONATHY



AUTHORITY

IFTEEN hundred high school youngsters, heads up, shoulders back, feet clicking in rhythmic step. Hats! Fifteen hundred instruments poised, fifteen hundred pairs of eyes trained on a single leader. The flourish of a baton and the biggest band in the world burst into music.

When the echo of the last note of "El Capitan" had died out in the distance, Osbourne McConathy, the conductor and America's foremost musical educator, turned from the vast field of bright-eyed boys and girls and voiced the verdict of the multitude that stood spellbound listening to the music:

"The jazz age can't do anything to a nation that can muster youngsters like these. Their music will doom the so-called 'flaming youth' and will put strength into the social fabric of America."

This scene was enacted in the city park of Council Bluffs, Iowa, the last Saturday in May, when twenty-three champion bands played as a massed concert ensemble under the direction of each of the judges to give a colorful finale to the National School Band contest. There were bands there from as far east as New York, as far west as California, as far north as Minnesota and as far south as Texas. Joliet was awarded the national championship by nosing out the Abraham Lincoln high school band of Council Bluffs by a fraction of a point. The Modesto (Calif.) high school captured third place, and fourth place went to the Nicholas Senn high school of Chicago. The national championship for Class B bands, limited to schools having enrollments under four hundred, was awarded to the Princeton (Calif.) band. Second place in this class was won by the band from Vermilion, S. D. Ida Grove, Ia., was third, and Cleveland, Okla., fourth. In addition, honorable mention for fine performance even though they did not win a prize, was given by the judges to the school bands of Quincy, Ill.; Marion, Ind.; Lockport, N. Y., and Pilot, Mich.

The several winners in the contest were awarded prize tablets by the National bureau for the Advancement of Music, which also rewarded the director and members of the first two winning bands in each class with silver and bronze medals respectively. Joliet still retains the national trophy which must be won by the school three successive times to be kept permanently. The judges in the contest, in addition to Mr. McConathy, were Herbert Clarke, director of the Long Beach (Calif.) municipal band; Taylor Branson, leader of the United States Marine band, Washington, D. C., and Joseph E. Maddy, supervisor of music in the Ann Arbor (Mich.) public schools.

The first really nation-wide school band contest was held in 1923 in Fostoria, Ohio, although previously there had been a number of sectional and district contests in various parts of the country. Thirteen bands, from ten different states, contested in this event. The contest at Council Bluffs this year brought together twenty-three bands, almost twice as many as the year before. To bring these bands together, twenty-six state and sectional band contests were held, each of which, in turn, had an average of twenty bands to vie for the state or sectional honors. It has been estimated that approximately $300,000 was raised this year by high schools, parents, clubs, business groups and individual business men to send these bands to the section, state, and national contests, which have for their object the raising of the standard of music in the schools.

With the next decade, Mr. McConathy prophesies, music will be as much a part of the educational equipment of the high school boy and girl as reading, writing and arithmetic. They will be able to elect courses in instruction on their chosen instrument just as they elect to study Latin or or ornithe a two-inch square of Roquefort cheese into a cupful of French dressing. Serve on lettuce or endive.

"Music is a healthful influence and parents now are learning that the band is better than the 'gang' for their youngsters. Music is a fine mental stimulant and in a survey recently made in one middle western school, it was found that children who studied music averaged considerably higher in all lines of school activities than those who did not.

"Association with other young musicians is another great benefit for the boy or girl band member. No matter how much the child may put his heart into practicing at home and playing for his own and others' enjoyment, he is missing a great deal if he does not learn to work with others in the production of great masterpieces. It is absolutely essential for each member of the band to take his definite place in the group, to give others a chance, to come in at just the right beat, and to drop out at exactly the moment he is no longer needed. Temperament, sulks and overaggressiveness have no place in the band and the good director knows how to inculcate these lessons along with the other instructions.

"Health might also be mentioned as one of the beneficial aspects of learning to play an instrument, and becoming a member of the school band. Correct posture and breathing must be insisted upon. Physicians often will recommend a wind instrument for the boy with the undeveloped chest. Then, too, music steadies the nerves and has a steadying effect on pupils who tend to be too high strung and undisciplined.

"Where a certain standard of scholarship membership above the minimum for passing is required for participation in the school band for representing the school in a contest like the one held in Council Bluffs, this stimulus is also effective in bringing sagging grades up to the mark as it does with the boy trying to make the football eleven or the baseball or track team."

Mr. Tremaine's views on public school music and the enthusiastic indorsement of the department of superintendence of the National Education Association, made up of the representative heads of public school systems throughout the United States, which at its recent Dallas convention adopted this resolution:

"1. That we favor the inclusion of music in the curriculum on an equality with the other basic subjects. We believe that with the growing complexity of civilization more attention must be given to the arts, and that music offers possibilities, as yet but partially realized, for developing an appreciation of the finer things of life. We, therefore, recommend that all administrative officers take steps toward a more equitable adjustment of music in the educational program, involving: Time allotment; number and standard of teachers; equipment provided.

"2. That we favor an immediate extension of music study to all rural schools, in the belief that no single development will so greatly increase the effectiveness of their work and so greatly lessen the extreme differences now existing between rural and urban education. We recommend as a guide the 'Course of Study for Music in the Rural Schools' approved by the Music Supervisors' National conference.

"3. That we believe an adequate program of high school music instruction should include credit, equivalent to that given to other basic subjects, for properly supervised music study carried on both in and out of the school; moreover, the recognition of music by the high schools as a subject bearing credit toward graduation should carry with it similar recognition of its value by colleges and other institutions of higher education. We recommend further that the department of superintendence favor a study of present practices as to music credits.

"4. That, recognizing the great interest manifested at this meeting over the music parade, a more vital element in education, we recommend that this subject shall continue to receive the attention of the department of superintendence and be included in the discussion groups of its annual programs."

Health Officers Kept Busy in the Orient

Corpse smuggling at the frontiers of Iraq keeps European health officials busy enforcing quarantine rules, according to reports received by the editors of the London Medical Journal, Lancet. The decree of all devout Mohammedans to make pilgrimages to the cities visited by the prophet, as well as the blessings that accrue to the faithful when they make one of the holy cities their final resting place makes plenty of work for the quarantine officers. New laws have been put into effect calling for the examination of local corpses as well as those in transit from other countries. Now no corpse can be buried in one of the holy places without a pass. Examinations and health permits are also issued to the thousands of pilgrims that throng into Arabia from the east, thus enabling health officers to check up on one of the most fruitful sources of the spread of epidemics in the Orient.

The Agreeable Man

The true art of being agreeable is to appear well pleased with all the company, and rather to seem well entertained with them than to bring entertainment to them.—Joseph Addison.

Otherwise He Was O. K.

At a dinner during the war a certain man of international fame was being discussed. Opinions differed concerning him. Some of the diners attacked him savagely, others insisted that he was a fine fellow despite his failings. J. M. Barrie, who was present, listened to all their remarks in silence, then said quietly without looking up from his plate, "He was an infernal scoundrel, but 'twas his only fault."

Jack Rabbits Do Damage to Crops

Are Particularly Harmful to Winter Wheat, Alfalfa, Soy Beans, Etc.

(Prepared by the United States Department of Agriculture.)

Jack rabbits cause damage to forage and crops that amounts to several million dollars annually in some states. Control by means of the bounty system has not been very successful, although the expense has been great. In some counties in Kansas, for example, bounties on jack rabbits totaled from $4,000 to $8,000 in 1926. Hunting the rabbits for meat and skins has its limitations. In many situations poisoning is the only practicable method of control, and now that the skins have a fair commercial value the poison method need no longer be considered wasteful.

Wheat Hurt Most.

The most noticeable damage by jack rabbits is that done to wheat, since the rabbits often gnaw the winter wheat down to the roots, even pawing the earth away and biting at the crowns of the plants, as well as cutting the stalks after stem formation begins. They are also constant feeders on growing alfalfa, although their grazing is seldom localized enough to be apparent. Such special crops as sugar beets, soy beans, melon patches, and others are also attacked and the losses are easily seen. Five to eight jack rabbits are said to eat as much as one sheep, or an equivalent in the cattle and horses that might have been supported by the forage destroyed.

Regarded as Game Animal.

Since the jack rabbit is regarded as a game animal, it is not desirable to exterminate it completely, as is the case of the prairie dog, but adequate control is important. The rabbits themselves can be made to pay part of the cost of control, if used as a meat supplement in feeding poultry and hogs, says the biological survey of the United States Department of Agriculture. Each fall and early in winter the eastern markets absorb several carloads of rabbits for meat purposes. Recently there has arisen an active demand for jack-rabbit skins for use in manufacturing felt. At 45 to 60 cents per pound for dry skins, the return is 10 to 13 cents per skin. Carcasses for hog feed bring two or three cents each. The combined value of skin and carcass is a better return than bounties of five cents per rabbit, and if utilized as a new source of income will keep the rabbits reasonably in check.

Cows Require Grain Even When Pastures Are Good

Pastures and other conditions are ideal for dairy cows during May and June, but even then it pays to feed some grain to the heavy-producing cows, according to C. S. Rhode, dairy extension specialist of the college of agriculture, University of Illinois. It will keep them from losing flesh as fast as they otherwise would and will leave a lasting effect throughout the next lactation period. The grain ration that is fed may consist of two parts ground corn or barley and one part ground oats. A little cottonseed meal will tend to overcome the laxative condition which occurs when cows are first turned on succulent pasture.

Cows that are producing more than a pound of butter a day should get a pound of this grain mixture for every four pounds of milk produced daily. Cows that are producing less than a pound of butter a day will get along nicely on skimmed milk alone. The grass is palatable and succulent and supplies protein, minerals and vitamines.

As the season advances the composition of the common pasture grasses changes and the grain mixture should be changed accordingly. A grain mixture of 300 pounds of corn or barley, 300 pounds of bran, 200 pounds of linseed oil meal and 150 pounds of cottonseed meal may be used during this period. If silage and legume hay are fed in addition to grain the winter grain mixture could be used. Cows should get enough feed in addition to pasture to keep them from getting thin and from falling off in milk flow. The amounts of grain and roughage to feed may be determined by the above conditions.

Deadly Mushroom Is Enjoyed by Squirrel

Poisonous mushrooms seem to have no terrors for the lively red squirrel of the woods, according to Robert T. Hatt of the biology department of New York university. He noticed during his researches in the field that red squirrels fed freely on two poisonous species, and that they seemed to prefer these also when they came to store food for the winter. Incredulous, he tried mushroom diets on caged red squirrels, and found that they selected the same two species out of a variety of edible fungi offered to them. The poisonous mushrooms are the so-called fly agaric, Amanita muscaria, which is reputed to be almost invariably fatal to human beings and is sometimes used as a fly poison, and a reddish-colored species known as Russula emetica, which has a disagreeable peppery taste and if eaten raw will provoke violent vomiting. The reason for the immunity enjoyed by the squirrels is as great a riddle as their apparent preference for these two toxic species.

Facts Right; Poetry Awful

Robert Frost, outstanding among the serious American poets, wrote a poem about apples while at Amherst, and, in revising it, wished to make sure that he had made no error in its natural history. An agricultural college being nearby, it was suggested that he send the manuscript of his poem to the authorities there, for their possible correction, reports Thomas L. Masson in the Bookman independent. They returned it a few days later with the statement that his pomology was quite accurate, but his poetry was awful!

He conquers twice who conquers himself in victory.—Syrus.

SEND FOR MAP AND DESCRIPTION of the best part of Colorado to farm. Tell you how money is made farming. W. S. PERSHING, Lamar, Colorado.

Poisonous in Part

A word of warning: Many flowers are poisonous or semi-poisonous. Those of the daffodil, for instance, are powerfully emetic. It is not generally understood that many plants may be poisonous in one part. A striking example is the rhubarb, where only an inch or two at the top of the stem lies between the poisonous leaf and delicious stalk.

Agricultural Notes

Many a farm dollar is lost in the scrap heap of uncared-for farm machinery.

* * *

True diversification in farming includes also cultivation of the fruits of the spirit.

* * *

Inspiration and perspiration are more effective than legislation in bringing "farm relief."

* * *

Only a little water should be allowed a horse heated from working until it is cooled off. It makes little difference whether a horse is watered before or after eating, the specialists say.

* * *

Valuable as it is, posture alone will never grow desirable market hogs. It pays to feed a ration of farm grains balanced with skim milk, tankage or other protein concentrate in addition to pasture.

* * *

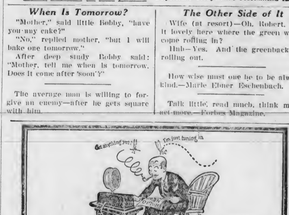
Horses will rest better and their skin function more freely if they are groomed every evening, especially while at heavy work. A light brushing will then be enough in the morning.

* * *

Hay for dairy cows should be cut early as it contains more milk-producing power and is more palatable than when cut later.

* * *

The national dairy show is to be held in the South for the first time this year. The dates are October 15 to 22.



When Is Tomorrow?

"Mother," said little Bobby, "have you any cake?"

"No," replied mother, "but I will bake one tomorrow."

After deep study Bobby said: "Mother, tell me when is tomorrow. Does it come after noon?"

Talk little, think much, little more, act more.—Forbes Magazine.

The average man is willing to forgive an enemy—after he gets square with him.

COOLIDGE ANNOUNCEMENT.

The heavy thinkers of the metropolitan press are now engaged in an attempt to interpret the statement of President Coolidge: "I do not choose to be a candidate for President in 1928." It does not require much interpretation. The President considers the presidential nomination. As between being and not being a candidate he makes a choice. That choice is against being a candidate.

With the nomination in his grasp, it is not probable that President Coolidge, were he sincere in his determination as has been intimated, would have cast off the Pandora's box of numerous rival candidates. It is possible, however, that as the result of many such candidacies, the next Republican national convention may fall into such a deadlock that the call of duty may be sounded to President Coolidge—but that contingency seems so remote that it is very doubtful if it entered into the President's calculations.

The announcement of the President least ensures a lively political season as soon as the dog-days are over. More than twenty men have been mentioned for the Democratic presidential nomination. As many will be mentioned for the Republican nomination. Probably a dozen will start. It will be a lively contest, and may the best man win.

TAXES

"Every income earner in the United States pays, on the average, at least $350 per year in taxes of one sort or another, in other words about $1 a day," says Prof. Munro of Harvard University. "People who own property and earn large incomes are the ones who actually hand the tax collector his money, to be sure; but they merely give him for the most part, money which they have collected from others.

"The owner of an apartment collects taxes from his tenants in the form of rent; the storekeeper collects taxes in the price of his goods, the lawyer and the doctor collect taxes when they charge fees. Taxes are an element in the cost of everything, an element just as certain as interest, wages or profits. Taxes do not usually stay where they are levied. They are shifted from one shoulder to another until they finally reach someone, usually the ultimate consumer, who cannot unload the burden on anyone else." The ultimate consumer, not the big business man, supports the government. Remember this when you vote increased taxes.

Though Massachusetts compels all automobile owners to carry liability insurance, this insurance cannot be given away free by the insurance companies. It is reported that in that state cancellations of automobile liability policies by insurance companies are coming into the office of the registrar of motor vehicles at the rate of several hundred a day.

Under the law, every motorist in the state had to take out liability insurance on January 1st before he could get his registration plates. Many paid cash down, many more did not. The insurance companies were compelled by the law to insure everyone who came along. But with the 45-day credit limit the companies began to send out second notices for the money and when no money was forthcoming, notices of cancellation went to the registrar of motor vehicles.

Of course this will result in one of the desired effects from compulsory insurance laws—to keep financially irresponsible motorists off the highways. But what of the insurance companies? They have had the expense of writing the business and have carried it for 45 days without compensation. It would seem that this one point would inevitably raise rates.

THE THEATRE

The Stolen Bride—Incidently not a flapper, not a "dancing vine," but that screen rarety a young, but mature and beautiful woman—that is the distinctive personality which is brought to the screen by Billie Dove, First National's new star, whose latest picture, "The Stolen Bride," is coming to the Palace theatre Saturday and Sunday.

The movies have virtually overlooked the woman of this type who is so prevalent in real life, declares Carey Wilson, author and producer of "The Stolen Bride." Yet she is very often the most attractive and most interesting member of her sex.

Picture writers, the producer believes, are prone to overlook realities in an attempt to create types and personalities too bizarre. As the producer of all of Miss Dove's pictures during the coming season, Wilson declares every care will be taken to provide the star with stories perfectly suited to her beauty and personality, with plots which will give her every opportunity for the dramatic ability which has advanced her so rapidly in her screen position.

Rough Riders—Contest hands from all parts of the Southwest, from Montana and Arkansas, Mexico and South America, willing to ride anything from a mad bull to chained lightning, recently went into the movies on a glorified rodeo that perhaps eclipses any mass struggle ever staged between men and bad horses. The cowboys were picked for their skill and the professional contest horses for their viciousness to participate in a regimental melee of "The Rough Riders" which Victor Fleming directed for Paramount Famous Lasky corporation on the original training grounds of Roosevelt's encampment at San Antonio, Texas.

Common Barberry Growing Near Grain Field

Cow punchers, a score of whom are regular participants in rodeos, were used in some exciting scenes. Bucking horses were mixed with cavalry mounts to start as much excitement as was possible. Such well known horses were used as "Funeral Wagon," "Widow-Maker," "Pancho-Villa," "Whirling Chair," "Spindletop," "Pinto," "Whirlwind," "High-Wide'n-Handsome," and "Freckles."

Screen favorites were in the midst of the exciting scene, and will be recognized in the production which comes to the Palace theatre Monday, Tuesday and Wednesday.

One of the largest and by far the most difficult areas of common barberry to eradicate has been found during the past week in Charlevoix county. This area is located at the south end of Walloon Lake just west of Walloon village. It is about six miles square starting right at the lake shore and running back through the densely underbrushed land. The bushes vary in height from six inches to eight feet. It is estimated that it will take well over seven tons of salt to do the eradication work.

Due to the smallness of some of the bushes and the ease with which they might be missed every fo ot of this territory will be scouted carefully. In strip scouting the men on the barberry squad proceed through the territory about four feet apart and comb every inch of the land thus no chance barberry will escape their eye.

This campaign is being carried on by the Federal Department of Agriculture in cooperation with the State Department of Agriculture and Michigan State College

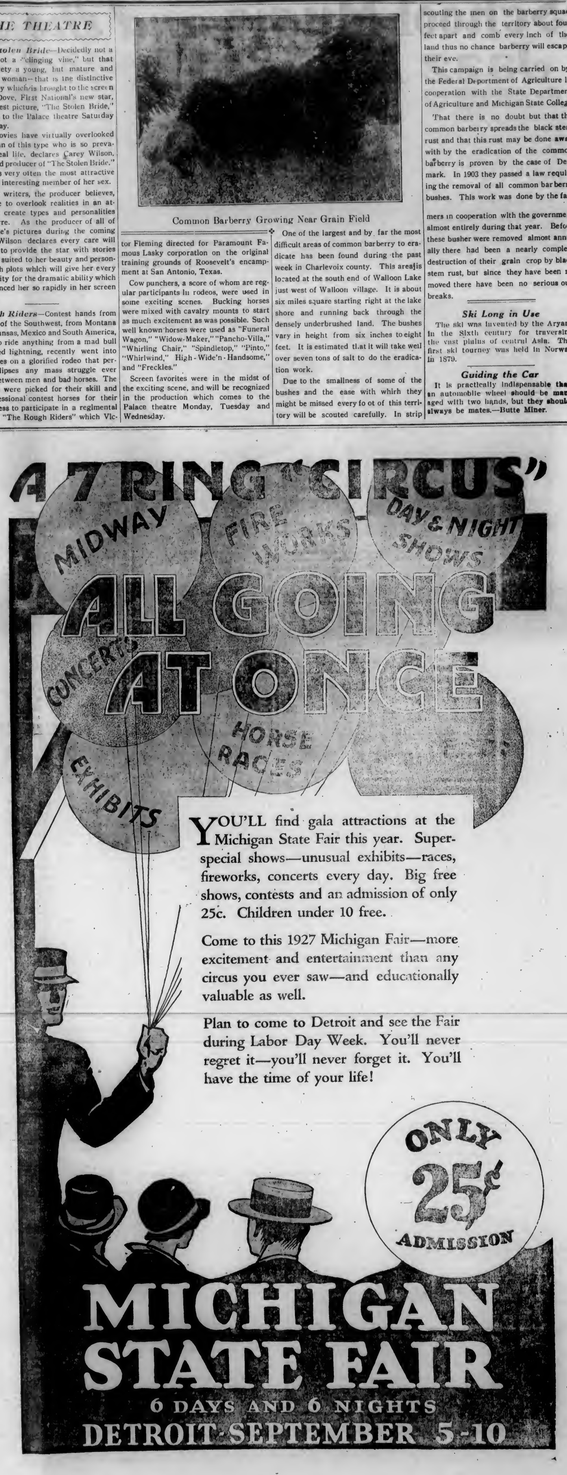
That there is no doubt but that the common barberry spreads the black stem rust and that this rust may be done away with by the eradication of the common barberry is proven by the case of Den mark. In 1903 they passed a law requiring the removal of all common barberry bushes. This work was done by the farmers in cooperation with the government almost entirely during that year. Before these bushes were removed almost annually there had been a nearly complete destruction of their grain crop by black stem rust, but since they have been removed there have been no serious outbreaks.

Ski Long in Use

The ski was invented by the Aryans in the Sixth century for traversing the vast plains of central Asia. The first ski tourney was held in Norway in 1879.

Guiding the Car

It is practically indispensable that an automobile wheel should be managed with two hands, but they should always be mates.—Hattie Milner.



The Brand Is Your Insurance

RED CROWN GASOLINE

THERE is an overproduction of crude oil. This has encouraged the opening of numerous small refineries. Many of these are operated by men unskilled in this work. The consequence is that in gasolines there is a wide variance in quality and performance.

Red Crown Ethyl is a new gasoline built upon an old, established brand. Red Crown Gasoline is the peer of any motor fuel made from pure petroleum. By adding Ethyl anti-knock compound to this splendid fuel, Red Crown Ethyl is produced.

Red Crown Ethyl does away with that annoying knock—the engine delivers a steady, smooth, flexible flow of power—it gives the car a snappy start, a quick pick-up, and enables it to attain any speed the machine is capable of developing.

It has made the high-compression engine possible—and it makes your engine perform better.

Take no chances with your car—fuel it with Red Crown Ethyl. The brand is your protection.

Remember carbon in your cylinders decreases the space in the firing chamber, and of course increases the compression. But to hold this compression, thus enabling the carbon to work for you, be sure that your valves are clean and are seated properly—then Red Crown Ethyl will sing you a song that will delight.

Mrs. Harry G. Parker of Owosso, visited Charlevoix friends early this week.

Clarence Hunt of Bellaire, is spending some time here on business this week.

Paul Sloan returned to Muskegon last Saturday after spending a few days with Charlevoix friends.

Mr. and Mrs. James McCrorey of Port Orange, Florida, are spending their vacation with friends here.

Mr. John Secor and niece, Miss Ida Guirey, of La Porte, Indiana, are Charlevoix visitors this week.

Mr. and Mrs. Henry High of Portland, Mich., are guests of Mr. and Mrs. John H Bugbee for a few days.

Mr. Lou Briggs returned to St. James last Monday, after spending about one week here on business.

Attorney F. N. Clink of East Jordan was in Charlevoix Wednesday attending to professional business.

Dr. and Mrs. A. L. Baxter and daughter, Miss Charlotte, of Central Lake, were business visitors here Tuesday.

Superintendent George C. Cover date, for some time past a visitor at Ann Arbor, returned to Charlevoix Monday.

George Finucan motored up from Grand Rapids Friday and spent the week end with Charlevoix relatives and friends.

Mrs. D. C. Gaffney, of Charlotte, is spending a two weeks vacation with her parents, Mr. and Mrs. Geo. W. Weaver.

Dr. W. M. Davis and wife, of Lansing, are guests at the Bartlett. Dr. Davis is connected with the state health department.

Miss Virginia Thatcher of Oak Park, arrived here Tuesday and for a short time will be a guest at the Harris cottage near Ironton.

Dr. and Mrs. Russell Palmer of St. James spent two or three days with friends here this week, returning to St. James today.

Mr. and Mrs. O. R. Largent of Flint, arrived here Wednesday afternoon and will be guests at the Bartlett for a week or ten days.

Mrs. F. L. Wallace or Buffalo, N. Y., arrived here Wednesday morning and will spend the next few weeks with her father, W. J. Weikel.

R. F. Sloan, Sr., returned to Muskegon Tuesday night after spending about twenty-four hours here attending to local business interests.

Dean F. Carscadden of Detroit, spent the day here Wednesday visiting friends from his home city and incidentally trying out the golf course.

Mr. Camille Koch of Jackson, motored up last Tuesday and will spend a short vacation with his uncle, John H. Kochand other friends in the city.

Frank A. Kenyon of Mackinac Island, was a business visitor here Wednesday. He was accompanied by George Anderson, also of Mackinac Island.

L. D. Coulter of Detroit, representing the D. M. Ferry Seed Co., is here for a few days, visiting and making a tour of inspection of crop conditions.

Mrs. Albert Bridge was a passenger on the S.S. Manitou for Chicago last Sunday, making the trip with the expectation of spending several days in the big city.

Mr. and Mrs. James Maher and daughter Virginia, of Kalamazoo, spent part of last week in Charlevoix, guests at the home of Mr. and Mrs. Harry McHugh.

Peter Neilich of St. James, was a passenger for Charlevoix on the S.S. Sanford Wednesday, and will spend a few days here on business before returning to St. James.

Vincent S. Madison returned to Camp Osoha last Saturday following a stay of several days at his home here while recovering from an illness, the result of infection.

Judge Joseph Cooper left for the upper part of the state Tuesday morning, accompanied by Judge Parm C. Gilbert of Traverse City, on a fishing trip in northern waters.

Dr. Clair Cartier of Grand Rapids spent the week end with his parents, Mr. and Mrs. Fred C. Cartier, and motored back Sunday, accompanied by George Finucan on the return trip.

Mrs. F. M. Sears, Miss Marion Sears and Mr. and Mrs. Ira A. Adams, motored to Grayling last Sunday and spent the day at the Military reservation and with friends in Grayling.

A. A. Wilbur spent the week end with his parents, Captain and Mrs. O. E. Wilbur, making the round trip on the S.S. Manitou, arriving here Saturday and returning the following day.

A party composed of Misses Frances and Mabel Byrne, Marie C. Carey and Mr. Eugene F. Carey motored up from Grand Rapids Sunday and are spending a few days here, guests at the Bartlett.

Mr. and Mrs. W. E. Parmelee will spend the next few days taking a motor trip to Williamstown, West Virginia, where they will visit Mr. Parmelee's mother and brother for a short time before making the run home.

Robert Armstrong of New York, visited Charlevoix relatives for a short time this week and left for Mackinac Island this morning. From there he takes the boat trip to Detroit and Buffalo on his homeward trip.

Mr. and Mrs. Robert R. Frey, Jr., of St. Petersburg, Florida, are guests of Mrs. Frey's parents, Mr. and Mrs. Richard C. Hammet. They motored up from the south a few days ago and will remain here for an indefinite length of time.

The carferry Chief Wawatam, for several weeks undergoing repairs near Detroit, is again in commission on the Mackinaw City-St. Ignace route, replacing the Sainte Marie which was operating between the two points during the temporary lay-off of the Chief.

The last regular sailing of the S.S. Manitou between Charlevoix and Chicago on her summer schedule will be made Wednesday, September 7th, at 2:30 p. m., according to information recently received from the general office of the company, through General Manager Captain G. E. Johnson.

Get Cleaners Naptha at North Side Service Station, Petoskey avenue.

Mancelona claims the distinction of having a resident the oldest in point of years in this region, in the person of William G. Palmer, who celebrated his one hundredth birthday anniversary last Sunday. He was born in England and came to America when twenty three years of age and has resided in Mancelona forty-three years—a good citizen and philanthropist. Time dealt kindly and gently with him throughout the major part of his lifetime and until recently, when the infirmities incident to extreme age, gradually approved, and both eyes came loss of sight and hearing, and these afflictions only within the past two or three years.

CAMP CHARLEVOIX

On Saturday afternoon, Aug. 20th, the Camp Charlevoix staff and campers will present "Hiawatha" to the general public.

The presentation will appear at 4:00 o'clock, on the beach, northwest of the cottages, and no admission will be charged.

Prof. J. Raleigh Nelson, of the University of Michigan, is directing the performance, and will be reader of the day. He is assisted by a counsellor, Claude Samson of Gary, Ind.

The principal characters of the play will be robed in genuine Indian costumes and the cast is as follows:

Hiawatha, Don Wheeler, East Lansing, Mich.; Minnehaha, Grace Taylor, Oak Park, Ill.; Nokomis, Mrs. F. I. Wheeler, East Lansing, Mich.; Iagoo, Joe Donahue; Father Marquette, Prof. E. V. Jotter of the University of Mich.; the Arrow Maker, Earl Oldham, Detroit, Mich.; Chaibiabos, George Alder, Ann Arbor, who will sing "Onaway Beloved" and "By the Waters of Minetonka"; Canadian guides, Roy Dahlberg, Rochester, N. Y., and Raja Howrani, of Syria; bearer of tom-toms, calling tribes together, Andrew Barlock, Ann Arbor, Mich.

Messrs. Lorenz and Block of the Inn, will furnish music with clarinet and cello.

Mrs. Grace Johnson Konold, of the U. of M. School of Music, will sing "From the Land of the Sky Blue Water" and "Indian Lullaby."

Free of normal Federal Income Tax.

A Personal Message to Every Investor

Why You Should Own This Stock

1. It is backed by a going business firmly established, well-managed and permanent.
2. Your savings will be safe, each share has a substantial equity in property value back of it.
3. Your dividend checks will be regular and dependable.
4. Convenient income paid quarterly—on 1st of January, April, July and October.
5. Dividends exempt from Normal Federal Income Tax.
6. Purchased by Thrift Plan at $5.00 per share per month.
7. Attractive price $100 per share and accrued dividend to yield 7%.

YOU are invited to become financially interested in this company. The public utility business is remarkably stable. The earnings of this company are but little diminished by business depressions, nor much inflated in periods of unusual prosperity. It is a business that keeps a very even course throughout all conditions. It therefore fulfills exactly the requirements for permanent and safe investment.

The Michigan Public Service Co. is offering an issue of Preferred Stock, which will be sold to provide money required for improvements necessitated by the ever-growing demands of the cities and customers we serve.

The stock is a well-protected, safe and sane investment, which will yield you 7 per cent per year in dividends and, in my judgment, it will never give you any worry over the safety of your money.

The stock is offered at $100 per share and accrued dividends and may be purchased either for cash or on the Thrift Plan.

I am recommending it to all my friends and would be pleased to have you send back the return card for full information.

Very truly Yours,
W. A. WADSWORTH,
General Manager.

Canal Has Big Repairing Plant

Facilities at Balboa and Cristobal for Ship Work Are Described.

Washington.—The elaborate facilities for the repairing of ships at the Panama canal are given in a bulletin of the Panama canal authorities. The principal manufacturing and repair plant is located at Balboa, the Pacific terminal of the canal. It is adjacent to an inner harbor, which has an area sufficient to permit access to docks, which aggregate 7,500 feet in length, including commercial docks, repair wharves and coaling docks.

A much smaller plant is located at Cristobal, the Atlantic terminal about one and one-half miles from the main commercial docks. A description of the plant at Balboa follows:

The dock has a depth of 35 feet over the blocks at mean tide. High tide varies from 2 to 11 feet above mean tide. It is served by a 50-ton traveling crane with an outside reach of two feet beyond the center of the dock. This crane is also capable of traveling along the face of some of the repair wharves, thus facilitating the work of repairing vessels.

For ships which do not require dry docking there are adjacent to the shops about 3,500 feet of repair wharves. At regular intervals along the coping of the dry dock and the repair wharves are outlets for air, water and alternating electric current. A limited quantity of direct current may be supplied by two portable motor generating sets. Either compressed air or electricity can be supplied for operating auxiliaries on ships on which steam is off. Where refrigerating machinery is shut down, cold storage can be removed from the ship's boxes and stored in the canal cold storage plant whose nearby.

The repair shops are centrally located with respect to the dry dock and repair wharves. Ample track and crane services provide for handling work between shops and ships.

Huge Traveling Cranes.

The main metal-working shops (machine, smithery, and boiler shop) are provided with 60-ton overhead traveling cranes, while the foundry has a 25-ton overhead crane. As all the shops are equipped with as complete line of power tools as are generally found in an up-to-date repair shop, a listing might be given for each, special mention so to give an idea of the maximum capacity of each department.

The machine shop is provided with a vertical boring mill capable of swinging 18 feet in diameter, with an open side extension planer 16 feet by 72 feet, and with a lathe 120-inch swing by 65 feet between centers. No ship machinery is too large for the capacity of this shop. This shop has a floor area of approximately 68,180 square feet.

The smithery is provided with a 500-ton forging press with the necessary furnaces to handle any work that the press is capable of. Billets 16 inches square by 10 feet long are kept in stock and can be worked under this press; there are other machinery and tools usually found in a first-class smithery. There is also a department for spring making and a tool-dressing department that includes all burning and electric tempering furnaces of the latest type. This shop has a floor area of approximately 24,380 square feet.

The boiler and ship-fitting shops have a set of rolls capable of bending plates ¾ inch by 30 feet, 1 inch by 24 feet, or 2 inches by 0 feet. Any size of ship or boiler plates or structural shapes can be worked by the other machinery, which includes angle shears, punches, straightening rolls, plate planer, and bending machine. This shop has a floor area of approximately 46,840 square feet.

The pipe shop is outfitted for plumbing work and for pipe, copper and sheet-metal work of the lighter classes. The floor area of this shop is approximately 17,144 square feet.

The foundry is equipped with a two-ton traverse converter and one two-ton and one one-ton cupola, and the usual brass furnaces. There is an efficient sand-blast system for cleaning castings, also gate saws, carbon cutters, and other modern equipment, including annealing furnaces, core oven and mold-drying oven. The foundry can turn out castings as follows: Bronze, large or composition, ¾ pound to 1,000 pounds; iron ¾ pound to 20,000 pounds; steel, ¾ pound to 10,000 pounds. In connection with the foundry is a pattern shop equipped to handle any and all classes of pattern work. This foundry and pattern shop together have a floor area of approximately 37,753 square feet.

Woodworking Machinery.

The planing mill and joiner shop is outfitted with the usual woodworking machines, including a 72-inch planer capable of handling timbers likely to be used in connection with ship work. This shop has a floor area of approximately 49,044 square feet.

The oxy-acetylene plant has portable electric welding and oxy-acetylene cutting outfits capable of handling emergency repairs. The shop develops approximately 400 cubic feet of acetylene per hour. The 5,000 cubic feet of hydrogen per day. All classes of boiler welding are done. Large thermite welds are also possible. Main engine cylinders have been welded in place, both high pressure and low pressure, the welds being as extensive and as successful as the welds made in the factories for new engine cylinders during the World War. This plant has a floor area of approximately 910 square feet.

An instrument repair shop is maintained in which repairs are made to navigating instruments, clocks, gauges, typewriters and computing machines and other work of a delicate character. In connection with this shop there is a plating plant for zinc, copper, nickel, silver and gold. This shop has a floor area of approximately 2,500 square feet.

Located in the same building with the instrument repair shop is an electric shop under the control of the electrical division, the facilities of which are available for the entire Panama canal. This shop is equipped for motor winding, armature turning and making repairs to practically any kind of electrical apparatus. The floor area of this shop is approximately 3,400 square feet.

There is a cut shop equipped with all necessary machinery for the building of railroad cars of all kinds and also the repairing of all the rolling stock of the Panama railroad. In connection with this shop there is a rerolling mill for rerolling tires and miscellaneous scrap material into rounds and flats. This shop has a floor area of approximately 61,810 square feet.

There is located at both the Balboa and the Cristobal slogs and connected therewith a roundhouse where general overhauling as well as minor repairs are made to the locomotives of the Panama railroad.

The air-compressor plant and dry-dock pumping plant at Balboa are located in the same building. There are two 5,000 cubic foot and one 2,500 cubic foot air compressors in use driven by electric motors and one 2,500 cubic foot steam-driven compressor which is considered only as an emergency unit.

Up-to-Date Laboratory.

There is a laboratory equipped with a 100,000-pound Riehle testing machine and a Olsen[?] hardness testing machine and other equipment for making physical tests of all kinds. There are also available in another division of the Panama canal, laboratories where chemical tests can be made of fuel oils, metals, etc.

All shop tools are operated by electricity. The larger tools are provided with independent motors and the smaller tools are arranged in groups and driven from countershafts. The current is obtained from a 2-phase electric plant at the Gatun spillway, supplemented by a 3-load-driven plant at Miraflores. The 25-cycle, alternating current is transmitted to the Balboa substation at 44,000 volts. At the substation it is transformed to 2,300 volts and so distributed through an underground duct lines to the various shops, where it is further transformed, where necessary, to suitable voltages for use. The various speed tools in the machine ship are driven by direct current from rotary transformers within the shop. All other tools are driven by alternating current, generally at 220 volts. Current at 220 volts is available at all points along the water front for power purposes, and at 110 volts for lighting in the event of short generating being out of use.

The storehouses (under the control of the supply department) carry on hand a large stock of steel shapes, pipe, ship fittings, and supplies of every description. Steel plate is carried in stock in all thicknesses up to and including 2 inches. Plates smaller than ⅜ inch vary by sixteenths and plates larger than ⅝-inch vary by eighths. The largest plates in stock are 72 inches by 10 feet by 2 inches thick. A large amount of steel billets is kept on hand in all sizes up to and including 24 inches by 24 inches by 40 feet. Structural shapes are carried as follows: I-beams, all sizes up to 27 inches; channels, all sizes up to 15 inches; ship channels, all sizes up to 12 inches; and angles, all sizes up to 8 inches by 8 inches by 1 inch. There are also carried in the storehouses lumber of all sizes and miscellaneous equipment and supplies of practically every description that are used in the operation and maintenance of the entire Panama canal.

Birds Kill Cat

Jeanette, Pa.—Canaries are powerful to reproduced the slayers of Mitzi, killed by a murder gang, 100 strong. Mitzi was a cat which was literally torn to pieces when attacked by a flock of blackbirds which swooped down upon the pet while she was sunning herself in a yard.

John Sargent's Ghost Walks, Says Friend

London.—The ghost of John Singer Sargent, famous American artist, who died in London last two years, has returned to haunt the Chelsea studio where he died, in the belief of the present occupants of the house.

Frequently his footsteps are heard by Alfred Orr, his American friend, who took over the studio 16 months ago, descending from the second-floor workroom to the ground floor, in which he died, and which now is used as a bedroom by Mr. and Mrs. Orr.

The latter also has heard footsteps, which she recognized as Sargent's heavy tread.

Indians Inspect New Buffalo Bill Memorial

Gen. Frank C. Emerson of Wyoming greeting Crow Indian chiefs on their inspection of the new Buffalo Bill Memorial museum at Cody. The museum was dedicated July 4.

GUNBOAT SCORPION HOME AFTER 19 YEARS ABROAD

Was Lost to Germans in World War Through Its Commander's Cleverness at Bridge.

Philadelphia.—Saved from capture during war time, as the story goes, by the cleverness of its commander, "No Trump" Babbitt, at a game of bridge, the gunboat Scorpion, after 19 years' foreign service, has finally come home.

When this vessel was entered the World war the vessel was interned by the Turks at Constantinople. The Germans, who were in actual command at the port, demanded that the Turks seize the Scorpion, take off officers and crew and permit the Germans to use the ship as a decoy under cover of her American identity.

Talaat Pasha, an acquaintance of Commander Herbert S. Babbitt, came aboard with word of the German's demand. The commander was sold to have taken a long chance and played the Turk a game of bridge with the Scorpion as the stake. Babbitt won and the order of the Germans was promptly voted by the Turk.

The vessel has been in the naval service for 29 years and holds the world's record for length of service in foreign waters.

The crew of the Scorpion, numbering 7 officers and 100 men, although glad to end a trip expected to be 26 days from Gibraltar, were a crestfallen lot when informed at the Philadelphia navy yard, where the craft is tied up, that the veteran vessel has made its last voyage for the navy. She is to be sold under orders from Washington.

Many sailormen will regret the passing of the Scorpion from the service. At least one-third of the senior officers of the navy yard have served on her at one time or another and a number of her present crew have held the same berth for years.

The Scorpion was a ship of war during the Spanish-American conflict; she has carried scientific and diplomatic missions, sick men and Russian refugees and has been on the edge of five wars. Most of her foreign service was spent in the Mediterranean, Adriatic, Marmora and Black seas.

The Scorpion was built as a pleasure craft in 1898 at a Brooklyn ship yard. In April, 1898, her owner, M. C. D. Borden, sold her to the government for $200,000 and she was converted into a gunboat to fight against Spain.

New Excuse

New York.—Martha Mason, dancer was fined $5 for leaving her car on a street seven hours. Her excuse was that her darling chow chewed a cigarette stub and became frightfully ill.

High Pressure

New York.—A New Jersey realty dealer sold a prospect a fifty-acre tract for development and a resident that site by taking him on an airplane trip over the countryside.

YOURSELF and YOUR BODY

By WILFRED T. GRENFELL

THE PUMP AND PIPES

"BUT father, how does the blood get back?" Every time you move a muscle or breathe, you squeeze it out of the spaces which end in openings into special little vessels. Valves keep it from going in the wrong direction, and on it has to go into a large pipe, which empties at last into the blood through a big vein in the neck near the heart. It is pushed on also a little by the heart, and pushed on by the current in the vein. Moreover, it is helped along by the fact that it is different in composition from the other fluids, and so passes out into any fluid next to it. This process is called diffusion.

"Where is your heart? Can you feel it?"

"Surely."

"What is it doing?"

"Thumping."

"How many thumps to the minute? Here is my watch. Count them. Seventy?

"Now lift this chair up five times. Now count again. How many thumps now? Eighty? Right. Every bit of your body is working, and it needs more blood. Your lungs, therefore, are working more, and more I felt that Captain Barclay had told me, in every particular, nothing but the truth.

Shively was clearly in an ugly mood. He greeted me with scant civility; then, apparently dismissing me for the moment, from his mind, he summoned from an adjoining room one of his subordinates named Evans, a callow, by a country colored girl, whose quivering lip and rear-climbed cheeks bore witness to the treatment she had undergone. Shively began upon her vehemently.

"Say you took the watch, did you?"

The girl fell upon her knees before him, with hands clasped in entreaty. "Do help me," she cried piteously. "I never saw watch. I say I take it 'cause I no hear pain. God's truth, I no take it."

"You lie, d—n you," roared Shively. "That is what you do with me." And to Evans he continued, "Prize her up again; we'll see who's master here."

At this the poor girl completely lost control of herself, for, as I could plainly see, she would say anything rather than endure a second trice up of the sort, she cried. "I lie. I take watch. No prize up again."

"I thought so," and Shively grimly. Then added threateningly, "Where have you hidden it? No lying, now. Where is it, you black thief?"

It was pitiful to perceive the girl's simple mind thrown into confusion. Since, as anyone could see, she had never stolen the watch, naturally she could not confess where she had hidden it. But Shively, like a good upon his throne, was deaf to her pleas. "Where? Where? Can't you understand English? Where is it? Say."

Whereupon the girl, clearly snatching at the first thought that came into her head, answered wildly, "I threw watch in river."

Shively exploded in another torrent of rage. Of course I had guessed that he was stupid enough to believe for an instant that the girl was guilty, all he wished was an excuse for pushing her. With a cruel smile curling the corners of his mouth he said something to Evans which I could not hear, but the woman heard and her frantic pleas for mercy, for she must be pale, some further order to prize up again. Shively stepped across and thus exposed to the air. The grapes that are white on maturity owe the absence of coloring to the absence of this ferment.

Master of Arts

Why the scholastic degree of "Master of Arts" is sometimes written "M. A." and other times "A. M." arose from the fact that the degree was originally indicated in Latin and in that language the position of words is not so essential to the sense as it is in English. In Latin it was either "Artium Magister" or "Magister Artium," meaning "master of arts."

The Darkest Moment

A pessimist is a man who has been listening to a facetious explain what his car needs.—Lebanon Reporter.

Horticultural News

PICKING APPLES TO KEEP STORED

"Our apples do not keep well in ordinary storage," write a number of apple growers to the horticultural department of the North Carolina State college and they want information on how this may best be corrected.

The main trouble, according to W. A. Redspinner, assistant horticulturist, is that the fruit is not picked at the right time. Apples picked green will scald quickly and those picked too ripe will break down quickly. But those picked when the green undercolor begins to turn yellow will keep fine if conditions are right in the storage house and the fruit is not bruised in handling.

"The early fall varieties are more difficult to store because outside temperatures are not low enough for storage," says Mr. Redspinner. "Late varieties such as the Winesap and Stayman will keep better in common farm storage. The early ripening varieties should be kept out of doors protected from rain and sun until the low temperatures begin. The length of time fruit can be kept depends on how soon after picking the temperature of the storage house can be reduced to 32 to 40 degrees. Then it is a matter of the storage house. Temperature, humidity and air circulation in the storage house all affect good results."

Mr. Redspinner states that low temperatures may be secured by opening the ventilators when the air is cooler outside than inside and closing them when the air is warmer outside than inside. Humidity in the air will prevent the apple from shriveling and may be secured by evaporating water in the house. Air circulation is necessary to carry off the gases given off from the fruit and may be secured by wrapping the apples in the spectal oil paper, or storing them in crates.

These things done, the apples will keep, states Mr. Redspinner.

Make Preparations to Gas Peach Tree Borer

All peach growers should be making preparations to gas the peach tree borer, since the best time to kill him is the first week in October. Control of the borer is especially important. Almost perfect control is secured by using paradichlorobenzine which is far superior to digging the borers out by hand. As high as 98 per cent of the borers are killed by this chemical.

On trees six years of age or older one ounce of the material is distributed in a continuous narrow band about the trunk two inches from the soil and covered with from four to six quarts of finely divided soil. The dirt may be piled against the base of the trees, making a cone about the tree. For trees three to five years of age, one-half ounce of the material will be sufficient. Care should be used in applying the material to the trunks or barks of the tree, as contact with the tree will injure it severely.

Trees from one and two years of age one-fourth ounce may be used, but this is not advised where absolute control is desired. Trees of this age can correctly cannot be had, as injury may occur. It should be remembered that the moths lay their eggs as late as the last of September; therefore, the application of paradichlorobenzine should be made the first week in October for the best results.

Horticulture Notes

You cannot make a success of apple growing without good spraying.

• • •

Black raspberries, unlike most of the other cultivated raspberries, do very well indeed where some shade is given.

• • •

Arsenate of lead and lime-sulphur are offered for sale in either the liquid or dry form, with directions for use printed on each package or container.

• • •

Some of the best pruning you can do on young trees is to rub off the buds that come in wrong places for limbs. You can shape up the trees that way with very little cutting.

• • •

Throughout the year the orchard should be kept free from pruning, dropped apples, cornstalks and other rubbish which may act as shelter or protection for the worms.

• • •

When the lime-sulphur was first used, many growers made it themselves, but of late the commercial product is used. No doubt it can be made cheaper, but it is dirty work.

• • •

Do not spray at all unless you are going to try to do it well. It will not pay.

• • •

Spraying takes some time and trouble, but it is great satisfaction at pickling time to know that you have practically free of insect damage, and no waste.

• • •

A rower, even with a spray gun, is a great help. Often it will suffice to stand on the tank. A saw-horse type of support along the center of the tank is a safeguard against falling off.

• • •

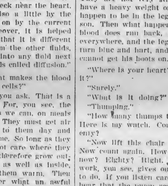
Improved orchards, where a program of pruning, spraying and fertilizing the trees is followed, are paying good dividends.

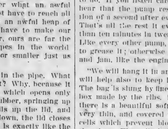
• • •

There is another worm, commonly known as the railroad worm, that causes considerable damage to apples in some sections and seasons.

• • •

Arsenate of lead is a poison, and lime-sulphur is a fungicide for controlling scab in apples, blown rot in plums, etc. It is also used in combating scale insects.





Honor Given Scottish Poet Somewhat Late

A memorial to Robert Fergusson, the Scottish poet, has been erected in the Moray aisle of St. Giles' cathedral, Edinburgh.

At present the only visible evidence that Fergusson lived and died in Edinburgh is to be found in the Canongate churchyard. It is the tombstone which Robert Burns erected 15 years after the death of the poet, to whom, on his own confession, he owed so much. Burns, at the unveiling ceremony, has been erected.

The memorial is the result of a contribution made by Hon. James Craigie, member of the legislative council of New Zealand. Doctor Macgillivray, R. S. A., King's sculptor for Scotland, made the model, which he had previously declined with an offer to give his time. The memorial has been erected under the auspices of the Burns federation.—Weekly Scotsman.

"BAYER ASPIRIN" PROVED SAFE

Take without Fear as Told in "Bayer" Package

Unless you see the "Bayer Cross" on package or tablets you are not getting the genuine Bayer-Aspirin proved safe by millions and prescribed by physicians over twenty-five years for

Colds, Headache, Neuritis, Lumbago, Toothache, Rheumatism, Neuralgia, Pain, Pain

Each unbroken "Bayer" package contains proven directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100.

The Claque

Stella Mayhew was talking about the claque, or hired applause.

"I'll never forget the first time I ever saw my name in lights," said the actress. "I was coming down Broadway in a horse-drawn cab, and suddenly saw my name in huge letters on top of the building where the Answer-Smash booking sign was for so long. I got right up in that cab and applauded myself."—Variety.

Much-Freckled Youngster

A crew of certified public accountants gave up counting after they registered 10,981 freckles on Daniel O'Sullahan of New York, and proclaimed him freckle champion of the world. Then Danny told them they missed about 9,000.

Stomach Disorders are decidedly unpleasant

Green's August Flower

A gentle laxative, will act promptly in relief of Sick Headache, Dizziness, Sour Stomach, Indigestion, Biliousness. Its comfort will make you feel that life is worth living. 30 years' sale. Use pills and 85c bottle. At all druggists. G. G. Green, Inc., Woodbury, N. J.

Kill All Flies! THEY SPREAD DISEASE

Placed anywhere, DAISY FLY KILLER attracts all flies, kills them all. Neat, clean, ornamental, will not soil or injure anything. Lasts all season. Guaranteed effective. Made of metal, can't spill or tip over. Will last a lifetime. Sold by dealers or sent prepaid for $1.25. DAISY FLY KILLER Your dealer's Brooklyn, N. Y.

HAROLD SOMERS

HANFORD'S Balsam of Myrrh For Cuts, Burns, Bruises, Sores

All dealers are authorized to refund your money for the first bottle if not suited.

W. N. U., CHICAGO, NO. 33—1927.

MARVEL OF "PEEPERS"

One of the most wonderful calls of Nature's creatures is that of Pickering's Hyla or spring peeper. The high penetrative whistle, coming from the marshes and ponds in the first warm days, is executed by a tiny species of tree frog, not over three-quarters of an inch long. Imagine what a steam-whistle blast would come from human throats if their lung capacity and vocal organs had the same proportionate power as the peepers.

FIRE CAUSED BY RAIN

Rain set fire to a lumber yard at Felixstowe, England, recently. A truck containing lime and lumber stood in the center of the yard. In the course of a heavy storm the rain beat its way through a tarpaulin covering the lime. The water combining with the lime generated heat which set the timber on the truck on fire. This in turn set part of the lumber yard on fire. The blaze was extinguished before much damage had been done.

CARIB GOLD

CHAPTER VII—Continued —12—

Here, then, was my opportunity, but, whether it be to my credit or my shame, I confess that I have never been, by instinct, what is called a fighting man. Often enough, God knows, I have fought, and fought to kill, but never save where there seemed to be no other choice. And so now, with my enemy helpless, my arm was powerless to strike; it was too much like murder; and as I saw him staring up at me with a half-dazed glance, I took a sudden resolution. "Johnson," I cried, "I don't want to kill you. Say that you cheated, promise you won't record of herself, for, as I could plain, and then I'll give you your life's your own."

I shall never forget the look that came over his face at my words; the look of a man replieved in the very shadow of death. On the instant he seemed to summon all his remaining energy, and whispered, so faintly that I could scarcely hear him, "I promise."

At once I struggled to my feet, and taking care to possess myself of his weapon, a heavy, with what little strength was left to me, to George and to Evans, I cried, "Come, sahibs, I have my prisoner. Let us depart."

But Shively, like a good upon his throne, was deaf to her pleas. "Where? Where? Can't you understand English? Where is it? Say."

Whereupon the girl, clearly snatching at the first thought that came into her head, answered wildly, "I threw watch in river."

Shively exploded in another torrent of rage. Of course I had guessed that he was stupid enough to believe for an instant that the girl was guilty, all he wished was an excuse for pushing her. With a cruel smile curling the corners of his mouth he said something to Evans which I could not hear, but the woman heard and her frantic pleas for mercy, for she must be pale, some further order to prize up again. Shively stepped across and thus exposed to the air. The grapes that are white on maturity owe the absence of coloring to the absence of this ferment.

CHAPTER VIII

I Meet Jack Shively.

George's first act, after getting me to bed, was to find a physician. He bathed and bandaged my wounds and my entire frame for my very body seemed one bruise, some further order to prize up again. Shively stepped across and thus exposed to the air. The grapes that are white on maturity owe the absence of coloring to the absence of this ferment.

"Catch him!" roared Shively, and with the hand remaining from his barred arm, he dashed after the fugitive, with the others at his heels. Making the most of my opportunity, I cut the things which bound the woman to the tree, laid her unconscious form on the ground, and then, knowing that I would do more harm than good by trying to help her further, I hastened after these chivalrous rulers of the plantation.

I found them grouped on the margin of the river, pistols in hand. The negro must have been a remarkable swimmer, for I could see no sign of him, but Shively explained savagely, "We saw him dive in. He's swimming under water, but he's no fish. He's got to come up."

The words had hardly left his lips when at some distance from the shore the negro's head appeared above the surface. Almost instantly three pistol shots rang out, but the aim of the marksmen was hurried, their hands unsteady, from running, and though the three bullets splashed close to the swimmer's head, no one of them took effect, and he disappeared again like a shadow. Shively whose head held his fire, and running out on a projecting point to lose no foot of his distance, he cried exultantly, "He can't stay under so long this time; watch me settle him when he comes up."

The seconds passed. Then, suddenly, still farther out in the stream, and as though the protracted effort of staying so long submerged had stopped his energies, the head and shoulders of the native burst from the water, presenting a mark too good to miss. I saw Shively's right arm extended, and prayed to myself that the bullet might go astray. Then came the sharp crack of the pistol, but this time there was no splash to mark a miss. I saw the negro's head snap back sharply, and his arms clutch convulsively at the air. Then, as if resisting his fatalities to the end, his blurred eyes sought the shore, he slumped nose words I could not catch, and then his muscles relaxed and his lifeless body floated quietly away toward the sea.

Shively, with perfect calmness, turned to his subordinates. "What did he say, Evans?" he queried. "You know their lingo better than I do. He hasn't exactly stealing me luck, was he?"

He spoke in grim pleasantry, but there was double significance in the bookkeeper's reply. "He was an old man, their chief magician, and the husband of the woman you flogged. He curses you and yours through life and death. And will come back from the grave, he says, to haunt you."

Shively grinned. "We'll see about that," he answered lightly enough. "I've always believed with ghosts yet." Then added, "Get back now, boys, and keep those swine well under. At any sign of no success, beat down on 'em; sweat 'em till they drop. If that man was an old man, as you say, there may be some grumbling, but I'll—d, will show 'em who runs this plantation."

I sickened at him; my one desire was to get away as soon as possible, but Shively as I could I asked him when he could ferry me over to the island. He answered, with what I imagined to be irony, that he would be delighted to row me across at once, and that he and I, and the men who were a number of boats were ready. "Just then I put an oar?" he asked with a disparaging glance, "as if he felt that such a fallen-hearted creature could do little in the way of manly exercise.

"I can," I responded with equal irony, "and I'm perfectly satisfied in the light skiff and seated himself on the stern of the boat. Shively, as a matter of fact, have enjoyed pulling stroke myself, for I think I might have been able to row a race that would have made him gasp before we reached the other shore, but as there was nothing for me to do but slip into the forward seat and adjust myself to his stroke, I contented myself with pulling, at a good rate, across the placid water of the lagoon.

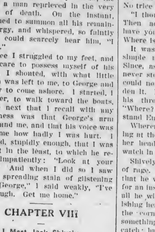
CHAPTER IX

Calm and Storm.

From a jetty on the easterly side of the island, where a dozen boats lay moored, a wizened, unlily-looking man pierced boats at us. I knew, of course, that this must be McAllister, even before Shively greeted him by name; yet as I stepped ashore and shook his hand, it was hard to realize that this little man, with bowed shoulders and sidelong glance, had ever been a gentleman of fortune and a ranger of the sea. There are those, however, who rule by craft alone, leaving the sensual fighting to their followers, and such a leader, I reasoned, McAllister must have been. He now inquired anxiously as to the disturbance on the shore, and Shively seemed to take malicious delight in recounting the incident and in repeating with emphasis the curses which the old man had called down on the slayer and on all connected with him. McAllister was clearly both surprised and alarmed. "Man, man, I'm always telling ye," he complained, "that you're too forth-putting by far. Peace and quietness—that's the honey way to live."

At these words Shively, who did not appear to be at all in awe of his host, threw back his ugly head and laughed long and heartily. Blinking, I drew up of the old days on the Caribbean, and of the lonely inlet in the Antilles where they had shot down their allies from behind. "Peace and quietness" nearly came off from the mouth of Andrew McAllister.

As the overseer pulled leisurely across for the shore, McAllister conducted me toward the house. To my surprise, he scarcely noticed me at all, apparently much flattered by Shively's news. Thus I had an excellent



"George," I Said Weakly, "I've Had Enough. Get Me Home."

unprepossessing youth for whom I conceived an instant liking than I did for Shively. "Look here, Evans," he snarled, "that watch was stolen, and that means big fingered Sally took that watch; now you get her here and make her say so."

The man answered, mildly enough, that Sally had already been questioned, and had denied all knowledge of the whereabouts of the watch. At which Shively broke forth into a torrent of vain and blasphemous cursing, and wound up by exclaiming: "Prize her up, the black liar. Tries her up till she says she took it. And if she won't own up, set her on the picket. I'll show these black trash who's master here."

I listened, with a sensation of helplessness, to this callous command. At once Evans took himself off, while Shively sat in silence, yet with what seemed to me an expression of sensuous anticipation upon his face, until Evans reappeared, followed by a group of negroes, who, with a bald head, in a sullen, unwilling man, with a bald head, an expression of perpetual distrust, which increased, I thought, rather than diminished, when I showed him my credentials and told him that my name was Robert McAllister. Altogether, he was a man for whom I experienced, at once, a heavy antipathy, and more and more I felt that Captain Barclay had told me, in every particular, nothing but the truth.

Shively was clearly in an ugly mood. He greeted me with scant civility; then, apparently dismissing me for the moment, from his mind, he summoned from an adjoining room one of his subordinates named Evans, a callow,

Dainty Things Easily Made.

Shively, Whip in Hand, Was Measuring His Distance for Another Blow.

History's Pages Full of Errors of Record

Aesop's fables are really not Aesop's at all, but Hellenistic fables. A Graeco-Indian named Bubrius wrote and compiled them several centuries after the Phrygian fabulist's death, the date of which is given as 564. Some chroniclers say Aesop was lived at all. The fables he is said to have composed are lost. Souvestre and later writers made versions of the Iberian inventions, to which they gave Aesop's name; thus fastening immortality upon one sage and robbing another of his rightful laurels. A mistake in computing for a 16th century chronologist is responsible for the common and erroneous understanding that Christ's birth was in the year 1. Christ was not born in the first year of the Christian era but about four years before the beginning of that period. Cinderella's slipper was made

Colors of Grapes

The dark red color of certain grapes is due to a component of tannin which all varieties of the vine contain. The color seems to depend on the combined action of the air, light and heat. The change in color is produced naturally in the vine by means of a specific ferment which carries the oxygen of the air to the grape. These ferments are often the agents of coloring in vegetable substances; as they are often seen in apples and in potatoes when the flesh cut open and thus exposed to the air. The grapes that are white on maturity owe the absence of coloring to the absence of this ferment.

Master of Arts

Why the scholastic degree of "Master of Arts" is sometimes written "M. A." and other times "A. M." arose from the fact that the degree was originally indicated in Latin and in that language the position of words is not so essential to the sense as it is in English. In Latin it was either "Artium Magister" or "Magister Artium," meaning "master of arts."

The Darkest Moment

A pessimist is a man who has been listening to a mechanic explain what his car needs.—Lebanon Reporter.

The Claque

Stella Mayhew was talking about the claque, or hired applause.

"I'll never forget the first time I ever saw my name in lights," said the actress. "I was coming down Broadway in a horse-drawn cab, and suddenly saw my name in huge letters on top of the building where the Answer-Smash booking sign was for so long. I got right up in that cab and applauded myself."—Variety.

Much-Freckled Youngster

A crew of certified public accountants gave up counting after they registered 10,981 freckles on Daniel O'Sullahan of New York, and proclaimed him freckle champion of the world. Then Danny told them they missed about 9,000.

Bread From Bulrushes

From the bulrush whitish, growing in marshes and other wet ground, flour-bearing in almost all climates, perfectly good bread can be made. In fact long periods stalks are considered a real delicacy among the races in central Asia. The percentage of starch is large and makes excellent flour.

Natives of Iceland, where bulrushes are not so plentiful, find a substitute material for breadmaking in the many species of moss. They call it "bread from the moors."

Thick Skinned Caesar

The play was "Julius Caesar," and no expense had been spared in the production, but the effect of the assassination scene was spoiled when the dark dagger refused to work, and as Brutus frantically jabbed the unfortunate Caesar with the obdurate weapon a voice from the gallery remarked, in a calm, interested voice: "Gee, but it's tough!"

Dressing the Halibut

It is a universal custom to behead the halibut at point of landing, and ship fish dressed and beheaded. The heads are sometimes used for the manufacture of fertilizer, fish meal or glue.

Pretty Things that are Made at Home

TWO HOMES MADE HAPPY

By Women Who Used Lydia E. Pinkham's Vegetable Compound.

"I have taken Lydia E. Pinkham's Vegetable Compound and I think it is the most wonderful medicine I ever tried." Is the statement made by Mrs. Goldie Stoops of St. Joseph, Illinois. She declares that after telling the Compound to her friends they had to break most of them to free her.

Mrs. J. Storms of 29 Lane Street, Paterson, N. J., writes: "I cannot speak too highly of your medicine and I recommend it to all my friends."

These statements were taken from two enthusiastic letters which one of the help that has been received from using the Vegetable Compound. Both Mrs. Stoops and Mrs. Storms were in a run-down condition when caused them much unhappiness. When women are suffering from lack of strength and from weakness, their own life and their family is affected. When they feel well and strong they are able to do their housework easily, and the result.

Are you on the Sunlit Road to Better Health?

Lesson From Old Negro

"An old negro taught a nassurtiat a real lesson about economy the other day, the Reviver says. The motor rounded into a rickety wagon being driven by two negros. The man in the car started to speed on without reckoning of the age of the old mare. He had gone only a short distance when there was a loud explosion and a fire went out. The negro started from the wreckage of the wagon, and the driver of the car stopped.

"Boss, you seems t' be in a heap o' trouble. Kin Ah be uv sony help to yer?" The motorist smiled, took a billfold from his pocket and peeled off several bills. Handing them to the aged negro, he said, "Yes, old man, you have helped me; take this money."—Kansas City Star.

Nothing but Good in Lavish Use of Paint

The use of paint is a wise economy. It helps to preserve homes. It is a good health aid also. It helps to keep houses clean, kills pests that sometimes scatter diseases, and will lengthen the life of timbers out of which we build our houses. There is a constant fight, on the part of insects of certain kinds, to tear our houses down. It is the fight for vegetation, a very beautiful struggle, from the standpoint of naturalists, but harmful from the standpoint of human economics. Paint will help to minimize the damage these pests do.

Then, too, there is the matter of beauty. Freshly painted houses are attractive. They suggest many things worth while. They make good impressions on strangers. If everybody will play a part in the cleanup and paintup campaign, it will make a big difference in the general appearance of the city. With everybody working for a cleaner and a more attractive city the result will be just that, and nothing else.

Good Town Goes Ahead

This old city is coming back into its own. With the atmosphere permeated with optimism and the good work being carried on in various ways to build a bigger Roseburg and Douglas county, lasting results are certain of attainment. You just can't hold a city back when its people get united, and it looks like the good people of this community are a unit for its advancement. With everyone broadcasting the good news development and growth are not in the far-distant future. Let's hit her up every day in the year—and for years to come. That's the spirit.—Roseburg (Ore.) News-Review.

MORTGAGE SALE

DEFAULT having been made in the conditions of a certain mortgage executed by Martha J. Ayers of Charlevoix, Michigan, to Frederick W. Mayne of Charlevoix, Michigan, dated the 23th day of May, 1922, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, on the 29th day of May, 1922, in liber 68 of mortgages on page 35, which mortgage was afterwards sold, assigned and transferred by Charlotte A. Mayne, as Administratrix of the Estate of Frederick W. Mayne, deceased, unto Charlotte A. Mayne of Charlevoix, Michigan, by assignment of mortgage dated June 27th, 1925, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, June 27th, 1925, in liber 76 of Deeds on page 414, on which mortgage there is claimed to be due at date of this notice the sum of NINE HUNDRED TWENTY AND 65-100 DOLLARS, including the principal sum due with interest, together with an attorney fee of thirty five dollars as provided for by the said mortgage, and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas, the taxes required by the statutes to be paid on said mortgage were duly paid prior to the recording thereof, now therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises described therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by the said mortgage, at public auction, to the highest bidder therefor, at the front door of the Court House in the City of Charlevoix, Charlevoix County, Michigan, (that being the place where the Circuit Court for the County of Charlevoix is held), on Saturday, the 29th day of October, 1927, at TEN o'clock in the forenoon on that date. The premises described in said mortgage being the lands, premises and property situated in the City of Charlevoix, County of Charlevoix and State of Michigan, described as follows, to-wit: Lots Seventy-eight, Seventy-nine and the East ten feet of Lot Seventy-seven of Upright and Hurlbut's Addition to the Village (now city) of Charlevoix, Michigan.

Dated August 2nd, 1927.

Charlotte A. Mayne,
Assignee of Mortgagee.

Lisle Shanahan, Attorney for Assignee of Mortgage. 108 Clinton Street, Charlevoix, Michigan.

STATE OF MICHIGAN — The Circuit Court for the County of Charlevoix —In Chancery.

Nina Hughey, by William Bowman, her next friend, Plaintiff.
vs.
Frank Hughey, Defendant.
Suit pending in the Circuit Court for Charlevoix county. In Chancery, on the 23rd day of May, A.D. 1927, at the City of Charlevoix, in said county.

It satisfactorily appearing to the Court by affidavit on file that a Chancery summons has been duly issued out of and under the seal of said court, for the appearance of said defendant therein, and that said summons cannot be served on said defendant because that after diligent search and inquiry it could not be ascertained in what state or county the said defendant resides, or the whereabouts of said defendant learned, and that said chancery summons has been returned by the sheriff of said county with his certificate thereon endorsed that after diligent search and enquiry he was unable to find the said defendant within the state of Michigan on the same day of said summons, on motion of Clink & Williams, attorneys for said plaintiff,

It is Ordered, That the said defendant, Frank Hughey, cause his appearance to be entered in this cause within three months after the date of this order, and in case of his appearance that he cause his answer to the plaintiff's bill of complaint to be filed, and a copy thereof served upon the plaintiff's attorneys,within twenty days after service on him of a copy of said bill and notice of this order, and that in default thereof said bill to be taken as confessed by said defendant,

And in the motion, It is Further Ordered, That within twenty days after the date hereof, the plaintiff cause a notice of this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in said county of Charlevoix, and that such publication be continued at least once in each week, for six weeks in succession, or that he cause a copy of this order to be personally served upon said defendant, at least twenty days before the time limit prescribed for his appearance.

And on like motion, It is Further Ordered, That the said plaintiff cause a copy of this order to be mailed to said defendant, at his last known postoffice address, by registered mail, and a return receipt demanded, at least twenty days before the date herein prescribed for his appearance

FIRE LOSS ON TUESDAY

DAMAGE BOAT HOUSE AND BOATS

Several Launches Burned—G. R. Collett Loss was Heavy

A disastrous fire attracted a large number of citizens and summer visitors and brought out the local fire department members to the vicinity of the Belvedere Hotel, about nine o'clock Tuesday night, at which time fire was well under way in one of the large boat houses located on Round Lake.

The origin of the fire is somewhat obscure, at least no definite decision has been made public by parties interested in the property. One suggestion put forward is to the effect that some one failed to extinguish a cigarette stub and that the fire originated from this source when gas fumes became ignited. Two young men were near the scene when the fire started immediately following an explosion. One of the young men, Edward White of Boyne City, receiving burns such as necessitated his entering the Charlevoix hospital for treatment.

The two-last loss was sustained by George R.Collette, of Kansas City and a Belvedere summer resident, that of his boat house and his launch, "Lulu." The slip is uninsured and a total loss, while the launch, also a total loss, was covered by insurance in the sum of $1125, placed through the Charlevoix Abstract and Engineering Co's office. Other losses were Arthur B. Birge of St. Louis, Mo., three boat slips; the Estate of H. P. Parmelee, Flint, launch and slip, W. N. Bemis,St Louis, Mo., launch and slip; Leonard Matthews, St. Louis, Mo., launch and slip; and a slip and launch owned by Mr. Steer, all of which were uninsured making for a total loss to owners.

Near by residence property and the Belvedere hotel in close proximity to the blaze were endangered, but active and effective work on the part of the fire department and citizens succeeded in protecting without loss, everything except the big boat house and its contents from actual damage.

The fire burned up quickly and continued furiously for considerable time, but through efficient work of department members the major part of the structure and several launches were saved from destruction.

The loss will total several thousand dollars, but the exact amount has not been determined at this writing.

A SALESMAN PICTURE CREATES COMMENT— PALACE ON FRIDAY

"Smile, Brother, Smile," which comes to the Palace theatre Friday, has attracted more attention during its filming than almost any other picture of the season.

It is based on the life and adventures of a traveling salesman, and when Chas. Rogers announced he was planning to produce such a picture, he received thousands of letters from traveling men, many contained valuable suggestions which were incorporated in the story.

POLITICIANS UP IN THE AIR

President Coolidge's famous statement, "I do not choose," etc., has reached the point where it places politicians "high in the air" where many of them are unable to find a satisfactory landing field from which they can take off again without jeopardizing their chances for future party favors, thus placing them in an embarrassing position. All are hoping that the political fog will quickly disappear and be succeeded by such rare atmosphere as will enable them to start on the right foot at the right time without losing their political equilibrium.

DIED VERY SUDDENLY

AT HOME OF DAUGHTER IN NORWOOD

Mrs. Lafayette Brown Last Tuesday — Age of Seventy Eight

Mrs. Lafayette Brown of Keokuk, Iowa, passed away suddenly at the summer home of her daughter, Mrs. William E. Wright at Norwood, last Tuesday. Mrs. Brown has not been in perfect physical condition for some little time, but her condition was not considered asbeing especially serious for a woman of her years, seventy eight, hence her sudden and unexpected death came as a severe shock to family, friends and acquaintances.

Mrs. Brown has been with her daughter for about two months. She came at the time of her passing were two daughters, Mrs. Wright of Chicago, and Miss Elsie Brown of Keokuk, both of whom accompanied the body to Hamilton, Ill. Tuesday night, arriving upon their arrival funeral service was held and interment made.

FARMERS-MERCHANTS PICNIC

WHITING PARK ON SEPTEMBER FIFTH

Expect to Make This the Best Annual Event That Has Been Held

At a meeting of the committee, held at the Chamber of Commerce office on Monday, Aug. 15, the following working committees were appointed:

General directors: B.C. Mellenkamp, Frank Wangeman; program: Fred H. Merritt, Roscoe Mackey, Frank Bird; sports: W. P. Vought, -Lewis Tooley, J. H. Parker; refreshments: Pete Hewlow, Frank Wangeman, Bauman; finance: T. B. Tyrell Boyne City, Cornlel East Jordan; publicity: Lisle East ..rdan, Usher, Adams Charlevoix, Haire Boyne City.

The committee estimated the expense at $200, one hundred to be raised by subscription. Charlevoix $30, East Jordan $30, Boyne City $30, Boyne Falls $10. With the assistance of the communities interested and the public, it is expected to make this the best annual event that has been held. —Boyne Citizen.

TO ASK COOPERATION

OF FARMERS IN EXTERMINATING BARBERRY

Another Squad of Five Men to Continue Campaign Charlevoix Co.

The large area of common barberry which was located south of Walloon lake has been completely scouted and all bushes salted, according to the latest report from the government men loosted in Charlevoix county. The area was about six miles square and required over two tons of salt to eradicate the bushes. At the present time the squad is working north and east of Boyne City.

In an effort to finish the barberry eradication work in Charlevoix county this summer another squad of five men will be moved in, according to W. F. Reddy, head of the campaign in this state. These men are at present working in Emmet county, which they will finish some time during the week of August 22. Walter Kidnan, at the present time squad leader in Charlevoix, will remain at the head of the work.

It is hoped that with the original survey over in Charlevoix county this summer that the farmers will cooperate with the government in keeping the common barberry exterminated. It is the plan of the officials in charge of the work to clear the areas where common barberries were found every five years. This will enable them to catch any small busies which have been overlooked and will also bring to light seedlings and small bushes which have sprung up from seeds of the large berry since the survey was completed. The barberry seed has the peculiar quality of being able to remain dormant in the ground for a number of years and then sprout, a bush which experiments show it often does.

The barberry eradication campaign is being carried on by the Federal Department of Agriculture in cooperation with the State Department of Agriculture and Michigan State College. The common barberry spreads blackstem rust of oats, wheat, barley, rye and other grains and grasses. This rust every year causes millions of dollars worth of loss in grain to the farmers fo the north and centra. states.

The guilt of the common barberry has long been established. It gives the rust its start in the spring. Without the common barberry the rust is practically powerless to spread to grains and grasses. The reason for this is that there are three different stages of the rust during the year known as black stage or winter stage; the spring stage or the stage when the rust is on the common barberry in cluster cups, and the red stage or the summer stage, which like the black stage, is on the grain. The winter stage lives on the grain stubbles and wild grasses. It can not in the spring spread directly to grains and grasses, but it must be spread to the common barberry to get its start. Thus by eradicating the common barberry, black stem rust may be completely stopped.

EDWARD OTT DEAD IN CHICAGO

SUDDEN TAKING OFF SUNDAY LAST

Mrs. Ott Formerly a Beaver Island Girl—Well Known in This Region

Mrs. Edward Ott, for some time past a visitor with her two children at St. James, returned to Chicago Tuesday in response to a message received conveying the information that her husband died suddenly at six o'clock Sunday night.

Mr. Ott was about thirty eight years of age. He was born at Sutton's Bay. For a considerable length of time he was auditor for the old Northern Michigan Steamship Line and a frequent visitor here and at St. James, and therefore is well known in this region.

Mrs. Ott was a former St. James girl, her maiden name being Miss Mae McCafferty, by whom he is survived and by the two children herein mentioned.

Famous London Prison

Newgate was long the chief prison of London. It was a gloomy building standing east of Holborn viaduct. Its history went back to 1218. It was destroyed by the great fire of 1666, and rebuilt, but partially destroyed during the Gordon riot of 1780. In 1902 Newgate prison was pulled down, and on its site was erected the Central Criminal court.

Should Get Them In

The only favorable credentials some will have to show St. Peter will be the obituary notice.—Manistee County (Ain.) News.

S. S. MANITOU MISSES A TRIP

The S.S. Manitou did not make her usual entrance in this harbor on her southbound trip last Thursday, due to a break in some part of her steering gear equipment. Temporary repairs were made to the damaged machinery at St. Ignace, such as permitted the ship to continue to Chicago on a direct course.

With repairs completed the ship continued on her regular schedule and visited this port northbound Saturday.

TWENTY YEARS' OF GROWTH

INCREASE IN HIGHWAY MILEAGE

Modern Road Building Machinery Make Possible Building More Miles

From 1904 to 1925 total highway mileage in this country was increased by 850,647 miles. From an expenditure standpoint says the National Industrial Conference Board, it is even more significant that the surfaced mileage which represents proportionately larger expenditure per mile, was increased by 368,385 miles, showing that nearly one-half of the increase in mileage was in surfaced roads.

During the first half of the period most of the improvement in roadways consisted in grading them and surfacing them with sand clay, gravel and waterbound macadam. In 1904, only 37 per cent of the improved roadways in that year had any kind of surface treatment, while in 1925 the proportion had risen to 10.2 per cent. Practically no asphalt or cement roads had been laid up until 1914. In that year 500 miles of asphalt and over 2,000 miles of cement roads were built. By 1925, there were 11,000 miles of asphalt and 58,000 miles of cement surfaced highways.

Hardsurfacing of roads is progressing even more rapidly today. This is evidenced by a recent statement of President R. C. Force of the Caterpillar Tractor Company, who calls attention to the fact that sales of this company for the first half of 1927 were 22 per cent greater than for 1926, which is economic proof of progressive construction throughout the country, of more road building, more logging and more farm activities. Modern road building machinery and the availability of bituminous materials which give an enduring waterproof service,mean the improvement of thousands of miles of feeder road the paving of which was not even considered a few years ago.

DEPENDENT ON OIL INDUSTRY

IMPROVED HIGHWAYS DEPEND ON OIL

That Industry Pays Considerably More Than the Nation's Road Bill.

Taking the country as a whole, motor vehicle drivers last year paid taxes averaging 2.38 cents per gallon, on almost 8,000,000,000 gallons of gasoline. The aggregate of this tax was $187,600,231. In addition, they paid $288,282,302 in motor vehicle registration and license fees.

About 95 per cent of gasoline taxes and 93 per cent of motor vehicle registration fees went to building and maintaining highways. If to this total be added special taxes imposed on motor coaches and motor trucks, property taxes on motor vehicles, taxes paid by the petroleum industry and the motor vehicle manufacturers, a total above $1,200,000,000 is reached. That is, the people who buy, operate and manufacture motor vehicles, buy and burn gasoline are considerably more than paying the nation's road bill which now runs about $1,000,000,000 annually.

Erection of Clark Statue Recalls the Dash of "Oregon"

Some thirty years ago the whole United States awaited with breathless anxiety news from an American battleship which was plowing its lonely way through the Southern seas. And when the word of its safe arrival off the coast of Florida was flashed over the wires there was nation wide rejoicing.

A short time ago a little town up in the hills of Vermont honored the memory of one of the two great naval heroes that state had given to the country, and when the statue of Admiral Charles E. Clark was unveiled it recalled the stirring event in the naval history of the Spanish American war and the record-breaking voyage which the battleship Oregon made around Cape Horn. That feat is one of the proudest traditions in American history and it's retold in an illustrated feature article, "Vermont Honors Her Naval Hero," by Elmo Scott Watson in this issue of the Sentinel.

LOEB FARMS TO QUIT

WILL HOLD SALE THIS FALL

All Personal Property To be Sold at Public Auction

Information made public this week to the effect that changes will be made at the Loeb Farms and that same will not continue on the present elaborate scale after the close of this season, puts an entirely new phase on an established local feature of prominence in this locality and is as a whole an occasion of deep regret in this entire northern region.

According to the plans disclosed early this week by the active resident manager, Ernest G. Loeb, an auction sale will be held at some future date, either in September or October, at which time all stock and implements used on or about the farm and used, in connection therewith will be exposed for sale at public auction, and the farm with the exception of that part on which the residences of Mrs. A. H. Loeb and Ernest G. Loeb are located and comparatively few acres surrounding the same, which will be reserved for a summer home of the owners will be placed on the market. For upwards of ten years the Loeb Farms have been operated and open to the public. Thousands of visitors have viewed the place each season. Many from distant parts have been attracted to this show place of the north and no famous has it become that people from European countries have made special trips to see the farm and study the architectural type of buildings; nearly all of which, particularly the ones constructed by the Loeb interests are built of stone and present the performance. More than $750,000 has been invested in equipment. The mile long spectacular street parade will be given at 11 a.m., rain or shine, and the doors to the mammoth menagerie will open at 1:00 and 7 p.m. The big show starts at 2 and 8 p.m.

To the kiddies, as well as their parents, a visit to the Gentry Bros. Shows will prove to be a two-hour journey through a joyland of the highest type of circus entertainment and an unforgetable amusement as well as education treat.

A FAST AND HILARIOUS FARCE OF PARISIAN LIFE—PALACE THEATRE

One of the funniest films of the season, "On Ze Boulevard" a French farce as snappy as a slice of Paris itself, comes to the Palace theatre on Monday and Tuesday. It features Lee Cady as a philandering French waiter and Renee Adoree as the girl in a very deluge of comical woes.

It all begins when Lou inherits a sudden fortune and buys a fashionable wardrobe. The wardrobe starts him on the road to ruin, for he decides to become a gay boulevardier. His first flirtation gets him all tangled up with a blonde actress and he is challenged to a duel by a jealous rival.. In fact he gets into so much hot water that Most Adoree, who really loves him, uses her wits to save him.

EAST JORDAN FAIR SEPT. 13-15

Kit Carson, secretary of the Charlevoix County Agricultural Society, was here last Friday with some advertising matter relative to the Fair to be held on the East Jordan grounds of the association September 12-14-15.

He also left for distribution the 1927 premium lists. The premium lists can be found at the Charlevoix State Savings Bank and at the office of the Charlevoix Co-operative Association. They will prove of interest to exhibitors and everyone who desires to participate in this county event.

GENTRY BROS. CIRCUS

BOYNE CITY ON FRIDAY, SEPT. 2

Congress of Celebrities with this Show—Street Parade

Gentry Bros. shows will exhibit in Boyne City on Friday, Sept 2. With the Gentry Bros. shows will be found the most wonderful serialists,the most famous gymnasts and the most remarkable athletes, musicians and clowns. It required many thousands of dollars and years of searching to locate such a staff but now they have reached their perfection.

Not alone does this circus possess the most celebrated performers among the humans, but will apply to the animal performers. In the menagerie will be found a great collection of the world's rarest animals. They also boast of their 300 magnificent performing horses.

Many acres are required to house the immense tents this season and it required more than 500 people to present the performance. More than $750,000 has been invested in equipment. The mile long spectacular street parade will be given at 11 a.m., rain or shine, and the doors to the mammoth menagerie will open at 1:00 and 7 p.m. The big show starts at 2 and 8 p.m.

To the kiddies, as well as their parents, a visit to the Gentry Bros. Shows will prove to be a two-hour journey through a joyland of the highest type of circus entertainment and an unforgetable amusement as well as education treat.

See Potato Buyers Victims of Tricks

Much Substitution of Varieties by Dealers.

(Prepared by the United States Department of Agriculture.)

Potato growers who purchase seed potatoes do not always get the particular varieties they order. There is so much substitution of varieties by seed potato dealers that the growers are seeking the passage of control measures which will correct the evil. Substitution, either carelessor or willful, are more apt to be made, says William Stuart, potato specialist of the United States Department of Agriculture, for the newer or less known varieties. Purchasers who order "finney names" or "new and highly advertised" varieties are more likely to be victimized, he says, than those who stick to the widely known varieties.

Mr. Stuart ordered 130 different varieties last year from 61 different seedsmen. Many firms replied that they were "just out" of that particular variety. Of the 98 named varieties that were received, 25 per cent proved to be varieties other than those specified in the order. In one instance, three varieties were ordered from a dealer advertising himself as "reliable." Three different packages were received, all of which proved to be the same variety, but not of any one of the three varieties ordered.

There Are Frogs and Frogs

A biological concern in New Orleans owns a number of valuable frogs. Recently the frogs were missing and the police were informed. Later two men were caught with frogs in their possession. They claimed to have caught them in the marshes around the city. The head of the biological concern, however, "knew his onions"; he demonstrated to the court's satisfaction that the deep notes of the frogs varied considerably from those of ordinary frogs caught in the marshes. The men were convicted and the frogs were allowed to hop back home.—Pathfinder Magazine.

DEMONSTRATE TANKS

FOUR DAYS, SEPTEMBER 6 TO 9

Septic Tank Demonstrations to Be Held in Charlevoix Co.

Farmers in Charlevoix county will have the opportunity during the four days of Sept. 6-9, to actually see four tanks of the latest design constructed by specialists from Michigan State College, one each day. A sewage disposal system is fundamental to the installation of other conveniences in the farm home.

Before running water can become possible, or even practicable it is necessary to provide some means of removing the waste water. A septic tank and tile system provides that means, and at the same time provides the best possible methods of safeguarding the water supply against contamination from these wastes.

The septic tank and tile system is to the farm house what the sewer system is to the city. It provides a satisfactory means of disposing of the wastes from the kitchen, laundry and bathroom. Its cost is not prohibitive and its construction is little more difficult than the building of a concrete water tank. You will be interested in attending your nearest meeting during one of these four days and see how simple a matter it is to construct one of these tanks.

Watch the next paper for details and place where they will be held.—B. C. Mellencamp.

A. L. GUILD, POULTRYMAN, HURT

ACCIDENT HAPPENED NEAR EAST JORDAN

Escaped with a Few Bruises—The Car Badly Wrecked—On Thursday Last

Arthur L. Guild drove his commercial car off the highway last Thursday near East Jordan and into a ditch, where the machine rolled on its side, with Mr. Guild confined in the enclosed cab, where he was found and released a few minutes later by a passing motorist. Other motorists were quickly at the scene of the accident and assisted in placing the car back on the main driveway, where an inventory was taken of the damages.

Mr. Guild escaped with a few bruises the man's injury being a badly wrenched shoulder. The machine was more or less wrecked, the top smashed, front axle bent and some small amount of damage done to the mechanism of the machine; all of which makes for a substantial financial loss to the owner-driver of the car

Great American

On March 2, 1703, Samuel Houston was born at Timber Ridge Church, Va. He was a great soldier and statesman and was the leader against Mexico in the Texas rebellion. His birthd y is observed as a holiday in the state of Texas.

THE OLDEST BANK IN CHARLEVOIX COUNTY
43rd YEAR IN BUSINESS
1884 1927

Isn't It Worth Trying?
Why wouldn't it be a good plan to give yourself an imaginary cut in salary of $1, $5, $10, this payday and start a Savings Account with it?
After the first time you will not miss these small amounts, but a year from now you will find you will have a sizable little sum all saved up.
Why not get started today?

Gopher Star Wins Two Captaincies

Two captaincies in major sports have been voted to Matty Nyhuli, University of Minnesota athlete, in a single year. As a senior Nyhuli will head the basketball and baseball teams of the Gopher school next year. He is counted upon also as a mainstay in the backfield of the football team.

Nyhuli went in as a substitute halfback in the Minnesota-Wisconsin football game last autumn and run back a punt 75 yards to give his team a last-minute victory. He matched the feat in the baseball season by delivering a home run with the bases full.

WOULDN'T PLAY BALL ON SUNDAY

Not a Fanatic on Subject, but Rickey Obeys Mother.

Sensed and wrinkled by his generation in the service of baseball, Jon Sugden, coach of the Phillies, recently unbosomed himself of a secret that has tortured the imagination of fan and player alike for years. Indeed, curiously, on and off the diamond, has been harassed and excited by this unrevealed tale of the diamond—the reason why Branch Rickey never would play Sunday baseball.

Rickey was manager of the Browns after an inconspicuous role as player. He became vice president of the St. Louis Cardinals, present monarchs of bat and ball, a position in which he still sits in majesty and security. Rickey is a man of many ideas; many plans, many schemes, writes Gordon Mackay in the Indianapolis Star. To his diamond cronies he is a man to esteem, to admire and to hail as a pioneer in the sport which has become the great national delirium.

Therefore it was no surprise when Rickey developed a streak of stubbornness against playing on Sunday. It was just one of Rickey's queer whims, argued the fans or hashed the players. Yet none really knew the reason why the Browns' manager voluntarily exiled himself from the bench on the Sabbath.

No religious scruples dictated this course. It was filial obedience, a promise which he had made to his white-haired mother back in Lucasville, Ohio, when he first ventured into professional baseball. It was this same loyalty of son to parent that buttressed him in his stand, when jeered by fans, snubbed by players and scorned by the joyous souls who write the drama of baseball daily.

"Rickey told me why he wouldn't play baseball on Sunday," declared Sugden. When he told his mother he was going to join the Browns as a ball player, the sweet-faced old lady said to him:

"Branch, don't play on Sunday."

Rickey said he wouldn't and he never did. But he never let his fanatic about the question. He wasn't against Sunday baseball, as a lot of cranks think. He was panned and roasted well, and a lot of baseball writers used to go over him in pretty raw style.

Cuyler Going Good

Hazen ("Kiki") Cuyler, star outfielder of the Pittsburgh Pirates, who was out of the game considerably earlier in the season on account of injuries, has fully recovered and is in the field and is also hitting the ball hard.

Important That Hurlers Have Well Trained Legs

Pitchers must have good legs. They need them as much, if not more than infielders and outfielders. If the pitcher's legs are not properly trained he cannot pitch his best.

The fact that many pitchers weaken toward the close of a game can in most cases be traced to less improperly trained or not trained at all. That is plausible. A man cannot pitch good ball when his underpinning is weary.

Pitchers do more work than the other players combined. The pitcher is the only man on the field who is continuously in action.

The pitcher, if he trained his legs properly and made it a point to develop speed, could win a few games himself by base running. A number of games are lost each year because the pitcher is helpless when on the bases.

Wants League Offices

The Washington Post says that President Clark Griffith of the Washingtons is endeavoring to obtain the establishment of the American league headquarters in Washington. At present the league's headquarters is in Chicago. However, the selection of B. S. Barnard, president of the Cleveland Indians, as head of the league succeeding Ban Johnson, the newspaper adds, indicates that Cleveland may be the strong rival for the headquarters as Cleveland is Barnard's home.

Vermont Honors Her Naval Hero

BATTLESHIP OREGON

STATUE TO REAR ADMIRAL CLARK

By ELMO SCOTT WATSON

OF ALL the New England states, which from the earliest days of American history have sent out her bravest and best to "go down to the sea in ships," Vermont is the only one which does not have a single mile of seacoast. Yet the Green Mountain state can point to the nation two great naval heroes and both did the deeds which gave them enduring fame at a time when the American navy was just beginning to make the United States a world power. The two was the Spanish-American war and the two men were Admiral George Dewey, the hero of Manila bay, and Rear Admiral Charles Edgar Clark, commander of the Oregon in her historic dash around Cape Horn.

Eversity the little town of Bradford, Vt., where one of these naval heroes was born, honored the memory of Charles Edgar Clark by erecting in its memorial park a bronze statue of the man who helped make it famous. Several years ago Admiral Clark attended the dedication of Bradford's memorial park as a patriotic shrine for the community, little realizing that a short time after his death his own image in bronze was to be the dominant figure in it. And to a country publisher, Col. Horry E. Parker, editor of the newspaper, United Opinion, at Bradford, belongs the credit for both the memorial park and the Clark statue. It was his initiative which brought into being the park, a little triangle of grass and flowers and trees facing the picturesque Bradford town square, and his devotion to the ideal that his town should honor the men who had brought honor to it which resulted in the erection of the statue at the cost of an unlimited amount of work on his part, as head of the Bradford Memorial association, and the outlay of a considerable sum from his own personal funds.

But when his work was done thousands of people came to Bradford for the dedication ceremonies. Among them were Curtis D. Wilbur, secretary of the navy; Gov. Franklin S. Billings of Vermont; Mrs. Louisa Clark, widow of the gallant commander of the Oregon, Mrs. C. F. Hughes, his daughter, wife of Admiral C. F. Hughes, commander in chief of the United States navy, and many other notables. When they unveiled the monument there stood revealed the bronze figure of the navy hero, standing just as he so often stood on the bridge of the historic Oregon, and on the native Vermont stone base of the monument was a bronze tablet bearing the following inscription: "Rear Admiral Charles Edgar Clark, U. S. N. Born Bradford, Vermont, Aug. 10, 1843. Died Long Beach, California, Oct. 1, 1922—Entered Annapolis Naval Academy Sept. 25, 1860. With Farragut Battle Mobile Bay, Aug. 5, 1864. Exec of U. S. S. Oregon from California to Florida Mar. 18-May 20, 1898. Battle of Santiago, Cuba, July 3, 1898."

This simple inscription tells only a small part of the life story of Charles Edward Clark, the scion of an old New England family, born in the same town, among the hills of Vermont where his great-grandfather, emigrated from Roxbury, Mass., early in the Nineteenth century, had settled and where both his father and grandfather were born. Clark once expressed his love for his native state in these words, "From my earliest childhood I never tired of watching the ever-changing aspect of the different mountains and I felt the general devotion to them all, not uncommon perhaps, to boys brought up among the hills; but Mount Lafayette was the special object of my admiration, and one of my first extravagances was the purchase of a small telescope to bring this wonderful mountain nearer." Strange that this boy from the hills should answer the call of the sea! But when he did, he carried with him his love for them and for their heroic traditions. He once confessed that, when confronted with the most difficult problem of his whole career, he gained inspiration for his decision from the history of the gallant Vermonters who fought in the Revolution and the Civil war and his determination to hazard meeting the entire Spanish fleet single-handed at the time of the dash of the Oregon half-way around the world was in part the result of their heroic example.

Educated in the district schools of Bradford and the Bradford academy, Clark entered Annapolis at the age of seventeen and his twentieth birthday found him serving with the West Gulf blockading squadron. A year later he was following Farragut through the hell of gunfire which swept that commander's fleet when it steamed past the Confederate forts in Mobile bay. Although the Spanish-American war gave Clark his chance for world-wide fame, his superiors in the Navy department had known for a long time what sort of stuff was in him. In 1868 he was shipwrecked off the coast of British Columbia when the Suwanee founded and, through the loss of his rescuing officers, he found himself in command of the 33 survivors. He organized them into a defensive party to hold off 400 hostile Indians and did it until help arrived.

In 1892 occurred another incident which showed the heroic strain in him. This was the explosion and fire in the magazine of the Mare Island navy yard in which 14 persons were killed. Clark, then a commander, was one of the first to arrive on the scene. Streams of water were being poured upon the smoking ruins of the brick filling house, and smoke was rising from the roof of No. 1 shell house in which all the small arm ammunition, fuses and boxes of detonators were stowed. Clark immediately ordered another hose connected up and, carrying the nozzle himself, entered the building and put out the fire that had almost reached the wooden ammunition containers. Later it was found that there was enough powder there to have caused an explosion which would have doubled the casualty list, had the fire reached it, and the first to have been sent to death would have been Clark.

Step by step Clark had risen from lieutenant in 1867 to captain in 1896 and his career had been a varied one. He had served on Pacific, West Indian and Asiatic stations, he had been stationed at several navy yards, he had been an instructor at Annapolis and he had spent three years in surveying the northern Pacific coast and four years in lighthouse inspection. Outstanding in his record had been the qualities of trustworthiness and resourcefulness. One of the questions contained in the fitness reports on record in the Navy department is this one, "Would you as commander of a ship or squadron consider ..... a fit officer to be intrusted with hazardous and important duty?" In the fitness report on Clark, made in 1895, the reply made by his fellow officers was without an exception in the affirmative.

So it was something more than chance that he was selected to command the battleship Oregon in March, 1898, when her captain was disabled for service by illness, and to bring her on the 14,000-mile run from San Francisco to the vicinity of Cuba where the first smashing of our war between Spain and the United States had already been heard. On March 16 the Oregon set out on the voyage that was destined to become the longest emergency run undertaken up to that time by a modern battleship. Clark had had just 48 hours in which to make the preparations for the trip after taking command of the ship and when he had started he was utterly "on his own." For there was no radio in 1898 by which he could keep in constant touch with his superior officers, and in case the formal declaration of war took place while he was still en route it meant the sealing of all ports by which the Oregon might be repaired in case of emergency.

When he arrived at Rio Janeiro on April 30 he was told that war with Spain had been declared and that the whereabouts of the Spanish fleet under Admiral Cervera, which had left the Cape Verde Islands, was unknown. There the Navy department placed upon him the responsibility of deciding whether the Oregon should remain safely at Rio Janeiro or proceed to Key West, and by delay so risk meeting the Spanish fleet in a battle in which the Oregon would be hopelessly outnumbered. Clark was not long in making his decision. He immediately started north! Ever since he had left San Francisco the prayers of the nation had followed the Oregon as she steamed forth upon her lonely voyage and now he left Rio Janeiro the national anxiety was increased. Then on May 24 there was nation-wide rejoicing when the word was flashed that the Oregon had arrived safely at Jupiter inlet in Florida. Here he was compelled to make another momentous decision. In order to join Admiral Sampson's fleet he would have to over-ride the opinion of his chief engineer who advised him to go to Norfolk navy yard to have the Oregon overhauled. The Navy department had authorized this action, but again Clark made the decision in favor of getting to the scene of action as quickly as possible, despite the danger involved. Twice he had been authorized and almost invited to step aside for the moment from the hazards of war and twice he declined to do so and risked his reputation in doing so. Had either decision resulted disastrously it is probable that the nation would have been as quick to damn him as it was to acclaim him when the event turned out as it did.

On May 26 the Oregon arrived at Key West.

REAR ADMIRAL CHAS. CLARK

COL. HARRY PARKER

Clark had covered the 14,000 miles of water in 67 days, the longest and quickest trip of any battleship often afloat and still a world's record. Today a battleship could go from California to Florida through the Panama canal in 20 days. Despite the strain that had been put upon the Oregon's machinery by the long voyage, she arrived at Key West fit for immediate service and a few days later joined Sampson's fleet. The nation had only a few weeks to see the result of the efficiency of the Oregon in both the care of the ship itself and the training of her crew.

In the great naval battle of Santiago on Sunday morning, July 3, the Oregon played a leading part. As the Spanish vessels attempted to flee and pass the American battle line, it was the Oregon, following closely behind Commodore Schley's Brooklyn, which developed the wonderful burst of speed in excess of that called for in her contract which brought her alongside the Spanish ship Viscaya until that vessel, riddled by the shells of the enemy, American ships gave up the fight. Then the Oregon joined in the chase of the Cristobal Colon which was fleeing westward, far ahead of the pursuing American ships. At 1:15 o'clock in the afternoon a 15-inch shell from the forward turret of the Oregon, on which Clark had stood during the entire engagement, crashed into the Colon. Fifteen minutes later the Spanish made for the shore as evidence of his defeat. The battle was over. It had lasted exactly four hours.

Later in the war the Oregon steamed from New York to Manila. There she was on duty during American operations in the Philippines. Clark was advanced six numbers in rank for his distinguished service during the war, and on the day of his promotion he was promoted to rear admiral. He was retired from active service in 1900 on his sixty-second birthday and until his death in 1922 was carried as a rear admiral on the retired list of the United States navy.

The Oregon also went into honorable retirement after her notable career. One of the high spots in her last days of service as a part of the reserve fleet of the Pacific squadron occurred in 1915 when she led the international Naval pageant that passed through the Panama canal on its way across the mouth of the pipe against a sensitive cell. The smoke shuts out an infinitesimal amount of the light and the instrument at once sounds a gong, stops the generator, and blows into the generator case a charge of inert gas which extinguishes any flame that may have spurted. Thus fire protection is automatic and sudden. The chances are slim that the power plant will ever be bothered with generator fires.

And He Couldn't

Wife (with newspaper)—I notice, dear, that a post-mortem examination, my dear, is intended to allow the victim to state verbally his own testimony against his assailant, and is taken down in writing.

Wife—Thanks, darling; and you won't look down on me, will you, because I haven't your education?

He said he wouldn't.—Boston Transcript.

Detained, Maybe

"Can I speak to your father today, my little man?

"Papa is at the law courts."

"But you said that a month ago."

"He's still there."—De Muskete, Vienna.

Easy Money

Mike—This is a great country, Pat, Pat—And how's that?

Mike—Shure, thr' paper sez yez can buy a foive-dollar money order for three cents.

Meow

Alice—He' had my picture in his pocket—exactly where the mad dog bit him. It stopped the dog's teeth.

Grace—I'm not surprised. ◦

ORCHARD GLEANINGS

MATURE APPLES BEST KEEPERS

(Prepared by the United States Department of Agriculture.)

From the results of numerous investigations it seems fairly certain that a great many apples grown in the eastern section of the United States are picked too early to obtain best results in either common or cold storage, says the United States Department of Agriculture. In general, apples for cold storage should not be picked before they show a decided yellow cast in the ground color or until they are beginning to loosen on the tree. An equally firm fruit of better color and flavor and with less tendency to scald will be obtained from later picking than from that now generally practiced. In common storage late picking will give not only better-flavored fruit but also fruit in a firmer condition throughout the storage period.

Apples soften much faster in common storage or if packed and held in the orchard than while remaining on the trees. For best results in common storage, therefore, the picking of most varieties should be delayed as long as the fruit is holding on the tree fairly well or until there is danger of freezing. Exceptions should be made of the Jonathan when grown under long, growing season conditions. Late picking of good common storage varieties results in a firmer and higher quality of fruit in storage.

Apples for cold storage also should be fairly well matured when they are picked, both to obtain highest quality and appearance and to reduce the occurrence of storage scald. The development of scald can be greatly reduced by the use of oiled paper, but the control will be more effective, particularly in barreled apples, if the fruit is well matured when picked. Data gathered in the tests show that fairly late picking does not result in more rapid softening in fruit held at 32 degrees Fahrenheit.

Several Advantages of Tractor in the Orchard

There is no question but what mechanical power may be used economically and effectively in fruit production on a small or large scale.

Some of the advantages claimed for the tractor in the orchard are as follows:

It will get closer to the trees without injury.

It will not bite the ends of the limbs or knock off the fruit.

It will turn in a short radius.

It can be guided with exactness.

It will pull heavier tools and cut deeper.

It will readily pull a subsoiler to break the plowpan caused by shallow tillage or the hardpan laid down by nature.

It will get over the ground faster, thus conserving time and labor.

It can be worked longer hours and in emergencies can be used day and night.

Packing Sheds Sources of Heavy Infestations

Packing sheds and their contents are oftentimes sources of heavy infestations. In the fall and during the winter the worms hiding in the crevices of apples seek places of shelter, such as cracks and crevices in packing sheds, in baskets, boxes, or other containers. Whenever packing sheds are so constructed that they may be thoroughly screened to prevent issuing moths from escaping in the spring, this method may be used. Containers in packing sheds or those which may contain worms, should be freed of infestation or left undisturbed in moth-tight sheds. The containers may be freed of infestation by placing them in a room which can be heated to a temperature of 120 degrees Fahrenheit and this temperature maintained for six hours.

Map Useful in Keeping Track of Small Orchard

When young trees are planted the tags should be removed, or they soon cut into the bark and strangle the trees. At the same time the owner files to know the names of the varieties and their locations. In the case of apples, it is quite a few years before the trees are bearing and the varieties are definitely known by their fruit. The orchard map is useful in keeping track of varieties, even in the small home orchards. If a tree dies, it is possible to refer to the map and order another of the same variety and keep the block intact. This avoids the mixed plantings, which are the most expensive to spray and harvest.

Cut Side Branches

At planting time most of the side branches of the growth tree should be cut away leaving a straight stem, then cut this back to a point of 30 to 33 inches above the ground. Even with very large trees it is best to cut back severely. This will cause the tree to form a perfectly new top. With good culture, a growth of three or four feet will be made the first year. A little pruning should be done the spring of the second year. Side branches should not be cut so heavily.

Fall Inspection Good

It is customary to call attention to important orchard operations at the time they are to be done. But a walk in the autumn just before picking time will impress one more with the needs of the orchard than in the spring when we are about to start on the new year's work. There are many things of interest to be seen at that time that are not in evidence at any other time and it is anything but lost time to spend an afternoon just looking and thinking.

Denies Radio Is Aid to Culture of Barley

Radio waves will never make two blades of barley grow where one grew before, declare plant physiologists of the United States Department of Agriculture, in reply to statements ascribed in a news item to Admiral W. G. H. Bullard, chairman of the federal radio commission. Admiral Bullard was quoted as saying that barley planted under the radio towers at Arlington grew so high that it overtopped men walking through it, due to the influence of the radio waves.

Many researches have been conducted in electriculture to determine this very point, the scientists state, and the results have always been either inconclusive or distinctly negative. The Arlington barley, it is pointed out, had no "control." That is, there was no other plot of barley planted on exactly similar soil but removed from the possible influence of the waves. Without such "controls" no biological experiment has any value whatever. In the experiments of the plant physiologists there were always "control" plants, which showed little or no difference from the ones exposed to the electrical waves.

Long Toots Save Lives

The longer the toot the shorter the casualty list, according to an experiment by a railroad. The old crossing signal of two long and two short toots was changed so that the longest toot was given last. It is explained in Popular Mechanics Magazine, and under the new plan the railroad had 28 fewer crossing accidents in a year. Under the old plan the most noise was made when the engine was furthest from the crossing. Under the new plan this is reversed.

Government stock experts advise that ice haps be suspended from the roofs of stock cars in hot weather, to keep the cattle as healthy as possible.

"And at the foot of the rainbow they found the treasure—Monarch Cocoa and Teenie Peanut Butter sandwiches. 'So much better than gold,' they exclaimed, 'for we can't eat gold—and we're so hungry.'"

Guard Against Fires in Huge Generators

A peculiar fire-fighting instrument protects huge generators that produce electricity for a city. Sometimes such generators rest up under enormous and insulation entails fire, necessitating costly repairs. The new instrument receives from each generator in a plant a continuous stream of test air through a pipe. If any smoke appears in the test air, it drifts through a thin beam of light that is directed across the mouth of the pipe against a sensitive cell. The smoke shuts out an infinitesimal amount of the light and the instrument at once sounds a gong, stops the generator, and blows into the generator case a charge of inert gas which extinguishes any flame that may have spurted. Thus fire protection is automatic and sudden. The chances are slim that the power plant will ever be bothered with generator fires.

And He Couldn't

Wife (with newspaper)—I notice, dear, that a post-mortem examination, my dear, is intended to allow the victim to state verbally his own testimony against his assailant, and is taken down in writing.

Wife—Thanks, darling; and you won't look down on me, will you, because I haven't your education?

He said he wouldn't.—Boston Transcript.

Detained, Maybe

"Can I speak to your father today, my little man?

"Papa is at the law courts."

"But you said that a month ago."

"He's still there."—De Muskete, Vienna.

Easy Money

Mike—This is a great country, Pat, Pat—And how's that?

Mike—Shure, thr' paper sez yez can buy a foive-dollar money order for three cents.

Meow

Alice—He' had my picture in his pocket—exactly where the mad dog bit him. It stopped the dog's teeth.

Grace—I'm not surprised. ◦

Dead or Alive

"In Arizona my brother is worth $10,000."

"Is that so? How come?"

"That's what the sheriff offered for him, dead or alive."—Vancouver Province.

Green's August Flower

is a mild laxative, and has been in use for sixty years for the relief of constipation, indigestion and similar stomach disorders. A trial will convince you of its merit. 25c and 50c bottles. At all druggists. G. G. Green, Inc., Woodbury, N. J.

Keep Stomach and Bowels Right

By giving baby the harmless, purely vegetable, tasteless, children's regulator

MRS. WINSLOW'S SYRUP

brings astonishing, gratifying results in making baby's stomach digest food and bowels move as they should at teething time. Guaranteed free from narcotics, opium, alcohol and all harmful ingredients. Safe and satisfactory.

No Scientific Proof That Any One Race Has Superiority Over Another

By JOHN LANGDON-DAVIES, English Educator.

THE theory of Nordic supremacy is a method of whitewashing race prejudices. No evidence has been discovered by science to prove that one race is superior to another. There is no such thing as a pure Nordic race and there is no such thing as any pure race in Europe where complex racial mixtures have come to exist. Race is purely a means of classification and is similar to the letters on a card index.

Race prejudice exists because there is a certain point when our feeling of the universality of the brotherhood of man breaks down.

On the crowded islands of Great Britain we have learned to get on with people with as little friction as possible and we do not always find it necessary to distrust, fear, dislike and despise those who do not belong to our race.

In America there are many more groups which have not become a real part of the whole nation and in this great country there is a problem of race prejudice.

It has never been proved that any race is innately better than another. People are continually mixing race and culture. Race is hereditary and culture is something which comes to every individual from the fact that he has been born into certain surroundings.

There is nothing national or racial about language, music, art, philosophy or religion. When any group sets itself up as the chosen people of the universe then there will be trouble in the world. A feeling of racial superiority produces ill-feeling and opposition.

Success in Life by No Means Dependent on the Duration of One's Years

By REV. DR. S. PARKES CADMAN, Federal Council of Churches.

No generation can write the theology of another generation. Those who understand the Bible understand it in their own experience, and out of that experience comes the great theology. We need today a master mind in theology that will do for us what St. Thomas did for the medieval Christians.

When you've overcome the obstacles of youth, then life begins to lift for you, and you can dedicate the rest of your life and power to the Giver of all life. If you are ever going to be anything but a fool, then is your chance.

A man comes to be forty, he can apply himself to the redemption of time. The flames of youth are quenched, the hounds of passion leashed, and with widened horizon, man can fulfill neglected duties, and cultivate real and lasting qualities in the enlightenment of experience.

Life's success does not depend upon time's duration, but on what we make of ourselves and our fellow men while its duration is ours. It enables us to be and do better than we have hitherto been and done. The desire for betterment is the mainspring of hope. Every age, every year, every day has a distinctive character—stamp it with the signet of the King.

Truthful and Accurate Newspaper Indispensable to the World of Today

By FRED A. WALKER, New York Publishers' Association.

A day without a newspaper would be an inconvenience, and a week without a newspaper would be a catastrophe. Whatever happens, the public looks first to the newspapers for information and this is the greatest tribute that can be paid to the truthfulness and accuracy of the press.

Some people unkindly and untruthfully cast reflections on the dependability of the news as it is printed; yet those who have to do with the making of the newspapers and who have a real acquaintance with the detail of news gathering and distribution know that there is no activity of the human race in which speed and quantity are factors that is so accurately performed as the collecting of the world's news and its distribution through newspaper columns.

The newspapers are the eyes, the ears and the mouth of the world. They perform the functions of seeing, hearing and telling for 24 hours of every day in the year. Upon the publicity afforded by the newspapers depends the prosperity of a thousand different forms of activity and the return on millions of dollars invested. Indescribable chaos would result if the newspapers were suspended.

Modern-Day Extravagance of Both Old and Young Needs to Be Checked

By W. R. MOREHOUSE, American Bankers' Association.

The American people are becoming more and more reckless with their money. It isn't so much the high cost of living in these days as it is the lack of of appreciation of the value of minor coins. Today, if you drop a penny on the sidewalk you almost hesitate to pick it up. If you drop a nickel or a dime in your office, you are tempted to remark, "Oh, let the janitor get it."

Young America is being reared in this environment, which borders on extravagance. Our children are demanding liberal allowances for their school expenses; instead of taking lunch to school, as was the custom 25 years ago, the children today insist on an allowance of at least 50 cents a day.

To offset the tendency toward extravagance in children, I would urge bankers to encourage children's accounts and welcome the deposits of pennies and nickels. Stock salesmen and promoters are getting too many of the savings accounts with promises of high returns, and installment buying is an evil in so far as it encourages the purchase of luxuries, instead of necessities.

Immense Wealth of Nation Is Threatening Spiritual Integrity of the People

By DR. JOHN A. MARQUIS, Presbyterian General Secretary.

America in her 150 years of history has had to face many serious problems. Some were the foundation and interpretation of her Constitution, the acquisition and organization of her immense territory, slavery and many others. But she never has had to face problems more serious than those she faces now; economic, industrial, international and racial. Her people have gotten so wealthy their spiritual integrity is threatened.

Wealth has sapped the moral vigor of every nation in the past that has possessed it. Will it be the ruin of us? It depends on how Christian we are. The task of our missionary boards is to create in our citizenship a spirit that can handle the complex situation. A great crowd of witnesses is watching how we spend our wealth.

The church plays a vital part in the answer.

LESS IDLENESS, MORE WORK

Refusal of the Board of Arbitration to grant the increased wages to conductors and brakemen of the 55 Western roads involved in the case, meets with general approval. In the first place, the increase demanded was excessive. Wages of trainmen are liberal, and for the amount of labor performed and the hours they work the rate of pay is high compared with wages prevailing in all other industries.

In the second place, a wage increase meant rate increasing. The margin between earnings and expenses are so small on most of the western roads that any increase in expense of the proportion such demand would have entailed would have necessitated an increase in rates, whereas shippers are demanding rate reduction.

If the trainmen, and this applies to enginemen as well, must earn more wages, let them work the hours of other men. Their hourly rate is high but the trouble is they work such few hours per month, and in most instances this is a restriction they have imposed on themselves. Let railroad employes work the hours other employes work and from present rates of pay their wages will be not only increased, but will be well above the highest average of any other industry.

To increase wages because of insufficient earnings induced by self-imposed idleness would be to put a premium on idleness. No industry has a right to impose a burden on the public arising from rate increases incident to wage increase, when as in this case the remedy lies in less idleness and more work.

Badly Planned City Starts With Handicap

A Dayton citizen, showing a visitor the charms of his town, hurried him past a peculiarly uninviting residence district near the outskirts of the city. "That," he said, "was intended by nature to be one of the beauty spots of the city. A promoter got hold of it who had no imagination. He laid out small lots and badly arranged streets and permitted a better-shelter development. It is now forever a suburban 'slum.'"

The National Association of Real Estate Boards proposes to prevent such tragedies. It has studied the ways by which the most beautiful cities have protected themselves from unintelligently planned additions. It is proposed to put the extension of city growth under control of local planning commissions. Says the report of the committee making the recommendations which the association has adopted:

"No other problem in our complex city life is so fundamental as the subdivision of land, because it is the initial step in the structure of the occupied urban community. New traffic conditions and new modes of living require that a very thorough study be made of platting the unbuilt areas in and adjoining our cities."

Individualistic American ceases to that idea with difficulty. Are we not to be allowed to do as we please with our own land? Long ago the answer, in cases where that meant the maintenance of offenses to health and to the sense of smell, was a sustained "No." It looks now as if men were not always to lie free to do as they please with their own even when that only does violence to their neighbors' eyes.

The creation of ugliness isn't yet a crime; but wait a thousand years.—Dayton (Ohio) News.

Gold Rush in Graveyard

A small locality in the Burgenland district of Austria, near the Hungarian frontier, had a gold rush all its own a short time ago. Through an accident an ancient graveyard dating from the time of the migration of the races was discovered. The Oldenburg museum began to excavate. Ancient gold vessels were found. When the farmers of the community heard of this they rushed to the scene and began to dig for gold, instead of for last year's cabbage. In the scramble for the likely places fights developed between the farmers, until a large force of gendarmes was called to keep the gold fever down. Anyway, outside of a few more arms nothing much was found.—Chicago News.

Get Cleaners Naptha at North Side Service Station, Petoskey avenue.

WANT COLUMN

LOST—Man's Waltham Wrist Watch. Reward if returned to 206 Michigan avenue or telephone 192.

WANTED—A middle-aged woman to keep house on a farm for three brothers and an invalid lady. Good wages paid to the right party. Mrs. E. De Vincent, St. James, Mich.

THE THEATRE

Majestic—Marjorie Daw gives the screen one of her most emotional scenes in the concluding sequencies of "The Outlaws of Red River," which will have a two days showing at the Majestic commencing Saturday, and starring Tom Mix.

She has been the associate of a gang of desperadoes who, when she was a child, killed her parents and abducted her. Mix, in the role of a Texas Ranger who has been hunting for the gang to liberate the girl, crashes into the outlaw stronghold just in time to save her from one of the younger members of the band who has killed the old leader for protecting the girl.

The rescue gives Miss Daw an opportunity to display a wide variety of her emotional possibilities. Appearing with Mix and Miss Daw are Francis McDonald, Arthur Clayton, William Conklin, Ellen Woodson, Lee Shumway, Virginia Marshall and Jimmy Downs.

Palace—Comedy in costume! That's the revolutionary experiment Douglas McLean has made by choosing "Soft Cushions" a fast-moving, plentifully gagged tale of the Orient, as the story of his new picture. The smiling comedian appears as a youthful native rogue.

For several years McLean has wanted to film this unusual original screen story. He believes that the public is now ready and eager for the introduction of striking novelty in the comedy field and he planned to pioneer with "Soft Cushions." Insofar as can be learned, this is the first attempt to produce a feature comedy entirely in period costume and character.

In addition to its unusual story setting it lays claim to another distinction. In the person of Sue Carrol it brings to the screen a brand new and very charming leading woman recently "discovered" and placed under a long term contract.

"Soft Cushions" will be shown at the Palace theatre next Saturday and Sunday.

Palace—"Twenty-five girls—blondes and brunettes. Must be the most beautiful to be found in Hollywood." This order was recently handed to the casting office by Director Loyd and so exacting did his taste prove that fifty four girls were given tests before the order could be filled. He needed the players for a party sequence in his picture, "Children of Divorce," which will be seen at the Palace theatre next Wednesday and Thursday. The production co-stars Clara Bow and Esther Ralston.

Appreciation

The first time that one sees a glorious thing, one's heart is lifted up towards it in love and awe, till it seems near to one—ground on which one may freely tread, because one appreciates and admires; and so one forgets the distance between its grandeur and one's own littleness.—Charles Kingsley, in "Two Years Ago."

Commendation

Dr. F. H. Wilkinson, Charlevoix.

As Corps Area Commander I wish to convey to you my congratulations and thanks for the splendid results achieved by you and your co-workers of the C. M. T. C. enrollment forces. The results of the current enrollment year have been made known and you are therefore aware we have completed the most successful season in its history. A total of 7042 applications have been received from the three states, and your county is one of those which have either filled or exceeded its quota.

Fifty four out of one hundred and two counties in Illinois; thirty one out of seventy one in Wisconsin and thirty two out of eighty three counties in Michigan has equalled or exceeded their quotas.

In securing one hundred per cent of your quota, I know you have been aided by many public spirited citizens and I hope you will extend to all who have aided you, my sincere thanks.

Wm. Lassiter, Major General
Commanding.

DON'T FORGET US

When you need anything in the line of neat and attractive Printing.

New Palace Theatre

ATTRACTIONS FOR THE WEEK

Saturday and Sunday, Aug. 27-28

Douglas MacLean in "Soft Cushions." Dashing comedy, refreshing novelty, sizzling action, gorgeous girls, colorful background, perfect entertainment—"Soft Cushions!" Extra—Educational comedy, "Grandpa's Boy."

Monday and Tuesday, Aug. 29-30

"On Ze Boulevard," with Low Cody and Renee Adoree. There's a real kick in every foot of this mad, merry film romance! Gay Paree—a million francs—girls, girls, girls! You'll have the time of your life. Extra—Our Gang comedy, "Baby Brother."

Wed. and Thurs., Aug. 31-Sept. 1

Clara Bow and Esther Ralston in "Children of Divorce." Surrounded by the divorce court—the society ring! And from its shattered jewels resounds the ring of revelry unconfined—of dancing, groging, thrill—seeking children of divorce. Extra—Fox News and Felix the Cat.

Friday, September 2

"Smile Brother Smile," with Dorothy Mackaill and Jack Mulhall. The season's laugh special. He was the world's champ salesman; but when it came to selling himself to the girl he loved, that was a different story! It's the season's love comedy sell-out with two of your screen favorites. Extra—Educational comedy, Queer Ducks."

MISS HELEN STROHM, OF KANSAS CITY, at the Bartola.

MAJESTIC THEATRE

Saturday and Sunday, Aug. 27-28

Sandow, the world's greatest dog in "Call of the Wilderness." Sandow, the faithful, in a smashing drama of thrills, action and heart appeal! Extra—Educational comedy, "Naughty Boy."

Wednesday, Thursday, Aug. 31-Sept. 1

Tom Mix in "Outlaws of the Red River," with Tony, the wonder horse. A girl bandit and a Texas Ranger ride the danger trail together to a smashing climax in the most sensational series of episodes ever pictured. Extra—Educational comedy, "Hot Lightning."

Local and Personal Mention

27x54 Hit and Miss Rugs, 69c. Charlevoix Hardware Co.

Tuesday, Sept. 6 is the date when Dr. J. Leahy, the Optometrist, will be at the Hotel Charlevoix.

Mesdames J. J. Carscadden of Flint, and Dean Carscadden of Detroit, visited friends here Tuesday.

H. W. Garrett of Grand Rapids, was here Wednesday, making one of his periodical business visits.

Dr. H. I. Davis, celebrated neurologist of Chicago, is spending his vacation here and is a guest at the Inn.

Mr. and Mrs. Everett Burt of Jackson, spent the week end with Mrs. Elma H. Cook and other friends.

Mr. and Mrs. A. R. Lamb of Detroit, are spending the week here with their aunt, Mrs. Elma H. Cook.

Miss Virginia Thatcher, a guest at the Harris cottage near Ironton, returned to her home, Oak Park, Ill., last Monday.

Mr. and Mrs. Hugh Robinson of Detroit, were house guests of Swayne Payton and daughter Minnie, for two or three days last week.

John C. Gallagher of St. James, is spending a few days here on business connection with the probate court and some personal affairs.

Mr. Max Wohlleben of Cincinnati, Ohio, is here for his annual vacation, according to his usual custom, and is a guest at the Elston cottage.

For the convenience of patients from Beaver Island, Dr. Leahy, the Optometrist, will be at the Hotel Charlevoix Tuesday, Sept. 6th.

Mr. and Mrs. A. H. Buttars of Pellston, were visitors in Charlevoix last Thursday. They were accompanied by their son, Kaye Buttars and wife.

Stanley A. Bush, a former Charlevoix resident but for the past few years living at Marquette, spent some time here early this week with local friends.

The Woman's Guild of the Episcopal church will hold a sale of cake and fancy work at the Charlevoix Hardware store, Friday beginning at ten o'clock.

Among the arrivals at the Bartlett this week are: Mr. and Mrs. Arthur Foley and daughter; Mr. and Mrs. Lester Huber, and Dr. and Mrs. Hamma, all of Springfield, Ohio.

Rev. James McGee, pastor of the First Baptist Church of Flint, who has been spending his vacation here, was called home last Thursday owing to the sudden death of his sister. He returned Sunday evening.

The Hagenbeck and Wallace Circus held open house, at so much per, in Petoskey last Monday and was well patronized at both the afternoon and evening performances. Charlevoix supplied a large number of people, young and old, at each of the entertainments, with perhaps the larger number present at the evening show.

William W. Boyle, postmaster at St. James, spent Tuesday night in Charlevoix, returning to St. James Wednesday morning, after attending the funeral service of his brother-in-law, held at Harbor Springs earlier in the week.

Mr. and Mrs. C. W. Miller and Mr. and Mrs. Melbourne Baldwin of Tampa, Florida, motored in a few days ago and are spending a short vacation with relatives and friends in Charlevoix. Mrs. Miller is a sister of Mrs. Glenn See.

Mr. Carl Kohler motored up from Springfield, Ohio, arriving here Saturday morning. He joined his wife and mother and little son, "Buddy," who have been here for some time, guests of Mrs. Kohler's mother, Mrs. L. B. Bartlett.

Mrs. Harry S. Otis and daughter Jane, of Los Angeles, Cal., spent Thursday and Friday of last week with Mrs. Otis' uncle, Swayne Payton, 213 Park avenue. The visitors are spending the summer in the East and motored up from Detroit.

Mr. and Mrs. Norman Ballard of French Lick, Ind., guest for some time at the Belvedere, made the trip to Mackinaw Island Wednesday, where they will spend a few days, after which they return to Charlevoix for the balance of the season.

Dr. Paul Kirsch of Rock Island, Illinois, arrived here Monday on his regular annual pilgrimage to Beaver Island. Wednesday accompanied by a friend or two from San Antonio, Texas, he continued his trip to St. James where he contemplates spending the next three or four weeks.

Captain Charles H. Hubbard, superintendent of lighthouse service in the 12th district, with offices in Milwaukee, spent a day or two here this week. He was making an inspection of this branch of the government service, visiting the several stations in this district, making the trip on the U. S. S. Sumac.

Mr. and Mrs. Arthur Johnson and Mr. and Mrs. Bryan Hayden motored up from Grand Rapids last Friday and were guests of Mr. and Mrs. Russell Powers over the week-end. They left Monday morning and will make an extended trip through beautiful northern Michigan before returning to their homes in Grand Rapids.

William Finucan of Grand Rapids, Mr. and Mrs. Richard Finucan and Mr. and Mrs. Stanley Finucan of Lansing, spent a few days here with friends and relatives during the week. All but William Finucan have continued their trip to northern parts. He will remain in this city several days before he returns to Grand Rapids.

Dr. Ludvig A. Brustad of San Antonio, Texas, was a passenger on the S.S. Manitou last Tuesday, making the trip from the Lone Star State to spend a short vacation at St. James with his friend, Dr. Paul Kersch, who arrived in Charlevoix a day or two earlier from Rock Island, Ill. The two friends made the trip to St. James Wednesday.

The weather man delivered a fine rainstorm to the public in this locality last Monday, the first in this line for several weeks. This storm was of inestimable value to agriculturists and gardeners. With the long draught broken there is every indication that fall crops will yield abundantly or at least the normal yield per acre.

Ensign Edward K. Shanahan for some weeks in Charlevoix with his parents, Attorney and Mrs. Lisle Shanahan, left for San Francisco last Sunday, where he will see service on the U.S.S. Idaho. His summer leave of absence expires on the 26th inst. and his notice from the department explicitly called his attention to the date for his appearance aboard ship and assume his duties in connection with his service.

Friends from out of town who attended the funeral service for Mr. W. C. Jenkins, last week, were: Mr. Nelson Jenkins and daughter, Miss Gertrude, Niagara, Wisconsin; Mr. and Mrs. L.L. Cram and family, Mr. and Mrs. V. O. Cram and family, Flint; Mr. and Mrs. Fred B. Berry, Mrs. Robert Warrous, Detroit; Mrs. Belle Fineout, Petoskey; Dr. and Mrs. J. G. Taylor, Marlette; Mr. and Mrs. Joseph Taylor and daughter Stella, Mr. and Mrs. Verne Taylor, Boyne City; Mr. and Mrs. Floyd Bartholomew, Mr. and Mrs. John B. Taylor, George VanHusen, Bert VanHusen and mother, Hortons Bay; Mr. and Mrs. Charles Taylor, Walloon Lake.

Whole Alphabet in Name

Here is a simple way to learn the letters of the Hawaiian alphabet.

A son was born recently to Mr. and Mrs. Joseph Aiohikea of Honolulu. And the child was named:

Joseph Keohookalanikaumokaniokaokaoe Aiohikea.

The youngster's middle name contains all the letters of the Hawaiian alphabet with the exception of "w."

Literally translated the name means "the hair of the king is like the wind of Kakae." Kakae is a settlement on the island of Maui.

The Vicious Circle

Prisoner—I admit, your honor, that I was exceeding the speed limit, but I was afraid of being late at court.

Judge—And what was your business in court?

Prisoner—I had to answer the charge of exceeding the speed limit.

Get Cleaners Naptha at North Side Service Station, Petoskey avenue.

Charlevoix Hardware Company Has Novel Display Window

A winter scene in the display window of the Charlevoix Hardware Company is the center of attraction with local citizens and summer visitors, and makes for an alluring call to all lovers of winter sports. It is suggestive of anticipated pleasures such as can be enjoyed to the utmost in this region at the proper time—something enjoyable during the winter season and also a reminder of pleasurable days and nights in the past when our own people indulged in winter pastimes. We are not over-anxious for even the near approach of winter, but when the time arrives we want everyone to enjoy it to the full!

BEAVER ISLAND

James B. Martin is home.

Paul Kerch of Rock Island, Ill., is at his bungalow.

Mrs. Dan Gillespie was in Charlevoix over Sunday.

Eugene DeVincent of Rogers City, is here on a visit.

Miss Elizabeth Gallagher of Green Bay, is here on a visit.

Bishop Lynch of Dallas, Texas, visited friends here last week.

Mrs. Con McCauley of Chicago, is here for a visit with friends

Fr. Leo McMannon left for Grand Rapids Monday for a brief stay.

John C. Gallagher went to Charlevoix on business with the probate court.

C. and A. McCauley of Detroit, are visiting their father, Frank McCauley.

Mr. and Mrs. Adolph Sendenberg and Fred Sendenberg were in Cleveland, returning Monday.

Mr. and Mrs. Fred Floyd and family, of Grand Haven, are visiting with their mother, Mrs. Mary Floyd.

Mr. and Mrs. Don Donlesy and daughter, have returned to Chicago after spending two weeks with friends.

The ball game Sunday between the home team and the Curtis Boys of Mackinaw county, resulted in a tie—3 to 3.

Mrs. John C. Gallagher and grand daughter Alice, of Green Bay, returned home after spending ten days visiting friends.

Odd Legends About Inhabitants of Moon

The weird marks seen on a full moon, and today known to be mountains and valleys on the face of the Queen of Night, have given rise to many quaint legends, peculiar to different countries. In certain races the man in the moon is a being who, on account of great wisdom, says a writer in the Popular Pictorial, was transferred to the moon, from which he was able to see everything that occurred. To the Chinese he is Tse-tao, who arranges all marriages. Among the old Red Indian tribes the medicine men received their power by departing into the middle of a lake and holding consultation with the man in the moon.

The German version deals with a peasant who was reprimanded by an angel for gathering fagots on a Sunday. He replied, "Sunday on earth, or Monday in heaven, it is all the same to me." For this he was sent to an eternal moonday in heaven.

The earliest English version appears in the writings of a St. Albans monk. Here it was Moses who found a man gathering sticks on the Sabbath, and expelled him to the moon. In France the man in the moon becomes Judas Iscariot, and the wood is a load which he must always carry as a punishment.

Captive Wild Beasts Have Strong Appeal

Long before Christ the desire of the public to view wild animals, birds, reptiles and fish at close range manifested itself. Royal preserves and menageries are as old as the civilization of Assyria and Egypt. In 1100 B. C. it is recorded that the first records of the Chou dynasty in China established a zoological garden, the first of its kind of which there is definite knowledge. This garden was called "Intelligence park and appears to have had scientific and educational objects. The ancient Romans kept in captivity large numbers of such animals as leopards, lions, bears, elephants, camels, rhinoceroses and hippopotamuses as well as ostriches and crocodiles. Emperor Frederick II had at his Sicilian court a notable collection from which he sent to Henry III of England three leopards in compliment to the three animals of that species that appeared in the monarch's coat of arms. These animals, with an elephant sent not long afterward by Louis IX of France, formed the nucleus of the famous Tower menagerie.—Detroit News.

Cultivate Good Mind

Worry produces indigestion and dyspepsia; the gastric juices are not formed. Hate thoroughly, and you will be a martyr to neuralgia. Be violently jealous, and the upset to the glands sows the seeds of cancer. Be malicious and cruel, and you'll get neuralgia. Be a fault-finder, a nagger, a scold and asthma comes. It is impossible to disconnect the mind and the body. An ill thought doesn't stay in the mind; it hits the body somewhere. It has been noted that extreme disgust will produce catarrh. It is not always possible to ward off external causes of disease, but we ought to be able to control our minds. Poison in the mind means poison in the body—suffering, and a shortening of life. Have a "good" mind, and you'll have good health.—London Tit-Bits.

Good Manners

"Manners are not idle, but the fruit of loyal nature and of noble mind."—Tennyson.

27x54 Hit and Miss Rugs, 69c. Charlevoix Hardware Co.

Free of normal Federal Income Tax.

Here is an Ideal Investment—It is Safe and Pays 7 Per Cent

Why You Should Own This Stock

1. It is backed by a going business firmly established, well managed and permanent.
2. Your savings will be safe, each share has a substantial equity in property value back of it.
3. Your dividend checks will be regular and dependable.
4. Convenient income paid quarterly—on 1st of January, April, July and October.
5. Dividends exempt from Normal Federal Income Tax.
6. Purchased by Thrift Plan at $5.00 per share per month.
7. Attractive price $100 per share and accrued dividend to yield 7%.

EVERY investor wants safety for his money. Add a liberal, dependable yield to that safety and you have the best possible investment for your savings. That is the reason why nearly 3,000,000 Americans are satisfied holders of Public Utility securities—because they combine safety with good yield.

You have the opportunity to become a Public Utility security holder by purchasing shares of the MICHIGAN PUBLIC SERVICE COMPANY 7 per cent Series Cumulative Preferred Stock.

This company is well established and well managed. It supplies essential Utility service to a population of about 47,000 in Michigan. It has approximately $4,500,000 of assets and its annual gross earnings are almost $600,000.

You can purchase this stock for cash or on our Thrift Plan. Price $100 per share plus accrued dividend to yield 7 per cent. Ask any employe of the company about this stock. The majority of them became owners when the first offering was made because this stock gives them safety and liberal income from their savings. You can call at the office for descriptive circular or telephone for a representative of the company to come and see you and explain this investment.

CHURCHES

Methodist Church.

C. E. Pollock, Pastor.

Rev. Joshua O. Randall, D. D., District Superintendent of Grand Traverse district, will preach at the 10:30 a. m. service next Sunday. Dr. Randall is a fine gentleman and an excellent preacher. The public is invited to attend.

One Fourth Quarterly conference will be held at 12 o'clock next Sunday. All members of the conference are expected to be present.

The Greensky Indian Campmeeting is now in progress. All who are interested are welcome to attend. The camp meeting closes next Sunday.

An interesting Sunday evening service is planned for 7:30 next Sunday with special features. All our summer guests are urged to attend.

Rev. A. W. Lamport preached a remarkable sermon last Sunday morning. Even though he touches the four score mark in point of years, his mind is virile and his spirit is vigorous and sympathetic, while his vision of spiritual facts is very keen.

Church of God

G. H. Fye, Minister.
Stone Chapel, West Hurlbut Ave.

A change in time has recently been made in Sunday morning services. Sunday school will be held at 10 o'clock a. m. and preaching at 11. Young People's meeting at 6:30 p.m. and evening service at at 7:30 p.m.

Prayer meeting Wednesday evening at 7:30.

Some ministers and workers from Anderson, Ind. are spending a short time in our midst and gave us two inspiring messages last Sunday, and we are hoping for more next Sunday.

Everyone is invited to come to these meetings. Your presence is appreciated

Baptist Church

Rev. Herman Burns, D. D.,
—) Pastor (—

Rev. William R. Shaw of Ypsilanti will conduct services Aug. 28 and Sept. 4. People will greatly enjoy hearing this popular young pastor.

Dr. and Mrs. Burns are having a few weeks' vacation, visiting friends in the southern part of the state.

Congregational Church

Rev. B.G. Mattson, D.D., Minister

The pastor will preach at the morning service on "The Love of God in this Realm of Law." The hour of the service is ten thirty.

The Sunday school precedes the morning service and begins at 9:30.

The evening service is at 7:30.

Afternoon service at the Ironton church at 2:30.

The program of dedication of the renewed church building was recently carried out most successfully with a large attendance at all the features, beginning with the annual dinner and bazaar by the Ladies' Aid, followed by the Sunday service and visit of the state superintendent, and closing with a fine concert given by members of the Camp Charlevoix staff, assisted by members of the Sequanota club.

Christian Science Society

Sunday service, 10:45 a.m., Subject, "Christ Jesus"

Sunday School 12 o'clock.

Wednesday evening service 7:45.

Reading room, Tuesdays and Saturdays, 3 to 5 p. m.

The public is cordially invited to attend our services and use our reading room.

St. Mary's Catholic Church.

Sundays 6:00 a. m., and 9:00 a. m.
Saturdays and Mondays mass at 7:00 o'clock a. m.

Rev. Fr. Odelo.

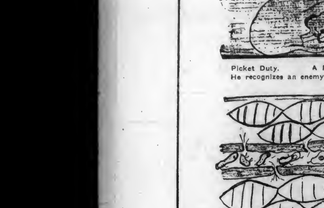
YOURSELF and YOUR BODY

By WILFRED T. GRENFELL

THE BLOOD

Picket Duty. A Phagocyte skirmishing. He recognizes an enemy and eats him.



Whites and Lymph Get Through, but Not Reds.

"WHY is our blood to be our life, father?" "Why, because our body has got to keep alive in every part, and we must have a live fluid, full of live workers, living to every part all the time, all our lives, carrying these all their gear for continual repairs.

"When we built our home, first there had to be an architect. Mother did all that, drew the plans and watched over the whole thing. Then we had to have carpenters, masons, plasterers, plumbers, electricians, ordinary laborers, and even sewermen, to keep the place clean; then came gardeners, cooks, servants, to keep it going; then came policemen and soldiers and sailors and lawyers to keep it safe; and sometimes to keep it fed and clothed. All these jobs have to be done for our body house by the blood and its myriad little workers. They are all very busy or they could not possibly get into any ordinary-sized body—not at once, all have to be immense giants, clumsy and no good in a world like ours.

"Can we see these workers?"

"Certainly we can. Here is a frog. I am not going to hurt it, but just to put the end of his toe under the microscope. Now what do you see? A lot of little red disk-bells tumbling over and over, and passing quickly along inside some pipes. Anything else? Look carefully, a rounded, white fellow. But he is only crawling slowly along. High you are. Those are far the most important servants we have.

"For thousands and thousands of years these faithful little Red Knights have been our friends, living and dying for us. Though we did not even know it: They really build our bodies and take care of them. Take another look at them. See how busy they are about their affairs.

"The Reds dash to the lungs and grab up oxygen and give in exchange ashes and garbage that they have picked up in their work. They never leave a mess around when they have done; they just lift it all up and carry it off, and then come the White Knights—the real scavengers and police and soldiers—and see that everything is all right and safe. We will talk of them later.

"The Reds have to be ready to give up their oxygen quickly, so they carry it on their skins; and in order to be able to carry as much as possible, they are shaped like this—and they arrange on cleverly that their sides all together are 1,500 times as big as the skin of the whole body. Does that puzzle you?

"Here is a Red. You see he is carrying bundles of oxygen. He flies it with some jelly-like stuff called haemoglobin, and that is what makes him so red, and why you get those red spots when you have been out in the good open air and gotten a lot of oxygen in your blood. It just shows through your skin. That is the way the Reds keep up steam all over our body, by burning up the food and tissue. That is how they keep us warm, always at the same temperature, about ninety-eight degrees, and also full of energy.

"The Reds do heaps of other useful work. If a leak happens to appear in the side of the pipes, of course our body will, in time, bleed to death—that is, lose all its blood. So the Reds and White Knights plumbers for the leak and help to stop it."

"Tell us more about the White ones, father. What do they do?"

"Oh, there aren't so many Whites as Reds. Only one to every 2,500. They are larger, and, as you see, do not hurry about like the Reds. But they are the fiercest little fighters you ever knew. They not only kill, but eat their enemies at once, and only when they have safely swallowed them do they march off to the battlefield, and thing they can do which is convenient; they can call up any number of reserves if needed.

"As soon as any part of the body is wounded, the Whites send a scout parties along, like the scout here when a wasp is going to occur. If there is poison in the wound, such as bacteria going through dirty soaked clothing carried with them in the war wounds, a real swarm of Whites scurries about in fact, if you are feverish, and the doctor thinks that you are poisoned by germs, but don't know, he will take a drop of your blood, look at it through the microscope, and count how many Whites there are in it. If there are too many, say two hundred of one to each fifty space, then he knows that the whites have found germs somewhere, and are hurrying around looking for the trouble.

"These Whites don't look to be much, but they really are fierce as lions. They do not care how dangerous the enemy germ is. Right There in the dark they dart out on him and kill him or get killed.

"Unfortunately, enemies do win sometimes, and endless brave Whites are killed, as they were in Russia. Their dead bodies are then left on the battlefield, and often any number of dead cells from tissues as well. Many Reds may have leaked out from broken pipes, and died also. The heat and swelling which result from the battle are called inflammation, and the dead mess left behind is called pus, or matter.

"Our blood is so valuable that there must be no leaks; and even the finest hair tubes have a wall one brick thick. So, really, the whole blood never touches any outside cell itself. It is like men living in a city who enjoy eating fish, but can never go and catch one. However, the tiny pipes or capillaries are so close together in some places that the distance between them is less than their own width. What is necessary is some middleman to get the food to the cells outside. This is called lymph. It finds its way between the broken brick in the hair walls, through holes too small for the Reds to get through. In this way every cell gets a part of warm bath of soup all day and all night. This takes a great deal of lymph, almost three times as much as there is blood."

(© by the Bell Syndicate, Inc.)

INDIANS FINE CARVERS

American Indians are skilled ivory carvers and could put a modern butcher to shame. In the days when they slaughtered buffalo they did it with great technique. Muscle by muscle they lifted the meat from the carcass, never cutting across the grain, until nothing but bones remained. These they dissected carefully to obtain the marrow. The bones were fashioned into weapons, while the hide provided clothing.—Washington Star.

ANTELOPES' CURIOSITY

One of the reasons why the antelope herds were so quickly reduced in number is because of the natural curiosity of that animal, which depended on its fleet feet to elude the hunter after its curiosity brought it into the open. The black-tailed deer is like the antelope, while the white-tailed deer is less curious. It is said the antelope can hardly resist the temptation of making a close investigation of anything unusual.

Have Built 60,594 Miles of Roads

Ten-Year Record Shows Federal Aid Speeds Up Whole Country.

Washington.—Ten years of federal participation in highway building under the provisions of the 1916 federal aid act ended on June 30, last, and in that period about two-thirds of the federal aid system of 171,087 miles were hard surfaced, macadamized, graveled or otherwise improved. Another decade, if the states continue to follow their policy of accepting federal funds and general supervision, will see the system completed.

The vast importance of the system embracing, as it does, practically all interstate highways, is evidenced by the fact that its arteries reach every city of more than 5,000 inhabitants in the country and if a zone of ten miles were marked off on each side of the roads in the system, that zone would include the homes of 90 per cent of the country's population.

60,594 Miles Built.

On May 31, 1927, the country's investment in highways of the federal aid system, built with government cooperation, reached a total of $1,145,400,031, of which $505,969,573, or about 44 per cent, was contributed by the federal government. To date 60,594 miles of roads in the system have been built jointly by the states and the federal government. Meanwhile, many of the states have gone forward on building programs without waiting for help from the government, and the result is that two-thirds of the system originally contemplated is now completed.

In 1916, when the federal aid act was passed, only 387,047 miles of the 1,001,825 miles of road in the country were surfaced. Today the surfaced mileage slightly exceeds 521,915 miles and the construction problem grows increasingly important because the unprecedented increase in the number of motor vehicles, the development of suburbs, and the participation of motor trucks in industry necessitate further extension of roads in width as well as length.

For Mail Service.

Originally, the purpose of congress in establishing the federal aid system of highway construction was to improve highways for the promotion of the rural mail service, but the policy was subsequently extended to authorize the secretary of agriculture to show preference to projects to "expedite the completion of an adequate and connected system of highways, interstate in character."

The experience during the war in the endeavor to move munitions and materials by railways as well as to the railroad systems brought out forcefully the fact that there had been little unity or system in the work of road building beyond that exercised by private organizations, such as the Lincoln Highway association, and similar groups.

Discord Arises.

States and counties were responsible for such systems as were built, and discord arose in various communities as they got well under way and changes in various sections exacting their efforts to have road improvements touch their own localities. The result was that at the beginning of the war few of the principal cities of the country were entirely connected by good roads, passable in all kinds of weather.

Under the 1916 federal aid road act

FEDERAL AID ROAD MILEAGE

The following table shows the total number of miles of federal aid roads constructed in the several states, the total cost and the amount of federal aid extended:

State	Miles	Total Cost	Federal Aid
Ala.	1,399	20,061,372	9,615,100
Ariz.	774	11,715,812	6,399,445
Ark.	1,561	23,717,015	9,525,150
Calif.	2,301	44,845,854	16,455,854
Colo.	826	15,439,224	7,591,870
Conn.	427	7,197,392	2,444,000

Fla.	1,475	7,475,856	3,627,313
Ga.	2,122	26,706,387	14,539,254
Idaho	1,116	12,215,515	7,075,257
Ill.	1,531	45,338,982	22,781,546
Ind.	1,241	22,659,276	10,944,522
Iowa	2,468	34,078,919	14,782,487
Kans.	2,978	27,999,054	14,527,761
Ky.	1,197	22,985,362	9,467,554
La.	1,378	19,564,359	7,817,814
Maine	1,313	16,564,656	4,858,452
Md.	478	11,796,264	3,524,538
Mass.	410	25,373,746	3,475,929
Mich.	1,694	31,440,551	14,138,219
Minn.	3,643	45,099,648	19,046,146
Miss.	1,594	17,668,259	8,672,829
Mo.	1,765	41,215,515	19,053,373
Mont.	1,151	12,854,993	7,787,288
Neb.	2,281	18,930,179	7,816,488
Nev.	598	10,334,551	7,513,029
N. H.	312	5,278,929	2,272,929
N. J.	316	22,226,241	7,404,364
N. M.	1,004	14,445,854	6,722,854
N. Y.	1,474	55,382,381	21,613,421
N. C.	1,564	15,255,240	6,241,503
N. D.	2,715	15,872,981	7,401,364
Ohio	1,778	54,831,193	19,773,193
Okla.	1,726	30,331,957	14,117,559
Ore.	1,260	19,316,107	7,295,401
Pa.	1,105	15,962,745	3,591,443
R. I.	103	5,233,145	1,171,929
S. C.	1,168	17,062,940	7,526,588
S. D.	2,174	14,527,915	7,263,957
Tenn.	850	24,137,601	11,506,327
Texas	2,722	39,000,000	14,454,653
Utah	622	9,134,377	5,767,089
Vt.	373	5,037,124	2,548,558
Va.	1,599	26,761,003	12,470,625
Wash.	1,161	21,000,000	8,246,252
W. Va.	613	13,434,947	4,570,748
Wis.	1,522	27,651,663	13,825,831
Wyo.	1,212	12,656,913	7,030,267
Total	60,594	$1,145,403,031	$505,969,573

It may be noted that the amount spent in construction does not necessarily indicate the mileage of roads completed, due to the fact that while some states need high types of roads because of heavy traffic density, others need only low grades of roads, which can be built for very much less.

$500 REWARD OFFERED FOR PICTURE OF SEA SERPENT

Monster With Sheep's Head Often Seen in Okanogan Lake, British Columbia.

Okanogan, Wash.—With a standing offer of $500 for a snapshot of the strange creature detected repeatedly in Okanogan lake, across the line in Canada, local residents and many automobile tourists are living along the shores watching daily for the expected appearance of Ogopogo, as Indians have designated the monster.

The sea serpent report emanating from the northern lake is not a fairy tale, for affidavits of well known people are on file at Vernon, B. C., to prove they observed Ogopogo, with its sheepslike head and long, serpentine body. From time to time there have been stories of a strange denizen of the lake, to which was attached a general incredulity. Some folks said nothing for fear of ridicule, but others having seen it compared notes found to possess common points.

Of the numerous eyewitnesses of the deep water creature J. L. Logie, a resident along the lake for 20 years, reported a statement for a newspaper, describing his observance of Ogopogo.

"On our way from Summerland, driving along the lake, we saw quite a ripple and a swell ahead of us, close to the shore, but the lake itself was perfectly calm. Driving about 25 miles an hour, we soon came abreast of the swell, when instantly a strange looking animal appeared, exposing about three feet of its body. The head looked very much like that of a sheep, but different from a seal, having a pointed nose. The body was dark, but no fins were above the water.

"As it swam a foot high swell was developed, showing the animal possessed weight and power. Diving suddenly, it again came to the surface 30 yards farther on. Hearing our shows, it then disappeared.

"In no story or picture have I ever read or seen anything like this. I am of the opinion there are several in the lake. Apparently they are getting new bold and expose themselves while playing or fighting."

Okanogan lake is 20 miles long and 7 miles wide, and is said to be very deep. There is room for large creatures to live without exposing themselves to the curious, but rarely one comes to the surface. But he may be the first to record the inland sea serpent.

Lightning Freak

North Agawam, Mass.—During a thunderstorm Henry Campbell and son took refuge inside a house they were building. Their dog stood between them. Lightning killed the dog. Neither man was hurt.

Mexican Smokes 100 Cigarettes Every Day

Alvarez, a Texan of Mexican parentage, smokes 100 cigarettes a day. His tobacco bill, since he has taken to smoking ready-made fags, runs from $1 to $1.50 a day. Now he will return to the makings and cut down the cost.

Alvarez, who came east on a vessel from Galveston, a short time ago, has been looking for a job in this section. He is thirty years old and has subsisted since he was a small boy. The habit has not grown on him since he reached the age of twenty-one.

"I have always smoked my 100, more or less," he says. "I had no idea I was using so many until I quit the house to buy tobacco and rice papers for cigarettes. I buy eight to ten small packs a day now, twelve to the box."

SATIN FROCKS FOR AUTUMN; COLORFUL VELVET CHAPEAUX

NOT in fashion's realm will "silver and gold have I none" be voiced, for early arriving autumn modes gleam with touches of not only gold and silver, but of copper, steel, brass and, yes, tin if you please. It is a fact, some genius has devised an extremely novel trimming which accomplishes a handsome effect by riveting bits of tin over multi-colored strands of silk.

Autumn's style horoscope is proclaiming the sortal vogue in no uncertain terms. Imagine such a frock as this, and it is, to say the least, "perfectly stunning"—black satin one-piece model studded all over with steel nailheads which are riveted into the very fabric. At the proper waistline a belt is simulated by working in gold metal nailheads, in solid form. The effect is thrilling, and presents a season of fascinating revelations in the way of metallic embellishment.

The picture shows the enlivening effect of metal embroidery on black satin. Seems as if black crepe satin suffers from crowding the style stage in numbers greater than ever. A surprising group gleam with unique and excedingly handsome touches of metal, after the manner of this illustration.

Among afternoon ensembles of black velvet are also written in the book of fashion—and their appearance will not be deferred until late fall, for nowadays velvet is so sheer and supple it lays claim to being an all-year round fabric, owing to its suppleness. velvet is indulging in any amount of flattery. Often the chief attraction is accomplished in this way. In harmony with the trend toward metal decoration, the blouse, preferably of white or flesh georgette, is embroidered in gold and silver paillettes.

There is also a discreet use of metal on many a simple cloth frock, such as a few nailheads on cuffs and collar or on outlining of metal clasps on bow edges.

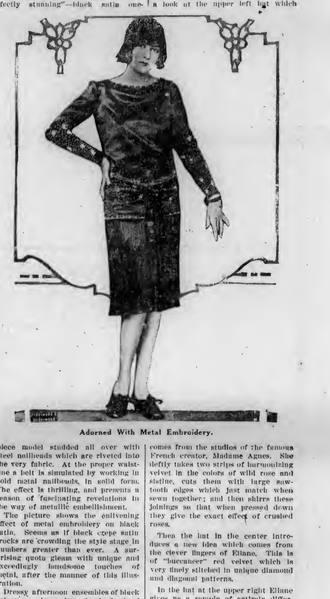
Velvet is apparently going to have a marked influence on the new season's millinery. Even now women are of smart fashion are choosing matching velvet models for midseason wear.

Mandarine in Chiffon Frocks

A new color upon fashion's horizon is mandarine, a combination of yellow and orange that is extremely beautiful. Chiffon dance frocks of this material are simply made and absolutely unstrimmed, depending upon the color for their beauty.

White Satin for Evening

Frocks of white crepe satin are very smart for evening wear. With these are worn shawls of black Chantilly lace.



Adorned With Metal Embroidery.

Some Midseason Hats.

At last, judging from the "advance guard" of millinery for fall, we are going to have some hats that are really different, so that when we go strolling down the street we are not going to have the feeling that every other hat we come face to face with is first cousin to the one we have on. In other words fashion is doing little tricks of deviation here and there that are making millinery decidedly more fascinating and taking it out of the realm of monotony.

Interesting variety is achieved in a number of different ways. Just take a look at the upper left hat which offers to its fine workmanship and excedingly handsome touches of metal, after the manner of this illustration.

Among afternoon ensembles of black velvet are also written in the book of fashion—and their appearance will not be deferred until late fall, for nowadays velvet is so sheer and supple it lays claim to being an all-year round fabric, owing to its suppleness. velvet is indulging in any amount of flattery. Often the chief attraction is accomplished in this way. In harmony with the trend toward metal decoration, the blouse, preferably of white or flesh georgette, is embroidered in gold and silver paillettes.

There is also a discreet use of

which object to being taxed by the federal government for the purpose of building roads or supporting other federal aid activities in the less populous states.

If Things Are Going Wrong, Blame Weather

Fort Worth, Texas.—When things go awry, blame it on the weather, says D. S. Lundis, philosopher and for 25 years weather observer here for the United States weather bureau.

Temperature and humidity affect the human nervous system, and fluctuations cause nervous activity or reflected in the actions of people over a large area, he believes.

Cloudy days, raising the spirits of the people, making everyone more optimistic and reducing their blood of friction.

A cloudy day, on the other hand, while a boon to the people of a city of caustic type, is an irritant to persons of more vital nature and causes unrest and brittleness of temper, according to Lundis. He says that police records show that crime, especially suicides, increases on gloomy days.

Periods of drunkenness, brawls, assaults, murder, arson and the like will be found segregated under similar conditions, Lundis believes.

Although hot weather generally causes crossness and irritation where humidity is great, there are sections in the Southwest where the mercury reaches 120 degrees, and the dry heat becomes actually exhilarating, in Lundis' opinion.

"A mean temperature of 70 degrees is the best for normal living conditions with an average amount of moisture," Lundis said. "Fluctuations from this cause nervous activity.

"It is not always humanity that causes us to do the things we do often is the weather working on our neutral make-up."

Bone Placed in Spine, Girl Cripple Can Walk

Chicago.—For the first time in three months nine-year-old Colletta Birk of 691 North Lemington street, is now able to walk.

During all that period she had lain, all but unconscious, in a plaster cast, extending from her hips to her neck, held there by the rigid while a bit of bone that a surgeon took from her left leg knitted itself firmly into her spinal column.

About a year ago Colletta's spine was injured by a fall while roller skating and tuberculosis developed in the injured vertebrae.

Left in bed Colletta was taken to the Norwegian-American hospital. Dr. Fred Mueller cut out the diseased bone, replaced it with a carefully fitted piece of her left tibia and incased her in the plaster cast.

"She is in fine condition, and, while she took only a few steps, Colletta can walk unaided; and, like any other child," said her father, Harry J. Beck.

This Man Served on Jury Every Year Since 1908

Memphis, Tenn.—When it comes to serving on the jury, Lawrence W. Akers, a Memphis man, can tell all about it. He served on some kind of a jury every year since 1908.

Even though he was one of citizenship at times threaten to break up his home, ruin his business, and always gives him a vacation that he doesn't want, Akers has held little luck in getting out of jury service. When called as a veniereman the first few times he acted with good grace, for he thought he was performing a civic duty. But with civic duty calling year after year, Akers got tired.

But the judges laugh at his excuses and ask for reasons. Akers stays on the job.

CHAPTER IX—Continued
—13—

A moment later and I had entered the house, never dreaming that across its threshold lay the first romantic adventure of my life. Yet so it was. One instant in the open air, thinking somewhat morosely, that the world war filled with cruel and treacherous and generally unpleasant people, the next inside the entrance, to be greeted, in the cool, dim light, by the loveliest girl that I had ever seen. Even McAllister, at sight of her, displayed, for the first time, a trace of courtesy, explaining, with an air which for him was almost genial, "Helen, my nephew Robert. Robert, this is my adopted daughter. Put two must be company for each other."

"Company for each other!" I could have asked no better fate. For I had known, up to the present, only our Straitsmouth lassies, healthy button girls, and certainly not to be compared, looking in their way, but now—this vision of slender grace, clad all in white, auriferous hair, dark eyes, and with a face and form so utterly bewitching that I could have sworn she was not flesh and blood, but an angel descended from the skies.

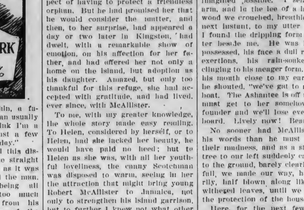
Angel, I say; and that was truly my first impression, though later I was to change it, for though no angel could take more heavily to the ire eye, yet her temper was more like that of some mischievous imp. For the first hour of our acquaintance, indeed, she played the kindly hostess to perfection, showing me to my room, a pleasant airy chamber at the top of the house, and so fascinating me that I, for the moment, could hardly keep my eyes from her face. But presently, as we became better acquainted, and as she perceived the conquest she had made, I was to discover, to my sorrow, that she had as many moods as an April day. That afternoon she took me on a tour of the island, and in that time she managed to exult me to the mountain tops and then to plunge me into the depths. Sometimes she was gently and, gazing at me so sweetly that I fancied she adored me, then, without warning, she would turn coldly and with actual disdain, and then quarrelsome as one fancied, wilfully distorting whatever I strove to say, and nearly driving me crazy in my attempts at replies to her fierce, So hopeless, indeed, was my infatuation that when it came time to retire, I could not sleep, and knowing that the huge door was locked and barred, I knotted a piece of rope, which I found in my bedstead, and thus slipped to the ground and started on a stroll in the cool fever, with her lovely image before my eyes.

In the morning, however, I remembered, though reluctantly enough, that life for me was not a romantic, rose-tinted dream, but a stern, hard reality; and that I had not come to the island to moon over a pretty face, however delightful, but to gain what knowledge I could regarding McAllister and his plans with regard to our defense and his supposed horde of treasure.

It was evident that the house could not be easily taken, for the lower story, as I have said, was thoroughly built of stone, and the only entrance was a massive door, swinging on powerful bronze hinges, and always, after dark, carefully locked and barred.

The garrison, too, was equally impressive, consisting, as it did, of a dozen swarthy negroes, those fierce descendants of the slaves of the Spanish conquistadores, all supplied with rifles and ammunition, and all under the command of a certain Cassar, his second in command, a half breed giant, six feet and a half in height, and Quasimio, only inch or two smaller than Bill. Altogether, it was clear enough that the taking of the island would be no easy task.

Of McAllister himself I saw surprisingly little, and this, of a surety, for reasons, sullied one exactly. For one thing, I thoroughly disliked the man, and knew that he and I had mesmerely nothing in common; for another, I had more time to be with Helen; and for a third I suspected that, if I had been lured out to it by a flood of questions, whether I could have displayed any part as Robert McAllister. Naturally enough, he accepted my story as true, and it was easy enough for me, before I had been under his roof twenty-four hours, to have his and I had mesmerely nothing in common; for another, I had more time to be with Helen; and for a third I suspected that, if I had been lured out to it by a flood of questions, whether I could have displayed any part as Robert McAllister. Naturally enough, he accepted my story as true, and it was easy enough for me, before I had been under his roof twenty-four hours, to have his and I had mesmerely nothing in common; for another, I had more time to be with Helen; and for a third I suspected that, if I had been lured out to it by a flood of questions, whether I could have displayed any part as Robert McAllister. Naturally enough, he accepted my story as true, and it was easy enough for me, before I had been under his roof twenty-four hours, to have his and I had mesmerely nothing in common; for another, I had more time to be with Helen; and for a third I suspected that, if I had been lured out to it by a flood of questions, whether I could have displayed any part as Robert McAllister. Naturally enough, he accepted my story as true, and it was easy enough for me, before I had been under his roof twenty-four hours, to have his



"Some People Think I'm a Rich Man. But I'm not."

was hot and sultry, so that even the breeze from the sea seemed to blow less refreshingly than usual; he revved his car with a fury that left Helen, at the western bank of the river, and with telescope under his arm climbed to a hilltop, remained there until lunch time, and immediately after entering the house, left it again, and this time did not return until dinner time, when I, the weather once had changed my mind, and made my way to the house, found him at the table, with Miss McAllister had rejoined me.

I had not, however, the faintest conception of what a tropical hurricane is like. Before many moments had passed, the sky was filled with driving clouds, a dark and rapidly advancing line on the water showed the coming of the wind, and from far out at sea we could hear a menacing roar which told of the frightful force of the impending storm. And then there broke upon us such a turmoil of raging wind and raging sea as I had never imagined possible. I seized Helen's arm, and in the lee of a huge cotton-wood we crouched, breathless, and the next instant, to my utter amazement, I found the dripping form of McAllister beside me. He was like a man possessed, his face a dull red from his exertions, his rain-soaked clothing clinging to his meager form. He paused his mouth close to my ear. "Quick!" he shouted, "we've got to gain the big boat. The Ashantee is off the bar. We must get to her somehow, or she'll founder and we'll lose every slave on board. Lively now! Here a hand!"

No sooner had McAllister uttered his words than he must have seen their loneliness, and as surely years of time to our left suddenly came rushing to the ground, barely clearing us in its fall, we made our way, half voluntarily, half blown along like so many whirled leaves, until we had gained the protection of the house.

Here, for the next few hours, we were forced to stay, and very glad I was that I imagined such a storm as this. But if I, with nothing but its fierce beauty to think about, was awed and terrified, limning the feelings of McAllister, the miser and money-lover, with the knowledge that somewhere in the stone and darkness, the Ashantee was battling for existence, laden with her precious spoils from the African coast. I have never seen a man suffer so; each new wild gust of wind, each boom of the huge breakers on the land seemed to pierce him to the heart. And when, about midnight, we could, for the first time, feel conscious of a diminution in the gale, he urged me to accompany him to the point, to see if we could learn anything of the fate of the bark.

Once outside the door, I realized immediately that though it still blew tremendously, the wind was steadier, less like a hurricane and more like an ordinary storm. And thus, clinging together, and bending over almost double to force our way into the wind, we pressed once more through the belt of trees and fought our way out to the point.

In the darkness we had become separated, and I had all that I could do to look out for myself without trying to watch McAllister, whose suddenly I was conscious of a strange and terrifying emotion, and found that without in the least intending to do so, I had whirled about and was gazing intently toward the south. I am at a loss, without making myself ridiculous, to explain my feelings, but I only say that without seeing anything pass me in the intense blackness, I felt sure that I was conscious that something had passed. This sounds lame enough, and perhaps I can make myself more clear by saying that if I believed in ghosts or spirits, I had experienced the sensation of seeing at this kind had passed me, borne on the rushing wind. But even with a shake of my head, I dismissed such fancies from my mind, and made my way over to the border of the sea. At this time McAllister had rejoined me, and we stood there together trying to see over the gale of the storm. At once a huge wave swirled almost to our feet, and was then followed by a roaring sand and pebbles in its wake, it left behind it a gift from the sea, a large, shapeless object, and we both sprawled before us. Together we bent over it, and the same instant I perceived, allowing the faint and watery radiance of the starlight to filter through, it seemed to be human, for the black mass was the bruised and bleeding body of a negro, his clothing torn and the expression of agony on his face showing the desperation of his fight with the waves. Beyond all doubt he was dead; nor could there be further question as to the fate of the bark. I heard McAllister groan, like a man stricken to the heart. And strangely enough at a moment I thought of the dying curse of the old man.

CHAPTER X

The Curse of the Obi Man.

By noon next day the hurricane had subsided. Everywhere, however, the gale had left its traces; trees had been uprooted, vessels wrecked, and crops destroyed. Andrew McAllister had suffered heavy losses. To take nothing of the damage to the plantation, not a vestige remained of the bark except the timbers that lined the beach and the corpses of the slaves and of the crew.

McAllister himself was like a man who has been dealt a sudden and terrible blow. He seemed visibly bent and withered; could neither eat nor sleep; and in the evenings would sit with me, mourning, over and over again, the slaves, the gold and the ivory, sunk deep at the bottom of the sea. Unable to sit still, he would pace the room, muttering more to himself than to me, and with a half-belief in the superstitions of the blacks, curing his bloodthirsty overseer for causing the death of the old man.

And indeed, if it was the ghost of the dead negro-boil him over a slow dealing, he seemed bound for a complete revenge, for the hurricane and the wreck were not sole misfortunes. On the very next day one of the mules, who had been to the beach just before dusk, came lying home, half terrified to death. Something, she seemed, had frightened her; something stealthy and shadowy had followed her, skirting the edge of the mangroves, something that had chilled her blood in her veins. Had she seen it? She hesitated. No, she had not seen it, and yet she knew that it was there.

Of course I was not impressed with this wild tale, though in spite of myself I could not help recalling the strange sensation I had experienced on the night of the wreck, a sensation which exactly corresponded to the description of the maid.

(TO BE CONTINUED.)

The KITCHEN CABINET

(© 1927, Western Newspaper Union.)

"Upon a crutch—her airiness fore-Alight with love and tender grace— Lovalking she limps from place to place Upon a crutch.

And you and I who journey through A cosmos full of woe and dole We cry to heaven overmuch: We rail and frown at fate, while she And many more in agony Are brave and patient, strong and true Upon a crutch."

—Anon.

TASTY FOODS

If convenient for one to keep a bowl of fruit gelatin always at hand in the

ice box there may be a quick dessert or salad prepared in a short time. The pineapple juice poured from the can when it is used for various dishes is thickened with

gelatin by using half the amount of hot water and the rest the fruit juice. Lemon or orange, either flavor, is enjoyably used with pineapple flavor. If a dessert is required, prepare a rich custard, chill and serve with the fruit gelatin. If a salad, make a tablespoonful or two of the gelatin cut into cubes, add a diced apple, a few dates and a half cupful of celery with a few drops of onion juice. To make a delicious dressing, add two teaspoonfuls of salt and a few drops of paprika to a tablespoonful an hour, or longer if not tender, then drain, add a cupful of cream sauce and brown lightly in butter. Fry one large onion in the same fat, mix one tablespoonful of flour, two tablespoonful of sugar, and one tablespoonful of curry powder, and brown. Add one cupful of water or stock, one cupful of tomato or one sour apple chopped, with salt and pepper to taste. Pour this sauce over the chicken and simmer until tender. Add one cupful of hot cream and serve with boiled rice.

Jellied Chicken.—Bring to the boiling point two cupfuls of chicken stock from which the fat has been removed, add to it one tablespoonful of gelatin which has been soaked in four tablespoonfuls of water. Press into a mold four cupfuls of seasoned chicken, pour over the stock, put under a weight and chill until firm. Any other meat may be served in the same way.

Maryland Chicken.—Dress and cut up a chicken, sprinkle with salt and pepper, dip into flour, roll in cracker meal, in a well buttered dripping pan and bake in a hot oven, basting with powder of a cupful of cream. Arrange on a platter and pour over two cupfuls of cream sauce.

Nellie Maxwell

About Term "Family"

The term "family," as used in the census, signifies a group of persons, whether related by blood or not, who live together as a household. One person living alone is called family, and all the people in a hotel or institution are known as a family.

Uses for Whalebone

Whalebone, once used so much in the making of corsets, is now mainly employed as bristles in hair and other brushes.

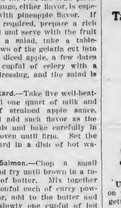
Feminine Appeal in Mind's Many Changes

Man is to blame for woman's habit of changing her mind so often, declares Supreme Court Justice John Ford of New York in an article in Liberty. "Since the beginning of time," Justice Ford asserts, "woman has been the victim of man. She has been pursued, abused, and ill-treated by the big, bulking brute, man. Being weaker, physically, she has had to use guile to protect herself and her offspring. Generations of practice have made her instinctively the master of man.

"Man is her game," Justice Ford continues, "and she knows how to handle him. Not the least of her attractiveness to the male is the very thing of which some of the males complain: her changes of mind. The remoteness of her is a wonderful cure for monotony. No married man can complain of monotony in his wife's thinking."

"BAYER ASPIRIN" PROVED SAFE

Take without Fear as Told in "Bayer" Package



Does not affect the Heart

Unless you see the "Bayer Cross" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians over twenty-five years for

Colds	Headache
Neuritis	Lumbago
Toothache	Rheumatism
Neuralgia	Pain, Pain

Each unbroken "Bayer" package contains proven directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100.

Canada's Peat Deposits

It is entirely possible that at no distant day Canada may be making commercial use of its great peat deposits which are to be encountered in various parts of the dominion. A peat committee appointed by the government and the province of Ontario has been thoroughly investigating the situation and has made some very valuable suggestions. Three operations have been conducted for some time at a point 36 miles east of Ottawa and these have led to the solving of many problems incident on the commercial production and utilization of peat fuel. Machines have been developed for the economical extraction of the peat from the bog and it was found entirely practicable to dry the peat in the air, the essential climatic conditions prevailing over a period of 100 days during the summer season.

CHILDREN CRY FOR "CASTORIA"

Especially Prepared for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 30 years to relieve babies and children of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep without opiates.

The genuine bears signature of

Chas. H. Fletcher

Sufficient Reason

Mother—So you and Jack quarreled last night? Why?

Daughter—He proposed to me again last night.

Mother—Where was the harm in that?

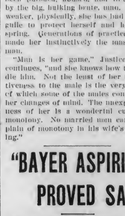
Daughter—Well, I had accepted him the night before.

YOUNG WOMEN MAY KEEP WELL

By Taking Lydia E. Pinkham's Vegetable Compound Here is Proof

St. Paul, Minn.—"Here is a little advice I would like to have you put in the papers, Mrs. Jack Lorbetter of 704 Dellwood Place wrote to the Lydia E. Pinkham Medicine Company. "If young women want to keep their health and strength for the next thirty years of their lives, it is best to start in right now and take Lydia E. Pinkham's Vegetable Compound. I have tried the Compound myself and received fine results from its use." In describing her condition before taking the Compound, she writes, "I was afraid to be my own house in broad daylight. I used to look like a ghost and pull down the shades so that nobody could see me." One day a booklet describing the Vegetable Compound was left on her porch and she read it through. In so doing, she found a letter from a woman whose condition was similar to her own. "I bought Lydia E. Pinkham's Vegetable Compound," Mrs. Lorbetter continued, "and have had fine results. My condition made me a burden to my husband. Now I ask him, 'How is housekeeping?' and he says, 'It is just like being in Heaven!' Are you on the Sunlit Road to Better Health?

Water of hot springs seldom has a temperature higher than the boiling point.



Here's the place where flies and disease germs breed

but it's easy and inexpensive to get rid of them this proven way

Flies and disease germs breed and live in filth. And flies carry the disease germs—especially those of typhoid—wherever they go—on their tramping around on the food you eat.

Physicians and health authorities everywhere recommend the simple method of getting rid of these deadly flies and germs. Sprinkle Fly Knocker a can of pure, high-test Lewis' Lye—scatter it around wherever flies congregate and where you suspect germs exist—everywhere we recommend this simple method of getting rid of these deadly flies and germs. Fly Knocker is a can of pure, high-test Lewis' Lye—powdered to sift easily through the sprinkler top. Remember, Fly Knocker is not a can of typhoid—it will do you no harm. Directions for use are on the can. Sold by grocers, druggists also sell bottles of 24 and 100.

You can't be sure of success unless you use

LEWIS' LYE

Ye Gods! Another Atrocity

Flyosan still killing flies and mosquitoes by the millions

A $5 pen will fighting flies and mosquitoes by sweeting them one at a time? Or do you use Flyosan—a great and fast liquid spray (non-poisonous)—which wipes them out by the wholesale?

Mosquitoes and the nuisance brand—fly, the deadliest pests that intrude the home, are loaded with millions of disease germs.

"Swatting" them annoys them deadly germs into the air which you and your family breathe.

Flyosan fests them to your room. It destroys all these germs as well as all the flies and mosquitoes which carry them.

Flyosan is harmless to human beings. Insects die for such insects. Its odor otherwise disagreeable.

Here is the right insecticide for each insect:

FLYOSAN, *Liquid Spray*—kills flies and mosquitoes.

PETERMAN'S ANT FOOD—exterminates ants.

PETERMAN'S INSECTICIDE, *Liquid*—exterminates bedbugs.

PETERMAN'S ROACH FOOD—exterminates that cockroach array.

PETERMAN'S MOTH FOOD—protects against moths.

You must have a specific insecticide for each insect. No single insecticide will exterminate them all. We have had nearly 50 years' experience. We know that is true.

Peterman's

209 Fifth Ave., N. Y. C.

Council Proceedings

Council Chambers, August 22, 1927.

The Common Council of the City of Charlevoix met on the above date, with Mayor Bergeon presiding. Aid present, Bridge, Geiken, Howe, Livingston, Partridge.

The Finance committee submitted the following report. Having examined the following bills aggregating $3715.29 find them correct and recommend they be allowed.

To the Honorable: Aug. 22, 1927.

The Mayor and Common Council of the City of Charlevoix:

Gentlemen:—Your Finance committee having examined the following bills, find them correct and recommend they be allowed:

CONTINGENT FUND

Arthur Bergeon, salary	31 25
Lephie Hammond, salary	52 08
D S Payton, salary	70 83
Bessie Murphy, salary	24 00
City Band, concerts	100 00

Moved by Ald Bridge, seconded by Ald Livingston that the bills be allowed, motion carried by the following aye and nay vote. Ayes—Ald Bridge, Geiken, Livingston, Partridge Howe. Nays—None.

On motion duly made the council adjourned. Ray S. Hamilton, City Clerk.

By D S. Payton, Deputy

School Has One Student

Mrs. Helene Castle constitutes the faculty and Helen Chesbrough is the student body of the Elk Mountain (Wyo.) high school. Last year, when Helen was in the eighth grade, Elk Mountain had no high school. After her graduation, the school board, composed of Helen's parents and one other person, decided to move for higher education. They abolished the grammar school and established the high school. Wyoming has more than 200 one-year and two-pupil grammar schools, but this is the only one-student high school.

ST. IGNACE PASTOR PRESIDES AT STATE HISTORICAL MEET

St. Ignace—The Rev. Fr. John T. Holland, pastor of St. Ignatius' Catholic church, here, will preside at the forthcoming session of the Michigan Historical society convention. The session will be the two hundred and fiftieth anniversary of the burial of Pere Marquette on the site of the old St. Ignace mission and the fiftieth anniversary of the discovery of his grave. It will mark the formal reopening of the old church building, at which services were held for the first time in 1837. The Rt. Rev. P. J. Nussbaum, D. D., Bishop of Marquette, and the Rev. Fr. William F. Gagnieur, S. J., of Sault Saint Marie, will be among the speakers.

PRIEST WAS NOBLEMAN; SUCCUMBS TO HEART ATTACK

The Rev. Louis Von Kovacs, pastor of Holy Cross (Hungarian) church, Detroit, was buried recently from the church he had built. He succumbed to a sudden heart attack. Father Von Kovacs, who was the son of a Hungarian noble and who was entitled to call himself "Count Von Kovacs", came to the United States 18 years ago to do missionary work among his countrymen in America. He was highly successful in his work and at the time of his death Holy Cross Church was one of the largest Hungarian edifices in the U. S. John Cardinal Csernoch, primate of Hungary, made a special visit to the church last year on the occasion of his trip to the Eucharistic Congress at Chicago.

FORMER GRAND RAPIDS NUN HEADS GOOD SHEPHERD HOME

Grand Rapids, Mich.—Sister Mary of St. Patricia, a native of Grand Rapids, whose family name is Golden, has been appointed superior of the House of the Good Shepherd here. The new superior is a sister of Sister Mary of St. Anne, who for 18 years has been an influential worker among wayward girls in this city. The two sisters will celebrate the twenty-fifth anniversary of their entrance into the order next year.

The Rev. Benedict Mueller, O. M. Cap., formerly rector of St. Lawrence's college, Mt. Calvary, Wis., was elected provincial superior of the St. Joseph province of the Capuchin Fathers at a recent meeting held at St. Bonaventure's Monastery, Detroit. Father Mueller succeeds the Rev. Benno Aichinger, O. M. Cap.

Card of Thanks—We desire to thank our friends for the kinkly attention and expressions of sympathy shown and expressed in our recent bereavement and our appreciation to the fraternal order I O.O.F.

Charcoal Formation

Charcoal is the carbonaceous substance left from wood after its other elements have been driven off by heating, without allowing it to undergo combustion. This is done by burning the wood with only a limited supply of air, so that the other elements are consumed while the carbon remains almost undiminished.

Large Breed of Rabbits

The gray Flemish giants are the largest rabbits bred by American fanciers. They attain their full development at about fifteen months, when the bucks should weigh 13 pounds or more and the does not less than 15 pounds. The adult has the appendage known as "dewlap" well developed.

LEGAL NOTICES

Order Appointing Time for Hearing Claims

STATE OF MICHIGAN — The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate office in the City of Charlevoix, in said County, on the 11th day of August A.D. 1927.

MORTGAGE SALE

DEFAULT having been made in the conditions of a certain mortgage executed by Martha J. Ayers of Charlevoix, Michigan, to Frederick W. Mayne of Charlevoix, Michigan, dated the 29th day of May, 1922, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, on the 29th day of May, 1922, in liber 64 of mortgages on page 35, which mortgage was afterwards sold, assigned and transferred by Charlotte A. Mayne, as Administratrix of the Estate of Frederick W. Mayne, deceased, unto Charlotte A. Mayne of Charlevoix, Michigan, by assignment of mortgage dated June 27th, 1925, and recorded in the office of the Register of Deeds for Charlevoix County, Michigan, June 27th, 1925, in liber 50 of Deeds on page 414, on which mortgage there is claimed to be due at date of this notice the sum of NINE HUNDRED TWENTY AND 65-100 DOLLARS, including the principal sum due with interest, together with an attorney fee of thirty-five dollars as provided for by the said mortgage, and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas, the taxes required by the statutes to be paid on said mortgage were duly paid prior to the recording thereof; now therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by the said mortgage, at public auction, to the highest bidder therefor, at the front door of the Court House in the City of Charlevoix, Charlevoix County, Michigan, (that being the place where the Circuit Court for the County of Charlevoix is held), on Saturday, the 29th day of October, 1927, at TEN o'clock in the forenoon on that date.

The premises described in said mortgage being the lands, premises and property situated in the City of Charlevoix, County of Charlevoix and State of Michigan, described as follows, to-wit: Lots Seventy-eight, Seventy-nine and the East ten feet of Lot Seventy-seven of Upright and Huribut's Addition to the Village (now city) of Charlevoix, Michigan.

Dated August 2nd, 1927.

Charlotte A. Mayne,
Assignee of Mortgagee.

Lisle Shanahan, Attorney for Assignee of Mortgage. 108 Clinton Street, Charlevoix, Michigan. 15-13t

STATE OF MICHIGAN — The Circuit Court for the County of Charlevoix, —In Chancery.

Nina Hughey, by William Bowman, her next friend, Plaintiff.
vs.
Frank Hughey, Defendant.

Order for Publication—Defendant's Residence Unknown.

Suit pending in the Circuit Court for Charlevoix county, In Chancery, on the 23rd day of May, A.D. 1927, at the City of Charlevoix, in said county.

It satisfactorily appearing to the Court by affidavit on file that a chancery summons has been duly issued out of and under the seal of said court, for the appearance of said defendant therein, and that the same could not be served on said defendant because that after diligent search and inquiry it could not be ascertained in what state or county the said defendant resides, or the whereabouts of said defendant learned, and that said chancery summons has been returned by the sheriff of said county with his certificate thereon endorsed that after diligent search and inquiry he was unable to find the said defendant within the state of Michigan on or before the return day of said summons, on motion of Clink & Williams, attorneys for said plaintiff,

It is Ordered, That the said defendant, Frank Hughey, cause his appearance to be entered in this cause within three months after the date of this order, and in case of his appearance that he cause his answer to the plaintiff's bill of complaint to be filed, and a copy thereof served upon the plaiutiff's attorneys, within twenty days after service on him of a copy of said bill and notice of this order, and that in default thereof said bill to be taken as confessed by said defendant,

And in like motion, It is Further Ordered, That within twenty days after the date hereof, the plaintiff cause a notice of this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in said county of Charlevoix, and that such publication be continued at least once in each week, for six weeks in succession, or that he cause a copy of this order to be personally served upon said defendant, at least twenty days before the time above prescribed for his appearance,

And on like motion, It is Further Ordered, That the said plaintiff cause a copy of this order to be mailed to said defendant, at his last known postoffice address, by registered mail, and a return receipt demanded, at least twenty days before the date herein prescribed for his appearance

Business Address: East Jordan, Michigan.

STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the City of Charlevoix in said County, on the 4th day of August, A. D, 1927.

Present: Hon. Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of Edward B. Ward, deceased.

Annie E. Ward having filed in said court her petition, praying for license to sell the interest of said estate in certain real estate therein described.

It is ordered, that the 1st day of September, A. D. 1927, at ten o'clock in the forenoon, at said probate office, be and is hereby appointed for hearing said petition, and that all persons interested in said estate appear before said court, at said time and place, to show cause why a license to sell the interest of said estate in said real estate should not be granted.

It is further ordered, that public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix Sentinel, a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
16-3t Judge of Probate.

Order Appointing Time for Hearing Claims.

Alva Yeider, Plaintiff,
vs.
O. A. Bennett and one "Carter" whose first or given name is unknown, both of the State of Illinois, Defendant.

Notice is hereby given that on the 18th day of April, A.D. 1927, a writ of attachment was issued out of said court in favor of Alva Yeider, as plaintiff, and against the lands, tenements, goods and chattels, moneys and effects of O. A. Bennett and one "Carter" whose first or given name is unknown, both of the State of Illinois, as defendants for the sum of Six Hundred Thirty Five and 30-100 Dollars, which said writ was returnable on the 30th day of June A.D. 1927.

Dated July 21st, 1927.

LISLE SHANAHAN,
14-6t Attorney for Plaintiff.
Business Address, 108 Clinton Street, Charlevoix, Michigan.

STATE OF MICHIGAN — The Circuit Court for the County of Charlevoix— In Chancery.

Suit pending in Circuit Court for the County of Charlevoix. In Chancery.

At the city of Charlevoix, Charlevoix county, Michigan on the 21st day of July A.D. 1927, Hugh R. Boyle, Plaintiff vs. Margaret McCormick Boyle, Defendant.

In this cause it appearing that the defendant, Margaret McCormick Boyle is not a resident of the State of Michigan, but is a resident of the State of New York; therefore on motion of Lisle Shanahan, attorney for the plaintiff, it is ordered, that the defendant enter her appearance in said cause on or before three months from the date of this order to defend the said plaintiff's action for a decree of divorce; and that within forty days the plaintiff cause this order to be published in the Charlevoix Sentinel, a newspaper published and circulated in the said county of Charlevoix, Michigan, said publication to be continued once in each week for six weeks in succession.

And it is further ordered, That the said plaintiff cause a copy of this order to be mailed to said defendant, if her last known post office address can be ascertained, by registered mail, and a return receipt demanded, at least twenty days before the date herein prescribed for her appearance. Notice of Chancery Sale

STATE OF MICHIGAN—In the Circuit Court for the County of Charlevoix —In Chancery.

Walter S. Baer, as Trustee, Plaintiff vs. Estate of Harry L. Oldham, deceased; Grace L. Oldham, executrix of said estate; Grace L. Oldham; Grace L. Oldham, trustee under the will of the said Harry L. Oldham, deceased; Grace L. Oldham, guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., minors and Robert Bridge, Defendants.

In pursuance and by virtue of an order and decree of the Circuit Court for the County of Charlevoix, Michigan. In Chancery, dated the sixth day of April A. D, 1927, in the above cause in said Court pending wherein Walter S. Baer, as trustee is plaintiff and the Estate of Harry L. Oldham, deceased; Grace L. Oldham, executrix of said estate; Grace L. Oldham; Grace L. Oldham, trustee under the will of the said Harry L. Oldham, deceased; Grace L. Oldham, guardian of the estate of Morella Oldham, Marcia Oldham and Harry L. Oldham, Jr., minors and Robert Bridge, Defendants, said suit having been filed to foreclose a mortgage on which, by the terms of said decree, there was due on the date of said decree for principal and insurance premiums the sum of Sixteen thousand three hundred fifty-four and 40-100 Dollars, and a further sum of Thirty-eight and 80-100 Dollars costs of the said plaintiff by him about his suit in this behalf expended together with an attorney fee of five hundred dollars, making a total of Sixteen thousand eight hundred ninety-three and 29-100 dollars with interest at the rate of seven per centum per annum from date of said decree.

Notice is hereby given, that I shall sell at public auction to the highest bidder at the East front door of the Court house in the City of Charlevoix, County of Charlevoix and State of Michigan, (said Court house being the place for holding the Circuit Court for said County), on the third day of September A.D. 1927, at ten o'clock in the forenoon of said day, Central Standard Time, all or so much thereof as may be necessary of the land and premises hereinafter described, to raise the amount due to said plaintiff by the terms of said decree, together with principal, interest and costs due said plaintiff at the time of said sale.

The premises to be sold are described as follows, to-wit: All of that certain piece or parcel of land situate in the City of Charlevoix, County of Charlevoix and State of Michigan and more particularly described as follows, to wit: Lot Four in Block Seventeen of the Village (now city) of Charlevoix, Michigan, together with all buildings, improvements and appurtenances now standing on said premises, or any part thereof, including all window screens, door screens, curtain fixtures, furnaces, gas and electric light fixtures, and steam and other heating apparatus, and any and all other fixtures that may be placed in any building now standing upon said premises, together with all rents, issues and profits which shall hereafter accrue from said premises

Dated at Charlevoix, Mich., July 20, 1927.
